MICROPAC INDUSTRIES, INC.

NOTES TO CONDENSED FINANCIAL STATEMENTS  
(Unaudited)

Note 1 BASIS OF PRESENTATION

Business Description

Micropac Industries, Inc. (the "Company"), a Delaware corporation, manufactures and distributes various types of hybrid microelectronic circuits, solid state relays, power operational amplifiers, and optoelectronic components and assemblies. The Company's products are used as components in a broad range of military, space and industrial systems, including aircraft instrumentation and navigation systems, power supplies, electronic controls, computers, medical devices, and high-temperature (200o C) products. The Company's products are either custom (being application specific circuits designed and manufactured to meet the particular requirements of a single customer) or standard, proprietary components such as catalog items.

The Company's facilities are certified and qualified by Defense Logistics Agency (DLA) to MIL-PRF-38534 (class K-space level), MIL-PRF-19500 JANS (space level), and MIL-PRF-28750 (class K-space level) and is certified to ISO 9001-2002. Micropac is a NASA core supplier, and is registered to AS9100-Aerospace Industry standard for supplier certification.

The Company's core technology is the packaging and interconnecting of miniature electronic components, utilizing thick film and thin film substrates, and forming microelectronics circuits. Other technologies include light emitting and light sensitive materials and products, including light emitting diodes and silicon phototransistors used in the Company's optoelectronic components and assemblies.

In the opinion of management, the unaudited financial statements include all adjustments (consisting of only normal, recurring adjustments) necessary to present fairly the financial position as of February 25, 2012, the results of operations for the three months ended February 25, 2012and February 26, 2011, and the cash flows for the three monthsended February 25, 2012and February 26, 2011. Unaudited financial statements are prepared on a basis substantially consistent with those audited for the year ended November 30, 2011. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States have been condensed or omitted pursuant to the rules and regulations promulgated by the Securities and Exchange Commission. However, management believes that the disclosures contained are adequate to make the information presented not misleading.

Note 2 SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of sales and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition

Revenues are recorded as shipments are made based upon contract prices. Any losses anticipated on fixed price contracts are provided for currently. Sales are recorded net of sales returns, allowances and discounts.

The Company recognizes revenue in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Subtopic 605-10-S99, Revenue Recognition (ASC 605-10-S99). ASC 605-10-S99 requires that four basic criteria must be met before revenues can be recognized: (1) persuasive evidence of an arrangement exists; (2) shipment has occurred or services have been rendered; (3) the fee is fixed and determinable; and (4) collectibility is reasonably assured.

Deferred revenue represents prepayments from customers and will be recognized as revenue when the products are shipped per the terms of the contract.

#### Short-Term Investments

The Company has \$2,003,000 in short term investments at February 25, 2012. Short-term investments consist of certificates of deposits with maturities greater than 90 days. These investments are reported at historical cost, which approximates fair value. All highly liquid investments with maturities of 90 days or less are classified as cash equivalents. All short-term investments are securities which the Company has the ability and intent to hold to maturity and mature within one year.

### Inventories

Inventories are stated at lower of cost or market value and include material, labor and manufacturing overhead. All inventories are valued using the FIFO (first-in, first-out) method of inventory valuation. The Company writes down obsolete and overstocked inventory based on the usage of inventory over a three year period and projected usage based on current backlog.

### Income Taxes

The Company accounts for income taxes using the asset and liability method. Under this method the Company records deferred income taxes for the temporary differences between the financial reporting basis and the tax basis of assets and liabilities at enacted tax rates expected to be in effect when such amounts are realized or settled. The resulting deferred tax liabilities and assets are adjusted to reflect changes in tax law or rates in the period that includes the enactment date.

### Property, Plant, and Equipment

Property, plant, and equipment are carried at cost, and depreciation is provided using the straight-line method at rates based upon the following estimated useful lives (in years) of the assets:

Buildings	15
Facility improvements	8-15
Machinery and equipment	5-10
Furniture and fixtures	5-8

The Company assesses long-lived assets for impairment under ASC 360-10-35, Property, Plant and Equipment – Subsequent Measurement. When events or circumstances indicate that an asset may be impaired, an assessment is performed. The estimated future undiscounted cash flows associated with the asset are compared to the asset’s net book value to determine if a write down to market value less cost to sell is required.

Repairs and maintenance are expensed as incurred. Improvements which extend the useful life of property, plant, and equipment are capitalized.

### Research and Development Costs

Costs for the design and development of new products are expensed as incurred.

### Note 3 FAIR VALUE MEASUREMENT

The Company had no financial assets and liabilities measured at fair value on a recurring basis as of February 25, 2012 and November 30, 2011. The fair value of financial instruments such as cash and cash equivalents, short term investments, accounts receivable, and accounts payable approximate their carrying amount based on the short maturity of these instruments. There were no nonfinancial assets measured at fair value on a nonrecurring basis at February 25, 2012 and November 30, 2011.

### Note 4 RELATED PARTIES

Mr. Eugene Robinson, a director and member of the Company’s audit committee, provides advisory services to the Company. Mr. Robinson was not paid any advisory services fees in the first quarters of 2012 and 2011.

Note 5 STOCK-BASED COMPENSATION

On March 1, 2001, the Company's shareholders approved the 2001 Employee Stock Option Plan (the "Stock Plan") with 500,000 options available to be granted. No options have been granted to date.

Note 6 COMMITMENTS

On June 1, 2011, the Company renewed a \$6,000,000 revolving line of credit agreement with a Texas banking institution for a term of two years. The interest rate is equal to the prime rate. The line of credit requires that the Company maintain a quick ratio of at least 1:1, maintain a tangible net worth of \$10,000,000 and maintain a total liabilities to tangible net worth of less than 1.25:1. The Company has not, to date, used any of the available line of credit. The Company is currently in compliance with such financial requirements, but there is no guarantee that the Company will remain in compliance. If the Company does not maintain compliance with each of the requirements, its ability to receive advances from the line of credit will be impaired.

Note 7 EARNINGS PER COMMON SHARE

Basic and diluted earnings per share are computed based upon the weighted average number of shares outstanding during the respective periods. Diluted earnings per share give effect to all dilutive potential common shares. For the three months ended February 25, 2012 and February 26, 2011, the Company had no dilutive potential common stock.

Note 8 SHAREHOLDERS' EQUITY

On December 16, 2010, the Board of Directors of Micropac Industries, Inc. approved the payment of a special dividend of \$0.10 per share for shareholders of record as of January 18, 2011. The dividend was paid to the shareholders on February 10, 2011.

On December 12, 2011, the Board of Directors of Micropac Industries, Inc. approved the payment of a special dividend of \$0.10 per share for shareholders of record as of January 18, 2012. The dividend was paid to the Company's shareholders on February 14, 2012.

Note 9 SUBSEQUENT EVENTS

Management has evaluated subsequent events after the balance sheet date, through the issuance of the financial statements, for appropriate accounting and disclosure.

MICROPAC INDUSTRIES, INC.

(Unaudited)

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

## Business

Micropac Industries, Inc. (the "Company"), a Delaware corporation, manufactures and distributes various types of hybrid microelectronic circuits, solid state relays, power operational amplifiers, and optoelectronic components and assemblies. The Company's products are used as components in a broad range of military, space and industrial systems, including aircraft instrumentation and navigation systems, power supplies, electronic controls, computers, medical devices, and high-temperature (200o C) products. The Company's products are either custom (being application specific circuits designed and manufactured to meet the particular requirements of a single customer) or standard, proprietary components such as catalog items.

The Company's facilities are certified and qualified by Defense Logistics Agency (DLA) to MIL-PRF-38534 (class K-space level), MIL-PRF-19500 JANS (space level), and MIL-PRF-28750 (class K-space level) and is certified to ISO 9001-2002. Micropac is a NASA core supplier, and is registered to AS9100-Aerospace Industry standard for supplier certification.

The Company's core technology is the packaging and interconnect of miniature electronic components, utilizing thick film and thin film substrates, and forming microelectronics circuits. Other technologies include light emitting and light sensitive materials and products, including light emitting diodes and silicon phototransistors used in the Company's optoelectronic components and assemblies.

## Results of Operations

	Three months ended			
	2/25/2012		2/26/2011	
NET SALES	100.0	%	100.0	%
COST AND EXPENSES:				
Cost of Goods Sold	70.1	%	60.9	%
Research and development	3.3	%	2.7	%
Selling, general & administrative expenses	23.4	%	17.5	%
Total cost and expenses	96.8	%	81.1	%
OPERATING INCOME BEFORE INTEREST AND INCOME TAXES	3.2	%	18.9	%
Interest and other income	0.1	%	0.0	%
INCOME BEFORE TAXES	3.3	%	18.9	%
Provision for taxes	1.2	%	6.8	%
NET INCOME	2.1	%	12.1	%

Sales for the first quarter ended February 25, 2012 totaled \$3,714,000. Sales for the first quarter decreased 33.6% or \$1,876,000 below sales for the same period of 2011. Sales were 21% in the commercial market, 59% in the military market, and 20% in the space market compared to 21% in the commercial market, 44% in the military market, and 35% in the space market for the same period of 2011. The major decrease in sales was in microcircuits space level products with a delay or decrease in new orders in the space industry and a delay in a new order for a custom military optoelectronics product. The Company received a purchase order of the custom military optoelectronics product in February 2012 with shipments starting in March 2012.

Two customers accounted for 13% and 10% of the Company's sales for the first quarter of 2012 while one customer accounted for 17% of the Company's sales for the first quarter of 2011.

The Company's management expects sales and operating income to decrease in 2012 as compared to 2011, based on the current backlog of space level product. The Company anticipates new orders for space level products in the second half of 2012, however with long lead times on material purchases the majority of shipments will occur in future years.

Cost of goods sold for the first quarter 2012 versus 2011 totaled 70.1% and 60.9% of net sales, respectively. The increase in cost of goods sold as a percentage of sales resulted from the lower sales overall as well as mix of products with a decrease in sales of products with higher margins. Cost of goods sold decreased \$797,000 in the first quarter of 2012 as compared to 2011 with a decrease in material cost of \$544,000, labor cost of \$41,000 and overhead cost of \$212,000. The majority of the overhead cost decrease was associated with employees retiring not being replaced.

Research and development cost decreased \$27,000 for the first quarter of 2012 compared to the same period of 2011. The research and development expenditures were associated with continued development of power management products.

Selling, general and administrative expenses for the first quarter of 2012 totaled 23.4% of net sales, compared to 17.5% for the same period in 2011. Selling, general and administrative expenses decreased \$112,000 in the first quarter of 2012 as compared to 2011. The major decrease was associated with a reduction in overall administrative cost with several administrative employees leaving the Company for other opportunities and a reduction in commission expenses with the lower sales.

Provisions for taxes decreased \$337,000 for the first quarter of 2012 compared to the same period in 2011. The estimated effective tax rate was 36% for both periods.

#### Liquidity and Capital Resources

Cash and cash equivalents totaled \$7,781,000 as of February 25, 2012 compared to \$8,488,000 on November 30, 2011, a decrease of \$707,000. The decrease in cash and cash equivalents is primarily attributable to \$382,000 cash used in operations, the payment of a cash dividend of \$258,000, and the investment of \$64,000 in equipment.

On June 1, 2011, the Company renewed a \$6,000,000 revolving line of credit agreement with a Texas banking institution for a term of two years. The interest rate is equal to the prime rate. The line of credit requires that the Company maintain a quick ratio of at least 1:1, maintain a tangible net worth of \$10,000,000 and maintain a total liabilities to tangible net worth of less than 1.25:1. The Company has not, to date, used any of the available line of credit. The Company is currently in compliance with such financial requirements, but there is no guarantee that the Company will remain in compliance. If the Company does not maintain compliance with each of the requirements, its ability to receive advances from the line of credit will be impaired.

#### Outlook

New orders for the first quarter of 2012 totaled \$4,174,000 compared to \$3,953,000 for the comparable period of 2011, an increase of 6%.

Backlog totaled \$6,768,000 on February 25, 2012 compared to \$9,819,000 as of February 26, 2011 and \$6,231,000 on November 30, 2011.

The decrease in backlog is primarily attributable to a delay or decrease in new orders in the space level products during the second half of 2011 and continuing into 2012. The Company anticipates new orders for space level products in the second half of 2012, however with long lead times on material purchases the majority of shipments will occur in future years. The majority of the backlog is shippable in the next twelve months.

The Company cannot assure that the results of operations for the interim period presented are indicative of total results for the entire year due to fluctuations in customer delivery schedules, or other factors over which the Company has no control.

#### Cautionary Statement

This Form 10-Q contains forward-looking statements that are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Actual results could differ materially. Investors are warned that forward-looking statements involve risks and unknown factors including, but not limited to, customer cancellation or rescheduling of orders, problems affecting delivery of vendor-supplied raw materials and components, unanticipated manufacturing problems and availability of direct labor resources.

The Company produces silicon phototransistors and light emitting diode die for use in certain military, standard and custom products. Fabrication efforts sometimes may not result in successful results, limiting the availability of these components. Competitors offer commercial level alternatives and our customers may purchase our competitors' products if the Company is not able to manufacture the products using these technologies to meet the customer demands. Approximately \$2,363,000 of the Company's backlog is dependent on these semiconductors.

The Company disclaims any responsibility to update the forward-looking statements contained herein, except as may be required by law.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

The Chief Executive Officer and Chief Financial Officer of the Company evaluated the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15 (e)) as of February 25, 2012 and, based on this evaluation, concluded that the Company's disclosure controls and procedures are functioning in an effective manner to ensure that the information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act, is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms.

(b) Changes in internal controls.

There has been no change in the Company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting during the three month period ended February 25, 2012.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is not involved in any material current or pending legal proceedings.

ITEM 1A RISK FACTORS

Information about risk factors for the three months ended February 25, 2012 does not differ materially from that set forth in Part I, Item 1A, of our Annual Report on Form 10-K for the year ended November 30, 2011.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES
