Item 2.02. Results of Operations and Financial Condition

U.S. Energy Corp. (“U.S. Energy” or the “Company”) published a press release dated August 11, 2014 reporting its second quarter 2014 highlights and selected financial results for the quarter ended June 30, 2014 and providing an operational update. A copy of the press release is attached hereto as Exhibit 99.1 and is incorporated by reference herein.

Section 9: Financial Statements and Exhibits

Item 9.01. Financial Statements and Exhibits.

Exhibit 99.1. Press Release dated August 11, 2014.

Safe Harbor Statement

Statements made in the exhibit hereto other than statements of historical fact are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward looking statements in the exhibit relate to, among other things, U.S. Energy’s expected future production and capital expenditures and projects (including projects to be pursued with its industry partners), its drilling and fracing of wells with industry partners and potential additional drilling and development opportunities, its ownership interests in those wells, the oil and natural gas targets or goals for the wells, future capital expenditures and projects, and future expenses, production and costs. There is no assurance that any of the wells referenced in the exhibit will be economic. Initial and current production results from a well are not necessarily indicative of its longer-term performance. The forward-looking statements are made pursuant to the safe harbor provision of the Private Securities Litigation Reform Act of 1995. Forward-looking statements inherently involve risks and uncertainties that could cause actual results to differ materially from the forward-looking statements. Factors that would cause or contribute to such differences include, but are not limited to, dry holes and other unsuccessful development activities, higher than expected expenses or decline rates from production wells, future trends in commodity prices, the availability of capital, competitive factors, and other risks described in the Company's filings with the SEC (including, without limitation, the Form 10-K for the year ended December 31, 2013).

The forward-looking statements referenced above are made only as of the date of the exhibit. The Company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
