ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2014
or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to
Commission File No. 0-31525

AMERICAN RIVER BANKSHARES

(Exact name of registrant as specified in its charter)

California 68-0352144
State or other jurisdiction of (IRS Employer Identification No.)
incorporation or organization

3100 Zinfandel Drive, Rancho Cordova, California 95670
(Address of principal executive offices) (Zip code)
Registrant's telephone number, including area code 916-851-0123

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange On Which Registered
Common Stock, no par value	NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act:

None

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter. \$64,358,000.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date.

As of February 26, 2015, the registrant's no par value Common Stock totaled 7,685,134 shares outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

The following documents are incorporated by reference into this Form 10-K: Part III, Items 10 through 14 from Registrant's definitive proxy statement for the 2015 annual meeting of shareholders.

Cautionary Statements Regarding Forward-Looking Statements

Certain matters discussed or incorporated by reference in this Annual Report on Form 10-K including, but not limited to, matters described in “Item 7 - Management’s Discussion and Analysis of Financial Condition and Results of Operations,” are “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, Section 27A of the Securities Act of 1933, as amended, and subject to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may contain words related to future projections including, but not limited to, words such as “believe,” “expect,” “anticipate,” “intend,” “may,” “will,” “should,” “could,” “would,” and variations of those words and similar words that are subject to risks, uncertainties and other factors that could cause actual results to differ significantly from those projected. Factors that could cause or contribute to such differences include, but are not limited to, the following:

- the legislation promulgated by the United States Congress and actions taken by governmental agencies, including the United States Department of the Treasury, to deal with challenges to the U.S. financial system;
- the risks presented by economic volatility and recession, which could adversely affect credit quality, collateral values, including real estate collateral, investment values, liquidity and loan originations and loan portfolio delinquency rates;
- variances in the actual versus projected growth in assets and return on assets;
- potential loan and lease losses;
- potential expenses associated with resolving nonperforming assets as well as regulatory changes;
- changes in the interest rate environment including interest rates charged on loans, earned on securities investments and paid on deposits and other borrowed funds;
- competitive effects;
- potential declines in fee and other noninterest income earned associated with economic factors, as well as regulatory changes;
- general economic conditions nationally, regionally, and within our operating markets could be less favorable than expected or could have a more direct and pronounced effect on us than expected and adversely affect our ability to continue internal growth at historical rates and maintain the quality of our earning assets;
- changes in the regulatory environment including increased capital and regulatory compliance requirements and further government intervention in the U.S. financial system;
- changes in business conditions and inflation;
- changes in securities markets, public debt markets, and other capital markets;
- potential data processing and other operational systems failures or fraud;
- potential decline in real estate values in our operating markets;
- the effects of uncontrollable events such as terrorism, the threat of terrorism or the impact of military conflicts in connection with the conduct of the war on terrorism by the United States and its allies, negative financial and economic conditions, natural disasters, and disruption of power supplies and communications;
- changes in accounting standards, tax laws or regulations and interpretations of such standards, laws or regulations;
- projected business increases following any future strategic expansion could be lower than expected;
- the goodwill we have recorded in connection with acquisitions could become impaired, which may have an adverse impact on our earnings;

the reputation of the financial services industry could experience further deterioration, which could adversely affect our ability to access markets for funding and to acquire and retain customers;
the efficiencies we may expect to receive from any investments in personnel and infrastructure may not be realized;
and
downgrades in the credit rating of the United States by credit rating agencies.

3

The factors set forth under “Item 1A-Risk Factors” in this report and other cautionary statements and information set forth in this report should be carefully considered and understood as being applicable to all related forward-looking statements contained in this report, when evaluating the business prospects of the Company and its subsidiaries.

Forward-looking statements are not guarantees of performance. By their nature, they involve risks, uncertainties and assumptions. The future results and shareholder values may differ significantly from those expressed in these forward-looking statements. You are cautioned not to put undue reliance on any forward-looking statement. Any such statement speaks only as of the date of this report, and in the case of any documents that may be incorporated by reference, as of the date of those documents. We do not undertake any obligation to update or release any revisions to any forward-looking statements, to report any new information, future event or other circumstances after the date of this report or to reflect the occurrence of unanticipated events, except as required by law. However, your attention is directed to any further disclosures made on related subjects in our subsequent reports filed with the Securities and Exchange Commission (the “SEC”) on Forms 10-K, 10-Q and 8-K.

Introduction

American River Bankshares (the “Company”) is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. The Company was incorporated under the laws of the State of California in 1995. As a bank holding company, the Company is authorized to engage in the activities permitted under the Bank Holding Company Act of 1956, as amended, and regulations thereunder. Its principal office is located at 3100 Zinfandel Drive, Suite 450, Rancho Cordova, California 95670 and its telephone number is (916) 851-0123.

The Company owns 100% of the issued and outstanding common shares of its banking subsidiary, American River Bank, and American River Financial, a California corporation which has been inactive since its incorporation in 2003.

American River Bank was incorporated and commenced business in Fair Oaks, California, in 1983 and thereafter moved its headquarters to Sacramento, California in 1985. American River Bank operates four full service offices in Sacramento County including the main office located at 1545 River Park Drive, Suite 107, Sacramento and branch offices in Sacramento and Gold River; one full service office in Placer County, located in Roseville; two full service offices in Sonoma County in Healdsburg and Santa Rosa; and three full service offices in Amador County in Jackson, Pioneer, and Ione. In addition, American River Bank operates a loan production office located in Santa Clara County. In 2000, North Coast Bank was acquired by the Company as a separate bank subsidiary. Effective December 31, 2003, North Coast Bank was merged with and into American River Bank. On December 3, 2004, the Company acquired Bank of Amador located in Jackson, California. Bank of Amador was merged with and into American River Bank.

American River Bank’s deposits are insured by the Federal Deposit Insurance Corporation (“FDIC”) up to applicable legal limits. On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”). The Dodd-Frank Act includes a permanent increase to \$250,000 as the maximum FDIC insurance limit per depositor retroactive to January 1, 2008 and the extension of unlimited FDIC insurance for noninterest-bearing transaction accounts effective December 31, 2010 through December 31, 2012. On November 9, 2010, the FDIC implemented a final rule to permanently increase the maximum insurance limit to \$250,000 under the Dodd-Frank Act. The unlimited insurance coverage for noninterest-bearing transaction accounts was not extended and terminated on December 31, 2012. The \$250,000 maximum deposit insurance amount per depositor remains in effect.

American River Bank does not offer trust services or international banking services and does not plan to do so in the near future. American River Bank’s primary business is serving the commercial banking needs of small to mid-sized businesses within those counties listed above. American River Bank accepts checking and savings deposits, offers money market deposit accounts and certificates of deposit, makes secured and unsecured commercial, secured real estate, and other installment and term loans and offers other customary banking services. American River Bank also

conducts lease financing for most types of business equipment, from computer software to heavy earth-moving equipment. American River Bank owns 100% of two inactive companies, ARBCO and American River Mortgage. ARBCO was formed in 1984 to conduct real estate development and has been inactive since 1995. American River Mortgage has been inactive since its formation in 1994.

During 2014, the Company conducted no significant activities other than holding the shares of its subsidiaries. However, it is authorized, with the prior approval of the Board of Governors of the Federal Reserve System (the “Board of Governors”), the Company’s principal regulator, to engage in a variety of activities which are deemed closely related to the business of banking.

The common stock of the Company is registered under the Securities Exchange Act of 1934, as amended, and is listed and traded on the Nasdaq Global Select Market under the symbol “AMRB.”

At December 31, 2014, the Company had consolidated assets of \$618 million, deposits of \$511 million and shareholders’ equity of \$90 million.

General

The Company is a regional bank holding company headquartered in Sacramento, California. The principal communities served are located in Sacramento, Placer, Yolo, El Dorado, Sonoma, and Amador counties. In addition, the Company serves Alameda, Contra Costa and Santa Clara Counties through a loan production office located in the City of San Jose. The Company generates most of its revenue by providing a wide range of products and services to small and middle-market businesses and individuals. The Company’s principal source of revenue comes from interest income. Interest income is derived from interest and fees on loans and leases, interest on investments (principally government securities), and Federal funds sold (funds loaned on a short-term basis to other banks). For the year ended December 31, 2014, these sources comprised 68.3%, 21.7%, and zero, respectively, of the Company’s interest income.

American River Bank’s deposits are not received from a single depositor or group of affiliated depositors, the loss of any one of which would have a materially adverse effect on the business of the Company. A material portion of American River Bank’s deposits are not concentrated within a single industry or group of related industries.

As of December 31, 2014 and December 31, 2013, American River Bank held \$29,000,000 in certificates of deposit for the State of California. In connection with these deposits, American River Bank is generally required to pledge securities to secure such deposits, except for the first \$250,000 insured by the FDIC.

Based on the most recent information made available by the FDIC through June 30, 2014, American River Bank competes with approximately 34 other banking or savings institutions in Sacramento County, 28 in Placer County, 18 in Sonoma County and 6 in Amador County. American River Bank’s market share of FDIC insured deposits in the service areas of Sacramento County was 1.0%, in Placer County was approximately 0.6%, in Sonoma County was approximately 0.7%, and in Amador County was approximately 14.8% (based upon the most recent information made available by the FDIC through June 30, 2014).

Employees

At December 31, 2014, the Company and its subsidiaries employed 106 persons on a full-time equivalent basis. The Company believes its employee relations are good.

Website Access

The Company maintains a website where certain information about the Company is posted. Through the website, its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments thereto, as well as Section 16 Reports and amendments thereto, are available as soon as reasonably practicable after

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-K

such material is electronically filed with or furnished to the SEC. These reports are free of charge and can be accessed through the address www.americanriverbank.com by accessing the *Investor Relations* link, then the *SEC Filings* link located at that address. Once you have selected the *SEC Filings* link you will have the option to access the Section 16 Reports or the reports filed on Forms 10-K, 10-Q and 8-K by the Company by selecting the appropriate link.

Supervision and Regulation

General

The common stock of the Company is subject to the registration requirements of the Securities Act of 1933, as amended, and the qualification requirements of the California Corporate Securities Law of 1968, as amended. The Company is also subject to the periodic reporting requirements of Section 13 of the Securities Exchange Act of 1934, as amended, which include, but are not limited to, annual, quarterly and other current reports with the SEC.

American River Bank is licensed by the California Commissioner of the Department of Business Oversight (the “Commissioner”), and its deposits are insured by the FDIC up to the applicable legal limits. On November 9, 2010, the FDIC implemented a final rule under the Dodd-Frank Act to permanently increase the maximum insurance limit to \$250,000 per depositor which remains in effect; however, the Dodd-Frank Act provision to permit unlimited insurance for noninterest-bearing transaction accounts expired on December 31, 2012. American River Bank has chosen not to become a member of the Federal Reserve System. Consequently, American River Bank is subject to the supervision of, and is regularly examined by, the Commissioner and the FDIC. The supervision and regulation includes comprehensive reviews of all major aspects of American River Bank’s business and condition, including its capital ratios, allowance for possible loan and lease losses and other factors. However, no inference should be drawn that such authorities have approved any such factors. American River Bankshares and American River Bank are required to file reports with the Board of Governors, the Commissioner, and the FDIC and provide any additional information that the Board of Governors, the Commissioner, and the FDIC may require.

On July 3, 2012, the California Legislature approved and adopted a reorganization plan proposed by Governor Jerry Brown that would restructure the California government with the goal of achieving more efficient, streamlined and cost-effective government. As part of the reorganization plan, the California Department of Financial Institutions (“DFI”) and the California Department of Corporations (“DOC”) were merged into a newly created Department of Business Oversight (“DBO”) with a single commissioner in charge of the DBO. Effective July 1, 2013, the former DFI and DOC became the Division of Financial Institutions and the Division of Corporations, respectively, under the DBO. It is uncertain what effect such reorganization plan may have upon regulation of American River Bank in the future.

American River Bankshares is a bank holding company within the meaning of the Bank Holding Company Act of 1956, as amended (the “Bank Holding Company Act”), and is registered as such with, and subject to the supervision of, the Board of Governors. The Company is required to obtain the approval of the Board of Governors before it may acquire all or substantially all of the assets of any bank, or ownership or control of the voting shares of any bank if, after giving effect to such acquisition of shares, the Company would own or control more than 5% of the voting shares of such bank. The Bank Holding Company Act prohibits the Company from acquiring any voting shares of, or interest in, all or substantially all of the assets of, a bank located outside the State of California unless such an acquisition is specifically authorized by the laws of the state in which such bank is located. Any such interstate acquisition is also subject to applicable California and federal law.

The Company, and any subsidiaries which it may acquire or organize, are deemed to be “affiliates” within the meaning of that term as defined in the Federal Reserve Act. This means, for example, that there are limitations (a) on loans by American River Bank to affiliates, and (b) on investments by American River Bank in affiliates’ stock as collateral for loans to any borrower. The Company and its subsidiaries are also subject to certain restrictions with respect to engaging in the underwriting, public sale and distribution of securities.

In addition, regulations of the Board of Governors under the Federal Reserve Act require that reserves be maintained by American River Bank in conjunction with any liability of the Company under any obligation (promissory note, acknowledgement of advance, banker's acceptance or similar obligation) with a weighted average maturity of less than seven (7) years to the extent that the proceeds of such obligations are used for the purpose of supplying funds to American River Bank for use in its banking business, or to maintain the availability of such funds.

Capital Standards

Risk-Based Capital. The Board of Governors and the FDIC have adopted risk-based capital guidelines for evaluating the capital adequacy of bank holding companies and banks. The guidelines are designed to make capital requirements sensitive to differences in risk profiles among banking organizations, to take into account off-balance sheet exposures and to aid in making the definition of bank capital uniform internationally. Under the guidelines, American River Bankshares and American River Bank are required to maintain capital equal to at least 8.0% of its assets and commitments to extend credit, weighted by risk, of which at least 4.0% must consist primarily of common equity (including retained earnings) and the remainder may consist of subordinated debt, cumulative preferred stock, or a limited amount of loan and lease loss reserves.

Assets, commitments to extend credit, and off-balance sheet items are categorized according to risk and certain assets considered to present less risk than others permit maintenance of capital at less than the 8% ratio. For example, most home mortgage loans are placed in a 50% risk category and therefore require maintenance of capital equal to 4% of those loans, while commercial loans are placed in a 100% risk category and therefore require maintenance of capital equal to 8% of those loans.

Under the risk-based capital guidelines, assets reported on an institution's balance sheet and certain off-balance sheet items are assigned to risk categories, each of which has an assigned risk weight. Capital ratios are calculated by dividing the institution's qualifying capital by its period-end risk-weighted assets. The guidelines establish two categories of qualifying capital: Tier 1 capital (defined to include common shareholders' equity and noncumulative perpetual preferred stock) and Tier 2 capital which includes, among other items, limited life (and in the case of banks, cumulative) preferred stock, mandatory convertible securities, subordinated debt and a limited amount of reserve for credit losses. Tier 2 capital may also include up to 45% of the pretax net unrealized gains on certain available-for-sale equity securities having readily determinable fair values (i.e., the excess, if any, of fair market value over the book value or historical cost of the investment security). The federal regulatory agencies reserve the right to exclude all or a portion of the unrealized gains upon a determination that the equity securities are not prudently valued. Unrealized gains and losses on other types of assets, such as bank premises and available-for-sale debt securities, are not included in Tier 2 capital, but may be taken into account in the evaluation of overall capital adequacy and net unrealized losses on available-for-sale equity securities will continue to be deducted from Tier 1 capital as a cushion against risk. Each institution is required to maintain a minimum risk-based capital ratio (including Tier 1 and Tier 2 capital) of 8%, of which at least half must be Tier 1 capital.

A leverage capital standard was adopted as a supplement to the risk-weighted capital guidelines. Under the leverage capital standard, an institution is required to maintain a minimum ratio of Tier 1 capital to the sum of its quarterly average total assets and quarterly average reserve for loan losses, less intangible assets not included in Tier 1 capital. Period-end assets may be used in place of quarterly average total assets on a case-by-case basis. The Board of Governors and the FDIC have also adopted a minimum leverage ratio for bank holding companies as a supplement to the risk-weighted capital guidelines. The leverage ratio establishes a minimum Tier 1 ratio of 3% (Tier 1 capital to total assets) for the highest rated bank holding companies or those that have implemented the risk-based capital market risk measure. All other bank holding companies must maintain a minimum Tier 1 leverage ratio of 4% with higher leverage capital ratios required for bank holding companies that have significant financial and/or operational weakness, a high risk profile, or are undergoing or anticipating rapid growth.

Effective January 1, 2015, the risk-based capital regulations are amended to the extent described below in "*Basel III - New Capital and Prompt Corrective Action Regulations.*"

Basel III – New Capital and Prompt Corrective Action Regulations. In July 2013, the federal bank regulatory agencies issued interim final rules that revise and replace the current risk-based capital requirements in order to implement the

“Basel III” regulatory capital reforms released by the Basel Committee on Banking Supervision and changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Basel III reforms reflected in the final rules include an increase in the risk-based capital requirements and certain changes to capital components and the calculation of risk-weighted assets.

Effective January 1, 2015, banking organizations like the Company and American River Bank must comply with new minimum capital ratio requirements to be phased-in between January 1, 2015 and January 1, 2019, which would consist of the following: (i) a new common equity Tier 1 capital to total risk weighted assets ratio of 4.5%; (ii) a Tier 1 capital to total risk weighted assets ratio of 6% (increased from 4%); (iii) a total capital to total risk weighted assets ratio of 8% (unchanged from current rules); and (iv) a Tier 1 capital to adjusted average total assets (“leverage”) ratio of 4%.

7

In addition, a “capital conservation buffer,” is established which when fully phased-in will require maintenance of a minimum of 2.5% of common equity Tier 1 capital to total risk weighted assets in excess of the regulatory minimum capital ratio requirements described above. The 2.5% buffer will increase the minimum capital ratios to (i) a common equity Tier 1 capital ratio of 7.0%, (ii) a Tier 1 capital ratio of 8.5%, and (iii) a total capital ratio of 10.5%. The new buffer requirement will be phased-in between January 1, 2016 and January 1, 2019. If the capital ratio levels of a banking organization fall below the capital conservation buffer amount, the organization will be subject to limitations on (i) the payment of dividends; (ii) discretionary bonus payments; (iii) discretionary payments under Tier 1 instruments; and (iv) engaging in share repurchases.

The federal bank regulatory agencies also implemented changes to the prompt corrective action framework, which is designed to place restrictions on insured depository institutions if their capital ratios begin to show signs of weakness. These changes will take effect beginning January 1, 2015 and will require insured depository institutions to meet the following increased capital ratio requirements in order to qualify as “well capitalized:” (i) a new common equity Tier 1 capital ratio of 6.5%; (ii) a Tier 1 capital ratio of 8%; (iii) a total capital ratio of 10%; and (iv) a Tier 1 leverage ratio of 5%. See also the additional discussion below under “Prompt Corrective Action.”

Based upon the Company’s capital position at December 31, 2014, management believes that the Company and American River Bank would have been in compliance with the minimum capital requirements, including the fully phased-in capital conservation buffer requirement.

Prompt Corrective Action

The Board of Governors and the FDIC have adopted regulations implementing a system of prompt corrective action pursuant to Section 38 of the Federal Deposit Insurance Act and Section 131 of the FDIC Improvement Act of 1991 (“FDICIA”). The regulations establish five capital categories with the following characteristics: (1) “Well capitalized” - consisting of institutions with a total risk-based capital ratio of 10% or greater, a Tier 1 risk-based capital ratio of 6% or greater and a leverage ratio of 5% or greater, and the institution is not subject to an order, written agreement, capital directive or prompt corrective action directive; (2) “Adequately capitalized” - consisting of institutions with a total risk-based capital ratio of 8% or greater, a Tier 1 risk-based capital ratio of 4% or greater and a leverage ratio of 4% or greater, and the institution does not meet the definition of a “well capitalized” institution; (3) “Undercapitalized” - consisting of institutions with a total risk-based capital ratio less than 8%, a Tier 1 risk-based capital ratio of less than 4%, or a leverage ratio of less than 4%; (4) “Significantly undercapitalized” - consisting of institutions with a total risk-based capital ratio of less than 6%, a Tier 1 risk-based capital ratio of less than 3%, or a leverage ratio of less than 3%; (5) “Critically undercapitalized” - consisting of an institution with a ratio of tangible equity to total assets that is equal to or less than 2%.

The regulations established procedures for classification of financial institutions within the capital categories, filing and reviewing capital restoration plans required under the regulations and procedures for issuance of directives by the appropriate regulatory agency, among other matters. The regulations impose restrictions upon all institutions to refrain from certain actions which would cause an institution to be classified within any one of the three “undercapitalized” categories, such as declaration of dividends or other capital distributions or payment of management fees, if following the distribution or payment the institution would be classified within one of the “undercapitalized” categories. In addition, institutions which are classified in one of the three “undercapitalized” categories are subject to certain

mandatory and discretionary supervisory actions. Mandatory supervisory actions include (1) increased monitoring and review by the appropriate federal banking agency; (2) implementation of a capital restoration plan; (3) total asset growth restrictions; and (4) limitations upon acquisitions, branch expansion, and new business activities without prior approval of the appropriate federal banking agency. Discretionary supervisory actions may include (1) requirements to augment capital; (2) restrictions upon affiliate transactions; (3) restrictions upon deposit gathering activities and interest rates paid; (4) replacement of senior executive officers and directors; (5) restrictions upon activities of the institution and its affiliates; (6) requiring divestiture or sale of the institution; and (7) any other supervisory action that the appropriate federal banking agency determines is necessary to further the purposes of the regulations. Further, the federal banking agencies may not accept a capital restoration plan without determining, among other things, that the plan is based on realistic assumptions and is likely to succeed in restoring the depository institution's capital. In addition, for a capital restoration plan to be acceptable, the depository institution's parent holding company must guarantee that the institution will comply with such capital restoration plan. The aggregate liability of the parent holding company under the guaranty is limited to the lesser of (i) an amount equal to 5 percent of the depository institution's total assets at the time it became undercapitalized, and (ii) the amount that is necessary (or would have been necessary) to bring the institution into compliance with all capital standards applicable with respect to such institution as of the time it fails to comply with the plan. If a depository institution fails to submit an acceptable plan, it is treated as if it were "significantly undercapitalized." FDICIA also restricts the solicitation and acceptance of and interest rates payable on brokered deposits by insured depository institutions that are not "well capitalized." An "undercapitalized" institution is not allowed to solicit deposits by offering rates of interest that are significantly higher than the prevailing rates of interest on insured deposits in the particular institution's normal market areas or in the market areas in which such deposits would otherwise be accepted.

Any financial institution which is classified as “critically undercapitalized” must be placed in conservatorship or receivership within 90 days of such determination unless it is also determined that some other course of action would better serve the purposes of the regulations. Critically undercapitalized institutions are also prohibited from making (but not accruing) any payment of principal or interest on subordinated debt without prior regulatory approval and regulators must prohibit a critically undercapitalized institution from taking certain other actions without prior approval, including (1) entering into any material transaction other than in the usual course of business, including investment expansion, acquisition, sale of assets or other similar actions; (2) extending credit for any highly leveraged transaction; (3) amending articles or bylaws unless required to do so to comply with any law, regulation or order; (4) making any material change in accounting methods; (5) engaging in certain affiliate transactions; (6) paying excessive compensation or bonuses; and (7) paying interest on new or renewed liabilities at rates which would increase the weighted average costs of funds beyond prevailing rates in the institution’s normal market areas.

On November 18, 2014, the FDIC adopted the Assessments Final Rule which revises the FDIC’s risk-based deposit insurance assessment system to reflect changes in the regulatory capital rules that are effective commencing January 1, 2015. For smaller financial institutions (with total assets less than \$1 Billion and which are not custodial banks), the Final Rule revises and conforms capital ratios and ratio thresholds to the new prompt corrective action capital ratios and ratio thresholds for “well capitalized” and “adequately capitalized” evaluations which were adopted by the federal banking agencies as part of the Basel III capital regulations. Consequently, effective January 1, 2015, the prompt corrective action regulations are amended to the extent described above in “*Basel III – New Capital and Prompt Corrective Action Regulations.*”

Additional Regulations

Under the FDICIA, the federal financial institution agencies have adopted regulations which require institutions to establish and maintain comprehensive written real estate policies which address certain lending considerations, including loan-to-value limits, loan administrative policies, portfolio diversification standards, and documentation, approval and reporting requirements. The FDICIA further generally prohibits an insured state bank from engaging as a principal in any activity that is impermissible for a national bank, absent FDIC determination that the activity would not pose a significant risk to the Bank Insurance Fund, and that the bank is, and will continue to be, within applicable capital standards.

The Federal Financial Institution Examination Counsel (“FFIEC”) utilizes the Uniform Financial Institutions Rating System (“UFIRS”) commonly referred to as “CAMELS” to classify and evaluate the soundness of financial institutions. Bank examiners use the CAMELS measurements to evaluate capital adequacy, asset quality, management, earnings, liquidity and sensitivity to market risk. Effective January 1, 2005, bank holding companies such as the Company, were subject to evaluation and examination under a revised bank holding company rating system. The so-called BOPEC rating system implemented in 1979 was primarily focused on financial condition, consolidated capital and consolidated earnings. The rating system reflects the change toward analysis of risk management (as reflected in bank examination under the CAMELS measurements), in addition to financial factors and the potential impact of nondepository subsidiaries upon depository institution subsidiaries.

The federal financial institution agencies have established bases for analysis and standards for assessing a financial institution’s capital adequacy in conjunction with the risk-based capital guidelines including analysis of interest rate risk, concentrations of credit risk, risk posed by non-traditional activities, and factors affecting overall safety and soundness. The safety and soundness standards for insured financial institutions include analysis of (1) internal controls, information systems and internal audit systems; (2) loan documentation; (3) credit underwriting; (4) interest rate exposure; (5) asset growth; (6) compensation, fees and benefits; and (7) excessive compensation for executive officers, directors or principal shareholders which could lead to material financial loss. If an agency determines that an institution fails to meet any standard, the agency may require the financial institution to submit to the agency an

acceptable plan to achieve compliance with the standard. If the agency requires submission of a compliance plan and the institution fails to timely submit an acceptable plan or to implement an accepted plan, the agency must require the institution to correct the deficiency. The agencies may elect to initiate enforcement action in certain cases rather than rely on an existing plan particularly where failure to meet one or more of the standards could threaten the safe and sound operation of the institution.

Community Reinvestment Act (“CRA”) regulations evaluate banks’ lending to low and moderate income individuals and businesses across a four-point scale from “outstanding” to “substantial noncompliance,” and are a factor in regulatory review of applications to merge, establish new branches or form bank holding companies. In addition, any bank rated in “substantial noncompliance” with the CRA regulations may be subject to enforcement proceedings. In its most recent exam for CRA compliance, American River Bank has a rating of “satisfactory.”

Limitations on Dividends

The Company’s ability to pay cash dividends is subject to restrictions set forth in the California General Corporation Law. Funds for payment of any cash dividends by the Company would be obtained from its investments as well as dividends and/or management fees from its subsidiaries. The payment of cash dividends and/or management fees by American River Bank is subject to restrictions set forth in the California Financial Code, as well as restrictions established by the FDIC. On July 27, 2009, it was announced that the Board of Directors had suspended the payment of cash dividends, until such time that it was prudent to reestablish the payment of cash dividends. The Company relies on distributions from the Bank in the form of cash dividends in order to pay cash dividends to our shareholders. See Item 5. “Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities” for more information regarding cash dividends.

Competition

Competitive Data

American River Bank. At June 30, 2014, based on the most recent “Data Book Summary of Deposits in FDIC Insured Commercial and Savings Banks” report at that date, the competing commercial and savings banks had 184 offices in the cities of Gold River, Rancho Cordova, Roseville and Sacramento, California, where American River Bank has its five Sacramento area offices, 61 offices in the cities of Healdsburg and Santa Rosa, California, where American River Bank has its two Sonoma County offices, and three offices in the cities of Jackson, Pioneer and Ione, California, where American River Bank has its three Amador County offices. Additionally, American River Bank competes with thrifts and, to a lesser extent, credit unions, finance companies and other financial service providers for deposit and loan customers.

Larger banks may have a competitive advantage because of higher lending limits and major advertising and marketing campaigns. They also perform services, such as trust services, international banking, discount brokerage and insurance services, which American River Bank is neither authorized nor prepared to offer currently. American River Bank has made arrangements with its correspondent banks and with others to provide some of these services for its customers. For borrowers requiring loans in excess of American River Bank’s legal lending limits, American River Bank has offered, and intends to offer in the future, such loans on a participating basis with its correspondent banks and with other community banks, retaining the portion of such loans which is within its lending limits. As of December 31, 2014, American River Bank’s aggregate legal lending limits to a single borrower and such borrower’s related parties were \$14,296,000 on an unsecured basis and \$23,827,000 on a fully secured basis based on capital and allowable reserves of \$95,309,000.

American River Bank’s business is concentrated in its service area, which primarily encompasses Sacramento County, South Western Placer County, Sonoma County, and Amador County. The economy of American River Bank’s service area is dependent upon government, manufacturing, tourism, retail sales, agriculture, population growth and smaller service oriented businesses.

Based upon the most recent “Data Book Summary of Deposits in FDIC Insured Commercial and Savings Banks” report dated June 30, 2014, there were 231 operating commercial and savings bank offices in Sacramento County with total

deposits of \$26,834,196,000. This was an increase of \$3,624,443,000 compared to the June 30, 2013 balances. American River Bank held a total of \$257,974,000 in deposits, representing approximately 1.0% of total commercial and savings banks deposits in Sacramento County as of June 30, 2014.

Based upon the most recent “Data Book Summary of Deposits in FDIC Insured Commercial and Savings Banks” report dated June 30, 2014, there were 111 operating commercial and savings bank offices in Placer County with total deposits of \$10,357,922,000. This was an increase of \$721,887,000 over the June 30, 2013 balances. American River Bank held a total of \$60,223,000 in deposits, representing approximately 0.6% of total commercial and savings banks deposits in Placer County as of June 30, 2014.

Based upon the most recent “Data Book Summary of Deposits in FDIC Insured Commercial and Savings Banks” report dated June 30, 2014, there were 130 operating commercial and savings bank offices in Sonoma County with total deposits of \$10,601,868,000. This was an increase of \$189,697,000 compared to the June 30, 2013 balances. American River Bank held a total of \$78,215,000 in deposits, representing approximately 0.7% of total commercial and savings banks deposits in Sonoma County as of June 30, 2014.

Based upon the most recent “Data Book Summary of Deposits in FDIC Insured Commercial and Savings Banks” report dated June 30, 2014, there were 13 operating commercial and savings bank offices in Amador County with total deposits of \$638,676,000. This was an increase of \$21,909,000 compared to the June 30, 2013 balances. American River Bank held a total of \$94,758,000 in deposits, representing approximately 14.8% of total commercial and savings bank deposits in Amador County as of June 30, 2014.

FDIC Insurance

On October 3, 2008, the Emergency Economic Stabilization Act of 2008 (the “EESA”) was signed into law. The EESA temporarily raised the limit on federal deposit insurance coverage provided by the FDIC from \$100,000 to \$250,000 per depositor. On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) into law. On November 9, 2010, the FDIC issued a final rule implementing section 343 of the Dodd-Frank Act that permanently raised the current standard maximum deposit insurance amount per depositor to \$250,000 and provided for unlimited insurance coverage of noninterest-bearing transaction accounts. This unlimited insurance coverage was not extended and terminated on December 31, 2012. The \$250,000 maximum deposit insurance amount per depositor has remained in effect.

In addition, the Dodd-Frank Act also made other deposit insurance changes which may affect our insurance premium assessments to include (i) amendment of the assessment base used to calculate an insured depository institution’s deposit insurance premiums paid to the DIF by elimination of deposits and substitution of average consolidated total assets less average tangible equity during the assessment period as the revised assessment base; (ii) increasing the minimum designated *reserve* ratio of the DIF from 1.15 percent to 1.35 percent of the estimated amount of total insured deposits; (iii) eliminating the requirement that the FDIC pay dividends to depository institutions when the reserve ratio exceeds certain thresholds; and (iv) repeal of the prohibition upon the payment of interest on demand deposits to be effective one year after the date of enactment of the Dodd-Frank Act. In December 2010, pursuant to the Dodd-Frank Act, the FDIC increased the designated reserve ratio of the DIF to 2.0 percent effective January 1, 2011, which has remained in effect.

On November 18, 2014, the FDIC adopted the Assessments Final Rule which revises the FDIC’s risk-based deposit insurance assessment system to reflect changes in the regulatory capital rules adopted by the federal banking agencies as part of the so-called Basel III capital regulations to conform the prompt corrective action capital ratios and ratio thresholds for “well capitalized” and “adequately capitalized” evaluations.

The FDIC has taken control of many failed financial institutions during the recent economic recession and guaranteed payment from the DIF up to the insured limit for deposits held at such failed institutions. Depending on any future

losses that the DIF may suffer due to failed institutions, there may be additional premium increases in order to replenish the DIF. It is uncertain what effect the implementation of the changes to the insurance assessments will have upon the Company; however, the effect of failed institutions and deterioration or lack of improvement in the economic conditions impacting financial institutions may necessitate further increases in premium assessments to maintain the DIF which could adversely impact the Company's earnings.

General Competitive Factors

In order to compete with the major financial institutions in its primary service areas, American River Bank uses to the fullest extent possible the flexibility which is accorded by their community bank status. This includes an emphasis on specialized services, local promotional activity, and personal contacts by their respective officers, directors and employees. American River Bank also seeks to provide special services and programs for individuals in their primary service area who are employed in the agricultural, professional and business fields, such as loans for equipment, furniture, tools of the trade or expansion of practices or businesses. In the event there are customers whose loan demands exceed their respective lending limits, they seek to arrange for such loans on a participation basis with other financial institutions. Furthermore, American River Bank also assists those customers requiring services not offered by either bank to obtain such services from correspondent banks.

Commercial banks compete with savings and loan associations, credit unions, other financial institutions and other entities for funds. For instance, yields on corporate and government debt securities and other commercial paper affect the ability of commercial banks to attract and hold deposits. Commercial banks also compete for loans with savings and loan associations, credit unions, consumer finance companies, mortgage companies and other lending institutions.

Banking is a business that depends on interest rate differentials. In general, the difference between the interest rate paid by a bank to obtain their deposits and other borrowings and the interest rate received by a bank on loans extended to customers and on securities held in a bank's portfolio comprise the major portion of a bank's revenues.

The interest rate differentials of a bank, and therefore their revenues, are affected not only by general economic conditions, both domestic and foreign, but also by the monetary and fiscal policies of the United States as set by statutes and as implemented by federal agencies, particularly the Federal Reserve Board. The Federal Reserve Board can and does implement national monetary policy, such as seeking to curb inflation and combat recession, by its open market operations in United States government securities, adjustments in the amount of interest free reserves that banks and other financial institutions are required to maintain, and adjustments to the discount rates applicable to borrowing by banks from the Federal Reserve Board. These activities influence the growth of bank loans, investments and deposits and also affect interest rates charged on loans and paid on deposits. The nature and timing of any future changes in monetary policies and their impact on American River Bank is not predictable.

Impact of Certain Legislation and Regulation

Interstate Banking. Since 1996, California law implementing certain provisions of prior federal law has (1) permitted interstate merger transactions; (2) prohibited interstate branching through the acquisition of a branch business unit located in California without acquisition of the whole business unit of the California bank; and (3) prohibited interstate branching through de novo establishment of California branch offices. Initial entry into California by an out-of-state institution must be accomplished by acquisition of or merger with an existing whole bank which has been in existence for at least five years. The Dodd-Frank Act signed into law by President Obama on July 21, 2010, includes provisions authorizing national and state banks to establish branch offices in other states to the same extent as a bank chartered by that state would be permitted to branch. Previously, banks could only establish branch offices in other states if the host state expressly permitted out-of-state banks to establish branch offices in that state. Accordingly, banks may be able to enter new markets more freely.

Gramm-Leach-Bliley Act. In 1999, the Gramm-Leach-Bliley Act (the "GLB Act") was signed into law. The GLB Act eliminated most of the remaining depression-era "firewalls" between banks, securities firms and insurance companies which were established by The Banking Act of 1933, also known as the Glass-Steagall Act ("Glass-Steagall"). Glass-Steagall sought to insulate banks as depository institutions from the perceived risks of securities dealing and underwriting, and related activities. The GLB Act permitted bank holding companies that could qualify as "financial holding companies" to acquire securities firms or create them as subsidiaries, and securities firms could acquire banks or start banking activities through a financial holding company. Prior to the GLB Act, banks were also (with minor exceptions) prohibited from engaging in insurance activities or affiliating with insurers. The GLB Act removed these restrictions and substantially eliminated the prohibitions under the Bank Holding Company Act on affiliations between banks and insurance companies. Consequently, the common ownership of banks, securities firms and insurance firms was possible, in addition to the conduct of commercial banking, merchant banking, investment management, securities underwriting and insurance within a single financial institution using a "financial holding company" structure authorized by the GLB Act.

A bank holding company could qualify as a financial holding company if (i) its banking subsidiaries are "well capitalized" and "well managed" and (ii) it files with the Board of Governors a certification to such effect and a declaration that it elects to become a financial holding company. The Bank Holding Company Act was amended to

permit financial holding companies to engage in activities, and acquire companies engaged in activities, that are financial in nature or incidental to such financial activities. Financial holding companies were also permitted to engage in activities that were complementary to financial activities if the Board of Governors determined that the activity did not pose a substantial risk to the safety or soundness of depository institutions or the financial system in general. These standards expanded upon the list of activities “closely related to banking” which have defined the permissible activities of bank holding companies under the Bank Holding Company Act. Neither Company nor American River Bank has determined whether or when to seek to acquire and exercise powers or activities under the GLB Act.

Volcker Rule. On December 10, 2013, the federal banking agencies jointly issued a final rule implementing the so-called “Volcker Rule” (set forth in Section 619 of the Dodd-Frank Act). The Volcker Rule prohibits depository institutions, companies that control such institutions, bank holding companies, and the affiliates and subsidiaries of such banking entities, from engaging as principal for the trading account of the banking entity in any purchase or sale of one or more covered financial instruments (so-called “proprietary trading”) and imposes limitations upon retaining ownership interests in, sponsoring, investing in and transacting with certain investment funds, including hedge funds and private equity funds. Certain activities involving underwriting, risk mitigation hedging, and transactions on behalf of customers as a fiduciary or riskless principal are not prohibited proprietary trading, including purchases and sales of financial instruments which are either obligations of or issued or guaranteed by (i) the United States or agencies thereof; (ii) a State or political subdivision including municipal securities; or (iii) the FDIC. Notwithstanding these permissible activities, no such activities are permitted if they would (i) involve or result in a material conflict of interest between the banking entity and its clients, customers, or counterparties; (ii) result, directly or indirectly, in a material exposure by the banking entity to a high-risk asset or a high-risk trading strategy; or (iii) pose a threat to the safety and soundness of the banking entity or to the financial stability of the United States. The effective date of the final rule has been extended to July 21, 2016. Neither the Company nor American River Bank engages in activities prohibited by the Volcker Rule and we do not expect the Volcker Rule to have a material impact upon the Company or American River Bank.

Patriot Act. On October 26, 2001, President Bush signed the USA Patriot Act (the “Patriot Act”), which includes provisions pertaining to domestic security, surveillance procedures, border protection, and terrorism laws to be administered by the Secretary of the Treasury. Title III of the Patriot Act entitled, “International Money Laundering Abatement and Anti-Terrorist Financing Act of 2001” includes amendments to the Bank Secrecy Act which expand the responsibilities of financial institutions in regard to anti-money laundering activities with particular emphasis upon international money laundering and terrorism financing activities through designated correspondent and private banking accounts.

Effective December 25, 2001, Section 313(a) of the Patriot Act prohibits any insured financial institution such as American River Bank, from providing correspondent accounts to foreign banks which do not have a physical presence in any country (designated as “shell banks”), subject to certain exceptions for regulated affiliates of foreign banks. Section 313(a) also requires financial institutions to take reasonable steps to ensure that foreign bank correspondent accounts are not being used to indirectly provide banking services to foreign shell banks, and Section 319(b) requires financial institutions to maintain records of the owners and agent for service of process of any such foreign banks with whom correspondent accounts have been established.

Effective July 23, 2002, Section 312 of the Patriot Act created a requirement for special due diligence for correspondent accounts and private banking accounts. Under Section 312, each financial institution that establishes, maintains, administers, or manages a private banking account or a correspondent account in the United States for a non-United States person, including a foreign individual visiting the United States, or a representative of a non-United States person shall establish appropriate, specific, and, where necessary, enhanced, due diligence policies, procedures, and controls that are reasonably designed to detect and record instances of money laundering through those accounts.

The Patriot Act contains various provisions in addition to Sections 313(a) and 312 that affect the operations of financial institutio
