* 2011 includes payment of accrued compounded interest of \$4.7 billion under the Credit Agreement, dated as of September 22, 2008, as amended between AIG and the Federal Reserve Bank of New York (the FRBNY and, such credit agreement, the FRBNY Credit Facility), before the facility was terminated on January 14, 2011 in connection with the series of integrated transactions to recapitalize AIG (the Recapitalization) with the Department of the Treasury, the FRBNY and the AIG Credit Facility Trust, including the repayment of all amounts owed under the FRBNY Credit Facility.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

1. BASIS OF PRESENTATION

American International Group, Inc. (AIG) is a leading international insurance organization serving customers in more than 130 countries. AIG companies serve commercial, institutional and individual customers through one of the most extensive worldwide property-casualty networks of any insurer. In addition, AIG companies are leading providers of life insurance and retirement services in the United States. AIG Common Stock, par value \$2.50 per share (AIG Common Stock), is listed on the New York Stock Exchange and the Tokyo Stock Exchange. The United States Department of the Treasury (Department of the Treasury) owned approximately 15.9 percent of AIG Common Stock outstanding as of September 30, 2012. See Note 10 herein for additional information on the Department of the Treasury's ownership of AIG Common Stock and the registered public offerings of AIG Common Stock initiated by the Department of the Treasury in 2012.

These unaudited condensed consolidated financial statements do not include all disclosures that are normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States (GAAP) and should be read in conjunction with the audited consolidated financial statements and the related notes included in the Annual Report on Form 10-K of American International Group, Inc. (AIG) for the year ended December 31, 2011, as amended by Amendment No. 1 and Amendment No. 2 on Forms 10-K/A filed on February 27, 2012 and March 30, 2012, respectively, and as updated by AIG's Current Report on Form 8-K filed on May 4, 2012 (collectively, the 2011 Annual Report). The condensed consolidated financial information as of December 31, 2011 included herein has been derived from audited consolidated financial statements in the 2011 Annual Report not included herein.

Certain of AIG's foreign subsidiaries included in the consolidated financial statements report on different fiscal-period bases. The effect on AIG's consolidated financial condition and results of operations of all material events occurring at these subsidiaries through the date of each of the periods presented in these financial statements has been recorded.

In the opinion of management, these consolidated financial statements contain the normal recurring adjustments necessary for a fair statement of the results presented herein. Interim period operating results may not be indicative of the operating results for a full year. AIG evaluated the need to recognize or disclose events that occurred subsequent to September 30, 2012 and prior to the issuance of these consolidated financial statements. All material intercompany accounts and transactions have been eliminated.

Revisions to Prior Year Financial Statements

On January 1, 2012, AIG retrospectively adopted a standard that changed its method of accounting for costs associated with acquiring or renewing insurance contracts. See Note 2 herein for additional details, including a summary of revisions to prior year financial statements.

To align the presentation of changes in the fair value of derivatives with changes in the administration of AIG's derivatives portfolio, changes were made to the presentation within the Consolidated Statement of Operations and Consolidated Statement of Cash Flows. Specifically, amounts attributable to derivative activity where AIG Financial Products Corp. and AIG Trading Group Inc. and their respective subsidiaries (collectively, AIGFP) executed transactions with third parties on behalf of AIG subsidiaries have been reclassified from Other income to Net realized capital gains (losses). Additionally, certain other items have been reclassified within the Consolidated Statement of Operations in the current period. Prior period amounts were reclassified to conform to the current period presentation.

Use of Estimates

The preparation of financial statements in accordance with GAAP requires the application of accounting policies that often involve a significant degree of judgment. AIG considers its accounting policies that are most dependent on the

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

application of estimates and assumptions to be those relating to items considered by management in the determination of:

income tax assets and liabilities, including the recoverability of deferred tax assets and the predictability of future tax planning strategies and operating profitability of the character necessary for their realization;

recoverability of assets, including deferred policy acquisition costs (DAC), flight equipment, and reinsurance;

insurance liabilities, including general insurance unpaid claims and claims adjustment expenses and future policy benefits for life and accident and health contracts;

estimated gross profits for investment-oriented products;

impairment charges, including other-than-temporary impairments of financial instruments and goodwill impairments;

liabilities for legal contingencies; and

fair value measurements of certain financial assets and liabilities.

These accounting estimates require the use of assumptions about matters, some of which are highly uncertain at the time of estimation. To the extent actual experience differs from the assumptions used, AIG's consolidated financial condition, results of operations and cash flows could be materially affected.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Recent Accounting Standards

Future Application of Accounting Standards

In July 2012, the Financial Accounting Standards Board (FASB) issued an accounting standard that allows a company the option to first assess qualitatively whether it is more likely than not that an indefinite-lived intangible asset is impaired. A company is not required to calculate the fair value of an indefinite-lived intangible asset and perform the quantitative impairment test unless the company determines it is more likely than not the asset is impaired.

The standard is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. A company can choose to early adopt the standard. AIG intends to adopt the standard on its required effective date of January 1, 2013. AIG does not expect adoption of the standard to have a material effect on its consolidated financial condition, results of operations or cash flows.

Accounting Standards Adopted During 2012

AIG adopted the following accounting standards on January 1, 2012:

Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts

In October 2010, the FASB issued an accounting standard update that amends the accounting for costs incurred by insurance companies that can be capitalized in connection with acquiring or renewing insurance contracts. The standard clarifies how to determine whether the costs incurred in connection with the acquisition of new or renewal insurance contracts qualify as DAC. AIG adopted the standard retrospectively on January 1, 2012.

Policy acquisition costs represent those costs that are incremental and directly related to the successful acquisition of new or renewal insurance contracts. AIG defers incremental costs that result directly from, and are essential to, the acquisition or renewal of an insurance contract. Such costs generally include agent or broker commissions and bonuses, premium taxes, and medical and inspection fees that would not have been incurred if the insurance

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

contract had not been acquired or renewed. Each cost is analyzed to assess whether it is fully deferrable. AIG partially defers costs, including certain commissions, when it does not believe the entire cost is directly related to the acquisition or renewal of insurance contracts.

AIG also defers a portion of employee total compensation and payroll-related fringe benefits directly related to time spent performing specific acquisition or renewal activities, including costs associated with the time spent on underwriting, policy issuance and processing, and sales force contract selling. The amounts deferred are derived based on successful efforts for each distribution channel and/or cost center from which the cost originates.

Advertising costs related to the issuance of insurance contracts that meet the direct-advertising criteria are deferred and amortized as part of deferred policy acquisition costs.

The method AIG uses to amortize deferred policy acquisition costs for either short- or long-duration insurance contracts did not change as a result of the adoption of the standard.

The adoption of the standard resulted in a reduction to beginning of period retained earnings for the earliest period presented and a decrease in the amount of capitalized costs in connection with the acquisition or renewal of insurance contracts. Accordingly, AIG revised its historical financial statements and accompanying notes to the consolidated financial statements for the changes in deferred policy acquisition costs and associated changes in acquisition expenses and income taxes for affected entities and segments, including divested entities presented in continuing and discontinued operations.

The following tables present amounts previously reported in 2011, the effect of the change due to the retrospective adoption of the standard, and the adjusted amounts that are reflected in AIG's consolidated financial statements.

Cash flows from operating activities:						
Net loss	\$	(1,415)	\$	1,143	\$	(272)
(Income) from discontinued operations		(1,395)		(932)		(2,327)
Adjustments to reconcile net loss to net cash provided by (used in) operating activities:						

Noncash revenues, expenses, gains and losses included in income (loss):			
Unrealized losses in earnings net	724	(10)	714
Depreciation and other amortization	7,500	(1,882)	5,618
Changes in operating assets and liabilities:			
Capitalization of deferred policy acquisition costs	(5,856)	1,746	(4,110)
Current and deferred income taxes net	(1,764)	(65)	(1,829)
Total adjustments	(1,761)	(211)	(1,972)

* Includes \$118 million for the nine months ended September 30, 2011 attributable to the effect of the reclassification of certain derivative activity discussed in Note 1 herein.

For short-duration insurance contracts, starting in 2012, AIG elected to include anticipated investment income in its determination of whether the deferred policy acquisition costs are recoverable. AIG believes the inclusion of anticipated investment income in the recoverability analysis is a preferable accounting policy because it includes in the recoverability analysis the fact that there is a timing difference between when the premiums are collected and in turn invested and when the losses and related expenses are paid. This is considered a change in accounting principle that required retrospective application to all periods presented. Because AIG historically has not recorded any premium deficiency on its short-duration insurance contracts even without the inclusion of anticipated investment income, there were no changes to the historical financial statements for the change in accounting principle.

Reconsideration of Effective Control for Repurchase Agreements

In April 2011, the FASB issued an accounting standard that amends the criteria used to determine effective control for repurchase agreements and other similar arrangements such as securities lending transactions. The standard modifies the criteria for determining when these transactions would be accounted for as secured borrowings (i.e., financings) instead of sales of the securities.

The standard removes from the assessment of effective control the requirement that the transferor have the ability to repurchase or redeem the financial assets on substantially agreed terms, even in the event of default by the transferee. The removal of this requirement makes the level of collateral received by the transferor in a repurchase agreement or similar arrangement irrelevant in determining whether the transaction should be accounted for as a sale. As a consequence, more repurchase agreements, securities lending transactions and similar arrangements will be accounted for as secured borrowings.

The guidance in the standard must be applied prospectively to transactions or modifications of existing transactions that occur on or after January 1, 2012. Under this standard, there are no repurchase agreements that continue to be accounted for as sales as of September 30, 2012. Any modifications to these transactions that occur subsequent to adoption will result in an assessment of whether they should be accounted for as secured borrowings under the standard. As of September 30, 2012, there were no such modifications subsequent to the adoption of the standard.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Common Fair Value Measurements and Disclosure Requirements in GAAP and IFRS

In May 2011, the FASB issued an accounting standard that amended certain aspects of the fair value measurement guidance in GAAP, primarily to achieve the FASB's objective of a converged definition of fair value and substantially converged measurement and disclosure guidance with International Financial Reporting Standards (IFRS). The measurement and disclosure requirements under GAAP and IFRS are now generally consistent, with certain exceptions including the accounting for day one gains and losses, measuring the fair value of alternative investments using net asset value and certain disclosure requirements.

The standard's fair value measurement and disclosure guidance applies to all companies that measure assets, liabilities, or instruments classified in shareholders' equity at fair value or provide fair value disclosures for items not recorded at fair value. The guidance clarifies existing guidance on the application of fair value measurements, changes certain principles or requirements for measuring fair value, and requires significant additional disclosures for Level 3 valuation inputs. The new disclosure requirements were applied prospectively. The standard became effective beginning on January 1, 2012. The standard did not have any effect on AIG's consolidated financial condition, results of operations or cash flows. See Note 4 herein.

Presentation of Comprehensive Income

In June 2011, the FASB issued an accounting standard that requires the presentation of comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In the two-statement approach, the first statement should present total net income and its components, followed consecutively by a second statement that presents total other comprehensive income and its components. The standard became effective beginning January 1, 2012 with retrospective application required. The standard did not have any effect on AIG's consolidated financial condition, results of operations or cash flows.

Testing Goodwill for Impairment

In September 2011, the FASB issued an accounting standard that amends the approach to testing goodwill for impairment. The standard simplifies how entities test goodwill for impairment by permitting an entity to first assess qualitative factors to determine whether it is more likely than not the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the quantitative, two-step goodwill impairment test. The standard became effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of the standard did not have any effect on AIG's consolidated financial condition, results of operations or cash flows.

3. SEGMENT INFORMATION

Commencing in the third quarter of 2012, the Chartis segment was renamed AIG Property Casualty and the SunAmerica segment was renamed AIG Life and Retirement, although certain existing brands will continue to be used.

AIG reports the results of its operations through three reportable segments: AIG Property Casualty, AIG Life and Retirement and Aircraft Leasing. AIG evaluates performance based on pre-tax income (loss), excluding results from discontinued operations, because AIG believes this provides more meaningful information on how its operations are performing.

Effective during the first quarter of 2012, in order to align financial reporting with the manner in which AIG's chief operating decision makers review the AIG Property Casualty businesses to assess performance and make decisions about resources to be allocated, certain products previously reported in Commercial Insurance were reclassified to

14

American International Group, Inc.

4. FAIR VALUE MEASUREMENTS

Fair Value Measurements on a Recurring Basis

AIG carries certain of its financial instruments at fair value. AIG defines the fair value of a financial instrument as the amount that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 to the Consolidated Financial Statements in the 2011 Annual Report for a discussion of AIG's accounting policies and procedures regarding fair value measurements related to the following information.

Assets and liabilities recorded at fair value in the Consolidated Balance Sheet are measured and classified in accordance with a fair value hierarchy consisting of three "levels" based on the observability of inputs available in the marketplace used to measure the fair values as discussed below:

Level 1: Fair value measurements that are quoted prices (unadjusted) in active markets that AIG has the ability to access for identical assets or liabilities.

Level 2: Fair value measurements based on inputs other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3: Fair value measurements based on valuation techniques that use significant inputs that are unobservable. Both observable and unobservable inputs may be used to determine the fair values of positions classified in Level 3. The circumstances for using these measurements include those in which there is little, if any, market activity for the asset or liability. Therefore, AIG must make certain assumptions as to the inputs a hypothetical market participant would use to value that asset or liability.

(a) Represents netting of derivative exposures covered by a qualifying master netting agreement.

(b) Represents cash collateral posted and received. Securities collateral posted for derivative transactions that is reflected in Fixed maturity securities in the Consolidated Balance Sheet, and collateral received, not reflected in the Consolidated Balance Sheet, were \$1.8 billion and \$177 million, respectively, at September 30, 2012 and \$1.8 billion and \$100 million, respectively, at December 31, 2011.

(c) Included in Level 1 are \$6.1 billion and \$12.4 billion at September 30, 2012 and December 31, 2011, respectively, of AIA ordinary shares publicly traded on the Hong Kong Stock Exchange.

(d) Included in Level 3 is the fair value derivative liability of \$2.3 billion and \$3.2 billion at September 30, 2012 and December 31, 2011, respectively, on the super senior credit default swap portfolio.

(e) Includes Guaranteed Investment Agreements (GIAs), notes, bonds, loans and mortgages payable.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Transfers of Level 1 and Level 2 Assets and Liabilities

AIG's policy is to record transfers of assets and liabilities between Level 1 and Level 2 at their fair values as of the end of each reporting period, consistent with the date of the determination of fair value. Assets are transferred out of Level 1 when they are no longer transacted with sufficient frequency and volume in an active market. Conversely, assets are transferred from Level 2 to Level 1 when transaction volume and frequency are indicative of an active market. During the three- and nine-month periods ended September 30, 2012, AIG transferred \$148 million and \$284 million of securities issued by Non-U.S. government entities from Level 1 to Level 2, respectively, as they are no longer considered actively traded. For similar reasons, during the three- and nine-month periods ended September 30, 2012, AIG transferred \$743 million of securities issued by the U.S. government and government-sponsored entities from Level 1 to Level 2. AIG had no material transfers from Level 2 to Level 1 during the three- and nine-month periods ended September 30, 2012, AIG transferred \$743 million of securities issued by the three- and nine-month periods ended September 30, 2012, AIG transferred \$743 million of securities issued by the U.S. government and government-sponsored entities from Level 1 to Level 2. AIG had no material transfers from Level 2 to Level 1 during the three- and nine-month periods ended September 30, 2012.

Changes in Level 3 Recurring Fair Value Measurements

The following tables present changes during the three-and nine-month periods ended September 30, 2012 and 2011 in Level 3 assets and liabilities measured at fair value on a recurring basis, and the realized and unrealized gains (losses) related to the Level 3 assets and liabilities that remained in the Consolidated Balance Sheet at September 30, 2012 and 2011:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Both observable and unobservable inputs may be used to determine the fair values of positions classified in Level 3 in the tables above. As a result, the unrealized gains (losses) on instruments held at September 30, 2012 and 2011 may include changes in fair value that were attributable to both observable (e.g., changes in market interest rates) and unobservable inputs (e.g., changes in unobservable long-dated volatilities).

Transfers of Level 3 Assets and Liabilities

AIG's policy is to record transfers of assets and liabilities into or out of Level 3 at their fair values as of the end of each reporting period, consistent with the date of the determination of fair value. As a result, the Net realized and unrealized gains (losses) included in income or other comprehensive income and as shown in the table above excludes \$80 million of net losses and \$127 million of net gains related to assets and liabilities transferred into Level 3 during the three- and nine-month periods ended September 30, 2012, respectively, and includes \$29 million and \$83 million of net gains related to assets and liabilities transferred out of Level 3 during the three- and nine-month periods ended September 30, 2012, respectively.

Transfers of Level 3 Assets

During the three- and nine-month periods ended September 30, 2012, transfers into Level 3 included certain residential mortgage-backed securities (RMBS), commercial mortgage backed securities (CMBS), asset-backed securities (ABS), private placement corporate debt and certain private equity funds and hedge funds. Transfers into Level 3 for certain RMBS and certain ABS were related to decreased observations of market transactions and price information for those securities. The transfers into Level 3 of investments in certain other RMBS and CMBS were due to a decrease in market transparency, downward credit migration and an overall increase in price disparity for certain individual security types. Transfers into Level 3 for private placement corporate debt and certain other ABS were primarily the result of limited market pricing information that required AIG to determine fair value for these securities based on inputs that are adjusted to better reflect AIG's own assumptions regarding the characteristics of a specific security or associated market liquidity. Certain private equity fund and hedge fund investments were transferred into Level 3 due to these investments being carried at fair value and no longer being accounted for using the equity method of accounting, consistent with the changes to AIG's influence over the respective investments. Other hedge fund investments were transferred into Level 3 as a result of limited market activity due to fund-imposed redemption restrictions.

Assets are transferred out of Level 3 when circumstances change such that significant inputs can be corroborated with market observable data. This may be due to a significant increase in market activity for the asset, a specific event, one or more significant input(s) becoming observable or a long-term interest rate significant to a valuation becoming short-term and thus observable. In addition, transfers out of Level 3 also occur when investments are no longer carried at fair value as the result of a change in the applicable accounting methodology, given changes in the nature and extent of AIG's ownership interest. During the three- and nine-month periods ended September 30, 2012, transfers out of Level 3 primarily related to certain RMBS, ABS, investments in private placement corporate debt and private equity funds and hedge funds. Transfers out of Level 3 for certain RMBS were based on consideration of the market liquidity as well as related transparency of pricing and associated observable inputs for these investments. Transfers out of Level 3 for ABS and private placement corporate debt were primarily the result of AIG using observable pricing information that reflects the fair value of those securities without the need for adjustment based on AIG's own assumptions regarding the characteristics of a specific security or the current liquidity in the market. The removal of fund-imposed redemption restrictions, as well as a fund investment no longer being carried at fair value, resulted in the transfer of hedge funds and private equity funds out of Level 3.

Transfers of Level 3 Liabilities

As AIG presents carrying values of its derivative positions on a net basis in the table above, transfers into Level 3 liabilities for the three- and nine-month periods ended September 30, 2012, primarily related to certain derivative

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

assets transferred out of Level 3 because of the presence of observable inputs on certain forward commitments and options. During the threeand nine-month periods ended September 30, 2012, certain notes payable were transferred out of Level 3 because input parameters for the pricing of these liabilities became more observable as a result of market movements and portfolio aging. There were no significant transfers of derivative liabilities out of Level 3 liabilities.

AIG uses various hedging techniques to manage risks associated with certain positions, including those classified within Level 3. Such techniques may include the purchase or sale of financial instruments that are classified within Level 1 and/or Level 2. As a result, the realized and unrealized gains (losses) for assets and liabilities classified within Level 3 presented in the table above do not reflect the related realized or unrealized gains (losses) on hedging instruments that are classified within Level 1 and/or Level 2.

Fair Value Measurements on a Non-Recurring Basis

See Notes 2(c), (e), (f) and (g) to the Consolidated Financial Statements in the 2011 Annual Report for additional information about how AIG measures the fair value of certain assets on a non-recurring basis and how AIG tests various asset classes for impairment.

The following table presents assets measured at fair value on a non-recurring basis at the time of impairment and the related impairment charges recorded during the periods presented:

		Assets	s at Fa	ir Value			 Impairme	ent C

Quantitative Information About Level 3 Fair Value Measurements

The table below presents information about the significant unobservable inputs used for recurring fair value measurements for certain Level 3 instruments, and includes only those instruments for which information about the inputs is reasonably available to AIG, such as data from pricing vendors and from internal valuation models. Because input information with respect to certain Level 3 instruments may not be reasonably available to AIG, balances shown below may not equal total amounts reported for such Level 3 assets and liabilities:

(in millions)	Fair Value at September 30, 2012	Valuation Technique	Unobservable Input ^(a)	Range (Weighted Average) ^(a)
Assets:				
Corporate debt		Discounted cash		
	\$ 826	flow	Yield(b)	1.85% - 8.95% (5.40%)
Residential mortgage backed		Discounted cash	Constant prepayment	0.00% - 10.58%
securities	10,867	flow	rate(c)	(4.99%)
			• • · · · ·	40.07% - 78.97%
			Loss severity(c)	(59.52%)
				3.61% - 13.01%
			Constant default rate(c)	(8.31%) 2.69% - 9.53% (6.11%)
Certain CDO/ABS		Discounted cash	Yield(c)	2.09% - 9.33% (0.11%) 0.00% - 39.55%
Certain CDO/ABS	1.977	flow	Constant prepayment rate(c)	(12.87%)
	1,866	now	Loss severity(c)	0.00% - 9.20% (0.78%)
			Constant default rate(c)	0.00% - 1.19% (0.13%)
			Yield(c)	0.84% - 4.85% (2.85%)
Commercial mortgage backed		Discounted cash		0.00% - 27.34%
securities	3,051	flow	Yield(b)	(10.14%)

		Expansion	Recovery rate(b)	3% - 65%
Investment Book	1,290	Technique (BET)	Diversity score(b)	4 - 37 (14)
			Weighted average	1.12 - 9.17 years
			life(b)	(4.57 years)
Liabilities:				
Policyholder contract		Discounted cash	Equity implied	
deposits GMWB	1,005	flow	volatility(b)	6.0% - 40.0%
			Base lapse rates(b)	1.00% - 40.0%
			Dynamic lapse rates(b)	0.2% - 60.0%
			Mortality rates(b)	0.5% - 40.0%
			Utilization rates(b)	0.5% - 25.0%

Derivative Liabilities	Credit			
contracts	1,600	BET	Recovery rates(b)	3% - 36% (16%)
			Diversity score(b)	8 - 31 (13)
			Weighted average	5.02 - 8.40 years
			life(b)	(6.08 years)

(a) The unobservable inputs and ranges for the constant prepayment rate, loss severity and constant default rate relate to each of the individual underlying mortgage loans that comprise the entire portfolio of securities in the RMBS and collateralized debt obligation (CDO) securitization vehicles and not necessarily to the securitization vehicle bonds (tranches) purchased by AIG. The ranges of these inputs do not directly correlate to changes in the fair values of the tranches purchased by AIG because there are other factors relevant to the specific tranches owned by AIG including, but not limited to, purchase price, position in the waterfall, senior versus subordinated position and attachment points.

(b) Represents discount rates, estimates and assumptions that AIG believes would be used by market participants when valuing these assets and liabilities.

(c) Information received from independent third-party valuation service providers.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The ranges of reported inputs for Corporate debt, RMBS, CDO/ABS, and commercial mortgage-backed securities (CMBS) valued using a discounted cash flow technique consist of plus/minus one standard deviation in either direction from the value-weighted average. The preceding table does not give effect to AIG's risk management practices that might offset risks inherent in these investments.

Sensitivity to Changes in Unobservable Inputs

AIG considers unobservable inputs to be those for which market data is not available and that are developed using the best information available to AIG about the assumptions that market participants would use when pricing the asset or liability. Relevant inputs vary depending on the nature of the instrument being measured at fair value. The following is a general description of sensitivities of significant unobservable inputs along with interrelationships between and among the significant unobservable inputs and their impact on the fair value measurements. The effect of a change in a particular assumption in the sensitivity analysis below is considered independently of changes in any other assumptions. In practice, simultaneous changes in assumptions may not always have a linear effect on the inputs discussed below. Interrelationships may also exist between observable and unobservable inputs. Such relationships have not been included in the discussion below. For each of the individual relationships described below, the inverse relationship would also generally apply.

Corporate Debt

Corporate debt securities included in Level 3 are primarily private placement issuances that are not traded in active markets or that are subject to transfer restrictions. Fair value measurements consider illiquidity and non-transferability. When observable price quotations are not available, fair value is determined based on discounted cash flow models using discount rates based on credit spreads, yields or price levels of publicly-traded debt of the issuer or other comparable securities, considering illiquidity and structure. The significant unobservable input used in the fair value measurement of corporate debt is the yield. The yield is affected by the market movements in credit spreads and U.S. Treasury yields. In addition, the migration in credit quality of a given security generally has a corresponding effect on the fair value measurement of the securities. For example, a downward migration of credit quality would increase spreads. Holding U.S. Treasury rates constant, an increase in corporate credit spreads would decrease the fair value of corporate debt.

RMBS and Certain CDO/ABS

The significant unobservable inputs used in fair value measurements of residential mortgage backed securities and certain CDO/ABS valued by third-party valuation service providers are constant prepayment rates (CPR), constant default rates (CDR), loss severity, and yield. A change in the assumptions used for the probability of default will generally be accompanied by a corresponding change in the assumption used for the loss severity and an inverse change in the assumption used for prepayment rates. In general, increases in yield, CPR, CDR, and loss severity, in isolation, would result in a decrease in the fair value measurement. Changes in fair value based on variations in assumptions generally cannot be extrapolated because the relationship between the directional change of each input is not usually linear.

CMBS

The significant unobservable input used in fair value measurements for commercial mortgage backed securities is the yield. Prepayment assumptions for each mortgage pool are factored into the yield. CMBS generally feature a lower degree of prepayment risk than RMBS because commercial mortgages generally contain a penalty for prepayment. In general, increases in the yield would decrease the fair value of CMBS.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

CDO/ABS Direct Investment book

The significant unobservable inputs used for certain CDO/ABS securities valued using the BET are recovery rates, diversity score, and the weighted average life of the portfolio. An increase in recovery rates and diversity score will have a directionally similar corresponding impact on the fair value measurement of the portfolio. An increase in the weighted average life will decrease the fair value.

Policyholder contract deposits

The significant unobservable inputs used for embedded derivatives in policyholder contract deposits measured at fair value, mainly guaranteed minimum withdrawal benefits (GMWB) for variable annuity products, are equity volatility, mortality rates, lapse rates and utilization rates. Mortality, lapse and utilization rates may vary significantly depending upon age groups and duration. In general, increases in volatilities and utilization rates will increase the fair value, while increases in lapse rates and mortality rates will decrease the fair value of the liability associated with the GMWB.

Derivative liabilities credit contracts

The significant unobservable inputs used for Derivatives liabilities credit contracts are recovery rates, diversity scores, and the weighted average life of the portfolio. AIG non-performance risk is also considered in the measurement of the liability. See Note 6 to the Consolidated Financial Statements in the 2011 Annual Report for a discussion of AIG's accounting policies and procedures regarding incorporation of AIG's own credit risk in fair value measurements.

An increase in recovery rates and diversity score will decrease the fair value of the liability. An increase in the weighted average life will have a directionally similar corresponding effect on the fair value measurement of the liability.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Investments in Certain Entities Carried at Fair Value Using Net Asset Value Per Share

The following table includes information related to AIG's investments in certain other invested assets, including private equity funds, hedge funds and other alternative investments that calculate net asset value per share (or its equivalent). For these investments, which are measured at fair value on a recurring or non-recurring basis, AIG uses the net asset value per share as a practical expedient to measure fair value.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Private equity fund investments included above are not redeemable, as distributions from the funds will be received when underlying investments of the funds are liquidated. Private equity funds are generally expected to have 10-year lives at their inception, but these lives may be extended at the fund manager's discretion, typically in one or two year increments. At September 30, 2012, assuming average original expected lives of 10 years for the funds, 42 percent of the total fair value using net asset value or its equivalent above would have expected remaining lives of less than three years, 56 percent between three and seven years and 2 percent between seven and 10 years.

At September 30, 2012, hedge fund investments included above are redeemable monthly (11 percent), quarterly (31 percent), semi-annually (24 percent) and annually (34 percent), with redemption notices ranging from one day to 180 days. More than 60 percent of these hedge fund investments require redemption notices of less than 90 days. Investments representing approximately 54 percent of the value of the hedge fund investments cannot be redeemed, either in whole or in part, because the investments include various restrictions. The majority of these restrictions were put in place prior to 2009 and do not have stated end dates. The restrictions that have pre-defined end dates are generally expected to be lifted by the end of 2015. The partial restrictions relate to certain hedge funds that hold at least one investment that the fund manager deems to be illiquid.

Fair Value Option

Other liabilities		(9)		84	(31)		(91)				
Total gain (loss) ^(b)	\$	1,661	\$	(3,599)	\$ 6,032	\$	(129)				

The following table presents the gains or losses recorded related to the eligible instruments for which AIG elected the fair value option:

(a) Includes GIAs, notes, bonds, loans and mortgages payable.

(b) Excludes discontinued operation gains or losses on instruments that were required to be carried at fair value. For instruments required to be carried at fair value, AIG recognized gains of \$110 million and \$664 million for the three and nine months ended September 30, 2012, respectively, and losses of \$102 million and gains of \$819 million for the three and nine months ended September 30, 2011, respectively, that were primarily due to changes in the fair value of derivatives, trading securities and certain other invested assets for which the fair value option was not elected.

See Note 2(a) to the Consolidated Financial Statements in the 2011 Annual Report for additional information about AIG's policies for recognition, measurement, and disclosure of interest and dividend income and interest expense.

AIG recognized gains (losses) attributable to the observable effect of changes in credit spreads on AIG's own liabilities for which the fair value option was elected of \$126 million of loss and \$621 million of loss during the three- and nine-month periods ended September 30, 2012, respectively, and gain of \$459 million and \$475 million during the three- and nine-month periods ended September 30, 2011, respectively. AIG calculates the effect of these credit spread changes using discounted cash flow techniques that incorporate current market interest rates, AIG's observable credit spreads on these liabilities and other factors that mitigate the risk of nonperformance such as cash collateral posted.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The following table presents the difference between fair values and the aggregate contractual principal amounts of mortgage and other loans receivable and long-term borrowings for which the fair value option was elected:

		S	ember 30, 201 Outstanding Principal	2			1	Deco	ember 31, 2011 Outstanding Principal	1	
(in millions)	Fa	ir Value	Amount	D	Difference	Fa	air Value		Amount	D	ifference

receivable	\$	130	\$ 140	\$	(10)	\$	107	\$	150	\$	(43)
Liabilities:											
Other long-term debt*	\$	8,835	\$ 6,483	\$	2,352	\$	10,766	\$	8,624	\$	2,142

* Includes GIAs, notes, bonds, loans and mortgages payable.

At September 30, 2012 and December 31, 2011, there were no significant mortgage or other loans receivable for which the fair value option was elected that were 90 days or more past due and in non-accrual status.

Sale of AIA Shares

On March 7, 2012, AIG sold approximately 1.72 billion ordinary shares of AIA Group Limited (AIA) for gross proceeds of approximately \$6.0 billion. On September 11, 2012, AIG sold approximately 600 million ordinary shares of AIA for gross proceeds of approximately \$2.0 billion. As a result of these sales, AIG's retained interest in AIA decreased from approximately 33 percent with a total carrying value of \$12.4 billion at December 31, 2011 to approximately 14 percent with a total carrying value of \$6.1 billion at September 30, 2012.

Fair Value Information About Financial Instruments Not Measured at Fair Value

The following table presents the carrying value and estimated fair value of AIG's financial instruments not measured at fair value and indicates the level of the estimated fair value measurement based on the levels of the inputs used:

Total	\$ 37,024	\$ 2,056	\$ 14,554 \$	2,955	\$51,578 \$	5,011

At September 30, 2012, AIG held 3,444 and 254 individual fixed maturity and equity securities, respectively, that were in an unrealized loss position, of which 1,679 individual fixed maturity securities were in a continuous unrealized loss position for longer than 12 months. AIG did not recognize the unrealized losses in earnings on these fixed maturity securities at September 30, 2012, because management neither intends to sell the securities nor does it believe that it is more likely than not that it will be required to sell these securities before recovery of their amortized cost basis. Furthermore, management expects to recover the entire amortized cost basis of these securities. In performing this evaluation, management considered the recovery periods for securities in previous periods of broad market declines. For fixed maturity securities with significant declines, management performed fundamental credit analysis on a security-by-security basis, which included consideration of credit enhancements, expected defaults on underlying collateral, review of relevant industry analyst reports and forecasts and other available market data.

Contractual Maturities of Securities Available for Sale

The following table presents the amortized cost and fair value of fixed maturity securities available for sale by contractual maturity:

September 30, 2012		Total Fixed M Available for Sa	•	Fixed Maturity Securities in a Loss Position					
(in millions)		Amortized Cost	Fair Value	Amortized Cost		Fair Value			
Due in one year or less	\$	11,080	\$ 11,289	\$ 837	\$	830			
Due after one year through five years		54,288	57,505	4,143		4,009			
Due after five years through ten years		70,835	78,191	4,058		3,845			
Due after ten years		61,439	70,325	5,453		5,121			
Mortgage-backed, asset-backed and collateralized		49,048	52,604	7,722		6,572			
Total	\$	246,690	\$ 269,914	\$ 22,213	\$	20,377			

Actual maturities may differ from contractual maturities because certain borrowers have the right to call or prepay certain obligations with or without call or prepayment penalties.

The following table presents the gross realized gains and gross realized losses from sales or redemptions of AIG's available for sale securities:

	Three Months Ended September 30,							Nine Months Ended September 30,							
(in millions)	Gross Realized Gains		2012 Gross Realized Losses		Gross Realized Gains		2011 Gross Realized Losses		Gross Realized Gains		2012 Gross Realized Losses		Gross Realized Gains		2011 Gross Realized Losses
Fixed maturity securities Equity securities	\$ 943 38	\$	82 22	\$	612 30	\$	11 10	\$	2,308 503	\$	121 26	\$	1,462 178	\$	104 18
Total	\$ 981	\$	104	\$	642	\$	21	\$	2,811	\$	147	\$	1,640	\$	122

For the three- and nine-month periods ended September 30, 2012, the aggregate fair value of available for sale securities sold was \$8.8 billion and \$30.3 billion, respectively, which resulted in net realized capital gains of \$0.9 billion, and \$2.7 billion, respectively. For the three- and nine-month periods ended September 30, 2011, the aggregate fair value of available for sale securities sold was \$9.0 billion and \$33.1 billion, respectively, which resulted in net realized capital gains of \$621 million and \$1.5 billion, respectively.

* Includes securities with a fair value of approximately \$7.1 billion purchased through the FRBNY's auction of ML III assets.

Maiden Lane III

The FRBNY completed the liquidation of ML III assets during the third quarter of 2012 and substantially all of the sales proceeds have been distributed in accordance with the priority of payments of the transaction. In the three-and nine-month periods ended September 30, 2012, AIG received total payments of approximately \$8.47 billion and \$8.54 billion, respectively, which included contractual and additional distributions and AIG's original \$5.0 billion equity interest in ML III.

Through the nine months ended September 30, 2012, AIG purchased securities with a fair value of approximately \$7.1 billion through the FRBNY's auction of ML III assets.

Evaluating Investments for Other-Than-Temporary Impairments

For a discussion of AIG's policy for evaluating investments for other-than-temporary impairments, see Note 7 to the Consolidated Financial Statements in the 2011 Annual Report.

* Represents accretion recognized due to changes in cash flows expected to be collected over the remaining expected term of the credit impaired securities as well as the accretion due to the passage of time.

Purchased Credit Impaired (PCI) Securities

In the second quarter of 2011, AIG began purchasing certain RMBS securities that had experienced deterioration in credit quality since their issuance. Management determined, based on its expectations as to the timing and amount of cash flows expected to be received, that it was probable at acquisition that AIG would not collect all contractually required payments for these PCI securities, including both principal and interest and considering the effects of prepayments. At acquisition, the timing and amount of the undiscounted future cash flows expected to be received on each PCI security was determined based on management's best estimate using key assumptions, such as interest rates, default rates and prepayment speeds. At acquisition, the difference between the undiscounted expected future cash flows of the PCI securities and the recorded investment in the securities represents the initial accretable yield, which is to be accreted into net investment income over their remaining lives on a level-yield basis. Additionally, the difference between the contractually required payments on the PCI securities and the undiscounted expected future cash flows represents the non-accretable difference at acquisition. Over time, based on actual payments received and changes in estimates of undiscounted expected future cash flows, the accretable yield and the non-accretable difference can change, as discussed further below.

On a quarterly basis, the undiscounted expected future cash flows associated with PCI securities are re-evaluated based on updates to key assumptions. Declines in undiscounted expected future cash flows due to further credit deterioration as well as changes in the expected timing of the cash flows can result in the recognition of an other-than-temporary impairment charge, as PCI securities are subject to AIG's policy for evaluating investments for other-than-temporary impairment. Changes to undiscounted expected future cash flows due solely to the changes in the contractual benchmark interest rates on variable rate PCI securities will change the accretable yield prospectively. Significant increases in undiscounted expected future cash flows for reasons other than interest rate changes are recognized prospectively as adjustments to the accretable yield.

American International Group, Inc.

Pledged Investments

Secured Financing and Similar Arrangements

AIG enters into financing transactions, whereby certain securities are transferred to financial institutions in exchange for cash or other liquid collateral. Securities transferred by AIG under these financing transactions may be sold or repledged by the counterparties. As collateral for the

securities transferred by AIG, counterparties transfer assets, such as cash or high quality fixed maturity securities. Collateral levels are monitored daily and are generally maintained at an agreed-upon percentage of the fair value of the transferred securities during the life of the transactions. Where AIG receives fixed maturity securities as collateral, AIG does not have the right to sell or repledge this collateral unless an event of default occurs by the counterparties. At the termination of the transactions, AIG and its counterparties are obligated to return the collateral provided and the securities transferred, respectively. These transactions are treated as secured financing arrangements by AIG.

Secured financing transactions also include securities sold under agreements to repurchase (repurchase agreements), in which AIG transfers securities in exchange for cash, with an agreement by AIG to repurchase the same or substantially similar securities. In the majority of these repurchase agreements, the securities transferred by AIG may be sold or repledged by the counterparties.

Under the secured financing transactions described above, securities available for sale with a fair value of \$6.3 billion and \$2.3 billion at September 30, 2012 and December 31, 2011, respectively, and trading securities with a fair value of \$2.4 billion and \$2.8 billion at September 30, 2012 and December 31, 2011, respectively, were pledged to counterparties.

Λ	n
4	υ

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Prior to January 1, 2012, in the case of repurchase agreements where AIG did not obtain collateral sufficient to fund substantially all of the cost of purchasing identical replacement securities during the term of the contract (generally less than 90 percent of the security value), AIG accounted for the transaction as a sale of the security and reported the obligation to repurchase the security as a derivative contract. Effective January 1, 2012, the level of collateral received by the transferor in a repurchase agreement or similar arrangement is no longer relevant in determining whether the transaction should be accounted for as a sale. There were no repurchase agreements accounted for as sales as of September 30, 2012. The fair value of securities transferred under repurchase agreements accounted for as sales was \$ 2.1 billion at December 31, 2011.

AIG also enters into agreements in which securities are purchased by AIG under agreements to resell (reverse repurchase agreements), which are accounted for as secured financing transactions and reported as short-term investments or other assets, depending on their terms. For these transactions, AIG takes possession of or obtains a security interest in the related securities, and AIG has the right to sell or repledge this collateral received. The fair value of securities collateral pledged to AIG was \$7.5 billion and \$6.8 billion at September 30, 2012 and December 31, 2011, respectively, of which \$1.7 billion and \$122 million was repledged by AIG.

Insurance Statutory and Other Deposits

Total carrying values of cash and securities deposited by AIG's insurance subsidiaries under requirements of regulatory authorities or other insurance-related arrangements, including certain annuity-related obligations and certain reinsurance agreements, were \$9.0 billion and \$9.8 billion at September 30, 2012 and December 31, 2011, respectively.

Other Pledges

Certain AIG subsidiaries are members of Federal Home Loan Banks (FHLBs), and such membership requires the members to own stock in these FHLBs. AIG subsidiaries owned an aggregate of \$84 million and \$77 million of stock in FHLBs at September 30, 2012 and December 31, 2011, respectively. To the extent an AIG subsidiary borrows from the FHLB, its ownership interest in the stock of FHLBs will be pledged to the FHLB. In addition, AIG subsidiaries have pledged securities available for sale with a fair value of \$95 million at September 30, 2012, associated with advances from the FHLBs.

Certain GIAs have provisions that require collateral to be posted or payments to be made by AIG upon a downgrade of AIG's long-term debt ratings. The actual amount of collateral required to be posted to the counterparties in the event of such downgrades, and the aggregate amount of payments that AIG could be required to make, depends on market conditions, the fair value of outstanding affected transactions and other factors prevailing at and after the time of the downgrade. The fair value of securities pledged as collateral with respect to these obligations approximated \$4.7 billion and \$5.1 billion at September 30, 2012 and December 31, 2011, respectively. This collateral primarily consists of securities of the U.S. government and government sponsored entities and generally cannot be repledged or resold by the counterparties.

6. LENDING ACTIVITIES

The following table presents the composition of Mortgage and other loans receivable:

September 30,	December 31,
2012	2011

Commercial mortgages*	\$ 13,679 \$	13,554
Life insurance policy loans	2,962	3,049
Commercial loans, other loans and notes receivable	3,177	3,626
Total mortgage and other loans receivable	19,818	20,229
A 11 C 1	(400)	(740)
Allowance for losses	(488)	(740)
Allowance for losses	(488)	(740)

* Commercial mortgages primarily represent loans for office, retail and industrial properties, with exposures in California and New York representing the largest geographic concentrations (aggregating approximately 23 percent and 15 percent at September 30, 2012 and December 31, 2011, respectively). Over 99 percent of the commercial mortgages were current as to payments of principal and interest at September 30, 2012 and December 31, 2011.

Provision for loan losses	(106)	31	(75)	(62)	50	(12)
Other		(7)	(7)	(55)		(55)
Allowance, end of period	\$ 193 * \$	295 \$	5 488 \$	349* \$	412 \$	761

* Of the total, \$38 million and \$105 million relates to individually assessed credit losses on \$332 million and \$570 million of commercial mortgage loans as of September 30, 2012 and 2011, respectively.

As of September 30, 2012, there were no significant loans held by AIG that had been modified in a troubled debt restructuring during 2012.

7. VARIABLE INTEREST ENTITIES

AIG enters into various arrangements with variable interest entities (VIEs) in the normal course of business. AIG's involvement with VIEs is primarily through its insurance companies as a passive investor in debt securities (rated and unrated) and equity interests issued by VIEs. AIG's exposure is generally limited to those interests held. When AIG holds both an economic interest and the power to direct the most significant activities of the VIE, AIG is deemed to be the primary beneficiary and consolidates the VIE.

Exposure to Loss

AIG's total off-balance sheet exposure associated with VIEs, primarily consisting of commitments to real estate and investment funds, was \$0.3 billion and \$0.4 billion at September 30, 2012 and December 31, 2011, respectively.

42

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The following table presents AIG's total assets and total liabilities associated with its variable interests in consolidated VIEs:

	VIE Assets	a)	VIE Liabi	lities
	September 30,	December 31,	September 30,	December 31,
(in billions)	2012	2011	2012	2011
AIA/ALICO SPVs	\$ 0.6 (b) \$	14.2	\$ 0.1 \$	6 0.1
Real estate and investment funds(c)	1.1	1.5	0.3	0.4
Structured investment vehicles	1.6	1.0	0.1	
Affordable housing partnerships	2.3	2.5	.2	0.1
Other	3.3	3.6	1.0	2.0
Total	\$ 8.9 \$	22.8	\$ 1.7 \$	5 2.6

(a) The assets of each VIE can be used only to settle specific obligations of that VIE.

(b) Decrease primarily due to the retirement of the preferred interests held by the Department of the Treasury in the special purpose vehicle that held the proceeds of the initial public offering of AIA (such SPV, the AIA SPV and such preferred interests, the AIA SPV Preferred Interests). As a result, the AIA SPV no longer qualified as a VIE. Assets include \$600 million of cash held in escrow pursuant to the terms of the American Life Insurance Company (ALICO) stock purchase agreement between AIG and MetLife, Inc. (MetLife). See Note 9 herein for further discussion of the escrow arrangement.

(c) At both September 30, 2012 and December 31, 2011, off-balance sheet exposure with respect to real estate and investments funds was \$0.1 billion.

AIG calculates its maximum exposure to loss to be (i) the amount invested in the debt or equity of the VIE, (ii) the notional amount of VIE assets or liabilities where AIG has also provided credit protection to the VIE with the VIE as the referenced obligation, and (iii) other commitments and guarantees to the VIE. Interest holders in VIEs sponsored by AIG generally have recourse only to the assets and cash flows of the VIEs and do not have recourse to AIG, except in limited circumstances when AIG has provided a guarantee to the VIE's interest holders.

The following table presents total assets of unconsolidated VIEs in which AIG holds a variable interest, as well as AIG's maximum exposure to loss associated with these VIEs:

(in billions)	,	Fotal VIE Assets	Maxim On-Balance Sheet	um	Exposure to Loss Off-Balance Sheet	Total

Mortgage and other loans receivable		0.5		0.5					
Other invested assets*		4.3		17.2		2.3		2.6	
Other asset accounts		2.6		3.4					
Total	\$	8.9	\$	22.8	\$	2.4	\$	9.7	
Liabilities:									
Other long-term debt	\$	0.9	\$	1.7	\$		\$		
Other liability accounts		0.8		0.9					
Total	\$	1.7	\$	2.6	\$		\$		

* Decrease primarily due to the retirement of the AIA SPV Preferred Interests. See Note 1 herein for further discussion.

For information on RMBS, CMBS, and other ABS, see Notes 4 and 5 herein. For additional information on ABS and VIEs, see Notes 6, 7, and 11 to the Consolidated Financial Statements in the 2011 Annual Report.

8. DERIVATIVES AND HEDGE ACCOUNTING

AIG uses derivatives and other financial instruments as part of its financial risk management programs and as part of its investment operations. AIGFP had also transacted in derivatives as a dealer and had acted as an intermediary between the relevant AIG subsidiary and the counterparty. AIG Markets, Inc. (AIG Markets) has largely replaced AIGFP in acting as an intermediary between AIG subsidiaries and the external counterparties. Global Capital Markets (GCM), included in AIG's Other operations, consists of the operations of AIG Markets and the remaining derivatives portfolio of AIGFP.

(b) Includes cross currency swaps.

(c) Notional amount of derivative liabilities and fair values of derivative liabilities include \$22 billion and \$1.3 billion, respectively, at September 30, 2012, and \$18.3 billion and \$0.9 billion, respectively, at December 31, 2011, related to bifurcated embedded derivatives. A bifurcated embedded derivative is generally presented with the host contract in the Consolidated Balance Sheet.

(d) Consist primarily of contracts with multiple underlying exposures.

The following table presents the fair values of derivative assets and liabilities in the Consolidated Balance Sheet:

		September	30, 2012			December 31, 2011				
	Derivative Notional	e Assets Fair	Derivative L Notional	.iabilities Fair	Derivative . Notional	Assets Fair	Derivative Liabilities Notional Fair

(a) Represents derivatives used to hedge the foreign currency and interest rate risk associated with insurance and ILFC operations, as well as embedded derivatives included in insurance contracts. Liabilities include bifurcated embedded derivatives, which are recorded in Policyholder contract deposits.

(b) Represents netting of derivative exposures covered by a qualifying master netting agreement.

(c) Represents cash collateral posted and received.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Collateral

AIG engages in derivative transactions directly with unaffiliated third parties in most cases under International Swaps and Derivatives Association, Inc. (ISDA) agreements (ISDA Master Agreements). Many of the ISDA Master Agreements also include Credit Support Annex (CSA) provisions, which generally provide for collateral postings at various ratings and threshold levels.

Collateral posted by AIG to third parties for derivative transactions was \$4.6 billion and \$4.7 billion at September 30, 2012 and December 31, 2011, respectively. This collateral can generally be repledged or resold by the counterparties. Collateral obtained by AIG from third parties for derivative transactions was \$1.5 billion and \$1.6 billion at September 30, 2012 and December 31, 2011, respectively. This collateral can generally be repledged or resold by AIG and September 30, 2012 and December 31, 2011, respectively. This collateral can generally be repledged or resold by AIG.

Hedge Accounting

AIG designated certain derivatives entered into by GCM with third parties as cash flow hedges of certain debt issued by ILFC and designated certain derivatives entered into by AIG's insurance subsidiaries with third parties as fair value hedges of available-for-sale investment securities held by such subsidiaries. The fair value hedges include foreign currency forwards designated as hedges of the change in fair value of foreign currency denominated available-for-sale securities attributable to changes in foreign exchange rates. With respect to the cash flow hedges, interest rate swaps were designated as hedges of the changes in cash flows on floating rate debt attributable to changes in the benchmark interest rate.

AIG uses foreign currency denominated debt as hedging instruments in net investment hedge relationships to mitigate the foreign exchange risk associated with AIG's non-U.S. dollar functional currency foreign subsidiaries. AIG assesses the hedge effectiveness and measures the amount of ineffectiveness for these hedge relationships based on changes in spot exchange rates. For the three- and nine-month periods ended September 30, 2012, AIG recognized losses of \$70 million and \$13 million, respectively, and for the three- and nine-month periods ended September 30, 2011, AIG recognized losses of \$1 million and \$36 million, respectively, included in Foreign currency translation adjustment in Accumulated other comprehensive income related to the net investment hedge relationships.

A qualitative methodology is utilized to assess hedge effectiveness for net investment hedges, while regression analysis is employed for all other hedges.

The following table presents the effect of AIG's derivative instruments in fair value hedging relationships in the Consolidated Statement of Operations:

	Three Months Ended September 30,			N	Ended 30,			
(in millions)		2012		2011		2012		2011
Interest rate contracts(a):)	
Loss recognized in earnings on derivatives	\$		\$		\$	(2	\$	(3)
Gain recognized in earnings on hedged items(b)		19		39		99		127
Loss recognized in earnings for ineffective portion and amount excluded from								
effectiveness testing								(1)

(a) Gains and losses recognized in earnings for the ineffective portion and amounts excluded from effectiveness testing are recorded in Net realized capital gains (losses). Includes immaterial amounts related to foreign exchange contracts.

(b) Includes \$18 million and 39 million, for the three-month periods ended September 30, 2012 and 2011, respectively, and \$97 million and \$125 million, for the nine-month periods ended September 30, 2012 and 2011, respectively, representing the amortization of debt basis adjustment following the discontinuation of hedge accounting recorded in Other income and Net realized capital gains (losses).

(a) Includes cross currency swaps.

(b) Includes embedded derivative losses of \$75 million and \$812 million for the three-month periods ended September 30, 2012 and 2011, respectively, and embedded derivatives losses of \$268 million and \$807 million, for the nine-month periods ended September 30, 2012 and 2011, respectively.

Global Capital Markets Derivatives

GCM enters into derivatives to mitigate market risk in its exposures (interest rates, currencies, commodities, credit and equities) arising from its transactions. At September 30, 2012, GCM has entered into credit derivative

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

transactions with respect to \$81 million of securities to economically hedge its credit risk. In most cases, GCM has not hedged its exposures related to the credit default swaps it has written.

GCM follows a policy of minimizing interest rate, currency, commodity, and equity risks associated with investment securities by entering into offsetting positions, thereby offsetting a significant portion of the unrealized appreciation and depreciation

Super Senior Credit Default Swaps

Credit default swap transactions were entered into with the intention of earning revenue on credit exposure. In the majority of these transactions, credit protection was sold on a designated portfolio of loans or debt securities. Generally, such credit protection was provided on a "second loss" basis, meaning that credit losses would be incurred only after a shortfall of principal and/or interest, or other credit events, in respect of the protected loans and debt securities, exceeds a specified threshold amount or level of "first losses."

The following table presents the net notional amount, fair value of derivative (asset) liability and unrealized market valuation gain (loss) of the super senior credit default swap portfolio, including credit default swaps written on mezzanine tranches of certain regulatory capital relief transactions, by asset class:

	NT. 4 NT. 41	1.4	Fair V		Unrealiz	ed Market Valu	ation Gain (Loss) ^(c)		
	Net Notional Amount(a)Derivative (Asset) Liability at(b)(c)September 30,December 31,September 30,December 31,		Three Mont Septemb		Nine Months September

Mezzanine tranches		989		10	14	(1)	3	(15)
Total	\$ 17,107 \$	24,619 \$	2,257 \$	3,223 \$	204 \$	3 \$	401 \$	232

(a) Net notional amounts presented are net of all structural subordination below the covered tranches.

(b) Fair value amounts are shown before the effects of counterparty netting adjustments and offsetting cash collateral.

(c) Includes credit valuation adjustment gains (losses) of \$(12) million and \$25 million in the three-month periods ended September 30, 2012 and 2011, respectively, and \$(36) million and \$27 million in the nine-month periods ended September 30, 2012 and 2011, respectively, representing the effect of changes in AIG's credit spreads on the valuation of the derivatives liabilities.

(d) During the nine-month period ended September 30, 2012, a super senior CDS transaction with a net notional amount of \$470 million was terminated at approximately its fair value at the time of termination. As a result, a \$416 million loss, which was previously included in the fair value derivative liability as an unrealized market valuation loss, was realized. During the nine-month period ended September 30, 2012, \$142 million was paid to counterparties with respect to multi-sector CDOs. Upon payment, a \$142 million loss, which was previously included in the fair value of the derivative liability as an unrealized market valuation loss, was realized. Multi-sector CDOs upon payment, a \$142 million loss, was realized. Multi-sector CDOs also include \$3.7 billion and \$4.6 billion in net notional amount of credit default swaps written with cash settlement provisions at September 30, 2012 and December 31, 2011, respectively.

(e) Corporate debt/CLOs include \$1.2 billion in net notional amount of credit default swaps written on the super senior tranches of CLOs at both September 30, 2012 and December 31, 2011.

48

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The expected weighted average maturity of the super senior credit derivative portfolios as of September 30, 2012 was less than one year for both the regulatory capital corporate loan portfolio and the regulatory capital prime residential mortgage portfolio, 5.8 years for the multi-sector CDO arbitrage portfolio and 3.4 years for the corporate debt/CLO portfolio.

Given the current performance of the underlying portfolios, the level of subordination of the credit protection written and the assessment of the credit quality of the underlying portfolio, as well as the risk mitigants inherent in the transaction structures, AIG does not expect that it will be required to make payments pursuant to the contractual terms of those transactions providing regulatory relief.

Because of long-term maturities of the CDS in the arbitrage portfolio, AIG is unable to make reasonable estimates of the periods during which any payments would be made. However, the net notional amount represents the maximum exposure to loss on the super senior credit default swap portfolio.

Written Single Name Credit Default Swaps

Credit default swap contracts referencing single-name exposures written on corporate, index and asset-backed credits have also been entered into with the intention of earning spread income on credit exposure. Some of these transactions were entered into as part of a long-short strategy to earn the net spread between CDS written and purchased. At September 30, 2012, the net notional amount of these written CDS contracts was \$633 million, including ABS CDS transactions purchased from a liquidated multi-sector super senior CDS transaction. These exposures have been partially hedged by purchasing offsetting CDS contracts of \$52 million in net notional amount. The net unhedged position of \$581 million represents the maximum exposure to loss on these CDS contracts. The average maturity of the written CDS contracts is 3.0 years. At September 30, 2012, the fair value of derivative liability (which represents the carrying value) of the portfolio of CDS was \$72 million.

Upon a triggering event (e.g., a default) with respect to the underlying credit, the option would normally exist to either settle the position through an auction process (cash settlement) or pay the notional amount of the contract to the counterparty in exchange for a bond issued by the underlying credit obligor (physical settlement).

These CDS contracts were written under ISDA Master Agreements. The majority of these ISDA Master Agreements include CSAs that provide for collateral postings at various ratings and threshold levels. At September 30, 2012, collateral posted by AIG under these contracts was \$85 million prior to offsets for other transactions.

All Other Derivatives

AIG's businesses other than GCM also use derivatives and other instruments as part of their financial risk management. Interest rate derivatives (such as interest rate swaps) are used to manage interest rate risk associated with embedded derivatives contained in insurance contract liabilities, fixed maturity securities, outstanding medium- and long-term notes as well as other interest rate sensitive assets and liabilities. Foreign exchange derivatives (principally foreign exchange forwards and options) are used to economically mitigate risk associated with non-U.S. dollar denominated debt, net capital exposures, and foreign currency transactions. Equity derivatives are used to mitigate financial risk embedded in certain insurance liabilities. The derivatives are effective economic hedges of the exposures that they are meant to offset.

In addition to hedging activities, AIG also enters into derivative instruments with respect to investment operations, which include, among other things, credit default swaps and purchasing investments with embedded derivatives, such as equity-linked notes and convertible bonds.

Credit Risk-Related Contingent Features

The aggregate fair value of AIG's derivative instruments that contain credit risk-related contingent features that were in a net liability position at September 30, 2012, was approximately \$4.0 billion. The aggregate fair value of assets posted as collateral under these contracts at September 30, 2012, was \$4.4 billion.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

AIG estimates that at September 30, 2012, based on AIG's outstanding financial derivative transactions a one-notch downgrade of AIG's long-term senior debt ratings to BBB+ by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc. (S&P), would permit counterparties to make additional collateral calls and permit the counterparties to elect early termination of contracts, resulting in a negligible amount of corresponding collateral postings and termination payments; a one-notch downgrade to Baa2 by Moody's Investors' Services, Inc. (Moody's) and an additional one-notch downgrade to BBB by S&P would result in approximately \$125 million in additional collateral postings and termination payments. Additional collateral postings upon downgrade are estimated based on the factors in the individual collateral posting provisions of the CSA with each counterparty and current exposure as of September 30, 2012. Factors considered in estimating the termination payments upon downgrade include current market conditions, the complexity of the derivative transactions, historical termination experience and other observable market events such as bankruptcy and downgrade events that have occurred at other companies. Management's estimates are also based on the assumption that counterparties will terminate based on their net exposure to AIG. The actual termination payments could significantly differ from management's estimates given market conditions at the time of downgrade and the level of uncertainty in estimating both the number of counterparties who may elect to exercise their right to terminate and the payment that may be triggered in connection with any such exercise.

Hybrid Securities with Embedded Credit Derivatives

AIG invests in hybrid securities (such as credit-linked notes) with the intent of generating income, and not specifically to acquire exposure to embedded derivative risk. Similar to AIG's other investments in RMBS, CMBS, CDOs and ABS, AIG's investments in these hybrid securities are exposed to losses only up to the amount of AIG's initial investment in the hybrid security. Other than AIG's initial investment in the hybrid securities, AIG has no further obligation to make payments on the embedded credit derivatives in the related hybrid securities.

AIG elects to account for its investments in these hybrid securities with embedded written credit derivatives at fair value, with changes in fair value recognized in Net investment income and Other income. AIG's investments in these hybrid securities are reported as Bond trading securities in the Consolidated Balance Sheet. The fair value of these hybrid securities was \$7.0 billion at September 30, 2012. These securities have a current par amount of \$15.4 billion and have remaining stated maturity dates that extend to 2052.

9. CONTINGENCIES, COMMITMENTS AND GUARANTEES

In the normal course of business, various contingent liabilities and commitments are entered into by AIG and certain of its subsidiaries. In addition, AIG guarantees various obligations of certain subsidiaries.

AIG recorded an increase in its estimated litigation liability of approximately \$15 million and \$742 million in the three and nine-month periods ended September 30, 2012 based on developments in several actions.

Although AIG cannot currently quantify its ultimate liability for unresolved litigation and investigation matters, including those referred to below, it is possible that such liability could have a material adverse effect on AIG's consolidated financial condition or its consolidated results of operations or consolidated cash flows for an individual reporting period.

Legal Contingencies

Overview. AIG and its subsidiaries, in common with the insurance and financial services industries in general, are subject to litigation, including claims for punitive damages, in the normal course of their business. In AIG's insurance operations (including UGC), litigation arising from claims settlement activities is generally considered in the establishment of AIG's liability for unpaid claims and claims adjustment expense.

However, the potential for increasing jury awards and settlements makes it difficult to assess the ultimate outcome of such litigation. AIG is also subject to derivative, class action and other claims asserted by its shareholders and others alleging, among other

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

things, breach of fiduciary duties by its directors and officers and violations of insurance laws and regulations, as well as federal and state securities laws. In the case of any derivative action brought on behalf of AIG, any recovery would accrue to the benefit of AIG.

Various regulatory and governmental agencies have been reviewing certain public disclosures, transactions and practices of AIG and its subsidiaries in connection with industry-wide and other inquiries into, among other matters, AIG's liquidity, compensation paid to certain employees, payments made to counterparties, and certain business practices and valuations of current and former operating insurance subsidiaries. AIG has cooperated, and will continue to cooperate, in producing documents and other information in response to subpoenas and other requests.

AIG's Subprime Exposure, AIGFP Credit Default Swap Portfolio and Related Matters

AIG, AIGFP and certain directors and officers of AIG, AIGFP and other AIG subsidiaries have been named in various actions relating to AIG's exposure to the U.S. residential subprime mortgage market, unrealized market valuation losses on AIGFP's super senior credit default swap portfolio, losses and liquidity constraints relating to AIG's securities lending program and related disclosure and other matters (Subprime Exposure Issues).

Consolidated 2008 Securities Litigation. Between May 21, 2008 and January 15, 2009, eight purported securities class action complaints were filed against AIG and certain directors and officers of AIG and AIGFP, AIG's outside auditors, and the underwriters of various securities offerings in the United States District Court for the Southern District of New York (the Southern District of New York), alleging claims under the Securities Exchange Act of 1934, as amended (the Exchange Act), or claims under the Securities Act of 1933, as amended (the Securities Act). On March 20, 2009, the Court consolidated all eight of the purported securities class actions as In re American International Group, Inc. 2008 Securities Litigation (the Consolidated 2008 Securities Litigation).

On May 19, 2009, lead plaintiff in the Consolidated 2008 Securities Litigation filed a consolidated complaint on behalf of purchasers of AIG Common Stock during the alleged class period of March 16, 2006 through September 16, 2008, and on behalf of purchasers of various AIG securities offered pursuant to AIG's shelf registration statements. The consolidated complaint alleges that defendants made statements during the class period in press releases, AIG's quarterly and year-end filings, during conference calls, and in various registration statements and prospectuses in connection with the various offerings that were materially false and misleading and that artificially inflated the price of AIG Common Stock. The alleged false and misleading statements relate to, among other things, the Subprime Exposure Issues. The consolidated complaint alleges violations of Sections 10(b) and 20(a) of the Exchange Act and Sections 11, 12(a)(2), and 15 of the Securities Act. On August 5, 2009, defendants filed motions to dismiss the consolidated complaint, and on September 27, 2010, the Court denied the motions to dismiss.

On April 1, 2011, the lead plaintiff in the Consolidated 2008 Securities Litigation filed a motion to certify a class of plaintiffs. On November 2, 2011, the Court terminated the motion without prejudice to an application for restoration. On March 30, 2012, the lead plaintiff filed a renewed motion to certify a class of plaintiffs.

AIG has accrued its estimate of probable loss with respect to this litigation.

On November 18, 2011, January 20, 2012, June 11, 2012, and August 8, 2012, four separate, though similar, securities actions were brought against AIG and certain directors and officers of AIG and AIGFP by the Kuwait Investment Authority, various Oppenheimer Funds, eight foreign funds and investment entities led by the British Coal Staff Superannuation Scheme, and Pacific Life Funds and Pacific Select Fund.

As of November 1, 2012, no discussions concerning potential damages have occurred and the plaintiffs have not formally specified an amount of alleged damages in their respective actions. As a result, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from these litigations.

ERISA Actions Southern District of New York. Between June 25, 2008, and November 25, 2008, AIG, certain directors and officers of AIG, and members of AIG's Retirement Board and Investment Committee were named as defendants in eight purported class action complaints

asserting claims on behalf of participants in certain pension plans sponsored by AIG or its subsidiaries. The Court subsequently consolidated these eight actions as In re American International Group, Inc. ERISA Litigation II. On September 4, 2012, lead plaintiffs' counsel filed a second

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

consolidated amended complaint. The action purports to be brought as a class action under the Employee Retirement Income Security Act of 1974, as amended (ERISA), on behalf of all participants in or beneficiaries of certain benefit plans of AIG and its subsidiaries that offered shares of AIG Common Stock. In the consolidated amended complaint, plaintiffs allege, among other things, that the defendants breached their fiduciary responsibilities to plan participants and their beneficiaries under ERISA, by continuing to offer the AIG Stock Fund as an investment option in the plans after it allegedly became imprudent to do so. The alleged ERISA violations relate to, among other things, the defendants' purported failure to monitor and/or disclose certain matters, including the Subprime Exposure Issues.

As of November 1, 2012, plaintiffs have not formally specified an amount of alleged damages, discovery is ongoing, and the Court has not determined if a class action is appropriate or the size or scope of any class. As a result, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the litigation.

Consolidated 2007 Derivative Litigation. On November 20, 2007 and August 6, 2008, purported shareholder derivative actions were filed in the Southern District of New York naming as defendants directors and officers of AIG and its subsidiaries and asserting claims on behalf of nominal defendant AIG. The actions have been consolidated as In re American International Group, Inc. 2007 Derivative Litigation (the Consolidated 2007 Derivative Litigation). On June 3, 2009, lead plaintiff filed a consolidated amended complaint naming additional directors and officers of AIG and its subsidiaries as defendants. As amended, the factual allegations include the Subprime Exposure Issues and AIG and AIGFP employee retention payments and related compensation issues. The claims asserted on behalf of nominal defendant AIG include breach of fiduciary duty, waste of corporate assets, unjust enrichment, contribution and violations of Sections 10(b) and 20(a) of the Exchange Act. On March 30, 2010, the Court dismissed the action due to plaintiff's failure to make a pre-suit demand on AIG's Board of Directors (the Board). On March 17, 2011, the United States Court of Appeals for the Second Circuit (the Second Circuit) affirmed the Southern District of New York's dismissal of the Consolidated 2007 Derivative Litigation due to plaintiff's failure to make a pre-suit demand.

On August 10, 2011 and August 15, 2011, the plaintiff that brought the Consolidated 2007 Derivative Litigation sent letters to the Board demanding that the Board cause AIG to pursue the claims asserted in the Consolidated 2007 Derivative Litigation. On September 13, 2011, the Board rejected the demand.

On March 20, 2009, a purported shareholder derivative complaint alleging similar claims as the Consolidated 2007 Derivatives Litigation was filed in the Supreme Court of New York County naming as defendants certain directors and officers of AIG and recipients of AIGFP retention payments. The complaint has not been served on any defendant.

Canadian Securities Class Action Ontario Superior Court of Justice. On November 12, 2008, an application was filed in the Ontario Superior Court of Justice for leave to bring a purported class action against AIG, AIGFP, certain directors and officers of AIG and Joseph Cassano, the former Chief Executive Officer of AIGFP, pursuant to the Ontario Securities Act. If the Court grants the application, a class plaintiff will be permitted to file a statement of claim against defendants. The proposed statement of claim would assert a class period of March 16, 2006 through September 16, 2008 and would allege that during this period defendants made false and misleading statements and omissions in quarterly and annual reports and during oral presentations in violation of the Ontario Securities Act.

On April 17, 2009, defendants filed a motion record in support of their motion to stay or dismiss for lack of jurisdiction and forum non conveniens. On July 12, 2010, the Court adjourned a hearing on the motion pending a decision by the Supreme Court of Canada in a pair of actions captioned Club Resorts Ltd. v. Van Breda 2012 SCC 17 (Van Breda). On April 18, 2012, the Supreme Court of Canada clarified the standard for determining jurisdiction over foreign and out-of-province defendants, such as AIG, by holding that a defendant must have some form of "actual," as opposed to a merely "virtual," presence in order to be deemed to be "doing business" in the jurisdiction. The Supreme Court of Canada also suggested that in future cases, defendants may contest jurisdiction even when they are found to be doing business in a Canadian jurisdiction if their business activities in the jurisdiction are unrelated to the subject matter of the litigation. The matter has been stayed pending further developments in the Consolidated 2008 Securities Litigation.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

In plaintiff's proposed statement of claim, plaintiff alleged general and special damages of \$500 million and punitive damages of \$50 million plus prejudgment interest or such other sums as the Court finds appropriate. As of November 1, 2012 the Court has not determined whether it has jurisdiction or granted plaintiff's application to file a statement of claim, no merits discovery has occurred and the action has been stayed. As a result, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the litigation.

Starr International Litigation

On November 21, 2011, Starr International Company, Inc. (SICO) filed a complaint against the United States in the United States Court of Federal Claims), bringing claims, both individually and on behalf of all others similarly situated and derivatively on behalf of AIG (the Starr Treasury Action). The complaint challenges the government's assistance of AIG, pursuant to which AIG entered into the FRBNY Credit Facility and the United States received an approximately 80 percent ownership in AIG. The complaint alleges that the interest rate imposed on AIG and the appropriation of approximately 80 percent of AIG's equity was discriminatory, unprecedented, and inconsistent with liquidity assistance offered by the government to other comparable firms at the time and violated the Equal Protection, Due Process, and Takings Clauses of the U.S. Constitution.

On November 21, 2011, SICO also filed a second complaint in the Southern District of New York against the FRBNY bringing claims, both individually and on behalf of all others similarly situated and derivatively on behalf of AIG. This complaint also challenges the government's assistance of AIG, pursuant to which AIG entered into the FRBNY Credit Facility and the United States received an approximately 80 percent ownership in AIG. The complaint alleges that the FRBNY owed fiduciary duties to AIG as a controlling shareholder of AIG, and that the FRBNY breached these fiduciary duties by "divert[ing] the rights and assets of AIG and its shareholders to itself and favored third parties" through transactions involving ML III, an entity controlled by the FRBNY, and by "participating in, and causing AIG's officers and directors to participate in, the evasion of AIG's existing Common Stock shareholders' right to approve the massive issuance of the new Common Shares required to complete the government's taking of a nearly 80 percent interest in the Common Stock of AIG." SICO also alleges that the "FRBNY has asserted that in exercising its control over, and acting on behalf of, AIG it did not act in an official, governmental capacity or at the direction of the United States, "but that "[t]o the extent the proof at or prior to trial shows that the FRBNY did in fact act in a governmental capacity, or at the direction of the United States, the improper conduct . . . constitutes the discriminatory takings of the property and property rights of AIG without due process or just compensation."

On January 31, 2012 and February 1, 2012, amended complaints were filed in the Court of Federal Claims and the Southern District of New York, respectively. On March 1, 2012, the United States filed a motion to dismiss the amended complaint in the Court of Federal Claims. On April 2, 2012, the FRBNY filed its motion to dismiss the amended complaint in the Southern District of New York. On July 2, 2012, the Court of Federal Claims issued an opinion largely denying the United States' motion to dismiss and allowing most of SICO's claims to proceed. The United States filed an answer on July 30, 2012. On August 9, 2012, the United States filed a motion for reconsideration of the Court of Federal Claim's July 2, 2012 Order. On August 22, 2012, the United States filed a renewed motion to dismiss and stay. On September 13, 2012, and September 17, 2012, the Court of Federal Claims denied the United States' renewed motion to dismiss and stay and motion for reconsideration, respectively. Discovery is proceeding in the Court of Federal Claims.

In both of the actions commenced by SICO, the only claims naming AIG as a party are derivative claims on behalf of AIG. On September 21, 2012, SICO made a pre-litigation demand on AIG's Board demanding that AIG pursue the derivative claims in both actions. AIG has informed the Court of Federal Claims and the Southern District of New York that AIG's Board expects to make a decision on Starr's demand by the end of January 2013.

The United States has alleged, as an affirmative defense in its answer, that AIG is obligated to indemnify the FRBNY and its representatives, including the Federal Reserve Board of Governors and the United States (as the FRBNY's principal), for any recovery in the Court of Federal Claims action, and seeks a contingent offset or recoupment for the value of net operating loss benefits the United States alleges that AIG received as a result of the government's assistance to AIG. The FRBNY has also requested indemnification under the FRBNY Credit Facility from AIG in

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

connection with the action against it and from ML III under the Master Investment and Credit Agreement and the Amended and Restated Limited Liability Company Agreement of ML III.

Other Litigation Related to AIGFP

On September 30, 2009, Brookfield Asset Management, Inc. and Brysons International, Ltd. (together, Brookfield) filed a complaint against AIG and AIGFP in the Southern District of New York. Brookfield seeks a declaration that a 1990 interest rate swap agreement between Brookfield and AIGFP (guaranteed by AIG) terminated upon the occurrence of certain alleged events that Brookfield contends constituted defaults under the swap agreement's standard "bankruptcy" default provision. Brookfield claims that it is excused from all future payment obligations under the swap agreement on the basis of the purported termination. At September 30, 2012, the estimated present value of expected future cash flows discounted at LIBOR was \$1.5 billion, which represents AIG's maximum contractual loss from the alleged termination of the contract. It is AIG's position that no termination event has occurred and that the swap agreement remains in effect. A determination that a termination event has occurred could result in AIG losing its entitlement to all future payments under the swap agreement and result in a loss to AIG of the full value at which AIG is carrying the swap agreement.

Additionally, a determination that AIG triggered a "bankruptcy" event of default under the swap agreement could also, depending on the Court's precise holding, affect other AIG or AIGFP agreements that contain the same or similar default provisions. Such a determination could also affect derivative agreements or other contracts between third parties, such as credit default swaps under which AIG is a reference credit, which could affect the trading price of AIG securities. During the third quarter of 2011, beneficiaries of certain previously repaid AIGFP guaranteed investment agreements brought an action against AIG Parent and AIGFP making "bankruptcy" event of default allegations similar to those made by Brookfield. The Court subsequently issued a decision dismissing that action, which is currently on appeal.

Employment Litigation against AIG and AIG Global Real Estate Investment Corporation

Fitzpatrick matter. On December 9, 2009, AIG Global Real Estate Investment Corporation's (AIGGRE) former President, Kevin P. Fitzpatrick, several entities he controls, and various other single purpose entities (the SPEs) filed a complaint in the Supreme Court of the State of New York, New York County against AIG and AIGGRE (the Defendants). The case was removed to the Southern District of New York, and an amended complaint was filed on March 8, 2010. The amended complaint asserts that the Defendants violated fiduciary duties to Fitzpatrick and his controlled entities and breached Fitzpatrick's employment agreement and agreements of SPEs that purportedly entitled him to carried interest fees arising out of the sale or disposition of certain real estate. Fitzpatrick has also brought derivative claims on behalf of the SPEs, purporting to allege that the Defendants breached contractual and fiduciary duties in failing to fund the SPEs with various amounts allegedly due under the SPE agreements. Fitzpatrick has also requested injunctive relief, an accounting, and that a receiver be appointed to manage the affairs of the SPEs. He has further alleged that the SPEs are subject to a constructive trust. Fitzpatrick also has alleged a violation of ERISA relating to retirement benefits purportedly due. Fitzpatrick has claimed that he is currently owed damages totaling approximately \$196 million, and that potential future amounts owed to him are approximately \$78 million, for a total of approximately \$274 million. Fitzpatrick further claims unspecified amounts of carried interest on certain additional real estate assets of AIG and its affiliates. He also seeks punitive damages for the alleged breaches of fiduciary duties. Defendants assert that Fitzpatrick has been paid all amounts currently due and owing pursuant to the various agreements through which he seeks recovery. As set forth above, the possible range of loss to AIG is \$0 to \$274 million, although Fitzpatrick claims that he is also entitled to additional unspecifi

Behm matter. Frank Behm, former President of AIG Global Real Estate Asia Pacific, Inc. (AIGGREAP), has filed two actions in connection with the termination of his employment. Behm filed an action on or about October 1, 2010 in Delaware Superior Court in which he asserts claims of breach of implied covenant of good faith and fair dealing for termination in violation of public policy, deprivation of compensation, and breach of contract. Additionally, on or

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

about March 29, 2011, Behm filed an arbitration proceeding before the American Arbitration Association alleging wrongful termination, in which he seeks the payment of carried interest or "promote" distributed through the SPEs, based on the sales of certain real estate assets. Behm also contends that he is entitled to promote as a third-party beneficiary of Kevin Fitzpatrick's employment agreement, which, Behm claims, defines broadly a class of individuals, allegedly including himself, who, with the approval of AIG's former Chief Investment Officer, became eligible to receive promote payments. Behm is now claiming approximately \$67 million in carried interest. Multiple AIG entities (the AIG Entities) are named as parties in each of the Behm matters. The AIG Entities have filed a counterclaim in the Delaware case, contending that Behm owes them approximately \$3.6 million (before pre-judgment interest) in tax equalization payments made by the AIG Entities on Behm's behalf.

Both matters filed by Behm are premised on the same key allegations. Behm claims that the AIG Entities wrongfully terminated him from AIGGREAP in an effort to silence him for voicing opposition to allegedly improper practices concerning the amount of AIG reserves for carried interest that Behm contends is due to him and others. The AIG Entities contend that their reserves are appropriate, as Behm's claims for additional carried interest are without merit. Behm claims that, when he refused to accede to the AIG Entities' position as to the amount of carried interest due, he was targeted for investigation and subsequently terminated, purportedly for providing confidential AIG information to a competitor, and its executive search firm. Behm argues that he did not disclose any confidential information; instead, he met with several of the competitor's representatives in order to foster interest in purchasing AIGGREAP.

As set forth above, the possible range of loss to AIG is \$0 to \$67 million, although Behm claims that he is also entitled to additional unspecified amounts of carried interest and punitive damages.

False Claims Act Complaint

On February 25, 2010, a complaint was filed in the United States District Court for the Southern District of California by two individuals (Relators) seeking to assert claims on behalf of the United States against AIG and certain other defendants, including Goldman Sachs and Deutsche Bank, under the False Claims Act. Relators filed a First Amended Complaint on September 30, 2010, adding certain additional defendants, including Bank of America and Société Générale. The amended complaint alleges that defendants engaged in fraudulent business practices in respect of their activities in the over-the-counter market for collateralized debt obligations, and submitted false claims to the United States in connection with the FRBNY Credit Facility and the ML II and ML III entities (the Maiden Lane Interests) through, among other things, misrepresenting AIG's ability and intent to repay amounts drawn on the FRBNY Credit Facility, and misrepresenting the value of the securities that the Maiden Lane Interests acquired from AIG and certain of its counterparties. The complaint seeks unspecified damages pursuant to the False Claims Act in the amount of three times the damages allegedly sustained by the United States as well as interest, attorneys' fees, costs and expenses. The complaint and amended complaints were initially filed and maintained under seal while the United States considered whether to intervene in the action. On or about April 28, 2011, after the United States declined to intervene, the District Court lifted the seal, and Relators served the amended complaint on AIG on July 11, 2011. The Relators have not specified in their amended complaint an amount of alleged damages. As a result, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the litigation.

2006 Regulatory Settlements and Related Regulatory Matters

2006 Regulatory Settlements. In February 2006, AIG reached a resolution of claims and matters under investigation with the United States Department of Justice (DOJ), the Securities and Exchange Commission (SEC), the Office of the New York Attorney General (NYAG) and the New York State Department of Insurance (DOI). The settlements resolved investigations conducted by the SEC, NYAG and DOI in connection with the accounting, financial reporting and insurance brokerage practices of AIG and its subsidiaries, as well as claims relating to the underpayment of certain workers' compensation premium taxes and other assessments. These settlements did not, however, resolve investigations by regulators from other states into insurance brokerage practices related to contingent commissions and other broker-related conduct, such as alleged bid rigging. Nor did the settlements resolve any obligations that AIG may have to state guarantee funds in connection with any of these matters.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

As a result of these settlements, AIG made payments or placed amounts in escrow in 2006 totaling approximately \$1.64 billion, \$225 million of which represented fines and penalties.

In addition to the escrowed funds, \$800 million was deposited into, and subsequently disbursed by, a fund under the supervision of the SEC, to resolve claims asserted against AIG by investors, including the securities class action and shareholder lawsuits described below.

A portion of the total \$1.64 billion originally placed in escrow was designated to satisfy certain regulatory and litigation liabilities related to workers' compensation premium reporting issues. The original workers' compensation escrow amount was approximately \$338 million and was placed in an account established as part of the 2006 New York regulatory settlement and referred to as the Workers' Compensation Fund. Additional money was placed into escrow accounts as a result of subsequent litigation and regulatory settlements bringing the total workers' compensation escrow amount to approximately \$597 million. Approximately \$147 million was released from the workers' compensation escrow accounts in satisfaction of fines, penalties and premium tax obligations, which were imposed pursuant to a December 17, 2010 regulatory settlement agreement relating to workers' compensation premium reporting issues that was deemed final and effective on May 29, 2012. Following this disbursement, approximately \$450 million remains in escrow and is specifically designated to satisfy class action liabilities related to workers' compensation premium reporting issues. This amount is included in Other assets at September 30, 2012.

On February 1, 2012, AIG was informed by the SEC that AIG had complied with the terms of the settlement order under which AIG had agreed to retain an independent consultant, and as of that date, was no longer subject to such order.

Litigation Related to the Matters Underlying the 2006 Regulatory Settlements

AIG and certain present and former directors and officers of AIG have been named in various actions related to the matters underlying the 2006 Regulatory Settlements. These actions are described below.

The Consolidated 2004 Securities Litigation. Beginning in October 2004, a number of putative securities fraud class action suits were filed in the Southern District of New York against AIG and consolidated as In re American International Group, Inc. Securities Litigation (the Consolidated 2004 Securities Litigation). Subsequently, a separate, though similar, securities fraud action was also brought against AIG by certain Florida pension funds. The lead plaintiff in the Consolidated 2004 Securities Litigation is a group of public retirement systems and pension funds benefiting Ohio state employees, suing on behalf of themselves and all purchasers of AIG's publicly traded securities between October 28, 1999 and April 1, 2005. The named defendants are AIG and a number of present and former AIG officers and directors, as well as C.V. Starr & Co., Inc. (Starr), SICO, General Reinsurance Corporation, and PricewaterhouseCoopers, LLP, among others. The lead plaintiff alleges, among other things, that AIG: (i) concealed that it engaged in anti-competitive conduct through alleged payment of contingent commissions to brokers and participation in illegal bid-rigging; (ii) concealed that it used "income smoothing" products and other techniques to inflate its earnings; (iii) concealed that it marketed and sold "income smoothing" insurance products to other companies; and (iv) misled investors about the scope of government investigations. In addition, the lead plaintiff alleges that Maurice R. Greenberg, AIG's former Chief Executive Officer, manipulated AIG's stock price. The lead plaintiff asserts claims for violations of Sections 11 and 15 of the Securities Act, Section 10(b) of the Exchange Act and Rule 10b-5 promulgated thereunder, and Sections 20(a) and Section 20A of the Exchange Act.

On July 14, 2010, AIG approved the terms of a settlement (the Settlement) with lead plaintiffs. The Settlement is conditioned on, among other things, court approval and a minimum level of shareholder participation. Under the terms of the Settlement, if consummated, AIG would pay an aggregate of \$725 million. Only two shareholders objected to the Settlement, and 25 shareholders claiming to hold less than 1.5 percent of AIG's outstanding shares at the end of the class period submitted timely and valid requests to opt out of the class. Of those 25 shareholders, seven are investment funds controlled by the same investment group, and that investment group is the only opt-out who held more than 1,000 shares at the end of the class period. By order dated February 2, 2012, the District Court granted lead plaintiffs' motion for final approval of the Settlement. AIG has fully funded the amount of the Settlement into an escrow account.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

On January 23, 2012, AIG and the Florida pension funds, who had brought a separate securities fraud action, executed a settlement agreement under which AIG paid \$4 million.

On February 17, 2012 and March 6, 2012, two objectors appealed the final approval of the Settlement. On September 27, 2012, the two objectors withdrew their appeals with prejudice.

The Multi-District Litigation. Commencing in 2004, policyholders brought multiple federal antitrust and Racketeer Influenced and Corrupt Organizations Act (RICO) class actions in jurisdictions across the nation against insurers and brokers, including AIG and a number of its subsidiaries, alleging that the insurers and brokers engaged in one or more broad conspiracies to allocate customers, steer business, and rig bids. These actions, including 24 complaints filed in different federal courts naming AIG or an AIG subsidiary as a defendant, were consolidated by the judicial panel on multi-district litigation and transferred to the United States District Court for the District of New Jersey (District of New Jersey) for coordinated pretrial proceedings. The consolidated actions have proceeded in that Court in two parallel actions, In re Insurance Brokerage Antitrust Litigation (the Commercial Complaint) and In re Employee Benefits Insurance Brokerage Antitrust Litigation (the Employee Benefits Complaint, and, together with the Commercial Complaint, the Multi-District Litigation).

The plaintiffs in the Commercial Complaint are a group of corporations, individuals and public entities that contracted with the broker defendants for the provision of insurance brokerage services for a variety of insurance needs. The broker defendants are alleged to have placed insurance coverage on the plaintiffs' behalf with a number of insurance companies named as defendants, including AIG subsidiaries. The Commercial Complaint also named various brokers and other insurers as defendants (three of which have since settled). The Commercial Complaint alleges that defendants engaged in a number of overlapping "broker-centered" conspiracies to allocate customers through the payment of contingent commissions to brokers and through purported "bid-rigging" practices. It also alleges that the insurer and broker defendants participated in a "global" conspiracy not to disclose to policyholders the payment of contingent commissions. Plaintiffs assert that the defendants violated the Sherman Antitrust Act, RICO, and the antitrust laws of 48 states and the District of Columbia, and are liable under common law breach of fiduciary duty and unjust enrichment theories. Plaintiffs seek treble damages plus interest and attorneys' fees as a result of the alleged RICO and Sherman Antitrust Act violations.

The plaintiffs in the Employee Benefits Complaint are a group of individual employees and corporate and municipal employers alleging claims on behalf of two separate nationwide purported classes: an employee class and an employer class that acquired insurance products from the defendants from January 1, 1998 to December 31, 2004. The Employee Benefits Complaint names AIG, as well as various other brokers and insurers, as defendants. The activities alleged in the Employee Benefits Complaint, with certain exceptions, track the allegations of customer allocation through steering and bid-rigging made in the Commercial Complaint.

On August 16, 2010, the United States Court of Appeals for the Third Circuit (the Third Circuit) affirmed the dismissal of the Employee Benefits Complaint in its entirety, affirmed in part and vacated in part the District Court's dismissal of the Commercial Complaint, and remanded the case for further proceedings consistent with the opinion. On March 30, 2012, the District Court granted final approval of a settlement between AIG and certain other defendants on the one hand, and class plaintiffs on the other, which settled the claims asserted against those defendants in the Commercial Complaint. If that settlement becomes final, AIG will pay approximately \$7 million of a total aggregate settlement amount of approximately \$37 million. On April 27, 2012, notices of appeal of the District Court order granting final approval were filed in the Third Circuit.

A number of complaints making allegations similar to those in the Multi-District Litigation have been filed against AIG and other defendants in state and federal courts around the country. The defendants have thus far been successful in having the federal actions transferred to the District of New Jersey and consolidated into the Multi-District Litigation. These additional consolidated actions are still pending in the District of New Jersey. In the consolidated action *The Heritage Corp. of South Florida v. National Union Fire Ins. Co. (Heritage)*, an individual plaintiff alleges damages "in excess of \$75,000." Because discovery has not been completed and a precise amount of damages has not been specified, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Heritage litigation. On October 2, 2012, AIG settled the consolidated action *Henley Management Co. v. Marsh, Inc.* As of November 1, 2012, the plaintiff in *Avery Dennison Corp. v. Marsh & McLennan Companies, Inc. (Avery)*, the remaining consolidated action has not formally specified an amount of alleged damages. AIG is therefore unable to reasonably estimate the possible loss or range of losses, if any, arising from this matter.

Finally, the AIG defendants have settled the four state court actions filed in Florida, New Jersey, Texas, and Kansas state courts, where plaintiffs had made similar allegations as those asserted in the Multi-District Litigation.

Workers' Compensation Premium Reporting. On May 24, 2007, the National Council on Compensation Insurance (NCCI), on behalf of the participating members of the National Workers' Compensation Reinsurance Pool (the NWCRP), filed a lawsuit in the United States District Court for the Northern District of Illinois (Northern District of Illinois) against AIG with respect to the underpayment by AIG of its residual market assessments for workers' compensation insurance. The complaint alleged claims for violations of RICO, breach of contract, fraud and related state law claims arising out of AIG's alleged underpayment of these assessments between 1970 and the present and sought damages purportedly in excess of \$1 billion.

On April 1, 2009, Safeco Insurance Company of America (Safeco) and Ohio Casualty Insurance Company (Ohio Casualty) filed a complaint in the Northern District of Illinois, on behalf of a purported class of all NWCRP participant members, against AIG and certain of its subsidiaries with respect to the underpayment by AIG of its residual market assessments for workers' compensation insurance. The complaint was styled as an "alternative complaint," should the Court grant AIG's motion to dismiss the NCCI lawsuit for lack of subject-matter jurisdiction, which motion to dismiss was ultimately granted on August 23, 2009. The allegations in the class action complaint are substantially similar to those filed by the NWCRP.

On February 28, 2012, the Court entered a final order and judgment approving a class action settlement between AIG and a group of intervening plaintiffs, made up of seven participating members of the NWCRP, which would require AIG to pay \$450 million to satisfy all liabilities to the class members arising out of the workers' compensation premium reporting issues, a portion of which would be funded out of the remaining amount held in the Workers' Compensation Fund. Liberty Mutual filed papers in opposition to approval of the proposed settlement and in opposition to certification of a settlement class, in which it alleged AIG's actual exposure, should the class action continue through judgment, to be in excess of \$3 billion. AIG disputes this allegation. Liberty Mutual, Safeco and Ohio Casualty subsequently appealed the Court's final order and judgment to the United States Court of Appeals for the Seventh Circuit, and that appeal is still pending.

The \$450 million settlement amount, which is currently held in escrow pending final resolution of the class-action settlement, was funded in part from the approximately \$191 million remaining in the Workers' Compensation Fund. In the event that the proposed class action settlement is not approved, the litigation will resume. As of September 30, 2012, AIG has an accrued liability equal to the amounts payable under the settlement.

Litigation Matters Relating to AIG's Insurance Operations

Caremark. AIG and certain of its subsidiaries have been named defendants in two putative class actions in state court in Alabama that arise out of the 1999 settlement of class and derivative litigation involving Caremark Rx, Inc. (Caremark). The plaintiffs in the second-filed action intervened in the first-filed action, and the second-filed action was dismissed. An excess policy issued by a subsidiary of AIG with respect to the 1999 litigation was expressly stated to be without limit of liability. In the current actions, plaintiffs allege that the judge approving the 1999 settlement was misled as to the extent of available insurance coverage and would not have approved the settlement had he known of the existence and/or unlimited nature of the excess policy. They further allege that AIG, its subsidiaries, and Caremark are liable for fraud and suppression for misrepresenting and/or concealing the nature and extent of coverage. In addition, the intervenors originally alleged that various lawyers and law firms who represented parties in the underlying class and derivative litigation (the Lawyer Defendants) were also liable for fraud and suppression, misrepresentation, and breach of fiduciary duty.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The complaints filed by the plaintiffs and the intervenors request compensatory damages for the 1999 class in the amount of \$3.2 billion, plus punitive damages. AIG and its subsidiaries deny the allegations of fraud and suppression, assert that information concerning the excess policy was publicly disclosed months prior to the approval of the settlement, that the claims are barred by the statute of limitations, and that the statute cannot be tolled in light of the public disclosure of the excess coverage. The plaintiffs and intervenors, in turn, have asserted that the disclosure was insufficient to inform them of the nature of the coverage and did not start the running of the statute of limitations.

On August 15, 2012, the trial court entered an order granting plaintiffs' motion for class certification. AIG and the other defendants have appealed that order to the Alabama Supreme Court, and the case in the trial court will be stayed until that appeal is resolved. General discovery has not commenced and AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the litigation.

Regulatory Matters

AIG's life insurance companies have received industry-wide regulatory inquiries, including a multi-state audit and market conduct examination covering compliance with unclaimed property laws and a directive from the New York Insurance Department regarding claims settlement practices and other related state regulatory inquiries. AIG recorded an increase of \$55 million in policyholders benefit reserves in the third quarter of 2012 in conjunction with the resolution of the multi-state examinations relating to the handling of unclaimed property and the use of the Social Security Death Master File (SSDMF) to identify potential claims not yet presented to AIG in the normal course of business. In addition, AIG paid an \$11 million regulatory assessment to the various state insurance departments that are parties to the regulatory settlement to defray costs of their examinations and monitoring. Although AIG has enhanced its claims practices to include use of the SSDMF, it is possible that the settlement remediation requirements and/or remaining inquiries and other regulatory activity could result in the payment of additional death claims and additional escheatment of funds deemed abandoned under state laws. AIG believes it has adequately reserved for such claims, but there can be no assurance that the ultimate cost will not vary, perhaps materially, from its estimate. Additionally, state regulators are considering a variety of proposals that would require life insurance companies to take additional steps to identify unreported deceased policy holders.

The National Association of Insurance Commissioners Market Analysis Working Group, led by the states of Ohio and Iowa, is conducting a multi-state examination of certain accident and health products, including travel products, issued by National Union Fire Insurance Company of Pittsburgh, Pa. (National Union). The examination formally commenced in September 2010 after National Union, based on the identification of certain regulatory issues related to the conduct of its accident and health insurance business, including rate and form issues, producer licensing and appointment, and vendor management, requested that state regulators collectively conduct an examination of the regulatory issues in its accident and health business. In addition to Ohio and Iowa, the lead states in the multi-state examination are Minnesota, New Jersey and Pennsylvania, and currently a total of 39 states have agreed to participate in the multi-state examination. As part of the multi-state examination, the following Interim Consent Orders were entered into with Ohio: (a) on January 7, 2011, in which National Union agreed, on a nationwide basis, to cease marketing directly to individual bank customers accident/sickness policy forms that had been approved to be sold only as policies providing blanket coverage, and to certain related remediation and audit procedures and (b) on February 14, 2012, in which National Union agreed, on a nationwide basis, to limit outbound telemarketing to certain forms and rates. A Consent Order was entered into with Minnesota on February 10, 2012, in which National Union and Travel Guard Group Inc., an AIG subsidiary, agreed to (i) cease automatically enrolling Minnesota residents in certain insurance relating to air travel, (ii) pay a civil penalty to Minnesota of \$250,000 and (iii) refund premium to Minnesota residents who were automatically enrolled in certain insurance relating to air travel. In early 2012, Chartis Inc., on behalf of itself, National Union, and certain of Chartis Inc.'s insurance and non-insurance companies (collectively, the Chartis parties) and the lead regulators agreed upon certain terms to resolve the multi-state examination. The terms include (i) payment of a civil penalty of up to \$51 million, (ii) agreement to enter into a corrective action plan describing agreed-upon specific steps and standards for evaluating the Chartis parties' ongoing compliance with laws and regulations governing the regulatory issues identified in the examination, and (iii) agreement to pay a contingent fine in the event that the Chartis parties fail to substantially comply with the steps

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

and standards agreed to in the corrective action plan. As of September 30, 2012, AIG has an accrued liability equal to the amount of the civil penalty under the proposed agreement. As the terms outlined above remain subject to agreement by the participating states and appropriate agreements or orders, AIG (i) can give no assurance that these terms will not change prior to a final resolution of the multi-state examination that is binding on all parties and (ii) cannot predict what other regulatory action, if any, will result from resolving the multi-state examination. There can be no assurance that any regulatory action resulting from the issues identified will not have a material adverse effect on AIG's consolidated results of operations for an individual reporting period, the ongoing operations of the business being examined, or on similar business written by other AIG carriers. National Union and other AIG companies are also currently subject to civil litigation relating to the conduct of their accident and health business, and may be subject to additional litigation relating to the conduct of such business from time to time in the ordinary course.

Industry-wide examinations conducted by the Minnesota Department of Insurance and the Department of Housing and Urban Development (HUD) on captive reinsurance practices by lenders and mortgage insurance companies, including UGC, have been ongoing for several years. Recently, the newly formed Consumer Financial Protection Bureau ("CFPB") assumed responsibility for violations of the Real Estate Settlement Procedures Act from HUD, and assumed HUD's aforementioned ongoing investigation. In June 2012, the CFPB issued a Civil Investigative Demand ("CID") to UGC and other mortgage insurance companies, requesting the production of documents and answers to written questions. The CFPB has agreed to toll the deadlines associated with the CID pending discussions that could resolve the investigation. UGC has received a proposed consent order from the Minnesota Commissioner of Commerce (the MN Commissioner) which alleges that UGC violated the Real Estate Settlement Procedures Act, the Fair Credit Reporting Act and other state and federal laws in connection with its practices with captive reinsurance companies owned by lenders. UGC is currently engaged in discussions with the MN Commissioner with respect to the terms of the proposed consent order. UGC cannot predict if or when a consent order may be entered into or, if entered into, what the terms of the final consent order will be. UGC is also currently subject to civil litigation relating to its placement of reinsurance with captives owned by lenders, and may be subject to additional litigation relating to the conduct of such business from time to time in the ordinary course.

Other Contingencies

Liability for unpaid claims and claims adjustment expense

Although AIG regularly reviews the adequacy of the established Liability for unpaid claims and claims adjustment expense, there can be no assurance that AIG's loss reserves will not develop adversely and have a material adverse effect on its results of operations. Estimation of ultimate net losses, loss expenses and loss reserves is a complex process for long-tail casualty lines of business, which include general liability, commercial automobile liability, workers' compensation, excess casualty and crisis management coverages, insurance and risk management programs for large corporate customers and other customized structured insurance products, as well as excess and umbrella liability, directors and officers and products liability. Generally, actual historical loss development factors are used to project future loss development. However, there can be no assurance that future loss development patterns will be the same as in the past. Moreover, any deviation in loss cost trends or in loss development factors might not be discernible for an extended period of time subsequent to the recording of the initial loss cost trends or loss development factors that were relied upon in setting the reserves. These changes in loss cost trends or loss development factors could be attributable to changes in economic conditions in the United States and abroad, changes in the legal, regulatory, judicial and social environment, changes in medical cost trends (inflation, intensity and utilization of medical services), underlying policy pricing, terms and conditions, and claims handling practices.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Commitments

Flight Equipment

At September 30, 2012, ILFC had committed to purchase 233 new aircraft with aggregate estimated total remaining payments of approximately \$17.7 billion, including seven aircraft through sale-leaseback transactions with airlines deliverable from 2012 through 2019. ILFC had also committed to purchase seven used aircraft and nine new spare engines. ILFC also has the right to purchase an additional 50 Airbus A320neo family narrowbody aircraft. ILFC will be required to find lessees for any aircraft acquired and to arrange financing for a substantial portion of the purchase price.

Other Commitments

In the normal course of business, AIG enters into commitments to invest in limited partnerships, private equities, hedge funds and mutual funds and to purchase and develop real estate in the U.S. and abroad. These commitments totaled \$2.4 billion at September 30, 2012.

Guarantees

Subsidiaries

AIG has issued unconditional guarantees with respect to the prompt payment, when due, of all present and future payment obligations and liabilities of AIGFP arising from transactions entered into by AIGFP. AIG has issued unconditional guarantees with respect to the prompt payment, when due, of all present and future payment obligations and liabilities of AIG Markets arising from transactions entered into by AIG Markets.

In connection with AIGFP's business activities, AIGFP has issued, in a limited number of transactions, standby letters of credit or similar facilities to equity investors in an amount equal to the termination value owing to the equity investor by the lessee in the event of a lessee default (the equity termination value). The total amount outstanding at September 30, 2012 was \$322 million. In those transactions, AIGFP has agreed to pay such amount if the lessee fails to pay. The amount payable by AIGFP is, in certain cases, partially offset by amounts payable under other instruments typically equal to the present value of scheduled payments to be made by AIGFP. In the event that AIGFP is required to make a payment to the equity investor, the lessee is unconditionally obligated to reimburse AIGFP. To the extent that the equity investor is paid the equity investor's rights under the lease of the underlying property. Because the obligations of the lessee under the lease transactions are generally economically defeased, lessee bankruptcy is the most likely circumstance in which AIGFP would be required to pay.

Asset Dispositions

General

AIG is subject to financial guarantees and indemnity arrangements in connection with the completed sales of businesses pursuant to its asset disposition plan. The various arrangements may be triggered by, among other things, declines in asset values, the occurrence of specified business contingencies, the realization of contingent liabilities, developments in litigation or breaches of representations, warranties or covenants provided by AIG. These arrangements are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential obligation is subject to contractual limitations, while in other cases such limitations are not specified or are not applicable.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

AIG is unable to develop a reasonable estimate of the maximum potential payout under certain of these arrangements. Overall, AIG believes that it is unlikely it will have to make any material payments related to completed sales under these arrangements, and no material liabilities related to these arrangements have been recorded in the Consolidated Balance Sheet. See Note 15 herein for additional information on sales of businesses and asset dispositions.

ALICO Sale

Pursuant to the terms of the American Life insurance Company (ALICO) stock purchase agreement, AIG has agreed to provide MetLife, Inc. (MetLife) with certain indemnities. The most significant remaining indemnities include:

Indemnifications related to specific product, investment, litigation and other matters that are excluded from the general representations and warranties indemnity. These indemnifications provide for various deductible amounts, which in certain cases are zero, and maximum exposures, which in certain cases are unlimited, and may extend for various periods after the completion of the sale.

Tax indemnifications related to insurance reserves that extend for taxable periods ending on or before December 31, 2013 and that are limited to an aggregate of \$200 million, and certain other tax-related representations and warranties that extend to the expiration of the statute of limitations and are subject to an aggregate deductible of \$50 million.

In connection with the indemnity obligations described above, as of September 30, 2012, approximately \$600 million of proceeds from the sale of ALICO were on deposit in an escrow arrangement. Pursuant to a letter agreement between MetLife and AIG entered into on July 13, 2012, \$950 million was released to AIG on August 31, 2012 instead of November 1, 2012 as originally provided under the ALICO stock purchase agreement. The amount required to be held in escrow declines to zero in May 2013, although indemnification claims then pending will reduce the amount that can be released to AIG.

AIG Star and AIG Edison Sale

Pursuant to the terms of the AIG Star and AIG Edison stock purchase agreement, AIG has agreed to provide Prudential Financial, Inc. with certain indemnities, the most significant of which is indemnification related to breaches of general representations and warranties that exceed 4.1 billion yen (\$52.6 million at the September 30, 2012 exchange rate), with a maximum payout of 102 billion yen (\$1.3 billion at the September 30, 2012 exchange rate). Except for certain specified representations and warranties that may have a longer survival period, the indemnification extends until November 1, 2012.

Other

See Note 7 herein for commitments and guarantees associated with VIEs.

See Note 8 herein for disclosures on derivatives.

See Note 14 herein for additional disclosures on guarantees of outstanding debt.

* See Note 1 to the Consolidated Financial Statements in the 2011 Annual Report for further discussion of shares exchanged in connection with the Recapitalization.

AIG Common Stock Offerings by the Department of the Treasury and AIG Repurchases of Shares

Through registered public offerings, the Department of the Treasury has reduced its ownership of AIG Common Stock from approximately 92 percent (1.7 billion shares) prior to the completion of the first registered public offering initiated by the Department of the Treasury as selling shareholder in May 2011 to approximately 15.9 percent (234.2 million shares) of AIG Common Stock at September 30, 2012.

During 2012, the Department of the Treasury, as selling shareholder, completed registered public offerings of AIG Common Stock on March 13 (the March Offering), May 10 (the May Offering), August 8 (the August Offering) and September 14 (the September Offering). AIG has participated as a purchaser in each of the 2012 offerings.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The following table presents certain information relating to these offerings:

(dollars in millions, except share-price data)	Price	U.S. Treast Shares Sold	ury	Amount	AIG* Shares Purchased	Amount
May 2011 Offering	\$ 29.00	200,000,000	\$	5,800		\$

		1,420,868,806	\$	44,000	421,228,855	\$ 13,000

* Shares purchased by AIG in each of the 2012 offerings were purchased pursuant to AIG Board of Directors authorization.

Potential future repurchases by AIG of its shares will depend in part on the regulatory framework that will ultimately be applicable to AIG. This framework will depend on, among other things, AIG's status as a savings and loan holding company under the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank) and whether AIG is determined to be a systemically important financial institution (SIFI).

Dividends

Payment of future dividends to AIG shareholders depends in part on the regulatory framework that will ultimately be applicable to AIG, including AIG's status as a savings and loan holding company under Dodd-Frank and whether AIG is determined to be a SIFI. In addition, dividends will be payable on AIG's Common Stock only when, as and if declared by the Board in its discretion, from funds legally available therefor. In considering whether to pay a dividend or repurchase shares of AIG Common Stock, the Board will take into account such matters as AIG's financial position, the performance of its businesses, its consolidated financial condition, results of operations and liquidity, available capital, the existence of investment opportunities, contractual, legal and regulatory restrictions on the payment of dividends by subsidiaries to AIG, rating agency considerations, including the potential effect on AIG's debt ratings, and such other factors as AIG's Board may deem relevant. AIG has not paid any cash dividends in 2011 or 2012.

See Note 18 to the Consolidated Financial Statements in the 2011 Annual Report for a discussion of restrictions on payments of dividends by AIG subsidiaries.

11. NONCONTROLLING INTERESTS

During the first quarter of 2012, the remaining liquidation preference of the AIA SPV Preferred Interests held by the Department of the Treasury was paid down in full. The transactions described below provided the majority of the funds used to pay down the remaining liquidation preference.

On March 7, 2012, AIG entered into an agreement with the Department of the Treasury to amend various agreements (the Amendment), which enabled the AIA SPV to retain and distribute to AIG the net proceeds in excess of \$5.6 billion received by the AIA SPV from the sale of AIA ordinary shares in March 2012.

In addition, the liens created by the agreements on (i) the equity interests in ILFC, (ii) the ordinary shares of AIA held by the AIA SPV subsequent to the closing of the sale of AIA ordinary shares in March 2012 and (iii) the common equity interests in the AIA SPV were released and such interests and AIA ordinary shares no longer constituted collateral securing the repayment of the liquidation preference of the AIA SPV Preferred Interests. The Amendment also required the AIA SPV and AM Holdings LLC (the ALICO SPV) to redeem their preferred participating return rights held in such SPVs by the Department of the Treasury before the release of the collateral. AIG contributed a portion of the net proceeds received by AIG in respect of its interest in Maiden Lane II LLC (ML II) to redeem these residual rights.

On March 21, 2012, AIG entered into an agreement with the Department of the Treasury, pursuant to which the AIA SPV paid down in full the remaining liquidation preference of the AIA SPV Preferred Interests. As a result of the payment, the remaining liens on AIG assets supporting the paydown of these interests were released.

The following table presents a rollforward of non-controlling interests:

12. EARNINGS (LOSS) PER SHARE (EPS)

Basic and diluted earnings (loss) per share are based on the weighted average number of common shares outstanding, adjusted to reflect all stock dividends and stock splits. Diluted EPS is based on those shares used in basic EPS plus shares that would have been outstanding assuming issuance of common shares for all dilutive potential common shares outstanding, adjusted to reflect all stock dividends and stock splits.

Basic EPS was not affected by outstanding stock purchase contracts. Diluted EPS was not affected by outstanding stock purchase contracts because they were not dilutive.

Income (loss) from continuing operations	\$ 1.13 \$	(1.99)\$	4.21 \$	(2.25)
Income (loss) from discontinued operations	\$ \$	(0.11)\$	\$	1.30

* Dilutive shares are calculated using the treasury stock method and include dilutive shares from share-based employee compensation plans, the warrants issued to the Department of the Treasury in 2009 and the warrants issued to common shareholders (other than the Department of the Treasury) in January 2011. The number of shares and warrants excluded from diluted shares outstanding were 78 million for both the three and nine months ended September 30, 2012, and 79 million and 75 million for the three and nine months ended September 30, 2011, respectively, because the effect of including those shares and warrants in the calculation would have been anti-dilutive. Included in the anti-dilutive total were 75 million shares for both the three and nine months ended September 30, 2012 and 75 million and 70 million shares for the three and nine months ended September 30, 2011, respectively, representing the weighted average number of warrants to purchase AIG Common Stock that were issued to common shareholders.

Table of Contents

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Deemed dividends resulted from the Recapitalization and represent the excess of:

the fair value of the consideration transferred to the Department of the Treasury, which consists of 1,092,169,866 shares of AIG Common Stock, \$20.2 billion of redeemable AIA SPV Preferred Interests and preferred interests in the ALICO SPV, and a liability for a commitment by AIG to pay the Department of the Treasury's costs to dispose of all of its shares, over

the carrying value of the Series E Fixed Rate Non-Cumulative Perpetual Preferred Stock, par value \$5.00 per share, and Series F Fixed Rate Non-Cumulative Perpetual Preferred Stock, par value \$5.00 per share.

The fair value of the AIG Common Stock issued for the Series C Perpetual, Convertible, Participating Preferred Stock, par value \$5.00 per share (Series C Preferred Stock) over the carrying value of the Series C Preferred Stock is not a deemed dividend because the Series C Preferred Stock was contingently convertible into the 562,868,096 shares of AIG Common Stock for which it was exchanged. See Notes 1 and 17 to the Consolidated Financial Statements in the 2011 Annual Report for further discussion on the Recapitalization.

13. EMPLOYEE BENEFITS

For the nine-month period ended September 30, 2012, AIG contributed \$76 million to its U.S. and non-U.S. pension plans and estimates it will contribute an additional \$15 million for the remainder of 2012. These estimates are subject to change since contribution decisions are affected by various factors, including AIG's liquidity, market performance and management discretion.

14. INCOME TAXES

Interim Tax Calculation Method

AIG uses the estimated annual effective tax rate method in computing its interim tax provision. Certain items, including those deemed to be unusual, infrequent or that cannot be reliably estimated, are excluded from the estimated annual effective tax rate. In these cases, the actual tax expense or benefit applicable to those items is treated discretely, and is reported in the same period as the related item. For the three- and nine-month periods ended September 30, 2012, the tax effects of the gains on ML II and certain dispositions, including a portion of the ordinary shares of AIA and common units of The Blackstone Group L.P., as well as certain actual gains on AIG Life and Retirement's available-for-sale

securities, were treated as discrete items. Those changes in the valuation allowance, which were reflected in the three- and nine-month periods ended September 30, 2012, were also treated as discrete items.

Interim Tax Expense (Benefit)

For the three- and nine-month periods ended September 30, 2012, the effective tax rates on pretax income from continuing operations were 28.3 and 14.4 percent, respectively. The effective tax rates for the three- and nine-month periods ended September 30, 2012, attributable to continuing operations differ from the statutory tax rate of 35 percent primarily due to tax effects associated with tax exempt interest income and investments in partnerships, adjustments to the tax bases of certain foreign aircraft leases, and a decrease in the life-insurance-business capital loss carryforward valuation allowance. These items were partially offset by changes in uncertain tax positions.

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

For the three- and nine-month periods ended September 30, 2011, the effective tax rates on pretax loss from continuing operations were 15.6 and 31.3 percent, respectively. The tax benefit was primarily due to a decrease in the valuation allowance attributable to the anticipated inclusion of the ALICO SPV within the U.S. consolidated income tax group, tax effects associated with tax exempt interest income, investments in partnerships, and effective settlements of certain uncertain tax positions, partially offset by an increase in the valuation allowance attributable to continuing operations.

For the nine-month period ended September 30, 2011, the entire increase in the U.S. consolidated income tax group valuation allowance was allocated to continuing operations. The amount allocated to continuing operations was net of the decrease to the valuation allowance attributable to the anticipated inclusion of the ALICO SPV within the U.S. consolidated income tax group.

Assessment of Deferred Tax Asset Valuation Allowances

The evaluation of the recoverability of AIG's deferred tax asset and the need for a valuation allowance requires AIG to weigh all positive and negative evidence to reach a conclusion that it is more likely than not that all or some portion of the deferred tax asset will not be realized. The weight given to the evidence is commensurate with the extent to which it can be objectively verified. The more negative evidence that exists, the more positive evidence is necessary and the more difficult it is to support a conclusion that a valuation allowance is not needed.

AIG's framework for assessing the recoverability of the deferred tax assets requires AIG to consider all available evidence, including:

the nature, frequency, and amount of cumulative financial reporting income and losses in recent years;

the sustainability of recent operating profitability of AIG's subsidiaries;

the predictability of future operating profitability of the character necessary to realize the net deferred tax asset;

the carryforward period for the capital loss carryforwards, including the effect of reversing taxable temporary differences; and

prudent and feasible actions and tax planning strategies that would be implemented, if necessary, to protect against the loss of the deferred tax assets.

As a result of sales in the ordinary course of business to manage the investment portfolio and the application of prudent and feasible tax planning strategies, during the nine months ended September 30, 2012, AIG determined that an additional portion of the life insurance business capital loss carryforwards will more-likely-than-not be realized prior to their expiration.

As a result, AIG released an additional \$177 million of the deferred tax asset valuation allowance associated with the life insurance business capital loss carryforwards during the three-month period ended September 30, 2012, all of which was allocated to income from continuing operations. For the nine-month period ended September 30, 2012, AIG released \$1.7 billion of its deferred tax asset valuation allowance associated with the life insurance business capital loss carryforwards, of which \$1.6 billion was allocated to income from continuing operations. Additional life insurance business capital loss carryforwards may be realized in the future if and when other prudent and feasible tax planning strategies are identified. Changes in market conditions, including rising interest rates above AIG's projections, may result in a reduction in projected taxable gains and reestablishment of a valuation allowance.

Accounting for Uncertainty in Income Taxes

At September 30, 2012 and December 31, 2011, AIG's unrecognized tax benefits, excluding interest and penalties, were \$4.4 billion and \$4.3 billion, respectively. The increase in AIG's unrecognized tax benefits, excluding interest and penalties, was primarily due to adjustments to tax bases of certain foreign aircraft leases and foreign tax credits associated with cross border financing transactions. At September 30, 2012 and December 31, 2011, AIG's

72

American International Group, Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

unrecognized tax benefits included \$0.2 billion and \$0.7 billion, respectively, related to tax positions that if recognized would not affect the effective tax rate because they relate to the timing, rather than the permissibility, of the deduction. Accordingly, at September 30, 2012 and December 31, 2011, the amounts of unrecognized tax benefits that, if recognized, would favorably affect the effective tax rate were \$4.2 billion and \$3.6 billion, respectively.

Interest and penalties related to unrecognized tax benefits are recognized in income tax expense. At September 30, 2012 and December 31, 2011, AIG accrued \$929 million and \$744 million, respectively, for the payment of interest (net of the federal benefit) and penalties. For the nine-month periods ended September 30, 2012 and 2011, AIG recognized \$185 million and \$(58) million, respectively, of income tax expense (benefit) for interest net of the federal benefit (expense) and penalties.

Although it is reasonably possible that a change in the balance of unrecognized tax benefits may occur within the next twelve months, at this time it is not possible to estimate the range of the change due to the uncertainty of the potential outcomes.

15. DISCONTINUED OPERATIONS

The results of operations for the following sales are presented as discontinued operations through the date of disposition in the Consolidated Statement of Operations for the three and nine months ended September 30, 2011:

See Note 9 herein for a discussion of guarantees and indemnifications associated with sales of businesses.

AIG Star and AIG Edison Sale On September 30, 2010, AIG entered into a definitive agreement with Prudential Financial, Inc. for the sale of its Japan-based insurance subsidiaries, AIG Star and AIG Edison, for total consideration of \$4.8 billion, including the assumption of certain outstanding debt totaling \$0.6 billion owed by AIG Star and AIG Edison. The transaction closed on February 1, 2011 and AIG recognized a pre-tax gain of \$3.5 billion on the sale that is reflected in Income (loss) from discontinued operations in the Consolidated Statement of Operations.

Nan Shan Sale On January 12, 2011, AIG entered into an agreement to sell its 97.57 percent interest in Nan Shan Life Insurance Company, Ltd. to a Taiwan-based consortium; the transaction closed on August 18, 2011. AIG recorded a pre-tax gain of \$60 million and a pre-tax loss of \$1.0 billion on the sale for the three- and nine-month periods ended September 30, 2011, respectively, largely offsetting Nan Shan's operating results for the periods, which are both reflected in Income (loss) from discontinued operations in the Consolidated Statement of Operations. The net proceeds from the transaction were used in 2011 to pay down a portion of the liquidation preference of the Department of the Treasury's AIA SPV Preferred Interests.

ITEM 2 / MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This Quarterly Report on Form 10-Q and other publicly available documents may include, and officers and representatives of American International Group, Inc. (AIG) may from time to time make, projections, goals, assumptions and statements that may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These projections, goals, assumptions and statements are not historical facts but instead represent only AIG's belief regarding future events, many of which, by their nature, are inherently uncertain and outside AIG's control. These projections, goals, assumptions and statements include statements preceded by, followed by or including words such as "believe," "anticipate," "expect," "intend," "plan," "view," "target" or "estimate." These projections, goals, assumptions and statements may address, among other things:

the timing of the disposition of the remaining ownership position of the United States Department of the Treasury (Department of the Treasury) in AIG;

the monetization of AIG's interests in International Lease Finance Corporation (ILFC);

AIG's exposures to subprime mortgages, monoline insurers, the residential and commercial real estate markets, state and municipal bond issuers and sovereign bond issuers;

AIG's exposure to European governments and European financial institutions;

AIG's strategy for risk management;

AIG's generation of deployable capital;

AIG's return on equity and earnings per share long-term aspirational goals;

AIG's strategies to grow net investment income, efficiently manage capital and reduce expenses;

AIG's strategies for customer retention, growth, product development, market position, financial results and reserves; and

the revenues and combined ratios of AIG's subsidiaries.

It is possible that AIG's actual results and financial condition will differ, possibly materially, from the results and financial condition indicated in these projections, goals, assumptions and statements. Factors that could cause AIG's actual results to differ, possibly materially, from those in the specific projections, goals, assumptions and statements include:

changes in market conditions;

the occurrence of catastrophic events, both natural and man-made;

significant legal proceedings;

the timing and applicable requirements of any new regulatory framework to which AIG is subject as a savings and loan holding company (SLHC), and if such a determination is made, as a systemically important financial institution (SIFI);

concentrations in AIG's investment portfolios, including its municipal bond portfolio;

actions by credit rating agencies;

judgments concerning casualty insurance underwriting and reserves;

judgments concerning the recognition of deferred tax assets;

judgments concerning deferred policy acquisition costs (DAC) recoverability;

judgments concerning the recoverability of aircraft values in ILFC's fleet; and

such other factors as are discussed in:

this Part I, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A);

Part II, Item 1A. Risk Factors of this Quarterly Report on Form 10-Q and in the Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2012; and

Part II, Item 7. MD&A and Part I, Item 1A. Risk Factors in AIG's Annual Report on Form 10-K for the year ended December 31, 2011, as amended by Amendment No. 1 and Amendment No. 2 on Forms 10-K/A filed on February 27, 2012 and March 30, 2012, respectively, and Exhibit 99.2, MD&A of AIG's Current Report on Form 8-K filed on May 4, 2012 (collectively, the 2011 Annual Report).

Table of Contents

AIG is not under any obligation (and expressly disclaims any obligation) to update or alter any projections, goals, assumptions or other statements, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise. Unless the context otherwise requires, the terms AIG, the Company, we, us, and our mean AIG and its consolidated subsidiaries.

Table of Contents

USE OF NON-GAAP MEASURES

Throughout Management's Discussion and Analysis of Financial Condition and Results of Operations, AIG presents its operations in the way it believes will be most meaningful to its financial statement readers, as well as the most transparent. Some of the measurements used by AIG management are "non-GAAP financial measures" under Securities and Exchange Commission (SEC) rules and regulations. The non-GAAP financial measures presented may not be comparable to similarly-named measures reported by other companies.

Management believes that the measures described below allow for a better assessment and enhanced understanding of the underlying performance and trends of AIG and its business segments. Management believes they also allow for more meaningful comparisons with AIG's insurance competitors. Reconciliations of these measures to pre-tax income or unadjusted ratios, the most directly comparable measurements derived from accounting principles generally accepted in the United States (GAAP), are provided when such measures are disclosed.

AIG Property Casualty

Operating income (loss): During the first quarter of 2012, AIG revised the non-GAAP measure from underwriting income (loss) to operating income (loss), which includes both underwriting income (loss) and investment income (loss), but not net realized capital gains (losses) or other income (expense). Underwriting income (loss) is derived by reducing net premiums earned by claims and claims adjustment expenses and underwriting expenses;

Accident year loss ratio, as adjusted: the loss ratio excluding catastrophe losses, reinstatement premiums, prior year development, net of premium adjustments and the impact of reserve discount. Catastrophe losses are generally weather or seismic events having a net impact on AIG Property Casualty in excess of \$20 million each;

Accident year combined ratio, as adjusted: the combined ratio excluding catastrophe losses, reinstatement premiums, prior year development, net of premium adjustments, and the impact of reserve discounting.

AIG Life and Retirement

Operating income (loss): During the first quarter of 2012, AIG revised its definition of operating income (loss) to exclude changes in the fair value of fixed maturity securities designated to hedge living benefit liabilities, and changes in benefit reserves related to net realized capital gains (losses). In addition to the above items, AIG Life and Retirement also excludes net realized capital gains (losses) and the related DAC, value of business acquired (VOBA) and sales inducement asset (SIA) amortization from Operating income (loss).

Premiums, deposits and other considerations: includes life insurance premiums and deposits on annuity contracts and mutual funds.

Aircraft Leasing Operating income (loss): pre-tax income (loss) excluding net realized capital gains (losses); and

Mortgage Guaranty Underwriting profit (loss): income (loss) excluding net investment income and net realized capital gains (losses).

Results from discontinued operations are excluded from all of these measures.

EXECUTIVE OVERVIEW

This executive overview highlights selected information and may not contain all of the information that is important to current or potential investors in AIG's securities. This Quarterly Report on Form 10-Q should be read in its entirety, together with the 2011 Annual Report, for a complete description of events, trends and uncertainties as well as the capital, liquidity, credit, operational and market risks, and the critical accounting estimates affecting AIG and its subsidiaries.

Commencing in the third quarter of 2012, the Chartis segment was renamed AIG Property Casualty and the SunAmerica segment was renamed AIG Life and Retirement, although certain existing brands will continue to be used.

Table of Contents

AIG reports its results of operations as follows:

AIG Property Casualty AIG Property Casualty offers property and casualty insurance products and services to businesses and individuals worldwide. Commercial insurance products for large and small businesses are primarily distributed through insurance brokers. Major lines of business include casualty, property, financial and specialty (including aerospace, environmental, surety, marine, trade credit and political risk insurance). Consumer insurance products are distributed to individual consumers or groups of consumers through insurance brokers, agents, and on a direct-to-consumer basis. Consumer insurance products include accident & health (A&H) and personal insurance. In addition, Fuji Fire & Marine Insurance Company Limited (Fuji) in Japan offers life insurance products through Fuji Life Insurance Company (Fuji Life), which are included in A&H.

AIG Life and Retirement AIG Life and Retirement offers a comprehensive suite of products and services to individuals and groups, including term life, universal life, A&H, fixed and variable deferred annuities, fixed payout annuities, mutual funds and financial planning. AIG Life and Retirement offers its products and services through a diverse, multi-channel distribution network that includes banks, national, regional and independent broker-dealers, affiliated financial advisors, independent marketing organizations, independent and career insurance agents, structured settlement brokers, benefit consultants and direct-to-consumer platforms.

Aircraft Leasing AIG's commercial aircraft leasing business is conducted through ILFC, and (since the date of its acquisition by ILFC on October 7, 2011), AeroTurbine, Inc. (AeroTurbine).

Other Operations AIG's Other operations include results from Mortgage Guaranty operations (conducted through United Guaranty Corporation (UGC)), Global Capital Markets (GCM) operations (consisting of the operations of AIG Markets, Inc. (AIG Markets) and the remaining derivatives portfolio of AIG Financial Products Corp. and AIG Trading Group Inc. and their respective subsidiaries (collectively, AIGFP)), Direct Investment book (including the Matched Investment Program (MIP) and certain non-derivative assets and liabilities of AIGFP), Retained Interests (as defined below) and Corporate & Other operations (after allocations to AIG's business segments).

Prior Period Revisions

Prior period amounts have been revised to reflect the following:

Accounting for Deferred Acquisition Costs

As discussed in Note 2 to the Consolidated Financial Statements, AIG retrospectively adopted an accounting standard on January 1, 2012 that amended the accounting for costs incurred by insurance companies that can be capitalized in connection with acquiring or renewing insurance contracts.

The impact to AIG shareholders' equity and Net income (loss) attributable to AIG previously reported in 2011 is summarized below:

At December 31, (in millions)	2011
AIG shareholders' equity as previously reported	\$ 104,951
Impact of adoption of new standard on AIG Shareholders' equity	(3,413)
AIG shareholders' equity as currently reported	\$ 101,538

(in millions)	 Months Ended nber 30, 2011	Nine Mont September	
Net income attributable to AIG as previously reported Impact of adoption of new standard on Net income attributable to AIG	\$ (4,109) 119	\$	(2,000) 1,143
Net income attributable to AIG as currently reported	\$ (3,990)	\$	(857)

Table of Contents

Changes in Fair Value of Derivatives

To align the presentation of changes in the fair value of derivatives with changes in the administration of AIG's derivatives portfolio, changes were made to the presentation within the Consolidated Statement of Operations and Consolidated Statement of Cash Flows. Specifically, amounts attributable to derivative activity where AIGFP is an intermediary for AIG subsidiaries have been reclassified from Other income to Net realized capital gains (losses). Prior period amounts were reclassified to conform to the current period presentation.

AIG Property Casualty Segment Changes

To align financial reporting with changes made during 2012 to the manner in which AIG's chief operating decision makers review the businesses to assess performance and make decisions about resources to be allocated, certain products previously reported in Commercial Insurance were reclassified to Consumer Insurance. These revisions did not affect the total AIG Property Casualty reportable segment results previously reported.

Financial Overview

Income from continuing operations before income taxes was \$2.6 billion for the three months ended September 30, 2012 compared to a loss of \$4.3 billion in the same period of 2011. These results reflected the following:

pre-tax income from insurance operations of \$1.8 billion and \$897 million in the three months ended September 30, 2012 and 2011, respectively;

an increase in fair value of AIG's interest in AIA Group Limited (AIA) ordinary shares of \$527 million in the three months ended September 30, 2012, compared to a decrease in fair value of \$2.3 billion in the three months ended September 30, 2011;

an increase in fair value of AIG's interest in Maiden Lane III LLC (ML III) of \$330 million in the three months ended September 30, 2012 based on the liquidation of ML III assets by the Federal Reserve Bank of New York (the FRBNY) in the third quarter of 2012, compared to a decrease in fair value of \$931 million in the three months ended September 30, 2011; and

impairment charges, fair value adjustments and lease-related charges on aircraft of \$98 million and \$1.5 billion in the three-month periods ended September 30, 2012 and 2011, respectively.

Income from continuing operations before income taxes was \$8.9 billion for the nine months ended September 30, 2012 compared to a loss of \$3.8 billion for the same period in 2011. These results reflected the following:

pre-tax income from insurance operations of \$5.3 billion in the nine months ended September 30, 2012, compared to \$3.1 billion in the nine months ended September 30, 2011, which included catastrophe losses of \$2.8 billion, largely arising from Hurricane Irene, U.S. tornadoes and the Great Tohoku Earthquake & Tsunami in Japan (the Tohoku Catastrophe);

increases in fair value of AIG's interest in AIA ordinary shares of \$1.8 billion and \$268 million in the nine months ended September 30, 2012 and 2011, respectively;

an increase in fair value of AIG's interest in ML III of \$2.9 billion in the nine months ended September 30, 2012, compared to a decrease in fair value of \$854 million in the same period of 2011;

an increase in estimated litigation liability of approximately \$742 million for the nine months ended September 30, 2012 based on developments in several actions;

impairment charges, fair value adjustments and lease-related charges on aircraft of \$228 million and \$1.7 billion in the nine-month periods ended September 30, 2012 and 2011, respectively; and

a \$3.3 billion charge, primarily consisting of the accelerated amortization of the remaining prepaid commitment fee asset resulting from the termination of the credit facility provided by the FRBNY (the FRBNY Credit Facility) in 2011.

Pre-tax income from insurance operations reflected AIG Property Casualty's continued benefit from growth in higher value lines and geographies and improving pricing trends. AIG Property Casualty is benefiting from higher interest

Table of Contents

income on fixed maturity securities driven by the redeployment of excess cash and short-term investments into longer term investments, and its investments in higher yielding securities.

AIG Life and Retirement is benefiting from its broad portfolio of innovative products and diverse and strong distribution relationships. Results for AIG Life and Retirement in the nine months ended September 30, 2012 also benefited, in comparison, from the reinvestment of cash in 2011 and an increase in base yields. Partially offsetting AIG Life and Retirement's improvements were lower income from hedge funds and private equity investments.

Liquidity and Capital Resources

In March 2012, AIG paid down in full the \$8.6 billion remaining preferred interests in the AIA special purpose vehicle (the AIA SPV, and such interests, the AIA SPV Preferred Interests) held by the Department of the Treasury.

In addition, in the first nine months of 2012 the Department of the Treasury, as selling shareholder, completed four registered public offerings of AIG common stock, par value \$2.50 per share (AIG Common Stock) in March, May, August and September (collectively, the 2012 Offerings).

The Department of the Treasury sold approximately 1.22 billion shares of AIG Common Stock for aggregate proceeds of approximately \$38.2 billion in the 2012 Offerings. AIG purchased approximately 421 million shares of AIG Common Stock at an average price of \$30.86 per share for an aggregate purchase amount of approximately \$13 billion in the 2012 Offerings. As a result of the Department of the Treasury's sale of AIG Common Stock and AIG's purchase of shares in the 2012 Offerings, ownership of AIG Common Stock by the Department of the Treasury was reduced from approximately 92 percent prior to the completion of the first registered public offering with the Department of the Treasury as selling shareholder in May 2011 to approximately 15.9 percent after the completion of the fourth 2012 offering in September 2012.

AIG expects that the Department of the Treasury will seek to further reduce its ownership interest in AIG over time through additional secondary offerings or open market sales. Depending upon market conditions, regulatory limitations, available capital resources and liquidity, and any repurchase authorization then available, AIG may determine to participate as a purchaser in such secondary offerings.

See Note 10 to the Consolidated Financial Statements and Liquidity and Capital Resources Liquidity of Parent and Subsidiaries herein for further discussion and other liquidity and capital resources developments.

OUTLOOK

Hurricane Sandy

On October 29, 2012, Hurricane Sandy made landfall in the United States. Because of the limited information available, AIG is currently unable to estimate the amount of its losses from the hurricane.

Priorities for 2012 and Beyond

AIG remains committed to its long-term aspirational goals and is focused on the following priorities for 2012 and beyond:

Strengthen and grow AIG's core businesses;

Implement a strategic alternative for ILFC through an initial public offering or sale;

Manage AIG's capital and interest expense more efficiently;

Work with the Board of Governors of the Federal Reserve System (the FRB) in its capacity as AIG's principal regulator;

Continue to build, strengthen and streamline AIG's financial and operating systems infrastructure and control environment throughout the organization, particularly in financial reporting, financial operations and human resources; and

Increase AIG's competitiveness by restructuring AIG's operations consistent with its current size and plans.

Table of Contents

AIG Property Casualty

AIG Property Casualty expects that the current low interest rate environment and ongoing uncertainty in global economic conditions will continue to negatively impact net investment income and limit growth in some markets through at least the next 12 months. However, improving trends in certain key indicators may offset the effect of some of these challenges. Beginning in the second quarter of 2011 and continuing since, AIG Property Casualty has observed positive pricing trends, particularly in its U.S. commercial business. AIG Property Casualty expects that expansion in certain growth economies will trend higher than in developed countries, although at reduced levels from those previously expected due to revised economic assumptions for some of these countries.

Strategy

AIG Property Casualty continues to make progress with its strategy to grow higher value and less capital-intensive lines of business, and to implement corrective actions on underperforming businesses. Management reviews each of the businesses to evaluate their contribution to overall performance objectives.

AIG Property Casualty seeks to provide value for people and businesses worldwide through the identification and efficient management of risk. In pursuing this mission and growing its intrinsic value, AIG Property Casualty has established strategic initiatives in several key areas. Initiatives in these areas are helping AIG Property Casualty direct its capital and resources to optimize financial results, while acknowledging that performance in these areas may vary from quarter to quarter depending on local market conditions, such as pricing and the effects of foreign exchange rates or changes in global capital market trends.

Business Mix Shift AIG Property Casualty seeks to continue to diversify its business portfolio, while retaining the flexibility to capitalize on sustainable profit in products and geographies of opportunity. AIG Property Casualty believes that there is an opportunity to shift its current mix of business toward growth economy nations, such as China, India and Brazil, among others, and to higher value lines such as consumer business and less commoditized commercial lines.

Commercial Insurance is effectively utilizing global underwriting and product best practices to target high value customers and geographies. AIG Property Casualty is leveraging its significant global footprint and multinational capabilities to serve large and mid-sized businesses with cross-border operations. Commercial Insurance is also expanding its presence in growth economy nations. In the Americas and the Europe, Middle East and Africa (EMEA) regions, Commercial Insurance expects to focus on the higher value lines within its portfolio and to capitalize on market opportunities.

Consumer Insurance continues to grow its net premiums written in key markets and to expand internationally, particularly in growth economy nations. Consumer Insurance growth strategies span multiple distribution channels and include direct to consumer, agent, broker and affinity groups. In the Asia Pacific region, the 2010 acquisition of Fuji enables the continued introduction of a breadth of products across its distribution channels and customer base. In the Americas region, Consumer Insurance continues to focus its growth in niche areas, such as the high net worth market, geographic expansion in Latin America, and the implementation of a strategic group benefits partnership with American General Life Companies (American General). In the EMEA region, management expects modest growth and will continue to focus on profitable underwriting performance.

Underwriting Excellence AIG Property Casualty is implementing enhanced pricing, risk selection and account management tools, and marketing analytics that it believes enable underwriters to better select and price risks. Further changes include greater actuarial involvement in product pricing and attachments, widespread utilization of pricing and predictive models, policy form changes, increased policy exclusions and fewer multi-year policies being offered. In 2011, as part of its ongoing initiatives to reduce exposure to capital intensive long-tail lines, AIG Property Casualty ceased to actively write Excess Workers' Compensation business on a stand-alone basis. Based on this decision, AIG Property Casualty includes this legacy line of business in Other.

Claims Best Practices AIG Property Casualty is continuing to focus on reducing the costs associated with claims by improving the effectiveness and efficiency in servicing its customers, thus improving its loss ratio. AIG Property Casualty is placing emphasis on streamlining its claims operations, implementing effective technology and processes and the use of fraud detection tools to create a competitive advantage. Analyzing actuarial, underwriting, claims and legal data is helping AIG Property Casualty develop its knowledge of the structural drivers of losses, in order to proactively mitigate their impact on reserve development and legal costs, and improve pricing. Current accident year loss ratios have started to improve and AIG Property Casualty expects this trend to continue.

Table of Contents

Expense Discipline To achieve expense reductions, AIG Property Casualty plans to take advantage of its global footprint to improve efficiencies and expand the use of shared services to support regional businesses in strategic locations, reduce use of external services and negotiate preferred rates with vendors. As a result of the business mix shift to consumer products, higher value commercial products, and the investment in growth economy nations, policy acquisition expenses, including direct marketing costs, are expected to continue to increase. AIG Property Casualty expects, however, that these changes will ultimately help generate business with more favorable underwriting results. AIG Property Casualty continues to make strategic investments in systems, processes and talent worldwide, which will increase expenses in the short-term, but should create additional value and greater efficiency in the future.

Capital Deployment

AIG Property Casualty expects to continue to execute capital management initiatives by enhancing broad-based risk tolerance guidelines for its operating units, executing underwriting strategies, enhancing its global reinsurance strategy to improve capital ratios, increasing return on equity by line of business and reducing exposure to businesses with inadequate pricing and increased loss trends.

AIG Property Casualty continues to streamline its legal entity structure, to enhance transparency with regulators and optimize capital and tax efficiency. In the nine-month period ended September 30, 2012, AIG Property Casualty has completed 30 legal entity and branch restructuring transactions. In preparation for Solvency II compliance, a number of European branch conversions have been completed, including the merger of Chartis Ireland into Chartis Europe Limited on December 1, 2011. During the third quarter of 2012, AIG Property Casualty's capital management initiatives enabled certain European subsidiaries to return \$325 million of capital to be used for general corporate purposes. As a result of its legal entity simplification efforts, the majority of AIG Property Casualty's European operations will be conducted through a single pan-European insurance carrier by the end of 2012, subject to regulatory approval.

Investments

AIG Property Casualty expects to continue to refine its investment strategy, which includes asset diversification and yield-enhancement opportunities that meet AIG Property Casualty's liquidity, duration and credit quality objectives as well as current risk-return and tax objectives.

See Segment Results AIG Property Casualty Operations AIG Property Casualty Results - AIG Property Casualty Investing and Other Results and Note 5 to the Consolidated Financial Statements for additional information.

AIG Life and Retirement

AIG Life and Retirement continues to pursue its goals of (i) expanding the breadth and depth of its distribution relationships, (ii) introducing innovative new products and product enhancements, (iii) disciplined life insurance underwriting and matching of asset and liability durations, (iv) maintaining a high quality investment portfolio and strong statutory surplus, (v) proactively managing expenses and, (vi) subject to regulatory approval, continuing to make distributions to AIG Parent. AIG Life and Retirement expects to continue to make progress on all of these efforts for the remainder of 2012 and throughout 2013.

Business Environment

Effect of low interest rates AIG Life and Retirement's businesses and the life and annuity industry in general continue to be affected by the current low interest rate environment. Low interest rates can affect the recoverability and amortization rate of DAC. Continued low interest rates also put pressure on long-term investment returns, negatively affect future sales of interest rate-sensitive products and reduce future profits.

Loss recognition

Certain long duration products, including traditional life insurance, accident and health products such as long-term care insurance and payout annuities may require increases in reserves if changes in estimates

Table of Contents

of future investment returns result in projected future losses. Long term care products may also require additional reserve if future expected premium increases are not sufficient to cover future benefit cost increases not provided for in the current reserves. For these long duration traditional products, the assumptions used to calculate benefit liabilities and DAC are "locked in" at policy issuance. These assumptions are based on management's estimates of mortality, morbidity, persistency, maintenance expenses and investment returns. If observed changes in actual experience or estimates result in projected future losses under loss recognition testing, DAC is adjusted and additional policyholder benefit liabilities may be recorded through a charge to policyholder benefit expense.

AIG Life and Retirement does not expect a DAC unlocking or an increase in reserves due to loss recognition in 2012 solely as a result of the low interest rate environment.

In conjunction with a program to utilize capital loss tax carryforwards, AIG Life and Retirement sold approximately \$14.7 billion of investments in the first nine months of 2012. These sales and other sales and subsequent reinvestment at lower yields triggered loss recognition on certain long-term contracts in the amount of \$1.1 billion, which effectively transferred shadow loss recognition from unrealized to actual loss recognition and, to a much lesser extent, transferred shadow DAC to DAC amortization expense in the first nine months of 2012. In connection with this block of business, assumptions related to investment yields, mortality and expenses will be reviewed periodically and updated as appropriate, which may result in additional loss recognition or reserve increases. In addition, due to the reinvestment of the assets at lower yields, earnings related to this block of business are expected to decline beginning in 2013. See Results of Operations Segment Results AIG Life and Retirement Operations.

Equity market volatility Declines in the equity markets may result in higher reserves for variable annuity guarantee features, and equity market volatility can affect the recoverability and amortization rate of DAC. In amortizing DAC, value of new business acquired (VOBA) and sales inducement assets (SIA), AIG Life and Retirement applies a reversion to the mean methodology to short-term fluctuations in separate account returns for its variable annuity business, given inherent changes in equity market returns and interest rates. This methodology reduces the effect of short-term volatility on valuations of reserves for guarantee features and related DAC. Positive separate account returns could trigger a favorable DAC adjustment, where the mean return assumption is reset. However, no DAC adjustment is currently anticipated for 2012 solely as the result of positive market returns.

DAC, VOBA and SIA for Investment-Oriented Products

For long-duration traditional business, which includes traditional life, accident and health, and certain payout annuities, policy acquisition and issuance costs are deferred and amortized, with interest, over the premium paying period. The assumptions used to calculate liabilities and DAC are "locked in" at policy issuance. If observed changes in actual experience or estimates result in projected future losses under loss recognition testing, DAC is adjusted through amortization expense, and additional liabilities may be recorded, as discussed above.

For universal life and investment-type annuity products (collectively, investment-oriented products), policy acquisition and issuance costs are deferred and amortized, with interest, based on the estimated gross profits expected to be realized over the lives of the contracts. Estimated gross profits include investment spreads, net realized investment gains and losses, fees, surrender charges, expenses and mortality gains and losses. Emerging actual gross profits are used to true up the amortization of DAC, VOBA and SIA each quarter. In addition, future assumptions are reviewed to determine whether they should be modified. If so, the DAC, VOBA and SIA assets may be recalculated and adjusted to reflect the updated assumptions. AIG Life and Retirement expects to complete its comprehensive annual review of assumptions for investment-oriented products in the fourth quarter of 2012 and incorporate the results of this analysis into its estimates of future gross profits.

Organizational Realignment

On April 12, 2012, AIG Life and Retirement announced several key organizational structure and management changes intended to better serve the organization's distribution partners and customers. Key aspects of the new structure are distinct product divisions, shared annuity and life operations platforms and a unified all-channel distribution organization with access to all AIG Life and Retirement products. Beginning in 2013, AIG Life and

Table of Contents

Retirement expects to modify its presentation of results when organizational changes are implemented and all prior periods' presentations will be conformed.

AIG Life and Retirement intends to continue its efforts to consolidate its regulated insurance companies to implement a more efficient legal entity structure, while continuing to market products and services under existing brands. At the conclusion of this legal entity consolidation initiative, AIG Life and Retirement expects to reduce the number of its operating life insurance legal entities to three. Subject to receiving all necessary regulatory approvals, these legal entity mergers are targeted to be effective as of December 31, 2012.

Variable Annuities

AIG Life and Retirement variable annuity sales increased due to access to broad distribution, including the addition of several new distributors and AIG Life and Retirement's reinstatement by its largest pre-financial crisis distribution partner, as well as its innovative product offerings. In addition, several competitors have scaled back or ceased selling variable annuity products in 2012. As a result of a broad distribution network and a more favorable competitive environment, AIG Life and Retirement expects variable annuity sales to remain strong for the remainder of 2012 and into 2013.

AIG Life and Retirement has a dynamic hedging program designed to manage economic risk exposure associated with changes in the fair value of embedded derivative liabilities contained in certain variable annuity contracts, caused by changes in the equity markets, interest rates and market implied volatilities. AIG Life and Retirement substantially hedges its exposure to equity markets. However, due to regulatory capital considerations, a portion of AIG Life and Retirement's interest rate exposure is unhedged. In 2012, AIG Life and Retirement began purchasing U.S. Treasury bonds as a capital-efficient strategy to reduce its interest rate risk exposure over time. In addition, AIG Life and Retirement launched a new product offering with a volatility-controlled fund, which further reduces AIG Life and Retirement's risk related to market volatility while offering a competitive benefit. The volatility-controlled fund seeks capital appreciation and current income while managing net equity exposure by investing a portion of AIG Life and Retirement's assets using a strategy designed to reduce the effects of equity market volatility.

Fixed Annuities

Changes in the interest rate environment affect the relative attractiveness of fixed annuities compared to alternative products. As a result of the current low interest rate environment, fixed annuity sales in the first nine months of 2012 were significantly below 2011 levels. If the low interest rate environment continues, AIG Life and Retirement expects its fixed annuities sales (including deposits into fixed options within variable annuities sold in group retirement markets) to remain weak for the remainder of 2012 and into 2013.

Life Insurance

AIG Life and Retirement's strategic focus for mortality-based products includes disciplined underwriting, active expense management and product innovation. AIG Life and Retirement's distribution strategy is to grow new sales by strengthening the core retail independent and career agent distributor channels and expanding its market presence with competitively priced products offering superior consumer value and differentiated features. In addition, AIG Life and Retirement is enhancing its service and technology platform through the consolidation of its life operations and administrative systems, which is expected to result in an improved service delivery model and a more efficient operating platform. In connection with this project, AIG Life and Retirement recorded a charge of \$20 million in the three months ended September 30, 2012.

Interest Crediting Rates

The contractual provisions for renewal of crediting rates and guaranteed minimum crediting rates included in AIG Life and Retirement products may have the effect, in a continued low interest rate environment, of reducing AIG Life and Retirement's spreads and thus reducing future profitability. Although AIG Life and Retirement partially mitigates this interest rate risk through its asset-liability management process, product

design elements and crediting rate strategies, a prolonged low interest rate environment may negatively affect future profitability.

Table of Contents

As of September 30, 2012, the majority of assets backing insurance liabilities consisted of intermediate- and long-term fixed maturity securities. AIG Life and Retirement generally purchases assets with the intent of matching expected maturities of the insurance liabilities. An extended low interest rate environment may result in a lengthening of liability maturities from initial estimates, primarily due to lower lapses. Opportunistic investments in structured securities continue to be made in order to improve yields, increase net investment income and help to offset the impact of the lower interest rate environment.

AIG Life and Retirement's annuity and universal life products were designed with contractual provisions that allow crediting rates to be reset at pre-established intervals subject to minimum crediting rate guarantees. AIG Life and Retirement has adjusted, and will continue to adjust, crediting rates in order to maintain targeted interest rate spreads on both new business and in-force business where crediting rates are above minimum guarantees.

New fixed annuity sales have declined in the first nine months of 2012 relative to the same period in 2011, due to the relatively low crediting rates offered. However, even in the current interest rate environment, AIG Life and Retirement continues to pursue new sales of life and annuity products at targeted interest rate spreads. The annuity products generally have minimum interest rate guarantees of 1 percent. Universal life insurance interest rate guarantees are generally 2 to 3 percent on new non-indexed products and 1 percent on new indexed products, and are designed to be sufficient to meet targeted interest spreads.

As a result of these actions, AIG Life and Retirement estimates that the effect of interest rates remaining at or near current levels through the end of 2013 on pre-tax operating income would not be material, and would be modestly more significant with respect to 2014 results.

As indicated in the table below, approximately 61 percent of AIG Life and Retirement's annuity and universal life account values are at their minimum crediting rates as of September 30, 2012, an increase from 45 percent at December 31, 2011. These products have minimum guaranteed interest rates as of September 30, 2012 ranging from 1.0 percent to 5.5 percent, with the higher rates representing guarantees on older products.

In addition to the products discussed above, certain traditional long-duration products for which AIG Life and Retirement does not have the ability to adjust interest rates, such as payout annuities, are exposed to reduced earnings and potential losses in a prolonged low interest rate environment.

The following table presents account values by range of current minimum guaranteed interest rates and current crediting rates for AIG Life and Retirement's universal life and deferred fixed annuity products and fixed account options of variable annuity products:

September 30, 2012 Contractual Minimum Guaranteed		Current Creditir 1-50 Basis Points	-	More than 50 Basis

Aircraft Leasing

On September 2, 2011, ILFC Holdings, Inc., an indirect wholly-owned subsidiary of AIG, which is intended to become a holding company for ILFC, filed a registration statement on Form S-1 with the SEC for a proposed initial public offering. The number of shares to be offered, price range and timing for any offering have not been determined. The timing of any offering will depend on market conditions and no assurance can be given regarding the terms of any offering or that an offering will be completed.

Challenges in the global economy, including the European sovereign debt crisis, political uncertainty in the Middle East, and sustained higher fuel prices, have negatively impacted many airlines' profitability, cash flows and liquidity, and increased the probability that some airlines, including ILFC customers, will cease operations or file for bankruptcy. During the first nine months of 2012, ILFC has had nine lessees cease operations or file for bankruptcy (or its equivalent) and these lessees returned 54 aircraft to ILFC. As of October 24, 2012, 37 aircraft have been committed to new leases, 11 have been or are intended for part-out, two have been sold and four remain to be re-leased.

Most of ILFC's lessees, like much of the international airline industry, are not publicly rated and are rated internally non-investment grade by AIG. Future events, including a prolonged recession, ongoing uncertainty regarding the European sovereign debt crisis, political unrest, continued weak consumer demand, high fuel prices, or restricted availability of credit to the aviation industry could lead to the weakening or cessation of operations of additional airlines, which in turn would adversely affect ILFC's earnings and cash flows. At September 30, 2012, ILFC had signed leases for all its new aircraft deliveries in 2013 and had 82 leases in its existing fleet expiring in 2013, 36 of which had not been extended with their current lessees as of October 24, 2012. If the current lessees do not extend these leases, ILFC will have to remarket these aircraft.

Other Operations

Mortgage Guaranty

The following will continue to affect results for the remainder of 2012 and throughout 2013:

Market developments UGC believes it is a market leader in the mortgage insurance industry with a differentiated risk-based pricing model producing new high quality business. The withdrawal of certain competitors from the market during 2011 combined with UGC's investment grade rating and differentiation strategy that UGC implemented in late 2010 and early 2011 has positioned UGC to take advantage of market opportunities. UGC is continuing to execute this strategy. In the first nine months of 2012, UGC increased pricing nationally by approximately 6 percent on average. UGC will continue to review its new business pricing relative to changes in the market to ensure that the price of coverage is commensurate with the level of risk being underwritten.

Delinquent inventory review Beginning in the third quarter of 2011 and continuing into the third quarter of 2012, UGC requested that lenders file claims, in accordance with the terms of the respective master policies, on approximately 21,000 accounts that had been delinquent approximately 24 months or more and were not expected to be cured. Many of these delinquencies were the result of the foreclosure moratorium discussed below. Through September 30, 2012, UGC received responses to over 90 percent of these requests. While accelerating the payment of claims, these requests have resulted in coverage rescissions and claim denials at levels higher than previously experienced. UGC has considered these higher levels of rescissions and denials and the potential for higher levels of overturns in estimating its reserves for loss and loss adjustment expenses. Over the remainder of 2012 and during the first half of 2013, UGC continues to monitor and review the status of these requests and plans to contact lenders on an ongoing basis regarding additional delinquencies that meet these criteria. Under the terms of these master policies, if a claim is not submitted within a year of UGC's request, the lender would no longer be able to file a claim.

Foreclosure delays Since 2010, a variety of servicing practices have come to light that have delayed the foreclosure process in many states. Some of these practices, such as the "robo-signing" of affidavits in judicial foreclosures, have resulted in government investigations into lenders' foreclosure practices. These developments have slowed the reporting of foreclosures, which has in turn slowed the filing of mortgage insurance claims and increased the uncertainty surrounding the determination of the liability for losses and loss adjustment expenses.

Table of Contents

UGC's assumptions regarding future foreclosures on current delinquencies take into consideration this trend, although significant uncertainty remains surrounding the determination of the liability for unpaid claims and claims adjustment expenses. UGC expects that this trend may continue for the remainder of 2012 and throughout 2013 and may negatively affect UGC's future financial results. Final resolution of these issues is uncertain and UGC cannot reasonably estimate the ultimate financial impact that any resolution, individually or collectively, may have on its future results of operations or financial condition. As discussed above, UGC has requested that lenders file claims on delinquent loans before foreclosure proceedings have commenced in an effort to reduce the uncertainty surrounding these issues. UGC expects to continue this practice as long as significant delays in reporting foreclosures continue.

Global Capital Markets

GCM consists of the operations of AIG Markets, Inc. (AIG Markets), which executes the overall hedging activity for AIG and its operating companies, and the remaining derivatives portfolio of AIGFP.

AIG Markets acts as the derivatives intermediary between AIG and its subsidiaries and third parties to provide hedging services. The derivative portfolio of AIG Markets consists primarily of interest rate and currency derivatives.

The remaining derivatives portfolio of AIGFP consists primarily of hedges of the assets and liabilities of the DIB and a portion of the legacy hedges for AIG and its subsidiaries. Future hedging needs for AIG and its subsidiaries will be executed through AIG Markets. AIGFP's derivative portfolio consists primarily of interest rate, currency, credit, commodity and equity derivatives. Additionally, AIGFP has a credit default swap portfolio being managed for economic benefit and limited risk. The AIGFP portfolio continues to be wound down and is managed consistent with AIG's risk management objectives. Although the portfolio may experience periodic fair value volatility, it consists predominantly of transactions that AIG believes are of low complexity, low risk or currently not economically appropriate to unwind based on a cost versus benefit analysis.

Direct Investment Book

Matched Investment Program (MIP) assets and liabilities and certain non-derivative assets and liabilities of AIGFP (collectively, the Direct Investment book or DIB) are currently managed collectively on a single program basis to limit the need for additional liquidity from AIG Parent.

The DIB portfolio is being wound down and is managed to maximize return consistent with AIG's risk management objectives. Program management is focused on managing the DIB's liquidity needs, including the need for contingent liquidity arising from collateral posting for debt positions of the DIB. As part of this program management, AIG may from time to time access the capital markets, subject to market conditions. In addition, AIG may seek to buy back debt or sell assets on an opportunistic basis, subject to market conditions. The overall hedging activity for the assets and liabilities of the DIB is executed by GCM. The value of hedges related to the non-derivative assets and liabilities of AIGFP in the DIB is included within the assets and liabilities and operating results of GCM and is not included within the DIB operating results, assets or liabilities.

As of September 30, 2012, the DIB maintains the liquidity that AIG believes is necessary to meet all of the DIB maturing liabilities, at all times, even in stress scenarios, without having to liquidate DIB assets or rely on additional liquidity from AIG Parent.

Certain non-derivative assets and liabilities of the DIB, including CDO securities purchased in the ML III auctions, are accounted for under the fair value option and thus operating results are subject to periodic market volatility. Although a portion of AIG's investment in AIA ordinary shares is allocated to the DIB, the fair value gains and losses on the AIA ordinary shares will continue to be reported in Retained Interests Changes in fair value of AIA securities.

Retained Interests

Retained Interests may continue to experience volatility due to fair value gains or losses on the AIA ordinary shares. At September 30, 2012, AIG owned approximately 14 percent of the outstanding ordinary shares of AIA. A change of one Hong Kong dollar in AIA's share price would result in an approximate \$210 million change in AIG's pre-tax income.

Table of Contents

In accordance with an agreement with the underwriters of the September 2012 sale of AIA ordinary shares, AIG may not sell or hedge the remaining AIA ordinary shares prior to December 10, 2012. After that time, AIG expects to monetize its investment in AIA ordinary shares from time to time depending on market conditions, AIG's liquidity position and opportunities for cash redeployment.

Regulation

For a discussion of the regulatory environment applicable to AIG, see Regulatory Environment herein.

RESULTS OF OPERATIONS

Consolidated Results

94						

Table of Contents

Significant factors affecting items for the three- and nine-month periods ended September 30, 2012 and 2011 are discussed below.

Premiums and Policy Fees

Premiums decreased in the three- and nine-month periods ended September 30, 2012 compared to the same periods in 2011 primarily due to declines in Commercial Insurance, resulting from enhanced risk selection and the continued execution of strategic initiatives to improve pricing and loss ratios. These declines were partially offset by increases in Consumer Insurance, resulting from the business mix shift towards higher value lines and continued investment in the direct marketing channel. Total net premiums written at AIG Property Casualty in original currency increased approximately two percent and decreased one percent during the three and nine months ended September 30, 2012, respectively, compared to the same periods in 2011.

Policy fees increased in the three- and nine-month periods ended September 30, 2012 compared to the same periods in 2011 due to higher variable annuity fees on separate account assets as variable account assets grew as a result of improved equity markets.

Net Investment Income

The following table summarizes the components of consolidated Net investment income:

	Three Mor Septem	 	Percentage	Nine Months E September 3		Percentage
(in millions)	2012	2011	Change	2012	2011	Change
Fixed maturity securities, including

•						
Net investment income	\$ 4,650	\$ 128	NM% \$	16,236 \$	10,161	60%

* Includes hedge funds, mutual funds, private equity funds and affordable housing partnerships.

Net investment income for the three months ended September 30, 2012 was significantly higher than the same period in 2011 due to the following:

fair value gains on AIG's ML III residual interest and its investment in AIA equity securities compared to decreases in fair value of both investments for the same period in 2011;

higher income on fixed maturity securities as a result of opportunistic risk weighted increases in the structured securities portfolio; and

higher income from alternative investments due to improved equity market performance.

Table of Contents

Net investment income for the nine months ended September 30, 2012 increased significantly from the same period of 2011, primarily due to:

fair value gains on AIG's ML III residual interest; the FRBNY completed the liquidation of ML III assets during the third quarter of 2012 and substantially all of the sales proceeds have been distributed in accordance with the priority of payments in the transaction;

fair value gains on AIG's investment in AIA equity securities;

increases in the fair value of Maiden Lane II LLC (ML II), which made its final distribution in the first quarter of 2012; and

higher income from fixed maturity securities and short-term investments attributable to higher average invested balances in connection with the redeployment of cash in the first half of 2011.

The increases were partially offset by declines in alternative investment income in the first half of 2012 due to relatively weaker equity market performance in 2012 compared to 2011.

Net Realized Capital Gains (Losses)

The following table summarizes the components of consolidated Net realized capital gains (losses):

		Three Mon Septem			Percentage	Nine Months Er September 30		Percentage
(in millions)		2012		2011	Change	2012	2011	Change

Net realized capital gains (losses)	\$	647	\$	607	7 \$	794 \$	(53)	NM

AIG recognized higher net realized capital gains in the three-month period ended September 30, 2012 compared to the same period in 2011 due to higher gains from sales of fixed maturity securities, due in part to a program that resulted in the utilization of capital loss tax carryforwards in the AIG Life and Retirement operations, and lower other-than-temporary impairments. These gains were partially offset by foreign exchange losses driven by a weakening U.S. dollar against most foreign currencies in the third quarter of 2012 compared to strengthening of the U.S. dollar in the same period in 2011.

AIG recognized net realized capital gains in the nine-month period ended September 30, 2012 compared to net realized capital losses in the same period in 2011 due to the following:

significantly higher gains from sales of fixed maturity securities, due in part to the capital loss tax carryforwards program discussed above, and equity securities, which in 2012 included a \$426 million gain on the sale of 35.7 million common units of The Blackstone Group L.P.; and

lower foreign exchange losses during the nine-month period ended September 30, 2012, primarily due to strengthening of the U.S. dollar against the Japanese yen.

Table of Contents

These gains were partially offset by derivative losses, driven primarily by spread tightening and the U.S. dollar strengthening against foreign currencies.

Aircraft Leasing Revenues and Expenses

Aircraft leasing revenue increased slightly in the three- and nine-month periods ended September 30, 2012 compared to the same periods in the prior year, primarily due to an increase from the consolidation of AeroTurbine commencing in October 2011. This increase was partially offset by the impact of early returns of aircraft from lessees who ceased operations, lower lease revenue earned on re-leased aircraft in its fleet and the decrease in the average number of aircraft owned to 926 for the period ended September 30, 2012, compared to 934 for the period ended September 30, 2011.

ILFC recorded impairment charges, fair value adjustments, and lease-related charges of \$98 million and \$228 million in the three- and nine-month periods ended September 30, 2012, respectively, compared to \$1.5 billion and \$1.7 billion in the three- and nine-month periods ended September 30, 2011, respectively. The third quarter charge in 2011 was primarily attributable to changes in the holding period and residual values of certain aircraft types. See Segment Results Aircraft Leasing Operations Aircraft Leasing Results for additional information.

Other Income and Expenses

The increase in Other income for the three-month period ended September 30, 2012 compared to the same period in 2011 was driven by:

an improvement in net credit valuation adjustments on the DIB assets and liabilities for which the fair value option was elected, resulting primarily from gains on assets due to the tightening of counterparty credit spreads, partially offset by losses on liabilities due to the tightening of AIG's credit spreads. For the three-month periods ended September 30, 2012 and 2011, net credit valuation adjustment gains of \$323 million and \$54 million, respectively, were recognized;

an improvement in unrealized market valuations related to the super senior CDS portfolio resulting primarily from CDS transactions written on multi-sector CDOs driven by amortization and price movements within the CDS portfolio. For the three-month periods ended September 30, 2012 and 2011, unrealized market valuation gains of \$204 million and \$3 million, respectively, were recognized; and

an improvement in net credit valuation adjustments on the GCM derivative assets and liabilities resulting primarily from a tightening of counterparty credit spreads. For the three-month period ended September 30, 2012, no net credit valuation adjustment gains or losses were recognized compared to a net credit valuation adjustment loss of \$97 million in 2011.

The slight increase in Other income for the nine-month period ended September 30, 2012 compared to the same period in 2011 was driven by:

an improvement in unrealized market valuations related to the super senior CDS portfolio resulting primarily from CDS transactions written on multi-sector CDOs driven by amortization and price movements within the CDS portfolio. Unrealized market valuation gains of \$401 million and \$232 million were recognized for the nine-month periods ended September 30, 2012 and 2011, respectively; and

an improvement in net credit valuation adjustments on the DIB assets and liabilities for which the fair value option was elected, resulting primarily from gains on assets due to the tightening of counterparty credit spreads, partially offset by losses on liabilities due to the tightening of AIG's credit spreads. Net credit valuation adjustment gains of \$453 million and \$370 million were recognized for the nine-month periods ended September 30, 2012 and 2011, respectively.

These improvements were partially offset by lower gains on real estate dispositions and losses on real estate equity investments.

Other expenses decreased in the three-month period ended September 30, 2012 due to a decrease in losses on trusts that hold leased commercial aircraft and a reduction in expense of \$117 million in 2012 resulting from the decrease in the estimate of the liability for the Department of the Treasury's underwriting fees for the sale of AIG Common Stock as shares were sold at a price lower than had been estimated at the time the accrual was

Table of Contents

established and AIG repurchased a significant amount of shares for which no payment to the underwriters was required.

Other expenses increased in the nine-month period ended September 30, 2012 due to an increase in estimated litigation liability of approximately \$742 million, partially offset by a decrease in losses on trusts that hold leased commercial aircraft, lower restructuring and pension expenses and a reduction in expense of \$184 million in 2012 resulting from the decrease in the estimate of the liability for the Department of the Treasury's underwriting fees for the sale of AIG Common Stock as described above.

Policyholder Benefits and Claims Incurred

Policyholder benefits and claims incurred decreased in the three- and nine-month periods ended September 30, 2012 primarily as a result of lower catastrophe losses for AIG Property Casualty in 2012 compared to 2011, reflecting the impact of Hurricane Irene in the third quarter of 2011, the U.S. tornadoes in the second quarter of 2011 and the Tohoku Catastrophe in Japan and earthquakes in New Zealand in the first quarter of 2011.

Policyholder benefits and claims incurred also decreased for Mortgage Guaranty in the three- and nine-month periods ended September 30, 2012 due to declines in newly reported delinquencies and favorable loss development in 2012 compared to unfavorable loss development in 2011.

Partially offsetting these decreases were increases in policyholder benefit expenses in the three- and nine-month periods ended September 30, 2012 for AIG Life and Retirement due to the sale of securities in unrealized gain positions that support certain payout annuity products, and subsequent reinvestment of the proceeds at generally lower yields, which triggered loss recognition. See Results of Operations Segment Results AIG Life and Retirement for additional information.

Acquisition and Insurance Expenses

Amortization of DAC was relatively unchanged in the three month period ended September 30, 2012 compared to the same period in 2011.

Amortization of DAC increased in the nine-month period ended September 30, 2012 compared to the same period in 2011, primarily due to AIG Property Casualty's continued strategy to grow the higher margin Consumer Insurance business, which carries higher acquisition costs than Commercial Insurance, and change its mix of business within Commercial Insurance and Consumer Insurance to more profitable lines with higher acquisition costs. Partially offsetting this increase was a decrease in the amortization of DAC in the nine-month period ended September 30, 2012 compared to the same period in 2011 for AIG Life and Retirement due to positive equity market performance.

Other acquisition and insurance expenses increased in the three- and nine-month periods ended September 30, 2012 compared to the same periods in 2011 due to increases in compensation expense, bad debt expense, direct marketing expense and expenses related to strategic initiatives for AIG Property Casualty, as well as a result of a decrease in the benefit from the amortization of VOBA liabilities arising from the 2010 Fuji acquisition.

Interest Expense

Interest expense increased slightly in the three-month period ended September 30, 2012 compared to the same period in 2011 due to new debt issuances. Interest expense decreased in the nine-month period ended September 30, 2012 compared to the same period in 2011 primarily as a result of a net reduction in outstanding debt. Interest expense on the FRBNY Credit Facility was \$72 million in 2011 through the date of termination, including amortization of the prepaid commitment fee asset of \$48 million. See Liquidity and Capital Resources Liquidity of Parent and Subsidiaries and Liquidity and Capital Resources Debt herein for additional information.

Loss on Extinguishment of Debt

The decline in loss on extinguishment of debt reflects the effect of the \$3.3 billion charge for the nine-month period ended September 30, 2011 consisting of the accelerated amortization of the remaining prepaid commitment fee asset resulting from the termination of the FRBNY Credit Facility.

Table of Contents

Income Taxes

Interim Tax Calculation Method

AIG uses the estimated annual effective tax rate method in computing its interim tax provision. Certain items, including those deemed to be unusual, infrequent or that cannot be reliably estimated, are excluded from the estimated annual effective tax rate. In these cases, the actual tax expense or benefit applicable to those items is treated discretely, and is reported in the same period as the related item. For the three-and nine-month periods ended September 30, 2012, the tax effects of the gains on ML II and certain dispositions, including a portion of the ordinary shares of AIA and common units of The Blackstone Group L.P., as well as certain actual gains on AIG Life and Retirement's available-for-sale securities, were treated as discrete items. Those changes in the valuation allowance which were reflected in the three- and nine-month periods ended September 30, 2012, were also treated as discrete items.

Interim Tax Expense (Benefit)

For the three- and nine-month periods ended September 30, 2012, the effective tax rates on pretax income from continuing operations were 28.3 and 14.4 percent, respectively. The effective tax rates for the three- and nine-month periods ended September 30, 2012, attributable to continuing operations differ from the statutory tax rate of 35 percent primarily due to tax effects associated with tax-exempt interest income and investments in partnerships, adjustments to the tax bases of certain foreign aircraft leases, and a decrease in the life-insurance business capital loss carryforward valuation allowance. These items were partially offset by changes in uncertain tax positions.

For the three- and nine-month periods ended September 30, 2011, the effective tax rates on pretax loss from continuing operations were 15.6 and 31.3 percent, respectively. The tax benefit was primarily due to a decrease in the valuation allowance attributable to the anticipated inclusion of the ALICO SPV within the U.S. consolidated income tax group, tax effects associated with tax exempt interest income, investments in partnerships, and effective settlements of certain uncertain tax positions, partially offset by an increase in the valuation allowance attributable to continuing operations.

For the nine-month period ended September 30, 2011, the entire increase in the U.S. consolidated income tax group valuation allowance was allocated to continuing operations. The amount allocated to continuing operations was net of the decrease to the valuation allowance attributable to the anticipated inclusion of the ALICO SPV within the U.S. consolidated income tax group.

See Note 14 to the Consolidated Financial Statements for additional information.

Discontinued Operations

Results from discontinued operations for the nine months ended September 30, 2011 include a pre-tax gain of \$3.5 billion on the sale of AIG Star Life Insurance Co., Ltd. (AIG Star) and AIG Edison Life Insurance Company (AIG Edison). See Note 15 to the Consolidated Financial Statements for further discussion.

Segment Results

AIG reports the results of its operations through three reportable segments: AIG Property Casualty, AIG Life and Retirement and Aircraft Leasing. The Other operations category consists of businesses and items not allocated to AIG's reportable segments.

The following table summarizes the operations of each reportable segment. See also Note 3 to the Consolidated Financial Statements.

	Three Months Ended September 30,			Percentage	ns Ended ber 30,	Percentage	
(in millions)	2012		2011	Change	2012	2011	Change

Total	\$ 2,595	\$	(4,270)	NM% \$	8,930	\$ (3,786)	NM

AIG Property Casualty Pre-tax income increased in the three- and nine-month periods ended September 30, 2012 compared to the same periods in 2011, primarily reflecting lower catastrophe losses, underwriting improvements related to rate increases and enhanced risk selection, higher net investment income due to asset diversification, from concentration in tax-exempt municipal instruments into investments in private placement debt and structured securities, and yield-enhancement opportunities, partially offset by higher acquisition costs as a result of the change in business mix from Commercial Insurance to Consumer Insurance.

AIG Life and Retirement Pre-tax income increased in the three-month period ended September 30, 2012 compared to the same period in 2011, primarily reflecting higher net investment income, the positive effect of more favorable equity market performance on DAC amortization and policyholder benefit reserves, improved net investment spreads, partially offset by policyholder benefit reserve increases related to the settlement of death claim enhancement procedures and a charge to increase GIC reserves.

Pre-tax income increased in the nine-month period ended September 30, 2012 compared to the same period in 2011, primarily reflecting the positive effect of more favorable equity market performance on DAC amortization and policyholder benefit reserves, higher net investment income due to an increase in base yields from the reinvestment of significant amounts of cash and short-term investments in 2011 and decreases in losses related to equity-method investments in trusts that hold leased commercial aircraft and improvements in base net investment spreads. These items were partially offset by lower income from private equity and hedge funds, lower call and tender income and a charge to increase GIC reserves.

Aircraft Leasing Pre-tax income increased in the three- and nine-month periods ended September 30, 2012 compared to the same periods in 2011 due to an approximately \$1.4 billion decrease in impairment charges, fair value adjustments and lease-related charges on aircraft, and lower losses on extinguishment of debt. This decrease was partially offset by lower lease revenue and increased costs due to early returns of aircraft by lessees who ceased operations, lower lease revenue earned on re-leased aircraft in its fleet, charges relating to reserves recorded for potential exposure under aircraft asset value guarantees and an increase in depreciation expense due to the change in depreciable lives and residual values of certain aircraft.

Other Operations Pre-tax income in the three month periods ended September 30, 2012 compared to pre-tax losses in the same period in 2011 due to fair value gains in both AIG's remaining interest in AIA securities and AIG's interest in MLIII prior to the completion of the FRBNY's auctions of ML III assets. Pre-tax income in the nine month

Table of Contents

periods ended September 30, 2012 compared to pre-tax losses in the same period in 2011 due to fair value gains in both AIG's remaining interest in AIA securities and AIG's interest in ML III partially offset by an increase in estimated litigation liability, and a loss of extinguishment of debt of \$3.3 billion in 2011 in connection with the transactions to recapitalize AIG.

AIG Property Casualty Highlights

Net premiums written were relatively unchanged in the three- and nine-month periods ended September 30, 2012 reflecting the continued execution of management's strategic initiatives to improve pricing and loss performance. Declines in certain lines of business that did not meet internal operating objectives within Commercial Insurance were offset by an increase in Consumer Insurance net premiums written.

The loss ratio decreased by 4.2 points and 10.1 points for the three- and nine-month periods ended September 30, 2012, respectively, due to a reduction in catastrophe losses, coupled with the benefit from positive pricing trends, the execution of AIG Property Casualty's strategic initiatives and an increase in reserve discount. Catastrophe losses, adjusted for reinstatement premiums, were \$261 million and \$669 million in the three- and nine-month periods ended September 30, 2012, respectively, compared to \$574 million and \$2.8 billion in the respective prior year periods. Net prior year adverse development including related premium adjustments was \$145 million and \$329 million for the three- and nine-month periods ended September 30, 2012, respectively, compared to adverse development of \$55 million and \$35 million in the respective prior year periods.

The expense ratio increased by 3.3 points and 4.0 points for the three-and nine-month periods ended September 30, 2012, respectively, as acquisition costs (primarily commissions) increased due to the change in business mix to higher value lines and increased market competition. Acquisition costs also increased due to lower ceding commissions on reinsured business as a result of Commercial Insurance restructuring its Property and Specialty reinsurance programs as part of AIG Property Casualty's decision to retain more profitable business while continuing to manage aggregate exposures. Operating expenses increased in both periods as AIG Property Casualty continues to build, strengthen and streamline its financial and operating systems infrastructure and control environment throughout the organization, particularly in financial reporting, financial operations, policy and claims administration, and human resources. In addition, AIG Property Casualty incurred higher personnel costs, as it continued to seek to attract, retain and develop its human capital and sought to better align employee performance with AIG Property Casualty and broader AIG strategic goals.

Net investment income increased by 20 percent and 8 percent for the three- and nine-month periods ended September 30, 2012, respectively, due to asset diversification by reducing concentration in tax-exempt municipal instruments and increasing investments in private placement debt and structured securities, and yield-enhancement opportunities.

AIG Property Casualty paid cash and non-cash dividends of \$75 million and \$1.6 billion to AIG in the three- and nine-month periods ended September 30, 2012, respectively. In addition, on October 19, 2012, AIG Property Casualty paid a cash dividend of \$800 million to AIG.

AIG Property Casualty Operations

Commencing in the third quarter of 2012, the Chartis segment was renamed AIG Property Casualty, although certain existing brands will continue to be used.

AIG Property Casualty presents its financial information in two operating segments Commercial Insurance and Consumer Insurance, as well as an Other category.

Commercial Insurance provides insurance solutions for large and small businesses. Commercial lines products are distributed through a network of independent retail and wholesale brokers, branches, and through an independent agency network in the Asia Pacific and EMEA regions. These products are categorized into four major lines of business:

Casualty: Includes general liability, commercial automobile liability, workers' compensation, excess casualty and crisis management insurance. Casualty also includes risk management and other customized structured programs for large corporate customers and multinational companies.

Table of Contents

Property: Includes industrial, energy and commercial property insurance products, which cover exposures to man-made and natural disasters, including business interruption.

Specialty: Includes environmental, political risk, trade credit, surety, marine, and aerospace insurance, and various product offerings for small-medium enterprises.

Financial: Includes various forms of professional liability insurance, including director and officer (D&O), fidelity, employment practices, fiduciary liability, network security, kidnap and ransom, and errors and omissions insurance.

Consumer Insurance provides personal insurance solutions for individuals, organizations and families. Consumer Insurance products are distributed through agents and brokers, as well as through direct marketing, partner organizations and the internet. Consumer Insurance products are categorized into two major lines of business:

Accident & Health: Includes individual and group voluntary and sponsor-paid personal accidental and supplemental health products, including accidental death and disability, accidental medical reimbursement, hospital indemnity and medical excess for individuals, employees, associations and other organizations. It also includes life products as well as a broad range of travel insurance products and services for leisure and business travelers, including trip cancellation, trip interruption, lost baggage, travel assistance and concierge services.

Personal: Includes automobile, homeowners and extended warranty insurance. It also includes insurance for high net worth individuals (offered through the Private Client Group) including umbrella, yacht and fine art, and consumer specialty products, such as identity theft and credit card protection.

Other consists primarily of certain run-off lines of business, including excess workers' compensation written on a stand-alone basis and asbestos and environmental (1986 and prior), certain AIG Property Casualty expenses relating to global corporate initiatives, expense allocations from AIG Parent not attributable to the Commercial Insurance or Consumer Insurance operating segments, unallocated net investment income, net realized capital gains and losses, and other income (expense).

The historical AIG Property Casualty financial information has been revised to reflect the reclassification of certain products that were previously reported in the Commercial Insurance operating segment to the Consumer Insurance operating segment. This change aligns the financial reporting with the changes made during 2012 to the manner in which AIG's chief operating decision makers review the business to assess performance and make decisions about resources to be allocated. These revisions did not impact the total AIG Property Casualty reportable segment results previously reported.

AIG Property Casualty distributes its products through three major geographic regions:

Americas: Includes the United States, Canada, Central America, South America, the Caribbean and Bermuda.

Asia Pacific: Includes Japan and other Asia Pacific nations, including China, Korea, Vietnam, Thailand, Australia and Indonesia.

EMEA (Europe, Middle East and Africa): Includes the United Kingdom, Continental Europe, Russia, the Middle East and Africa.

Table of Contents

Operating income increased in the three- and nine-month periods ended September 30, 2012, primarily reflecting increased net investment income due to asset diversification, from concentration in tax-exempt municipal instruments into investments in private placement debt and structured securities, and yield-enhancement opportunities, lower catastrophe losses and underwriting improvements related to rate increases and enhanced risk selection, partially offset by higher acquisition costs as a result of the change in business mix from Commercial Insurance to Consumer Insurance. Other operating expenses increased due to the continued investment in strategic initiatives as well as higher personnel costs.

Commercial Insurance Quarterly and Year-to-Date Results

Operating income in the three-month period ended September 30, 2012 decreased, reflecting a decrease in allocated net investment income, primarily due to a decrease in the risk free rate, offset by an improvement in underwriting losses. Lower catastrophe losses and the effect of underwriting improvements related to rate increases and enhanced risk selection were offset by an increase in acquisition expenses as a result of a change in business mix to higher value lines with higher acquisition costs. In the three-month period ended September 30, 2012, catastrophe losses, adjusted for reinstatement premiums were \$239 million compared to \$452 million in the same period in 2011. The current year quarter was also impacted by severe but non-catastrophic losses overseas. Net prior year adverse development, including related premium adjustments, was \$146 million in the three-month period.

Operating income in the nine-month period ended September 30, 2012 increased, reflecting an improvement in underwriting losses due to lower catastrophe losses, the effect of rate increases and enhanced risk selection, and an increase in reserve discount of \$100 million. These items were partially offset by higher acquisition costs and a decrease in the allocated net investment income due to a decrease in the risk free rate. In 2012, catastrophe losses, adjusted for reinstatement premiums, were \$603 million compared to \$2.2 billion in 2011 as the prior year included the impact of the Tohoku Catastrophe in Japan and the earthquakes in New Zealand. Acquisition costs increased primarily as a result of higher commission expense due to a decrease in loss sensitive business as AIG Property Casualty moves towards higher value lines. In 2012, net prior year adverse development, including premium adjustments, was \$317 million compared to net prior year favorable development of \$38 million in 2011.

See AIG Property Casualty Underwriting Ratios below for further information on prior year development.

Consumer Insurance Quarterly and Year-to-Date Results

Operating income in the three- and nine-month periods ended September 30, 2012 increased, reflecting an improvement in underwriting results and an increase in allocated net investment income. This is primarily due to the combination of lower catastrophe losses, the effect of rate increases, enhanced risk selection and portfolio management, partially offset by higher acquisition costs.

In the three- and nine-month periods ended September 30, 2012, expenses increased primarily as a result of a change in the mix of business to higher value lines with higher acquisition costs and increased investment in direct marketing. The nine-month period ended September 30, 2012 also reflected a \$60 million decrease in the benefit from the amortization of VOBA liabilities recognized at the time of the Fuji acquisition compared to the same period in 2011. Catastrophe losses for the three- and nine-month periods ended September 30, 2012 were \$22 million and \$66 million, respectively, compared to \$122 million and \$680 million during the same periods in the prior year. In the nine-month period ended September 30, 2012, net prior year favorable development was \$51 million compared to net prior year adverse development of \$56 million in 2011.

AIG Property Casualty Net Premiums Written

Net premiums written are the sales of an insurer, adjusted for reinsurance premiums assumed and ceded, during a given period. Net premiums earned are the revenue of an insurer for covering risk during a given period. Net premiums written are a measure of performance for a sales period while net premiums earned are a measure of performance for a coverage period. From the period in which the premiums are written until the period in which they are earned, the amount is presented as unearned premiums in the consolidated balance sheet.

The following table presents AIG Property Casualty net premiums written by major line of business:

]	Fhree Mon Septem		Percentage	nded D,	Percentage

Total AIG Property Casualty net premiums written	\$	8,712	\$ 8,659	1% \$	26,627	\$	26,992	(1)%

Commercial Insurance Net Premiums Written

In 2012, Commercial Insurance continued to concentrate on growing higher value business. The decrease in net premiums written in each period was primarily due to enhanced risk selection, particularly in the Casualty line of business, and restructuring of loss sensitive business. This is consistent with AIG Property Casualty's business strategy to improve pricing and loss ratios and to not renew business that does not meet its internal performance or operating targets. Retentions are in line with management's expectations based on the execution of these strategic initiatives.

Casualty net premiums written decreased in both periods primarily due to the continuation of AIG Property Casualty's strategic initiatives related to improved risk selection, particularly in the Americas. The continuation of the restructuring of the loss sensitive book of business in the Americas resulted in a reduction of net premiums written of \$35 million and \$257 million in the three- and nine-month periods ended September 30, 2012, respectively. For the nine-month period ended September 30, 2012, Casualty recognized additional premium, primarily related to the loss-sensitive business, of \$52 million, compared to \$153 million for the same prior year period. Further, management continued to emphasize higher value lines, while taking corrective action in lines and accounts that do not meet internal performance targets, including U.S. workers' compensation and European primary casualty.

Property net premiums written increased in both periods due to growth in energy and engineered risk and restructuring of its reinsurance program as part of AIG Property Casualty's decision to retain more favorable risks while continuing to manage aggregate exposure. Catastrophe exposed business retained in the Americas and Asia Pacific region also benefitted from rate increases.

Specialty net premiums written for the three-month period ended September 30, 2012 decreased due to the continuation of AIG Property Casualty's strategic initiatives related to improved risk selection, particularly within products provided to small and medium enterprises, in the Americas and EMEA regions, which was partially offset by the restructuring of the aerospace reinsurance program to retain more favorable risks while continuing to manage aggregate exposure. For the nine-month period ended September 30, 2012, Specialty net premiums written were unchanged although AIG Property Casualty continues to shift its business mix towards higher value lines, particularly in aerospace.

Financial lines net premiums written for the three-month period ended September 30, 2012 increased reflecting business growth in all regions. Financial lines net premiums written for the nine-month period ended September 30, 2011 benefited from a multi-year Errors and Omissions policy in the Americas that produced net premiums written of \$148 million.

Consumer Insurance Net Premiums Written

The Consumer Insurance business continued to grow its net premiums written and build momentum through its multiple distribution channels and continuing focus on direct marketing. Consumer Insurance is well-diversified across the major lines of business and has global strategies that are executed across its regions to enhance customer relationships and business performance.

Consumer Insurance currently has direct marketing operations in over 50 countries, and management continued to emphasize the growth of this channel, which for the three- and nine-month periods ended September 30, 2012 accounted for approximately 15 percent of its overall net premiums written. Total global direct marketing spending outside the Americas region has increased by approximately 15 percent in the three- and nine-month periods ended September 30, 2012, respectively, from the same periods in 2011.

A&H net premiums written increased in both periods due to the growth of group personal accident business in the Americas and Asia Pacific, strong growth of new business sales in Fuji Life, direct marketing programs in Japan and other Asia Pacific nations and growth in individual personal accident in other Asia Pacific nations. This was partially offset by the continuing strategies to reposition U.S. direct marketing, as well as pricing and underwriting actions in Europe.

Personal lines net premiums written increased in both periods primarily due to the execution of AIG Property Casualty's strategic initiative to grow higher value lines of business in non-automobile products and rate increases in Japan automobile products. Growth in non-automobile net premiums written outpaced growth in automobile net premiums written, increasing its proportion to total net premiums written, due to management's focus on diversifying the global base.

Other Net Premiums Written

Substantially all premiums reported in Other relate to excess workers' compensation written on a stand-alone basis. Premium activity reflects the effects of premium audit activity on expired policies.

The following table presents AIG Property Casualty's net premiums written by region:

AIG transacts business in most major foreign currencies. The primary currencies resulting in foreign exchange fluctuations in net premiums written are the British pound, euro and Japanese yen.

The Americas net premiums written decreased in both periods, primarily due to the restructuring of the loss sensitive Casualty book of business and specialty workers' compensation, which was slightly offset by rate increases in Commercial Insurance, particularly in the U.S. These decreases were partially offset by continued growth in Consumer Insurance, which was primarily attributable to increases to group accident, personal property, Private Client Group and warranty lines. Additional premium recognized on the loss sensitive book of business was \$52 million for the nine-month period ended September 30, 2012, compared to additional premium of \$153 million in the prior year period.

Asia Pacific net premiums written increased in the three-month period ended September 30, 2012 primarily due to growth in Consumer Insurance, primarily driven by group personal accident insurance, personal lines products, direct marketing and travel business in Japan. In addition, net premiums written increased in the nine-month period ended September 30, 2012 as a result of growth of personal property business in Japan. The expansion in Asia Pacific countries outside Japan also continued in the three- and nine-month periods ended September 30, 2012, supported by growth in individual personal accident insurance, direct marketing and personal lines products. Commercial Insurance increased in the region primarily due to organic growth in property and financial lines.

Table of Contents

EMEA net premiums written decreased in both periods primarily due to the impact of foreign exchange. For the three-month period ended September 30, 2012, the U.S. dollar strengthened against the British pound and euro compared to the same period in the prior year. Excluding foreign exchange, net premiums written increased in the three-month period ended September 30, 2012 mainly due to a reduction of reinsurance protection in the Property line of Commercial Insurance. For the nine-month period ended September 30, 2012, the EMEA net premiums written decreased due to the continued execution of underwriting discipline, a reduction in primary casualty as it did not meet internal performance targets, and rate strengthening initiatives on new and renewal business for Commercial Insurance. Consumer Insurance is focused on re-building its direct marketing programs that it previously shared with American Life Insurance Company (ALICO).

AIG Property Casualty Underwriting Ratios

The following table presents the AIG Property Casualty combined ratios based on GAAP data and reconciliation to the accident year combined ratio, as adjusted:

	Three Months September		Increase	Nine Months September		Increase

Accident year combined ratio, as adjusted	100.1	98.7	1.4	99.6	98.2	1.4	

Given the run-off nature of the legacy lines of business and the nature of the expenses included in Other, management has determined that the traditional underwriting measures of loss ratio, expense ratio and combined ratio do not provide an appropriate measure of underwriting performance. Therefore, these ratios are not separately presented.

Commercial Insurance Quarterly and Year-to-Date Loss Ratios

The loss ratio decreased in 2012 primarily due to a decrease in catastrophe losses incurred in both the three- and nine-month periods. The accident year loss ratio for the nine-month period ended September 30, 2012 also benefitted from an increase in reserve discount of \$100 million. The improvement in the accident year loss ratio, as adjusted, for the three- and nine-month periods ended September 30, 2012 reflects the continued execution of strategic initiatives, including enhanced risk selection, particularly in the Property business, and restructuring of loss sensitive Casualty business. Net prior year adverse development including related premium adjustments was \$146 million and \$317 million in the three- and nine-month periods ended September 30, 2012, respectively, compared to net prior year adverse development of \$22 million and net favorable development of \$38 million in the respective prior year periods.

In the three-month periods ended September 30, 2012 and 2011, net prior year adverse development was due to the impact of claims emergence in catastrophe- and non-catastrophe-related reserves, primarily in environmental (policies written after 1987) and primary (specialty) workers' compensation business. In the nine-month period ended September 30, 2012, net prior year adverse development was due to the impact of adverse claims emergence in non-catastrophe reserves, primarily in environmental business (policies written after 1987) and excess casualty, partially offset by additional premium of \$52 million related to loss-sensitive business, and by favorable development from catastrophes of \$222 million. In the nine-month period ended September 30, 2011, net prior year adverse development was due to the impact of claims emergence in non-catastrophe reserves (primarily environmental), partially offset by additional premium of \$153 million related to loss-sensitive business, and by favorable development from catastrophes of \$35 million. The period over period increase in the favorable development from catastrophes of \$35 million. The period over period increase in the favorable development from catastrophes.

See Liability for Unpaid Claims and Claims Adjustment Expense for further discussion of discounting of reserves and prior year development.

Consumer Insurance Quarterly and Year-to-Date Loss Ratios

The Consumer Insurance loss ratio in the three-month periods ended September 30, 2012 decreased compared to the same period in 2011 mainly due to lower catastrophes in the Americas and Asia Pacific. The loss ratio in the nine-month period ended September 30, 2012 decreased compared to the same period in 2011 mainly due to lower catastrophes as the prior year period was impacted by the Tohoku Catastrophe in Japan and other events. The accident year loss ratio, as adjusted, in the three- and nine-month periods ended September 30, 2012 decreased as a result of management's emphasis on continued improvement in the areas of business mix risk selection, price sophistication, and where

necessary, targeted underwriting actions to meet internal performance or operating targets. Included in the accident year loss ratio, as adjusted, in the three- and nine-month periods ended September 30, 2012, were three severe, but non-catastrophic, loss events in Japan of \$24 million.

The following table presents the components of net prior year development for AIG Property Casualty:

Commercial Insurance Quarterly and Year-to-Date Expense Ratios

The expense ratio increased by 3.5 points and 4.8 points in the three- and nine-month periods ended September 30, 2012, respectively, primarily due to an increase in acquisition costs related to AIG Property Casualty's strategy of growing higher value lines, which typically incur higher commission rates. In addition, ceding commissions decreased as a result of restructuring of the Property reinsurance program as part of the strategic decision to retain more profitable business while continuing to manage aggregate exposures. Acquisition expenses for the three- and nine-month periods ended September 30, 2012 increased the expense ratio by approximately 2.6 points and approximately 3.0 points, respectively, compared to the same periods in the prior year. Further, increases in bad debt expense of approximately \$27 million and \$146 million contributed approximately 0.6 points and 0.9 points to the expense ratio increase in the three- and nine-month periods ended September 30, 2012, respectively. The remainder of the expense ratio increase was primarily due to higher personnel costs.

Consumer Insurance Quarterly and Year-to-Date Expense Ratios

The expense ratio in the three- and nine-month periods ended September 30, 2012 increased by 1.8 points and 1.4 points, respectively, compared to the same periods in the prior year, primarily due to a change in business mix and increases in direct marketing spending. The acquisition expenses for the three-month period ended September 30, 2012 increased the expense ratio by approximately 1.9 points from the same period in the prior year, reflecting the change in business mix and an increase in direct marketing spending. In the nine-month period ended September 30, 2012, the expense ratio increase was primarily due to operating expenses incurred to grow key lines of business across a number of geographic areas and a \$60 million decrease in VOBA benefit compared to the same period in the prior year.

AIG Property Casualty Quarterly and Year-to-Date Expense Ratios

AIG Property Casualty also continued to invest in a number of strategic initiatives during 2012, including the implementation of global finance and information systems, preparation for Solvency II compliance, readiness for regulation by the FRB under Dodd-Frank, legal entity restructuring, and underwriting and claims initiatives. The costs of these initiatives are reported as part of Other. For the three- and nine-month periods ended September 30, 2012, such investments totaled \$59 million and \$167 million, respectively, representing an increase of approximately \$23 million and \$84 million over the same periods in the prior year. AIG Property Casualty incurred higher personnel costs, as it continued efforts to attract, retain and develop its human capital and to better align employee performance with its strategic goals. These items collectively contributed approximately 0.6 points and 1.2 points to the expense ratio increase in the respective periods.

AIG Property Casualty Investing and Other Results

The following table presents AIG Property Casualty's investing and other results:

	Three Mon Septem	 	Percentage	Nine Mont Septem	 	Percentage		
(in millions)	2012	2011	Change	2012	2011	Change		
Net investment income								
Commercial Insurance	\$ 698	\$ 807	(14)% \$	2,160	\$ 2,411	(10)%

Other income (expense) net	2	(1)	NM	6	(1)	NM		
Investing and other results	\$ 1,390	\$ 1,083	28% \$	3,658	\$ 3,497	5%		

AIG Property Casualty manages and accounts for its invested assets on a legal entity basis in conformity with regulatory requirements. Within a legal entity, invested assets are available to pay claims and expenses of both Commercial Insurance and Consumer Insurance operating segments as well as Other. Invested assets are not segregated or otherwise separately identified for the Commercial Insurance and Consumer Insurance

operating segments.

Table of Contents

Investment income is allocated to the Commercial Insurance and Consumer Insurance operating segments based on an internal investment income allocation model. The model estimates investable funds based primarily on loss reserves, unearned premium and a capital allocation for each segment. The investment income allocation is calculated based on the estimated investable funds and risk-free yields (plus an illiquidity premium) consistent with the approximate duration of the liabilities. The actual yields in excess of the allocated amounts and the investment income from the assets not attributable to the Commercial Insurance and Consumer Insurance operating segments are assigned to Other.

Net realized capital gains (losses) and Other income (expense) net are not allocated to Commercial Insurance and Consumer Insurance, but are reported as part of Other.

Quarterly and Year-to-Date Net Investment Income

AIG Property Casualty continued to refine its investment strategy, which includes asset diversification by reducing the concentration of its portfolio in tax-exempt municipal instruments and increasing investments in private placement debt and structured securities, and yield-enhancement opportunities, by redeploying excess cash and short-term investments into longer term investments. In addition, net investment income for the nine-month period ended September 30, 2012 increased due to the strategic partnership with American General, all of which is reported in Consumer Insurance, and higher dividend income. For the three- and nine-month periods ended September 30, 2012, the average yield increased by 60 and 20 basis points to 3.9 percent and 3.8 percent, respectively. Net investment income increased in both periods due to higher interest income on fixed maturity securities driven by the refinement in the investment strategy. This was offset by decreases in returns on partnership and hedge fund investments, reflective of the overall lower market performance for the respective periods.

Quarterly and Year-to-Date Net Realized Capital Gains (Losses)

Net realized capital gains for the three-month period ended September 30, 2012 were primarily driven by gains recognized on the sale of fixed maturity and equity securities in the amount of \$169 million and a gain on the sale of real estate. This was partially offset by other-than-temporary impairment of \$31 million, primarily attributable to publicly traded and privately-held equity securities in the Japan portfolios and a decrease in recoverable values for structured securities. In addition, impairment charges of approximately \$59 million related to life settlement contracts were recorded during the period.

Net realized capital gains for the nine-month period ended September 30, 2012 were primarily driven by gains recognized on the sale of fixed maturity securities in the amount of \$490 million, which were partially offset by other-than-temporary impairments of \$330 million, primarily attributable to a decrease in recoverable values for structured securities, and partnership investments and equity securities in an unrealized loss position for more than 12 months. In addition, impairment charges of \$174 million primarily related to life settlement contracts were recorded during the period.

Liability for Unpaid Claims and Claims Adjustment Expense

The following discussion of the consolidated liability for unpaid claims and claims adjustment expenses (loss reserves) presents loss reserves for AIG Property Casualty as well as the loss reserves pertaining to the Mortgage Guaranty reporting unit, which is reported in Other.

The following table presents the components of AIG's gross loss reserves by major lines of business on a U.S. statutory basis*:

(in millions)	Sept	tember 30, 2012	December 31, 2011				
Other liability occurrence	\$	21,698	\$	22,471			
International		17,795		17,726			
Workers' compensation (net of discount)		17,483		17,420

Aircraft		1,061		1,020			
Fidelity/surety		618		786			
Other		1,587		1,366			
Total	\$	87,413	\$	91,145			

* Presented by lines of business pursuant to statutory reporting requirements as prescribed by the National Association of Insurance Commissioners.

AIG's gross loss reserves represent the accumulation of estimates of ultimate losses, including estimates for IBNR and loss expenses, less applicable discount for future investment income. The methods used to determine loss reserve estimates and to establish the resulting reserves are continually reviewed and updated. Any adjustments resulting from this review are currently reflected in pre-tax income. Because loss reserve estimates are subject to the outcome of future events, changes in estimates are unavoidable given that loss trends vary and time is often required for changes in trends to be recognized and confirmed. Reserve changes that increase previous estimates of ultimate cost are referred to as unfavorable or adverse development or reserve strengthening. Reserve changes that decrease previous estimates of ultimate cost are referred to as favorable development.

The net loss reserves represent loss reserves reduced by reinsurance recoverables, net of an allowance for unrecoverable reinsurance, less applicable discount for future investment income.

The following table classifies the components of net loss reserves by business unit:

(in millions)	September 30, 2012	December 31, 2011
AIG Property Casualty:		
Commercial Insurance	\$ 56,481	\$ 58,549
Consumer Insurance	5,485	5,438
Other	4,170	3,992
Total AIG Property Casualty	66,136	67,979
Other operations Mortgage Guaranty	1,951	2,846
Net liability for unpaid claims and claims adjustment expense at end of period	\$ 68,087	\$ 70,825

Discounting of Reserves

At September 30, 2012, net loss reserves reflect a loss reserve discount of \$3.3 billion, including tabular and non-tabular calculations.

The tabular workers' compensation discount is calculated using a 3.5 percent interest rate and the 1979 - 81 Decennial Mortality Table.

Table of Contents

The non-tabular workers' compensation discount is calculated separately for companies domiciled in New York and Pennsylvania, and follows the statutory regulations for each state. For New York companies, the discount is based on a five percent interest rate and the companies' own payout patterns. For Pennsylvania companies, the statute has specified discount factors for accident years 2001 and prior, which are based on a six percent interest rate and an industry payout pattern. For accident years 2002 and subsequent, the discount is based on the payout patterns and investment yields of the companies. Certain other asbestos business that was written by AIG Property Casualty is discounted based on the investment yields of the companies and the payout pattern for this business. The discount consists of the following: \$777 million tabular discount for workers' compensation in the U.S. operations of AIG Property Casualty; \$2.4 billion non-tabular discount for workers' compensation in the U.S. operations of AIG Property Casualty; and \$57 million non-tabular discount for asbestos for AIG Property Casualty.

The following table presents the change in reserve discount:

	Three Months Ended N September 30,		Nine Mont Septemb			
(in millions)	2012		2011	2012		2011
Change in loss reserve current accident year	\$ 85	\$	82 \$	255	\$	244
Change in loss reserve prior year development				87		(27)
Accretion of reserve discount	(91)		(89)	(273)		(267)
Net increase (decrease) in reserve discount	\$ (6)	\$	(7) \$	69	\$	(50)

The benefit from the change in discount in the nine-month period ended September 30, 2012 includes a \$100 million increase in the reserve discount due to the commutation of an internal reinsurance treaty, under which a U.S. subsidiary previously ceded workers' compensation claims to a non-U.S. subsidiary. AIG discounts its loss reserves related to workers' compensation business written by its U.S.-domiciled subsidiaries as permitted by the domiciliary statutory regulatory authorities. As a result of the commutation, the reserves for these claims are now being discounted commencing in the three-month period ended June 30, 2012. The commutation was implemented as part of AIG Property Casualty's efforts to simplify its internal reinsurance arrangements.

The prior year development and changes in the estimates in the payout patterns of previously established loss reserves did not have a significant impact on the change in discount in any of the periods presented.

Quarterly Reserving Process

AIG believes that its net loss reserves are adequate to cover net losses and loss expenses as of September 30, 2012. While AIG regularly reviews the adequacy of established loss reserves, there can be no assurance that AIG's ultimate loss reserves will not develop adversely and materially exceed AIG's loss reserves as of September 30, 2012. In the opinion of management, such adverse development and resulting increase in reserves are not likely to have a material adverse effect on AIG's consolidated financial condition, although such events could have a material adverse effect on AIG's consolidated results of operations for an individual reporting period.

In determining the loss development from prior accident years, AIG conducts analyses to determine the change in estimated ultimate loss for each accident year for each class of business. For example, if loss emergence for a class of business is different than expected for certain accident years, management examines the indicated effect such emergence would have on the reserves of that class of business. In some cases, the higher or lower than expected emergence may result in no clear change in the ultimate loss estimate for the accident years in question, and no adjustment would be made to the reserves for the class of business for prior accident years. In other cases, the higher or lower than expected loss emergence. AIG conducted reserve analyses in 2012 to determine the loss development from prior accident years. As part of its reserving process, AIG also considers notices of claims received with respect to emerging and/or evolving issues, such as those related to changes in the legal, regulatory, judicial and social environment, changes in medical cost trends (inflation, intensity and utilization of medical services), underlying policy pricing, terms and conditions, and claims handling practices.

The following table presents the rollforward of net loss reserves:

	Three Months Ended September 30,				Nine Months Ended September 30,			
(in millions)		2012		2011		2012		2011

Quarterly and Year-to-Date Prior Accident Year Development

As noted in the prior accident year development by major class of business table above, AIG Property Casualty experienced adverse development in the three-month period ended September 30, 2012 in AIG Property Casualty's environmental business (policies written after 1987), primary workers' compensation lines, and primary casualty, which is included in All other, net. For the nine-month period ended September 30, 2012, the adverse development was driven by reserve increases on claims in the AIG Property Casualty's environmental business (policies written after 1987), legacy environmental exposures (1986 and prior), and excess casualty lines. This was partially offset by net favorable development in reserves for natural catastrophes (principally the Tohoku Catastrophe) and favorable development in the Consumer Insurance operating segment, which is included in All other, net.

The development in the environmental business for the three- and nine-month periods ended September 30, 2012 was primarily attributable to claims increases in four major categories:

Site liability coverage for known remediation projects and increased clean-up costs;

Fixed facility coverage for manufacturers and distributors whose raw materials, products or industrial processes present a significant environmental exposure;

Policies that provide an enhanced general liability product designed specifically to meet the needs of environmental consultants and contractors; and

A Surety policy that provided performance bonding for the remediation and closure of a landfill site.

The reserve increase in the environmental business was the result of an on-going review of certain cases that AIG believes to be subject to the most volatility. For several of those cases, AIG concluded that the reserves should be increased to take into account the updated assessment of the claims. AIG also reviewed the legacy environmental (1986 and prior) claims and increased the reserves accordingly.

Partially offsetting the prior accident year adverse development, AIG Property Casualty recognized additional premiums on loss-sensitive business of \$66 million and \$52 million for the three- and nine-month periods ended September 30, 2012, respectively, compared to \$25 million and \$ 153 million in the same periods in the prior year, respectively.

See AIG Property Casualty Results herein and Other Operations Other Operations Results Mortgage Guaranty for further discussion of net loss development.

Asbestos and Environmental (1986 and Prior) Reserves

The estimation of loss reserves relating to asbestos and environmental claims on insurance policies written many years ago is subject to greater uncertainty than other types of claims due to inconsistent court decisions as well as judicial interpretations and legislative actions that in some cases have tended to broaden coverage beyond the original intent of such policies and in others have expanded theories of liability.

As described more fully in the 2011 Annual Report, AIG's reserves relating to asbestos and environmental claims reflect a comprehensive ground-up analysis performed annually. In the nine-month period ended September 30, 2012, \$32 million of net incurred loss pertaining to the asbestos loss reserve discount is reflected in the table below. In the nine-month period ended September 30, 2012, AIG increased its gross environmental reserves by \$150 million and increased its net environmental reserves by \$75 million. This development is primarily attributable to several large accounts which led to an increase in the estimate of claims that have been incurred but not reported.

In addition to the U.S. asbestos and environmental reserve amounts shown in the tables below, AIG Property Casualty also has asbestos reserves relating to foreign risks written by non-U.S. entities of \$142 million gross and \$115 million net reserves as of September 30, 2012. Similar amounts were held at December 31, 2011.

The following table provides a summary of reserve activity, including estimates for applicable IBNR, relating to asbestos and environmental claims:

Nine Months Ended September 30,	2012		2011				
(in millions)	Gross	Net	Gross	Net			
Asbestos:							
Liability for unpaid claims and claims adjustment expense at beginning of year	\$ 5,226 \$	537 \$	5,526 \$	2,223			
Change in net loss reserves due to retroactive reinsurance:		54		02			
Paid losses recoverable under retroactive reinsurance contracts		74		93			
Re-estimation of amounts recoverable under retroactive reinsurance contracts ^(a)		(20)		(1,789)			
Change in net loss reserves due to retroactive reinsurance		54		(1,696)			
Loss and loss expenses incurred							
Change in discount	69	32	117	50			
Losses and loss expenses incurred ^(b)	69	32	117	50			
Losses and loss expenses paid ^(b)	(289)	(180)	(375)	(181)			
Other changes				168			
Liability for unpaid claims and claims adjustment expense at end of period	\$ 5,006 \$	443 \$	5,268 \$	564			
Environmental:							
Liability for unpaid claims and claims adjustment expense at beginning of year	\$ 204 \$	119 \$	240 \$	127			
Losses and loss expenses incurred	150	75	32	17			
Losses and loss expenses paid	(31)	(21)	(64)	(33)			
Liability for unpaid claims and claims adjustment expense at end of period	\$ 323 \$	173 \$	208 \$	111			
Combined:							
Liability for unpaid claims and claims adjustment expense at beginning of year	\$ 5,430 \$	656 \$	5,766 \$	2,350			
Change in net loss reserves due to retroactive reinsurance:							
Paid losses recoverable under retroactive reinsurance contracts		74		93			
Re-estimation of amount recoverable under retroactive reinsurance contracts		(20)		(1,789)			
Change in net loss reserves due to retroactive reinsurance		54		(1,696)			
Losses and loss expenses incurred							
Undiscounted	150	75	32	17			
Change in discount	69	32	117	50			
Losses and loss expenses incurred	219	107	149	67			
Losses and loss expenses paid	(320)	(201)	(439)	(214)			
Other changes				168			
Liability for unpaid claims and claims adjustment expense at end of period	\$ 5,329 \$	616 \$	5,476 \$	675			

(a) Re-estimation of amounts recoverable under retroactive reinsurance contracts includes effect of changes in reserve estimates and changes in discount. Additionally, the 2011 Net amount includes the effect on net loss reserves of the initial cession to NICO. See Chartis Operations Liability for Unpaid Claims and Claims Adjustment Expense Asbestos and Environmental Reserves in the 2011 Annual Report for further discussion of the NICO reinsurance transaction.

(b) These amounts exclude benefit from retroactive reinsurance.

The following table presents the estimate of the gross and net IBNR included in the Liability for unpaid claims and claims adjustment expense, relating to asbestos and environmental claims:

September 30,	2012	2		2011				
(in millions)	Gross		Net [*]		Gross	Net [*]		
Asbestos	\$ 3,535	\$	135	\$	3,793	\$	284	
Environmental	103		53		75		28	
Combined	\$ 3,638	\$	188	\$	3,868	\$	312	

* Net IBNR includes the reduction due to the NICO reinsurance transaction of \$1,359 million and \$1,476 million as of September 30, 2012 and 2011, respectively.

The following table presents a summary of asbestos and environmental claims count activity:

		2012			2011	
Nine Months Ended September 30,	Asbestos	Environmental	Combined	Asbestos	Environmental	Combined
Claims at beginning of year	5,443	3,782	9,225	4,933	4,087	9,020
Claims during year:						
Opened	203	159	362	105	131	236
Settled	(80)	(165)	(245)	(153)	(61)	(214)
Dismissed or otherwise resolved ^(a)	(129)	(2,151)	(2,280)	(308)	(399)	(707)
Other ^(b)				841		841
Claims at end of period	5,437	1,625	7,062	5,418	3,758	9,176

(a) The number of environmental claims dismissed or otherwise resolved, increased substantially during 2012 as a result of AIG Property Casualty's determination that certain methyl tertiary-butyl ether (MTBE) claims presented no further potential for exposure since these underlying claims were resolved through dismissal, settlement, or trial for all of the accounts involved. All of these accounts were fully reserved at the account level and included adequate reserves for those underlying individual claims that contributed to the actual losses. These individual claim closings, therefore, had no impact on AIG Property Casualty's environmental reserves.

(b) Represents an administrative change to the method of determining the number of open claims, which had no effect on carried reserves.

Survival Ratios Asbestos and Environmental

The following table presents AIG's survival ratios for asbestos and environmental claims at September 30, 2012 and 2011. The survival ratio is derived by dividing the current carried loss reserve by the average payments for the three most recent calendar years for these claims. Therefore, the survival ratio is a simplistic measure estimating the number of years it would take before the current ending loss reserves for these claims would be paid off using recent year average payments.

Many factors, such as aggressive settlement procedures, mix of business and level of coverage provided, have a significant effect on the amount of asbestos and environmental reserves and payments and the resultant survival ratio. Moreover, as discussed above, the primary basis for AIG's determination of its reserves is not survival ratios, but instead the ground-up and top-down analyses. Thus, caution should be exercised in attempting to determine reserve adequacy for these claims based simply on this survival ratio.

The following table presents survival ratios for asbestos and environmental claims which were based upon a three-year average payment:

	2012		2011	
Nine Months Ended September 30,	Gross	Net [*]	Gross	Net [*]
Survival ratios:				
Asbestos	9.7	8.9	8.9	10.0
Environmental	4.8	4.6	2.9	2.7
Combined	9.2	8.3	8.3	8.9

* Survival ratios are calculated consistent with the basis on historical reserve excluding the effects of the NICO reinsurance transaction.

AIG Life and Retirement Highlights

The results of AIG Life and Retirement for the three and nine months ended September 30, 2012 and 2011 reflected the following:

Net investment income in the nine-month period ended September 30, 2012 increased compared to the same period in 2011, due in large part to reinvestment during 2011 of significant amounts of cash and short term investments.

Private equity and hedge fund investment income increased \$81 million and decreased \$189 million for the three and nine-month periods ended September 30, 2012, compared to the respective periods of 2011.

Investment income from the ML II investment prior to its liquidation and distribution in March 2012 increased \$43 million and \$214 million for the three- and nine-month periods ended September 30, 2012 compared to the same period in 2011.

Prudent spread management, through crediting rate changes, resulted in improvements in base net investment spreads for both the three and nine months ended September 30, 2012.

The effect of more favorable equity market performance had a positive effect on policyholder benefits and DAC amortization expenses for both the three- and nine-month periods ended September 30, 2012.

Reserve increases in the three months ended September 30, 2012 related to the resolution of death claims enhancement practices in connection with the multi-state examinations.

Higher net realized capital gains from the sale of investments were reflected in both the three- and nine-month periods ended September 30, 2012. The sales of securities in unrealized gain positions that support certain payout annuity products, and subsequent reinvestment of the proceeds at generally lower yields, triggered loss recognition charges in both the three- and nine-month periods ended September 30, 2012.

AIG Life and Retirement Operations

Commencing in the fall of 2012, the SunAmerica segment was renamed AIG Life and Retirement, although certain existing brands will continue to be used in the marketplace.

AIG Life and Retirement offers a comprehensive suite of products and services to individuals and groups including term life, universal life, A&H, fixed and variable deferred annuities, fixed payout annuities, mutual funds and financial planning. AIG Life and Retirement offers its products and services through a diverse, multi-channel distribution network that includes banks, national, regional and independent broker-dealers, affiliated financial advisors, independent marketing organizations, independent and career insurance agents, structured settlement brokers, benefit consultants and direct-to-consumer platforms. AIG Life and Retirement also maintains a runoff block of guaranteed investment contracts (GICs) written in the institutional market place prior to 2006.

AIG Life and Retirement presents its business in two operating segments:

Life Insurance, which focuses on mortality- and morbidity-based protection products, and

Retirement Services, which focuses on investment, retirement savings and income solution products.

AIG Life and Retirement Results

Quarterly AIG Life and Retirement Results

Net investment income increased compared to the same quarter of 2011, reflecting the following items:

an \$81 million increase in income from private equity funds and hedge funds;

an \$88 million increase in fair value gains on trading securities, including securities purchased through the FRBNY's auction of ML III assets;

The effect of favorable market performance compared to assumptions was approximately \$173 million lower DAC amortization and policyholder benefit expenses in the three months ended September 30, 2012 compared to the same period of 2011 for certain guaranteed benefits features of variable annuities;

\$11 million in losses related to equity-method investments in trusts that hold leased commercial aircraft compared to \$97 million loss in the same period in 2011; and

a \$43 million fair value loss on ML II in 2011.

The favorable variances above were partially offset by the following:

In the three months ended September 30, 2012, AIG Life and Retirement life insurance subsidiaries worked to resolve multi-state examinations relating to the handling of unclaimed property and the use of the Social Security Death Master File (SSDMF) to identify death claims that have not been submitted to AIG in the normal course of business.

The final settlement of these examinations was announced on October 22, 2012. AIG Life and Retirement is now taking enhanced measures to, among other things, routinely match policyholder records with the SSDMF to determine if its insured parties, annuitants, or retained account holders have died and locate beneficiaries when a claim is payable.

Expenses incurred in the current quarter related to claims enhancement include the following:

an \$11 million regulatory assessment which will be paid to the various state insurance departments that are parties to the regulatory settlement to defray costs of their examinations and monitoring; and

a \$55 million increase to policyholder benefit reserves related to these audits for interest and expected acceleration of benefit payments under the settlement, including early payment or escheatment of policy proceeds under certain older industrial life policies.

Further, as a result of a comprehensive review of reserves for the GIC portfolio, AIG Life and Retirement recorded an increase to interest credited expense of \$110 million for the three months ended September 30, 2012.

Pre-tax income for AIG Life and Retirement in the third quarter of 2012 included a \$632 million increase in net realized capital gains compared to the same period in 2011 primarily due to higher gains from a sale of investments and a \$295 million decline in other-than-temporary impairments.

As part of a program to utilize capital loss tax carryforwards, certain assets in an unrealized gain position that support payout annuity products were sold. Subsequent reinvestment of the proceeds at generally lower yields, triggered loss recognition of \$598 million in the three months ended September 30 2012, which was reported as a component of Change in benefit reserves and DAC, VOBA and SIA related to net realized capital losses. This charge effectively transferred shadow loss recognition to actual loss recognition in the three months ended September 30, 2012, and to a much lesser extent, resulted in additional DAC amortization. Additional sales of such securities that would result in capital gains are planned during the remainder of 2012.

Year-to-Date AIG Life and Retirement Results

Net investment income increased for the nine-month period ended September 30, 2012, reflecting an increase in base yields of 15 basis points, due to the reinvestment of significant amounts of cash and short term investments during 2011. In addition to the increase from reinvestment, net investment income compared to the same period of 2011 reflected the following items:

\$214 million increase in fair value gains on ML II in 2011;

122

Table of Contents

\$94 million increase in fair value gains on trading securities; and

\$112 million decrease in losses related to equity-method investments in trusts that hold leased commercial aircraft.

These items were partially offset by:

\$189 million decrease in income from private equity funds and hedge funds; and

\$94 million decrease in call and tender income.

The increase in net investment income combined with lower interest credited resulted in improved investment spreads for the nine months ended September 30, 2012 as compared to the same period in 2011.

The effect of positive equity market performance resulted in approximately \$210 million lower DAC amortization and policyholder benefit expenses in the first nine months of 2012 compared to the same period in 2011.

The nine months ended September 30, 2012, included the previously described charges related to the multi-state examination and use of the SSDMF of approximately \$66 million, compared to a change to increase IBNR related to the SSDMF of \$100 million in the same period in 2011.

Also included in the nine month results was the \$110 million increase in GIC interest credited expense discussed above.

As a result of decreases in interest rates on U.S. Treasury securities during the first nine months of 2012, the fair value of the U.S. Treasury securities used for hedging, net of financing costs, increased by \$48 million. This was partially offset by embedded derivative losses related to the decline in interest rates, which are reported in net realized gains (losses).

Pre-tax income for AIG Life and Retirement included a \$621 million increase in net realized capital gains compared to the 2011 period, due to higher gains from the sale of investments and lower other-than-temporary impairments. These higher gains were partially offset by \$421 million higher fair value losses on variable annuity embedded derivatives, net of related hedges and other interest and currency rate swaps, which were primarily due to declining credit spreads and declines in long-term interest rates.

The sale of securities in an unrealized gain position and subsequent reinvestment of the proceeds at generally lower yields, triggered loss recognition for certain payout annuity products in the amount of \$1.1 billion in 2012, which effectively transferred shadow loss recognition from unrealized to actual loss recognition and, to a lesser extent, resulted in additional DAC amortization in the first nine months of 2012.

Premiums

Premiums represent premiums received on traditional life insurance policies and deposits on life-contingent payout annuities. Premiums, deposits and other considerations is a non-GAAP measure which includes life insurance premiums, deposits on annuity contracts and mutual funds.

The following table presents a reconciliation of premiums, deposits and other considerations to premiums:

	Three Months E September 30		Nine Months Ended September 30,

* Life insurance sales include periodic premiums from new business expected to be collected over a one-year period and 10 percent of single premiums and unscheduled deposits from new and existing policyholders. Annuity sales represent deposits from new and existing customers.

Total premiums, deposits and other considerations decreased in both the three- and nine-month periods ended September 30, 2012 as substantial decreases in individual fixed annuities were only partially offset by significant increases in individual variable annuities and retail mutual funds.

Individual fixed annuity deposits declined due to the low interest rate environment as consumers are reluctant to purchase such annuities at the relatively low crediting rates currently offered. Group retirement product deposits (which include deposits into mutual funds and fixed options within variable annuities sold in group retirement markets) decreased modestly due to slightly lower levels of individual rollover deposits and periodic deposits in 2012, partially offset by higher mutual fund deposits. The low interest rate environment has also begun to impact group retirement deposits, resulting in lower levels of deposits into fixed options. Individual variable annuity deposits increased due to innovative product enhancements and expanded distribution as well as a more favorable competitive environment. Premiums from life insurance products increased in 2012, but were more than offset by declines in deferred annuities sold through life insurance distribution channels. Retail mutual fund sales growth was principally driven by SunAmerica Asset Management Corp.'s Focused Dividend Strategy product offering which continues as a top short- and long-term performer within its respective peer group.

AIG Life and Retirement's total life sales increased nine percent during the first nine months of 2012 compared to the same period in 2011 due in part to the timing of large institutional product sales. Sales of AIG Life and Retirement term products through its affiliated Matrix Direct channel in the first nine months of 2012 were up due in part to the shift toward selling proprietary products. Universal life sales continued to be pressured by the economic environment as the pricing of these products is sensitive to interest rates.
