

WATTS WATER TECHNOLOGIES INC
Form 10-K
February 26, 2015

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2014

Or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

Commission file number 001-11499

WATTS WATER TECHNOLOGIES, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or Other Jurisdiction of
Incorporation or Organization)

04-2916536

(I.R.S. Employer
Identification No.)

815 Chestnut Street, North Andover, MA

(Address of Principal Executive Offices)

01845

(Zip Code)

Registrant's telephone number, including area code: **(978) 688-1811**

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Class A common stock, par value \$0.10 per share	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of June 27, 2014, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was approximately \$1,755,888,663 based on the closing sale price as reported on the New York Stock Exchange.

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at January 30, 2015
Class A common stock, \$0.10 par value per share	28,507,519 shares
Class B common stock, \$0.10 par value per share	6,479,290 shares

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's Proxy Statement for its Annual Meeting of Stockholders to be held on May 13, 2015, are incorporated by reference into Part III of this Annual Report on Form 10-K.

PART I

Item 1. BUSINESS.

This Annual Report on Form 10-K contains statements that are not historical facts and are considered forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements contain projections of our future results of operations or our financial position or state other forward-looking information. In some cases you can identify these forward-looking statements by words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "should," and "would" or similar words. You should not rely on forward-looking statements because they involve known and unknown risks, uncertainties and other factors, some of which are beyond our control. These risks, uncertainties and other factors may cause our actual results, performance or achievements to differ materially from the anticipated future results, performance or achievements expressed or implied by the forward-looking statements. Some of the factors that might cause these differences are described under Item 1A "Risk Factors." You should carefully review all of these factors, and you should be aware that there may be other factors that could cause these differences. These forward-looking statements were based on information, plans and estimates at the date of this report, and, except as required by law, we undertake no obligation to update any forward-looking statements to reflect changes in underlying assumptions or factors, new information, future events or other changes.

In this Annual Report on Form 10-K, references to "the Company," "Watts Water," "we," "us" or "our" refer to Watts Water Technologies, Inc. and its consolidated subsidiaries.

Overview

Watts Regulator Co. was founded by Joseph E. Watts in 1874 in Lawrence, Massachusetts. Watts Regulator Co. started as a small machine shop supplying parts to the New England textile mills of the 19th century and grew into a global manufacturer of products and systems focused on the control, conservation and quality of water and the comfort and safety of the people using it. Watts Water Technologies, Inc. was incorporated in Delaware in 1985 and became the parent company of Watts Regulator Co.

Our strategy is to be the leading provider of products that improve the quality, conservation, safety, and control of water in residential, commercial and industrial markets in the Americas and EMEA (Europe, Middle East and Africa) and to expand our presence in Asia-Pacific. Our primary objective is to grow earnings by increasing sales within existing markets, expanding into new markets, leveraging our distribution channels and customer base, making selected acquisitions, reducing manufacturing costs and advocating for the development and enforcement of industry standards.

We intend to continue to expand organically by introducing products in existing markets, by enhancing our preferred brands, by developing new complementary products, by promoting plumbing code development to drive the need for safety and water quality products and by continually improving merchandising in our wholesale distribution channels. We target selected new product and geographic markets based on growth potential, including our ability to leverage our existing distribution channels. Additionally, we leverage our distribution channels through the introduction of new products, as well as the integration of products of our acquired companies.

We intend to continue to generate incremental growth by targeting selected acquisitions, both in our core markets as well as new complementary markets. We have completed 21 acquisitions in the last decade. Our acquisition strategy focuses on businesses that manufacture preferred brand name products that address our themes of water quality, conservation, safety, control, and comfort in our primary or related complementary markets. We target businesses that will provide us with one or more of the following: an entry into new markets, an increase in shelf space with existing customers, strong brand names, a new or improved technology or an expansion of the breadth of our product offerings.

We are committed to reducing our manufacturing and operating costs through a combination of manufacturing in lower-cost countries, using Lean and Six Sigma to drive continuous improvement

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

across all key processes, and consolidating our diverse manufacturing operations in Americas, EMEA and Asia-Pacific. We have a number of manufacturing facilities in lower-cost regions such as Mexico, China, Bulgaria and Tunisia. In recent years, we have announced several global restructuring plans to reduce our manufacturing footprint in order to reduce our costs and to realize additional operating efficiencies.

Our products are sold to wholesale distributors and dealers, original equipment manufacturers (OEMs) and major DIY chains. Most of our sales are for products that have been approved under regulatory standards incorporated into state and municipal plumbing, heating, building and fire protection codes in North America and Europe. We have consistently advocated for the development and enforcement of plumbing codes and are committed to providing products to meet these standards, particularly for safety and control valve products.

Additionally, a majority of our manufacturing facilities are ISO 9000, 9001 or 9002 certified by the International Organization for Standardization.

Our business is reported in three geographic segments: Americas, EMEA and Asia-Pacific. The contributions of each segment to net sales, operating income and the presentation of certain other financial information by segment are reported in Note 16 of the Notes to Consolidated Financial Statements and in "Management's Discussion and Analysis of Financial Condition and Results of Operations" included elsewhere in this report.

Products

We have a broad range of products in terms of design distinction, size and configuration. We classify our many products into four universal product lines. These product lines are:

Residential & commercial flow control products includes products typically sold into plumbing and hot water applications such as backflow preventers, water pressure regulators, temperature and pressure relief valves, and thermostatic mixing valves. Residential & commercial flow control products accounted for approximately 61% of our total sales in each of 2014, 2013 and 2012.

HVAC & gas products includes hydronic and electric heating systems for under-floor radiant applications, commercial high-efficiency boilers, water heaters and heating solutions, custom heat and hot water solutions, hydronic pump groups for boiler manufacturers and alternative energy control packages, and flexible stainless steel connectors for natural and liquid propane gas in commercial food service and residential applications. HVAC & gas products accounted for approximately 24% of our total sales in each of 2014, 2013 and 2012. HVAC is an acronym for heating, ventilation and air conditioning.

Drainage & water re-use products includes drainage products and engineered rain water harvesting solutions for commercial, industrial, marine and residential applications. Drainage & water re-use products accounted for approximately 10% of our total sales in each of 2014, 2013 and 2012.

Water quality products includes point-of-use and point-of-entry water filtration, conditioning and scale prevention systems for both commercial and residential applications. Water quality products accounted for approximately 5% of our total sales in each of 2014, 2013 and 2012.

Product Rationalization and Commercial Excellence

We strive to invest in product innovation that meets the wants and needs of our customers and our end markets. Our focus is on differentiated products that will provide greater opportunity to distinguish ourselves in the market place. Conversely we want to migrate away from undifferentiated products where we cannot add value. In addition, we want to be a solutions provider, not merely a components supplier. We continuously look for strategic opportunities to invest or divest where necessary in order to meet those objectives.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

On February 17, 2015, the Board of Directors of the Company approved the initial phase of a restructuring program relating to the transformation of our Americas and Asia-Pacific businesses, which primarily involves product line rationalization efforts relating to low margin, undifferentiated products. We expect to ultimately eliminate between \$175 million to \$200 million of our combined Americas and Asia-Pacific net sales that primarily affect our do-it-yourself (DIY) distribution channel. Refer to Recent Developments in "Management's Discussion and Analysis of Financial Condition and Results of Operations" for further discussion.

Customers and Markets

We sell our products to plumbing, heating and mechanical wholesale distributors, OEMs and major DIY chains.

Wholesalers. Approximately 64% of our sales in both 2014 and 2013, and 63% of our sales in 2012, were to wholesale distributors for commercial and residential applications. We rely on commissioned manufacturers' representatives, some of which maintain a consigned inventory of our products, to market our product lines. Additionally, various water quality products are sold to independent dealers throughout the Americas.

OEMs. Approximately 23% of our sales in both 2014 and 2013, and 24% of our sales in 2012, were to OEMs. In the Americas, our typical OEM customers are water heater manufacturers and equipment and water systems manufacturers needing flow control devices and other products. Our sales to OEMs in EMEA are primarily to boiler manufacturers and radiant system manufacturers. Our sales to OEMs in Asia-Pacific are primarily to boiler, water heaters and bath manufacturers including manufacturers of faucet and shower products.

DIY Chains. Approximately 13% of our sales in each of 2014, 2013 and 2012 were to DIY chains.

In 2014, 2013 and 2012, no customer accounted for more than 10% of our total net sales. Our top ten customers accounted for approximately \$380.0 million, or 25%, of our total net sales in 2014; \$321.7 million, or 22%, of our total net sales in 2013; and \$309.3 million, or 22%, of our total net sales in 2012. Thousands of other customers constituted the balance of our net sales in each of those years.

Marketing and Sales

For product sales, we rely primarily on commissioned manufacturers' representatives, some of which maintain a consigned inventory of our products. These representatives sell primarily to plumbing and heating wholesalers and contractors or service DIY stores in the Americas. We also sell products for the residential construction and home repair and remodeling industries through DIY plumbing retailers, national catalog distribution companies, hardware stores, building material outlets and retail home center chains and through plumbing and heating wholesalers. In addition, we sell products directly to wholesalers, OEMs and private label accounts primarily in EMEA and to a lesser extent in the Americas.

Manufacturing

We have integrated and automated manufacturing capabilities, including a lead free foundry and a traditional brass and bronze foundry, machining, plastic extrusion and injection molding and assembly operations. Our foundry operations include metal pouring systems, automatic core making, brass forging and brass and bronze die-castings. Our machining operations feature computer-controlled machine tools, high-speed chucking machines with robotics and automatic screw machines for machining bronze, brass and steel components. We have invested in recent years to expand our manufacturing capabilities to ensure the availability of the most efficient and productive equipment. We are committed to maintaining our manufacturing equipment at a level consistent with current technology in order to maintain high levels of quality and manufacturing efficiencies.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Capital expenditures and depreciation for each of the last three years were as follows:

	Years Ended December 31,		
	2014	2013	2012
	(in millions)		
Capital expenditures	\$ 23.7	\$ 27.7	\$ 30.5
Depreciation	\$ 32.9	\$ 34.2	\$ 33.1

Raw Materials

We require substantial amounts of raw materials to produce our products, including bronze, brass, cast iron, stainless steel, steel, plastic, and components used in products. Substantially all of the raw materials we require are purchased from outside sources. The commodity markets have experienced volatility over the past several years, particularly with respect to copper and stainless steel. Bronze and brass are copper-based alloys. The price of copper has steadily declined over the last three years. In 2014, copper spot prices started out higher in the first quarter but continued to decline through the remainder of the year. In 2013, spot copper prices in the first quarter trended higher, with prices declining through the remainder of the year. In 2012, increases in the first quarter and third quarter were offset by more moderate pricing in the second quarter and fourth quarter. The fact that we internationally source a significant amount of raw materials means that several months of raw materials and work in process are moving through our supply chain at any point in time. We are not able to predict whether commodity costs, including copper and stainless steel, will significantly increase or decrease in the future. If commodity costs increase in the future and we are not able to reduce or eliminate the effect of the cost increases by reducing production costs or implementing price increases, our profit margins could decrease. If commodity costs were to decline, we may experience pressures from customers to reduce our selling prices. The timing of any price reductions and decreases in commodity costs may not align. As a result, our margins could be affected.

With limited exceptions, we have multiple suppliers for our commodities and other raw materials. We believe our relationships with our key suppliers are good and that an interruption in supply from any one supplier would not materially affect our ability to meet our immediate demands while another supplier is qualified. We regularly review our suppliers to evaluate their strengths. If a supplier is unable to meet our demands, we believe that in most cases our inventory of raw materials will allow for sufficient time to identify and obtain the necessary commodities and other raw materials from an alternate source. We believe that the nature of the commodities and other raw materials used in our business are such that multiple sources are generally available in the market.

Code Compliance

Products representing a majority of our sales are subject to regulatory standards and code enforcement, which typically require that these products meet stringent performance criteria. Standards are established by such industry test and certification organizations as the American Society of Mechanical Engineers (ASME), the America Water Works Association (AWWA), the Canadian Standards Association (CSA), the International Code Council (ICC), the American Society of Sanitary Engineering (ASSE), the University of Southern California Foundation for Cross-Connection Control and Hydraulic Research (USC FCCC & HR), the International Association of Plumbing and Mechanical Officials (IAPMO), FM Global (FM), NSF International (NSF) and Underwriters Laboratories (UL). Many of these standards are incorporated into state and municipal plumbing and heating, building and fire protection codes.

National regulatory standards in Europe vary by country. The major standards and/or guidelines that our products must meet are AFNOR (France), DVGW (Germany), UNI/ICIM (Italy), KIWA (Netherlands), SVGW (Switzerland), SITAC (Sweden), WRAS (United Kingdom) and CEN (Denmark). Further, there are local regulatory standards requiring compliance as well.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Together with our commissioned manufacturers' representatives, we have consistently advocated for the development and enforcement of plumbing codes. We maintain stringent quality control and testing procedures at each of our manufacturing facilities in order to manufacture products that comply with code requirements. We believe that product-testing capability and investment in plant and equipment is needed to manufacture products that comply with code requirements. Additionally, a majority of our manufacturing facilities are ISO 9000, 9001 or 9002 certified by the International Organization for Standardization.

New Product Development and Engineering

We maintain our own product development staff, design teams, and testing laboratories in Americas, EMEA and Asia-Pacific that work to enhance our existing products and develop new products. We maintain sophisticated product development and testing laboratories. Research and development costs included in selling, general, and administrative expense amounted to \$22.5 million, \$21.5 million and \$20.4 million for the years ended December 31, 2014, 2013 and 2012, respectively.

Effective January 4, 2014, the *Reduction of Lead in Drinking Water Act* reduced the permissible weighted average lead content in faucets, fittings and valves used in potable water applications from 8% to 0.25% throughout the United States. We invested considerable resources over the past several years to develop lead free versions of our plumbing products to comply with the new law, and we successfully introduced our lead free product offerings throughout the U.S. In response to the nationwide lead free law, we committed an aggregate of approximately \$18.3 million in capital spending in 2012 and 2013 for a new foundry and machinery in the U.S. to meet expected lead free demand for our products. Construction of the new foundry was completed and the new facility was commissioned during the second quarter of 2013.

Complying with this new requirement on a nationwide basis was a challenge for us. The new requirement caused our material costs to increase as suppliers of alternative lead free metals are currently limited and lead free alloy substitutes are more expensive than the original leaded alloys. Our new lead free foundry has been operating since June 2013. We have and may continue to experience some technical challenges in our manufacturing process involved with the lead free alloys. However, production at our foundry stabilized considerably in the second half of 2014.

Competition

The domestic and international markets for water quality, conservation, safety and control devices are intensely competitive and require us to compete against some companies possessing greater financial, marketing and other resources than ours. Due to the breadth of our product offerings, the number and identities of our competitors vary by product line and market. We consider quality, brand preference, delivery times, engineering specifications, plumbing code requirements, price, technological expertise and breadth of product offerings to be the primary competitive factors. We believe that new product development and product engineering are also important to success in the water industry and that our position in the industry is attributable in part to our ability to develop new and innovative products quickly and to adapt and enhance existing products. We continue to develop new and innovative products to enhance our market position and are continuing to implement manufacturing and design programs to reduce costs. We cannot be certain that our efforts to develop new products will be successful or that our customers will accept our new products. Although we own certain patents and trademarks that we consider to be of importance, we do not believe that our business and competitiveness as a whole are dependent on any one of our patents or trademarks or on patent or trademark protection generally.

Backlog

Backlog was approximately \$91.8 million at February 6, 2015 and approximately \$84.4 million at February 7, 2014. We do not believe that our backlog at any point in time is indicative of future operating results and we expect our entire current backlog to be converted to sales in 2015.

Employees

As of December 31, 2014, we employed approximately 6,100 people worldwide. With the exception of our tekmar subsidiary in Canada and recently acquired AERCO International, Inc. ("AERCO") in New York, none of our employees in North America or Asia are covered by collective bargaining agreements. In some European countries, our employees are subject to traditional national collective bargaining agreements. We believe that our employee relations are good.

Product Liability, Environmental and Other Litigation Matters

We are subject to a variety of potential liabilities connected with our business operations, including potential liabilities and expenses associated with possible product defects or failures and compliance with environmental laws. We maintain product liability and other insurance coverage, which we believe to be generally in accordance with industry practices. Nonetheless, such insurance coverage may not be adequate to protect us fully against substantial damage claims.

Contingencies

Trabakoolas et al., v. Watts Water Technologies, Inc., et al.,

On March 8, 2012, Watts Water Technologies, Inc., Watts Regulator Co., and Watts Plumbing Technologies Co., Ltd., among other companies, were named as defendants in a putative nationwide class action complaint filed in the U.S. District Court for the Northern District of California seeking to recover damages and other relief based on the alleged failure of toilet connectors.

On December 12, 2013, we reached an agreement in principle to settle all claims. The total settlement amount was \$23.0 million, of which we were responsible for \$14.0 million after insurance proceeds of \$9.0 million. On July 18, 2014, the Court granted final approval of the class settlement at a fairness hearing, and issued a subsequent written order formalizing the approval on August 5, 2014. No appeal was taken, and the order became final on September 4, 2014. The litigation is now terminated.

During the fourth quarter of 2013, we recorded a liability of \$22.6 million related to the Trabakoolas matter, of which \$12.7 million was included in current liabilities and \$9.9 million in other noncurrent liabilities. In addition, a \$9.0 million receivable was recorded in current assets related to insurance proceeds due under a separate settlement agreement. The liability was reduced by \$13.8 million for payments related to notice and claims administration, plaintiff attorneys' fees and partial funding of the settlement amount made during the year ended December 31, 2014. The \$9.0 million receivable for insurance proceeds was received as of September 28, 2014. The remaining liability of \$8.8 million as of December 31, 2014 will be paid in equal annual installments over four years.

Environmental Remediation

We have been named as a potentially responsible party with respect to a limited number of identified contaminated sites. The levels of contamination vary significantly from site to site as do the related levels of remediation efforts. Environmental liabilities are recorded based on the most probable cost, if known, or on the estimated minimum cost of remediation. Accruals are not discounted to their present value, unless the amount and timing of expenditures are fixed and reliably determinable. We accrue estimated environmental liabilities based on assumptions, which are subject to a number of factors and uncertainties. Circumstances that can affect the reliability and precision of these estimates include identification of additional sites, environmental regulations, level of clean-up required,

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

technologies available, number and financial condition of other contributors to remediation and the time period over which remediation may occur. We recognize changes in estimates as new remediation requirements are defined or as new information becomes available.

Asbestos Litigation

We are defending approximately 240 lawsuits in different jurisdictions, alleging injury or death as a result of exposure to asbestos. The complaints in these cases typically name a large number of defendants and do not identify any of our particular products as a source of asbestos exposure. To date, discovery has failed to yield evidence of substantial exposure to any of our products and no judgments have been entered against us.

Other Litigation

Other lawsuits and proceedings or claims, arising from the ordinary course of operations, are also pending or threatened against us.

Available Information

We maintain a website with the address www.wattswater.com. The information contained on our website is not included as a part of, or incorporated by reference into, this Annual Report on Form 10-K. Other than an investor's own internet access charges, we make available free of charge through our website our Annual Report on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, and amendments to these reports, as soon as reasonably practicable after we have electronically filed such material with, or furnished such material to, the Securities and Exchange Commission (SEC).

Executive Officers and Directors

Set forth below in alphabetical order are the names of our executive officers and directors, their respective ages and positions with our Company and a brief summary of their business experience for at least the past five years:

Executive Officers	Age	Position
Robert J. Pagano, Jr.	52	Chief Executive Officer, President and interim Chief Financial Officer
Kenneth R. Lepage	44	General Counsel, Executive Vice President of Human Resources and Secretary
Elie Melhem	51	President, Asia-Pacific
Mario Sanchez	58	President and Group Managing Director, EMEA
A. Suellen Torregrosa	52	President, Americas
Non-Employee Directors		
Robert L. Ayers(2)(3)	69	Director
Bernard Baert(1)(3)	65	Director
Kennett F. Burnes(1)(3)	72	Director
Richard J. Cathcart(2)(3)	70	Director
W. Craig Kissel(2)(3)	64	Chairman of the Board and Director
John K. McGillicuddy(1)(3)	71	Director
Joseph T. Noonan	33	Director
Merilee Raines(1)(3)	59	Director

- (1) Member of the Audit Committee
- (2) Member of the Compensation Committee
- (3) Member of the Nominating and Corporate Governance Committee

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Robert J. Pagano, Jr. has served as Chief Executive Officer and President of our Company since May 2014 and as interim Chief Financial Officer since October 2014. Mr. Pagano previously served as Senior Vice President of ITT Corporation and President, ITT Industrial Process from April 2009 to May 2014. Mr. Pagano originally joined ITT in 1997 and served in several additional management roles during his career at ITT, including as Vice President Finance, Corporate Controller, and President of Industrial Products. ITT Corporation is a diversified manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Prior to joining ITT, Mr. Pagano worked at KPMG LLP. Mr. Pagano is a Certified Public Accountant.

Kenneth R. Lepage has served as General Counsel and Secretary of the Company since August 2008 and as Executive Vice President of Human Resources since December 2009. Mr. Lepage originally joined our Company in September 2003 as Assistant General Counsel and Assistant Secretary. Prior to joining our Company, he was a junior partner at the law firm of Hale and Dorr LLP (now Wilmer Cutler Pickering Hale and Dorr LLP).

Elie Melhem has served as President, Asia-Pacific since July 2011. Mr. Melhem was previously the Managing Director of China for Ariston Thermo Group, a global manufacturer of heating and hot water products, from 2008 to July 2011. Prior to joining Ariston, Mr. Melhem spent eleven years with ITT Industries in China where he held several management positions, including serving as President of ITT's Residential and Commercial Water Group in China and President of ITT's Water Technology Group in Asia.

Mario Sanchez has served as President and Group Managing Director, EMEA since June 2013. Mr. Sanchez originally joined our Company in January 2012 as Vice President of Plumbing and Heating, EMEA. Mr. Sanchez previously served as Vice President of Global Manufacturing for Johnson Controls, Inc. from September 2008 to January 2012. Johnson Controls is a global diversified technology and industrial company providing products, services and solutions to optimize energy and operational efficiencies of buildings; lead-acid automotive batteries and advanced batteries for hybrid and electric vehicles; and interior systems for automobiles. Before joining Johnson Controls, Mr. Sanchez served as Vice President of Global Operations for Tyco International, Ltd. from December 2006 to August 2008. Tyco is a global provider of fire protection and security products and services. Prior to Tyco, Mr. Sanchez held several global management positions with Ingersoll-Rand plc.

A. Suellen Torregrosa has served as President, Americas since August 2013. Ms. Torregrosa previously served as President of Milton Roy Company from November 2011 to June 2013. Milton Roy Company is a global manufacturer of controlled volume (metering) pumps and related equipment. Ms. Torregrosa was appointed President of Milton Roy Company when it was owned by United Technologies Corporation and continued to serve as President through its sale to a private equity group in December 2012. Ms. Torregrosa worked for several business units of United Technologies Corporation from 1990 until the sale of Milton Roy Company in December 2012, including as Vice President and General Manager, Americas of Milton Roy Company from 2006 until November 2011, General Manager, Dynamic Controls of Hamilton Sundstrand Company from 2002 to 2006, and in several management roles of progressive responsibility for Falk Corporation from 1990 to 2002. United Technologies Corporation is a diversified provider of high technology products and services to the building and aerospace industries.

Robert L. Ayers has served as a director of our Company since October 2006. He was Senior Vice President of ITT Industries and President of ITT Industries' Fluid Technology from October 1999 until September 2005. Mr. Ayers continued to be employed by ITT Industries from September 2005 until his retirement in September 2006, during which time he focused on special projects for the company. Mr. Ayers joined ITT Industries in 1998 as President of ITT Industries' Industrial Pump Group. Before joining ITT Industries, he was President of Sulzer Industrial USA and Chief Executive Officer of Sulzer Bingham, a pump manufacturer. Mr. Ayers served as a director of T-3 Energy Services, Inc. from August 2007 to January 2011.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Bernard Baert has served as a director of our Company since August 2011. Mr. Baert served as Senior Vice President and President, Europe and International of PolyOne Corporation from January 2010 until his retirement in April 2012. Mr. Baert served as Senior Vice President and General Manager, Color and Engineered Materials Europe and China for PolyOne Corporation from 2006 to December 2009 and as Vice President and General Manager, Color and Engineered Materials Europe and China from 2000 to 2006. From 1995 to September 2000, Mr. Baert was General Manager, Color Europe for M.A. Hanna Company, the predecessor to PolyOne Corporation. PolyOne Corporation is a worldwide provider of specialty polymer materials, services and solutions. Prior to joining M.A. Hanna, Mr. Baert was General Manager, Europe for Hexcel Corporation and spent 17 years with Owens Corning where he served as a plant manager and held various positions in the areas of cost control and production.

Kennett F. Burnes has served as a director of our Company since February 2009. Mr. Burnes is the retired Chairman, President and Chief Executive Officer of Cabot Corporation, a global specialty chemicals company. He was Chairman from 2001 to March 2008, President from 1995 to January 2008 and Chief Executive Officer from 2001 to January 2008. Prior to joining Cabot Corporation in 1987, Mr. Burnes was a partner at the Boston-based law firm of Choate, Hall & Stewart, where he specialized in corporate and business law for nearly 20 years. He is a director of State Street Corporation, a leading provider of financial services to institutional investors. Mr. Burnes is also a member of the Dana Farber Cancer Institute's Board of Trustees and a board member of the New England Conservatory. Mr. Burnes is also Chairman of the Board of Trustees of the Schepens Eye Research Institute.

Richard J. Cathcart has served as a director of our Company since October 2007. He was Vice Chairman and a member of the Board of Directors of Pentair, Inc. from February 2005 until his retirement in September 2007. Pentair is a diversified manufacturing company consisting of two operating segments: Water Technologies and Technical Products. He was appointed President and Chief Operating Officer of Pentair's Water Technologies Group in January 2001 and served in that capacity until his appointment as Vice Chairman in February 2005. He began his career at Pentair in March 1995 as Executive Vice President, Corporate Development, where he identified water as a strategic area of growth. In February 1996, he was named Executive Vice President and President of Pentair's Water Technologies Group. Prior to joining Pentair, he held several management and business development positions during his 20-year career with Honeywell International Inc. He is a director of Fluidra S.A., an international manufacturer of accessories and products for swimming pools, irrigation, and water treatment and purification systems.

W. Craig Kissel has served as a director of our Company since November 2011. Mr. Kissel previously was employed by American Standard Companies Inc. from 1980 until his retirement in September, 2008. American Standard was a leading worldwide supplier of air conditioning and heating systems, vehicle control systems, and bathroom china and faucet-ware. During his time at American Standard, Mr. Kissel served as President of Trane Commercial Systems from 2004 to June, 2008, President of WABCO Vehicle Control Systems from 1998 to 2003, President of the Trane North American Unitary Products Group from 1994 to 1997, Vice President of Trane Marketing of the North American Unitary Products Group from 1992 to 1994 and he held various other management positions at Trane from 1980 to 1991. From 2001 to 2008, Mr. Kissel served as Chairman of American Standard's Corporate Ethics and Integrity Council, which was responsible for developing the company's ethical business standards. Mr. Kissel also served in the U.S. Navy from 1973 to 1978. Mr. Kissel has served as a director of Chicago Bridge & Iron Company since May 2009. Chicago Bridge & Iron Company engineers and constructs some of the world's largest energy infrastructure projects.

John K. McGillicuddy has served as a director of our Company since 2003. He was employed by KPMG LLP, a public accounting firm, from 1965 until his retirement in 2000. He was elected into the Partnership at KPMG LLP in June 1975 where he served as Audit Partner, SEC Reviewing Partner, Partner-in-Charge of Professional Practice, Partner-in-Charge of College Recruiting and Partner-in-Charge of Staff Scheduling. He is a director of Brooks Automation, Inc., a worldwide

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

provider of automation, vacuum and instrumentation solutions to the semiconductor and related industries, and Cabot Corporation, a manufacturer of specialty chemicals and performance materials.

Joseph T. Noonan has served as a director of our Company since May 2013. Mr. Noonan has served as Chief Executive Officer of Homespun Design, Inc. since November 2013. Homespun Design is a start-up phase online retailer of American-made furniture and design founded by Mr. Noonan. Mr. Noonan previously worked as an independent digital strategy consultant from November 2012 to November 2013. Mr. Noonan was employed by Wayfair LLC from April 2008 to November 2012. During his time at Wayfair, Mr. Noonan served as Senior Director of Wayfair International from June 2011 to November 2012, Director of Category Management and Merchandising from February 2009 to June 2011 and Manager of Wayfair's Business-to-Business Division from April 2008 to February 2009. Wayfair is an online retailer of home furnishings, décor and home improvement products. Prior to joining Wayfair, Mr. Noonan worked as a venture capitalist at Polaris Partners and as an investment banker at Cowen & Company.

Merilee Raines has served as a director of our Company since February 2011. Ms. Raines served as Chief Financial Officer of IDEXX Laboratories, Inc. from October 2003 until her retirement in May 2013. Prior to becoming Chief Financial Officer, Ms. Raines held several management positions with IDEXX Laboratories, including Corporate Vice President of Finance, Vice President and Treasurer of Finance, Director of Finance, and Controller. IDEXX Laboratories develops, manufactures and distributes diagnostic and information technology-based products and services for companion animals, livestock, poultry, water quality and food safety, and human point-of-care diagnostics. Ms. Raines is a director of Aratana Therapeutics, Inc., a pet therapies company focused on the licensing or acquisition, development and commercialization of innovative biopharmaceutical products for cats, dogs and other companion animals. Ms. Raines is also a director of Affymetrix, Inc., a provider of life science and molecular diagnostic products that enable analysis of biological systems at the gene, protein and cell level.

Item 1A. RISK FACTORS.

Economic cycles, particularly those involving reduced levels of commercial and residential starts and remodeling, may have adverse effects on our revenues and operating results.

We have experienced and expect to continue to experience fluctuations in revenues and operating results due to economic and business cycles. The businesses of most of our customers, particularly plumbing and heating wholesalers and home improvement retailers, are cyclical. Therefore, the level of our business activity has been cyclical, fluctuating with economic cycles. An economic downturn may also affect the financial stability of our customers, which could affect their ability to pay amounts owed to their vendors, including us. We also believe our level of business activity is influenced by commercial and residential starts and renovation and remodeling, which are, in turn, heavily influenced by interest rates, consumer debt levels, changes in disposable income, employment growth and consumer confidence. Credit market conditions may prevent commercial and residential builders or developers from obtaining the necessary capital to continue existing projects or to start new projects. This may result in the delay or cancellation of orders from our customers or potential customers and may adversely affect our revenues and our ability to manage inventory levels, collect customer receivables and maintain profitability. If economic conditions worsen in the future or if economic recovery were to dissipate, our revenues and profits could decrease or trigger additional goodwill, indefinite-lived intangible assets, or long-lived asset impairments and could have a material effect on our financial condition and results of operations.

We face intense competition and, if we are not able to respond to competition in our markets, our revenues may decrease.

Competitive pressures in our markets could adversely affect our competitive position, leading to a possible loss of market share or a decrease in prices, either of which could result in decreased revenues and profits. We encounter intense competition in all areas of our business. Additionally, we believe our customers are attempting to reduce the number of vendors from which they purchase in order to reduce the size and diversity of their inventories and their transaction costs. To remain competitive, we will need to invest continually in manufacturing, product development, marketing, customer service and support and our distribution networks. We may not have sufficient resources to continue to make such investments and we may be unable to maintain our competitive position. In addition, we anticipate that we may have to reduce the prices of some of our products to stay competitive, potentially resulting in a reduction in the profit margin for, and inventory valuation of, these products. Some of our competitors are based in foreign countries and have cost structures and prices in foreign currencies. Accordingly, currency fluctuations could cause our U.S. dollar costed products to be less competitive than our competitors' products costed in other currencies.

Changes in the costs of raw materials could reduce our profit margins. Reductions or interruptions in the supply of components or finished goods from international sources could adversely affect our ability to meet our customer delivery commitments.

We require substantial amounts of raw materials, including bronze, brass, cast iron, stainless steel and plastic, and substantially all of the raw materials we require are purchased from outside sources. The costs of raw materials may be subject to change due to, among other things, interruptions in production by suppliers and changes in exchange rates and worldwide price and demand levels. We typically do not enter into long-term supply agreements. Our inability to obtain supplies of raw materials for our products at favorable costs could have a material adverse effect on our business, financial condition or results of operations by decreasing our profit margins. The commodity markets have experienced tremendous volatility over the past several years, particularly copper. Should commodity costs increase substantially, we may not be able to recover such costs, through selling price increases to our customers or other product cost reductions, which would have a negative effect on our financial results. If commodity costs decline, we may experience pressure from customers to reduce our selling prices. Additionally, we continue to purchase increased levels of components and finished goods

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

from international sources. In limited cases, these components or finished goods are single-sourced. The availability of components and finished goods from international sources could be adversely impacted by, among other things, interruptions in production by suppliers, suppliers' allocations to other purchasers and new laws or regulations.

Government regulations could limit or delay our ability to market or sell our products and could affect raw material sourcing and/or increase our costs.

Effective January 4, 2014, the *Reduction of Lead in Drinking Water Act* reduced the permissible weighted average lead content in faucets, fittings and valves used in potable water applications from 8% to 0.25% throughout the United States. Complying with this new requirement throughout the United States was a significant challenge for us. The nationwide requirement caused our material costs to increase as suppliers of alternative lead free metals are currently limited and lead free alloy substitutes are more expensive than the original leaded alloys. We have and may continue to experience technical challenges in our lead free manufacturing operations. In addition, we could have difficulty providing sufficient quantities of our lead free compliant products to meet nationwide demand. The requirement could have a material effect on our financial condition and results of operation.

Implementation of our acquisition strategy may not be successful, which could affect our ability to increase our revenues or our profitability.

One of our strategies is to increase our revenues and profitability and expand our business through acquisitions that will provide us with complementary products and increase market share for our existing product lines. We cannot be certain that we will be able to identify, acquire or profitably manage additional companies or successfully integrate such additional companies without substantial costs, delays or other problems. Also, companies acquired recently and in the future may not achieve anticipated revenues, cost synergies, profitability or cash flows that justify our investment in them. We have faced increasing competition for acquisition candidates, which has resulted in significant increases in the purchase prices of many acquisition candidates. This competition, and the resulting purchase price increases, may limit the number of acquisition opportunities available to us, possibly leading to a decrease in the rate of growth of our revenues and profitability. In addition, acquisitions may involve a number of risks, including, but not limited to:

inadequate internal controls over financial reporting and our ability to bring such controls into compliance with the requirements of Section 404 of the Sarbanes-Oxley Act of 2002 in a timely manner;

adverse short-term effects on our reported operating results;

diversion of management's attention;

investigations of, or challenges to, acquisitions by competition authorities;

loss of key personnel at acquired companies;

unanticipated management or operational problems or legal liabilities; and

potential goodwill, indefinite-lived intangible assets, or long-lived asset impairment charges.

We are subject to risks related to product defects, which could result in product recalls and could subject us to warranty claims in excess of our warranty provisions or which are greater than anticipated due to the unenforceability of liability limitations.

We maintain strict quality controls and procedures, including the testing of raw materials and safety testing of selected finished products. However, we cannot be certain that our testing will reveal latent defects in our products or the materials from which they are made, which may not become apparent until after the products have been sold into the market. We also cannot be certain that our suppliers will always eliminate latent defects in products we purchase from them. Accordingly, there is

a risk that product defects will occur, which could require a product recall. Product recalls can be expensive to implement and, if a product recall occurs during the product's warranty period, we may be required to replace the defective product. In addition, a product recall may damage our relationship with our customers and we may lose market share with our customers. Our insurance policies may not cover the costs of a product recall.

Our standard warranties contain limits on damages and exclusions of liability for consequential damages and for misuse, improper installation, alteration, accident or mishandling while in the possession of someone other than us. We may incur additional operating expenses if our warranty provision does not reflect the actual cost of resolving issues related to defects in our products. If these additional expenses are significant, it could adversely affect our business, financial condition and results of operations.

We face risks from product liability and other lawsuits, which may adversely affect our business.

We have been and expect to continue to be subject to various product liability claims or other lawsuits, including, among others, that our products include inadequate or improper instructions for use or installation, inadequate warnings concerning the effects of the failure of our products, alleged manufacturing or design defects, or allegations that our products contained asbestos. If we do not have adequate insurance or contractual indemnification, damages from these claims would have to be paid from our assets and could have a material adverse effect on our results of operations, liquidity and financial condition. Like other manufacturers and distributors of products designed to control and regulate fluids and gases, we face an inherent risk of exposure to product liability claims and other lawsuits in the event that the use of our products results in personal injury, property damage or business interruption to our customers. We cannot be certain that our products will be completely free from defect. In addition, in certain cases, we rely on third-party manufacturers for our products or components of our products. We cannot be certain that our insurance coverage will continue to be available to us at a reasonable cost, or, if available, will be adequate to cover any such liabilities. For more information, see "Item 1. Business Product Liability, Environmental and Other Litigation Matters."

Economic and other risks associated with international sales and operations could adversely affect our business and future operating results.

Since we sell and manufacture our products worldwide, our business is subject to risks associated with doing business internationally. Our business and future operating results could be harmed by a variety of factors, including:

unexpected geo-political events in foreign countries in which we operate, which could adversely affect manufacturing and our ability to fulfill customer orders;

our inability to comply with anti-corruption laws and regulations of the U.S. government and various international jurisdictions, such as the U.S. Foreign Corrupt Practices Act and the United Kingdom's Bribery Act of 2010;

trade protection measures and import or export licensing requirements, which could increase our costs of doing business internationally;

potentially negative consequences from changes in tax laws, which could have an adverse impact on our profits;

difficulty in staffing and managing widespread operations, which could reduce our productivity;

costs of compliance with differing labor regulations, especially in connection with restructuring our overseas operations;

laws of some foreign countries, which may not protect our intellectual property rights to the same extent as the laws of the United States;

unexpected changes in regulatory requirements, which may be costly and require time to implement; and

foreign exchange rate fluctuations, which could also materially affect our reported results. A portion of our sales and certain portions of our costs, assets and liabilities are denominated in currencies other than U.S. dollars, and the percentage of our revenues denominated in a particular currency may not match the percentage of our expenses denominated in that currency. Approximately 43.9% of our sales during the year ended December 31, 2014 were from sales outside of the U.S. compared to 46.5% for the year ended December 31, 2013. We cannot predict whether currencies such as the euro, Canadian dollar or Chinese yuan will appreciate or depreciate against the U.S. dollar in future periods or whether future foreign exchange rate fluctuations will have a positive or negative impact on our reported results.

Our ability to achieve savings through our restructuring and business transformation activities may be adversely affected by management's ability to fully execute the plans as a result of local regulations, geo-political risk or other factors within or beyond the control of management.

We have implemented a number of restructuring and business transformation activities, which include steps that we believe are necessary to enhance the value and performance of the Company, including reducing operating costs and increasing efficiencies throughout our manufacturing, sales and distribution footprint. Factors within or beyond the control of management may change the total estimated costs or the timing of when the savings will be achieved under the plans. Further, if we are not successful in completing the restructuring or business transformation activities timely or if additional or unanticipated issues such as labor disruptions or higher exit costs arise, our expected cost savings may not be met and our operating results could be negatively affected. In addition, our restructuring and transformation activities may place substantial demands on our management, which could lead to diversion of management's attention from other business priorities and result in a reduced customer focus.

Future operating results could be negatively affected by the resolution of various uncertain tax positions and by potential changes to tax incentives.

In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. Significant judgment is required in determining our worldwide provision for income taxes. We periodically assess our exposures related to our worldwide provision for income taxes and believe that we have appropriately accrued taxes for contingencies. Any reduction of these contingent liabilities or additional assessment would increase or decrease income, respectively, in the period such determination was made. Our income tax filings are regularly under audit by tax authorities and the final determination of tax audits could be materially different than that which is reflected in historical income tax provisions and accruals. As issues arise during tax audits we adjust our tax accrual accordingly. Additionally, we benefit from certain tax incentives offered by various jurisdictions. If we are unable to meet the requirements of such incentives, our inability to use these benefits could have a material negative effect on future earnings.

We are currently a decentralized company, which presents certain risks.

We are currently a decentralized company, which sometimes places significant control and decision-making powers in the hands of local management. This presents various risks such as the risk of being slower to identify or react to problems affecting a key business. Additionally, we are implementing in a phased approach a company-wide initiative to standardize and upgrade our enterprise resource planning (ERP) systems. This initiative could be more challenging and costly to implement because divergent legacy systems currently exist. Further, if the ERP updates are not successful, we could incur substantial business interruption, including our ability to perform routine business transactions, which could have a material adverse effect on our financial results.

Our business and financial performance may be adversely affected by information technology and other business disruptions.

Our business may be impacted by disruptions, including information technology attacks or failures, threats to physical security, as well as damaging weather or other acts of nature, pandemics or other public health crises. Cyber security attacks, in particular, are evolving and include, but are not limited to, malicious software, attempts to gain unauthorized access to data, and other electronic security breaches that could lead to disruptions in systems, unauthorized release of confidential or otherwise protected information and corruption of data. We have experienced cyber security attacks and may continue to experience them going forward, potentially with more frequency. Given the unpredictability of the timing, nature and scope of such disruptions, we could potentially be subject to production downtimes, operational delays, other detrimental impacts on our operations or ability to provide products to our customers, the compromising of confidential or otherwise protected information, misappropriation, destruction or corruption of data, security breaches, other manipulation or improper use of our systems or networks, financial losses from remedial actions, loss of business or potential liability, and/or damage to our reputation, any of which could have a material adverse effect on our competitive position, results of operations, cash flows or financial condition.

The requirements to evaluate goodwill, indefinite-lived intangible assets and long-lived assets for impairment may result in a write-off of all or a portion of our recorded amounts, which would negatively affect our operating results and financial condition.

As of December 31, 2014, our balance sheet included goodwill, indefinite-lived intangible assets, amortizable intangible assets and property, plant and equipment of \$639.0 million, \$38.6 million, \$171.5 million and \$203.3 million, respectively. In lieu of amortization, we are required to perform an annual impairment review of both goodwill and indefinite-lived intangible assets. In performing our annual reviews in 2014, 2013 and 2012, we recognized pre-tax non-cash indefinite-lived intangible asset impairment charges of approximately \$1.3 million, \$0.7 million and \$0.4 million, respectively. In 2014, 2013 and 2012, we recognized pre-tax non-cash goodwill impairment charges of \$12.9 million, \$0.3 million and \$1.0 million, respectively. The \$12.9 million charge related to a full impairment within the Asia-Pacific reporting unit as of December 31, 2014. The charges in 2013 and 2012 related to Blue Ridge Atlantic Enterprises, Inc. (BRAE) and the goodwill balance was fully impaired in 2013.

We are also required to perform an impairment review of our long-lived assets if indicators of impairment exist. There were no impairments recognized in 2014. In 2013 and 2012, we recognized a pre-tax non-cash charge of \$1.3 million and \$1.6 million, respectively. There can be no assurances that future goodwill, indefinite-lived intangible assets or other long-lived asset impairments will not occur. We perform our annual test for indications of goodwill and indefinite-lived intangible assets impairment in the fourth quarter of our fiscal year or sooner if indicators of impairment exist.

The loss or financial instability of major customers could have an adverse effect on our results of operations.

In 2014, our top ten customers accounted for approximately 25% of our total net sales with no one customer accounting for more than 10% of our total net sales. Our customers generally are not obligated to purchase any minimum volume of products from us and are able to terminate their relationships with us at any time. In addition, increases in the prices of our products could result in a reduction in orders from our customers. A significant reduction in orders from, or change in terms of contracts with, any significant customers could have a material adverse effect on our future results of operations. Furthermore, some of our major customers are facing financial challenges due to market declines and heavy debt levels; should these challenges become acute, our results could be materially adversely affected due to reduced orders and/or payment delays or defaults.

Certain indebtedness may limit our ability to pay dividends, incur additional debt and make acquisitions and other investments.

Our revolving credit facility and other senior indebtedness contain operational and financial covenants that restrict our ability to make distributions to stockholders, incur additional debt and make acquisitions and other investments unless we satisfy certain financial tests and comply with various financial ratios. If we do not maintain compliance with these covenants, our creditors could declare a default under our revolving credit facility or senior notes and our indebtedness could be declared immediately due and payable. Our ability to comply with the provisions of our indebtedness may be affected by changes in economic or business conditions beyond our control. Further, one of our strategies is to increase our revenues and profitability and expand our business through acquisitions. We may require capital in excess of our available cash and the unused portion of our revolving credit facility to make large acquisitions, which we would generally obtain from access to the credit markets. There can be no assurance that if a large acquisition is identified that we would have access to sufficient capital to complete such acquisition. Should we require additional debt financing above our existing credit limit, we cannot be assured such financing would be available to us or available to us on reasonable economic terms.

One of our stockholders can exercise substantial influence over our Company.

Our Class B common stock entitles its holders to ten votes for each share and our Class A common stock entitles its holders to one vote per share. As of January 30, 2015, Timothy P. Horne beneficially owned approximately 18.4% of our outstanding shares of Class A common stock (assuming conversion of all shares of Class B common stock beneficially owned by Mr. Horne into Class A common stock) and approximately 99.2% of our outstanding shares of Class B common stock, which represents approximately 69.0% of the total outstanding voting power. As long as Mr. Horne controls shares representing at least a majority of the total voting power of our outstanding stock, Mr. Horne will be able to unilaterally determine the outcome of most stockholder votes, and other stockholders will not be able to affect the outcome of any such votes.

Conversion and sale of a significant number of shares of our Class B common stock could adversely affect the market price of our Class A common stock.

As of January 30, 2015, there were outstanding 28,507,519 shares of our Class A common stock and 6,479,290 shares of our Class B common stock. Shares of our Class B common stock may be converted into Class A common stock at any time on a one for one basis. Under the terms of a registration rights agreement with respect to outstanding shares of our Class B common stock, the holders of our Class B common stock have rights with respect to the registration of the underlying Class A common stock. Under these registration rights, the holders of Class B common stock may require, on up to two occasions that we register their shares for public resale. If we are eligible to use Form S-3 or a similar short-form registration statement, the holders of Class B common stock may require that we register their shares for public resale up to two times per year. If we elect to register any shares of Class A common stock for any public offering, the holders of Class B common stock are entitled to include shares of Class A common stock into which such shares of Class B common stock may be converted in such registration. However, we may reduce the number of shares proposed to be registered in view of market conditions. We will pay all expenses in connection with any registration, other than underwriting discounts and commissions. If all of the available registered shares are sold into the public market the trading price of our Class A common stock could decline.

Item 1B. UNRESOLVED STAFF COMMENTS.

None.

Item 2. PROPERTIES.

As of December 31, 2014, we maintained 33 principal manufacturing, warehouse and distribution centers worldwide, including our corporate headquarters located in North Andover, Massachusetts. Additionally, we maintain numerous sales offices and other smaller manufacturing facilities and warehouses. The principal properties in each of our three geographic segments and their location, principal use and ownership status are set forth below:

Americas:

Location	Principal Use	Owned/Leased
North Andover, MA	Corporate Headquarters	Owned
Burlington, ON, Canada	Distribution Center	Owned
Chesnee, SC	Manufacturing	Owned
Export, PA	Manufacturing	Owned
Franklin, NH	Manufacturing/Distribution	Owned
Kansas City, KS	Manufacturing	Owned
St. Pauls, NC	Manufacturing	Owned
San Antonio, TX	Warehouse/Distribution	Owned
Spindale, NC	Distribution Center	Owned
Blauvelt, NY	Manufacturing/Distribution	Leased
Kansas City, MO	Manufacturing/Distribution	Leased
Peoria, AZ	Manufacturing/Distribution	Leased
Reno, NV	Distribution Center	Leased
Springfield, MO	Manufacturing/Distribution	Leased
Vernon, BC, Canada	Manufacturing/Distribution	Leased
Woodland, CA	Manufacturing	Leased

Europe, Middle East and Africa:

Location	Principal Use	Owned/Leased
Amsterdam, Netherlands	EMEA Headquarters	Leased
Biassono, Italy	Manufacturing/Distribution	Owned
Hautvillers, France	Manufacturing	Owned
Landau, Germany	Manufacturing/Distribution	Owned
Mery, France	Manufacturing	Owned
Plovdiv, Bulgaria	Manufacturing	Owned
Vilbjerg, Denmark	Manufacturing/Distribution	Owned
Virey-le-Grand, France	Manufacturing/Distribution	Owned
Gardolo, Italy	Manufacturing	Leased
Monastir, Tunisia	Manufacturing	Leased
Rosières, France	Manufacturing/Distribution	Leased
St. Neots, United Kingdom	Manufacturing/Distribution	Leased
Sorgues, France	Distribution Center	Leased

Asia-Pacific:

Location	Principal Use	Owned/Leased
Shanghai, China	Asia-Pacific Headquarters	Leased
Ningbo, Beilun District, China	Distribution Center	Leased
Ningbo, Beilun, China	Manufacturing	Owned
Taizhou, Yuhuan, China	Manufacturing	Owned

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Certain of our facilities are subject to mortgages and collateral assignments under loan agreements with long-term lenders. In general, we believe that our properties, including machinery, tools and equipment, are in good condition, well maintained and adequate and suitable for their intended uses.

Item 3. LEGAL PROCEEDINGS.

We are from time to time involved in various legal and administrative proceedings. See Item 1. "Business Product Liability, Environmental and Other Litigation Matters," and Note 14 of the Notes to Consolidated Financial Statements, both of which are incorporated herein by reference.

Item 4. MINE SAFETY DISCLOSURES.

Not applicable.

PART II**Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.**

The following table sets forth the high and low sales prices of our Class A common stock on the New York Stock Exchange during 2014 and 2013 and cash dividends declared per share.

	2014			2013		
	High	Low	Dividend	High	Low	Dividend
First Quarter	\$ 62.38	\$ 52.66	\$ 0.13	\$ 50.04	\$ 42.63	\$ 0.11
Second Quarter	62.43	51.71	0.15	48.32	43.12	0.13
Third Quarter	65.84	56.84	0.15	58.18	45.73	0.13
Fourth Quarter	65.16	53.80	0.15	62.66	52.33	0.13

There is no established public trading market for our Class B common stock, which is held by members of the Horne family. The principal holders of such stock are subject to restrictions on transfer with respect to their shares. Each share of our Class B common stock (10 votes per share) is convertible into one share of Class A common stock (1 vote per share).

On February 12, 2015, we declared a quarterly dividend of fifteen cents (\$0.15) per share on each outstanding share of Class A common stock and Class B common stock.

Aggregate common stock dividend payments in 2014 were \$20.5 million, which consisted of \$16.7 million and \$3.8 million for Class A shares and Class B shares, respectively. Aggregate common stock dividend payments in 2013 were \$17.7 million, which consisted of \$14.4 million and \$3.3 million for Class A shares and Class B shares, respectively. While we presently intend to continue to pay comparable cash dividends, the payment of future cash dividends depends upon the Board of Directors' assessment of our earnings, financial condition, capital requirements and other factors.

The number of record holders of our Class A common stock as of January 30, 2015 was 179. The number of record holders of our Class B common stock as of January 30, 2015 was 8.

We satisfy the minimum withholding tax obligation due upon the vesting of shares of restricted stock and the conversion of restricted stock units into shares of Class A common stock by automatically withholding from the shares being issued a number of shares with an aggregate fair market value on the date of such vesting or conversion that would satisfy the withholding amount due.

The following table includes information with respect to shares of our Class A common stock withheld to satisfy withholding tax obligations during the quarter ended December 31, 2014.

Period	(a) Total		(b) Average	(c) Total		(d) Maximum

- (1) On April 30, 2013, the Board of Directors authorized a stock repurchase program of up to \$90 million of the Company's Class A common stock to be purchased from time to time on the open market or in privately negotiated transactions. The timing and number of any shares repurchased will be determined by the Company's management based on its evaluation of market conditions.

Performance Graph

Set forth below is a line graph comparing the cumulative total shareholder return on our Class A common stock for the last five years with the cumulative return of companies on the Standard & Poor's 500 Stock Index and the Russell 2000 Index. We chose the Russell 2000 Index because it represents companies with a market capitalization similar to that of Watts Water. The graph assumes that the

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

value of the investment in our Class A common stock and each index was \$100 at December 31, 2009 and that all dividends were reinvested.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Among Watts Water Technologies, Inc., the S&P 500 Index,
and the Russell 2000 Index

*

\$100 invested on 12/31/09 in stock or index, including reinvestment of dividends. Fiscal year ending December 31.

Cumulative Total Return

	12/31/09	12/31/10	12/31/11	12/31/12	12/31/13	12/31/14
Watts Water Technologies, Inc	100.00	120.01	113.70	144.59	210.13	217.60
S & P 500	100.00	115.06	117.49	136.3	180.44	205.14
Russell 2000	100.00	126.86	121.56	141.43	196.34	205.95

The above Performance Graph and related information shall not be deemed "soliciting material" or to be "filed" with the Securities and Exchange Commission, nor shall such information be incorporated by reference into any future filing under the Securities Act of 1933 or Securities Exchange Act of 1934, each as amended, except to the extent that we specifically incorporate it by reference into such filing.

Item 6. SELECTED FINANCIAL DATA.

The selected financial data set forth below should be read in conjunction with our consolidated financial statements, related Notes thereto and "Management's Discussion and Analysis of Financial Condition and Results of Operations" included herein.

FIVE-YEAR FINANCIAL SUMMARY

(Amounts in millions, except per share and cash dividend information)

	Year Ended 12/31/14(1)	Year Ended 12/31/13(2)(6)	Year Ended 12/31/12(3)(6)	Year Ended 12/31/11(4)(6)	Year Ended 12/31/10(5)(6)
Statement of operations data:					
Net sales	\$ 1,513.7	\$ 1,473.5	\$ 1,427.4	\$ 1,407.4	\$ 1,264.0
Net income from continuing operations	50.3	60.9	70.4	77.2	64.1
Loss from discontinued operations, net of taxes		(2.3)	(2.0)	(10.8)	(5.3)
Net income	50.3	58.6	68.4	66.4	58.5
DILUTED EPS					
Income (loss) per share:					
Continuing operations	1.42	1.71	1.95	2.06	1.71
Discontinued operations		(0.07)	(0.05)	(0.28)	(0.14)
NET INCOME	1.42	1.65	1.90	1.78	1.57
Cash dividends declared per common share	\$ 0.58	\$ 0.50	\$ 0.44	\$ 0.44	\$ 0.44
Balance sheet data (at year end):					
Total assets	\$ 1,948.0	\$ 1,740.2	\$ 1,709.0	\$ 1,694.0	\$ 1,646.1
Long-term debt, net of current portion	577.8	305.5	307.5	397.4	378.0

- (1) For the year ended December 31, 2014, net income from continuing operations includes the following net pre-tax costs: goodwill and other long-lived asset impairment of \$14.2 million, acquisitions related costs of \$5.8 million, restructuring and severance related costs of \$16.4 million, EMEA and Americas transformation deployment costs of \$9.3 million, and customs settlements costs of \$1.9 million. The net after-tax cost of these items was \$38.5 million.
- (2) For the year ended December 31, 2013, net income from continuing operations includes the following net pre-tax costs: legal costs of \$15.3 million, restructuring charges of \$8.7 million, goodwill and other long-lived asset impairment of \$2.3 million (of which \$1.1 million is recorded in cost of goods sold), EMEA transformation deployment costs of \$1.2 million, earn-out adjustments of \$0.9 million, acceleration of executive share based compensation expense of \$0.9 million and an adjustment to the disposal of the business related to the sale of Tianjin Watts Valve Company Ltd. (TWVC) of \$0.6 million. The net after-tax cost of these items was \$18.3 million.
- (3) For the year ended December 31, 2012, net income from continuing operations includes the following net pre-tax costs: restructuring charges of \$5.2 million, goodwill and other long-lived asset impairment of \$3.4 million, net legal and customs costs of \$2.5 million, an adjustment to the gain on sale of TWVC of \$1.6 million, retention charges related to our former Chief Financial Officer of \$1.6 million, and a charge of \$0.4 million for costs related to the 2012 acquisition of tekmar, offset by a pre-tax gain for an earn-out adjustment of \$1.0 million. Additionally, net income includes tax benefits totaling \$0.7 million, primarily related to a tax law change in Italy. The net after-tax cost of these items was \$8.1 million.
- (4) For the year ended December 31, 2011, net income from continuing operations includes the following net pre-tax costs: restructuring charges of \$10.0 million, goodwill and other long-lived asset impairment charges of \$2.6 million, pension curtailment charges of \$1.5 million, separation costs related to our former Chief Executive Officer of \$6.3 million, and costs related to our acquisition of Danfoss Socla S.A.S (Socla) in France of \$5.8 million offset by pre-tax gains of \$1.2 million for an earn-out adjustment, \$7.7 million related to the sale of TWVC in China and \$1.1 million from legal settlements. Additionally, net income includes a tax benefit of \$4.2 million relating to the sale of TWVC offset by a \$1.1 million tax charge in EMEA related to our France restructuring. The net after-tax cost of these items was \$5.7 million. Included in loss from

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

discontinued operations is goodwill and other long-lived asset impairment charges of \$14.8 million related to Austroflex, see (6).

- (5) For the year ended December 31, 2010, net income from continuing operations includes the following net pre-tax costs: restructuring charges of \$14.1 million, intangible impairment charges of \$1.4 million, and costs related to acquisitions and other items of \$7.1 million offset by pre-tax gains of \$4.5 million primarily for product liability and workers compensation accrual adjustments. Additionally, net income includes a tax benefit of \$4.3 million related to the release of a valuation allowance in EMEA offset by a tax charge of \$1.5 million relating to the repatriation of earnings recognized upon our decision to dispose of a China subsidiary. The net after-tax cost of these items was \$10.3 million.
- (6) In August 2013, we disposed of 100% of the stock of Austroflex. Results from operations and a loss on disposal are recorded in discontinued operations for 2013, 2012, 2011 and 2010. In December 2012, we disposed 100% of the stock of Flomatic Corporation. Results from operations and a loss on disposal are recorded in discontinued operations for 2012 and 2011. In January 2010, we disposed of our investment in CWV. Results from operation and estimated loss on disposal are included net of tax for CWV in discontinued operations for 2010. In May 2009, the Company liquidated its TEAM Precision Pipework, Ltd. (TEAM) business. Results from operation and loss on disposal are included net of tax from the deconsolidation of TEAM in discontinued operations for 2011 and 2010. In September 1996, we divested our Municipal Water Group of businesses, which included Henry Pratt, James Jones Company and Edward Barber and Company Ltd. Costs and expenses related to the Municipal Water Group, for 2011 and 2010 relate to legal and settlement costs associated with the James Jones Litigation and other miscellaneous costs. Discontinued operating loss for 2011 and 2010 include an estimated settlement reserve adjustment in connection with the FCPA investigation at CWV and in 2010, includes legal costs associated with the FCPA investigation.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Overview

We are a leading supplier of products that improve the quality, conservation, safety, and control of water in markets in both the Americas and EMEA with a growing presence in Asia-Pacific. For over 140 years, we have designed and manufactured products that promote the comfort and safety of people and the quality and conservation of water used in commercial, residential and industrial applications. We earn revenue and income almost exclusively from the sale of our products. Our principal product lines include:

Residential & commercial flow control products includes products typically sold into plumbing and hot water applications such as backflow preventers, water pressure regulators, temperature and pressure relief valves, and thermostatic mixing valves.

HVAC & gas products includes hydronic and electric heating systems for under-floor radiant applications, commercial high-efficiency boilers, water heaters and heating solutions, custom heat and hot water solutions, hydronic pump groups for boiler manufacturers and alternative energy control packages, and flexible stainless steel connectors for natural and liquid propane gas in commercial food service and residential applications. HVAC is an acronym for heating, ventilation and air conditioning.

Drainage & water re-use products includes drainage products and engineered rain water harvesting solutions for commercial, industrial, marine and residential applications.

Water quality products includes point-of-use and point-of-entry water filtration, conditioning and scale prevention systems for both commercial and residential applications.

Our business is reported in three geographic segments: Americas, EMEA and Asia-Pacific. We distribute our products through three primary distribution channels: wholesale, original equipment manufacturers (OEMs) and do-it-yourself (DIY).

We believe that the factors relating to our future growth include our ability to continue to make selective acquisitions, both in our core markets as well as in new complementary markets; regulatory requirements relating to the quality and conservation of water and the safe use of water; increased demand for clean water; continued enforcement of plumbing and building codes; and a healthy economic environment. We have completed 37 acquisitions since 1999. Our acquisition strategy focuses on businesses that manufacture preferred brand name products that address our themes of water quality, water conservation, water safety and water flow control and related complementary markets. We target businesses that will provide us with one or more of the following: an entry into new markets, an increase in shelf space with existing customers, a new or improved technology or an expansion of the breadth of our water quality, water conservation, water safety and water flow control products for the commercial, industrial and residential markets.

Products representing a majority of our sales are subject to regulatory standards and code enforcement, which typically require that these products meet stringent performance criteria. Together with our commissioned manufacturers' representatives, we have consistently advocated for the development and enforcement of such plumbing codes. We are focused on maintaining stringent quality control and testing procedures at each of our manufacturing facilities in order to manufacture products in compliance with code requirements and take advantage of the resulting demand for compliant products. We believe that the product development, product testing capability and investment in plant and equipment needed to manufacture products in compliance with code requirements, represent a competitive advantage for us.

In 2014 we experienced positive results in certain areas of our business and continued challenges in others. This divergent performance was driven by different economic and business dynamics within each region in which we participate. In the Americas, we saw continued volume growth compared to

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

2013 as the U.S. residential construction marketplace continued to improve, the repair and replace end market remained strong, and the commercial market experienced moderate growth. In EMEA, the overall markets declined, especially during the second half of the year, which negatively impacted our sales. Our businesses in Italy, France and Germany were negatively impacted by weaker markets. Our ongoing transformation program in EMEA and various restructuring initiatives resulted in productivity efficiencies and cost reductions that partially mitigated the effect of the struggling Eurozone economy. In Asia-Pacific, we had solid growth as we expanded our sales and marketing efforts within the region.

Overall, sales grew organically by 2.6% as compared to 2013. Organic sales growth excludes the impacts of acquisitions, divestitures and foreign exchange from year-over-year comparisons. We believe this provides investors with a more complete understanding of underlying sales trends by providing sales growth on a consistent basis. Compared to 2013, organic sales in Americas and Asia-Pacific grew by 5.5% and 22.6%, respectively, but were substantially offset by a reduction in EMEA organic sales of 3.1%.

In the Americas, we incurred incremental costs in our lead free foundry relating to manufacturing inefficiencies, including excess scrap, repairs and production disruption early in the year. A continued focus on process discipline and root cause analysis have led to consistent improvement in our manufacturing efficiency throughout the second half of the year. The impact of commodity costs during 2014 was minimal, especially with respect to our most important raw material, copper. Copper spot prices started out higher in the first quarter but continued to decline through the remainder of the year. Stainless steel spot prices were relatively flat during the first half of 2014 but increased during the second half of the year. We continued to experience pricing pressures in certain geographies and channels. In EMEA, we were able to selectively increase pricing for certain products. However, we believe the economic uncertainty in Europe will continue to affect how we and our competitors are pricing in end markets. In the Americas, we experienced pricing pressures in our DIY channel while in our wholesale channel we were able to increase pricing for certain products in the second half of the year.

We review our business and operating structure on a regular basis and implement restructuring initiatives as needed. The EMEA 2013 restructuring actions that commenced in 2013 are substantially complete. In 2014 we initiated and completed additional restructuring activities in the Americas, Asia-Pacific and Corporate to reduce costs through reductions-in-force and these activities are concluded. We also began various restructuring initiatives in EMEA in the fourth quarter of 2014 in response to the current market conditions and to better align our internal cost base with the external market environment. Please see Note 4 of the Notes to Consolidated Financial Statements for a more detailed explanation of our restructuring activities.

In addition to the restructuring initiatives, we implemented a transformation program in EMEA in the fourth quarter of 2013. The EMEA transformation program is designed to realign our European operating strategy from being country specific to pan European focused. Under this initiative, we have begun to (1) develop better sales capabilities through improved product management and enhanced product cross-selling efforts, (2) drive more efficient sourcing and logistics, and (3) enhance our focus on emerging market opportunities. We are in the process of aligning our legal and tax structure in accordance with our business structure and to take advantage of favorable tax rates where possible. We expect this project to be ongoing through 2018. We incurred non-recurring deployment costs of approximately \$7.5 million and \$1.2 million in 2014 and 2013, respectively. These non-recurring costs consist primarily of external consulting and IT related costs and are exclusive of restructuring expense. We anticipate total non-recurring external deployment costs of \$5.5 million in 2015 for the EMEA program. Total annual gross savings of approximately \$5.0 million were achieved in 2014, approximately \$11.3 million is expected in 2015, and forecasted annual savings of \$19.7 million are anticipated by 2018.

Acquisitions and Disposals

On December 1, 2014, we completed the acquisition of AERCO International, Inc. ("AERCO"), in a share purchase transaction. The aggregate purchase price was approximately \$272.2 million and was financed from a borrowing under the Company's Credit Agreement. The purchase price includes an estimated working capital adjustment of \$7.7 million and is subject to a final post-closing working capital adjustment.

AERCO is a leading provider of commercial high-efficiency boilers, water heaters and heating solutions in North America. AERCO is based in Blauvelt, New York and its products are distributed for commercial and municipal use primarily in North America. AERCO strengthens our strategic vision to expand into heat source products and strengthens our solutions and system offerings. AERCO's annual revenues for 2014 were approximately \$100 million, of which \$5.3 million was included in our 2014 Consolidated Financial Statements. Please see Note 5 of the Notes to Consolidated Financial Statements for additional information regarding operating results of AERCO.

On August 1, 2013, the Company completed the sale of all of the outstanding shares of an indirectly wholly-owned subsidiary, Austroflex, receiving net cash proceeds of \$7.9 million. We chose to divest Austroflex because it did not meet performance expectations. The loss after tax on disposal of the business was approximately \$2.2 million. Further, during the year ended December 31, 2011, the Company wrote down Austroflex's long-lived assets by \$14.8 million. Austroflex's results of operations were presented as discontinued operations for 2013 and 2012. Please see Note 3 of the Notes to Consolidated Financial Statements for additional information regarding operating results of Austroflex.

On December 21, 2012, we disposed of the outstanding shares of Flomatic Corporation (Flomatic), to a third party in an all cash transaction. Flomatic was acquired as part of the Danfoss Socla S.A.S. (Socla) acquisition in April 2011. Flomatic specializes in manufacturing various valves for the well water industry, a product line not core to our business. The operating results of Flomatic were classified in discontinued operations and a net loss on disposal of approximately \$3.8 million was charged to discontinued operations in 2012.

On January 31, 2012, we completed the acquisition of tekmar Control Systems (tekmar), a designer and manufacturer of control systems used in heating, ventilation, and air conditioning applications, in a share purchase transaction. The initial purchase price paid was approximately \$17.8 million and a contingent liability of \$5.1 million was recognized as the estimate of the acquisition date fair value of the earn-out. The contingent liability was increased by \$0.5 million and \$1.0 million during 2014 and 2013, respectively, based on performance metrics achieved or expected to be achieved. A portion of the contingent consideration was paid out during 2014 and 2013, in the amount of \$2.2 million and \$1.2 million, respectively, and the remaining 2015 payment is estimated to be \$2.5 million. The cumulative effect of foreign exchange had a \$0.7 million favorable impact on the contingent liability as of December 31, 2014.

Recent Developments

On February 12, 2015, we declared a quarterly dividend of fifteen cents (\$0.15) per share on each outstanding share of Class A common stock and Class B common stock.

On February 17, 2015, the Board of Directors of the Company approved the initial phase of a restructuring program relating to the transformation of our Americas and Asia-Pacific businesses, which primarily involves product line rationalization efforts expected to ultimately eliminate between \$175 million to \$200 million of our combined Americas and Asia-Pacific net sales primarily within our do-it-yourself (DIY) distribution channel (the "program"). The program is expected to include a pre-tax charge to earnings of approximately \$40 million to \$50 million, of which \$25 million to \$30 million consist of non-cash charges.

For the fourth quarter and year ended December 31, 2014, we recorded a \$15.2 million pre-tax charge relating to the program consisting of goodwill impairment of \$12.9 million, an indefinite-lived

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

intangible asset impairment of \$0.5 million, and other transformation and deployment costs of \$1.8 million. The goodwill impairment charge was based on a quantitative assessment of the Asia-Pacific reporting unit goodwill performed as a result of it being more likely than not that the Asia-Pacific reporting unit's third party and intersegment net sales would be significantly reduced as a result of the program. We estimated the fair value of the reporting unit using the expected present value of future cash flows.

The remaining total pre-tax charge for the program is expected to include costs of severance benefits of \$8 million to \$10 million, facility decommissioning, clean-up and other related exit costs of \$3 million to \$4 million, accelerated depreciation and amortization of long-lived assets of \$8 million to \$10 million, and other transformation and deployment costs including inventory charges, consulting fees, and other associated costs of \$5.8 million to \$10.8 million. The total net after-tax charge for this program is expected to be \$30 million to \$40 million, inclusive of the Asia-Pacific charges that are expected to have no tax benefit. The remaining costs of the program are expected to be incurred during 2015. We expect to generate approximately \$5.0 million in after-tax cash proceeds from the sale of assets associated with the program by the end of fiscal 2017. We estimate consolidated operating margins will increase by approximately 1.0 percentage point as a result of these actions by 2017.

Results of Operations

Year Ended December 31, 2014 Compared to Year Ended December 31, 2013

Net Sales. Our business is reported in three geographic segments: Americas, EMEA and Asia-Pacific. Our net sales in each of these segments for the years ended December 31, 2014 and 2013 were as follows:

	Year Ended December 31, 2014		Year Ended December 31, 2013		Change	% Change to Consolidated Net Sales
	Net Sales	% Sales	Net Sales	% Sales		
(Dollars in millions)						
Americas	\$ 926.8	61.2%	\$ 878.5	59.6%	\$ 48.3	3.3%
EMEA	546.4	36.1	562.2	38.2	(15.8)	(1.1)
Asia-Pacific	40.5	2.7	32.8	2.2	7.7	0.5
Total	\$ 1,513.7	100.0%	\$ 1,473.5	100.0%	\$ 40.2	2.7%

The change in net sales was attributable to the following:

	Year Ended December 31, 2014				Change as a % of Consolidated Net Sales				Change as a % of Segment Net Sales			
	Americas	EMEA	Asia-Pacific	Total	Americas	EMEA	Asia-Pacific	Total	Americas	EMEA	Asia-Pacific	Total
(Dollars in millions)												
Organic	\$ 48.6	\$ (17.6)	\$ 7.4	\$ 38.4	3.3%	(1.2)%	0.5%	2.6%	5.5%	(3.1)%	22.6%	
Foreign exchange	(5.6)	1.8	0.3	(3.5)	(0.3)	0.1		(0.2)	(0.6)	0.3	0.9	
Acquisition	5.3			5.3	0.3			0.3	0.6			
Total	\$ 48.3	\$ (15.8)	\$ 7.7	\$ 40.2	3.3%	(1.1)%	0.5%	2.7%	5.5%	(2.8)%	23.5%	

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Our products are sold to wholesalers, DIY chains, and OEMs. The change in organic net sales by channel was attributable to the following:

				Change As a % of Prior Year Sales			
	Wholesale	DIY	OEMs	Total	Wholesale	DIY	OEMs
	(dollars in millions)						
Americas	\$ 41.7	\$ 2.5	\$ 4.4	\$ 48.6	6.6%	1.4%	6.1%
EMEA	(4.4)	(2.5)	(10.7)	(17.6)	(1.6)	(16.6)	(4.1)
Asia-Pacific	7.1		0.3	7.4	39.2		2.0
 Total	 \$ 44.4	 \$	 \$ (6.0)	 \$ 38.4			

Organic net sales in the Americas wholesale, DIY and OEM markets increased in 2014 compared to 2013. The increase was driven by growth in all principle products lines, and in particular, growth in our residential and commercial flow product lines.

Organic net sales in the EMEA wholesale market decreased as compared to 2013 primarily due to softening in the France, Germany and Italy wholesale markets. Decreases in the DIY channel were primarily due to decreases in the France DIY market. Decreases in the OEM channel were primarily due to decreases in the Germany and Italy markets, partially offset by increases in our electronic controls and drains businesses.

Organic net sales in the Asia-Pacific wholesale market increased as compared to 2013 primarily due to increased sales in residential valve and heating products and the expansion in the East and North regions of China.

The net decrease in sales due to foreign exchange was primarily due to the depreciation of the Canadian dollar against the U.S. dollar. We cannot predict with any degree of certainty whether foreign currencies will appreciate or depreciate against the U.S. dollar in future periods or whether future foreign exchange rate fluctuations will have a positive or negative impact on our net sales.

The change in net sales due to acquisition relates to the acquisition of AERCO in December 2014.

Gross Profit. Gross profit and gross profit as a percent of net sales (gross margin) for 2014 and 2013 were as follows:

	Year Ended December 31,	
	2014	2013
	(Dollars in millions)	
Gross profit	\$ 541.8	\$ 526.5
Gross margin	35.8%	35.7%

Americas' gross margin remained consistent compared to 2013 due primarily to incremental wholesale volume and pricing, offset by the manufacturing inefficiencies in the foundry in the first half of 2014 and lower pricing in our DIY channel. EMEA's gross margin increased primarily due to cost reductions and production efficiencies driven from ongoing restructuring initiatives offsetting lower overhead absorption related to reduced manufacturing volumes.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Selling, General and Administrative Expenses. Selling, general and administrative expenses, or SG&A expenses, increased \$1.3 million, or 0.3% in 2014 as compared to 2013. The increase in SG&A expenses was attributable to the following:

	(in millions)	% Change
Organic	\$ (0.2)	(0.1)%
Foreign exchange	(0.8)	(0.2)
Acquisitions	2.3	0.6
Total	\$ 1.3	0.3%

The organic decrease in SG&A expenses was primarily due to decreased legal costs of \$18.5 million and a decrease in product liability costs of \$3.5 million offset by increased non-recurring transformation deployment costs in the Americas and EMEA of \$8.1 million, acquisition costs of \$4.5 million, increased personnel costs of \$2.7 million, increased commission and freight costs of \$4.1 million and lower depreciation and amortization of \$0.7 million. The primary driver of the decrease in legal cost relates to the agreement to settle all claims in the *Trabakoolas et al., v. Watts Water Technologies, Inc., et al.*, matter. The net settlement charged to operations amounted to \$13.6 million in 2013. Refer to Note 14 of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for more detail. The non-recurring Americas and EMEA deployment costs consist primarily of external consulting and IT related costs. The acquisition costs of \$4.5 million relate to the AERCO acquisition.

The decrease in SG&A expenses from foreign exchange was primarily due to the depreciation of the Canadian dollar against the U.S. dollar in 2014. Acquired SG&A costs relate to the AERCO acquisition. Total SG&A expenses, as a percentage of sales, were 26.9% in 2014 and 27.5% in 2013.

Restructuring and Other Charges. In 2014, we recorded a net charge of \$15.2 million primarily for involuntary terminations and other costs incurred as part of our EMEA restructuring initiatives, a reduction-in-force in the Americas and Corporate and reductions-in-force in Asia-Pacific. Restructuring charges in 2013 were \$8.7 million. For a more detailed description of our current restructuring plans, see Note 4 of Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

Goodwill and Other Long-Lived Asset Impairment Charges. In 2014, we recorded impairment charges of \$14.2 million, primarily relating to a \$12.9 million goodwill impairment charge in the Asia-Pacific reporting unit and trade name impairment charges of \$0.5 million and \$0.8 million in the Americas and EMEA, respectively, compared to \$1.2 million in 2013. See Note 2 of Notes to Consolidated Financial Statements in this Annual Report on Form 10-K, for additional information regarding these impairments.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Operating Income. Operating income by geographic segment for 2014 and 2013 was as follows:

	Year Ended		Change	% Change to Consolidated Operating Income
	December 31, 2014	December 31, 2013		
	(Dollars in millions)			
Americas	\$ 110.3	\$ 84.0	\$ 26.3	23.5%
EMEA	37.5	46.9	(9.4)	(8.4)
Asia-Pacific	(6.5)	9.7	(16.2)	(14.5)
Corporate	(35.9)	(29.1)	(6.8)	(6.1)
Total	\$ 105.4	\$ 111.5	\$ (6.1)	(5.5)%

The change in operating income was attributable to the following:

	Change as a % of Consolidated Operating Income					Change as a % of Segment Operating Income								
	Americas	EMEA	Asia-Pacific	Corp.	Total	Americas	EMEA	Asia-Pacific	Corp.	Total				
	(Dollars in millions)													
Organic	\$ 29.9	\$ (6.1)	\$ (2.5)	\$ (6.0)	\$ 15.3	26.8%	(5.5)%	(2.2)%	(5.4)%	13.7%	35.6%	(13.0)%	(25.8)%	20.6%
Foreign exchange	(1.2)	0.2			(1.0)	(1.1)	0.2			(0.9)	(1.4)	0.4		
Acquisitions	(1.4)				(1.4)	(1.3)				(1.3)	(1.7)			
Restructuring, impairment charges and other	(1.0)	(3.5)	(13.7)	(0.8)	(19.0)	(0.9)	(3.1)	(12.3)	(0.7)	(17.0)	(1.2)	(7.4)	(141.2)	2.8
Total	\$ 26.3	\$ (9.4)	\$ (16.2)	\$ (6.8)	\$ (6.1)	23.5%	(8.4)%	(14.5)%	(6.1)%	(5.5)%	31.3%	(20.0)%	(167.0)%	23.4%

The decrease in consolidated operating income was due primarily to an increase in restructuring and impairment charges offset by an increase in gross profit from increased sales volume and cost containment initiatives. The increase in Americas' organic operating income was driven by higher sales volume and reduced SG&A expenses offset partially by increased restructuring expenses. The EMEA organic operating income decrease was primarily due to lower sales volumes, higher restructuring costs and transformation deployment costs partially offset by productivity efficiencies and cost containment efforts. Asia-Pacific's organic operating income decreased primarily due to the impact on gross margins from reduced absorption driven by lower intercompany sales and higher SG&A expenses.

As of January 1, 2014, we began allocating certain expenses to our three operating segments that had previously been recorded as Corporate expenses. These expenses primarily include stock compensation, legal expenses and audit expenses that are directly attributable to and benefit the three operating segments. The 2013 results have been retrospectively revised for comparative purposes.

Interest Expense. Interest expense decreased \$1.6 million, or 7.4%, in 2014 compared to 2013, primarily due to the retirement in mid-May 2013 of \$75 million in unsecured senior notes and lower borrowing rates on our stand-by letters of credit, offset by interest on our borrowings under our Credit Agreement. See Note 10 of Notes to Consolidated Financial Statements in this Annual Report on Form 10-K, for additional information regarding financing arrangements.

Other Expense (Income), Net. Other expense (income), net increased \$0.3 million in 2014 compared to 2013, primarily due to higher foreign currency transaction losses in Canada.

Income Taxes. Our effective tax rate for continuing operations increased to 39.5% in 2014 from 30.6% in 2013. The increase in the rate is primarily due to the \$12.9 million goodwill impairment charge recorded in Asia-Pacific with no tax benefit. In addition, the increase was also due to audit settlements in Belgium and Germany recorded during the third quarter of 2014 and to earnings mix, with the U.S. contributing a larger portion of worldwide earnings in 2014 than in 2013.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Net Income From Continuing Operations. Net income from continuing operations for 2014 was \$50.3 million, or \$1.42 per common share, compared to \$60.9 million, or \$1.71 per common share, for 2013. Results for 2014 include net after-tax charges of \$38.5 million, or \$1.09 per common share, including acquisitions and impairment related costs of \$0.51, restructuring and other net charges of \$0.39, and EMEA and Americas transformation deployment costs of \$0.19.

Results for 2013 include net after-tax charges of \$18.3 million, or \$0.51 per common share, including legal settlement charges of \$0.26, restructuring and other net charges of \$0.17, goodwill and other long-lived asset impairments of \$0.04, earnout adjustments of \$0.02 and EMEA transformation deployment costs of \$0.02.

Loss From Discontinued Operations. Loss from discontinued operations in 2013 of \$2.3 million, or (\$0.07) per common share, was related to the operations and loss on disposal of Austroflex. See Note 3 of Notes to Consolidated Financial Statements.

Results of Operations

Year Ended December 31, 2013 Compared to Year Ended December 31, 2012

Net Sales. Our business is reported in three geographic segments: Americas, EMEA and Asia-Pacific. Our net sales in each of these segments for the years ended December 31, 2013 and 2012 were as follows:

	Year Ended December 31, 2013		Year Ended December 31, 2012		Change	% Change to Consolidated Net Sales
	Net Sales	% Sales	Net Sales	% Sales		
(Dollars in millions)						
Americas	\$ 878.5	59.6%	\$ 835.0	58.5%	\$ 43.5	3.0%
EMEA	562.2	38.2	565.6	39.6	(3.4)	(0.2)
Asia-Pacific	32.8	2.2	26.8	1.9	6.0	0.4
Total	\$ 1,473.5	100.0%	\$ 1,427.4	100.0%	\$ 46.1	3.2%

The change in net sales was attributable to the following:

	Americas				Change as a % of Consolidated Net Sales				Change as a % of Segment Net Sales			
	EMEA	Asia-Pacific	Total	Asia-Pacific	Americas	EMEA	Asia-Pacific	Total	Americas	EMEA	Asia-Pacific	
(Dollars in millions)												
Organic	\$ 45.6	\$ (20.5)	\$ 5.5	\$ 30.6	3.1%	(1.4)%	0.4%	2.1%	5.4%	(3.6)%	20.5%	
Foreign exchange	(2.8)	17.1	0.5	14.8	(0.2)	1.2		1.0	(0.3)	3.0	1.9	
Acquisitions	0.7			0.7	0.1			0.1	0.1			
Total	\$ 43.5	\$ (3.4)	\$ 6.0	\$ 46.1	3.0%	(0.2)%	0.4%	3.2%	5.2%	(0.6)%	22.4%	

Our products are sold to wholesalers, DIY chains, and OEMs. The change in organic net sales by channel was attributable to the following:

	Wholesale			Change As a % of Prior Year Sales		
	DIY	OEMs	Total	Wholesale	DIY	OEMs
(dollars in millions)						
Americas	\$ 37.0	\$ 4.8	\$ 3.8	\$ 45.6	6.3%	2.7%
EMEA	(10.7)	(3.7)	(6.1)	(20.5)	(3.7)	(2.3)
Asia-Pacific	2.2		3.3	5.5	14.2	29.2

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Total \$ 28.5 \$ 1.1 \$ 1.0 \$ 30.6

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Organic net sales in 2013 in the Americas wholesale market increased compared to 2012 mainly from increased sales in residential and commercial flow product lines and from our customers continuing to transition to lead free products. Organic sales into the Americas DIY market in 2013 increased compared to 2012, primarily due to increased product sales of \$1.9 million in residential and commercial flow control products and \$1.2 million in water quality products. Unit sales increases were substantially offset by competitive pricing in the DIY market.

Organic net sales in the EMEA wholesale market decreased compared to 2012 primarily due to the economic market conditions in France and Germany. Organic net sales into the EMEA OEM market decreased as compared to 2012 primarily due to a slower HVAC market in Germany and fewer large project sales in the drains business, offset by increased sales in the electronics business.

The net increase in sales due to foreign exchange was primarily due to the appreciation of the euro against the U.S. dollar. We cannot predict whether these currencies will appreciate or depreciate against the U.S. dollar in future periods or whether future foreign exchange rate fluctuations will have a positive or negative impact on our net sales.

Acquired net sales growth in Americas was due to tekmar.

Gross Profit. Gross profit and gross profit as a percent of net sales (gross margin) for 2013 and 2012 were as follows:

	Year Ended December 31,	
	2013	2012
	(Dollars in millions)	
Gross profit	\$ 526.5	\$ 513.5
Gross margin	35.7%	36.0%

In Americas, gross margin decreased primarily due to inefficiencies related to our lead free transition program and retail pricing pressure offset partially by product mix and volume growth. EMEA gross margin increased slightly as compared to 2012, primarily due to production efficiencies driven from ongoing restructuring programs offsetting lower overhead absorption related to reduced manufacturing volumes.

Selling, General and Administrative Expenses. Selling, general and administrative expenses, or SG&A expenses, for 2013 increased \$24.7 million, or 6.5%, compared to 2012. The increase in SG&A expenses was attributable to the following:

	(in millions)	% Change
Organic	\$ 20.8	5.5%
Foreign exchange	3.6	0.9
Acquisitions	0.3	0.1
Total	\$ 24.7	6.5%

The net organic increase in SG&A is primarily attributable to increased legal costs of \$12.5 million, increased product liability cost of \$4.5 million, increased freight and commission costs of \$4.1 million associated with increased sales, and increased personnel costs of \$2.2 million, offset by lower depreciation and amortization of \$1.6 million and lower advertising costs of \$1.3 million. Incremental legal costs include the impact of a settlement of all claims in the *Trabakoolas et al., v. Watts Water Technologies, Inc., et al.*, matter in the United States District Court for the Northern District of California. The net settlement charged to operations amounted to \$13.6 million in 2013. Refer to Note 14 of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K for more detail. Increased product liability cost of \$4.5 million in the Americas is based on a third-party actuarial analysis that incorporated higher reported claims in 2013 offset to some extent

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

by the impact of the Trabakoolas settlement. Increased personnel costs primarily relate to investments in new positions and increased stock incentive plan costs.

The increase in SG&A expenses from foreign exchange was primarily due to the appreciation of the Euro against the U.S. dollar. Acquired SG&A expenses related to the tekmar acquisition. Total SG&A expense, as a percentage of sales, was 27.5% in 2013 and 26.7% in 2012.

Restructuring and Other Charges. In 2013, we recorded a net charge of \$8.7 million primarily for severance and other costs incurred as part of our previously announced restructuring programs, as compared to \$4.2 million for 2012. For a more detailed description of our current restructuring plans, see Note 4 of Notes to Consolidated Financial Statements in this Annual Report on Form 10-K.

Goodwill and Other Long-Lived Asset Impairment Charges. In 2013, we recorded asset impairment charges of \$1.2 million, primarily relating to a \$0.3 million goodwill impairment charge for BRAE, and trade name impairment charges of \$0.3 million and \$0.4 million for the Americas and EMEA, respectively. The goodwill impairment was based on historical results being below our expectations and a reduction in the expected future cash flows to be generated by BRAE. See Note 2 of Notes to Consolidated Financial Statements in this Annual Report on Form 10-K, for additional information regarding these impairments.

Operating Income. Operating income by geographic segment for 2013 and 2012 was as follows:

	Year Ended			% Change to Consolidated Operating Income
	December 31, 2013	December 31, 2012	Change	
	(Dollars in millions)			
Americas	\$ 84.0	\$ 90.7	\$ (6.7)	(5.4)%
EMEA	46.9	52.5	(5.6)	(4.6)
Asia-Pacific	9.7	6.5	3.2	2.6
Corporate	(29.1)	(26.4)	(2.7)	(2.2)
Total	\$ 111.5	\$ 123.3	\$ (11.8)	(9.6)%

The change in operating income was attributable to the following:

	Change as a % of Consolidated Operating Income				Change as a % of Segment Operating Income									
	Americas	EMEA	Asia-Pacific	Corp.	Americas	EMEA	Asia-Pacific	Corp.						
	(Dollars in millions)													
Organic	\$ (7.9)	\$ (2.4)	\$ 0.9	\$ (2.7)	\$ (12.1)	(6.4)%	(2.0)%	0.7%	(2.2)%	(9.9)%	(8.7)%	(4.6)%	13.9%	10.2%
Foreign exchange	(0.6)	1.8	0.1		1.3	(0.5)	1.5	0.1		1.1	(0.7)	3.4	1.5	
Acquisitions	0.1				0.1	0.1				0.1	0.1			
Restructuring, impairment charges and other	1.7	(5.0)	2.2		(1.1)	1.4	(4.1)	1.8		(0.9)	1.9	(9.5)	33.8	
Total	\$ (6.7)	\$ (5.6)	\$ 3.2	\$ (2.7)	\$ (11.8)	(5.4)%	(4.6)%	2.6%	(2.2)%	(9.6)%	(7.4)%	(10.7)%	49.2%	10.2%

The decrease in consolidated organic operating income was due primarily to an increase in SG&A expenses, as previously discussed. Acquired operating income relates to the tekmar acquisition.

The increase in restructuring, impairment charges and other from 2013 to 2012 is primarily driven by the EMEA restructuring programs, as previously discussed.

The net increase in operating income from foreign exchange was primarily due to the appreciation of the euro against the U.S. dollar. We cannot predict whether the euro will appreciate or depreciate against the U.S. dollar in future periods or whether future foreign exchange rate fluctuations will have a positive or negative impact on our operating income.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

As of January 1, 2014, we began allocating certain expenses to our three operating segments that had previously been recorded as Corporate expenses. These expenses primarily include stock compensation, legal expenses and audit expenses that are directly attributable to and benefit the three operating segments. The 2013 and 2012 results have been retrospectively revised for comparative purposes.

Interest Expense. Interest expense decreased \$3.1 million, or 12.6%, in 2013 compared to 2012, primarily due to the retirement in mid-May 2013 of \$75 million in unsecured senior notes and to a lower balance outstanding on our stand-by letters of credit. See Note 10 of Notes to Consolidated Financial Statements in this Annual Report on Form 10-K, for additional information regarding financing arrangements.

Other Expense (Income), Net. Other expense (income), net increased \$3.6 million in 2013 compared to 2012, primarily due to foreign currency transaction losses in the Americas, EMEA and Asia-Pacific as a result of the appreciation of the Chinese yuan and the euro against the U.S. dollar and appreciation of the U.S. dollar against the Canadian dollar in 2013. In addition, a favorable customs settlement recorded in 2012 did not repeat in 2013.

Income Taxes. Our effective tax rate for continuing operations increased to 30.6% in 2013 from 29.7% in 2012. The 2013 rate is up slightly due to a change in tax laws in France that limited intercompany interest deductions. In 2012, the rate was favorably impacted by the release of a tax reserve following the completion of a European tax audit.

Net Income From Continuing Operations. Net income from continuing operations for 2013 was \$60.9 million, or \$1.71 per common share, compared to \$70.4 million, or \$1.95 per common share, for 2012. Results for 2013 include net after-tax charges of \$18.3 million, or \$0.51 per common share, including legal settlement charges of \$0.26, restructuring and other net charges of \$0.17, goodwill and other long-lived asset impairments of \$0.04, earnout adjustments of \$0.02 and EMEA transformation deployment costs of \$0.02.

Results for 2012 include net after-tax charges of \$8.1 million, or \$0.22 per common share, including restructuring and other net charges of \$0.07, goodwill and other long-lived asset impairments of \$0.07, a charge to adjust the TWVC gain of \$0.04, retention costs for our former Chief Financial Officer of \$0.03, net legal/customs settlement charges of \$0.02, and other net credits of \$0.01, primarily related to a favorable tax adjustment due to a change in 2012 in Italian tax rules.

The appreciation primarily of the euro against the U.S. dollar in 2013 resulted in a positive impact on our operations of \$0.03 per common share compared to 2012. We cannot predict whether the euro, Canadian dollar or Chinese yuan will appreciate or depreciate against the U.S. dollar in future periods or whether future foreign exchange rate fluctuations will have a positive or negative impact on our net income.

Loss From Discontinued Operations. Loss from discontinued operations in 2013 of \$2.3 million, or (\$0.07) per common share, was related to the operations and loss on disposal of Austroflex. See Note 3 of Notes to Consolidated Financial Statements.

Liquidity and Capital Resources

2014 Cash Flows

In 2014, we generated \$135.2 million of cash from operating activities as compared to \$118.3 million in 2013. The increase was primarily due to inventory reduction efforts mostly in the Americas and strong accounts receivable collections, offset by reductions in accounts payable in the current year related to the prior year build-up of lead free inventory late in 2013. We generated approximately \$111.9 million of free cash flow (a non-GAAP financial measure, which we reconcile below, defined as net cash provided by continuing operating activities minus capital expenditures plus

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

proceeds from sale of assets), compared to free cash flow of \$92.1 million in 2013. Free cash flow as a percentage of net income from continuing operations was 222.5% in 2014 as compared to 151.2% in 2013.

In 2014, we used \$295.5 million of net cash for investing activities, including \$272.2 million for the purchase of AERCO and \$23.7 million of cash for capital equipment. We anticipate investing approximately \$30 million to \$35 million in capital equipment in 2015 to improve our manufacturing capabilities.

In 2014, we generated \$220.8 million of net cash from financing activities. Cash provided by financing activities was primarily due to the \$275.0 million borrowings under our Credit Agreement to fund the AERCO acquisition and by proceeds of \$11.8 million from option exercises under the employee stock plans, offset by payments to repurchase approximately 670,000 shares of Class A common stock at a cost of \$39.6 million and payment of dividends of \$20.5 million.

On February 18, 2014, we terminated a prior credit agreement and entered into a new Credit Agreement (the Credit Agreement) among the Company, certain subsidiaries of the Company who become borrowers under the Credit Agreement, JPMorgan Chase Bank, N.A., as Administrative Agent, Swing Line Lender and Letter of Credit Issuer, and the other lenders referred to therein. The Credit Agreement provides for a \$500 million, five-year, senior unsecured revolving credit facility which may be increased by an additional \$500 million under certain circumstances and subject to the terms of the Credit Agreement. The Credit Agreement has a sublimit of up to \$100 million in letters of credit. The Credit Agreement matures on February 18, 2019.

Borrowings outstanding under the Credit Agreement bear interest at a fluctuating rate per annum equal to an applicable percentage equal to (1) in the case of Eurocurrency rate loans, the British Bankers Association LIBOR rate plus an applicable percentage, ranging from 0.975% to 1.45%, determined by reference to the Company's consolidated leverage ratio, or (2) in the case of base rate loans and swing line loans, the highest of (a) the federal funds rate plus 0.5%, (b) the rate of interest in effect for such day as announced by JPMorgan Chase Bank, N.A. as its "prime rate," and (c) the British Bankers Association LIBOR rate plus 1.0%, plus an applicable percentage, ranging from 0.00% to 0.45%, determined by reference to our consolidated leverage ratio. In addition to paying interest under the Credit Agreement, we are also required to pay certain fees in connection with the credit facility, including, but not limited to, an unused facility fee and letter of credit fees. Under the Credit Agreement, we are required to satisfy and maintain specified financial ratios and other financial condition tests. We may repay loans outstanding under the Credit Agreement from time to time without premium or penalty, other than customary breakage costs, if any, and subject to the terms of the Credit Agreement.

Our Pension Plan was terminated effective July 31, 2014. The plan termination must satisfy the regulatory requirements prescribed by the Internal Revenue Service (IRS) and the Pension Benefit Guaranty Corporation, which is expected to occur in the second half of 2015. Once the requirements are met, distribution of plan assets pursuant to the termination is expected to occur within four months. Our SERP was terminated effective May 15, 2014. We will settle all liabilities under the SERP in accordance with Section 409A of the Internal Revenue Code by paying lump sums to plan participants at least twelve and no more than twenty four months following the termination date. The Board of Directors authorized us to make such contributions to the Pension Plan and SERP as may be necessary to make the plans sufficient to settle all plan liabilities. Presently, we expect the distributions for the two plans to be completed by December 31, 2015. Based on our third-party actuary's estimate using preliminary assumptions, our estimated cash outflow is approximately \$40 million to \$45 million. Upon liquidation of the plans, the accumulated other comprehensive loss related to the plans at the termination date will be recognized in our Consolidated Statement of Operations and Consolidated Statement of Comprehensive Income. The accumulated other comprehensive loss related to the plans as of December 31, 2014 was \$59.0 million or \$36.1 million net of tax. The estimated cash outflow range and the impact on our Consolidated Statement of Operations and Consolidated Statement of Comprehensive Income are subject to change based on the distribution date, the fair value of the plan assets at distribution, market interest rates and annuity purchase rates at distribution, demographic experience after 2014 and elected forms of payment.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

As of December 31, 2014, we held \$301.1 million in cash and cash equivalents. Our ability to fund operations from cash and cash equivalents could be limited by market liquidity as well as possible tax implications of moving proceeds across jurisdictions. Of this amount, approximately \$250.7 million of cash and cash equivalents were held by foreign subsidiaries. Our U.S. operations typically generate sufficient cash flows to meet our domestic obligations. We do anticipate some incremental expenditures in 2015 including the expected pension settlement payment and cash costs related to the Americas transformation program. We may have to borrow to fund some or all of these expected cash outlays, which we can do at reasonable interest rates by utilizing the uncommitted borrowings under our Credit Agreement. However, if amounts held by foreign subsidiaries were needed to fund operations in the United States, we could be required to accrue and pay taxes to repatriate these funds. Such charges may include a federal tax of up to 35.0% on dividends received in the U.S., potential state income taxes and an additional withholding tax payable to foreign jurisdictions of up to 10.0%. However, our intent is to permanently reinvest undistributed earnings of foreign subsidiaries and we do not have any current plans to repatriate them to fund operations in the United States.

Covenant compliance

Under the Credit Agreement, we were required to satisfy and maintain specified financial ratios and other financial condition tests as of December 31, 2014. The financial ratios included a consolidated interest coverage ratio based on consolidated earnings before income taxes, interest expense, depreciation, and amortization (Consolidated EBITDA) to consolidated interest expense, as defined in the Credit Agreement. Our Credit Agreement defined Consolidated EBITDA to exclude unusual or non-recurring charges and gains. We were also required to maintain a consolidated leverage ratio of consolidated funded debt to Consolidated EBITDA. Consolidated funded debt, as defined in the Credit Agreement, included all long and short-term debt, capital lease obligations and any trade letters of credit that are outstanding.

As of December 31, 2014, our actual financial ratios calculated in accordance with our Credit Agreement compared to the required levels under the Credit Agreement were as follows:

	Actual Ratio	Required Level
		Minimum level
Interest Charge Coverage Ratio	9.00 to 1.00	3.50 to 1.00
		Maximum level
Leverage Ratio	1.49 to 1.00	3.25 to 1.00

As of December 31, 2014, we were in compliance with all covenants related to the Credit Agreement and had \$201.4 million of unused and available credit under the Credit Agreement and \$23.6 million of stand-by letters of credit outstanding on the Credit Agreement. The Company had \$275.0 million of borrowings outstanding under the Credit Agreement at December 31, 2014.

We have several senior note agreements as further detailed in Note 10 of Notes to Consolidated Financial Statements. These senior note agreements require us to maintain a fixed charge coverage ratio of consolidated EBITDA plus consolidated rent expense during the period to consolidated fixed charges. Consolidated fixed charges are the sum of consolidated interest expense for the period and consolidated rent expense.

As of December 31, 2014, our actual fixed charge coverage ratio calculated in accordance with our senior note agreements compared to the required ratio therein was as follows:

	Actual Ratio	Required Level
		Minimum level
Fixed Charge Coverage Ratio	5.36 to 1.00	2.00 to 1.00

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

In addition to financial ratios, the Credit Agreement and senior note agreements contain affirmative and negative covenants that include limitations on disposition or sale of assets, prohibitions on assuming or incurring any liens on assets with limited exceptions and limitations on making investments other than those permitted by the agreements.

Working capital (defined as current assets less current liabilities) as of December 31, 2014 was \$528.6 million compared to \$530.2 million as of December 31, 2013. The decrease was primarily due to the reclassification of the \$40.0 million in pension plan and SERP liabilities from noncurrent to current as of December 31, 2014, offset by increases in cash and cash equivalents of \$33.2 million. The ratio of current assets to current liabilities was 2.5 to 1 as of December 31, 2014 compared to 2.6 to 1 as of December 31, 2013.

2013 Cash Flows

In 2013, we generated \$118.3 million of cash from operating activities as compared to \$130.3 million in 2012. The decrease was primarily due to lower net income and cash used to fund a lead free inventory increase in the Americas. We generated approximately \$92.1 million of free cash flow (a non-GAAP financial measure, which we reconcile below, defined as net cash provided by continuing operating activities minus capital expenditures plus proceeds from sale of assets), compared to free cash flow of \$103.0 million in 2012. Free cash flow as a percentage of net income from continuing operations was 151.2% in 2013 as compared to 146.3% in 2012.

In 2013, we used \$24.1 million of net cash for investing activities, including \$27.7 million of cash for capital equipment, offset partially by the proceeds from the sale of buildings and equipment of \$1.5 million.

In 2013, we used \$109.5 million of net cash from financing activities. Our most significant cash outlays included the repayment of the \$75.0 million of unsecured senior notes that matured on May 15, 2013, payments to repurchase approximately 454,000 shares of Class A common stock at a cost of approximately \$23.0 million and payment of dividends of \$17.7 million, offset by proceeds of \$11.9 million from option exercises under the employee stock plans.

2012 Cash Flows

In 2012, we generated \$130.3 million of cash from operating activities as compared to \$126.1 million in 2011. We generated approximately \$103.0 million of free cash flow (a non-GAAP financial measure, which we reconcile below, defined as net cash provided by continuing operating activities minus capital expenditures plus proceeds from sale of assets), compared to free cash flow of \$104.4 million in 2011. Free cash flow as a percentage of net income from continuing operations was 146.3% in 2012 as compared to 135.2% in 2011.

In 2012, we used \$42.9 million of net cash for investing activities, including \$17.5 million for the purchase of tekmar and \$30.5 million of cash for capital equipment, offset partially by the proceeds from the sale of buildings and equipment of \$3.2 million.

In 2012, we used \$80.7 million of net cash from financing activities. Our most significant cash outlays included \$65.8 million for the repurchase of two million shares of Class A common stock and \$16.0 million to fund dividend payments. Repayments of long-term debt related to amounts borrowed under the Prior Credit Agreement in 2012 for operating purposes and repayments related to 2011 borrowings for the purchase of Socla.

We generated \$3.2 million of net cash from operating activities of discontinued operations in 2012 related to a legal settlement regarding the disposal of a former Chinese subsidiary and from operating activities of discontinued operations related to Austroflex. We generated \$8.3 million of net cash from investing activities of discontinued operations resulting primarily from proceeds received upon the disposal of Flomatic in December 2012.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Non-GAAP Financial Measures

We believe free cash flow to be an appropriate supplemental measure of our operating performance because it provides investors with a measure of our ability to generate cash, to repay debt and to fund acquisitions. Other companies may define free cash flow differently. Free cash flow does not represent cash generated from operating activities in accordance with GAAP. Therefore it should not be considered an alternative to net cash provided by operations as an indication of our performance. Free cash flow should also not be considered an alternative to net cash provided by operations as defined by GAAP. The cash conversion rate of free cash flow to net income from continuing operations is also a measure of our performance in cash flow generation.

A reconciliation of net cash provided by continuing operations to free cash flow and calculation of our cash conversion rate is provided below:

	Years Ended December 31,		
	2014	2013	2012
	(in millions)		
Net cash provided by continuing operations	\$ 135.2	\$ 118.3	\$ 130.3
Less: additions to property, plant, and equipment	(23.7)	(27.7)	(30.5)
Plus: proceeds from the sale of property, plant, and equipment	0.4	1.5	3.2
 Free cash flow	 \$ 111.9	 \$ 92.1	 \$ 103.0
 Net income from continuing operations as reported	 \$ 50.3	 \$ 60.9	 \$ 70.4
 Cash conversion rate of free cash flow to net income from continuing operations	 222.5%	 151.2%	 146.3%

Our net debt to capitalization ratio, a non-GAAP financial measure used by management, increased to 23.4% for 2014 from 3.8% for 2013. The increase in net debt to capitalization ratio is due to the increase in net debt primarily driven by an increase in debt outstanding relating to the AERCO acquisition offset by an increase in cash and cash equivalents at December 31, 2014. Management believes the net debt to capitalization ratio is an appropriate supplemental measure because it helps investors understand our ability to meet our financing needs and serves as a basis to evaluate our financial structure. Our computation may not be comparable to other companies that may define their net debt to capitalization ratios differently.

A reconciliation of long-term debt (including current portion) to net debt and our net debt to capitalization ratio is provided below:

	December 31,	
	2014	2013
	(in millions)	
Current portion of long-term debt	\$ 1.9	\$ 2.2
Plus: long-term debt, net of current portion	577.8	305.5
Less: cash and cash equivalents	(301.1)	(267.9)
 Net debt	 \$ 278.6	 \$ 39.8

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

A reconciliation of capitalization is provided below:

	December 31,	
	2014	2013
	(in millions)	
Net debt	\$ 278.6	\$ 39.8
Total stockholders' equity	912.4	1,002.1
Capitalization	\$ 1,191.0	\$ 1,041.9

Net debt to capitalization ratio **23.4%** 3.8%

Contractual Obligations

Our contractual obligations as of December 31, 2014 are presented in the following table:

Contractual Obligations	Total	Payments Due by Period			
		Less than 1 year	1-3 years	4-5 years	More than 5 years
		(in millions)			
Long-term debt obligations, including current maturities(a)	\$ 579.7	\$ 1.9	\$ 227.7	\$ 275.1	\$ 75.0
Operating lease obligations	33.2	9.4	11.9	5.1	6.8
Capital lease obligations(a)	7.2	1.2	2.5	2.2	1.3
Pension contributions	50.9	43.0	0.8	0.9	6.2
Interest	61.8	22.9	23.1	14.0	1.8
Earnout payments(a)	2.5	2.5			
Other(b)	24.2	23.2	1.0		
Total	\$ 759.5	\$ 104.1	\$ 267.0	\$ 297.3	\$ 91.1

(a) as recognized in the consolidated balance sheet

(b) the majority relates to commodity and capital commitments at December 31, 2014

We maintain letters of credit that guarantee our performance or payment to third parties in accordance with specified terms and conditions. Amounts outstanding were approximately \$23.6 million as of December 31, 2014 and December 31, 2013. Our letters of credit are primarily associated with insurance coverage and, to a lesser extent, foreign purchases and generally expire within one year of issuance. These instruments may exist or expire without being drawn down; therefore they do not necessarily represent future cash flow obligations.

Off-Balance Sheet Arrangements

Except for operating lease commitments, we have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Application of Critical Accounting Policies and Key Estimates

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

The preparation of our consolidated financial statements in accordance with U.S. GAAP requires management to make judgments, assumptions and estimates that affect the amounts reported. A critical accounting estimate is an assumption about highly uncertain matters and could have a material effect on the consolidated financial statements if another, also reasonable, amount were used, or, a change in the estimate is reasonably likely from period to period. We base our assumptions on historical experience and on other estimates that we believe are reasonable under the circumstances. Actual

results could differ significantly from these estimates. There were no changes in our accounting policies or significant changes in our accounting estimates during 2014.

We periodically discuss the development, selection and disclosure of the estimates with our Audit Committee. Management believes the following critical accounting policies reflect its more significant estimates and assumptions.

Revenue recognition

We recognize revenue when all of the following criteria are met: (1) we have entered into a binding agreement, (2) the product has shipped and title has passed, (3) the sales price to the customer is fixed or is determinable and (4) collectability is reasonably assured. We recognize revenue based upon a determination that all criteria for revenue recognition have been met, which, based on the majority of our shipping terms, is considered to have occurred upon shipment of the finished product. Some shipping terms require the goods to be received by the customer before title passes. In those instances, revenues are not recognized until the customer has received the goods. We record estimated reductions to revenue for customer returns and allowances and for customer programs. Provisions for returns and allowances are made at the time of sale, derived from historical trends and form a portion of the allowance for doubtful accounts. Customer programs, which are primarily annual volume incentive plans, allow customers to earn credit for attaining agreed upon purchase targets from us. We record estimated reductions to revenue, made at the time of sale, for customer programs based on estimated purchase targets.

Allowance for doubtful accounts

The allowance for doubtful accounts is established to represent our best estimate of the net realizable value of the outstanding accounts receivable. The development of our allowance for doubtful accounts varies by region but in general is based on a review of past due amounts, historical write-off experience, as well as aging trends affecting specific accounts and general operational factors affecting all accounts. In addition, factors are developed in certain regions utilizing historical trends of sales and returns and allowances and cash discount activities to derive a reserve for returns and allowances and cash discounts.

We uniformly consider current economic trends and changes in customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. We also aggressively monitor the creditworthiness of our largest customers, and periodically review customer credit limits to reduce risk. If circumstances relating to specific customers change or unanticipated changes occur in the general business environment, our estimates of the recoverability of receivables could be further adjusted.

Inventory valuation

Inventories are stated at the lower of cost or market with costs determined primarily on a first-in first-out basis. We utilize both specific product identification and historical product demand as the basis for determining our excess or obsolete inventory reserve. We identify all inventories that exceed a range of one to three years in sales. This is determined by comparing the current inventory balance against unit sales for the trailing twelve months. New products added to inventory within the past twelve months are excluded from this analysis. A portion of our products contain recoverable materials, therefore the excess and obsolete reserve is established net of any recoverable amounts. Changes in market conditions, lower-than-expected customer demand or changes in technology or features could result in additional obsolete inventory that is not saleable and could require additional inventory reserve provisions.

In certain countries, additional inventory reserves are maintained for potential shrinkage experienced in the manufacturing process. The reserve is established based on the prior year's inventory losses adjusted for any change in the gross inventory balance.

Goodwill and other intangibles

We have made numerous acquisitions over the years which included the recognition of a significant amount of goodwill. Goodwill is tested for impairment annually or more frequently if an event or circumstance indicates that an impairment loss may have been incurred. Application of the goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, and determination of the fair value of each reporting unit. We estimate the fair value of our reporting units using an income approach based on the present value of estimated future cash flows, and when appropriate, guideline public company and guideline transaction market approaches.

Accounting guidance allows us to review goodwill for impairment utilizing either qualitative or quantitative analyses. We have the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events and circumstances, we determine it is more likely than not that the fair value of a reporting unit is greater than its carrying amount, then performing the two-step (quantitative) impairment test is unnecessary.

We first identify those reporting units that we believe could pass a qualitative assessment to determine whether further impairment testing is necessary. For each reporting unit identified, our qualitative analysis includes:

- 1) A review of the most recent fair value calculation to identify the extent of the cushion between fair value and carrying amount, to determine if a substantial cushion existed.
- 2) A review of events and circumstances that have occurred since the most recent fair value calculation to determine if those events or circumstances would have affected our previous fair value assessment. Items identified and reviewed include macroeconomic conditions, industry and market changes, cost factor changes, events that affect the reporting unit, financial performance against expectations and the reporting unit's performance relative to peers.

We then compile this information and make our assessment of whether it is more likely than not that the fair value of the reporting unit is less than its carrying amount. If we determine it is not more likely than not, then no further quantitative analysis is required. We had eight reporting units including BRAE in 2013, during which the remaining balance of the BRAE goodwill was written off and is no longer considered a separate reporting unit. During our 2014 year end assessment we had seven reporting units in continuing operations, one of which, Water Quality, has no goodwill. With the acquisition of AERCO in December 2014, we had eight reporting units as of December 31, 2014. In 2014, we performed a qualitative analysis for the EMEA, Residential and Commercial, Blücher and Dormont reporting units. As a result of our qualitative analyses, we determined that the fair values of the reporting units were greater than the carrying amounts. The EMEA reporting unit represents the EMEA geographic segment excluding the Blücher reporting unit and had a goodwill balance of \$195.8 million as of December 31, 2014. We continue to monitor the EMEA reporting unit's performance considering the current economic environment in Europe and the impact on operating results and growth expectations. The updated fair value assessment included an evaluation of certain key assumptions and we concluded that the fair value of the EMEA reporting unit continued to exceed its carrying value. While we believe that our estimate of future cash flows are reasonable, different assumptions or continued economic downturn could significantly affect our valuations and result in impairment in the future.

The second analysis for goodwill impairment involves a quantitative two-step process. In 2014, we performed a quantitative impairment analysis for the U.S. Drains and Water Re-use and Asia-Pacific reporting units. We performed a quantitative analysis for the U.S. Drains and Water Re-use reporting unit due to operating performance not meeting budgeted results and the length of time since the last quantitative test performed in 2011. As of the end of the fourth quarter of 2014, management

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

determined that it was "more likely than not" that we would be exiting certain product lines in 2015 that are manufactured in Asia-Pacific and sold primarily through the Americas do-it-yourself (DIY) distribution channel. We performed a quantitative impairment analysis for the Asia-Pacific reporting unit as a significant portion of the Asia-Pacific reporting unit's third party and intersegment net sales are expected to decline as a result of the initial phase of the Americas and Asia-Pacific transformation and restructuring program.

The first step of the impairment test requires a comparison of the fair value of each of our reporting units to the respective carrying value. If the carrying value of a reporting unit is less than its fair value, no indication of impairment exists and a second step is not performed. If the carrying amount of a reporting unit is higher than its fair value, there is an indication that impairment may exist and a second step must be performed. In the second step, the impairment is computed by comparing the implied fair value of the reporting unit's goodwill with the carrying amount of the goodwill. If the carrying amount of the reporting unit's goodwill is greater than the implied fair value of its goodwill, an impairment loss must be recognized for the excess and charged to operations.

Inherent in our development of the fair value of the reporting unit are the assumptions and estimates used in the income, and when appropriate, market approaches. The discounted cash flow method (income approach) calculates the present value of future cash flows projections based on assumptions and estimates derived from a review of our operating results, business plans, expected growth rates, cost of capital and tax rates. We also make certain assumptions about future economic conditions and other market data. We develop our assumptions based on our historical results including sales growth, operating profits, working capital levels and tax rates. The market approaches calculate estimated fair values based on valuation multiples derived from stock prices and enterprise values of publicly traded companies that are comparable to our Company (guideline public company method) and based on valuation multiples derived from actual transactions for comparable public and private companies (guideline transaction method).

We believe that the discounted cash flow model is sensitive to the selected discount rate and the market approaches are sensitive to valuation multiples used. We use third-party valuation specialists to help develop the appropriate discount rate and valuation multiples. We use standard valuation practices to arrive at a weighted average cost of capital based on the market and guideline public companies. The higher the discount rate, the lower the discounted cash flows. While we believe that our estimate of future cash flows and market approach valuations are reasonable, different assumptions could significantly affect our valuations and result in impairments in the future.

During the fourth quarter of 2014 and 2013 and third quarter of 2012, we recognized a pre-tax non-cash goodwill impairment charge of \$12.9 million, \$0.3 million and \$1.0 million, respectively. The charge in 2014 related to our Asia-Pacific reporting unit while the charges in 2013 and 2012 related to our BRAE reporting unit within our Americas segment. As of December 31, 2014, the goodwill for the Asia-Pacific reporting unit was fully impaired and as of December 31, 2013, the goodwill for BRAE had been fully impaired.

As of our October 26, 2014 testing date, we had approximately \$490.3 million of goodwill on our balance sheet. The results of the 2014 reporting units' quantitative impairment analyses are summarized in the table below:

Goodwill balance	Carrying value of equity of reporting unit (in millions)	Estimated fair value (implied value of equity)
Reporting unit		
U.S. Drains and Water Re-use	\$ 34.6	\$ 56.9
Asia-Pacific	\$ 12.9	\$ 71.3
		\$ 82.1
		\$ 61.9

Our impairment testing indicated that the fair value of the U.S. Drains and Water Re-use reporting unit exceeded the carrying value, thereby resulting in no impairment. Our impairment testing

indicated that the carrying value of the Asia-Pacific reporting unit exceeded the fair value. We estimated the fair value of the Asia-Pacific reporting unit using the present value of expected future cash flows that reflect the impact of certain product line rationalization efforts associated with the initial phase of the Americas and Asia-Pacific transformation and restructuring program, including the sale of certain assets. In the second step of the impairment test, the carrying value of the goodwill exceeded the implied fair value of goodwill, resulting in a full impairment.

Depending on the reporting unit, the underlying analyses supporting our fair value assessment are related to our comparable companies' historical and projected results, current transaction values and our outlook of our business' long-term performance, which included key assumptions as to the appropriate revenue and EBITDA multiples, discount rate and long-term growth rate. In connection with our 2014 impairment tests, we utilized discount rates ranging from 12% - 13.5% depending on the reporting unit, growth rates beyond our planning periods ranging from 0% to 10% and a long-term terminal growth rate of 3%. Future increases in discount rates due to changing interest rates or a declining economic environment and different market multiples could impact our assumptions and the value of our reporting units, and goodwill may be at risk for impairment in the future.

Intangible assets such as trademarks and trade names are generally recorded in connection with a business acquisition. Values assigned to intangible assets are determined by an independent valuation firm based on our estimates and judgments regarding expectations of the success and life cycle of products and technology acquired. During 2014, 2013 and 2012, we recognized non-cash pre-tax charges of approximately \$1.3 million, \$0.7 million and \$0.4 million, respectively, as an impairment of certain of our indefinite-lived intangible assets. Revised accounting guidance issued in 2012 allows us to perform a qualitative impairment assessment of indefinite-lived intangible assets consistent with the goodwill guidance noted previously. For our 2014 impairment assessment, which occurred as of October 26, 2014, we performed quantitative assessments for all indefinite-lived intangible assets. The methodology we employed was the relief from royalty method, a subset of the income approach.

Product liability and workers' compensation costs

Because of retention requirements associated with our insurance policies, we are generally self-insured for potential product liability claims and for workers' compensation costs associated with workplace accidents. We are subject to a variety of potential liabilities in connection with product liability cases and we maintain high-deductible product liability and other insurance coverage, which we believe to be generally in accordance with industry practices. For product liability cases in the U.S., management establishes its product liability accrual, which includes legal costs associated with accrued claims, by utilizing third-party actuarial valuations which incorporate historical trend factors and our specific claims experience derived from loss reports provided by third-party administrators. The product liability accrual is established net of any applicable insurance coverage. Changes in the nature of product liability claims, legal costs, or the actual settlement amounts could affect the adequacy of the estimates and require changes to the accrual. Because the liability is an estimate, the ultimate liability may be more or less than reported.

Workers' compensation liabilities in the U.S. are recognized for claims incurred (including claims incurred but not reported) and for changes in the status of individual case reserves. At the time a workers' compensation claim is filed, a liability is estimated to settle the claim. The liability for workers' compensation claims is determined based on management's estimates of the nature and severity of the claims and based on analysis provided by third-party administrators and by various state statutes and reserve requirements. We have developed our own trend factors based on our specific claims experience, discounted based on risk-free interest rates. We employ third-party actuarial valuations to help us estimate our workers' compensation accrual. In other countries where workers' compensation costs are applicable, we maintain insurance coverage with limited deductible payments. Because the liability is an estimate, the ultimate liability may be more or less than reported and is subject to changes in discount rates.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

We determine the trend factors for product liability and workers' compensation liabilities based on consultation with outside actuaries.

We maintain excess liability insurance with outside insurance carriers to minimize our risks related to claims in excess of all self-insured positions. Any material change in the aforementioned factors could have an adverse impact on our operating results.

Legal contingencies

We are a defendant in numerous legal matters including those involving environmental issues and product liability as discussed in more detail in Part I, Item 1. "Business Product Liability, Environmental and Other Litigation Matters." As required by GAAP, we determine whether an estimated loss from a loss contingency should be accrued by assessing whether a loss is deemed probable and the loss amount can be reasonably estimated. When it is possible to estimate reasonably possible loss or range of loss above the amount accrued, that estimate is aggregated and disclosed. Estimates of potential outcomes of these contingencies are often developed in consultation with outside counsel. While this assessment is based upon all available information, litigation is inherently uncertain and the actual liability to fully resolve litigation cannot be predicted with any assurance of accuracy. In the event of an unfavorable outcome in one or more legal matters, the ultimate liability may be in excess of amounts currently accrued, if any, and may be material to our operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to us, management believes that the ultimate outcome of all legal contingencies, as they are resolved over time, is not likely to have a material adverse effect on our financial condition, though the outcome could be material to our operating results for any particular period depending, in part, upon the operating results for such period.

Pension benefits

We account for our pension plans in accordance with GAAP, which involves recording a liability or asset based on the projected benefit obligation and the fair value of plan assets. Assumptions are made regarding the valuation of benefit obligations and the performance of plan assets. The primary assumptions are as follows:

Weighted average discount rate this rate is used to estimate the current value of future benefits. This rate is adjusted based on movement in long-term interest rates.

Expected long-term rate of return on assets this rate is used to estimate future growth in investments and investment earnings. The expected return is based upon a combination of historical market performance and anticipated future returns for a portfolio reflecting the mix of equity, debt and other investments indicative of our plan assets.

We determine these assumptions based on consultation with outside actuaries and investment advisors. Any variance in these assumptions could have a significant impact on future recognized pension costs, assets and liabilities.

On April 28, 2014, our Board of Directors voted to terminate the Pension Plan and Supplemental Employees Retirement Plan. These terminations follow amendments to the Pension Plan and SERP to cease (or "freeze") benefit accruals for eligible employees under those plans effective December 31, 2011. The Pension Plan was terminated effective July 31, 2014. Distribution of plan assets pursuant to the termination will not be made until the plan termination satisfies the regulatory requirements prescribed by the Internal Revenue Service and the Pension Benefit Guaranty Corporation, which is expected to occur in late 2015. The SERP was terminated effective May 15, 2014. We will settle all liabilities under the SERP in accordance with Section 409A of the Internal Revenue Code by paying lump sums to plan participants at least twelve and no more than twenty four months following the termination date. The Board of Directors authorized us to make such contributions to the Pension Plan and SERP as may be necessary to make the plans sufficient to settle all plan liabilities. Presently, we

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

expect the distributions for the two plans to be completed by December 31, 2015. Based on our third-party actuary's estimate using preliminary assumptions, our estimated cash outflow is approximately \$40 million to \$45 million. Refer to Note 13 of the Notes to Consolidated Financial Statements Item for further details.

Income taxes

We estimate and use our expected annual effective income tax rates to accrue income taxes. Effective tax rates are determined based on budgeted earnings before taxes, including our best estimate of permanent items that will affect the effective rate for the year. Management periodically reviews these rates with outside tax advisors and changes are made if material variances from expectations are identified.

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

A valuation allowance is provided to offset any net deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. We consider estimated future taxable income and future reversals of the deferred tax liabilities in assessing the need for a valuation allowance.

New Accounting Standards

In January 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-01, "Income Statement Extraordinary and Unusual Items: Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items". ASU 2015-01 eliminates from U.S. GAAP the concept of extraordinary items as part of its initiative to reduce complexity in accounting standards. ASU 2015-01 is effective in the first quarter of 2016 for public companies with calendar year ends, with early adoption permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The ASU may be applied prospectively or retrospectively to all prior periods presented. The adoption of this guidance is not expected to have a material impact on the Company's financial statements.

In June 2014, the FASB issued ASU 2014-12, "Compensation Stock Compensation: Accounting for Share Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period". ASU 2014-12 clarifies that performance targets that could be achieved after the requisite period should be treated as performance conditions. Those performance conditions would not be reflected in estimating the grant date fair value of the award, but instead would be accounted for when the achievement of the performance condition becomes probable. ASU 2014-12 is effective in the first quarter of 2016 for public companies with calendar year ends, with early adoption permitted. The adoption of this guidance is not expected to have a material impact on the Company's financial statements.

In May 2014, FASB issued ASU 2014-09, "Revenue from Contracts with Customers". ASU 2014-09 converges revenue recognition under U.S. GAAP and International Financial Reporting Standards ("IFRS"). For U.S. GAAP, the standard generally eliminates transaction and industry-specific revenue recognition guidance. This includes current guidance on long-term construction-type contracts, software arrangements, real estate sales, telecommunication arrangements, and franchise sales. Under the new standard, revenue is recognized based on a five-step model. ASU 2014-09 is effective in the first quarter of 2017 for public companies with calendar year ends, and early adoption is not permitted for

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

public companies under U.S. GAAP. The Company is assessing the impact of this standard on the Company's financial statements.

In April 2014, FASB issued ASU 2014-08, "Presentation of Financial Statements and Property, Plant, and Equipment: Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity". ASU 2014-08 will change the definition of discontinued operations and limit discontinued operations presentation to disposals of components representing a strategic shift that will have a major effect on the operations and financial results of the issuer. ASU 2014-08 is effective in the first quarter of 2015 for public companies with calendar year ends, with early adoption permitted. The Company early adopted the ASU in 2014. The adoption of this guidance has not had a material impact on the Company's financial statements.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We use derivative financial instruments primarily to reduce exposure to adverse fluctuations in foreign exchange rates, interest rates and costs of certain raw materials used in the manufacturing process. We do not enter into derivative financial instruments for trading purposes. As a matter of policy, all derivative positions are used to reduce risk by hedging underlying economic exposure. The derivatives we use are instruments with liquid markets. See Note 15 of Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2014.

Our consolidated earnings, which are reported in United States dollars, are subject to translation risks due to changes in foreign currency exchange rates. This risk is concentrated in the exchange rate between the U.S. dollar and the euro; the U.S. dollar and the Canadian dollar; and the U.S. dollar and the Chinese yuan.

Our foreign subsidiaries transact most business, including certain intercompany transactions, in foreign currencies. Such transactions are principally purchases or sales of materials and are denominated in European currencies or the U.S. or Canadian dollar. We use foreign currency forward exchange contracts from time to time to manage the risk related to intercompany purchases that occur during the course of a year and certain open foreign currency denominated commitments to sell products to third parties. At December 31, 2014 we did not have any open forward exchange contracts.

We have historically had a low exposure on the cost of our debt to changes in interest rates. Information about our long-term debt including principal amounts and related interest rates appears in Note 10 of Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2014.

We purchase significant amounts of bronze ingot, brass rod, cast iron, stainless steel and plastic, which are utilized in manufacturing our many product lines. Our operating results can be adversely affected by changes in commodity prices if we are unable to pass on related price increases to our customers. We manage this risk by monitoring related market prices, working with our suppliers to achieve the maximum level of stability in their costs and related pricing, seeking alternative supply sources when necessary and passing increases in commodity costs to our customers, to the maximum extent possible, when they occur.

Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

The financial statements listed in section (a) (1) of "Part IV, Item 15. Exhibits and Financial Statement Schedules" of this annual report are incorporated herein by reference.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

Item 9A. CONTROLS AND PROCEDURES.

As required by Rule 13a-15(b) under the Securities Exchange Act of 1934, as amended, or Exchange Act, as of the end of the period covered by this report, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and interim Chief Financial Officer, of the effectiveness of our disclosure controls and procedures. In designing and evaluating our disclosure controls and procedures, we recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management necessarily applies its judgment in evaluating and implementing possible controls and procedures. The effectiveness of our disclosure controls and procedures is also necessarily limited by the staff and other resources available to us and the geographic diversity of our operations. Based upon that evaluation, the Chief Executive Officer and interim Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act are accumulated and communicated to our management, including our Chief Executive Officer and interim Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There was no change in our internal control over financial reporting that occurred during the quarter ended December 31, 2014, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. In connection with these rules, we will continue to review and document our disclosure controls and procedures, including our internal control over financial reporting, and may from time to time make changes aimed at enhancing their effectiveness and to ensure that our systems evolve with our business.

Management's Annual Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management, including our Chief Executive Officer and interim Chief Financial Officer, assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

Organizations of the Treadway Commission (COSO) in Internal Control Integrated Framework (1992).

Based on our assessment and those criteria, management believes that the Company maintained effective internal control over financial reporting as of December 31, 2014.

On December 1, 2014, the Company completed the acquisition of AERCO International, Inc. ("AERCO"), in a share purchase transaction. The audited consolidated financial statements of the Company include the results of AERCO, including total assets of \$329 million and total revenues of \$5.3 million, but management's assessment does not include an assessment of the internal control over financial reporting of AERCO.

The independent registered public accounting firm that audited the Company's consolidated financial statements included elsewhere in this Annual Report on Form 10-K has issued an audit report on the Company's internal control over financial reporting. That report appears immediately following this report.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Watts Water Technologies, Inc.:

We have audited Watts Water Technologies, Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Watts Water Technologies, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Annual Report on Internal Control Over Financial Reporting*. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Watts Water Technologies, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Watts Water Technologies, Inc. acquired AERCO during 2014, and management excluded from its assessment of the effectiveness of Watts Water Technologies, Inc.'s internal control over financial reporting as of December 31, 2014, AERCO's internal control over financial reporting associated with total assets of \$329 million and total revenues of \$5.3 million included in the consolidated financial statements of Watts Water Technologies, Inc. and subsidiaries as of and for the year ended December 31, 2014. Our audit of internal control over financial reporting of Watts Water Technologies, Inc. also excluded an evaluation of the internal control over financial reporting of AERCO.

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Watts Water Technologies, Inc. and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive (loss) income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2014, and our report dated February 26, 2015 expressed an unqualified opinion on those consolidated financial statements.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Watts Water Technologies, Inc.:

We have audited the accompanying consolidated balance sheets of Watts Water Technologies, Inc. and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive (loss) income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2014. In connection with our audits of the consolidated financial statements, we also have audited the financial statement Schedule II Valuation and Qualifying Accounts. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Watts Water Technologies, Inc. and subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Watts Water Technologies, Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 26, 2015 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements

(1) Description of Business

Watts Water Technologies, Inc. (the Company), through its subsidiaries, designs, manufactures and sells an extensive line of water safety and flow control products that improve the quality, conservation, safety and control of water predominantly in the Americas and Europe, Middle East and Africa (EMEA) with a presence in Asia-Pacific.

(2) Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its majority and wholly owned subsidiaries. Upon consolidation, all significant intercompany accounts and transactions are eliminated.

Cash Equivalents

Cash equivalents consist of instruments with remaining maturities of three months or less at the date of purchase and consist primarily of certificates of deposit and money market funds, for which the carrying amount is a reasonable estimate of fair value.

Allowance for Doubtful Accounts

Allowance for doubtful accounts includes reserves for bad debts, sales returns and allowances and cash discounts. The Company analyzes the aging of accounts receivable, individual accounts receivable, historical bad debts, concentration of receivables by customer, customer credit worthiness, current economic trends, and changes in customer payment terms. The Company specifically analyzes individual accounts receivable and establishes specific reserves against financially troubled customers. In addition, factors are developed in certain regions utilizing historical trends of sales and returns and allowances and cash discount activities to derive a reserve for returns and allowances and cash discounts.

Concentration of Credit

The Company sells products to a diversified customer base and, therefore, has no significant concentrations of credit risk. In 2014, 2013, and 2012, no customer accounted for 10% or more of the Company's total sales.

Inventories

Inventories are stated at the lower of cost or market, using primarily the first-in, first-out method. Market value is determined by replacement cost or net realizable value. Historical usage is used as the basis for determining the reserve for excess or obsolete inventories.

Goodwill and Other Intangible Assets

Goodwill is recorded when the consideration paid for acquisitions exceeds the fair value of net tangible and intangible assets acquired. Goodwill and other intangible assets with indefinite useful lives are not amortized, but rather are tested at least annually for impairment.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(2) Accounting Policies (Continued)

Impairment of Goodwill and Long-Lived Assets

The changes in the carrying amount of goodwill by geographic segment are as follows:

	Year Ended December 31, 2014							Net Goodwill December 31, 2014
	Balance January 1, 2014	Gross Balance		Balance December 31, 2014	Accumulated Impairment Losses		Balance December 31, 2014	
		Acquired During the Period	Foreign Currency Translation and Other		Balance January 1, 2014	Impairment Loss During the Period		
(in millions)

Goodwill is tested for impairment at least annually or more frequently if events or circumstances indicate that it is "more likely than not" that goodwill might be impaired, such as a change in business conditions. The Company performs its annual goodwill impairment assessment in the fourth quarter of each year.

On December 1, 2014, the Company completed the acquisition of AERCO International, Inc. ("AERCO"), in a share purchase transaction. The aggregate purchase price, including an estimated working capital adjustment, was approximately \$272.2 million and is subject to a final post-closing working capital adjustment. The Company accounted for the transaction as a business combination. The Company completed a purchase price allocation that resulted in the recognition of \$174.3 million in goodwill and \$102.4 million in intangible assets.

As of the end of the fourth quarter of 2014, management determined that it was "more likely than not" that a significant portion of the Asia-Pacific reporting unit's third party and intersegment net sales were expected to decline as a result of the initial phase of the Americas and Asia-Pacific transformation and restructuring program. Based on this factor, the Company performed a quantitative impairment analysis for the Asia-Pacific reporting unit. The Company completed a fair value assessment of the net assets of the reporting unit and recorded an impairment of \$12.9 million in the fourth quarter of 2014. The Company estimated the fair value of the reporting unit using the present value of expected

future cash flows that reflect the impact of certain product line rationalization efforts associated with the initial phase of the Americas and Asia-Pacific transformation and restructuring program, including the sale of certain assets. In the second step of the impairment test, the carrying

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(2) Accounting Policies (Continued)

value of the goodwill exceeded the implied fair value of goodwill, resulting in a full impairment. There was no tax benefit associated with the impairment and the \$12.9 million charge eliminated all goodwill on the Asia-Pacific reporting unit. See Note 19 for further discussion on the Company's exit plans impacting the Americas and Asia-Pacific.

The Company recorded pre-tax goodwill impairment charges of \$0.3 million and \$1.0 million in 2013 and 2012, respectively, for the Blue Ridge Atlantic Enterprises, Inc. (BRAE) reporting unit. The Company had determined that the future prospects for its Blue Ridge Atlantic Enterprises, Inc. (BRAE) reporting unit in the Americas were lower than originally estimated as future sales growth expectations had been reduced a number of times since the 2010 acquisition of BRAE. The BRAE goodwill balance was fully impaired in 2013. The goodwill impairment charges were offset by the reduction in anticipated earnout payments of equal amounts, with no remaining earnout liability as of December 31, 2013. The Company estimated the fair value of the reporting unit using the expected present value of future cash flows.

The EMEA reporting unit represents the EMEA geographic segment excluding the Blücher reporting unit and had a goodwill balance of \$195.8 million as of December 31, 2014. The Company continues to monitor the EMEA reporting unit's performance considering the current economic environment in Europe and impact on operating results and growth expectations. At the annual impairment date of October 26, 2014, the Company performed a qualitative fair value assessment, including an evaluation of certain key assumptions. The Company concluded that the fair value of the EMEA reporting unit continued to exceed its carrying value.

Indefinite-lived intangibles are tested for impairment at least annually or more frequently if events or circumstances, such as a change in business conditions, indicate that it is "more likely than not" that an intangible asset might be impaired. The Company performs its annual indefinite-lived intangibles impairment assessment in the fourth quarter of each year. For the 2014, 2013 and 2012 impairment assessments, the Company performed quantitative assessments for all indefinite-lived intangible assets. The methodology employed was the relief from royalty method, a subset of the income approach. Based on the results of the assessment, the Company recognized non-cash pre-tax impairment charges in 2014, 2013 and 2012 of approximately \$1.3 million, \$0.7 million and \$0.4 million, respectively. The impairment charge of \$1.3 million in 2014 consists of a \$0.5 million impairment charge for a trade name in the Americas segment and a \$0.8 million impairment charge for a trade name in the EMEA segment. The gross carrying amount in the table below reflects the impairment charges.

Intangible assets with estimable lives and other long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. Recoverability of intangible assets with estimable lives and other long-lived assets is measured by a comparison of the carrying amount of an asset or asset group to future net undiscounted pretax cash flows expected to be generated by the asset or asset group. If these comparisons indicate that an asset is not recoverable, the impairment loss recognized is the amount by which the carrying amount of the asset or asset group exceeds the related estimated fair value. Estimated fair value is based on either discounted future pretax operating cash flows or appraised values, depending on the nature of the asset. The Company determines the discount rate for this analysis based on the weighted average cost of capital using the market and guideline public companies for the related businesses and does not allocate interest charges to the asset or asset group being measured. Judgment is required to estimate future operating cash flows.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(2) Accounting Policies (Continued)

Intangible assets include the following:

	December 31,					
	2014		2013			
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
	(in millions)					
Patents	\$ 16.2	\$ (13.3)	\$ 2.9	\$ 16.6	\$ (12.6)	\$ 4.0
Customer relationships	206.7	(87.5)	119.2	133.0	(76.4)	56.6
Technology	42.1	(12.9)	29.2	26.9	(10.9)	16.0
Trade names	20.6	(4.2)	16.4	13.7	(3.0)	10.7
Other	9.5	(5.7)	3.8	8.8	(5.6)	3.2
Total amortizable intangibles	295.1	(123.6)	171.5	199.0	(108.5)	90.5
Indefinite-lived intangible assets	38.6		38.6	41.9		41.9
Total	\$ 333.7	\$ (123.6)	\$ 210.1	\$ 240.9	\$ (108.5)	\$ 132.4

The Company acquired \$102.4 million in intangible assets as part of the AERCO acquisition, consisting primarily of customer relationships valued at \$78.5 million, developed technology of \$15.8 million and the trade name of \$7.4 million. The weighted-average amortization period in total and by asset category of customer relationships, developed technology and trade name are 15 years, 16 years, 10 years and 20 years, respectively.

Aggregate amortization expense for amortized intangible assets for 2014, 2013 and 2012 was \$15.2 million, \$14.7 million and \$15.4 million, respectively. Additionally, future amortization expense on amortizable intangible assets is expected to be \$20.5 million for 2015, \$20.1 million for 2016, \$19.7 million for 2017, \$16.2 million for 2018, and \$14.0 million for 2019. Amortization expense is provided on a straight-line basis over the estimated useful lives of the intangible assets. The weighted-average remaining life of total amortizable intangible assets is 12.2 years. Patents, customer relationships, technology, trade names and other amortizable intangibles have weighted-average remaining lives of 5.0 years, 11.9 years, 10.3 years, 14.5 years and 33.3 years, respectively. Indefinite-lived intangible assets primarily include trade names and trademarks.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost. Depreciation is provided on a straight-line basis over the estimated useful lives of the assets, which range from 10 to 40 years for buildings and improvements and 3 to 15 years for machinery and equipment. Leasehold improvements are depreciated over the lesser of the economic useful life of the asset or the remaining lease term.

Taxes, Other than Income Taxes

Taxes assessed by governmental authorities on sale transactions are recorded on a net basis and excluded from sales in the Company's consolidated statements of operations.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(2) Accounting Policies (Continued)

financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company recognizes tax benefits when the item in question meets the more-likely-than-not (greater than 50% likelihood of being sustained upon examination by the taxing authorities) threshold. During 2014, unrecognized tax benefits of the Company increased by a net amount of \$1.0 million. Unrecognized tax benefits increased by approximately \$1.3 million primarily due to findings during a European audit, whereby unrecognized tax benefits decreased by approximately \$0.2 million related to a settlement from the completion of a state tax audit.

As of December 31, 2014, the Company had gross unrecognized tax benefits of approximately \$1.8 million, approximately \$1.3 million of which, if recognized, would affect the effective tax rate. The difference between the amount of unrecognized tax benefits and the amount that would affect the effective tax rate consists of the federal tax benefit of state income tax items.

A reconciliation of the beginning and ending amount of unrecognized tax is as follows:

	(in millions)
Balance at January 1, 2014	\$ 0.8
Increases related to prior year tax positions	1.3
Settlements	(0.2)
Currency movement	(0.1)
Balance at December 31, 2014	\$ 1.8

The Company conducts business in a variety of locations throughout the world resulting in tax filings in numerous domestic and foreign jurisdictions. The Company is subject to tax examinations regularly as part of the normal course of business. The Company's major jurisdictions are the U.S., Canada, China, Netherlands, U.K., Germany, Italy and France. With few exceptions the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations for years before 2010. The statute of limitations in our major jurisdictions is open in the U.S. for the year 2011 and later; in Canada for 2011 and later; and in the Netherlands for 2012 and later.

The Company accounts for interest and penalties related to uncertain tax positions as a component of income tax expense.

Foreign Currency Translation

The financial statements of subsidiaries located outside the United States generally are measured using the local currency as the functional currency. Balance sheet accounts, including goodwill, of foreign subsidiaries are translated into United States dollars at year-end exchange rates. Income and expense items are translated at weighted average exchange rates for each period. Net translation gains or losses are included in other comprehensive income, a separate component of stockholders' equity. The Company does not provide for U.S. income taxes on foreign currency translation adjustments since it does not provide for such taxes on undistributed earnings of foreign subsidiaries. Gains and losses from foreign currency transactions of these subsidiaries are included in net earnings.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(2) Accounting Policies (Continued)

Stock-Based Compensation

The Company records compensation expense in the financial statements for share-based awards based on the grant date fair value of those awards. Stock-based compensation expense includes an estimate for pre-vesting forfeitures and is recognized over the requisite service periods of the awards on a straight-line basis, which is generally commensurate with the vesting term. The benefits associated with tax deductions in excess of recognized compensation cost are reported as a financing cash flow.

At December 31, 2014, the Company had one stock-based compensation plan with total unrecognized compensation costs related to unvested stock-based compensation arrangements of approximately \$20.2 million and a total weighted average remaining term of 1.9 years. For 2014, 2013 and 2012, the Company recognized compensation costs related to stock-based programs of approximately \$8.6 million, \$9.6 million and \$6.6 million, respectively. In 2014, the Company began recognizing certain stock compensation costs in cost of goods sold based on the allocation of costs to its three operating segments. For the 2014 stock compensation expense, \$0.6 million was recorded in cost of goods sold and \$8.0 million was recorded in selling, general and administrative expenses. In 2013 and 2012, the compensation costs were recognized in selling, general and administrative expenses. For 2014, 2013 and 2012, the Company recorded approximately \$0.7 million, \$1.2 million and \$0.7 million, respectively, of tax benefits for the compensation expense relating to its stock options. For 2014, 2013 and 2012, the Company recorded approximately \$1.6 million, \$1.9 million and \$1.4 million, respectively, of tax benefit for its other stock-based plans. For 2014, 2013 and 2012, the recognition of total stock-based compensation expense impacted both basic and diluted net income per common share by \$0.18, \$0.14 and \$0.10, respectively.

Net Income Per Common Share

Basic net income per common share is calculated by dividing net income by the weighted average number of common shares outstanding. The calculation of diluted income per share assumes the conversion of all dilutive securities (see Note 12).

Net income and number of shares used to compute net income per share, basic and assuming full dilution, are reconciled below:

	Years Ended December 31,								
	2014			2013			2012		
	Net Income	Shares	Per Share Amount	Net Income	Shares	Per Share Amount	Net Income	Shares	Per Share Amount
(Amounts in millions, except per share information)									
Basic EPS	\$ 50.3	35.3	\$ 1.42	\$ 58.6	35.5	\$ 1.65	\$ 68.4	36.0	\$ 1.90
Dilutive securities, principally common stock options		0.1			0.1			0.1	
Diluted EPS	\$ 50.3	35.4	\$ 1.42	\$ 58.6	35.6	\$ 1.65	\$ 68.4	36.1	\$ 1.90

The computation of diluted net income per share for the years ended December 31, 2014, 2013 and 2012 excludes the effect of the potential exercise of options to purchase approximately 0.3 million, 0.2 million and 0.2 million shares, respectively, because the exercise price of the option was greater than the average market price of the Class A common stock and the effect would have been anti-dilutive.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(2) Accounting Policies (Continued)

On April 30, 2013, the Board of Directors authorized the repurchase of up to \$90.0 million of the Company's Class A common stock from time to time on the open market or in privately negotiated transactions. The timing and number of any shares repurchased will be determined by the Company's management based on its evaluation of market conditions. Repurchases may also be made under a Rule 10b5-1 plan, which would permit shares to be repurchased when the Company might otherwise be precluded from doing so under insider trading laws. The repurchase program may be suspended or discontinued at any time, subject to the terms of any Rule 10b5-1 plan the Company may enter into with respect to the repurchase program. During 2014, the Company repurchased approximately 670,000 shares of Class A common stock at a cost of approximately \$39.6 million. During 2013, the Company repurchased approximately 454,000 shares of Class A common stock at a cost of approximately \$23.0 million.

On May 16, 2012, the Board of Directors authorized a stock repurchase program of up to two million shares of the Company's Class A common stock. The stock repurchase program was completed in July 2012, as the Company repurchased the entire two million shares of Class A common stock at a cost of approximately \$65.8 million.

Financial Instruments

In the normal course of business, the Company manages risks associated with commodity prices, foreign exchange rates and interest rates through a variety of strategies, including the use of hedging transactions, executed in accordance with the Company's policies. The Company's hedging transactions include, but are not limited to, the use of various derivative financial and commodity instruments. As a matter of policy, the Company does not use derivative instruments unless there is an underlying exposure. Any change in value of the derivative instruments would be substantially offset by an opposite change in the value of the underlying hedged items. The Company does not use derivative instruments for trading or speculative purposes.

Derivative instruments may be designated and accounted for as either a hedge of a recognized asset or liability (fair value hedge) or a hedge of a forecasted transaction (cash flow hedge). For a fair value hedge, both the effective and ineffective portions of the change in fair value of the derivative instrument, along with an adjustment to the carrying amount of the hedged item for fair value changes attributable to the hedged risk, are recognized in earnings. For a cash flow hedge, changes in the fair value of the derivative instrument that are highly effective are deferred in accumulated other comprehensive income or loss until the underlying hedged item is recognized in earnings. There were no cash flow hedges as of December 31, 2014 or December 31, 2013.

If a fair value or cash flow hedge were to cease to qualify for hedge accounting or be terminated, it would continue to be carried on the balance sheet at fair value until settled, but hedge accounting would be discontinued prospectively. If a forecasted transaction were no longer probable of occurring, amounts previously deferred in accumulated other comprehensive income would be recognized immediately in earnings. On occasion, the Company may enter into a derivative instrument that does not qualify for hedge accounting because it is entered into to offset changes in the fair value of an underlying transaction which is required to be recognized in earnings (natural hedge). These instruments are reflected in the Consolidated Balance Sheets at fair value with changes in fair value recognized in earnings.

Foreign currency derivatives include forward foreign exchange contracts primarily for Canadian dollars. Metal derivatives include commodity swaps for copper.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(2) Accounting Policies (Continued)

Portions of the Company's outstanding debt are exposed to interest rate risks. The Company monitors its interest rate exposures on an ongoing basis to maximize the overall effectiveness of its interest rates.

Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. An entity is required to maximize the use of observable inputs, where available, and minimize the use of unobservable inputs when measuring fair value.

The Company has certain financial assets and liabilities that are measured at fair value on a recurring basis and certain nonfinancial assets and liabilities that may be measured at fair value on a nonrecurring basis. The fair value disclosures of these assets and liabilities are based on a three-level hierarchy, which is defined as follows:

Level 1 Quoted prices in active markets for identical assets or liabilities that the entity has the ability to access at the measurement date.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Assets and liabilities subject to this hierarchy are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability.

Shipping and Handling

Shipping and handling costs included in selling, general and administrative expense amounted to \$61.8 million, \$61.3 million and \$58.4 million for the years ended December 31, 2014, 2013 and 2012, respectively. The 2013 and 2012 shipping and handling costs disclosed have been updated to include handling costs in order to be comparable with the current year.

Research and Development

Research and development costs included in selling, general, and administrative expense amounted to \$22.5 million, \$21.5 million and \$20.4 million for the years ended December 31, 2014, 2013 and 2012, respectively.

Revenue Recognition

The Company recognizes revenue when all of the following criteria have been met: the Company has entered into a binding agreement, the product has been shipped and title passes, the sales price to the customer is fixed or is determinable, and collectability is reasonably assured. Provisions for estimated returns and allowances are made at the time of sale, and are recorded as a reduction of sales and included in the allowance for doubtful accounts in the Consolidated Balance Sheets. The Company

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(2) Accounting Policies (Continued)

records provisions for sales incentives (primarily volume rebates), as an adjustment to net sales, at the time of sale based on estimated purchase targets.

Basis of Presentation

Certain amounts in the 2013 and 2012 consolidated financial statements have been reclassified to permit comparison with the 2014 presentation. These reclassifications had no effect on reported results of operations or stockholders' equity.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

New Accounting Standards

In January 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-01, "Income Statement Extraordinary and Unusual Items: Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items". ASU 2015-01 eliminates from U.S. GAAP the concept of extraordinary items as part of its initiative to reduce complexity in accounting standards. ASU 2015-01 is effective in the first quarter of 2016 for public companies with calendar year ends, with early adoption permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The ASU may be applied prospectively or retrospectively to all prior periods presented. The adoption of this guidance is not expected to have a material impact on the Company's financial statements.

In June 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-12, "Compensation Stock Compensation: Accounting for Share Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period". ASU 2014-12 clarifies that performance targets that could be achieved after the requisite period should be treated as performance conditions. Those performance conditions would not be reflected in estimating the grant date fair value of the award, but instead would be accounted for when the achievement of the performance condition becomes probable. ASU 2014-12 is effective in the first quarter of 2016 for public companies with calendar year ends, with early adoption permitted. The adoption of this guidance is not expected to have a material impact on the Company's financial statements.

In May 2014, FASB issued ASU 2014-09, "Revenue from Contracts with Customers". ASU 2014-09 converges revenue recognition under U.S. GAAP and International Financial Reporting Standards ("IFRS"). For U.S. GAAP, the standard generally eliminates transaction and industry-specific revenue recognition guidance. This includes current guidance on long-term construction-type contracts, software arrangements, real estate sales, telecommunication arrangements, and franchise sales. Under the new standard, revenue is recognized based on a five-step model. ASU 2014-09 is effective in the first quarter of 2017 for public companies with calendar year ends, and early adoption is not permitted for public companies under U.S. GAAP. The Company is assessing the impact of this standard on the Company's financial statements.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(2) Accounting Policies (Continued)

In April 2014, FASB issued ASU 2014-08, "Presentation of Financial Statements and Property, Plant, and Equipment: Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity". ASU 2014-08 will change the definition of discontinued operations and limit discontinued operations presentation to disposals of components representing a strategic shift that will have a major effect on the operations and financial results of the issuer. ASU 2014-08 is effective in the first quarter of 2015 for public companies with calendar year ends, with early adoption permitted. The Company early adopted the ASU in 2014. The adoption of this guidance has not had a material impact on the Company's financial statements.

(3) Discontinued Operations

On August 1, 2013, the Company completed the sale of all of the outstanding shares of an indirect wholly-owned subsidiary, Watts Insulation GmbH (Austroflex), receiving net cash proceeds of \$7.9 million. The Company chose to divest Austroflex because it did not meet performance expectations. The loss after tax on disposal of the business was approximately \$2.2 million. Further, during the year ended December 31, 2011, the Company wrote down Austroflex's long-lived assets by \$14.8 million. The Company did not have a substantial continuing involvement in Austroflex's operations and cash flows, and therefore Austroflex's results of operations have been presented as discontinued operations for all periods presented.

On December 21, 2012, the Company completed the sale of all of the outstanding shares of its subsidiary, Flomatic Corporation (Flomatic). The sale excluded the backflow product line of Flomatic, which was retained by the Company. Flomatic Corporation, located in Glens Falls, New York, specialized in manufacturing and selling check valves, foot valves and automatic hydraulic control valves for the well water industry, a product line not core to the Company's business. The Company acquired Flomatic as part of its acquisition of Socla in April 2011. The Company determined that it would not have a substantial continuing involvement in Flomatic's operations and cash flows, and therefore Flomatic's results of operations have been presented as discontinued operations for all periods presented.

Condensed operating statements for discontinued operations are summarized below:

	Years Ended December 31,	
	2013	2012
	(in millions)	
Operating income Flomatic	\$	\$ 1.3
Loss on disposal Flomatic		(3.8)
Operating (loss) income Austroflex	(0.2)	0.2
Loss on disposal Austroflex	(2.2)	
Other		1.4
Loss before income taxes	(2.4)	(0.9)
Income tax benefit (expense)	0.1	(1.1)
Loss from discontinued operations, net of taxes	\$ (2.3)	\$ (2.0)

The Company did not recognize a tax benefit on the loss on the disposal of the Flomatic and Austroflex shares, as the Company does not believe it is more likely than not that a tax benefit would be realized.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(3) Discontinued Operations (Continued)

Revenues reported in discontinued operations are as follows:

	Years Ended December 31,	
	2013	2012
	(in millions)	
Flomatic revenues	\$	\$ 12.9
Austroflex revenues		9.5 18.2
Total revenues	\$ 9.5	\$ 31.1

(4) Restructuring and Other Charges, Net

The Company's Board of Directors approves all major restructuring programs that involve the discontinuance of significant product lines or the shutdown of significant facilities. From time to time, the Company takes additional restructuring actions, including involuntary terminations that are not part of a major program. The Company accounts for these costs in the period that the individual employees are notified or the liability is incurred. These costs are included in restructuring and other charges in the Company's consolidated statements of operations.

A summary of the pre-tax cost by restructuring program is as follows:

	Years Ended December 31,		
	2014	2013	2012
	(in millions)		
Restructuring costs:			
2013 Actions	\$ 3.8	\$ 4.1	\$
Other Actions	11.3	5.9	5.2
Total restructuring charges	15.2	10.0	5.2
Adjustment related to contingent liability reduction		(0.2)	(1.0)
Less: amount included in cost of goods sold		(1.1)	
Total restructuring and other charges, net	\$ 15.2	\$ 8.7	\$ 4.2

The Company recorded pre-tax restructuring charges in its business segments as follows:

	Years Ended December 31,		
	2014	2013	2012
	(in millions)		
Americas	\$ 2.1	\$ 1.3	\$ 1.3
EMEA	12.1	8.7	3.9

Corporate	0.8		

Total	\$	15.2	\$	10.0	\$	5.2
-------	----	------	----	------	----	-----

2013 Actions

On July 30, 2013, the Board of Directors authorized a restructuring program with respect to the Company's EMEA segment to reduce its European manufacturing footprint, improve organizational

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(4) Restructuring and Other Charges, Net (Continued)

and operational efficiency and better align costs with expected revenues in response to changing market conditions. The restructuring program is expected to include a pre-tax charge to earnings totaling approximately \$8.1 million, all of which is expected to be recorded through the end of fiscal 2015. In 2014, the total expected costs of the planned actions were reduced from \$14.0 million to \$8.1 million, primarily related to reduced severance costs and favorable foreign exchange rates with the weakening of the euro. Approximately \$1.5 million of expected severance and asset write-down costs that were initially anticipated in the 2013 actions have been included in the 2014 EMEA other actions discussed below. The total 2013 actions charge will include costs for severance benefits, relocation, site clean-up, professional fees and certain asset write-downs. The total net after-tax charge for the restructuring program is expected to be approximately \$5.7 million. The net after-tax charges incurred in 2014 and 2013 were \$2.7 million and \$2.9 million, respectively.

Details of the Company's 2013 European footprint program reserve for the year ended December 31, 2014 and 2013 are as follows:

	Severance (in millions)	
Balance at December 31, 2012	\$	
Net pre-tax restructuring charges		4.1
Utilization and foreign currency impact		(2.1)
Balance at December 31, 2013	\$	2.0
Net pre-tax restructuring charges		3.8
Utilization and foreign currency impact		(4.3)
Balance at December 31, 2014	\$	1.5

The following table summarizes total expected, incurred and remaining pre-tax costs for 2013 European restructuring program actions by type, and all attributable to the EMEA reportable segment:

	Severance		Legal and consultancy		Asset write-downs		Facility exit and other		Total	
	(in millions)									
Expected costs	\$	7.5	\$	0.2	\$	0.2	\$	0.2	\$	8.1
Costs incurred 2013		(4.1)								(4.1)
Costs incurred 2014		(3.2)		(0.2)		(0.2)		(0.2)		(3.8)
Remaining costs at December 31, 2014	\$	0.2	\$		\$		\$		\$	0.2

Other Actions

The Company also periodically initiates other actions which are not part of a major program. Total "Other Actions" pre-tax restructuring expense was \$11.3 million, \$5.9 million and \$5.2 million in 2014, 2013 and 2012, respectively.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(4) Restructuring and Other Charges, Net (Continued)

In the fourth quarter of 2014, management initiated certain restructuring actions and strategic initiatives with respect to the Company's EMEA segment in response to the ongoing economic challenges in Europe and additional product rationalization. The restructuring actions primarily include expected severance benefits and limited costs relating to asset write offs, professional fees and relocation. The total pre-tax charge for these restructuring initiatives is expected to be approximately \$9.9 million, of which approximately \$6.9 million of pre-tax severance charges were incurred in the fourth quarter of 2014. The remaining expected costs relate to severance, asset write-offs, professional fees and relocation costs and are expected to be completed by the end of the fourth quarter of fiscal 2016.

The following table summarizes total expected, incurred and remaining pre-tax costs for the EMEA restructuring actions and strategic initiatives which began in the fourth quarter of 2014:

	Severance	Legal and consultancy	Asset write-downs	Facility exit and other	Total
	(in millions)				
Expected costs	\$ 8.8	\$ 0.1	\$ 0.9	\$ 0.1	\$ 9.9
Costs incurred 2014	(6.9)				(6.9)
Remaining costs at December 31, 2014	\$ 1.9	\$ 0.1	\$ 0.9	\$ 0.1	\$ 3.0

In 2014, the Company initiated restructuring activities in the Americas, Asia-Pacific and Corporate to reduce costs through reductions-in-force. Total pre-tax restructuring expense incurred relating to these initiatives was \$3.1 million and there are no remaining expected costs.

In 2013, the Company initiated restructuring activities with respect to the Company's operating facilities in EMEA, which included the relocation and closure of a manufacturing facility in Italy and other relocation initiatives in Europe. Total pre-tax restructuring expense incurred relating to these initiatives was \$1.3 million and \$4.6 million in 2014 and 2013, respectively, and there are no remaining expected costs. In 2012, the Company initiated restructuring activities in North America and Europe which continued into 2013. The restructuring activities in the Americas included the relocation of certain production activities, which included the closure of a manufacturing site, severance and shutdown costs in North America. \$1.3 million of costs were incurred in both 2013 and 2012 relating to these activities and there are no remaining expected costs.

(5) Business Acquisitions and Disposition*AERCO*

On December 1, 2014, the Company completed the acquisition of AERCO in a share purchase transaction. The aggregate purchase price was approximately \$272.2 million and was financed from a borrowing under the Company's Credit Agreement. The purchase price includes an estimated working capital adjustment of \$7.7 million and is subject to a final post-closing working capital adjustment.

AERCO is a leading provider of commercial high-efficiency boilers, water heaters and heating solutions in North America. AERCO is based in New York and its products are distributed for commercial and municipal use primarily in North America. AERCO strengthens Watts' strategic vision to expand into heat source products and strengthens the Company's solutions and system offerings.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(5) Business Acquisitions and Disposition (Continued)

The Company accounted for the transaction as a business combination. The Company completed a purchase price allocation that resulted in the recognition of \$174.3 million in goodwill and \$102.4 million in intangible assets. Intangible assets consist primarily of customer relationships valued at \$78.5 million with estimated lives of 16 years, developed technology valued at \$15.8 million with estimated lives of 10 years and trade name valued at \$7.4 million with a 20 year life. The goodwill is attributable to the workforce of AERCO and the strategic platform adjacency that will allow Watts to extend its product offerings as a result of the acquisition. Approximately \$19.4 million of the goodwill is deductible for tax purposes. The following table summarizes the value of the assets and liabilities acquired (in millions):

Accounts receivable	\$	16.7
Inventory		16.4
Fixed assets		7.6
Deferred tax assets		8.0
Other assets		7.6
Intangible assets		102.4
Goodwill		174.3
Accounts payable		(6.7)
Accrued expenses and other		(18.1)
Deferred tax liability		(36.0)
Purchase price	\$	272.2

The consolidated statement of operations for the year ended December 31, 2014 includes the results of AERCO since the acquisition date and includes \$5.3 million of revenues and \$(1.4) million of operating loss, which includes acquisition accounting charges of \$0.8 million.

Supplemental pro-forma information (unaudited)

Had the Company completed the acquisition of AERCO at the beginning of 2013, net sales, net income from continuing operations and earnings per share from continuing operations would have been as follows:

Amounts in millions (except per share information)	Years Ended	
	December 31, 2014	December 31, 2013
Net sales	\$ 1,610.1	\$ 1,562.8
Net income from continuing operations	\$ 59.7	\$ 63.4
Net income per share:		
Basic EPS continuing operations	\$ 1.69	\$ 1.79
Diluted EPS continuing operations	\$ 1.69	\$ 1.78

Net income from continuing operations for the years ended December 31, 2014 and December 31, 2013 was adjusted to include \$3.1 million and \$3.3 million, respectively, of net interest expense related to the financing and \$3.9 million and \$4.3 million, respectively, of net amortization expense resulting from the estimated allocation of purchase price to amortizable tangible and intangible assets. Net income from continuing operations for the year ended December 31, 2014 was also adjusted to exclude \$3.3 million of net acquisition-related charges and third-party costs.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(5) Business Acquisitions and Disposition (Continued)

tekmar

On January 31, 2012, the Company completed the acquisition of tekmar in a share purchase transaction. A designer and manufacturer of control systems used in heating, ventilation, and air conditioning applications, tekmar enhances the Company's hydronic systems product offerings in the U.S. and Canada and is part of the Americas segment. The initial purchase price paid was equal to approximately \$17.8 million and a contingent liability of \$5.1 million was recognized as the estimate of the acquisition date fair value of the earn-out. The Company accounted for the transaction as a business combination. The Company completed a purchase price allocation that resulted in the recognition of \$11.7 million in goodwill and \$10.1 million in intangible assets. Intangible assets consist primarily of acquired technology with an estimated life of 10 years, distributor relationships with an estimated life of 7 years, and a trade name with an estimated life of 20 years. The goodwill is not deductible for tax purposes. The results of tekmar are not material to the Company's consolidated financial statements. The results of operations for tekmar are included in the Company's Americas segment since acquisition date.

A portion of the contingent consideration was paid during 2014 and 2013, in the amount of \$2.2 million and \$1.2 million, respectively, based on performance metrics achieved in 2013 and 2012. The contingent liability was increased by \$0.5 million and \$1.0 million during the years ended December 31, 2014 and 2013, respectively, based on performance metrics achieved or expected to be achieved. The final payment based on 2014 performance will be made in 2015.

(6) Inventories, net

Inventories consist of the following:

	December 31,	
	2014	2013
	(in millions)	
Raw materials	\$ 104.8	\$ 111.3
Work-in-process	16.7	19.1
Finished goods	170.1	179.8
	\$ 291.6	\$ 310.2

Raw materials, work-in-process and finished goods are net of valuation reserves of \$27.3 million and \$29.9 million as of December 31, 2014 and 2013, respectively. Finished goods of \$16.4 million and \$16.7 million as of December 31, 2014 and 2013, respectively, were consigned.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(7) Property, Plant and Equipment

Property, plant and equipment consist of the following:

	December 31,	
	2014	2013
	(in millions)	
Land	\$ 13.9	\$ 15.2
Buildings and improvements	160.1	166.3
Machinery and equipment	343.7	353.2
Construction in progress	9.0	4.5
	526.7	539.2
Accumulated depreciation	(323.4)	(319.3)
	\$ 203.3	\$ 219.9

(8) Income Taxes

The significant components of the Company's deferred income tax liabilities and assets are as follows:

	December 31,	
	2014	2013
	(in millions)	
Deferred income tax liabilities:		
Excess tax over book depreciation	\$ 20.9	\$ 22.4
Intangibles	50.6	28.2
Goodwill	17.2	15.4
Other	4.5	3.8
Total deferred tax liabilities	93.2	69.8
Deferred income tax assets:		
Accrued expenses	20.2	21.3
Capital loss carry forward	6.2	6.1
Net operating loss carry forward	12.2	10.9
Inventory reserves	10.8	12.3
Pension accumulated other comprehensive income	22.7	16.3
Other	6.2	3.7
Total deferred tax assets	78.3	70.6
Less: valuation allowance	(12.5)	(13.1)
Net deferred tax assets	65.8	57.5
Net deferred tax liabilities	\$ (27.4)	\$ (12.3)

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(8) Income Taxes (Continued)

The provision for income taxes from continuing operations is based on the following pre-tax income:

	Years Ended December 31,		
	2014	2013	2012
	(in millions)		
Domestic	\$ 44.2	\$ 21.6	\$ 27.3
Foreign	38.9	66.2	72.9
	\$ 83.1	\$ 87.8	\$ 100.2

The provision for income taxes from continuing operations consists of the following:

	Years Ended December 31,		
	2014	2013	2012
	(in millions)		
Current tax expense:			
Federal	\$ 12.8	\$ 12.8	\$ 5.0
Foreign	20.4	19.7	21.5
State	2.7	2.5	1.3
	35.9	35.0	27.8
Deferred tax expense (benefit):			
Federal	2.1	(5.0)	4.4
Foreign	(5.2)	(2.3)	(3.5)
State		(0.8)	1.1
	(3.1)	(8.1)	2.0
	\$ 32.8	\$ 26.9	\$ 29.8

Actual income taxes reported from continuing operations are different than would have been computed by applying the federal statutory tax rate to income from continuing operations before income taxes. The reasons for this difference are as follows:

	Years Ended December 31,		
	2014	2013	2012
	(in millions)		
Computed expected federal income expense	\$ 29.1	\$ 30.8	\$ 35.0
State income taxes, net of federal tax benefit	2.1	1.0	1.5
Foreign tax rate differential	(4.2)	(5.7)	(7.4)
Goodwill impairment	3.2		
Other, net	2.6	0.8	0.7
	\$ 32.8	\$ 26.9	\$ 29.8

At December 31, 2014, the Company had foreign net operating loss carry forwards of \$41.9 million for income tax purposes before considering valuation allowances; \$26.4 million of the losses can be carried forward indefinitely, \$10.0 million expire in 2020 and \$5.5 million expire in 2023. The net

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(8) Income Taxes (Continued)

operating losses consist of \$26.4 million related to Austrian operations and \$15.5 million to Dutch operations.

At December 31, 2014, the Company has U.S. capital loss carry forwards of \$6.2 million for income tax purposes before considering valuation allowances; \$2.6 million expire in 2015, \$2.1 million expire in 2016, \$1.0 million expire in 2017 and \$0.5 million expire in 2018.

At December 31, 2014 and December 31, 2013, the Company had valuation allowances of \$12.5 million and \$13.1 million, respectively. At December 31, 2014, \$6.2 million relates to U.S. capital losses and \$6.3 million relates to Austrian net operating losses. At December 31, 2013, \$6.1 million related to U.S. capital losses and \$7.0 million related to Austrian net operating losses. Management believes that the ability of the Company to use such losses within the applicable carry forward period does not rise to the level of the more likely than not threshold. The Company does not have a valuation allowance on other deferred tax assets, as management believes that it is more likely than not that the Company will recover the net deferred tax assets. Management believes it is more likely than not that the future reversals of the deferred tax liabilities, together with forecasted income, will be sufficient to fully recover the deferred tax assets.

Changes enacted in income tax laws had no material effect on the Company in 2014, 2013 or 2012.

Undistributed earnings of the Company's foreign subsidiaries amounted to approximately \$386.0 million at December 31, 2014, \$397.2 million at December 31, 2013, and \$329.7 million at December 31, 2012. Those earnings are considered to be indefinitely reinvested and, accordingly, no provision for U.S. federal and state income taxes has been recorded thereon. Upon distribution of those earnings, in the form of dividends or otherwise, the Company will be subject to withholding taxes payable to the various foreign countries. Determination of the amount of U.S. income tax liability that would be incurred is not practicable because of the complexities associated with its hypothetical calculation; however, unrecognized foreign tax credits may be available to reduce some portion of any U.S. income tax liability. Withholding taxes of approximately \$12.0 million would be payable upon remittance of all previously unremitted earnings at December 31, 2014.

(9) Accrued Expenses and Other Liabilities

Accrued expenses and other liabilities consist of the following:

	December 31,	
	2014	2013
	(in millions)	
Commissions and sales incentives payable	\$ 38.3	\$ 40.5
Product liability and workers' compensation	30.7	33.5
Other	66.1	56.6
Income taxes payable	3.7	4.6
	\$ 138.8	\$ 135.2

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(10) Financing Arrangements

Long-term debt consists of the following:

	December 31,	
	2014	2013
	(in millions)	
5.85% notes due April 2016	\$ 225.0	\$ 225.0
5.05% notes due June 2020	75.0	75.0
Line of Credit matures February 2019	275.0	
Other consists primarily of European borrowings (at interest rates ranging from 1.1% to 6.0%)	4.7	7.7
	579.7	307.7
Less Current Maturities	1.9	2.2
	\$ 577.8	\$ 305.5

Principal payments during each of the next five years and thereafter are due as follows (in millions): 2015 \$1.9; 2016 \$226.3; 2017 \$1.4; 2018 \$0.1; 2019 \$275.0, and thereafter \$75.0.

The Company maintains letters of credit that guarantee its performance or payment to third parties in accordance with specified terms and conditions. Amounts outstanding were approximately \$23.6 million as of December 31, 2014 and December 31, 2013. The Company's letters of credit are primarily associated with insurance coverage and, to a lesser extent, foreign purchases. The Company's letters of credit generally expire within one year of issuance and are drawn down against the revolving credit facility. These instruments may exist or expire without being drawn down. Therefore, they do not necessarily represent future cash flow obligations.

On February 18, 2014, the Company terminated its prior credit agreement and entered into a new Credit Agreement (the Credit Agreement) among the Company, certain subsidiaries of the Company who become borrowers under the Credit Agreement, JPMorgan Chase Bank, N.A., as Administrative Agent, Swing Line Lender and Letter of Credit Issuer, and the other lenders referred to therein. The Credit Agreement provides for a \$500 million, five-year, senior unsecured revolving credit facility which may be increased by an additional \$500 million under certain circumstances and subject to the terms of the Credit Agreement. The Credit Agreement has a sublimit of up to \$100 million in letters of credit. Borrowings outstanding under the Credit Agreement bear interest at a fluctuating rate per annum equal to an applicable percentage equal to (i) in the case of Eurocurrency rate loans, the British Bankers Association LIBOR rate plus an applicable percentage, ranging from 0.975% to 1.45%, determined by reference to the Company's consolidated leverage ratio plus, in the case of certain lenders, a mandatory cost calculated in accordance with the terms of the Credit Agreement, or (ii) in the case of base rate loans and swing line loans, the highest of (a) the federal funds rate plus 0.5%, (b) the rate of interest in effect for such day as announced by JPMorgan Chase Bank, N.A. as its "prime rate," and (c) the British Bankers Association LIBOR rate plus 1.0%, plus an applicable percentage, ranging from 0.00% to 0.45%, determined by reference to the Company's consolidated leverage ratio. In addition to paying interest under the Credit Agreement, the Company is also required to pay certain fees in connection with the credit facility, including, but not limited to, an unused facility fee and letter of credit fees. The Credit Agreement matures on February 18, 2019, subject to extension under certain circumstances and subject to the terms of the Credit Agreement. The Company may repay loans outstanding under the Credit Agreement from time to time without

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(10) Financing Arrangements (Continued)

premium or penalty, other than customary breakage costs, if any, and subject to the terms of the Credit Agreement.

As of December 31, 2014, the Company was in compliance with all covenants related to the Credit Agreement and had \$201.4 million of unused and available credit under the Credit Agreement and \$23.6 million of stand-by letters of credit outstanding on the Credit Agreement. The Company had \$275 million of borrowings outstanding under the Credit Agreement at December 31, 2014.

The Credit Agreement imposes various restrictions on the Company and its subsidiaries, including restrictions pertaining to: (i) the incurrence of additional indebtedness, (ii) limitations on liens, (iii) making distributions, dividends and other payments, (iv) mergers, consolidations and acquisitions, (v) dispositions of assets, (vi) the maintenance of certain consolidated leverage ratios and consolidated interest coverage ratios, (vii) transactions with affiliates, (viii) changes to governing documents, and (ix) changes in control.

On June 18, 2010, the Company entered into a note purchase agreement with certain institutional investors (the 2010 Note Purchase Agreement). Pursuant to the 2010 Note Purchase Agreement, the Company issued senior notes of \$75.0 million in principal, due June 18, 2020. The Company will pay interest on the outstanding balance of the Notes at the rate of 5.05% per annum, payable semi-annually on June 18th and December 18th until the principal on the Notes shall become due and payable. The Company may, at its option, upon notice, and subject to the terms of the 2010 Note Purchase Agreement, prepay at any time all or part of the Notes in an amount not less than \$1.0 million by paying the principal amount plus a make-whole amount, which is dependent upon the yield of respective U.S. Treasury securities. The 2010 Note Purchase Agreement includes operational and financial covenants, with which the Company is required to comply, including, among others, maintenance of certain financial ratios and restrictions on additional indebtedness, liens and dispositions. As of December 31, 2014, the Company was in compliance with all covenants related to the 2010 Note Purchase Agreement.

On April 27, 2006, the Company completed a private placement of \$225.0 million of 5.85% senior unsecured notes due April 2016 (the 2006 Note Purchase Agreement). The 2006 Note Purchase Agreement includes operational and financial covenants, with which the Company is required to comply, including, among others, maintenance of certain financial ratios and restrictions on additional indebtedness, liens and dispositions. Events of default under the 2006 Note Purchase Agreement include failure to comply with its financial and operational covenants, as well as bankruptcy and other insolvency events. The Company may, at its option, upon notice to the note holders, prepay at any time all or part of the Notes in an amount not less than \$1.0 million by paying the principal amount plus a make-whole amount, which is dependent upon the yield of respective U.S. Treasury securities. As of December 31, 2014, the Company was in compliance with all covenants related to the 2006 Note Purchase Agreement. The payment of interest on the senior unsecured notes is due semi-annually on April 30th and October 30th of each year.

On May 15, 2003, the Company completed a private placement of \$125.0 million of senior unsecured notes consisting of \$50.0 million principal amount of 4.87% senior notes due 2010 and \$75.0 million principal amount of 5.47% senior notes due May 2013. In May 2010, the Company repaid \$50.0 million in principal of 4.87% senior notes due upon maturity. During the period ended June 30, 2013, the Company repaid with available cash the \$75.0 million of unsecured senior notes that matured on May 15, 2013.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(11) Common Stock

The Class A common stock and Class B common stock have equal dividend and liquidation rights. Each share of the Company's Class A common stock is entitled to one vote on all matters submitted to stockholders, and each share of Class B common stock is entitled to ten votes on all such matters. Shares of Class B common stock are convertible into shares of Class A common stock, on a one-to-one basis, at the option of the holder. As of December 31, 2014, the Company had reserved a total of 28,552,065 of Class A common stock for issuance under its stock-based compensation plans and 6,479,290 shares for conversion of Class B common stock to Class A common stock.

On April 30, 2013, the Board of Directors authorized the repurchase of up to \$90 million of the Company's Class A common stock from time to time on the open market or in privately negotiated transactions. The timing and number of any shares repurchased will be determined by the Company's management based on its evaluation of market conditions. Repurchases may also be made under a Rule 10b5-1 plan, which would permit shares to be repurchased when the Company might otherwise be precluded from doing so under insider trading laws. The repurchase program may be suspended or discontinued at any time, subject to the terms of any Rule 10b5-1 plan the Company may enter into with respect to the repurchase program. During 2014, the Company repurchased approximately 670,000 shares of Class A common stock at a cost of approximately \$39.6 million. During 2013, the Company repurchased approximately 454,000 shares of Class A common stock at a cost of approximately \$23.0 million.

On May 16, 2012, the Board of Directors authorized a stock repurchase program of up to two million shares of the Company's Class A common stock. The stock repurchase program was completed in July 2012, as the Company repurchased the entire two million shares of Class A common stock at a cost of approximately \$65.8 million.

(12) Stock-Based Compensation

As of December 31, 2014, the Company maintains one stock incentive plan, the Second Amended and Restated 2004 Stock Incentive Plan (the "2004 Stock Incentive Plan"). Under this plan, key employees have been granted nonqualified stock options to purchase the Company's Class A common stock. Options typically become exercisable over a four-year period at the rate of 25% per year and expire ten years after the grant date. However, most options granted in 2014 become exercisable over a three-year period at a rate of one-third per year. Options granted under the plan may have exercise prices of not less than 100% of the fair market value of the Class A common stock on the date of grant. The Company's current practice is to grant all options at fair market value on the grant date. At December 31, 2014, 1,706,591 shares of Class A common stock were authorized for future grants of new equity awards under the Company's 2004 Stock Incentive Plan.

The Company grants shares of restricted stock and deferred shares to key employees and stock awards to non-employee members of the Company's Board of Directors under the 2004 Stock Incentive Plan. Stock awards to non-employee members of the Company's Board of Directors vest immediately. Employees' restricted stock awards and deferred shares typically vest over a three-year period at the rate of one-third per year, except that most restricted stock awards and deferred shares granted in 2014 vest over a two-year period at the rate of 50% per year.

Beginning in 2014, the Company granted performance stock units to key employees under the 2004 Stock Incentive Plan. Performance stock units cliff vest at the end of a three-year performance period. Upon vesting, the number of shares of the Company's Class A common stock awarded to each performance stock unit recipient will be determined based on the Company's attainment of certain

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(12) Stock-Based Compensation (Continued)

performance goals set at the time the performance stock units were granted. The performance goals for the 2014 performance stock units are based on the compound annual growth rate of the Company's revenue over the three-year performance period and the Company's return on invested capital ("ROIC") for the third year of the performance period. The performance period for the 2014 performance stock units is January 1, 2014 through December 31, 2016. The 2014 performance stock units also provide an overall minimum ROIC threshold, which the Company must exceed in order for any shares of the Company's Class A common stock to be earned. The number of shares of Class A common stock that may be earned by a performance stock unit recipient ranges from 0% to 200% of a target number of shares designated for each recipient at the time of grant. The performance stock units are amortized to expense over the vesting period based on the Company's expected performance relative to the performance goals. If such goals are not met, no awards are earned and previously recognized compensation expense is reversed.

The Company also has a Management Stock Purchase Plan that allows for the granting of restricted stock units (RSUs) to key employees. On an annual basis, key employees may elect to receive a portion of their annual incentive compensation in RSUs instead of cash. Each RSU provides the key employee with the right to purchase a share of Class A common stock at 67% of the fair market value on the date of grant. RSUs vest either annually over a three-year period from the grant date or upon the third anniversary of the grant date and receipt of the shares underlying RSUs is deferred for a minimum of three years or such greater number of years as is chosen by the employee. An aggregate of 2,000,000 shares of Class A common stock may be issued under the Management Stock Purchase Plan. At December 31, 2014, 913,526 shares of Class A common stock were authorized for future grants under the Company's Management Stock Purchase Plan.

2004 Stock Incentive Plan

At December 31, 2014, total unrecognized compensation cost related to the unvested stock options was approximately \$5.6 million with a total weighted average remaining term of 2.2 years. For 2014, 2013 and 2012, the Company recognized compensation cost of \$2.6 million, \$3.8 million and \$2.7 million, respectively.

The following is a summary of stock option activity and related information:

	Years Ended December 31,						
	2014		2013		2012		
	Options	Weighted Average Exercise Price	Weighted Average Intrinsic Value	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price
(Options in thousands)							
Outstanding at beginning of year	1,029	\$ 41.66		1,064	\$ 33.37	1,272	\$ 30.43
Granted	114	57.58		379	54.78	415	37.67
Cancelled/Forfeitures	(306)	44.19		(53)	36.97	(33)	31.18
Exercised	(342)	36.48		(361)	31.73	(590)	30.19

Exercisable at end of year	128	\$ 40.04	\$ 23.40	249	\$ 32.35	360	\$ 30.91

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(12) Stock-Based Compensation (Continued)

As of December 31, 2014, the aggregate intrinsic value of exercisable options was approximately \$3.0 million, representing the total pre-tax intrinsic value, based on the Company's closing Class A common stock price of \$63.44 as of December 31, 2014, which would have been received by the option holders had all option holders exercised their options as of that date. The total intrinsic value of options exercised for 2014, 2013 and 2012 was approximately \$8.2 million, \$7.4 million and \$5.7 million, respectively.

Upon exercise of options, the Company issues shares of Class A common stock.

The following table summarizes information about options outstanding at December 31, 2014:

Range of Exercise Prices	Number Outstanding	Options Outstanding		Options Exercisable	
		Weighted Average Remaining Contractual Life (years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
(Options in thousands)					
\$26.34 - \$37.41	191	6.81	\$ 34.40	85	\$ 33.08
\$40.17 - \$47.21	14	2.49	43.38	4	42.13
\$54.76 - \$54.76	160	8.28	54.76	31	54.76
\$57.47 - \$60.10	130	9.39	57.68	8	57.95
	495	7.84	\$ 47.34	128	\$ 40.04

The fair value of each option granted under the 2004 Stock Incentive Plan is estimated on the date of grant, using the Black-Scholes-Merton Model, based on the following weighted average assumptions:

	Years Ended December 31,		
	2014	2013	2012
Expected life (years)	6.0	6.0	6.0
Expected stock price volatility	37.5%	40.3%	41.2%
Expected dividend yield	1.0%	1.0%	1.2%
Risk-free interest rate	1.9%	1.7%	0.9%

The risk-free interest rate is based upon the U.S. Treasury yield curve at the time of grant for the respective expected life of the option. The expected life (estimated period of time outstanding) of options and volatility were calculated using historical data. The expected dividend yield of stock is the Company's best estimate of the expected future dividend yield.

The above assumptions were used to determine the weighted average grant-date fair value of stock options of \$20.04, \$20.30 and \$13.49 for the years ended December 31, 2014, 2013 and 2012, respectively.

Watts Water Technologies, Inc. and Subsidiaries

(12) Stock-Based Compensation (Continued)

The following is a summary of unvested restricted stock and deferred shares activity and related information:

	Years Ended December 31,					
	2014		2013		2012	
	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value
	(Shares in thousands)					
Unvested at beginning of year	260	\$ 45.58	237	\$ 35.45	153	\$ 30.33
Granted	151	56.79	142	54.80	170	37.62
Cancelled/Forfeitures	(95)	46.83	(16)	37.44	(8)	30.66
Vested	(102)	44.87	(103)	35.25	(78)	30.61
Unvested at end of year	214	\$ 53.74	260	\$ 45.58	237	\$ 35.45

The total fair value of shares vested during 2014, 2013 and 2012 was \$5.9 million, \$5.6 million and \$2.5 million, respectively. At December 31, 2014, total unrecognized compensation cost related to unvested restricted stock and deferred shares was approximately \$9.0 million with a total weighted average remaining term of 1.7 years. For 2014, 2013 and 2012, the Company recognized compensation costs of \$4.8 million, \$5.1 million and \$3.1 million, respectively.

The aggregate intrinsic value of restricted stock and deferred shares granted and outstanding approximated \$12.2 million representing the total pre-tax intrinsic value based on the Company's closing Class A common stock price of \$63.44 as of December 31, 2014.

The following is a summary of unvested performance share award activity and related information:

	Year Ended December 31,	
	Shares	Weighted Average Grant Date Fair Value
	(Shares in thousands)	
Unvested at beginning of year		
Granted	117	\$ 57.02
Cancelled/Forfeitures	(10)	57.47
Vested		
Unvested at end of year	107	\$ 56.97

At December 31, 2014, total unrecognized compensation cost related to unvested performance shares was approximately \$5.0 million with a total weighted average remaining term of 2.0 years. For 2014, the Company recognized compensation costs of \$0.7 million.

The aggregate intrinsic value of performance shares granted and outstanding approximated \$0.7 million representing the total pre-tax intrinsic value based on the Company's closing Class A common stock price of \$63.44 as of December 31, 2014.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(12) Stock-Based Compensation (Continued)

Management Stock Purchase Plan

Total unrecognized compensation cost related to unvested RSUs was approximately \$0.6 million at December 31, 2014 with a total weighted average remaining term of 1.4 years. For 2014, 2013 and 2012 the Company recognized compensation cost of \$0.5 million, \$0.7 million and \$0.8 million, respectively. Dividends declared for RSUs, that are paid to individuals, that remain unpaid at December 31, 2014 total approximately \$0.1 million.

A summary of the Company's RSU activity and related information is shown in the following table:

	Years Ended December 31,						
	2014		2013		2012		
	RSUs	Weighted Average Purchase Price	Weighted Average Intrinsic Value	RSUs	Weighted Average Purchase Price	RSUs	Weighted Average Purchase Price
(RSU's in thousands)							
Outstanding at beginning of period	132	\$ 27.46		196	\$ 22.88	392	\$ 18.74
Granted	31	40.27		45	31.63	64	
Cancelled/Forfeitures	(32)	31.58		(14)	28.35	(110)	
Settled	(51)	25.41		(95)	19.19	(150)	
Outstanding at end of period	80	\$ 32.08	\$ 31.36	132	\$ 27.46	196	\$ 22.88
Vested at end of period	31	\$ 27.96	\$ 35.48	42	\$ 25.30	81	\$ 20.36

As of December 31, 2014, the aggregate intrinsic values of outstanding and vested RSUs were approximately \$2.5 million and \$1.1 million, respectively, representing the total pre-tax intrinsic value, based on the Company's closing Class A common stock price of \$63.44 as of December 31, 2014, which would have been received by the RSUs holders had all RSUs settled as of that date. The total intrinsic value of RSUs settled for 2014, 2013 and 2012 was approximately \$1.7 million, \$2.8 million and \$3.8 million, respectively. Upon settlement of RSUs, the Company issues shares of Class A common stock.

The following table summarizes information about RSUs outstanding at December 31, 2014:

Range of Purchase Prices	RSUs Outstanding		RSUs Vested	
	Number Outstanding	Weighted Average Purchase Price	Number Vested	Weighted Average Purchase Price
(RSUs in thousands)

	80	\$ 32.08	31	\$ 27.96

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(12) Stock-Based Compensation (Continued)

The fair value of each share issued under the Management Stock Purchase Plan is estimated on the date of grant, using the Black-Scholes-Merton Model, based on the following weighted average assumptions:

	Years Ended December 31,		
	2014	2013	2012
Expected life (years)	3.0	3.0	3.0
Expected stock price volatility	31.2%	34.1%	38.3%
Expected dividend yield	0.9%	0.9%	1.1%
Risk-free interest rate	0.7%	0.4%	0.4%

The risk-free interest rate is based upon the U.S. Treasury yield curve at the time of grant for the respective expected life of the RSUs. The expected life (estimated period of time outstanding) of RSUs and volatility were calculated using historical data. The expected dividend yield of stock is the Company's best estimate of the expected future dividend yield.

The above assumptions were used to determine the weighted average grant-date fair value of RSUs granted of \$22.57, \$18.05 and \$15.68 during 2014, 2013 and 2012, respectively.

The Company distributed dividends of \$0.58 per share for 2014, \$0.50 per share for 2013, and \$0.44 per share for 2012, respectively, on the Company's Class A common stock and Class B common stock.

(13) Employee Benefit Plans

For the majority of its U.S. employees, the Company sponsors a funded non-contributing defined benefit pension plan, the Watts Water Technologies, Inc. Pension Plan (the "Pension Plan"), and an unfunded non-contributing defined benefit pension plan, the Watts Water Technologies, Inc. Supplemental Employees Retirement Plan (the "SERP"). Benefits are based primarily on years of service and employees' compensation. The funding policy of the Company for these plans is to contribute an annual amount that does not exceed the maximum amount that can be deducted for federal income tax purposes. On October 31, 2011, the Company's Board of Directors voted to cease accruals effective December 31, 2011 under both the Company's Pension Plan and the SERP. On April 28, 2014, the Company's Board of Directors voted to terminate the Company's Pension Plan and the SERP.

The Pension Plan was terminated effective July 31, 2014. Distribution of plan assets pursuant to the termination will not be made until the plan termination satisfies the regulatory requirements prescribed by the Internal Revenue Service (IRS) and the Pension Benefit Guaranty Corporation, which is expected to occur in late 2015. The SERP was terminated effective May 15, 2014. The Company will settle all liabilities under the SERP in accordance with Section 409A of the Internal Revenue Code by paying lump sums to plan participants at least twelve and no more than twenty four months following the termination date. The Board of Directors authorized the Company to make such contributions to the Pension Plan and SERP as may be necessary to make the plans sufficient to settle all plan liabilities.

The Company expects the distributions for the two plans to be completed by December 31, 2015. Except for retirees receiving payments under the Pension Plan (or "in pay status"), participants in the Pension Plan will have the choice of receiving either a single lump sum payment or an annuity. Retirees

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(13) Employee Benefit Plans (Continued)

in pay status will continue to receive payments of their pension plan benefits pursuant to their current annuity elections. The Company plans to purchase annuity contracts from an insurance company for all retirees and participants that choose annuities as a payment option under the Pension Plan. All participants under the SERP will be paid a lump sum. The lump sum payments paid to participants will represent the actuarial equivalent value of the participants' remaining accrued benefits under the Pension Plan and SERP as of the applicable distribution dates, calculated in accordance with the terms of the plans and based on the participants' ages on the distribution dates.

During the third quarter ended September 28, 2014, the Company remeasured its pension liability and net loss in accumulated other comprehensive income to reflect the plan termination basis for both the Pension Plan and SERP. As a result, the pension liability increased \$17.1 million and the net loss increased by \$10.5 million, net of tax benefits of \$6.6 million. During the fourth quarter ended December 31, 2014, the annual valuation of the plans resulted in a \$0.7 million increase in the pension liability and the net loss increased by \$0.4 million, net of tax benefits of \$0.3 million.

The funded status of the defined benefit plans and amounts recognized in the consolidated balance sheets are as follows:

	December 31,	
	2014	2013
	(in millions)	
Change in projected benefit obligation		
Balance at beginning of the year	\$ 126.3	\$ 138.0
Service cost	0.7	0.5
Administration costs paid	(1.5)	(0.8)
Interest cost	5.9	5.4
Actuarial loss (gain)	32.6	(12.5)
Benefits paid	(5.1)	(4.3)
Balance at end of year	\$ 158.9	\$ 126.3
Change in fair value of plan assets		
Balance at beginning of the year	\$ 103.7	\$ 115.8
Actual gain (loss) on assets	21.1	(7.7)
Employer contributions	0.7	0.7
Administration costs paid	(1.5)	(0.8)
Benefits paid	(5.1)	(4.3)
Fair value of plan assets at end of the year	\$ 118.9	\$ 103.7
Funded status at end of year	\$ (40.0)	\$ (22.6)

Amounts recognized in the consolidated balance sheets are as follows:

	December 31,	
	2014	2013
	(in millions)	
Current liabilities	\$ (40.0)	\$ (0.6)
Noncurrent liabilities		(22.0)
Net amount recognized	\$ (40.0)	\$ (22.6)

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(13) Employee Benefit Plans (Continued)

Amounts recognized in accumulated other comprehensive income consist of:

	December 31,	
	2014	2013
	(in millions)	
Net actuarial loss recognized	\$ 58.9	\$ 42.2

Information for pension plans with an accumulated benefit obligation in excess of plan assets are as follows:

	December 31,	
	2014	2013
	(in millions)	
Projected benefit obligation	\$ 158.9	\$ 126.3
Accumulated benefit obligation	\$ 158.9	\$ 126.3
Fair value of plan assets	\$ 118.9	\$ 103.7

The components of net periodic benefit cost are as follows:

	Years Ended December 31,		
	2014	2013	2012
	(in millions)		
Service cost benefits earned	\$ 0.7	\$ 0.5	\$ 0.6
Interest costs on benefits obligation	5.9	5.4	5.7
Expected return on assets	(6.3)	(6.8)	(6.9)
Net actuarial loss amortization	1.2	1.0	0.6
Net periodic benefit cost	\$ 1.5	\$ 0.1	\$

For fiscal year 2015, the estimated net actuarial loss for the defined benefit pension plans that will be amortized from accumulated other comprehensive income into net periodic benefit cost is \$1.5 million.

Assumptions:

Weighted-average assumptions used to determine benefit obligations:

	December 31,	
	2014	2013
Discount rate	3.5%	4.9%

Weighted-average assumptions used to determine net periodic benefit costs:

	Years Ended December 31,		
	2014	2013	2012
Discount rate	4.9%	4.0%	4.8%
Long-term rate of return on assets	6.0%	6.0%	6.50%

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(13) Employee Benefit Plans (Continued)

Discount rates are selected based upon rates of return at the measurement date utilizing a bond matching approach to match the expected benefit cash flows. In selecting the expected long-term rate of return on assets, the Company considers the average rate of earnings expected on the funds invested or to be invested to provide for the benefits of this plan. This includes considering the trust's asset allocation and the expected returns likely to be earned over the life of the plan. This basis is consistent with the prior year.

Plan assets

The Company's written Retirement Plan Investment Policy sets forth the investment policy, objectives and constraints of the Watts Water Technologies, Inc. Pension Plan. This Retirement Plan Investment Policy, set forth by the Pension Plan Committee, defines general investment principles and directs investment management policy, addressing preservation of capital, risk aversion and adherence to investment discipline. Investment managers are to make a reasonable effort to control risk and are evaluated twice a year against commonly accepted benchmarks to ensure that the risk assumed is commensurate with the given investment style and objectives.

The portfolio is designed to achieve a balanced return of current income and modest growth of capital, while achieving returns in excess of the rate of inflation over the investment horizon in order to preserve purchasing power of Plan assets. All Plan assets are required to be invested in liquid securities. Derivative investments are not allowed.

Prohibited investments include, but are not limited to the following: futures contracts, private placements, options, limited partnerships, venture-capital investments, interest-only (IO), principal-only (PO), and residual tranche collateralized mortgage obligation (CMOs), and Watts Water Technologies, Inc. stock.

Prohibited transactions include, but are not limited to the following: short selling and margin transactions.

Allowable assets include: cash equivalents, fixed income securities, equity securities, mutual funds, and guaranteed investment contracts.

Specific guidelines regarding allocation of assets are followed using a liability driven investment (LDI) strategy. Under an LDI strategy, investments are made based on the expected cash flows required to fund the pension plan's liabilities. This cash flow matching technique requires a plan's asset allocation to be heavily weighted toward fixed income securities. The Company's current allocation target is 95% fixed income and 5% equities and other investments in anticipation of the expected termination of the plan in 2015. Investment performance is monitored on a regular basis and investments are re-allocated to stay within specific guidelines. The securities of any one company or government agency should not exceed 10% of the total fund, and no more than 20% of the total fund should be invested in any one industry. Individual treasury securities may represent 50% of the total fund, while the total allocation to treasury bonds and notes may represent up to 100% of the Plan's aggregate bond position.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

Cash flows

The information related to the Company's pension funds cash flow is as follows:

Edgar Filing: WATTS WATER TECHNOLOGIES INC - Form 10-K

	December 31,	
	2014	2013
	(in millions)	
Employer Contributions	\$ 0.7	\$ 0.7
Benefit Payments	\$ 5.1	\$ 4.3

The Company expects to contribute approximately \$42.6 million in 2015 for the Pension Plan and SERP in order to fully fund and settle the plans. The expected contribution considers the expected shortfall based on a plan termination basis as of December 31, 2015. The expected contribution is

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(13) Employee Benefit Plans (Continued)

subject to change based on the distribution date, fair value of the plan assets at distribution, market interest rates and annuity purchase rates at distribution, demographic experience after 2014 and elected forms of payment.

Expected benefit payments to be paid by the pension plans are as follows:

	(in millions)
During fiscal year ending December 31, 2015	\$ 164.4(1)
During fiscal year ending December 31, 2016	N/A(1)
During fiscal year ending December 31, 2017	N/A(1)
During fiscal year ending December 31, 2018	N/A(1)
During fiscal year ending December 31, 2019	N/A(1)
During fiscal years ending December 31, 2020 through December 31, 2021	N/A(1)

(1)

Benefits under the Pension Plan and the SERP are expected to be distributed by December 31, 2015.

Additionally, all of the Company's domestic employees are eligible to participate in the Company's 401(k) savings plan. Effective January 1, 2012, the Company provides a base contribution of 2% of an employee's salary, regardless of whether the employee participates in the plan. Further, the Company matches the contribution of up to 100% of the first 4% of an employee's contribution. The Company's match contribution for the years ended December 31, 2014, 2013 and 2012, were \$4.4 million, \$4.2 million, and \$4.0 million, respectively. Charges for EMEA pension plans approximated \$5.5 million, \$5.8 million and \$6.0 million for the years ended December 31, 2014, 2013 and 2012, respectively. These costs relate to plans administered by certain European subsidiaries, with benefits calculated according to government requirements and paid out to employees upon retirement or change of employment.

The Company entered into a Supplemental Compensation Agreement (the Agreement) with Timothy P. Horne on September 1, 1996. Per the Agreement, upon ceasing to be an employee of the Company, Mr. Horne must make himself available, as requested by the Board, to work a minimum of 300 but not more than 500 hours per year as a consultant in return for certain annual compensation as long as he is physically able to do so. Mr. Horne retired effective December 31, 2002, and therefore the Supplemental Compensation period began on January 1, 2003. If Mr. Horne complies with the consulting provisions of the agreement above, he shall receive supplemental compensation on an annual basis, subject to cost of living increases each year, in exchange for the services performed, as long as he is physically able to do so. The payment for consulting services provided by Mr. Horne will be expensed as incurred by the Company. Mr. Horne received payments of \$0.6 million during each of 2014, 2013 and 2012. In the event of physical disability, Mr. Horne will continue to receive this payment annually. In accordance with Generally Accepted Accounting Principles (GAAP), the Company accrues for the future post-retirement disability benefits over the period from January 1, 2003, to the time in which Mr. Horne becomes physically unable to perform his consulting services (the period in which the disability benefits are earned). Mr. Horne is still active as a consultant in accordance with the terms of the Agreement.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(14) Contingencies and Environmental Remediation

Accrual and Disclosure Policy

The Company is a defendant in numerous legal matters arising from its ordinary course of operations, including those involving product liability, environmental matters and commercial disputes.

The Company reviews its lawsuits and other legal proceedings on an ongoing basis and follows appropriate accounting guidance when making accrual and disclosure decisions. The Company establishes accruals for matters when the Company assesses that it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. The Company does not establish accruals for such matters when the Company does not believe both that it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. The Company's assessment of whether a loss is probable is based on its assessment of the ultimate outcome of the matter following all appeals.

Under the FASB issued ASC 450 "Contingencies", an event is "reasonably possible" if "the chance of the future event or events occurring is more than remote but less than likely" and an event is "remote" if "the chance of the future event or events occurring is slight". Thus, references to the upper end of the range of reasonably possible loss for cases in which the Company is able to estimate a range of reasonably possible loss mean the upper end of the range of loss for cases for which the Company believes the risk of loss is more than slight.

There may continue to be exposure to loss in excess of any amount accrued. When it is possible to estimate the reasonably possible loss or range of loss above the amount accrued for the matters disclosed, that estimate is aggregated and disclosed. The Company records legal costs associated with its legal contingencies as incurred, except for legal costs associated with product liability claims which are included in the actuarial estimates used in determining the product liability accrual.

As of December 31, 2014, the Company estimates that the aggregate amount of reasonably possible loss in excess of the amount accrued for its legal contingencies is approximately \$5.8 million pre-tax. With respect to the estimate of reasonably possible loss, management has estimated the upper end of the range of reasonably possible loss based on (i) the amount of money damages claimed, where applicable, (ii) the allegations and factual development to date, (iii) available defenses based on the allegations, and/or (iv) other potentially liable parties. This estimate is based upon currently available information and is subject to significant judgment and a variety of assumptions, and known and unknown uncertainties. The matters underlying the estimate will change from time to time, and actual results may vary significantly from the current estimate. In the event of an unfavorable outcome in one or more of the matters described below, the ultimate liability may be in excess of amounts currently accrued, if any, and may be material to the Company's operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters, as they are resolved over time, is not likely to have a material adverse effect on the financial condition of the Company, though the outcome could be material to the Company's operating results for any particular period depending, in part, upon the operating results for such period.

Connector Class Actions

In November and December 2014, Watts Water Technologies, Inc. and Watts Regulator Co. were named as defendants in three separate putative nationwide class action complaints (Meyers v. Watts Water Technologies, Inc., United States District Court for the Southern District of Ohio; Ponzo v. Watts Regulator Co., United States District Court for the District of Massachusetts; Sharp v. Watts

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(14) Contingencies and Environmental Remediation (Continued)

Regulator Co., United States District Court for the District of Massachusetts) seeking to recover damages and other relief based on the alleged failure of water heater connectors. The complaints seek among other items, damages in an unspecified amount, replacement costs, injunctive relief, declaratory relief, and attorneys' fees and costs.

In February 2015, Watts Water Technologies, Inc. and Watts Regulator Co. were named as defendants in a putative nationwide class action complaint (Klug v. Watts Water Technologies, Inc., et al., United States District Court for the District of Nebraska) seeking to recover damages and other relief based on the alleged failure of floodsafe connectors. The complaint seeks among other items, damages in an unspecified amount, injunctive relief, declaratory relief, and attorneys' fees and costs.

The Company is unable to estimate a range of reasonably possible loss for the above matters in which damages have not been specified because: (i) the proceedings are in the early stages; (ii) there is uncertainty as to the likelihood of a class being certified or the ultimate size of the class; (iii) there is uncertainty as to the resolution of certain legal and procedural motions; (iv) there are significant factual issues to be resolved; and (v) there are novel legal issues presented.

Trabakoolas et al., v. Watts Water Technologies, Inc., et al.,

On March 8, 2012, Watts Water Technologies, Inc., Watts Regulator Co., and Watts Plumbing Technologies Co., Ltd., among other companies, were named as defendants in a putative nationwide class action complaint filed in the U.S. District Court for the Northern District of California seeking to recover damages and other relief based on the alleged failure of toilet connectors.

On December 12, 2013, the Company reached an agreement in principle to settle all claims. The total settlement amount was \$23.0 million, of which the Company was responsible for \$14.0 million after insurance proceeds of \$9.0 million. On July 18, 2014, the Court granted final approval of the class settlement at a fairness hearing, and issued a subsequent written order formalizing the approval on August 5, 2014. No appeal was taken, and the order became final on September 4, 2014. The litigation is now terminated.

During the fourth quarter of 2013, the Company recorded a liability of \$22.6 million related to the Trabakoolas matter, of which \$12.7 million was included in current liabilities and \$9.9 million in other noncurrent liabilities. In addition, a \$9.0 million receivable was recorded in current assets related to insurance proceeds due under a separate settlement agreement. The liability was reduced by \$13.8 million for payments related to notice and claims administration, plaintiff attorneys' fees and partial funding of the settlement amount made during the twelve months ended December 31, 2014. The \$9.0 million receivable for insurance proceeds was received as of September 28, 2014. The remaining liability of \$8.8 million as of December 31, 2014 will be paid in equal annual installments over four years.

Product Liability

The Company is subject to a variety of potential liabilities in connection with product liability cases. The Company maintains high-deductible product liability and other insurance coverage, which the Company believes to be generally in accordance with industry practices. For product liability cases in the U.S., management establishes its product liability accrual, which includes legal costs associated with accrued claims, by utilizing third-party actuarial valuations which incorporate historical trend factors and the Company's specific claims experience derived from loss reports provided by third-party administrators. The product liability accrual is established net of any applicable insurance coverage.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(14) Contingencies and Environmental Remediation (Continued)

Changes in the nature of product liability claims or the actual settlement amounts could affect the adequacy of the estimates and require changes to the provisions. Because the liability is an estimate, the ultimate liability may be more or less than reported.

Environmental Remediation

The Company has been named as a potentially responsible party with respect to a limited number of identified contaminated sites. The levels of contamination vary significantly from site to site as do the related levels of remediation efforts. Environmental liabilities are recorded based on the most probable cost, if known, or on the estimated minimum cost of remediation. Accruals are not discounted to their present value, unless the amount and timing of expenditures are fixed and reliably determinable. The Company accrues estimated environmental liabilities based on assumptions, which are subject to a number of factors and uncertainties. Circumstances that can affect the reliability and precision of these estimates include identification of additional sites, environmental regulations, level of clean-up required, technologies available, number and financial condition of other contributors to remediation and the time period over which remediation may occur. The Company recognizes changes in estimates as new remediation requirements are defined or as new information becomes available.

Asbestos Litigation

The Company is defending approximately 240 lawsuits in different jurisdictions, alleging injury or death as a result of exposure to asbestos. The complaints in these cases typically name a large number of defendants and do not identify any particular Company products as a source of asbestos exposure. To date, discovery has failed to yield evidence of substantial exposure to any Company products and no judgments have been entered against the Company.

Other Litigation

Other lawsuits and proceedings or claims, arising from the ordinary course of operations, are also pending or threatened against the Company.

(15) Financial Instruments*Fair Value*

The carrying amounts of cash and cash equivalents, short-term investments, trade receivables and trade payables approximate fair value because of the short maturity of these financial instruments.

The fair value of the Company's 5.85% senior notes due 2016 and 5.05% senior notes due 2020 is based on quoted market prices of similar notes (level 2). The fair value of the Company's borrowings outstanding under the Credit Agreement and the Company's variable rate debt approximates its carrying value. The carrying amount and the estimated fair market value of the Company's long-term debt, including the current portion, are as follows:

	December 31,	
	2014	2013
	(in millions)	
Carrying amount	\$ 579.7	\$ 307.7
Estimated fair value	\$ 599.3	\$ 333.4

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(15) Financial Instruments (Continued)

Financial Instruments

The Company measures certain financial assets and liabilities at fair value on a recurring basis, including foreign currency derivatives, deferred compensation plan assets and related liability. There are no cash flow hedges as of December 31, 2014. The fair value of these certain financial assets and liabilities were determined using the following inputs at December 31, 2014 and 2013:

	Fair Value Measurements at December 31, 2014 Using:			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(in millions)				
Assets				
Plan asset for deferred compensation(1)	\$ 4.0	\$ 4.0	\$	\$
Total assets	\$ 4.0	\$ 4.0	\$	\$
Liabilities				
Plan liability for deferred compensation(2)	\$ 4.0	\$ 4.0	\$	\$
Contingent consideration(3)	2.5			2.5
Total liabilities	\$ 6.5	\$ 4.0	\$	\$ 2.5

	Fair Value Measurements at December 31, 2013 Using:			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(in millions)				
Assets				
Plan asset for deferred compensation(1)	\$ 4.6	\$ 4.6	\$	\$
Total assets	\$ 4.6	\$ 4.6	\$	\$
Liabilities				
Plan liability for deferred compensation(2)	\$ 4.6	\$ 4.6	\$	\$
Contingent consideration(3)	4.4			4.4
Total liabilities	\$ 9.0	\$ 4.6	\$	\$ 4.4

- (1) Included on the Company's consolidated balance sheet in other assets (other, net).
- (2) Included on the Company's consolidated balance sheet in accrued compensation and benefits.
- (3) Included on the Company's consolidated balance sheet in accrued expenses and other liabilities as of December 31, 2014 and in other noncurrent liabilities and accrued expenses and other liabilities as of December 31, 2013.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(15) Financial Instruments (Continued)

The table below provides a summary of the changes in fair value of all financial assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the period December 31, 2013 to December 31, 2014.

	Balance		Total realized and unrealized (gains) losses included in:		Balance
	December 31, 2013	Settlements	Net earnings adjustments	Comprehensive income	December 31, 2014
	(in millions)				
Contingent consideration	\$ 4.4	\$ (2.2)	\$ 0.5	\$ (0.2)	\$ 2.5

In connection with the tekmar Control Systems acquisition in 2012, a contingent liability of \$5.1 million was recognized as the estimate of the acquisition date fair value of the contingent consideration. This liability was classified as Level 3 under the fair value hierarchy as it was based on the probability of achievement of a future performance metric as of the date of the acquisition, which was not observable in the market. Failure to meet the performance metrics would reduce this liability to zero; while complete achievement would increase this liability to the full remaining purchase price of \$8.2 million. The contingent liability was increased by \$0.5 million during 2014 and by \$1.0 million during 2013 based on revised estimates of the fair value of the contingent consideration. Portions of the contingent consideration were paid out during the first quarter of 2014 and the second quarter of 2013, in the amount of \$2.2 million and \$1.2 million, respectively, based on performance metrics achieved. The earnout will be completed based on fiscal year 2014 earnings and final payment made in 2015.

Cash equivalents consist of instruments with remaining maturities of three months or less at the date of purchase and consist primarily of certificates of deposit and money market funds, for which the carrying amount is a reasonable estimate of fair value.

The Company uses financial instruments from time to time to enhance its ability to manage risk, including foreign currency and commodity pricing exposures, which exist as part of its ongoing business operations. The use of derivatives exposes the Company to counterparty credit risk for nonperformance and to market risk related to changes in currency exchange rates and commodity prices. The Company manages its exposure to counterparty credit risk through diversification of counterparties. The Company's counterparties in derivative transactions are substantial commercial banks with significant experience using such derivative instruments. The impact of market risk on the fair value and cash flows of the Company's derivative instruments is monitored and the Company restricts the use of derivative financial instruments to hedging activities. The Company does not enter into contracts for trading purposes nor does the Company enter into any contracts for speculative purposes. The use of derivative instruments is approved by senior management under written guidelines.

The Company has exposure to a number of foreign currency rates, including the Canadian dollar, the euro, the Chinese yuan and the British pound. To manage this risk, the Company generally uses a layering methodology whereby at the end of any quarter, the Company has generally entered into forward exchange contracts which hedge approximately 50% of the projected intercompany purchase transactions for the next twelve months. The Company primarily uses this strategy for the purchases between Canada and the U.S. The average volume of contracts can vary but generally approximates \$0 to \$10.0 million in open contracts at the end of any given quarter. At December 31, 2014, the Company did not have any open forward exchange contracts. At December 31, 2013, the Company had contracts for notional amounts aggregating approximately \$1.0 million. The Company accounts for the forward exchange contracts as an economic hedge and has elected not to designate its derivative instruments as

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(15) Financial Instruments (Continued)

hedging instruments. Realized and unrealized gains and losses on the contracts are recognized in other (income) expense in the consolidated statement of operations. These contracts do not subject the Company to significant market risk from exchange movement because they primarily offset gains and losses on the related foreign currency denominated transactions.

The Company recorded income of approximately \$0 in 2014 and \$0.1 million in both 2013 and 2012 to other expense (income), net in the consolidated statement of operations from the impact of derivative instruments.

Leases

The Company leases certain manufacturing facilities, sales offices, warehouses, and equipment. Generally, the leases carry renewal provisions and require the Company to pay maintenance costs. Future minimum lease payments under capital leases and non-cancelable operating leases as of December 31, 2014 are as follows:

	Capital Leases	Operating Leases
	(in millions)	
2015	\$ 1.3	\$ 9.4
2016	1.3	7.0
2017	1.3	4.9
2018	1.2	2.9
2019	1.2	2.2
Thereafter	1.4	6.8
Total	\$ 7.7	\$ 33.2
Less amount representing interest (at rates ranging from 4.3% to 7.0%)		0.5
Present value of net minimum capital lease payments		7.2
Less current installments of obligations under capital leases		1.2
Obligations under capital leases, excluding current installments	\$ 6.0	

Carrying amounts of assets under capital lease include:

	2014	2013
	(in millions)	
Buildings	\$ 15.4	\$ 17.5
Machinery and equipment	1.7	1.8
	17.1	19.3
Less accumulated depreciation	(5.0)	(5.1)
	\$ 12.1	\$ 14.2

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(16) Segment Information

The Company operates in three geographic segments: Americas, EMEA, and Asia-Pacific. Each of these segments sells similar products, is managed separately and has separate financial results that are reviewed by the Company's chief operating decision-maker. All intercompany sales transactions have been eliminated. Sales by region are based upon location of the entity recording the sale. The accounting policies for each segment are the same as those described in the summary of significant accounting policies (see Note 2).

As of January 1, 2014, the Company began allocating certain expenses to its three operating segments that had previously been recorded as Corporate expenses. These expenses primarily include stock compensation, legal expenses and audit expenses that are directly attributable to and benefit the three operating segments. The 2013 and 2012 results have been retrospectively revised for comparative purposes.

In the fourth quarter of 2014, the Company recorded a goodwill impairment charge of \$12.9 million relating to the Asia-Pacific reporting unit, impairment charges of \$1.3 million relating to indefinite-lived trade names, \$8.0 million of restructuring charges, \$3.5 million of deployment costs relating to the EMEA and Americas transformation programs and \$4.5 million of acquisition costs relating to the AERCO acquisition.

In the fourth quarter of 2013, the Company recorded legal costs related to the agreement to settle all claims in the Trabakoolas et al., v. Watts Water Technologies, Inc., et al., matter pending in the United States District Court for the Northern District of California. The net settlement expense recorded in income from continuing operations was \$13.6 million. Please see Note 14 for additional information. Also in the fourth quarter of 2013, the Company recorded customer rebate expense of approximately \$3.0 million that related to accrual adjustments for 2013.

(19) Subsequent Events

On February 12, 2015, the Company declared a quarterly dividend of fifteen cents (\$0.15) per share on each outstanding share of Class A common stock and Class B common stock.

Watts Water Technologies, Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Continued)

(19) Subsequent Events (Continued)

On February 17, 2015, the Board of Directors of the Company approved the initial phase of a restructuring program relating to the transformation of the Company's Americas and Asia-Pacific businesses, which primarily involves product line rationalization efforts expected to ultimately eliminate between \$175 million to \$200 million of the combined Americas and Asia-Pacific net sales primarily within the Company's do-it-yourself (DIY) distribution channel (the "program"). The program is expected to include a pre-tax charge to earnings of approximately \$40 million to \$50 million, of which \$25 million to \$30 million consist of non-cash charges.

For the fourth quarter and year ended December 31, 2014, the Company recorded a \$15.2 million pre-tax charge relating to the program consisting of goodwill impairment of \$12.9 million, an indefinite-lived intangible asset impairment of \$0.5 million, and other transformation and deployment costs of \$1.8 million. The goodwill impairment charge was based on a quantitative assessment of the Asia-Pacific reporting unit goodwill performed as a result of it being more likely than not that the Asia-Pacific reporting unit's third party and intersegment net sales would be significantly reduced as a result of the program. The Company estimated the fair value of the reporting unit using the expected present value of future cash flows.

The remaining total pre-tax charge for the program is expected to include costs of severance benefits of \$8 million to \$10 million, facility decommissioning, clean-up and other related exit costs of \$3 million to \$4 million, accelerated depreciation and amortization of long-lived assets of \$8 million to \$10 million, and other transformation and deployment costs including inventory charges, consulting fees, and other associated costs of \$5.8 million to \$10.8 million. The total net after-tax charge for this program is expected to be \$30 million to \$40 million, inclusive of the Asia-Pacific charges that are expected to have no tax benefit. The remaining costs of the program are expected to be incurred during 2015. The Company expects to generate approximately \$5.0 million in after-tax cash proceeds from the sale of assets associated with the program by the end of fiscal 2017. The Company estimates consolidated operating margins will increase by approximately 1.0 percentage point as a result of these actions by 2017.

Watts Water Technologies, Inc. and Subsidiaries
