| Liquidation Value (27.3)% | | | | (35,000,000) |
| Liabilities in Excess of Other Assets (27.5)% | | | | (35,253,284) |
| TOTAL NET ASSETS 100.0% | | | | \$ 128,003,896 |

- * Non-income producing security.
- (a) Interest rates disclosed represent the effective rates on collateralized and uncollateralized senior loans. Ranges in interest rates are attributable to multiple contracts under the same loan.
- (b) All or a portion of this loan is unfunded as of December 31, 2012. The interest rate for fully unfunded term loans is to be determined.
- (c) Variable rate security. Interest rate disclosed is as of the most recent information available.
- (d) Security is valued in good faith in accordance with procedures approved by the Board of Directors (See Note 1).
- # Aggregate cost for federal income tax purposes is substantially the same.

Abbreviations used in this schedule:

Second Lien

- Subordinate Lien to First Lien
- Term Term loan typically with a First Lien on specified assets

Notes to schedule of investments (unaudited)

1. Organization and significant accounting policies

LMP Corporate Loan Fund Inc. (the Fund) was incorporated in Maryland and is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund s investment objective is to maximize current income consistent with prudent efforts to preserve capital.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP).

(a) Investment valuation. The valuations for fixed income securities are typically the prices supplied by independent third party pricing services, which may use market prices or broker/dealer quotations or a variety of valuation techniques and methodologies. The independent third party pricing services use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar securities. Short-term fixed income securities that will mature in 60 days or less are valued at amortized cost, unless it is determined that using this method would not reflect an investment s fair value. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. If independent third party pricing services are unable to supply prices for a portfolio investment, or if the prices supplied are deemed by the manager to be unreliable, the market price may be determined by the manager using quotations from one or more broker/dealers or at the transaction price if the security has recently been purchased and no value has yet been obtained from a pricing service or pricing broker. When reliable prices are not readily available, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund values these securities as determined in accordance with procedures approved by the Fund s Board of Directors.

The Board of Directors is responsible for the valuation process and has delegated the supervision of the daily valuation process to the Legg Mason North American Fund Valuation Committee (the Valuation Committee). The Valuation Committee, pursuant to the policies adopted by the Board of Directors, is responsible for making fair value determinations, evaluating the effectiveness of the Funds pricing policies, and reporting to the Board of Directors. When determining the reliability of third party pricing information for investments owned by the Fund, the Valuation Committee, among other things, conducts due diligence reviews of pricing vendors, monitors the daily change in prices and reviews transactions among market participants.

The Valuation Committee will consider pricing methodologies it deems relevant and appropriate when making fair value determinations. Examples of possible methodologies include, but are not limited to, multiple of earnings; discount from market of a similar freely traded security; discounted cash-flow analysis; book value or a multiple thereof; risk premium/yield analysis; yield to maturity; and/or fundamental investment analysis. The Valuation Committee will also consider factors it deems relevant and appropriate in light of the facts and circumstances. Examples of possible factors include, but are not limited to, the type of security; the issuer s financial statements; the purchase price of the security; the discount from market value of unrestricted securities of the same class at the time of purchase; analysts research and observations from financial institutions; information regarding any transactions or offers with respect to the security; the existence of merger proposals or tender offers affecting the security; the price and extent of public trading in similar securities of the issuer or comparable companies; and the existence of a shelf registration for restricted securities.

For each portfolio security that has been fair valued pursuant to the policies adopted by the Board of Directors, the fair value price is compared against the last available and next available market quotations. The Valuation Committee reviews the results of such back testing monthly and fair valuation occurrences are reported to the Board of Directors quarterly.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value.

GAAP establishes a disclosure hierarchy that categorizes the inputs to valuation techniques used to value assets and liabilities at measurement date. These inputs are summarized in the three broad levels listed below:

• Level 1 quoted prices in active markets for identical investments

7

Notes to schedule of investments (unaudited) (continued)

- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The inputs or methodologies used to value securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund s assets carried at fair value:

| | · | QUOTED PRICES | S | ASSETS OTHER IGNIFICANT BSERVABLE INPUTS | UNOE I | NIFICANT BSERVABLE NPUTS | |
|-----------------------------|----|------------------|----|--|-----------|--------------------------------|-------------------|
| DESCRIPTION | (I | LEVEL 1) | | (LEVEL 2) | (L | EVEL 3) | TOTAL |
| Long-term investments: | | | | | | | |
| Collateralized senior loans | | | \$ | 175,780,398 | | | \$ 175,780,398 |
| Corporate bonds & notes | | | | 8,474,879 | | | 8,474,879 |
| Common stocks: | | | | | | | |
| Consumer discretionary | | | | | \$ | 128,326 | 128,326 |
| Energy | \$ | 974,577 | | | | | 974,577 |
| Total long-term investments | \$ | 974,577 | \$ | 184,255,277 | \$ | 128,326 | \$ 185,358,180 |
| Short-term investments | | , | | 12,899,000 | | ŕ | 12,899,000 |
| Total investments | \$ | 974,577 | \$ | 197,154,277 | \$ | 128,326 | \$ 198,257,180 |

See Schedule of Investments for additional detailed categorizations.

(b) Repurchase agreements. The Fund may enter into repurchase agreements with institutions that its investment adviser has determined are creditworthy. Each repurchase agreement is recorded at cost. Under the terms of a typical repurchase agreement, the Fund acquires a debt security subject to an obligation of the seller to repurchase, and of the Fund to resell, the security at an agreed-upon price and time, thereby determining the yield during the Fund s holding period. When entering into repurchase agreements, it is the Fund s policy that its custodian or a third party custodian, acting on the Fund s behalf, take possession of the underlying collateral securities, the market value of which, at all times, at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction maturity exceeds one business day, the value of the collateral is marked-to-market and measured against the value of the agreement in an effort to ensure the adequacy of the collateral. If the counterparty defaults, the Fund generally has the right to use the collateral to satisfy the terms of the repurchase transaction. However, if the market value of the collateral declines during the period in which the Fund seeks to assert its rights or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

(c) Senior loans. Senior Loans generally are arranged through private negotiations between a borrower and several financial institutions (Lenders) represented in each case by one or more such Lenders acting as agent of the Lenders. On behalf of the Lenders, the agent will be primarily responsible for negotiating the loan agreement that establishes the relative terms and conditions of the Senior Loan and rights of the borrower and the Lenders. Also, an agent typically administers the terms of the loan agreement and is responsible for the monitoring of collateral and collection of principal and interest and fee payments from the borrower and the apportionment of these payments to the credit of all investors which are parties to the loan agreement. The Fund may act as one of the group of Lenders in a Senior Loan, and purchase assignments and participations in Senior Loans from third parties. Senior Loans are subject to credit risks, including the risk of nonpayment of scheduled interest or loan payments.

The Fund assumes the credit risk of the borrower, the lender that is selling the participation and any other persons interpositioned between the Fund and the borrower. In the event of the insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any off-set between the lender and the borrower.

(d) Security transactions. Security transactions are accounted for on a trade date basis.
