**Report of Independent Registered Public Accounting Firm**

To the Plan Administrator of the IBM 401(k) Plus Plan

In our opinion, the accompanying statements of net assets available for benefits and the related statement of changes in net assets available for benefits present fairly, in all material respects, the net assets available for benefits of IBM 401(k) Plus Plan (the Plan) at December 31, 2014 and 2013, and the changes in net assets available for benefits for the year ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The supplemental schedules of loans or fixed income obligations in default or classified as uncollectible, of assets (held at end of year) and of assets (acquired and disposed of within year) have been subjected to audit procedures performed in conjunction with the audit of the Plan's financial statements. The supplemental schedules are the responsibility of the Plan's management. Our audit procedures included determining whether the supplemental schedules reconcile to the financial statements or the underlying accounting and other records, as applicable, and performing procedures to test the completeness and accuracy of the information presented in the supplemental schedules. In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. In our opinion, the supplemental schedules of loans or fixed income obligations in default or classified as uncollectible, of assets (held at end of year) and of assets (acquired and disposed of within year) are fairly stated, in all material respects, in relation to the financial statements as a whole.

**IBM 401(k) PLUS PLAN**

**NOTES TO FINANCIAL STATEMENTS**

**NOTE 1 - DESCRIPTION OF THE PLAN**

The following description of the IBM 401(k) Plus Plan (the Plan) provides only general information. Participants should refer to the Plan prospectus (Summary Plan Description) for a complete description of the Plan's provisions.

**General**

The Plan was established by resolution of International Business Machines Corporation's Retirement Plans Committee (the Committee) effective July 1, 1983 and Plan assets are held in trust for the benefit of its participants. The Plan offers all eligible active, full-time and part-time regular and long-term supplemental United States (U.S.) employees of International Business Machines Corporation (IBM) and certain of its domestic related companies and partnerships an opportunity to defer from one to eighty percent of their eligible compensation for before-tax 401(k) and/or Roth 401(k) contributions to any of thirty-three primary investment funds and about 165 mutual funds in a mutual fund window. The investment objectives of the primary funds are described in Note 6, Description of Investment Funds. In addition, participants are able to contribute up to ten percent of their eligible compensation on an after-tax basis. Roth 401(k) and after-tax contributions are not available for employees working in Puerto Rico. Annual contributions are subject to the legal limits permitted by Internal Revenue Service (IRS) regulations.

Participants are provided the choice to enroll in a disability protection program under which a portion of the participant's account is used to pay premiums to purchase term insurance (underwritten by Metropolitan Life Insurance Company), which will pay the amount of their before-tax 401(k) contributions, matching contributions, automatic contributions and/or Special Savings Awards into their accounts in the event the participant becomes disabled while insured.

At December 31, 2014 and 2013, the number of participants with an account balance in the Plan was 191,921 and 196,397, respectively.

The Plan is dual qualified under Section 401(a) of the Internal Revenue Code of 1986, as amended, and Section 1081.01(a) of the Internal Revenue Code for a New Puerto Rico, as amended (the PRIRC). It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

**Administration**

## Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 11-K

The Plan is administered by the Committee, which appointed certain officials of IBM to assist in administering the Plan. The Committee appointed State Street Bank and Trust Company ( SSBT ), as Trustee, to safeguard the assets of the funds and State Street Global Advisors ( SSGA ), the institutional investment management affiliate of SSBT, The Vanguard Group and other investment managers to direct investments in the various funds.

Table of Contents

Fidelity Workplace Services LLC ( Fidelity ) is the provider of record keeping and participant services, operator of the IBM Employee Services Center for the Plan in Raleigh, North Carolina as well as the provider of administrative services related to the mutual fund window. Communication services were provided by Fidelity as well as The Vanguard Group.

**Contributions**

Under the Plan, IBM provides employer contributions for eligible participants as shown in the table below:

<b>IBM Pension Plan Eligibility at 12/31/2007</b>	<b>IBM Automatic Contribution</b>	<b>IBM Matching Contribution</b>
Pension Credit Formula	4%	100% on 6% of eligible compensation
Personal Pension Account	2%	100% on 6% of eligible compensation
New Hires on or after 1/1/2005	1%	100% on 5% of eligible compensation
GBS Application Development Specialist Job Family Hires on or after 4/15/2013	1%	100% on 2% of eligible compensation

IBM employer contributions are based upon the IBM pension formula for which the employee was eligible on December 31, 2007, or on hire date on or after January 1, 2005. Any employees who terminate employment and are rehired on or after January 1, 2005 will be eligible to participate in the New Hires on or after 1/1/2005 contribution rates or the Global Business Services ( GBS ) Application Development Specialist Job Family Hires on or after 4/15/2013 as applicable.

A contribution equal to five percent of eligible compensation (referred to as a Special Savings Award ) will be added to the accounts of participants who are non-exempt employees at each year-end (effective January 1, 2013, the determination will be made on December 15 and the Special Savings Award will be contributed to eligible participants on the last business day of the year) and who participated in the Pension Credit Formula as of December 31, 2007 and have been continuously employed by IBM since that date.

Newly hired employees are automatically enrolled at five percent of eligible salary and performance pay after approximately thirty days of employment with IBM, unless they elect otherwise. After completing one year of service with IBM, they are eligible for the IBM automatic contribution and the IBM matching contribution. GBS Application Development Specialist Job Family Hires are eligible for a matching contribution equal to two percent and automatic contributions equal to one percent, if they complete two years of service.

Matching and automatic contributions are made once annually at the end of the year. In order to receive such IBM employer contributions each year, a participant must be employed on December 15 of the plan year. However, if a participant separates from service prior to December 15, and has completed certain service and/or age requirements, then the participant will be eligible to receive such matching and automatic contributions following separation from service.

Eligible compensation under the Plan includes regular salary, commissions, overtime, shift premium and similar additional compensation payments for nonscheduled workdays, recurring payments under an employee variable compensation plan, regular IBM Short-Term Disability

Income Plan payments, holiday pay and vacation pay, and payments made under any executive incentive compensation plan. Non-recurring compensation, such as awards, deal team payments and significant signing bonuses are not eligible compensation and cannot be deferred under the Plan.

Table of Contents

Participants are able to choose to have their contributions invested entirely in one of, or in any combination of, the following funds or in the mutual fund window funds, in multiples of one percent. If participants do not make an investment election, then contributions will be invested in the default Target Date fund that most closely corresponds to the year in which they will reach age 60.

These funds and their investment objectives are more fully described in Note 6, Description of Investment Funds.

Table of Contents

The Plan participants also have access to the mutual fund window investment options.

Participants may change their deferral percentage and investment selection for future contributions at any time. The changes will take effect for the next eligible pay cycle if the request is completed before the applicable cutoff date. Also, participants may transfer part or all of existing account balances among funds in the Plan once daily, subject to the Plan restrictions on trading.

The Committee is committed to preserving the integrity of the Plan as a long-term savings vehicle for its employees. Frequent, short-term trading that is intended to take advantage of pricing lags in funds can harm long-term investors, or increase trading expenses in general. Therefore, the Plan has implemented frequent trading transaction restrictions and reserves the right to take other appropriate action to curb short-term transactions (buying/selling).

**Participant Accounts**

The Plan record keeper maintains an account in the name of each participant to which each participant's contributions and share of the net earnings, losses and expenses, if any, of the various investment funds are recorded. The earnings on the assets held in each of the funds and all proceeds from the sale of such assets are held and reinvested in the respective funds.

Participants may transfer rollover contributions of before-tax and Roth 401(k) amounts from other qualified savings plans or Individual Retirement Accounts into their Plan account. Rollovers must be made in cash within the time limits specified by the IRS; stock or in-kind rollovers are not accepted. These rollovers are limited to active employees on the payroll of IBM (or affiliated companies) who have existing accounts in the Plan. Retirees are not eligible for such rollovers, except that a retiree or separated employee who has an existing account in the Plan may roll over a lump-sum distribution from an IBM-sponsored qualified retirement plan, including the IBM Personal Pension Plan. After-tax amounts may also be directly rolled over into the Plan from another qualified savings plan.

On each valuation date, the unit/share value of each fund is determined by dividing the current investment value of the assets in that fund on that date by the number of units/shares in the fund. The participant's investment value of assets equals the market value of assets for all funds except the Interest Income Fund for which the participant's investment value of assets equals the contract value of assets. In determining the unit/share value, new contributions that are to be allocated as of the valuation date are excluded from the calculation. On the next day, the cash related to new contributions is transferred into the fund and the number of additional units to be credited to a participant's account for each fund, due to new contributions, is equal to the amount of the participant's new contributions to the fund divided by the prior night's unit value.

## Table of Contents

Contributions (with the exception of after-tax contributions and Roth 401(k) contributions) made to the Plan, as well as interest, dividends, or other earnings of the Plan are generally not included in the taxable income of the participant until withdrawal, at which time all earnings and contributions withdrawn generally are taxed as ordinary income to the participant. Additionally, withdrawals by the participant before attaining age 59 1/2 generally are subject to a penalty tax of 10 percent. After-tax contributions made to the Plan are not tax deferred, but are taxable income prior to the participant making the contribution. Any interest, dividends or other earnings on the after-tax contributions are generally not included in the taxable income of the participant until withdrawal, at which time all earnings withdrawn are generally taxed as ordinary income to the participant. Any distribution of earnings on after-tax contributions that are withdrawn by the participant before attaining age 59 1/2 generally are subject to a penalty tax of 10 percent. Roth 401(k) contributions are not tax deferred, but are taxable income prior to the participant making the contribution. Interest, dividends or other earnings on Roth 401(k) contributions may not be taxable at withdrawal provided the participant has met the applicable rules.

Consistent with provisions established by the IRS, the Plan's 2014 limit on employee salary and performance pay deferrals was \$17,500. (The limit for 2015 is \$18,000.) Participants who were age 50 or older during 2014 could take advantage of a higher 401(k) contribution limit of \$23,000. (The limit for 2015 is \$24,000.) The 2014 maximum annual deferral amount for employees residing in Puerto Rico was limited by local government regulations to \$17,500. (The Puerto Rico limit for 2015 is \$18,000.) Puerto Rico participants who were age 50 or older in 2014 could take advantage of a higher contribution limit of \$19,000. (The limit for 2015 is \$19,500.)

## **Vesting**

Participants in the Plan are at all times fully vested in their account balance, including employee contributions, employer contributions and earnings thereon, if any.

## **Distributions**

Participants who have terminated employment or are eligible for in-service distributions (e.g. have reached age 59 1/2) may request ad hoc distributions (\$500 minimum) or a full distribution.

In addition, participants who (1) terminate employment with at least 30 years of IBM service, or (2) become eligible for benefits under the IBM Long-Term Disability Plan or the IBM Medical Disability Income Plan, or (3) are age 55 or older at the time installments begin, may also elect to receive the balance of their account in annual, quarterly or monthly installments. Eligible participants may request installments over a fixed period of time or at a flat dollar amount (\$500 minimum per period for a flat dollar election). Distributions are subject to the required minimum distribution rules for participants who have reached age 70 1/2.

Withdrawals for financial hardship are permitted provided they are for an immediate and significant financial need, and the distribution is necessary to satisfy that need. Employees are required to fully use the Plan loan program, described below, before requesting a hardship withdrawal. Only an employee's contributions are eligible for hardship withdrawal; earnings on before-tax 401(k) and Roth 401(k), and IBM contributions (match, automatic, transition credits and Special Savings Award) are not

Table of Contents

eligible for withdrawal. Employees must submit evidence of hardship to the record keeper who will determine whether the situation qualifies for a hardship withdrawal based on guidance from the Plan administrator. A hardship withdrawal is taxed as ordinary income to the employee and may be subject to the 10 percent additional tax on early distributions.

If the participant dies and is married at the time of death, the participant's spouse must be the beneficiary of the participant's Plan account, unless the participant's spouse has previously given written, notarized consent to designate another person as beneficiary. If the participant marries or remarries, any prior beneficiary designation is canceled and the spouse automatically becomes the beneficiary. If the participant is single, the beneficiary may be anyone previously designated by the participant under the Plan. In the absence of an effective designation under the Plan at the time of death, the proceeds normally will be paid in the following order: the participant's spouse, the participant's children in equal shares, or to surviving parents equally. If no spouse, child, or parent is living, payments will be made to the executors or administrators of the participant's estate.

After the death of a participant, an account will be established for the participant's beneficiary. If the beneficiary is a spouse or domestic partner, the beneficiary's account may be maintained in the Plan, subject to IRS required minimum distributions. If the beneficiary is neither a spouse nor a domestic partner, the account will be paid to the beneficiary in a lump sum. Beneficiaries may roll over distributions from the Plan.

**Participant Loans**

Participants may borrow up to one-half of the value of their account balance, not to exceed \$50,000, within a twelve month period. Loans will be granted in \$1 increments subject to a minimum loan amount of \$500. Participants are limited to two simultaneous outstanding Plan loans. Repayment of a loan is made through semi-monthly payroll deductions. Loans originated under the Plan have a repayment term of one to four years for a general purpose loan or one to ten years for a primary residence loan. There are a limited number of outstanding loans originated under acquired company plans that were merged into the Plan having repayment terms greater than 10 years and up to a maximum term of 30 years. The loans originated under the Plan bear a fixed rate of interest, set quarterly, for the term of the loan, determined by the plan administrator to be 1.25 points above the prime rate. The interest is credited to the participant's account as the semi-monthly repayments of principal and interest are made. Interest rates on outstanding loans at December 31, 2014 and 2013 ranged from 4.25 percent to 11.00 percent.

Participants may prepay the entire remaining loan principal at any time. Employees on an approved leave of absence may elect to make scheduled loan payments directly to the Plan. Participants may continue to contribute to the Plan while having an outstanding loan. A loan default is a taxable event to the participant and will be reported as such in the year of the loan default.

Participants who retire or separate from IBM and have outstanding Plan loans may make loan repayments via coupon payments or ACH deductions to continue monthly loan repayments according to their original amortization schedule.

Table of Contents

**Termination of Service**

If the value of a participant's account is \$1,000 or less, it will be distributed to the participant in a lump-sum payment following the termination of the participant's employment with IBM. If the account balance is greater than \$1,000 at the time of separation, the participant may defer distribution of the account until age 70 ½.

**Termination of the Plan**

IBM reserves the right to terminate this Plan at any time by action of the Board of Directors of IBM. In that event, each participant or beneficiary receiving or entitled to receive payments under the Plan would receive the balance of the account at such time and in accordance with applicable law and regulations. In the event of a full or partial termination of the Plan, or upon complete discontinuance of contributions under the Plan, the rights of all affected participants in the value of their accounts would be non-forfeitable.

**Risks and Uncertainties**

The Plan provides for various investment options in the form of mutual funds, commingled funds or separately-managed funds. These funds invest in equities, fixed income securities, synthetic guaranteed investment contracts ( synthetic GICs ), a separate account investment contract ( separate account GIC ) and derivative contracts. Investment securities are exposed to various risks, such as interest rate movements, credit quality changes and overall market volatility. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is reasonably possible that changes in risks in the near term could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits. The Plan is potentially exposed to credit loss in the event of non-performance by the companies with whom the Plan entered into the synthetic GICs and a separate account GIC. However, the Committee does not anticipate non-performance by these companies at this time.

**NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Basis of Presentation**

The accompanying financial statements are prepared under the accrual basis of accounting, except distributions, which are recorded when paid. Notes receivable from participants are measured at their unpaid principal balance plus any accrued interest. Within the financial tables presented, certain columns and rows may not add due to the use of rounded numbers for disclosure purposes.

Table of Contents

**Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ( U.S. GAAP ) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, and disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

**Investment Contracts**

Investment contracts held by a defined contribution plan are reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. Contract value represents contributions made to investment contracts plus interest at the contract rates less withdrawals and administrative expenses. The statements of net assets available for benefits present the fair value of the investments in the Interest Income Fund as well as the adjustment from fair value to contract value for the fully benefit responsive investment contracts within the Interest Income Fund. The statement of changes in net assets available for benefits presents these investments on a contract value basis.

**Valuation of Investments**

The Plan's investments are stated at fair value. Accounting guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Under this guidance, the Plan is required to classify certain assets and liabilities based on the following fair value hierarchy:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date;
  
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
  
- Level 3 Unobservable inputs for the asset or liability.

The guidance requires the use of observable market data if such data is available without undue cost and effort.

Table of Contents

Assets are classified within the fair value hierarchy according to the lowest level input that is significant to the fair value measurement. Valuation techniques used maximize the use of observable inputs and minimize the use of unobservable inputs. A security that is categorized as Level 3 is valued using the last available market price or a price from an alternate pricing source. The valuation methodology is applied consistently from period to period.

Investments in mutual funds and commingled funds are valued at the net asset values per share using available inputs to measure fair value by such companies or funds as of the valuation date. Generally, mutual funds have a quoted market price in an active market and are classified as Level 1 and commingled funds which may include 103-12 investments, common collective trusts and pooled separate accounts are classified as Level 2 based upon observable data.

Common stocks and financial derivative instruments, such as futures contracts or options contracts that are traded on a national securities exchange are stated at the last reported sale or settlement price on the day of valuation. Valuation adjustments may be applied to certain securities that are solely traded on a foreign exchange to account for the market movement between the close of the foreign market and the close of the New York Stock Exchange. These securities are valued using pricing service providers that consider the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments.

Fixed income investments are valued on the basis of valuations furnished by Trustee-approved independent pricing services. These services determine valuations for normal institutional-size trading units of such securities using models or matrix pricing, which incorporates yield and/or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date and quotations from bond dealers to determine current value. If these valuations are deemed to be either not reliable or not readily available, the fair value will be determined in good faith by the Trustee.

Over-the-counter derivatives are typically valued using proprietary pricing models that use as their basis readily observable market parameters that is, parameters that are actively quoted and can be validated to external sources, including industry pricing services. Depending on the types and contractual terms of derivatives, fair value can be modeled using a series of techniques, such as the Black-Scholes option pricing model, simulation models or a combination of various models, which are consistently applied. Where derivative products have been established for some time, the Plan uses models that are widely accepted in the financial services industry. These models reflect the contractual terms of the derivatives, including the period to maturity, and market-based parameters such as interest rates, volatility, and the credit quality of the counterparty. Further, many of these models do not contain a high level of subjectivity, as the methodologies used in the models do not require significant judgment, and inputs to the model are readily observable from actively quoted markets, as is the case for plain vanilla interest rate swaps, option contracts and credit default swaps.

Interest bearing cash securities are valued at amortized cost, which includes cost and accrued interest and approximates fair value.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine fair value of certain financial instruments could result in a different fair value measurement

at the reporting date.

Table of Contents

**Security Transactions and Related Investment Income**

Security transactions are recorded on a trade-date basis. Dividend income is recorded on the ex-dividend date and interest income is recorded on the accrual basis.

The Plan presents in the Statement of Changes in Net Assets Available for Benefits the net change in the fair value of its investments, which consists of realized gains and losses and the unrealized appreciation and depreciation on those investments.

**Administrative Expenses and Investment Management Fees**

Participants pay for administrative expenses of the Plan which are included in each fund's expense ratio. These costs include (a) investment management, custody and benefit responsive investment contract fees which are charged to the applicable funds and (b) operational expenses required for administration of the Plan including trustee and recordkeeping which are charged against the funds' assets on a pro rata basis throughout the year. Operational expenses related to balances in the Mutual Fund Window are deducted from participant account balances. Brokerage fees, and commissions are included in the cost of investments and in determining net proceeds on sales of investments. Investment management, custody and administrative fees for commingled trusts and mutual funds are charged based on a percentage of net asset value and are paid from the assets of the respective funds.

**Standards to be Implemented**

In May 2015, the Financial Accounting Standards Board (FASB) amended guidance for reporting investments in certain entities that calculate net asset value per share (or its equivalent) so that entities will no longer be required to categorize these investments in the fair value hierarchy or to provide the related fair value disclosures. The guidance is effective for the year ending December 31, 2016 with early adoption permitted and is not expected to have a material impact on the Plan's Financial Statements.

Table of Contents**NOTE 3 INVESTMENTS**

The following schedules summarize the fair value of investments within the fair value hierarchy, Level 3 gains and losses, fair value of investments that calculate net asset value, investments that represent 5 percent or more of the Plan's net assets and the related net change in the fair value of investments by type of investment.

The following tables set forth by level, within the fair value hierarchy, the Plan's investments at fair value at December 31, 2014 and 2013.

**Investments at Fair Value as of December 31, 2014**

(Dollars in Thousands)	Level 1	Level 2	Level 3	Total
<b>Equity:</b>				
Equity commingled*/mutual funds	\$ 3,820,468	\$ 14,856,322	\$	\$ 18,676,790

Table of Contents

**Level 3 Gains and Losses**

The following table presents the changes in the fair value of the plan's Level 3 investments for the year ended December 31, 2014:

(Dollars in Thousands)	International Companies	US Mid-Cap Companies	US Small- Cap Companies	Government Securities Rated Below A	Corporate Bonds Rated Below A	Mortgage and Asset-Backed Securities	Total
<b>Balance at January 1, 2014</b>	\$ 24	\$	\$ 12	\$ 1,314	\$ 590	\$ 499	\$ 2,440
<b>Unrealized gains/(losses) on assets held at end of year*</b>	(334)	153	(8)		(24)	28	(184)
<b>Realized gains/(losses)*</b>	2			126	204	(2)	331
<b>Purchases</b>	131				665		797
<b>Sales</b>	(26)			(1,441)	(1,080)	(156)	(2,702)
<b>Transfers into Level 3 **</b>	287				26		313
<b>Transfers out of Level Balance at December 31, 2014</b>	\$ 85	\$ 153	\$ 4	\$ 0	\$ 382	\$ 370	\$ 994

\*Reported in the net change in fair value of investments in the Statement of Changes in Net Assets Available for Benefits.

\*\*Transferred from Level 2 to Level 3 because observable market data was not available for the securities.

The Plan's policy is to recognize transfers in and transfers out at the beginning of the period.

Table of Contents**Fair Value of Investments that Calculate Net Asset Value**

The following table summarizes investments measured at fair value based on net asset value per share at December 31, 2014 and 2013, respectively:

Investments at fair value:	2014	2013
	(Dollars in thousands)	
Equity funds (a)	\$ 14,856,322	\$ 13,884,615
Fixed income funds (b)	607,082	569,130
Other funds (c)	1,177,179	1,118,184

(a) The equity funds are invested to gain exposure to broad public indices, including U.S. and international market securities.

(b) The fixed income funds are part of the underlying holdings within the Interest Income Fund and include investments in public and private bonds.

(c) The other funds consist of a balanced exposure fund and a commodities fund that are only available to participants as part of the Life Cycle funds. The balanced exposure fund invests in stocks, bonds and commodities with the objective of balancing risk across different economic environments or risk factors.

Generally, under ordinary market conditions, investments in the funds included in the table above provide daily market liquidity to Plan participants and the Plan, facilitating daily participant transactions (issuances and redemptions). Investment in some of these funds may be subject to redemption restrictions at the fund's discretion in limited situations including, but not limited to, a major market event, closure of a market on which any significant portion of the assets of the fund are invested, a situation deemed to be an emergency by the fund, and a situation in which price or value of the assets cannot be promptly and accurately ascertained. At December 31, 2014 and 2013, no funds were subject to redemption restrictions.

Table of Contents**Investments Five Percent or More of Plan's Net Assets**

The investments that represent 5 percent or more of the Plan's net assets available for benefits at December 31, 2014 and/or 2013 are as follows:

Investments	2014	2013
	(Dollars in thousands)	
Large Company Index Fund (Vanguard Employee Benefit Index Fund)	\$ 5,761,434	\$ 5,305,752
Total Stock Market Index Fund (Vanguard Total Stock Market Index Trust)	4,878,696	4,402,837

**Net Change in Fair Value of Investments**

The following table represents the net appreciation in the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year):

	2014
	(Dollars in thousands)
Investments at fair value:	
Commingled / Mutual Funds	\$ 1,517,235
Equity Securities	2,005
Fixed Income Securities	119,021
Total	\$ 1,638,261

**NOTE 4 DERIVATIVES**

In accordance with the investment strategy of the separately-managed funds and the Interest Income Fund, investment managers execute transactions in various derivative instruments. These derivative instruments include swaps, options, bond and equity futures and forward contracts. The use of derivatives is permitted principally to gain or reduce exposure or execute an investment strategy more efficiently. The investment managers use these derivative instruments to manage duration and interest rate volatility and exposure to credit, currency, equity, and cash.

Table of Contents

Within the fixed income funds, the investment managers either sell or purchase credit protection through credit default swaps. The investment managers also enter into interest rate swap transactions where a series of fixed versus floating rate amounts are exchanged.

Derivatives may be executed on exchange traded investment instruments or via over the counter (OTC) transactions. When an OTC contract is executed, there is exposure to credit loss in the event of non-performance by the counterparties to these transactions. IBM manages this exposure through the credit criteria included in the investment guidelines and monitors and reports market and counterparty credit risks associated with these instruments. The Plan's investment managers negotiate and enter into collateral and netting agreements with counterparties on the Plan's behalf. In the event of a counterparty default, these agreements reduce the potential loss to the Plan. These arrangements define the nature of the collateral (cash or U.S. Treasury securities) and the established thresholds for when additional collateral is required by either party. For OTC transactions, the Plan has posted collateral of \$1 million and \$11 million and received collateral of \$10 million and \$8 million at December 31, 2014 and 2013, respectively. In addition, for exchange traded transactions, the Plan has posted \$8 million and \$3 million of collateral as of December 31, 2014 and 2013, respectively and received \$0.4 million and no collateral at December 31, 2014 and 2013, respectively. Derivative collateral received is recorded in Investments, at fair value and Payable for collateral deposits in the Statements of Net Assets Available For Benefits. Derivative collateral posted is recorded in Investments, at fair value in the Statements of Net Assets Available For Benefits. In the Statements of Net Assets Available For Benefits, the Plan does not offset derivative assets against liabilities where the Plan has a legal right of setoff under a master netting agreement nor does it offset Investments, at fair value or Payable for collateral deposits recognized upon payment or receipt of cash collateral against the fair value of the related derivative instruments. Derivative liabilities are recorded in Investments, at fair value in the Statements of Net Assets Available For Benefits.

Market risk arises from the potential for changes in value of financial instruments resulting from fluctuations in interest and foreign exchange rates and in prices of debt and equity securities. The notional (or contractual) amounts used to express the volume of these transactions do not necessarily represent the amounts potentially subject to market risk.

Derivative financial instruments are carried at fair value. The net fair value of derivative financial instruments was an asset of \$6 million and \$15 million as of December 31, 2014 and 2013, respectively.

The Plan has authorized Investment Managers to use specific derivative instruments in the implementation of their investment strategy for financial instruments that are managed by the Plan. The following section discloses how these derivatives may be used, their fair value and financial position at year-end, and the risks associated with each. Exchange traded derivatives, including futures and options, are regulated by the exchange and approved broker dealers. OTC derivatives include foreign currency, forward contracts, options, and swaps. These transactions will be contracted between two counterparties and governed by separate agreements. A description of these instruments and the risks are below.

Table of Contents

**Futures Contracts**

Futures contracts are standardized agreements to buy or sell a specific amount of a financial instrument on a future date for a specified price. Futures are valued based upon their quoted daily price. The primary risks associated with futures are the accuracy of the correlation between the value of bonds or equities and the price of the futures contracts. Futures contracts may be used to equitize cash and manage exposure to changes in interest rates. Upon entering into a futures contract, the investment manager is required to deposit collateral or initial margin and subsequent margin payments are moved daily depending on the value of the contract. Futures contracts may be subject to risk of loss in excess of the daily variation margin. They are classified as either interest rate or equity contracts on the derivative instrument tables that follow.

**Options Contracts**

Options include equity options, index options, options on swaps (swaptions), and options on futures. Options are contracts that give the owner the right, but not the obligation, to buy or sell an asset at a specified price (strike price) on a future date. Options may be purchased or written to help manage exposure to the securities markets. Investment managers may write (sell) call and put options and the premiums received from writing options which expire are treated as realized gains. Premiums received from a position which is exercised/closed are offset against the amount paid for the underlying security to calculate the gain or loss. An option writer (seller) has no control over whether the underlying instrument may be sold (call) or purchased (put) and bears the market risk of an unfavorable change in the price of the underlying instrument. Investment managers may also purchase put and call options. Purchasing call options is intended to increase exposure to the underlying instrument, while purchasing put options would tend to decrease exposure to the underlying issue. Premiums paid for purchasing options which expire are realized losses. The risk associated with purchasing put and call options is limited to the premium paid. Options may be traded on an exchange or OTC. For OTC options, the Plan could be exposed to risk if the counterparties are unable to meet the terms of the contracts. This risk is mitigated by the posting of collateral by the counterparty and monitored against the contract terms. Options are classified as interest rate or foreign exchange contracts on the derivative instruments tables that follow.

**Foreign Currency Forwards**

A foreign currency forward is a contract between two parties to exchange money denominated in one currency into another currency at a set price on a specified future date. Foreign currency forwards are used to hedge the currency exposure, as a part of an investment strategy, or in connection with settling transactions. Foreign currency contracts may involve market risk in excess of the unrealized gain or loss. Forward transactions are typically not collateralized. The Plan could be exposed to risk if the counterparties are unable to meet the terms of the contracts.

**Swap Agreements**

Swap agreements are privately negotiated contracts to exchange investment cash flows at a future date based on the underlying value of the assets. Swap agreements involve elements of credit, market, and documentation risk. The Plan could be exposed to risk if the counterparties are unable to meet the terms of the contracts. This risk is mitigated by the posting of collateral by the counterparty and monitored against the contract terms. Swap agreements may be centrally cleared or traded OTC. For OTC swap agreements, the Plan could be exposed to risk if the counterparties are unable to meet the terms of the contracts. This risk is mitigated by the posting of collateral by the counterparty and monitored against the contract terms. Swap agreements are classified as interest rate or credit contracts on the derivative instruments tables that follow.

Table of Contents

**Interest Rate Swaps**

An Interest rate swap is an agreement in which two parties exchange cash flows based upon a notional principal amount and pay or receive fixed or floating rate amounts of interest. One party exchanges a stream of fixed interest payments for another party's stream of floating interest payments. Investment managers may enter into interest rate swap agreements to help hedge against interest rate risk and to maintain its ability to generate income at prevailing market rates. Interest rate swaps expose users to interest rate risk and credit risk. The notional value of an interest rate swap is not at risk.

**Credit Default Swaps**

Credit default swaps are agreements where one party (the buyer of protection) makes payments to another party (seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event. Investment managers may use credit default swaps to provide a measure of protection against defaults of the issuers or to gain or reduce exposure to a particular credit exposure. The typical term of an agreement is five years. If an investment manager is a buyer of protection and a credit event occurs, the portfolio will either receive from the seller of protection an amount equal to the notional amount of the swap or receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation. If an investment manager is a seller of protection and a credit event occurs, the portfolio will either pay to the buyer of protection an amount equal to the notional amount of the swap or pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation. The maximum potential amount of future payments that the Plan as a seller could be required to make is \$124 million. Credit default swaps are considered to have credit risk-related contingent features since they require payment by the protection seller upon the occurrence of a defined credit event.

**Total Return Swaps**

A Total Return Swap allows one party to derive the economic benefit of owning an asset without putting that asset on its balance sheet, and allows the other party, which does retain the asset on its balance sheet, to buy protection against loss in value. Investment managers may enter into Total Return Swaps to gain/reduce exposure on the Referenced Asset.

The following tables provide a quantitative summary of the derivative activity as of December 31, 2014 and 2013 and for the year ended December 31, 2014.

Table of Contents**Fair Values of Derivative Instruments on Statements of Net Assets Available for Benefits**

(Dollars in Thousands)

<b>At December 31, 2014:</b>	<b>Notional/ contractual amount</b>	<b>Assets *</b>	<b>Liabilities *</b>

---

\*Reported in Investments, at fair value on the Statements of Net Assets Available for Benefits

For futures and centrally cleared derivative assets of \$11M and \$22M and derivative liabilities of \$14M and \$9M at December 31, 2014 and 2013, respectively, the Plan does not have a legal right of setoff under a master netting agreement.

Table of Contents

**NOTE 5 INVESTMENT CONTRACTS**

The Plan entered into benefit-responsive synthetic investment contracts ( synthetic GICs ) and a separate account investment contract ( separate account GIC and together with the synthetic GICs, Investment Contracts ), for the Interest Income Fund ( the Fund ), with various third parties, i.e., insurance companies and banks. The fair value of the Investment Contracts was determined using a discounted cash flow model which considers recent rebids as determined by recognized dealers, a discount rate and the duration of the underlying portfolio.

A synthetic GIC provides for a fixed return on principal over a specified period of time, e.g., a quarterly crediting rate. These investment contracts, which are backed by underlying assets owned by the Plan, are issued by third parties. A separate account GIC also provides for a fixed return on principal and these investment contracts are funded by contributions which are held in separate accounts at the third party established for the sole benefit of the Fund participants. Both types of Investment Contracts are meant to be fully benefit-responsive. Participants transact at contract value, which represents contributions plus interest earned based on a formula called the crediting rate. The crediting rate formula smooths and decreases differences over time between the market value of the covered assets and the contract value. The crediting rate is most impacted by the change in the annual effective yield to maturity of the underlying securities, but is also affected by changes in general level of interest rates, administrative expenses and cash flows into or out of the contract. The difference between the contract value and the market value of the covered assets is amortized over time as determined by the terms of the contract, typically the Investment Contract's actual or benchmark duration. A change in duration of the covered assets or benchmark from reset period to reset period can affect the speed with which any difference is amortized. Crediting rates are reset quarterly or more often if deemed appropriate. Investment Contracts provide a guarantee that the crediting rate will not fall below zero percent.

An Investment Contract crediting rate, and hence the Fund's return, may be affected by many factors, including purchases and redemptions by participants. The precise impact on the Investment Contract depends on whether the market value of the covered assets is higher or lower than the contract value of those assets. If the market value of the covered assets is higher than the contract value, the crediting rate will ordinarily be higher than the yield of the covered assets. Under these circumstances, cash from new investors will tend to lower the crediting rate and the Fund's return, and redemptions by existing participants will tend to increase the crediting rate and the Fund's return. If the market value of the covered assets is less than the contract value, the crediting rate will ordinarily be lower than the yield of the covered assets. Under these circumstances, cash from new investors will tend to increase the crediting rate and the Fund's return, and redemptions by existing participants will tend to decrease the crediting rate and the Fund's return. If the Investment Contract experiences significant redemptions when the market value is below the contract value, the Investment Contract's crediting rate may be reduced significantly, to a level that may not be competitive with other investment options. If redemptions continued, the crediting rate could be reduced to zero. If the Investment Contract has insufficient covered assets to meet redemption requests, the Fund would require payments from the investment contract issuer to pay further participant redemptions.

Table of Contents

The Fund and the Investment Contracts purchased for the Fund are designed to pay all participant-initiated transactions at contract value. Participant-initiated transactions are those transactions allowed by the provisions of the Plan (typically this would include withdrawals for benefits, loans, or transfers to non-competing funds within the Plan). However, the Investment Contracts may limit the ability of the Fund to transact at contract value upon the occurrence of certain events. At this time, the occurrence of any of these events is not probable. These events include:

- The Plan's failure to qualify under Section 401(a) or Section 401(k) of the Internal Revenue Code.
- The establishment of a defined contribution plan that competes with the Plan for employee contributions.
- Any substantive modification of the Plan or the administration of the Plan that is not consented to by the investment contract issuer.
- Complete or partial termination of the Plan.
- Any change in law, regulation or administrative ruling applicable to the Plan that could have a material adverse effect on the Fund's cash flow.
- Merger or consolidation of the Plan with another plan, the transfer of plan assets to another plan, or the sale, spin-off or merger of a subsidiary or division of the plan sponsor.
- Any communication given to participants by the Plan sponsor or any other plan fiduciary that is designed to induce or influence participants not to invest in the Fund or to transfer assets out of the Fund.
- Exclusion of a group of previously eligible employees from eligibility in the Plan.
- Any significant retirement program, group termination, group layoff, facility closing or similar program.
- Any transfer of assets from the Fund directly to a competing option, if such transfers are prohibited.

- Bankruptcy of the plan sponsor or other plan sponsor events which cause a significant withdrawal from the Plan.

An investment contract issuer may terminate a contract at any time. In the event that the market value of the covered assets is below the contract value at the time of such termination, the Plan may elect to keep a contract in place to allow for the convergence of the market value and the contract value. An investment contract issuer may also terminate a contract if certain terms of the Investment Contract fail to be met.

Table of Contents

Investment Contracts generally impose conditions on both the Plan and the issuer. If an event of default occurs and is not cured, the non-defaulting party may terminate the contract. The following may cause the Plan to be in default: a breach of material obligation under the contract; a material misrepresentation; or a material amendment to the Plan agreement. The issuer may be in default if it breaches a material obligation under the investment contract; makes a material misrepresentation; is acquired or reorganized. If, in the event of default of an issuer, the Fund were unable to obtain a replacement investment contract, the Fund may experience losses if the market value of the Plan's assets no longer covered by the contract is below contract value. The Fund may seek to add additional issuers over time to diversify the Fund's exposure to such risk, but there is no assurance the Fund will be able to do so. The combination of the default of an issuer and an inability to obtain a replacement agreement could render the Fund unable to maintain contract value. The terms of an Investment Contract generally provide for settlement of payments only upon termination of the contract or total liquidation of the covered investments. Generally, payments will be made pro-rata, based on the percentage of investments covered by each issuer. Contract termination occurs whenever the contract value or market value of the covered investments reaches zero or upon certain events of default. If the contract terminates when the market value equals zero, the issuer will pay the excess of contract value over market value to the Plan to the extent necessary for the Plan to satisfy outstanding contract value withdrawal requests. Contract termination also may occur by either party upon election and notice as agreed to under the terms of the contract.

The following table provides the fair value and contract value for the Investment Contracts and the fair value of the underlying assets net of all receivables and payables.

Investment Contracts at December 31,	2014	2013
	(Dollars in thousands)	
Fair value:		
Investment Contracts	\$ 1,180,812	\$ 633,210
Underlying assets net of payables/receivables	7,897,738	8,864,949
Fair value of Investment Contracts and underlying assets	\$ 9,078,549	\$ 9,498,159
Adjustment from fair value to contract value	(442,160)	(293,477)
Contract value of Investment Contracts	\$ 8,636,389	\$ 9,204,682

The Investment Contracts owned by the Interest Income Fund produced the following returns:

	2014	Year Ended December 31,	2013
Earned by the Plan	4.35%		-1.33%
Credited to participants	2.89%		3.04%

Table of Contents

**NOTE 6 - DESCRIPTION OF INVESTMENT FUNDS**

The objectives of the thirty-three primary investment funds in which participants could invest in 2014 are described below:

**Life Cycle Funds**

The fourteen Life Cycle funds reflect a portfolio of diversified investments – U.S. stocks, international stocks, real estate equity stocks, and fixed-income investments – from the existing core funds noted below, plus a balanced exposure fund and a commodities fund (not available to participants as standalone offerings). These funds offer a convenient low-cost way to achieve diversification, professional investment management and periodic rebalancing. The funds are structured by the IBM Retirement Fund organization and managed by the underlying funds' managers.

Ten Life Cycle Funds are Target Date Funds that offer portfolios with asset allocations designed for varying retirement dates or the year in which one expects to start drawing on their retirement assets. The portfolios are offered in five year increments from 2005 to 2050, with the 2030 through 2050 funds providing a significantly higher allocation to stocks. As a fund draws closer to its associated target date, the fund will automatically shift toward a more conservative risk level by reducing its allocation to stocks. Each fund's reduction to stocks continues through its target date for another 10 years, until the fund's allocation and risk profile matches that of the Income Plus Fund and will subsequently be merged into the Income Plus Life Strategy Fund. The Target Date funds assume a retirement age of 60.

- **Target Date 2005 Fund** - designed for investors who have retired or started to draw on their retirement assets on or around the year 2005; seeks returns that moderately outpace inflation over the long term. Target asset allocation between stocks and bonds is 26% stocks\*, 74% bonds. It will be merged into the Income Plus Life Strategy Fund during 2015.
- **Target Date 2010 Fund** - seeks relatively high returns at a moderate risk level. Target asset allocation between stocks and bonds is 39% stocks\*, 61% bonds.
- **Target Date 2015 Fund** - seeks relatively high returns at a moderate risk level. Target asset allocation between stocks and bonds is 51% stocks\*, 49% bonds.
- **Target Date 2020 Fund** - seeks high returns over the long term. Target asset allocation between stocks and bonds is 63% stocks\*, 37% bonds.
- **Target Date 2025 Fund** - seeks high returns over the long term. Target asset allocation between stocks and bonds is 75% stocks\*, 25% bonds.
- **Target Date 2030 Fund** - seeks high returns over the long term. Target asset allocation between stocks and bonds is 86% stocks\*, 14% bonds.
-

**Target Date 2035 Fund** - seeks high returns over the long term. Target asset allocation between stocks and bonds is 90% stocks\*, 10% bonds.

- **Target Date 2040 Fund** - seeks high returns over the long term. Target asset allocation between stocks and bonds is 90% stocks\*, 10% bonds.
- **Target Date 2045 Fund** - seeks high returns over the long term. Target asset allocation between stocks and bonds is 90% stocks\*, 10% bonds.
- **Target Date 2050 Fund** - seeks high returns over the long term. Target asset allocation between stocks and bonds is 90% stocks\*, 10% bonds.
- **Target Date 2055 Fund will be added during 2015** will seek high returns over the long term. Target asset allocation between stocks and bonds will be 90% stocks\*, 10% bonds.

\* Exposure to the balanced exposure and commodities funds is considered part of the allocation to stocks.

Table of Contents

Four Life Cycle Funds are Life Strategy Funds that have a preset mix of stock and fixed income investments in order to provide broad diversification at four given levels of exposure to equities. The preset mix of each Life Strategy Fund is not expected to change over time.

- **Income Plus Life Strategy Fund** - target allocation: 25% stocks\*, 75% bonds; seeks returns that modestly outpace inflation on a fairly consistent basis.
- **Conservative Life Strategy Fund** - target allocation: 50% stocks\*, 50% bonds; seeks returns that moderately outpace inflation over the long term.
- **Moderate Life Strategy Fund** - target allocation: 65% stocks\*, 35% bonds; seeks relatively high returns at a moderate risk level.
- **Aggressive Life Strategy Fund** - target allocation: 90% stocks\*, 10% bonds; seeks high returns over the long term.

---

\* Exposure to the balanced exposure and commodities funds is considered part of the allocation to stocks.

Table of Contents

**Core Funds** - eight funds that provide an opportunity to build a portfolio from a selection of broadly diversified U.S. and international stock funds and from funds that track the fixed-income markets.

- **Interest Income Fund** - seeks to provide income similar to an intermediate bond fund with low volatility and to preserve principal. The fund is managed by multiple investment managers.
- **Inflation Protected Bond Fund** - seeks over the long term to provide a rate of return similar to the Barclays U.S. Treasury Inflation Protected Securities - Series L Index (TIPS). The fund is managed by State Street Global Advisors.
- **Total Bond Market Fund** - seeks to provide a rate of return similar to its benchmark index (Barclays Aggregate Bond Index), which consists of a diversified group of U.S. Treasury, federal agency, mortgage-backed, and corporate securities. The fund is managed by Neuberger Berman.
- **High Yield and Emerging Markets Bond Fund** - seeks to modestly exceed the returns of a customized composite benchmark of 40% U.S. high yield, 40% emerging market bonds issued in local currencies and 20% emerging market bonds issued in U.S. dollars. The fund invests in below investment grade U.S. corporate and emerging market bonds. The fund is managed by multiple investment managers.
- **Total Stock Market Index Fund** - seeks long-term growth of capital and income with a market rate of return for a diversified group of U.S. equities. It attempts to match the performance of the Dow Jones U.S. Total Stock Market Index. The fund is managed by The Vanguard Group.
- **Total International Stock Market Index Fund** - seeks long-term capital growth with a market rate of return for a diversified group of non-U.S. equities in such major markets as Europe and Asia plus the emerging markets of the world. It attempts to match the performance of the MSCI All Country World Ex-USA Investable Market Index. The fund is managed by State Street Global Advisors.
- **Real Estate Investment Trust (REIT) Index Fund** - seeks a total rate of return approximating the returns of the MSCI U.S. REIT index. Investment consists of U.S. publicly traded real estate equity securities. The fund is managed by BlackRock Institutional Trust Company.
- **International Real Estate Index Fund** - seeks to replicate the returns of the FTSE EPRA/NAREIT Developed ex US Rental Index. Investment consists of the international market for securities of companies principally engaged in the real estate industry that derive greater than or equal to 70% of their total revenue from rental revenue of investment properties. The fund is managed by BlackRock Institutional Trust Company.

**Expanded Choice Funds** eleven funds that provide an opportunity to build an investment portfolio with funds that are less broadly diversified, focusing instead on discrete sectors of the stock and bond markets.

- **Long-Term Corporate Bond Fund** - seeks to modestly outperform the return of the Barclays U.S. Long Credit Index. The fund invests in a diversified group of investment grade corporate and local U.S. and non-U.S. government fixed-rate debt issues with maturities of ten years or more. The fund is managed by

Neuberger Berman.

Table of Contents

- **Large Company Index Fund** - seeks long-term growth of capital and income from dividends by holding all the stocks that make up the Standard & Poor's 500 Index. The fund is managed by The Vanguard Group.
- **Large-Cap Value Index Fund** - seeks long-term growth of capital and income from dividends. The fund holds all the stocks in the Russell 1000 Value Index in approximately the same proportion as those stocks represented in the index. The fund is managed by The Vanguard Group.
- **Large-Cap Growth Index Fund** - seeks long-term growth of capital by holding all the stocks in the Russell 1000 Growth Index in approximately the same proportion as those stocks represented in the index. The fund is managed by The Vanguard Group.
- **Small/Mid-Cap Stock Index Fund** - seeks long-term growth of capital with a market rate of return from a diversified group of medium- and small-company stocks. The fund holds stocks in the Russell 3000 index that are not part of the Standard and Poor's 500 index and attempts to match the performance of the Russell SmallCap Completeness Index. The fund is managed by State Street Global Advisors.
- **Small-Cap Value Index Fund** - seeks long-term growth of capital by attempting to match the performance of the Russell 2000 Value Index. The fund is managed by The Vanguard Group.
- **Small-Cap Growth Index Fund** - seeks long-term growth of capital by attempting to match the performance of the Russell 2000 Growth Index. The fund is managed by The Vanguard Group.
- **European Stock Index Fund** - seeks long-term growth of capital that corresponds to an index of European stocks. It attempts to match the investment results of the MSCI Europe Index. The fund is managed by The Vanguard Group.
- **Pacific Stock Index Fund** - seeks long-term growth of capital by attempting to match the performance of the MSCI Pacific Index. The fund is managed by The Vanguard Group.
- **Emerging Markets Stock Index Fund** - seeks long-term growth of capital by attempting to match the investment results of the FTSE Emerging Index. The fund is managed by The Vanguard Group.
- **IBM Stock Fund** - invests in IBM common stock and holds a small interest-bearing cash balance of approximately 0.35% for liquidity purposes. The fund is managed by State Street Bank and Trust Company.

IBM 401(k) participants also have access to the mutual fund window investments which expands the Plan's investment options to include about 165 mutual funds, most of which are actively managed. This feature gives more options to participants who are interested in investing in brand-name funds, or in simply having a broader range of investment options from which to choose.

Table of Contents**Securities Lending**

The Plan does not currently engage in securities lending for the separate accounts. Securities lending may be permitted in certain commingled funds and in funds within the mutual fund window. The prospectus for each fund will disclose if lending is permitted and the risks involved.

**Repurchase Agreements**

Certain investment managers of separately managed accounts may enter into repurchase agreements with the objective of managing cash in the portfolio. The repurchase agreements are short-term and managers are limited in the percent of assets which may be invested in them. Counterparties must meet credit rating requirements and permitted collateral is restricted to cash and/or government securities. The Plan received \$38 million and \$23 million of securities collateral at December 31, 2014 and 2013, respectively. The prospectus of commingled funds or funds within the mutual fund window will disclose if repurchase agreements are permitted.

The following table provides a quantitative summary of repurchase agreements that are subject to master netting agreements less cash and securities collateral and the net amount.

(Dollars in thousands)	Gross amount*	Cash collateral	Securities collateral	Net amount
<b>At December 31, 2014</b>				
Repurchase agreements	\$ 37,800	\$	\$ 37,800	\$
<b>At December 31, 2013</b>				
Repurchase agreements	\$ 22,600	\$	\$ 22,600	\$

\*Reported in Investments, at fair value on the Statements of Net Assets Available for Benefits

Table of Contents**NOTE 7 - TAX STATUS**

The Trust established under the Plan is qualified under Section 401(a) of the Internal Revenue Code of 1986 and Section 1081.01 of the Internal Revenue Code for a New Puerto Rico (2011), and the Trustee intends for the Trust to remain dual-qualified in this manner. The Plan received a favorable determination letter from the IRS on January 8, 2015, and received a favorable determination letter from the Hacienda (Puerto Rico) on April 29, 1993. Subsequent to these determination letters by the IRS and the Hacienda, the Plan was amended. The Plan administrator and Counsel continue to believe the Plan is designed and is being operated in compliance with the applicable requirements of the Internal Revenue Code and the Internal Revenue Code for a New Puerto Rico (2011). The Plan submitted a request for a new determination letter to the Hacienda on April 15, 2014.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2014, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

**NOTE 8 - RECONCILIATION OF FINANCIAL STATEMENTS TO FORM 5500**

The following is a reconciliation of net assets available for benefits per the financial statements to the Form 5500 as of:

	12/31 2014		12/31 2013
	(Dollars in thousands)		
Net assets available for benefits per the financial statements	\$ 47,574,974	\$	46,285,274
Plus:			
Adjustment from contract value to fair value for fully benefit-responsive investment contracts held by the Interest Income Fund	442,161		293,477
Net assets available for benefits per the Form 5500	\$ 48,017,136	\$	46,578,751

Table of Contents

The following is a reconciliation of investment income per the financial statements to the Form 5500:

	<b>Year Ended December 31, 2014</b>
	<b>(Dollars in thousands)</b>
Total investment income and interest income on notes receivable from participants per the financial statements	\$ 2,669,300
Less:	
Adjustment from fair value to contract value for fully benefit-responsive investment contracts at December 31, 2013	293,477
Plus:	
Adjustment from fair value to contract value for fully benefit-responsive investment contracts at December 31, 2014	442,161
Total investment income per the Form 5500	\$ 2,817,984

**NOTE 9 - RELATED-PARTY TRANSACTIONS**

At December 31, 2014, a significant portion of the Plan's assets were managed by SSGA, an affiliate of SSBT. SSBT also acts as the Trustee for the Plan and, therefore, these investments in addition to participant loans qualify as party-in-interest transactions. The Plan also pays a fee to the Trustee. These transactions qualify as party-in-interest transactions as well.

In addition, Fidelity is the provider of administrative services related to the mutual fund window as well as an affiliate of the investment manager of Fidelity funds within the mutual fund window. Fidelity is also the provider of record keeping and participant services, and the operator of the IBM Employee Services Center for the IBM 401(k) Plus Plan.

At December 31, 2014 and 2013, the Plan held 10,301,527 and 11,778,076 shares of IBM common stock valued at \$1,652,776,992 and \$2,209,213,715, respectively. During the year ended December 31, 2014, purchases of IBM common stock by the Plan totaled \$110,826,417 and sales of IBM common stock by the Plan totaled \$391,794,541.
