infringement of intellectual property; changes in political conditions; the impact of epidemiological events on the economy and the Company's customers and suppliers; acts of war, terrorism, and natural disasters; and other factors.

The Company believes that the most significant risk factors that could affect its financial performance in the near-term include: (1) the impacts of global economic conditions and political uncertainty on underlying demand for the Company's products and foreign currency fluctuations; (2) competitors' actions, including pricing, expansion in key markets, and product offerings; and (3) the degree to which higher costs can be offset with productivity measures and/or passed on to customers through selling price increases, without a significant loss of volume.

For a more detailed discussion of these and other factors, see Part I, Item 1A. Risk Factors and Part II, Item 7. Management's Discussion and Analysis of Results of Operations and Financial Condition in the Company's 2015 Form 10-K, filed on February 24, 2016 with the Securities and Exchange Commission, and subsequent quarterly reports on Form 10-Q.
