**FORDING PROVIDES CLARIFICATION
ON COST INFORMATION**

CALGARY, February 3, 2004 Fording Canadian Coal Trust (TSX: FDG.UN, NYSE: FDG) held its quarterly conference call earlier today. Based on questions raised during the call, we are providing clarification on the estimated cost of coal sales for 2004. Cost of coal sales are anticipated to be approximately \$50 per tonne compared with \$49.50 per tonne during 2003. The estimated increase is primarily due to anticipated higher distribution costs, which are expected to be partially offset by lower coal production costs.

Coal production and distribution costs account for substantially all of the cost of coal sales. Coal production costs are expected to decrease from the prior year due to a number of factors, including improved operating efficiencies, cost and value improvements, and declining strip ratios.

Distribution costs represented approximately 45 percent of the unit cost of coal sales in 2003. Distribution costs include rail and port handling charges, as well as other costs associated with shipping coal, including demurrage charges and testing fees. While rail and port rates for the first quarter of 2004 are expected to be largely consistent with those incurred in 2003, demurrage charges will increase distribution costs by as much as \$1 to \$2 per tonne if rail service delays continue through the first quarter.

Rail and port rates for the balance of the year will increase from 2003 levels due to rising coal sales prices. A significant portion of rail and port rates are tied to the US dollar and the Canadian dollar price of coal. Factors affecting distribution costs and the amount of any increase therein include sales volumes, the mine producing the coal, the proportion of coal shipped to west versus east, the shipping port, coal prices, and the US/Canadian dollar exchange rate. Improved unit margins are expected when coal price increases come into effect.

Fording Canadian Coal Trust is an open-ended investment trust. Through investments in metallurgical coal and industrial minerals mining and processing operations, the Trust makes quarterly cash distributions to unitholders. The Trust, through its wholly-owned

- 2 -

subsidiary, Fording Inc., holds a 65% ownership of the Elk Valley Coal Corporation and is the world's largest producer of the industrial mineral wollastonite. The Elk Valley Coal

Corporation, comprised of Canada's senior metallurgical coal mining properties, is the world's second largest exporter of metallurgical coal, capable of supplying approximately 25 million tonnes of high-quality coal products annually to the international steel industry.
