NEWS RELEASE

July 12, 2005

WEALTH ACQUIRES URANIUM PROPERTIES IN ARGENTINA

Vancouver, British Columbia... Wealth Minerals Ltd. (the "Company" or "Wealth") - (TSX Venture Exchange: WML, OTC: WMLLF, Frankfurt: EJZ), is pleased to announce that it has an option to acquire a 100% interest in an Argentinean corporation (Madero Minerals S.A.) which is the owner of seventeen (17) separate mineral properties in the provinces of Jujuy, Salta, Catamarca, La Rioja, San Juan and Neuquen, in western and northwestern Argentina. These 17 properties aggregate 175,000 Ha and all cover known uranium occurrences.

Available data indicates that these properties host a variety of geological settings including:

- tabular, sandstones hosted deposits;
- polymetallic vein type deposits;
- intrusive hosted occurrences associated with thorium and rare earth elements;
- volcanic hosted deposits; and
- surficial deposits.

The majority of these occurrences have been explored with trenching, underground development and drilling in some cases.

Wealth intends to become the major uranium company in Argentina. The Company will pursue an aggressive program of exploration and evaluation of the presently owned portfolio of properties as well as seeking out additional uranium prospects in Argentina. Fieldwork is expected to begin on the current property package in early September 2005.

The Company believes that Argentina, which has had a number of producing uranium mines, including the Dr. Baulies Mine in Mendoza, the Don Otto Mine in Salta and the Sierra Pintada/San Rafael Mine in Mendoza, has been relatively under-explored for uranium in recent years and represents a promising area for new discoveries. An example of the potential target Wealth seeks is the Cerro Solo uranium deposit located in Chabut province, Argentina. This deposit which is owned by the Commission Nacional de Energia Atomica de Argentina (CNEA) has been the subject of a prefeasibility study which concluded that it is economically viable based on mineable reserves at an average grade of 0.3% U_3O_8 containing a recoverable uranium oxide content of 10.3 million pounds.

With uranium oxide (U_3O_8) currently trading at a spot price of US\$29/lb, up 40% for 2005 and over double the 5 year average price of US\$13.14, Wealth believes that the recent strengthening of the uranium market, coupled with forecasts of impending supply shortages has further enhanced the attractiveness of the uranium sector as a business opportunity.

Subject to TSX Venture Exchange acceptance, the Company can acquire 100% interest in Madero Minerals S.A. and its assets for the payment of US\$100,000 and the issuance of 600,000 common shares over two years as follows:

Suite 1901 - 1177 West Hastings Street, Vancouver, BC
