One-third of the outstanding shares of the Company common stock entitled to vote at the special meeting, present or represented by proxy, constitutes a quorum. A quorum is necessary to conduct business at the special meeting. You will be considered part of the quorum if you have voted by proxy. Abstentions, broker non-votes and votes withheld from director nominees count as "shares present" at the special meeting for purposes of determining a quorum. However, abstentions and broker non-votes do not count in the voting results. A broker non-vote occurs when a broker or other nominee who holds shares for another does not vote on a particular item because the broker or nominee does not have discretionary authority for that item and has not received instructions from the owner of the shares.

The approval of the sale of 100% of the Company's interest in the Subsidiaries as contemplated in the Agreement entered into by and between Invitel and the Company will require an affirmative vote of the majority of the votes cast in person or by proxy, provided that a quorum is present at the special meeting.

Summary Term Sheet for Proposal No. 1

In Proposal No. 1, you are being asked to approve the sale of the Subsidiaries to Invitel. The terms of the Agreement mandate that the total purchase price to be paid is US \$30,000,000 of which US \$29,400,000 is payable at closing and the remaining US \$600,000 is payable upon delivery of a certificate prepared by an independent auditor identifying the net indebtedness of the Subsidiaries, which are required to be debt free including the full payment by Euroweb Hungary on or prior to the Closing Date of the US \$6,000,000 loan it received from Commerzbank Hungary ("Commerzbank") in connection with the Company's acquisition of Navigator Informatika Rt. ("Navigator"). The purchase price is to be reduced by the amount of any debt held in the Subsidiaries. The closing of the sale of the Subsidiaries, of which we cannot provide any guarantee, is expected to occur within seven business days of the delivery of an audit report prepared by an independent auditor with respect to the Subsidiaries and the approval of the Agreement by the shareholders of the Company provided that such date is no later than June 30, 2006 and receipt of approval of the proposed transaction by the Hungarian Economic Competition Office in Hungary, which the Company has received. If the Company fails to have the Agreement approved at a shareholders meeting, the Company will be obligated to reimburse Invitel for its expenses associated with the acquisition of the Subsidiaries not to exceed EUR 400,000. The Company has classified the Subsidiaries as discontinued operations reflecting revenue for the year ended December 31, 2004 of zero.

Reason for the Transaction

The Board of Directors believes the sale of the Subsidiaries, which are engaged in the business of providing Internet Service in Hungary and Romania, is the culmination of the Company's strategy that was first implemented in 1997 of identifying and developing companies within emerging industries for the purpose of consolidation and sale if favorable market conditions exist. Although the Company primarily focuses on the operation and development of its core businesses, the Company pursues consolidations and sale opportunities as presented in order to develop its core businesses.

The Company commenced the consolidation strategy in various Central and Eastern European countries as follows:

- o in Hungary, with the acquisition of various Internet and telecommunications companies in 1997 that were eventually consolidated and named Euroweb Hungary, the acquisition of Elender Rt. in 2004 and the acquisition of Navigator in 2005;
- o in Romania, with the acquisition of several Internet and telecommunications companies in 2000 that were eventually consolidated and named Euroweb Romania;
- o in Slovakia, with the acquisition of several Internet and telecommunications companies from 1999 to 2000 that were eventually consolidated and named Euroweb Slovakia; and
- o in Czech Republic, with the acquisition of two Internet and

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

telecommunications companies during 1999 and 2000 that were eventually consolidated and named Euroweb Czech Republic.

In 2004, the Company elected to sell its Internet Service assets located in the Czech Republic and Slovakia as the Company received offers it believed were above the market value of such assets. Further, the disposition of the two Subsidiaries, Euroweb Hungary and Euroweb Romania, for a purchase price of \$30,000,000 will allow the Company to redeploy capital to acquire additional assets in IT space and other as-yet unidentified industries that the Company deems profitable, as well as focus its expertise in the area of IT outsourcing in Central and Eastern Europe. If the opportunity presents itself, the Company will consider implementing its consolidation strategy with its remaining subsidiary and any other business that it enters. However, the Company does not presently have any plans, proposals or arrangements to redeploy its capital or engage in any acquisitions. The Company has not yet identified any specific new industries in which to invest.

For a more detailed discussion please see "Proposal No. 1 - Approval of the Sale of the Subsidiaries to Invitel" located on page 8.

Conditions to Closing of the Sale of the Subsidiaries

6

The completion of the proposed sale of the Subsidiaries depends upon the meeting of a number of conditions including the following:

- o The issuance by the Hungarian Economic Competition Office of its unconditional approval of the sale of the Subsidiaries to Invitel, which has been issued;
- o Approval of the Agreement by a majority of the stockholders of the Company at a special meeting of stockholders in which a quorum was present;
- o Delivery of an audit report prepared by an independent auditor with respect to the Subsidiaries and the absence of any event or circumstance revealed in the audit that could reasonably be expected to have a material adverse effect on the financial condition of the Subsidiaries, of which Invitel was not aware; and
- o There shall be no material adverse change with respect to the Subsidiaries.

Risks

The sale of the Subsidiaries will reduce the lines of business which we conduct. This decrease in diversification of our business could serve to magnify any downturns in the remaining business lines. In particular:

- o Our ability to adjust to changes in consumer demand or economic shifts could be materially impacted.
- o Upon classifying the Subsidiaries as discontinued operations (see "Accounting Treatment"), our revenue for the year ended December 31, 2004 decreased to \$-0- from \$28,111,786.
- o Upon classifying the Subsidiaries as discontinued operations, our net loss from continuing operations for the year ended December 31, 2004 increased to \$1,402,766 from a net loss of \$1,099,176.
- o Although we solicited a number of offers for the Subsidiaries, there can

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

be no assurance that the value may not be higher in a sale to other purchasers.

- o The loss of expected synergies and a common customer base between Navigator Informatika Rt. and Euroweb Hungary, which may limit Navigator Informatika Rt.'s ability to generate revenue and may also have a goodwill impairment effect.
- o As a result of the sale of the Subsidiaries and the acquisition of Navigator, the Company may be deemed to have entered a new line of business and, as a result of the change of such business line, The Nasdaq Stock Market may request that we reapply for listing and satisfy all initial listing standards despite the fact that the Company will have continuing operations in Central and Eastern Europe.
- o If the Company fails to have the Agreement approved at a shareholders meeting, the Company will be obligated to reimburse Invitel for its expenses associated with the acquisition of the Subsidiaries not to exceed EUR 400,000 and this payment, combined with loss of proceeds from the failed sale of the Subsidiaries, may result in the Company experiencing financial difficulty with respect to its cash position.

For a more detailed discussion please see "Proposal No. 1 - Approval of the Sale of the Subsidiaries to Invitel" located on page 9.

Absence of Dissenters' Rights of Appraisals

Under the applicable provisions of General Corporation Law of the State of Delaware ("GCL"), Euroweb's stockholders will have no rights in connection with the proposed sale of the Subsidiaries to seek appraisal for the fair value of their shares of common stock.

For a more detailed discussion please see "Proposal No. 1 - Approval of the Sale of the Subsidiaries to Invitel" located on page 10.

PROPOSAL NO. 1

APPROVAL OF SALE OF THE SUBSIDIARIES TO INVITEL

Proposed Transaction

On December 19, 2005, the Company entered into the Agreement with Invitel. Pursuant to the Agreement, the Company has agreed to sell and, Invitel has agreed to purchase, 100% of the Company's interest in the Subsidiaries. The purchase price to be paid to the Company is US \$30,000,000 in cash of which US \$29,400,000 is payable at closing and the remaining US \$600,000 is payable upon delivery of a certificate prepared by an independent auditor identifying the net indebtedness of the Subsidiaries, The Subsidiaries are required to be debt free, which includes the full payment on or prior to the Closing Date of the US \$6,000,000 loan obtained by Euroweb Hungary from Commerzbank in connection with the Company's acquisition of Navigator Informatika Rt. The purchase price is to be reduced by the amount of any debt held in the Subsidiaries. The closing of the sale of the Subsidiaries, of which we cannot provide any guarantee, is expected to occur within seven business days of receipt of an audit report prepared by an independent auditor with respect to the Subsidiaries, the approval of the Agreement by the shareholders of the Company provided that such date is no later than June 30, 2006 and receipt of approval of the proposed transaction by the Hungarian Economic Competition Office in Hungary, which the Company has received. If the Company fails to have the Agreement approved at a

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

shareholders meeting, the Company will be obligated to reimburse Invitel for its expenses associated with the acquisition of the Subsidiaries not to exceed EUR 400,000. After the sale of the Subsidiaries would be classified as discontinued operations, the Company's revenue for the year ended December 31, 2004 will be zero.

Background of the Transaction

In April 2005, the Company's Board of Directors was notified that Invitel was looking for acquisition and consolidation opportunities in Hungary. On April 27, 2005, Invitel made a non-binding offer to purchase the Subsidiaries. From April 2005 through September 2005, Invitel made three non-binding offers. On December 15, 2005, Invitel submitted a binding offer that the Board of Directors of the Company accepted on December 17, 2005 and which culminated in the entering of the Agreement on December 19, 2005. In addition, the Company received several non-binding and binding offers from various parties. The Company eventually received and entered a binding offer from an international telecommunication company for the sale of the Subsidiaries on December 8, 2005. In connection with the receipt of the binding offer, the Company signed an exclusivity agreement with the international telecommunication company, which expired on December 16, 2005. After the expiration of the exclusivity agreement with the international telecommunications company on December 16, 2005, the Company entered into the Agreement with Invitel.

Business of the Company

We own and operate Internet Service Providers in Hungary and Romania through the Subsidiaries, Euroweb Hungary and Euroweb Romania. Euroweb Hungary and Euroweb Romania are classified as discontinued operations for all periods presented in the financial statements of the Company. We are also engaged in the IT consulting business through our other subsidiary, Navigator Informatika Rt., which we acquired on October 7, 2005. Navigator Informatika Rt. operates through its wholly owned subsidiaries, Navigator Info Kft. and Navigator Engineering Kft. and is engaged in information technology outsourcing, applications development and information technology consulting services primarily in the Hungarian market. Navigator's client base includes primarily large organizations both in the corporate and institutional (public) sector. We previously had operations in the Czech Republic and Slovakia through our subsidiaries Euroweb Czech and Euroweb Slovakia, which were sold on December 16, 2004 and April 15, 2005, respectively.

Our revenues generated by Navigator Informatika Rt. come from the following three sources:

- o Full service IT System operation or complete IT outsourcing, comprising full service support and maintenance with a cost-effective and competitive service desk system, call center, hotline support and remote troubleshooting
- o IT system implementation and IT project management, including: consultancy, system design, development and implementation and training; and

8

- o Sale of IT devices

Business of Invitel

Founded in 1994, Invitel offers telephony, Internet, and data services to residential and business customers in Hungary. Invitel is the incumbent operator

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

in 9 out of 54 primary service areas. In the rest of Hungary, Invitel is an alternative telecom operator with a national fibre backbone, metropolitan area networks and point-to-multi-point microwave access system.

Invitel's corporate headquarters is located at Invitel Tavkozlesi Szolgaltato Rt. Puskas Tivadar u. 8-10 H-2040 Budaors, Hungary (Tel: 0036 1 801 1355).

The Board of Directors believes the sale of the Subsidiaries, which are engaged in the business of providing Internet Service in Hungary and Romania, is the culmination of the Company's strategy that was first implemented in 1997 of identifying and developing companies within emerging industries for the purpose of consolidation and sale if favorable market conditions exist. However, the Company does not presently have any plans, proposals or arrangements to redeploy its capital or engage in any acquisitions. The Company has not yet identified any specific new industries in which to invest.

Management considered the possibility of putting the Subsidiaries on the public auction block. Management decided against this for a number of reasons related to the specialized nature of the business and management's belief that only companies already in the relevant business area (i.e. the Subsidiaries' competitors) would be interested in purchasing the Subsidiaries. Specifically, management decided against a public auction for the following reasons:

- o The Internet Service industry is extremely competitive. Accordingly, protecting the primary assets consisting largely of intellectual

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

properties is inherently a risk-filled proposition. The Company's management was extremely concerned that a "public" sale of the Subsidiaries would simply lead to competitors engaging in the due diligence process for no purpose other than to glean confidential information.

9

- o The Company was also of the view that public disclosure of the proposed sale would lead to key employees becoming unnecessarily concerned and possibly leaving the Company's subsidiaries to find increased security elsewhere and in particular, with competitors of the Subsidiaries.
- o Based on the Company's private negotiations for the sale of the Subsidiaries with several parties, the Company believes that the price being paid by Invitel is the best price the Company could reasonably secure.

Prior to entering into the Agreement, during the past two years there has been no other negotiations, transactions or contacts between the Company and Invitel concerning any merger, consolidation, acquisition, tender offer, election of the Company's directors or the sale of a material amount of assets of the Company. There are no present or proposed material agreements, arrangements, understandings or relationships between the Company or any of its executive officers, directors, controlling persons or subsidiaries and Invitel or any of its executive officers, directors, controlling persons or subsidiaries.

Risks

The sale of the Subsidiaries will reduce the lines of business which we conduct. This decrease in diversification of our business could serve to magnify any downturns in the remaining business lines. In particular:

- o Our ability to adjust to changes in consumer demand or economic shifts could be materially impacted.
- o Upon classifying the Subsidiaries as discontinued operations (see "Accounting Treatment"), our revenue for the year ended December 31, 2004 decreased to \$-0- from \$28,111,786.

- o If the Company fails to have the Agreement approved at a shareholders

meeting, the Company will be obligated to reimburse Invitel for its expenses associated with the acquisition of the Subsidiaries not to exceed EUR 400,000 and this payment, combined with loss of proceeds from the failed sale of the Subsidiaries, may result in the Company experiencing financial difficulty with respect to its cash position.

Absence of Dissenters' Rights of Appraisals

Under the applicable provisions of GCL, Euroweb's stockholders will have no rights in connection with the proposed sale of the Subsidiaries to seek appraisal for the fair value of their shares of common stock.

Votes Required

The approval of the sale of 100% of the Company's interest in the Subsidiaries as contemplated in the Agreement entered into by and between Invitel and the Company will require an affirmative vote of the majority of the votes cast in person or by proxy, provided that a quorum is present at the special meeting.

10

Interest of Related Parties in the Proposed Sale of the Subsidiaries to Invitel

During the initial stages of due diligence and negotiation, a third party expressed interest to the Company to purchase the Subsidiaries for US \$26,000,000. In order to provide management of the Company with the appropriate motivation to achieve the highest possible purchase price, the Company's Compensation Committee was granted the discretionary ability to pay a bonus to members of management that were associated with the Company receiving a purchase price in excess of US \$28,000,000 for the Subsidiaries. The bonus, which is at the discretion of the Compensation Committee, will be up to 20% of the purchase price received in excess of US \$28,000,000. Upon the Company closing on the sale of the Subsidiaries for US \$30,000,000 to Invitel, a bonus of up to US \$400,000 (or 20% of US \$2,000,000) may be paid by the Compensation Committee to select members of management. To the best of our knowledge, except for the Bonus, none of the Company's officers or directors have a financial interest in the proposed sale of the Subsidiaries to Invitel.

Accounting Treatment

Under accounting principles generally accepted in the United States of America, we reflected the results of operations of the Subsidiaries as discontinued operations. The expected gain on the sale of the Subsidiaries, net of any applicable taxes, will be reflected in discontinued operations in the quarter during which the proposed sale closes.

Federal Income Tax Consequence

The proposed sale of the Subsidiaries should have no direct income tax consequences to the Company stockholders. The proposed sale of the Subsidiaries will be reported by the Company as a sale of assets for federal income tax purposes in the fiscal year ending December 31, 2006. The proposed sale of the Subsidiaries will be a taxable transaction for United States federal income tax purposes. Accordingly, the Company will recognize a gain or loss with respect to the proposed sale of the Subsidiaries in an amount equal to the difference between the amount of the consideration received for each asset over the adjusted tax basis in the asset sold.

Regulatory Approvals

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

No United States Federal or state regulatory requirements must be complied with or approvals obtained as a condition of the proposed sale of the Subsidiaries other than federal securities laws. However, the sale of the Subsidiaries is contingent upon the issuance by the Hungarian Economic Competition Office of its unconditional approval of the sale of the Subsidiaries to Invitel. According to the deadlines defined in the Agreement, an application for the approval of the proposed transaction was filed on January 17, 2006 with the Hungarian Economic Competition Office.

year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Euroweb International Corp. and subsidiaries as of December 31, 2005, and the results of their operations and their cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

1. Organization of Business

Euroweb International Corp. ("Euroweb") is a Delaware corporation, which was incorporated on November 9, 1992. Euroweb and its subsidiaries are collectively referred to herein as the "Company". The Company was a development stage company through December 31, 1993.

The Company operates in Hungary through its subsidiary Navigator Informatika Rt. ("Navigator"), which is acquired on October 7, 2005.

The Company provides a full range of information technology ("IT") outsourcing services through its subsidiary, Navigator. The IT outsourcing services provided by the Company primarily comprise IT maintenance, procurement, consultancy and related services.

On December 16, 2004, the Company disposed of Euroweb Czech Republic, spol ("Euroweb Czech Republic") and no longer has operations in the Czech Republic. On April 15, 2005, the Company disposed of Euroweb Slovakia a.s. ("Euroweb Slovakia") for cash of \$2,700,000 and, as a result, has ceased operations in Slovakia.

On December 15, 2005, the Board of Directors of the Company decided to sell its entire interest in the wholly owned Euroweb Internet Szolgaltato Rt. ("Euroweb Hungary") and Euroweb Romania S.A. ("Euroweb Romania"). On December 19, 2005,

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

the Company entered into a share purchase agreement with Invitel Tavkozlesi Szolgaltato Rt., a Hungarian joint stock company, to sell the entire interest in its two Internet- and telecom-related operating subsidiaries, Euroweb Hungary and Euroweb Romania, subject to various conditions including, but not limited to, shareholders' approval. Euroweb Hungary and Euroweb Romania are classified in the Company's financial statements as discontinued operations for all periods presented.

Approximately 83% of the consolidated revenue for the year ended December 31, 2005 was generated from the four most significant customers of the Company as follows:

	Revenue generated
-----	-----
Company `A':	\$ 539,131
Company `B':	443,727
Company `C':	386,253
Company `D':	268,296
Other companies:	327,591
-----	-----
Total revenue:	\$1,964,998

2. Summary of Significant Accounting Policies and Practices

(a) Principles of consolidation and basis of presentation

The consolidated financial statements comprise the accounts of the Company and its controlled subsidiaries. All material intercompany balances and transactions have been eliminated upon consolidation and all adjustments, consisting mainly of normal recurring accruals necessary for a fair presentation, have been made.

F-8

On February 12, 2004, the Company entered into a share purchase agreement with a related party, Pantel Rt. ("Pantel") to acquire the remaining 51% of Euroweb Hungary shares that the Company did not already own. At the date of the acquisition, KPN Telecom B.V. ("KPN") owned 50.17% of the voting common shares of the Company and 75% of the voting common shares of Pantel. Accordingly, the transaction was recorded in a manner similar to a pooling-of-interest and the historical consolidated financial statements were restated to include the financial position, results of operations and cash flows of Euroweb Hungary for all periods presented. Since the purchase consideration was in excess of Euroweb Hungary's book value (by \$2,142,556), the excess is accounted for as a distribution to KPN, which resulted in a deduction from retained earnings at the closing of the transaction. There were no transactions with Euroweb Hungary in any period prior to this transaction that required elimination.

The consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP").

(b) Use of estimates

The preparation of consolidated financial statements requires management to make a number of estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(c) Fair value of financial instruments

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

The carrying values of cash equivalents, investment in debt securities, notes and loans receivable, accounts payable, loans payable and accrued expenses approximate fair values.

(d) Revenue recognition

Revenue Recognition--The Company applies the provisions of SEC Staff Accounting Bulletin ("SAB") No. 104, Revenue Recognition in Financial Statements, which provides guidance on the recognition, presentation and disclosure of revenue in financial statements filed with the SEC. SAB No. 104 outlines the basic criteria that must be met to recognize revenue and provides guidance for disclosure related to revenue recognition policies. The Company recognizes revenue when persuasive evidence of an arrangement exists, the product or service has been delivered, fees are fixed or determinable, collection is probable and all other significant obligations have been fulfilled. Revenues from maintenance services are recognized in the month in which the services are provided, either based on performance or on fixed monthly fees. The Company defers revenue recognition for payments on contracts for which services have not been performed.

The Company also generates non-recurring revenue from consulting fees for implementation, installation, configuration, testing and training related to the use of third party licensed products. The Company recognizes revenue for these services as they are performed, if contracted on a time and materials basis, or using the percentage of completion method, if contracted on a fixed fee basis, once the cost of the consulting project can be reliably estimated. Percentage of completion is measured based on cost incurred to date compared to total estimated cost at completion. When the cost to complete a project cannot be reasonably estimated, the Company recognizes revenue using the completed contract method until such time that the cost to complete the project can be reasonably estimated.

F-9

(e) Cost of revenues (excluding depreciation and amortization)

Cost of revenues (excluding depreciation and amortization) principally comprises cost of fixed assets sold during the course of IT outsourcing projects, cost of materials required to perform IT outsourcing activities and cost of project-dedicated sub-contractors.

(f) Foreign currency translation

The Company considers the United States Dollar ("US Dollar or "\$") to be the functional currency of the Euroweb and unless otherwise stated, the respective local currency to be the functional currency each of its subsidiaries. The reporting currency of the Company is the US Dollar and accordingly, all amounts included in the consolidated financial statements have been translated into US Dollar.

The balance sheets of subsidiaries are translated into US Dollar using the year end exchange rates. Revenues and expenses are translated at average rates in effect for the periods presented. The cumulative translation adjustment is included in the accumulated other comprehensive gain (loss) within shareholders' equity.

Foreign currency transaction gains and losses are included in the consolidated results of operations for the periods presented.

(g) Cash and cash equivalents

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

Cash and cash equivalents include cash at bank and investments with maturities of three months or less at the date of acquisition by the Company.

(h) Investment in securities

Investments in marketable debt securities are classified as available-for-sale and are recorded at fair value with any unrealized holding gains or losses included as a component of other comprehensive income until realized. Investments with remaining maturities of greater than one year are classified as long-term, while those with remaining maturities of less than one year are classified as short-term. A decline in the market value of available-for-sale securities below cost that is deemed to be other-than-temporary temporary results in a reduction in the carrying value amount to fair value. Such impairment is charged to earnings and a new cost basis for the security is established. In assessing whether an impairment is other-than-temporary, the Company considers several factors including, but not limited to, the ability and intent to hold the investment, reason and duration for the impairment and forecasted performance of the investee.

(i) Property and equipment

Property and equipment are stated at cost, less accumulated depreciation. The Company provides for depreciation of property and equipment using the straight-line method over the following estimated useful lives:

F-10

Software	3 years
Computer equipment	3-5 years
Other furniture equipment and fixtures	5-7 years

Equipment purchased under capital lease is stated at the lower of fair value and the present value of minimum lease payments at the inception of the lease, less accumulated depreciation. The Company provides for depreciation of leased equipment using the straight-line method over the shorter of estimated useful life and the lease term.

Total depreciation from continuing operations for the years ended December 31, 2005 and 2004 was \$ 147,547 and \$2,048 respectively.

Recurring maintenance on property and equipment is expensed as incurred.

Any gain or loss on retirements and disposals is included in the results of operations in the period of the retirement or disposal.

(j) Goodwill and intangible assets

Goodwill results from business acquisitions and represents the excess of purchase price over the fair value of net assets acquired. Goodwill is tested at least annually for impairment. The first step of this test requires the Company to compare the carrying value of any reporting unit that has goodwill to the estimated fair value of the reporting unit. When the current fair value is less than the carrying value, the Company performs the second step of the impairment test. This second step requires the Company to measure the excess of the recorded goodwill over the current value of the goodwill by performing an exercise similar to a purchase price allocation, and to record any excess as an impairment.

Intangible assets that have finite useful lives (whether or not acquired in a business combination) are amortized over their estimated useful lives but also reviewed for impairment in accordance with the Statement of Financial Accounting

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

Standard ("SFAS") No. 144 "Accounting for Impairment or Disposal of Long Lived Assets" ("SFAS 144"). Intangible assets currently consist of customer contracts, which were acquired as a result of a purchase of Navigator and are being amortized over the estimated future period of benefit of one to four years. The assessment of recoverability and possible impairment is performed using estimates of undiscounted future cash flows. If impairment is indicated, the Company then measures the impairment based on the amount by which the carrying value of the customer lists exceeds its fair market value. Fair market value is determined primarily using the projected future cash flows discounted at a rate commensurate with the risk involved.

Total amortization of intangible assets for the years ended December 31, 2005 and 2004 was \$ 361,931 and \$0 respectively.

(k) Earnings (loss) per share

Basic earnings (loss) per share is computed by dividing income (loss) attributable to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings (loss) per share reflects the effect of dilutive potential common shares issuable upon exercise of stock options and warrants. There were no dilutive options and warrants for the year ended 2005 and 2004. Stock options and warrants convertible into 779,067 and 550,378 shares of common stock, respectively, were excluded from the computation of diluted earnings per share since such options and warrants have an exercise price in excess of the average market value of the Company's common stock during the periods.

F-11

(l) Comprehensive income

Comprehensive income includes all changes in equity except those resulting from investments by, and distributions to, owners.

(m) Business segment reporting

The Company manages its operations, and accordingly determines its operating segments, on a geographic basis. The Company currently has one operating segment: Hungary.

(n) Income taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets, net of appropriate valuation allowances, and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry-forwards. Deferred tax assets and liabilities, if any, are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

(o) Stock-based compensation

The Company applies the intrinsic value-based method of accounting prescribed by Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations including Financial Accounting Standards Board ("FASB") Interpretation No. 44, "Accounting for Certain Transactions Involving Stock Compensation, an interpretation of APB Opinion No. 25" to account for its stock options granted to employees. Under this method,

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

compensation expense for fixed plan stock options is recorded on the date of grant only if the current market price of the underlying stock exceeds the exercise price. SFAS No. 123, "Accounting for Stock-Based Compensation," ("SFAS 123") and FASB Statement No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure, an amendment of FASB Statement No. 123" established accounting and disclosure requirements using a fair value-based method of accounting for stock-based employee compensation plans. As allowed by existing standards, the Company has elected to continue to apply the intrinsic value-based method of accounting described above, and has adopted the disclosure requirements of SFAS 123, as amended. The Company accounted compensation expenses for the Company's stock options and warrants granted other than employees or independent directors based on fair value method prescribed in SFAS 123.

SFAS 123 requires the Company to provide pro forma information regarding net income and earnings per share as if compensation cost for the Company's stock options had been determined in accordance with the fair value-based method prescribed in SFAS 123. The Company estimates the fair value of each stock option at the grant date by using the Black-Scholes option-pricing model.

F-12

The pro forma amount calculated as total compensation expense under SFAS 123 is \$632,766 for the 200,000 options granted to directors on October 13, 2003, \$1.3 million for the 365,000 options granted on April 26, 2004 and \$775,260 for the 300,000 options issued in 2005. Under the accounting provisions of SFAS No. 123, this compensation expense would be recorded over the vesting period of the options (3-4 years).

For purposes of the pro forma calculation under SFAS 123, the fair value of each option grant has been estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions for 2004 and 2005:

Dividend yield	0%
Risk free rate	4%
Expected option life (years)	6
Volatility	88%

Under the accounting provisions of SFAS 123, the Company's 2005 and 2004 net income (loss) and net income (loss) per share would have been affected as indicated below:

(q) Recently Issued Accounting Standards

In December 2004, the FASB issued SFAS No. 123 (revised 2004), "Share-Based Payment" ("SFAS 123(R)"). SFAS 123(R) requires an entity to recognize the grant-date fair value of stock options and other equity-based compensation issued to employees in the income statement. SFAS 123(R) is effective for the Company as of January 1, 2006. The Company is currently assessing the impact SFAS 123(R) will have on its financial statements.

In December 2004, the FASB issued SFAS No. 151, "Inventory Costs - an amendment of ARB No. 43, Chapter 4" ("SFAS 151"). SFAS 151 amends Accounting Research Bulletin No. 43, Chapter 4, "Inventory Pricing" ("ARB 43") to eliminate the "so abnormal" criterion in ARB 43 and requires companies to recognize abnormal freight, handling costs, and amounts of wasted material (spoilage) as current-period charges. Additionally, SFAS 151 clarifies that fixed production overhead cost should be allocated to inventory based on the normal capacity of the production facility. SFAS 151 is effective for inventory costs incurred during annual periods beginning after June 15, 2005. The Company is currently assessing the impact SFAS 151 may have on its financial statements and is not expected to have a material impact on our financial statements.

F-13

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections" which replaces Accounting Principles Board Opinions No. 20 "Accounting Changes" and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements." This statement applies to all voluntary changes in accounting principle and changes resulting from adoption of a new accounting pronouncement that does not specify transition requirements. SFAS 154 requires retrospective application to prior periods' financial statements for changes in accounting principle unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. SFAS 154 also requires that retrospective application of a change in accounting principle be limited to the direct effects of the change. Indirect effects of a change in accounting principle should be recognized in the period of the accounting change. SFAS 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005 with early implementation permitted for accounting changes and corrections of errors made in fiscal years beginning after the date this statement was issued. SFAS 154 is effective for the Company as of January 1, 2006 and is not expected to have a material impact on financial statements.

In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140" ("SFAS 155"). SFAS 155 amends SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133") and SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities". SFAS 155 resolves issues addressed in SFAS 133 Implementation Issue No. D1, "Application of Statement 133 to Beneficial Interests in Securitized Financial Assets." SFAS 155 is effective for the Company for all financial instruments acquired or issued after January 1, 2007 and is not expected to have a material impact on the Company's financial statements.

Approximately \$740,354 was outstanding at December 31, 2005. The loan is repayable in 14 quarterly instalments of HUF 14,375,000 (approximately \$67,305) plus quarterly interest starting on May 31, 2005. The results of Navigator have been included in the Company's consolidated financial statements from the date of acquisition.

F-16

In accordance with the purchase method of accounting prescribed by SFAS 141, the Company allocated the consideration to the tangible net assets and liabilities and intangible assets acquired, based on their estimated fair values. The excess of the purchase price over the fair value of the identifiable tangible and intangible net assets acquired was assigned to goodwill. In accordance with SFAS No. 142 "Goodwill and Other Intangible Assets" ("SFAS 142"), goodwill will not be amortized but will be tested for impairment at least annually.

The following represents the final allocation of the purchase price paid for the Navigator business based on the fair values of the acquired assets and assumed liabilities as of October 7, 2005:

Trade account receivable, net	\$ 1,057,317
Prepaid and other current assets	664,109
Property and equipment, net	1,115,701
Trade account payable	(1,142,626)
Other current liabilities and accrued expenses	(720,414)
Short term and long term bank loans	(1,299,142)

Fair value of Navigator's recorded assets acquired and liabilities assumed	(325,055)

Deferred tax liabilities	(559,076)
Excess purchase price over allocation to identifiable assets and liabilities (Goodwill)	8,150,672

Total consideration	\$ 10,760,772
=====	

In determining the value to be ascribed to acquired intangible assets, the Company considered its intention for future use of the assets, analyses of historical financial performance and estimates of future performance of Navigator's services, among other factors. Acquired identifiable intangible assets obtained in the Company's acquisition of Navigator relate to customer contracts, which are being amortized over the estimated useful life of one to four years.

Although the former owners of Navigator received shares of common stock of the Company, each of the former owners of Navigator currently holds less than 10% of the outstanding shares of common stock in the Company. Therefore, they are not considered related parties and business transactions are shown as third party transactions in the accompanying consolidated financial statements of the Company.

9. Dispositions

Completed sale of Euroweb Czech Republic and Euroweb Slovakia On December 16, 2004, the Company sold all of its shares in its wholly-owned subsidiary, Euroweb Czech Republic for cash of \$500,000. As a part of the transaction, the Company forgave \$400,000 of loans receivable from Euroweb Czech Republic. On April 15, 2005, the Company sold Euroweb Slovakia for cash of \$2,700,000.

Proposed sale of Euroweb Hungary and Euroweb Romania On December 15, 2005, the Board of Directors of the Company decided to sell its interest its wholly-owned subsidiaries in Euroweb Hungary and Euroweb Romania. On December 19, 2005, the Company entered into a share purchase agreement with Invitel Tavkozlesi Szolgaltato Rt., a Hungarian joint stock company, to sell Euroweb Hungary and Euroweb Romania, subject to various conditions including, but not limited to, shareholders' approval.

The Company believes that the sale of Euroweb Czech Republic and Euroweb Slovakia and the proposed sale of Euroweb Hungary and Euroweb Romania meet the criteria for presentation as a discontinued operation under the provisions of "SFAS 144", therefore amounts relating to Euroweb Czech Republic, Euroweb Slovakia, Euroweb Hungary and Euroweb Romania have been reclassified as discontinued operations for all periods presented.

There was no current income tax expense from continuing operations in 2005 and 2004. A deferred tax benefit of \$57,908 was recognized in 2005. There was no deferred tax expense or benefit recognized in 2004.

F-19

The provision (benefit) for income taxes allocated to continuing operations is comprised of the following:

The difference between the total expected tax expense (benefit) and tax expense allocated to continuing operations for the years ended December 31, 2005 and 2004 is accounted for as follows:

Deferred Tax Assets and Liabilities

Upon the acquisition of Navigator, the Company recognized a net Deferred Tax Liability of \$559,076 related to the excess of fair value of net assets over carrying values. As most of the excess relates to the recognition of customer contracts (Note 5), which is being amortized over a period of 1-4 years from acquisition, the Deferred Tax Liability is being reduced proportionately. \$57,908 was recognized as a benefit in 2005.

The statutory corporate tax rate in Hungary was 16% as of December 31, 2004. Navigator has no tax net operating loss carryforwards from prior years.

	2005	2004
Deferred Tax Assets:		
Net Operating Loss Carryovers	\$ 4,331,534	\$ 3,665,214
Capital Loss Carryovers	1,823,704	713,634
Gross Deferred Tax Assets	6,155,238	4,378,848
Valuation Allowance	(6,155,238)	(4,378,848)
Net Deferred Tax Assets	\$ --	\$ --

For U.S. Federal income tax purposes, the Company has unused net operating loss carryforwards at December 31, 2005 of approximately \$12.8 million available to offset future taxable income. From the \$12.8 million of losses, \$1.2 million expire in various years from 2008-2010, \$1.6 million expires in 2011, and the remaining \$10 million expire in various years from 2016 through 2025. In addition, the Company has a capital loss carryover for US income tax purposes of approximately \$5.4 million. \$2.1 million of the loss is from 2004 and will expire after 2009. The remainder of the capital loss, \$3.3 million, will expire after 2010. The Tax Acts of some jurisdictions contain provisions which may limit the net operating loss and capital loss carryforwards available to be used in any given year if certain events occur, including significant changes in ownership interests. The Company has not assessed the impact of these provisions on the availability of Company loss carryovers since the deferred tax assets are fully offset by the valuation allowance.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences and tax loss carryforwards become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes that it is more likely than the Company will not realize the benefit of these deductible differences, net of existing valuation allowances at December 31, 2005.

Undistributed earnings of the Company's foreign subsidiaries are currently not material. Those earnings are considered to be indefinitely reinvested; accordingly, no provision for US federal and state income tax has been provided thereon. Upon repatriation of those earnings, in the form of dividends or otherwise, the Company would be subject to both US income taxes (subject to an adjustment for foreign tax credits) and withholding taxes payable to the various foreign countries. Determination of the amount of unrecognized deferred U.S. income tax liability is not practicable due to the complexities associated with its hypothetical calculation.

11. Stockholders' Equity

On March 22, 2005, the Company granted an aggregate of 200,000 options to two of its directors. The stock options granted to the directors on March 22, 2005 vest at the rate of 25,000 on each September 22 of 2005, 2006, 2007 and 2008. The warrants have a term of five years and tranches vest at a rate of a total 8,333 warrants per month over a one year period from the lowest to the highest warrant price. In February 2006, the Company has terminated the contract with the consultant. The total number of warrants granted under this agreement is reduced time-proportionally to 83,330 based on the time in service by the consultant. The reduction related to the warrants at \$5 per shares. The warrants are being expensed over the performance period of one year. Compensation expense for the year ended December 31, 2005 was \$141,410.

The Company entered into a six-year agreement with its Chief Executive Officer, Csaba Toro on October 18, 1999, which commenced January 1, 2000, and provided for an annual compensation of \$96,000. For the year ended April 14, 2006, Mr. Schnapp will receive 82,781 Euroweb shares of common stock.

(b) Lease agreements

(d) Elender Rt. acquisition

On June 9, 2004 the Company acquired all of the outstanding shares of Elender Rt. ("Elender") for \$6,500,000 in cash and 677,201 of the Company's shares of common stock. Under the terms of agreement, the Company has placed 248,111 unregistered shares of common stock, newly issued and in the name of the Company, with an escrow agent as security for approximately \$1.5 million loans

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

payable to former shareholders of Elender. The shares will be returned to the Company from escrow once the outstanding loans have been fully repaid. However, if there is a default on the outstanding loan, then the shares will be issued to the other party and the Company is then obliged to register the shares. As of December 31, 2005, the Company had repaid all of the loans that were outstanding. In January 2006, the Company acquired and subsequently cancelled the shares that were put into escrow.

Pursuant to the registration rights agreement signed on June 1, 2004 with the sellers of Elender, if the shares of the Company's common stock issued to the sellers were not registered within 120 days of Closing (closing was on June 9, 2004) for reasons attributable to the Company, a penalty of \$2,000 per day is payable until the shares are registered. The Company made a provision of \$170,000 to accrue for potential penalties under this clause as of December 31, 2004. In 2005, the Company received a waiver from the sellers. Therefore the penalty was reversed.

In case of disposal of Euroweb Hungary and Euroweb Romania, the Company will have to reregister the shares issued in connection with the acquisition of Elender. In case of late filing of this registration statement may result penalty payment obligation.

(e) Navigator acquisition

The Company entered into a registration rights agreement dated July 21, 2005, whereby it has agreed to file a registration statement registering the 441,566 shares of Euroweb common stock issued in connection with the acquisition within 75 days of the closing of the transaction and have such registration statement declared effective within 150 days from the filing thereof. In the event that Euroweb fails to meet its obligations to register the shares it may be required to pay a penalty equal to 1% of the value of the Shares per month. The Company has obtained a written waiver from the seller stating that the seller will not raise any claims in connection with the filing of registration statement until May 30, 2006.

(f) Euroweb Hungary Rt. purchase guarantee

In February 2004, the Company purchased the remaining 51% of Euroweb Hungary from Pantel. The consideration paid by the Company for the 51% interest consisted of EUR 1,650,000 (\$2,105,000) in cash, and a purchase commitment that Euroweb Hungary will purchase at least HUF 600 million (approximately \$3 million) worth of services from Pantel in each year from 2004 to 2006. In the event that Euroweb Hungary and its subsidiaries do not satisfy this commitment, Pantel may charge a penalty equal to 25% of the commitment amount less any services purchased. Purchases in 2004 and 2005 exceeded this amount. If Euroweb Hungary is successfully sold to Invitel, any claim arising from this commitment will from that date be payable by Invitel.

13. Stock Option Plan and Employee Options

a) Stock option plans

The Company's Stock Option Plan expired in 2003, although unexpired options issued under this plan were exercisable until expiry. At December 31, 2004, options for 63,000 common stock were outstanding and exercisable by the Chief Executive Officer under the Stock Option Plan, which expired on April 2, 2005. No options remained outstanding as of December 31, 2005.

In 2004, the Board of Directors established the "2004 Incentive Plan" or "the Plan", with an aggregate of 800,000 shares of common stock authorized for issuance under the Plan. The Plan provides that incentive and nonqualified options may be granted to key employees, officers, directors and consultants of the Company for the purpose of providing an incentive to those persons. The Plan may be administered by either the Board of Directors or a committee of two directors appointed by the Board of Directors (the "Committee"). The Board of Directors or Committee determines, among other things, the persons to whom stock options are granted, the number of shares subject to each option, the date or dates upon which each option may be exercised and the exercise price per share.

Options granted under the Plan are generally exercisable for a period of up to ten years from the date of grant. Incentive options granted to stockholder's that hold in excess of 10% of the total combined voting power or value of all classes of stock of the Company must have an exercise price of not less than 110% of the fair market value of the underlying stock on the date of the grant. The Company will not grant a nonqualified option with an exercise price less than 85% of the fair market value of the underlying common stock on the date of the grant.

F-24

On April 26, 2004 under the Plan, the Company granted 125,000 options to the Chief Executive Officer and an additional 195,000 options to five employees and 45,000 options to two consultants of the Company. All of these options have an exercise price equal to the market price on day of grant (\$4.78), vest over a period of between three and four years and relate to future services to be performed. As the Company follows APB 25 with respect to accounting for grants made to employees, no compensation expense was recorded for these options. The total compensation expense for their options granted to the two consultants is

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

\$162,000, which is being expensed over the vesting period of three years.

In March 2005, one of the Directors has resigned and his 100,000 options expired unexercised.

The President and a Director of the Company is eligible to receive an annual compensation of \$250,000 starting from April 15, 2005, which is payable in shares of Euroweb common stock. The number of shares to be paid is calculated based on the average closing price 10 days prior to each employment year. The number of shares for the year ended April 14, 2006 is 82,781. Compensation expense for the year ended December 31, 2005 was \$177,083 (2004: \$ -). On January 5, 2006, 58,968 shares has been issued from the total of 82,781 shares covering the period from April 15, 2005 to December 31, 2005.

(b) Other Options

The Company has issued options pursuant to employment agreements. As of December 31, 2004 fully vested options are outstanding and exercisable for 63,000 shares pursuant to the employment agreement with the Chief Executive Officer. The options were granted on April 2, 1999 (with exercise price equal to stock price at date of grant) and expired unexercised on April 2, 2005. The options were exercisable at \$10.00 per share.

On October 13 2003, the Company granted two Directors 100,000 options each, at an exercise price (equal to the fair value on that day) of \$4.21 per share, with 25,000 options vesting on each April 13, 2004, 2005, 2006 and 2007. There were 100,000 options outstanding as of December 31, 2005.

The following table summarizes the total number of shares for which options have been issued (Stock Option Plan, 2004 Incentive Plan, Employment Agreements and grants to Directors) and are outstanding:

1. Organization and Business

On January 2, 1997, Euroweb International Corporation acquired all of the outstanding stock of three Hungarian Internet Service Providers and merged these companies into a new Hungarian entity, Euroweb Internet Szolgaltato Rt. ("the Company" or "Euroweb Hungary").

On November 22, 1998, Euroweb International Corporation sold 51% of the outstanding shares of the Company to Pantel Rt. (,,Pantel").

In March 2002, Euroweb Hungary acquired 100% of Freestart Kft. ("Freestart"), a dial-up focused Internet Service Provider.

On February 12, 2004, Euroweb International Corporation entered into a Share Purchase Agreement to re-acquire Pantel's 51% interest in Euroweb Hungary. Since the acquisition was made from an entity under common control (both Pantel and Euroweb International Corporation were majority owned by KPN Telecom B.V. (,,KPN") at the time of acquisition in February 2004), the transaction was accounted for by Euroweb International Corporation in a manner similar to a pooling-of-interests in accordance with generally accepted accounting principles in the United States of America, with all prior periods being restated as if the entities were combined for all periods.

On June 9, 2004, the Euroweb International Corporation acquired all of the outstanding shares of Elender Rt. ("Elender"), an Internet Service Provider located in Hungary. In November 2004, Euroweb Hungary merged with Elender in a transaction under the common control of Euroweb International Corporation. The results of Elender have been included in the Company's financial statements from the date of acquisition by Euroweb International Corporation.

In August 2005, Freestart merged with the Company in a transaction under the common control of Euroweb International Corporation. The results of Freestart have been included in the Company's financial statements from the date of acquisition by Euroweb International Corporation.

On October 7, 2005, the Company purchased 85% of the outstanding shares of common stock of Navigator Informatika Rt. (,,Navigator") from Marivaux Investments Limited for \$8.5 million cash. The transaction was financed with a

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

\$6,000,000 loan from Commerzbank Hungary Rt. and a \$2,500,000 loan from Euroweb International Corporation.

On December 19, 2005, Euroweb International Corporation entered into a Share Purchase Agreement (the "Agreement") with Invitel Tavkozlesi Szolgaltato Rt., a Hungarian joint stock company ("Invitel"). Pursuant to the Agreement, Euroweb International Corporation has agreed to sell and, Invitel has agreed to purchase, 100% of the interest of Euroweb International Corporation in the its two internet- and telecom-related operating subsidiaries, the Company and Euroweb Romania S.A (collectively, the "Subsidiaries").

6

Notes to the unaudited consolidated financial statements

The purchase price to be paid to Euroweb International Corporation is \$30,000,000 in cash, of which \$29,400,000 is payable at closing and the remaining \$600,000 is payable upon delivery of a certificate prepared by an independent auditor identifying the net indebtedness of the Subsidiaries, which are required to be debt free. The purchase price is to be reduced by the amount of any debt held in the Subsidiaries. The closing of the sale of the Subsidiaries, of which Euroweb International Corporation and the Company cannot provide any guarantee, is expected to occur within seven business days of receipt of approval of the competition office in Hungary and approval of the shareholders of Euroweb International Corporation, provided that such date is no later than June 30, 2006. Euroweb International Corporation is required to take all required action to convene a meeting to vote on and approve the Agreement.

The Company operates in one industry and geographic segment, providing Internet access and additional value added services primarily to business customers.

Euroweb Hungary also provides free-of charge dial-up services through its subsidiary Freestart. Freestart is entitled to receive a certain proportion of the telecom revenues on the internet related telephone calls from the Hungarian telecommunication companies.

Euroweb Hungary used its infrastructure to introduce voice over internet protocol services at the end of 2001 under the brand name of Neophone. The majority of revenues from this service derive from phone cards sold to individuals, while these services are also available over leased telephone lines to businesses.

From 2005, two new voice products were introduced:

Neophone Deal is offered to small- and medium-sized companies and is a carrier pre-selection product. The subscriber keeps its existing phone number and remains the client of the previous telecommunication company; however outgoing calls initiated by the customer will go through the Company's voice network, leaving out the previous telecommunication company. The outgoing traffic is invoiced by Euroweb Hungary with discounted prices compared to the rates of the incumbent telecom operator.

Neophone-X provides a voice service by making use of users' personal computers and the Internet instead of the traditional phone network. During computer-based phone calls, voice is transmitted in digital data packages and transformed into human voice again at the receiving party.

2. Summary of Significant Accounting Policies

Accounting Principles

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

The unaudited financial statements and accompanying notes have been prepared in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP").

7

Notes to the unaudited consolidated financial statements

Basis of presentation

The financial statements comprise the consolidated accounts of Euroweb Hungary, Freestart, Elender and Navigator. The results of Elender, Freestart and Navigator have been included in the Company's financial statements from the date of acquisition by Euroweb International Corporation.

On June 9, 2004, Euroweb International acquired 100% of the shares of Elender (which was subsequently renamed to Euroweb Hungary) from an unrelated third party. Pursuant to Statement of Financial Accounting Standards ("SFAS") No. 141, Business Combinations, at this date, the assets and liabilities of Elender were measured at their fair values. The purchase price adjustments and goodwill were pushed down to Euroweb Hungary in accordance with Staff Accounting Bulletin No. 54. "Push-down" is a basis of accounting that reflects the parent company's cost in the separate financial statements of a purchased subsidiary. Accordingly, as of June 9, 2004, the assets and liabilities of Euroweb Hungary were stepped up to reflect the accounting basis of Euroweb International in Euroweb Hungary's assets and liabilities.

The Consideration paid for Elender was \$9,350,005 consisted of \$6,500,000 in cash and 677,201 of the Company's shares of common stock, valued at \$2,508,353 excluding registration cost, and \$341,652 in transaction costs (consisting primarily of professional fees incurred related to attorneys, accountants and valuation advisors).

In accordance with the purchase method of accounting prescribed by SFAS No. 141 "Business Combinations" ("SFAS 141"), the Company allocated the consideration to the tangible net assets and liabilities and intangible assets acquired, based on their estimated fair values. The consideration has been allocated as follows:

Fair value of Elender Rt.'s recorded assets acquired and liabilities assumed	1,379,404
Identified intangibles - customer contracts	2,730,420
Excess purchase price over allocation to identifiable assets and liabilities (Goodwill)	5,240,181

Total Consideration	\$9,350,005
	=====

In performing this purchase price allocation of acquired intangible, the Company considered its intention for future use of the assets, analyses of historical financial performance and estimates of future performance of Elender's services, among other factors. Acquired identifiable intangible assets obtained in the Company's acquisition of Elender Rt. relate to customer contracts, which are being amortized over the estimated useful life of 2.5 years.

The Company estimated the fair values of the identified intangibles - customer contracts using the "income" valuation approach and discount rates ranging from 16% to 18%. The discount rates selected were based in part on the Company's weighted average cost of capital and determined after consideration of the Company's rate of return on debt and equity, and the risk associated with achieving forecasted cash flows.

Notes to the unaudited consolidated financial statements

The excess of the purchase price over the fair value of the identifiable tangible and intangible net assets acquired was assigned to goodwill. In accordance with SFAS No. 142 "Goodwill and Other Intangible Assets" ("SFAS 142"), goodwill will not be amortized but will be tested for impairment at least annually.

All material intercompany balances and transactions have been eliminated.

Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fair value of financial instruments

The carrying values of cash equivalents, notes and loans receivable, accounts payable, loans payable and accrued expenses approximate their fair values.

The estimated fair value of the Company's debt at December 31, 2005 was \$3,573,000, which differs from the carrying amount of \$3,541,750 included in the balance sheet as long-term intercompany loan. Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

straight-line method over the following estimated useful lives:

Software and other intangibles	3-5 years
Computer equipment	3 years
Other furniture equipment and fixtures	3-5 years
Vehicles	5 years

Leased assets are depreciated using a straight-line method over the lesser of the estimated useful life of the leased asset and the lease term.

Recurring maintenance on property and equipment is expensed as incurred.

Long-lived assets

In accordance with Statement of Financial Accounting Standards ("SFAS") No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets," the Company periodically reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be fully recoverable or that the useful lives of those assets are no longer appropriate. Each impairment test is based on a comparison of the undiscounted cash flows to the recorded value of the asset. If impairment is indicated, the asset is written down to its estimated fair value based on a discounted cash flow analysis.

Revenue recognition

The Company applies the provisions of SEC Staff Accounting Bulletin ("SAB") No. 104, "Revenue Recognition in Financial Statements," which provides guidance on the recognition, presentation and disclosure of revenue in financial statements filed with the SEC. SAB No. 104 outlines the basic criteria that must be met to recognize revenue and provides guidance for disclosure related to revenue recognition policies.

The Company recognizes revenue related to its billable services when (i) persuasive evidence of an arrangement exists, (ii) services have been rendered, (iii) the fee is fixed or determinable and (iv) collectibility is reasonably assured. Generally, these criteria are met monthly as the Company's service is provided on a month-to-month basis and collection for the service is generally made within 30 days of the service being provided.

When the Company's subscribers pay in advance for services, revenue is recognized ratably over the period in which the related services are provided. Advance payments from users are recorded on the balance sheet as deferred revenue. In circumstances where payment is not received in advance, revenue is only recognized if collectibility is reasonably assured.

Net earnings (loss) per share

The Company has adopted Statement of Financial Accounting Standards No. 128, "Earnings per Share," ("SFAS No. 128"), which provides for the calculation of "basic" and "diluted" earnings per share. There were no potential dilutive options and warrants for the year ended 2005 and 2004.

Recent accounting pronouncements

In December 2004, the FASB issued SFAS No. 123 (revised 2004), "Share-Based Payment" ("SFAS 123(R)"). SFAS 123(R) requires an entity to recognize the grant-date fair value of stock options and other equity-based compensation issued to employees in the income statement. Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

current-period charges. Additionally, SFAS 151 clarifies that fixed production overhead cost should be allocated to inventory based on the normal capacity of the production facility. SFAS 151 is effective for inventory costs incurred during annual periods beginning after June 15, 2005. The Company is currently assessing the impact SFAS 151 may have on its financial statements and is not expected to have a material impact on our financial statements.

This statement applies to all voluntary changes in accounting principle and changes resulting from adoption of a new accounting pronouncement that does not specify transition requirements. SFAS 154 requires retrospective application to prior periods' financial statements for changes in accounting principle unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. SFAS 154 also requires that retrospective application of a change in accounting principle be limited to the direct effects of the change. Indirect effects of a change in accounting principle should be recognized in the period of the accounting change. SFAS 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005 with early implementation permitted for accounting changes and corrections of errors made in fiscal years beginning after the date this statement was issued. Notes to the unaudited consolidated financial statements

14. Income taxes

The statutory rate will be 16 % effective from January 1, 2004. Owing to the taxable losses, the Company did not have any corporate income taxes payable for the years of 2005 and 2004.

The losses incurred in the previous years can be carried forward for offset against future taxable profit. The carried forward taxable losses as of December 31, 2005 and 2004 were \$9,371,931 and \$11,522,347 respectively. Of this amount, approximately \$8 million of losses that arose in the first three years of operation in Hungary can be carried forward indefinitely based on current Hungarian Tax Legislation. The remaining losses expire in various years from 2006-2010. The Tax Acts of some jurisdictions contain provisions, which may limit the net operating loss carryforwards available to be used in any given year if certain events occur, including significant changes in ownership interests. The deferred tax assets are fully offset by a valuation allowance.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences and tax loss carryforwards become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes that it is more likely than the Company will not realize the benefit of these deductible differences, net of existing valuation allowances at December 31, 2005.

15. Stockholders' equity

In November 2004, Elender merged with the Company in a transaction under common control. As of the merger date, Euroweb International Corporation reduced the common stock of the Company by cancelling all common stock and issued 20,000 shares of new common stock.

On October 7, 2005, the Company acquired 85% of the outstanding shares of Navigator Informatika Rt., an IT outsourcing service provider located in Hungary. Consideration paid in cash was \$8,500,000. The results of Navigator have been included in the Company's consolidated financial statements from the date of acquisition.

NOTES TO UNAUDITED PRO FORMA CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

- (A) Reflects the historical unaudited consolidated balance sheet of Euroweb as of December 31, 2005, included in this proxy statement of Euroweb International Corporation for the year ended December 31, 2005.
- (B) Pro forma adjustments related to the sale of Navigator on the basis described in the introduction to these unaudited pro forma financial statements:

- 1) Represents the cash proceeds of \$8,500,000 received upon the sale of Navigator

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

- 2) Reflects the repayment of \$5,792,676 Commerzbank loan on current exchange rate at the date of closing originated from the Navigator acquisition in a value of \$6,000,000 at the historical exchange rate as the loan was provided in Hungarian forint by the bank
- 3) Reflects the repayment of \$2,500,000 intercompany loan from Euroweb to Euroweb International Corporation at the date of closing originated from the Navigator acquisition
- 4) Adjustment to eliminate assets sold and liabilities transferred upon the sale of Navigator
- 5) Adjustment to reflect the pro forma gain on the sale of Navigator. No tax liability and transaction costs are expected to arise as a result of the sale. Because the estimated pro forma gain assumes the sale was consummated on December 31, 2005, the pro forma gain will ultimately differ from the actual gain that will occur at the closing date of sale.
- 6) Adjustment to eliminate cumulative other comprehensive gain/losses of Navigator

No adjustments have been made to reflect any income tax effect of the pro forma adjustments since Euroweb has significant net operating loss carryforwards and, therefore, does not expect to have taxable income in the foreseeable future.

Notes to unaudited financial statements

1. Organization and Business

Euroweb Romania S.A. ("the Company" or "Euroweb Romania") was registered with the Romanian Trade Register as a joint-stock company previously named as Mediator S.A („Mediator") in March 1998, and commenced activities in November 1998. Euroweb International Corporation ("Euroweb International") acquired 100% of the shares of the Company in June 2000.

On May 19, 2000, Euroweb Romania purchased 100% of the Internet-related assets of Sumitkom Rokura, S.R.L. an Internet service provider in Romania. This transaction was accounted for as an asset purchase. The acquisition was operationally effective as of July 1, 2000.

On December 19, 2005, Euroweb International entered into a Share Purchase Agreement (the "Agreement") with Invitel Tavkozlesi Szolgaltato Rt., a Hungarian joint stock company ("Invitel"). Pursuant to the Agreement, Euroweb International has agreed to sell and, Invitel has agreed to purchase, 100% of the Euroweb International's interest in its two Internet and telecom related operating subsidiaries, Euroweb Internet Szolgaltato Rt. and the Company (together, the "Subsidiaries"). The purchase price to be paid to Euroweb International is USD \$30,000,000 in cash of which USD \$29,400,000 is payable at closing and the remaining \$600,000 is payable upon delivery of a certificate prepared by an independent auditor identifying the net indebtedness of the Subsidiaries, which are required to be debt free. The purchase price is to be reduced by the amount of any debt held in the Subsidiaries. The closing of the sale of the Subsidiaries, of which Euroweb International and the Company cannot provide any guarantee, is expected to occur within seven business days of receipt of approval of the competition office in Hungary and approval of the shareholders of Euroweb International provided that such date is no later than June 30, 2006. Euroweb International is required by the Agreement to take all required action to convene a meeting to vote on and approve the Agreement.

The Company is an Internet Service Provider offering a wide range of services such as internet subscriptions, hosting services and sales of modems, routers and related devices to customers. In addition to traditional Internet services, the Company also provides the following services, utilizing its existing infrastructure: (1) International/national leased line and internet protocol ("IP") data services (IP connections between different countries or connections between two or more sites within the same country) (2) Voice and Voice over IP ("VOIP") services; and (3) Facilities (sale, rent and maintenance of dark fiber between the Hungarian border and the Romanian City of Timisoara).

For the international/national leased line and VOIP services, the main customer

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

and supplier in 2005 and 2004 was Pantel Rt. („Pantel"), a related party for those periods. Pantel ceased to be a related party of the Company effective March 1, 2005 (see note 9).

2. Summary of Significant Accounting Policies

Basis of presentation

The financial statements comprise the accounts of the stand alone legal entity of Euroweb Romania S.A.

The unaudited financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP").

In June 2000, Euroweb International acquired 100% of the shares of Mediator (which was subsequently renamed to Euroweb Romania) from an unrelated third party. Pursuant to Statement of Financial Accounting Standards ("SFAS") No. 141, Business Combinations, at this date, the assets and liabilities of Mediator were measured at their fair values. The purchase price adjustments and goodwill were pushed down to Euroweb Romania in accordance with Staff Accounting Bulletin No. 54. "Push-down" is a basis of accounting that reflects the parent company's cost in the separate financial statements of a purchased subsidiary. Accordingly, in June 2000, the assets and liabilities of Euroweb Romania were stepped up to reflect the accounting basis of Euroweb International in Euroweb Romania's assets and liabilities.

Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Business segment reporting

Management has determined that the Company operates in one industry segment, providing Internet access and additional value-added services to business customers and individuals. All of the Company's revenues are derived from the provision of such services.

Fair value of financial instruments

The carrying values of cash equivalents, notes and loans receivable, accounts payable, loans payable and accrued expenses approximate their fair values.

The estimated fair value of the Company's debt at December 31, 2005 was \$471,000, which differs from the carrying amount of \$400,000 included in the balance sheet as short term and long-term part of intercompany loans, based on an annual 6% calculated interest as market price.

Cash and cash equivalents

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

Cash and cash equivalents include cash at bank and short-term deposits with maturities of three months or less at the date of purchase.

7

Notes to unaudited financial statements

Property and equipment

Property and equipment are stated at cost less accumulated depreciation. Equipment purchased under capital leases is stated at the lower of fair value and the present value of minimum lease payments at the inception of the lease, less accumulated depreciation. The Company provides for depreciation of property and equipment using the straight-line method over the following estimated useful lives:

Software	3 years
Fiber network	12-20 years
Computer and network equipment	3-10 years
Other furniture equipment and fixtures	3-5 years
Vehicles	5 years

Leased assets are depreciated using a straight-line method over the lesser of the estimated useful life of the leased assets and the lease term.

Recurring maintenance on property and equipment is expensed as incurred.

Long-lived assets

In accordance with Statement of Financial Accounting Standards ("SFAS") No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets," the Company periodically reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be fully recoverable or that the useful lives of those assets are no longer appropriate. Each impairment test is based on a comparison of the undiscounted cash flows to the recorded value of the asset. If impairment is indicated, the asset is written down to its estimated fair value based on a discounted cash flow analysis.

Revenue recognition

Revenue Recognition--The Company applies the provisions of SEC Staff Accounting Bulletin ("SAB") No. 104, "Revenue Recognition in Financial Statements," which provides guidance on the recognition, presentation and disclosure of revenue in financial statements filed with the SEC. SAB No. 104 outlines the basic criteria that must be met to recognize revenue and provides guidance for disclosure related to revenue recognition policies. The Company recognizes revenue related to its billable services when (i) persuasive evidence of an arrangement exists, (ii) services have been rendered, (iii) the fee is fixed or determinable and (iv) collectibility is reasonably assured. Generally, these criteria are met monthly as the Company's service is provided on a month-to-month basis and collection for the service is generally made within 30 days of the service being provided.

8

Notes to unaudited financial statements

When the Company's subscribers pay in advance for services, revenue is

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

recognized ratably over the period in which the related services are provided. Advance payments from users are recorded on the balance sheet as deferred revenue. In circumstances where payment is not received in advance, revenue is only recognized if collectibility is reasonably assured.

The Company earns revenue from the following activities:

Access services

Access revenues consist of monthly fees charged to customers for dial-up Internet access services. Access revenues also consist of fees charged for high-speed, high-capacity access services including digital subscriber lines ("ADSL") and leased lines.

Voice services

Voice revenue relates to the transmission of voice information in digital form in discrete packets. Revenues are recognized on a monthly basis based on usage.

Data services

Data revenue refers to the provision of leased lines to business customers. Revenues are derived from monthly fixed fees and are recognized in the month earned.

Domain registration

Domain registration revenue is usually billed in advance for a period of between 0-2 years. It is recorded as deferred revenue on the balance sheet and is taken into income monthly on a straight-line basis.

Web design and hosting

Web design relates to services performed for customers who require assistance with setting up a web page. Revenue is recognized once the final product has been accepted by the customer. Any work-in-progress is classified as "other assets" on the balance sheet. Hosting revenues consist of fees earned by leasing server space and providing web services to companies and individuals wishing to present a web or e-commerce presence. Revenues are derived from monthly fixed fees and are recognized in the month earned.

9

Notes to unaudited financial statements

Indefeasible Right of Use

In 2002, the Company entered into an agreement to provide transmission capacity to a customer pursuant to an indefeasible right of use agreement ("IRU"). Since the Company's IRU does not involve a transfer of title, management believes the agreement does not qualify for up-front sales treatment despite collection in full of the \$920,000 arrangement fee. The Company has accounted for this transaction as an operating lease under SFAS No. 13, "Accounting for Leases" ("SFAS 13"). This accounting has resulted in deferred revenue being recorded on the balance sheet. Revenue attributable to the transaction is being recognized on a straight-line basis over the term of the 20-year lease agreement (monthly \$3,833).

The Company is also obligated to maintain its network in efficient working order and in accordance with industry standards. The customer is obligated for the term of the agreement to pay for its allocable share of the costs

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

for operating and maintaining the network.

Cost of revenues

Cost of revenues (excluding depreciation and amortization) comprises principally telecommunication network expenses, costs of content services and cost of leased lines and are recognized as incurred.

Income taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets, net of appropriate valuation allowances, and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry-forwards. Deferred tax assets and liabilities, if any, are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Foreign currency translation

The Company conducts business and maintains its accounts in the Romanian Lei ("ROL"). The Company considers the Romanian Lei to be its functional currency. The reporting currency of the Company is the US\$ and accordingly, all amounts included in the consolidated financial statements have been translated into US\$.

The balance sheet translated into US\$ using the year end exchange rates. Revenues and expenses are translated at average rates in effect for the periods presented. The cumulative translation adjustment is reflected as a component of accumulated other comprehensive income in shareholders' equity.

10

Notes to unaudited financial statements

Foreign currency transaction gains and losses are included in the consolidated results of operations for the periods presented.

Advertising costs

Advertising costs are expensed as incurred and amounted \$142,255 and \$215,037 for the years ended December 31, 2005 and 2004, respectively.

Comparatives

Prior period amounts have been reclassified to conform with current period presentation.

Net earnings (loss) per share

The Company has adopted Statement of Financial Accounting Standards No. 128, "Earnings per Share," ("SFAS No. 128"), which provides for the calculation of "basic" and "diluted" earnings per share. Basic earnings (loss) per share is computed by dividing income (loss) attributable to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings (loss) per share reflects the

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

potential effect of common shares issuable upon exercise of stock options and warrants in periods in which they have a dilutive effect. There were no potential dilutive options and warrants for the year ended 2005 and 2004.

Recent accounting pronouncements

In December 2004, the FASB issued SFAS No. 123 (revised 2004), "Share-Based Payment" ("SFAS 123(R)"). SFAS 123(R) requires an entity to recognize the grant-date fair value of stock options and other equity-based compensation issued to employees in the income statement. SFAS 123(R) is effective for the Company as of January 1, 2006. The Company is currently assessing the impact SFAS 123(R) will have on its financial statements.

In December 2004, the FASB issued SFAS No. 151, "Inventory Costs - an amendment of ARB No. 43, Chapter 4" ("SFAS 151"). SFAS 151 amends Accounting Research Bulletin No. 43, Chapter 4, "Inventory Pricing" ("ARB 43") to eliminate the "so abnormal" criterion in ARB 43 and requires companies to recognize abnormal freight, handling costs, and amounts of wasted material (spoilage) as current-period charges. Additionally, SFAS 151 clarifies that fixed production overhead cost should be allocated to inventory based on the normal capacity of the production facility. SFAS 151 is effective for inventory costs incurred during annual periods beginning after June 15, 2005. The Company is currently assessing the impact SFAS 151 may have on its financial statements and is not expected to have a material impact on our financial statements.

11

Notes to unaudited financial statements

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections" which replaces Accounting Principles Board Opinions No. 20 "Accounting Changes" and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements." This statement applies to all voluntary changes in accounting principle and changes resulting from adoption of a new accounting pronouncement that does not specify transition requirements. SFAS 154 requires retrospective application to prior periods' financial statements for changes in accounting principle unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. SFAS 154 also requires that retrospective application of a change in accounting principle be limited to the direct effects of the change. Indirect effects of a change in accounting principle should be recognized in the period of the accounting change. SFAS 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005 with early implementation permitted for accounting changes and corrections of errors made in fiscal years beginning after the date this statement was issued. SFAS 154 is effective for the Company as of January 1, 2006 and is not expected to have a material impact on financial statements.

In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments—an amendment of FASB Statements No. 133 and 140" ("SFAS 155"). SFAS 155 amends SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133") and SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities". SFAS 155 resolves issues addressed in SFAS 133 Implementation Issue No. D1, "Application of Statement 133 to Beneficial Interests in Securitized Financial Assets." SFAS 155 is effective for the Company for all financial instruments acquired or issued after January 1, 2007 and is not expected to have a material impact on the Company's financial statements.

Goodwill and Impairment Charges

The Goodwill relating to Euroweb Romania on the acquisition of Mediator is considered as one reporting unit for purposes of SFAS 142.

At the beginning of 2006, the Euroweb Romania performed its annual impairment test relating to the goodwill as of December 31, 2005. Euroweb Romania compared the fair value of the reporting units to their carrying amounts, noting that in each case the fair value was higher than the carrying amount, and that no impairment charge was required.

7. Intercompany loans

Euroweb International has provided \$800,000 interest free loans to Euroweb Romania for financing the operation due to the Company's high VAT receivable position and investments into fixed assets. The loans were transferred as follows: \$50,000 in 2000, \$450,000 in 2001 and \$300,000 in 2003. The outstanding portion of these intercompany loans is repayable in two instalments: \$150,000 in the first quarter of 2006 and \$250,000 in December 2006.

Discontinued liabilities of Euroweb Hungary and Euroweb Romania in the audited consolidated financials statements of Euroweb International as of December 31, 2005 does not include the \$400,000 intercompany loan liabilities of Euroweb Romania to the Parent Company as stated in the unaudited financial statements of Euroweb Romania, as it is eliminated in Euroweb International's financial statements.

8. Commitments and Contingencies

	=====

The current portion of the capital lease obligation is included in 'Other current liabilities' in the accompanying balance sheets.

(b) Indefeasible Right of Use

In 2002, Euroweb Romania provided an IRU for transmission capacity on 12 pairs of fiber over a period of 20 years, commencing in 2003. For the duration of the agreement, Euroweb Romania is obliged to use all reasonable endeavours to ensure the cable system is maintained in efficient working order and in accordance with industry standards.

(c) Legal Proceedings

There are no known significant legal procedures that have been filed and are outstanding against the Company.

9. Related party transactions and major customer

The largest supplier of the Company since early 2001 has been Pantel Rt. ("Pantel"), a Hungary-based alternative telecommunications provider. As at December 31, 2004, KPN was the majority owner of Pantel and the largest shareholder of Euroweb International Corporation. Csaba Toro, Chief Executive Officer of Euroweb International Corporation, was also the Chief Executive Officer of Pantel until February 2003. In 2004, KPN announced its intention to divest its interest in Pantel with certain sale agreements being signed with a view to final consummation in 2005. On February 28, 2005, the sale of KPN's 75.1% interest in the Pantel business to Hungarian Telephone and Cable Corp. was completed. Therefore, Pantel will no longer be considered a related party effective March 1, 2005.

Euroweb Romania has engaged in the following transactions with Pantel:

(a) Pantel provides the following services to the Company:

- Internet and related services;
- National and international leased and telephone lines;
- Voice services;

The total amount of these services purchased from Pantel was \$2,853,363 during 2005 (2004: \$2,356,786).

(b) The Company provided the following services to Pantel:

- International leased lines and local telephone lines in Romania;
- International/national data and voice over internet protocol services;

Edgar Filing: EUROWEB INTERNATIONAL CORP - Form DEF 14A

- Internet and related services;

The total value of these services sold was approximately \$8,478,212 in 2005 (2004: \$7,999,011).

However, the dependency on Pantel is even more significant. Some third party sales of Euroweb Romania involve Pantel as the subcontractor/service provider for the international/domestic lines (hence the revenues related to Pantel are greater than the amounts paid to Pantel), and some third party customers are also clients of Pantel outside of Romania (i.e. their relationship with Pantel is stronger than their relationship with Euroweb Romania). Effective dependency on Pantel - taking into account direct and Pantel -related sales - represents approximately up to 66% of total revenue of Euroweb Romania in the year ended December 31, 2005.

15

Notes to unaudited financial statements

The trade accounts receivable due from Pantel was \$507,761 as of December 31, 2005. There were no trade accounts payable to Pantel as of December 31, 2005.

There were no other material transactions with related parties.

10. Income taxes

The statutory corporate tax rate in Romania was 16% for the years ended December 31, 2005 and 2004.

The current income tax expense of \$188,412 (2004: \$31,092) is attributable to income/loss from continuing operations and tax base adjustments based on the Romanian corporate tax laws.

The Company has no deferred tax assets resulting from any losses carried forward. In addition, the Company has no deferred tax liabilities.

the Company's interest in Euroweb Hungary and Euroweb Romania. The sale is expected to be completed prior to June 30, 2006. Euroweb Hungary and Euroweb Romania are together expected to be sold for approximately \$30,000,000 cash, less estimated transaction costs, severances, success fees and estimated guarantee provision accrual of approximately \$1,900,000.

Euroweb International Corporation ("Euroweb") believes that the sale of Euroweb Hungary and Euroweb Romania meets the criteria for presentation as a discontinued operation under the provisions of Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." Accordingly, Euroweb Hungary and Euroweb Romania are presented as discontinued operations in the historical consolidated financial statements of Euroweb. The estimated gain is \$15,603,244 on the sale of Euroweb Hungary and Euroweb Romania, which is not reflected in the unaudited pro forma condensed consolidated statements of operations due to the non-recurring nature of the gain.

The unaudited pro forma condensed consolidated balance sheet gives effect to the disposition of Euroweb Hungary and Euroweb Romania as if it occurred on December 31, 2005.

The pro forma adjustments described in the accompanying notes are based upon available information and certain assumptions that management believes are reasonable. The unaudited pro forma condensed consolidated financial statements are for illustrative purposes only and are not necessarily indicative of the actual results of operations or financial position that would have occurred had the transactions described above occurred on the dates indicated, nor are they necessarily indicative of future operating results. The unaudited pro forma financial statements are only a summary and should be read in conjunction with the historical consolidated financial statements and related notes of the Euroweb, in its Form 10-KSB for the year ended December 31, 2005.

All pro forma amounts are presented in U.S. dollars, the reporting currency of Euroweb.

No tax liability is expected to arise as a result of the sale. Because the estimated pro forma gain assumes the sale was consummated on December 31, 2005, the pro forma gain will ultimately differ from the actual gain that will occur at the closing date of sale.
