Item 8.01. Other Events.

On September 29, 2009, Applied Energetics, Inc. (the “Registrant”) issued a press release announcing that the United States District Court for the District of Arizona granted final approval of the settlement of the consolidated class action lawsuit originally filed in July 2006 against the Registrant and its founders.

As previously announced, under the terms of the settlement of the class action lawsuits, those lawsuits were dismissed with prejudice, and the Registrant and all other defendants received a full and complete release of all claims asserted against them in the litigation, in exchange for the payment of an aggregate of \$5.3 million in cash and the issuance of previously unissued shares of common stock by the Registrant valued at \$1.2 million. Based on the formula set forth in the settlement agreement, the Registrant will issue 2,283,887 shares of its common stock. There was no admission of liability by any of the defendants.

Insurance proceeds of \$6.2 million, less amounts previously reimbursed to the Registrant to pay expenses of the stockholder litigations (approximately \$700,000 to date), were used to fund the settlement payments and related costs. The remaining cash payments and the stock issuance are being made by the Registrant.

As stated in the settlement documents, the Registrant denies any liability in connection with the litigation and denies the claims asserted by the plaintiffs in the complaints. However, the Registrant believes this settlement is in the best interest of the Registrant and its stockholders, as it eliminates the uncertainties, distractions, burden and further expense associated with the litigations
