NeoMedia Technologies, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements
(Unaudited)

Note 1 - General

Business - NeoMedia utilizes the mobile phone by leveraging barcodes (printed symbols) as a seamless mechanism to link brands, advertisers, carriers, retailers and consumers using the power of the mobile internet.

With our barcode ecosystem technology, NeoMedia transforms mobile phones with cameras into barcode scanners that provide instant access to mobile web content whenever a barcode is scanned. A barcode makes any medium immediately interactive, and the code links consumers to the multimedia capability of the mobile web. We believe that combining this technology with analytics and reporting capabilities improves the way advertisers market to mobile consumers.

NeoMedia provides the infrastructure to facilitate mobile barcode scanning and its associated commerce worldwide. Our mobile barcode ecosystem software reads and transmits data from 2D barcodes to its intended destination. Our code management and clearinghouse platforms create, connect, record, and transmit the transactions embedded in the barcodes, like web-URLs, text messages (SMS), and telephone calls, ubiquitously and reliably.

In order to provide complete mobile marketing solutions, NeoMedia also offers barcode scanning hardware that reads barcodes displayed on mobile phone screens or printed media. NeoMedia provides infrastructure solutions to enable mobile ticketing and couponing programs – including scanner hardware and system support software for seamless implementation.

This technology is supported by our patents. In addition, NeoMedia has an open standards philosophy designed to make integration and use of the technology easy for handset manufacturers, mobile operators and advertisers; and the consumer's experience safe, reliable and interoperable.

Going Concern – We have historically incurred net losses from operations and we expect that we will continue to have negative cash flows as we implement our business plan. There can be no assurance that our continuing efforts to execute our business plan will be successful and that we will be able to continue as a going concern. The accompanying consolidated financial statements have been prepared in conformity with US GAAP, which contemplate our continuation as a going concern. Net income (loss) for the three months ended March 31, 2010 and 2009 was \$57.3 million and (\$106.6) million, respectively and net cash used by operations during the same period was \$1.8 million and \$1.1 million, respectively. At March 31, 2010, we have an accumulated deficit of \$222.2 million. We also have a working capital deficit of \$67.0 million, of which \$53.9 million is related to our financing instruments, including \$26.8 million related to the fair value of warrants and those debentures that are recorded as hybrid financial instruments, and \$27.1 million related to the amortized cost carrying value of certain of our debentures and the fair value of the associated derivative liabilities.

The items discussed above raise substantial doubts about our ability to continue as a going concern.

We currently do not have sufficient cash to sustain us for the next twelve months. We will require additional financing in order to execute our operating plan and continue as a going concern. Our management's plan is to attempt to secure adequate funding to bridge the commercialization of our barcode ecosystem business. We cannot predict whether this additional financing will be in the form of equity, debt, or another form and we may not be able to obtain the necessary additional capital on a timely basis, on acceptable terms, or at all. In the event that these financing sources do not materialize, or that we are unsuccessful in increasing our revenues and profits, we may be unable to implement our current plans for expansion, repay our debt obligations as they become due or continue as a going concern, any of

which circumstances would have a material adverse effect on our business, prospects, financial condition and results of operations. Should our lender, YA Global Investments, L.P. (“YA Global”) choose not to provide us with capital financing, as they have in the past, or if we do not find alternative sources of financing to fund our operations, or if we are unable to generate significant product revenues, we only have sufficient funds to sustain our current operations through approximately May 27, 2010.

The financial statements do not include any adjustments relating to the recoverability and reclassification of recorded asset amounts or the amounts and classification of liabilities that might be necessary, should we be unable to continue as a going concern.

Note 2 - Summary of Significant Accounting Policies

The accompanying unaudited financial statements have been prepared in accordance with US GAAP for interim financial information and Rule 8.03 of Regulations SX. They do not include all of the information and footnotes required by US GAAP for complete financial statements. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, considered necessary for a fair presentation have been included. The results of operations for the periods presented are not necessarily indicative of the results to be expected for the full year. For further information, refer to the financial statements of the Company as of December 31, 2009 and 2008 and for the years then ended, including notes thereto included in the Company's Form 10-K.

Basis of Presentation – The consolidated financial statements include the accounts of NeoMedia Technologies, Inc. and our wholly-owned subsidiaries. We operate as one reportable segment. All significant intercompany accounts and transactions have been eliminated.

Reverse Stock Split – On March 30, 2010, at a special meeting of shareholders, the following actions were approved, to amend our certificate of incorporation as follows: 1) a 1 share for 100 shares reverse stock split, 2) our authorized shares of common stock were fixed at 5,000,000,000 shares, and; 3) the par value of our common stock was changed from \$0.01 to \$0.001. All of the share and per share information related to our common stock presented herein have been retroactively re-stated to give effect to these actions as required by FASB ASC 260, Earnings per Share and SAB Topic 4. C, Changes in Capital Structure.

Use of Estimates – The preparation of consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Changes in facts and circumstances may result in revised estimates, which are recorded in the period in which they become known.

Basic and Diluted Income (Loss) Per Share – Basic net income (loss) per share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. During the three months ended March 31, 2009, we reported a net loss per share, and as such, basic and diluted loss per share were equivalent. We excluded all outstanding stock options, warrants, convertible debt and convertible preferred stock from the calculation of diluted net loss per share because these securities were anti-dilutive. During the three months ended March 31, 2010, we reported net income per share and included dilutive instruments in the fully diluted net income per share calculation. The following is a reconciliation of the numerator and denominator of the basic and diluted earnings per share calculation for this period:

Edgar Filing: NEOMEDIA TECHNOLOGIES INC - Form 10-Q

Three Months Ended
March 31, 2010
(in thousands, except share and per
share data)

Numerator:		
Net income	\$	57,332
Accretion of Series D preferred stock to redemption value		(2,500)
Numerator for basic earnings per share-income available to common stockholders		54,832
Effect of dilutive securities:		
Adjustment for change in fair value of embedded conversion feature		(40,179)
Adjustment for change in fair value of warrants		(6,551)
Adjustment for loss on extinguishment		5,643
Adjustment for debentures recorded at fair value		(18,372)
Adjustment for interest expense		446
		(59,013)
Numerator for diluted earnings per share-income available for common stockholders after assumed conversion of debentures, preferred stock and exercise of warrants		
	\$	(4,181)
Denominator:		
Weighted average shares used to compute basic EPS		22,675,678
Effect of dilutive securities:		
Convertible debentures		65,227,939
Convertible preferred stock		24,412,875
Dilutive potential common shares		89,640,814
Denominator for diluted earnings per share-adjusted weighted average shares after assumed conversion of debentures, preferred stock and exercise of warrants		
		112,316,492
Basic earnings per share	\$	2.42
Diluted earnings per share	\$	(0.04)

The above table includes only dilutive instruments and their effects on earnings per common share.

The following outstanding stock options, warrants, convertible debt and convertible preferred securities are anti-dilutive and therefore have been excluded from diluted earnings per share:

	As of March 31,	
	2010	2009
Stock options	927,909	1,031,369
Warrants	12,291,958	10,103,708
Convertible debt	-	21,709,960
Convertible preferred stock	-	11,737,010

13,219,867	44,582,047
------------	------------

All share and per share amounts in the tables above have been retroactively restated to reflect the effect of the reverse stock split discussed in Note 3.

Inventories – Inventories are stated at the lower of cost or market and are comprised of barcode-reading equipment at our NeoMedia Europe location. Cost is determined using the first-in, first-out method.

Edgar Filing: NEOMEDIA TECHNOLOGIES INC - Form 10-Q

Recent Accounting Pronouncements - The following Accounting Standards Codification Updates have been issued, or will become effective, after the end of the period covered by this discussion:

Pronouncement	Issued	Title

ASU No. 2010-19	May 2010	Foreign Currency (Topic 830): Foreign Currency Issues: Multiple Foreign Currency Exchange Rates

To the extent appropriate, the guidance in the above Accounting Standards Codification Updates is already reflected in our consolidated financial statements and management does not anticipate that these accounting pronouncements will have any future effect on our consolidated financial statements.

Note 3 – Capital Stock

Common Stock – On March 30, 2010, we held a special meeting of our stockholders, at which our stockholders approved amendments to our certificate of incorporation as follows:

- To effect a 1 share for 100 shares reverse stock split of our outstanding common stock; and
- To fix the amount of authorized shares of common stock at 5,000,000,000 shares; and
- To effect a change in our common stock par value from \$0.01 to \$0.001.

In accordance with FASB ASC 260, Earnings per Share, and SAB Topic 4.C, Changes in Capital Structure, all of the share and per share information related to our common stock included in these financial statements has been retroactively re-stated to reflect the above changes.

We filed an amendment to our certificate of incorporation on April 1, 2010 to reflect the above amendments. On April 19, 2010, we filed for, and were assigned a new CUSIP number 640505-301 in connection with the issuance of new common stock securities pursuant to the reverse stock split. On April 21, 2010 we filed a request for regulatory approval from the Financial Industry Regulatory Authority (“FINRA”). On May 7, 2010, final regulatory approval was granted and became effective on May 10, 2010.

Holders of common stock are entitled to one vote for each share held of record on each matter submitted to a vote of shareholders. Holders of our common stock do not have a cumulative voting right, which means that the holders of more than one half of our outstanding shares of common stock, subject to the rights of the holders of preferred stock, can elect all of our directors, if they choose to do so. In this event, the holders of the remaining shares of common stock would not be able to elect any directors. Subject to the prior rights of any class or series of preferred stock which may from time to time be outstanding, if any, holders of common stock are entitled to receive ratably, dividends when, as, and if declared by our Board of Directors out of funds legally available for that purpose. Upon our liquidation, dissolution, or winding up, the holders are entitled to share ratably in all assets remaining after payment of liabilities and payment of accrued dividends and liquidation preferences on the preferred stock, if any. Holders of common stock have no preemptive rights, nor rights to convert their common stock into any other securities. Except as otherwise required by Delaware law, and subject to the rights of the holders of preferred stock, all stockholder action is taken by the vote of a majority of the outstanding shares of common stock present at a meeting of stockholders at which a quorum consisting of a majority of the outstanding shares of common stock is present in person or by proxy. Shares repurchased are held as treasury shares and used for general corporate purposes including, but not limited to, satisfying obligations under our employee benefit plans. Treasury stock is recorded at cost.

Series D Convertible Preferred Stock – On April 5, 2010 the initial voting privileges of our Series D Convertible Preferred stock expired. Effective April 6, 2010 these shares may vote, along with our common shares, on an as-converted basis only upon 65 days notice, of a waiver by YA Global, of their 9.99% ownership limitation.

Note 4 – Financing

As of March 31, 2010, our financing transactions with YA Global, an accredited investor, included shares of our Series C Convertible Preferred Stock issued in February 2006, Series D Convertible Redeemable Preferred Stock issued in January 2010, a series of fifteen secured convertible debentures issued between August 2006 and August 2009 and various warrants to purchase shares of our common stock.

On January 5, 2010, we entered into an investment agreement with YA Global which included i) the issuance to YA Global of 25,000 shares of our \$100 Series D Convertible Redeemable Preferred Stock ii) the modification of the conversion terms of all of our outstanding secured convertible debentures and extension of their maturity dates to July 29, 2012 iii) issuance of additional warrants to acquire 225,000 shares of our common stock and, iv) modification of the terms of three outstanding warrants to acquire a total of 350,000 shares of our common stock. The gross amount of this transaction was \$2.5 million and we received net proceeds of \$1.9 million after fees of \$100,000 and the redemption of a \$500,000 promissory note issued to YA Global on December 23, 2009.

In addition, the January 5, 2010 investment agreement required us to seek shareholder approval to enact the following changes relating to our common stock - a 1 share for 100 shares reverse stock split, the fixing of our authorized shares at 5,000,000,000, and the reduction in the par value from \$0.01 to \$0.001. On March 30, 2010, we held a Special Meeting of our shareholders, at which the shareholders approved amendments to the Company's certificate of incorporation to reflect these changes (See Note 3).

Series D Convertible Redeemable Preferred Stock - The Series D Convertible Redeemable Preferred Stock issued on January 5, 2010 has a stated value of \$100 per share and provides for an 8% cumulative dividend, subject to Board declaration and, for 90 days after issuance, entitled the investor to vote on an as-converted basis with the holders of the Company's common stock, resulting in 100,000 votes for each share of the Series D Preferred. Each share of Series D Preferred is convertible, at the option of the holder, at a conversion price equal to the lesser of (i) \$2.00 or (ii) 97% of the lowest closing bid price of our common stock for the 125 trading days preceding the date of conversion, provided that no conversion will be at a price less than the par value of the common stock. The conversion price is subject to adjustment for down-round, anti-dilution protection. Accordingly, if we sell common stock or common share indexed financial instruments below the conversion price, the Series D Preferred conversion price adjusts to that lower amount. The Series D Preferred conversion price is also subject to standard anti-dilution adjustments for stock splits and similar equity reorganizations. The Series D Preferred has a liquidation preference equal to \$100 per share plus all declared and unpaid dividends and is redeemable by us, at our option, at an amount of \$100 per share plus a redemption premium of 10%. The instrument is also redeemable at the holder's option upon certain events of default, which include events and factors that are not related to interest or credit risk.

The Series D Preferred is a hybrid financial instrument that embodies the risks and rewards typically associated with both equity and debt instruments. Accordingly, we are required to evaluate the features of this contract to determine its nature as either an equity-type contract or a debt-type contract. We determined that the Preferred Stock is generally more akin to a debt-type contract, principally due to its variable conversion price and redemption features. This determination is subjective. However, in complying with the guidance provided in FASB ASC 815, Derivatives and Hedging, we concluded, based upon the preponderance and weight of all terms, conditions and features of the host contract, that the Series D Preferred was more akin to a debt instrument for purposes of considering the clear and close relationship of the embedded conversion feature to the host contract. FASB ASC 815 requires bifurcation when the embedded feature and the host contracts have risks that are not clearly and closely related. Certain exemptions to this rule, such as that provided for instruments convertible into a fixed number of shares or instruments that are indexed only to the issuer's own stock were not available to us because the Preferred Stock conversion price is subject to down-round, anti-dilution protection. Accordingly, the conversion feature, along with certain other features that have equity-related risks, required bifurcation and liability classification as a compound embedded derivative financial instrument. Derivative financial instruments are measured at fair value both at inception and on an ongoing basis.

As discussed in further detail below, the initial allocation of the basis in the Series D Preferred Financing transaction resulted in no basis ascribed to the redeemable preferred stock. According to FASB ASC 480-10, Distinguishing Liabilities from Equity, if the security is not currently redeemable and it is not probable that the security will become redeemable, accretion to face value is not necessary. The Series D Preferred is convertible upon inception and there was no persuasive evidence that the Preferred Stock would not be redeemed. Based on this information,

redemption could not be considered “not probable” of occurring and accretion was necessary. Redeemable preferred stock may be accreted to its redemption value through periodic charges to retained earnings or over the period from the date of issuance to the earliest redemption date. Because there was no term of redemption embodied in the contract, the issuance date was considered the earliest possible redemption date. As a result, a day-one deemed dividend of \$2,500,000 was recorded to accrete the Series D Preferred to its redemption value.

In conjunction with the Series D Preferred Stock, we also issued warrants to acquire 225,000 shares of our common stock. We evaluated the warrants for purposes of classification under FASB ASC 815 and determined the warrants require liability classification because they embody down-round anti-dilution protection that precludes the instrument from being considered indexed only to the Company's own stock.

Our accounting required the allocation of the proceeds to the individual financial instruments comprising the Series D Preferred Stock financing. Current accounting concepts generally provide that proceeds are allocated first to the instruments that are required to be recorded at fair value; that is, the compound embedded derivative and the warrants, and the remainder to the host instrument. The fair value of the embedded conversion feature and the warrants exceeded the proceeds, which resulted in a day-one derivative loss.

The allocation of the basis arising from the issuance of Series D Preferred Stock and warrants is summarized in the table below:

	Proceeds Allocation	Deemed Dividend (in thousands)	Total Allocation
Gross proceeds	\$ 2,500		\$ 2,500
Financing costs paid to investor	(100)		(100)
	\$ 2,400		\$ 2,400
Derivative liabilities:			
Investor warrants	\$ (2,431)		\$ (2,431)
Compound derivative	(4,551)		(4,551)
Total derivative liabilities	(6,982)		(6,982)
Redeemable preferred stock:			
Series D Preferred Stock	-	-	-
Deemed dividend	-	\$ (2,500)	(2,500)
Total redeemable preferred stock	-	(2,500)	(2,500)
Accumulated deficit (deemed dividend)	-	2,500	2,500
Day-one derivative loss	4,582		4,582
	\$ (2,400)	\$ -	\$ (2,400)

Series C Convertible Preferred Stock - On February 17, 2006, we issued 22,000 shares of \$1,000 Series C 8% Convertible Preferred Stock, with a face value of \$22 million, to YA Global. The Series C Preferred Stock was originally convertible into shares of common stock at the lower of \$2.00 per share and 97% of the lowest closing bid price of the common stock for the 30 trading days immediately preceding the conversion date. On January 5, 2010, we entered into an amendment to the Series C Convertible Preferred Stock, which modified the conversion provisions to increase the look-back period in the variable conversion rate calculation to 125 days.

As of March 31, 2010, 13,358 shares of the original 22,000 shares of Series C Preferred have been converted into 1,240,037 of our common shares, leaving 8,642 shares of Series C Preferred with a face value of \$8.6 million outstanding.

Secured Convertible Debentures - The underlying agreements for each of the fifteen debentures issued to YA Global are essentially the same, except in regard to the interest rate, varying conversion prices per share, and the number of warrants that were issued in conjunction with each of the debentures. The debentures are convertible into our common stock, at any time, at the option of the holder, at the lower of a fixed conversion price per share or a percentage of the lowest volume-weighted average price ("VWAP") for a specified number of days prior to the conversion (the "look-back period"). The conversion is limited such that the holder cannot exceed 9.99% ownership as of January 5, 2010, unless the holder waives their right to such limitation. All of the convertible debentures are secured according to the terms of a Security Pledge Agreement dated August 23, 2006, which was entered into in connection with the first convertible debenture issued to YA Global and which provides YA Global with a security interest in substantially all of our assets. The debentures are also secured by a Patent Security Agreement dated July 29, 2008.

As discussed above, on January 5, 2010, the terms of all of the debentures were modified to extend the stated maturity date to July 29, 2012. The January 5, 2010 amendments also increased the look-back period used to calculate the variable conversion price per share for all debentures to a period of 125 days and increased the fixed portion of the conversion price for certain of the debentures from \$1.00 to \$2.00.

The table below summarizes the significant terms of each of the debentures as of March 31, 2010:

Debenture Issue Date	Face Amount	Maturity	Interest Rate	Default Interest Rate	Conversion Price – Lower of Fixed Price or Percentage of VWAP for Preceding Period			
					Fixed Price	%	Default %	Preceding Period
August 24, 2006	\$ 5,000,000	7/29/2012	10%	n/a	\$ 2.00	90%	n/a	125 Days
December 29, 2006	\$ 2,500,000	7/29/2012	10%	n/a	\$ 2.00	90%	n/a	125 Days
March 27, 2007	\$ 7,458,651	7/29/2012	13%	n/a	\$ 2.00	90%	n/a	125 Days
August 24, 2007	\$ 1,775,000	7/29/2012	14%	n/a	\$ 2.00	80%	n/a	125 Days
April 11, 2008	\$ 390,000	7/29/2012	15%	24%	\$ 1.50	80%	75%	125 Days
May 16, 2008	\$ 500,000	7/29/2012	15%	24%	\$ 1.50	80%	50%	125 Days
May 29, 2008	\$ 790,000	7/29/2012	15%	24%	\$ 1.00	80%	50%	125 Days
July 10, 2008	\$ 137,750	7/29/2012	15%	24%	\$ 1.00	80%	50%	125 Days
July 29, 2008	\$ 2,325,000	7/29/2012	14%	24%	\$ 2.00	95%	50%	125 Days
October 28, 2008	\$ 2,325,000	7/29/2012	14%	20%	\$ 2.00	95%	50%	125 Days
May 1, 2009	\$ 294,000	7/29/2012	14%	20%	\$ 2.00	95%	50%	125 Days
June 5, 2009	\$ 715,000	7/29/2012	14%	20%	\$ 2.00	95%	50%	125 Days
July 15, 2009	\$ 535,000	7/29/2012	14%	20%	\$ 2.00	95%	50%	125 Days
August 14, 2009	\$ 475,000	7/29/2012	14%	20%	\$ 2.00	95%	50%	125 Days

All debentures with YA Global contain provisions for acceleration of principal and interest upon default. Certain debentures also contain default interest rates and conversion prices, as reflected in the table above.

In our evaluation of these financing transactions, we concluded that the conversion features were not afforded the exemption as conventional convertible instruments due to the variable conversion rate; and they did not otherwise meet the conditions set forth in current accounting standards for equity classification. Because equity classification was not available for the conversion features, we elected to bifurcate the compound derivatives, and carry them as derivative liabilities, at fair value. Each compound derivative consists of (i) the embedded conversion feature, (ii) down-round anti-dilution protection features, and (iii) default, non-delivery and buy-in puts which were combined into one compound instrument that is carried as a component of derivative liabilities.

Fair Value Considerations - In accordance with FASB ASC 815, Derivatives and Hedging, we determined that the conversion features of the Series C and Series D Convertible Preferred Stock, and the August 2006, December 2006, July 2008, October 2008, April 2009, May 2009, June 2009, July 2009 and August 2009 Debentures met the criteria of embedded derivatives and that the conversion features of these instruments required bifurcation and accounting as derivative instrument liabilities. Changes in the fair value of the derivative liability for the embedded conversion option are charged or credited to income each period. As permitted by FASB ASC 815-15-25, Recognition of Embedded Derivatives, we elected not to bifurcate the embedded derivatives in the March 2007, August 2007, April 2008 or May 2008 Debentures and accordingly, these convertible instruments are being carried in their entirety at their fair values, with the changes in the fair value of the Debentures charged or credited to income each period.

Derivative financial instruments arising from the issuance of convertible financial instruments are initially recorded, and continuously carried, at fair value. Upon conversion of any of the convertible financial instruments, the carrying amount of the debt, including any unamortized premium or discount, and the related derivative instrument liability are credited to the capital accounts upon conversion to reflect the stock issued and no gain or loss is recognized.

Embedded Derivative Instruments – Series C and Series D Preferred Stock and August 2006, December 2006, July 2008, October 2008, April 2009, May 2009, June 2009, July 2009 and August 2009 Convertible Debentures - Embedded derivative financial instruments arising from the convertible instruments consist of multiple individual features that were embedded in each instrument. For each convertible instrument, we evaluated all significant features and, as required under current accounting standards, aggregated the components into one compound derivative financial instrument for financial reporting purposes. For financings recorded in accordance with FASB ASC 815, the compound embedded derivative instruments are valued using the Monte Carlo Simulation methodology because that model embodies certain relevant assumptions (including, but not limited to, interest rate risk, credit risk, and conversion/redemption privileges) that are necessary to value these complex derivatives.

The conversion price in each of the convertible debentures is subject to adjustment for down-round, anti-dilution protection. Accordingly, if we sell common stock or common share indexed financial instruments below the stated or variable conversion price in the agreement, the conversion price adjusts to that lower amount.

As discussed above, on January 5, 2010, we entered into amendments to the convertible debentures, which extended the maturity dates to July 29, 2012, and modified the terms of the conversion prices. The modification changed the remaining term for the debentures from 0.52 - 0.58 years to 2.56 years.

The assumptions included in the calculations are highly subjective and subject to interpretation. Assumptions used as of March 31, 2010 included exercise estimates/behaviors and the following other significant estimates:

	Conversion Prices	Remaining Term (years)	Equivalent Volatility	Equivalent Interest-Risk Adjusted Rate	Equivalent Credit-Risk Adjusted Rate
Series C Convertible Preferred Stock	\$ 0.44	2.36	222%	7.43%	8.47%
Series D Convertible Preferred Stock	\$ 0.44	2.36	222%	7.43%	8.47%
August 24, 2006	\$ 0.41	2.36	222%	9.28%	8.47%
December 29, 2006	\$ 0.41	2.36	222%	9.28%	8.47%
July 10, 2008	\$ 0.36	2.36	222%	14.00%	8.47%
July 29, 2008	\$ 0.43	2.36	222%	14.00%	8.47%
October 28, 2008	\$ 0.43	2.36	222%	14.00%	8.47%
April 6, 2009	\$ 0.43	2.36	222%	14.00%	8.47%
May 1, 2009	\$ 0.43	2.36	222%	14.00%	8.47%
June 5, 2009	\$ 0.43	2.36	222%	14.00%	8.47%
July 15, 2009	\$ 0.43	2.36	222%	14.00%	8.47%
August 14, 2009	\$ 0.43	2.36	222%	14.00%	8.47%

Equivalent amounts reflect the net results of multiple modeling simulations that the Monte Carlo Simulation methodology applies to underlying assumptions.

Due to the variable component of the conversion price, rapid fluctuations in the trading market price may result in significant variations to the calculated conversion price. For each debenture, we analyze the ratio of the conversion

price (as calculated based on the percentage of VWAP for the appropriate look back period) to the trading market price for a period of time equal to the term of the debenture to determine the average ratio for the term of the note. Each quarter, the ratio in effect on the date of the valuation is compared with the average ratio over the term of the debenture to determine if the calculated conversion price is representative of past trends or if it is considered unrepresentative due to a large fluctuation in the stock price over a short period of time. If the calculated conversion price results in a ratio that deviates significantly from the average ratio over the term of the agreement, the average ratio of the conversion price to the trading market price is then multiplied by the current trading market price to determine the variable portion of the conversion price for use in the fair value calculations. This variable conversion price is then compared with the fixed conversion price and, as required by the terms of the debentures, the lower of the two amounts is used as the conversion price in the Monte Carlo Simulation model used for valuation purposes. On March 31, 2010, the fixed conversion price for each of the debentures was equal to or higher than the calculated variable conversion price. Accordingly, the variable conversion price was used in the Monte Carlo Simulation model. This analysis is performed each quarter to determine if the calculated conversion price is reasonable for purposes of determining the fair value of the embedded conversion features (for instruments recorded under FASB ASC 815) or the fair value of the hybrid instrument (for instruments recorded under FASB ASC 815-15-25).

Hybrid Financial Instruments Carried at Fair Value – 2007 and 2008 Convertible Debentures - The March 2007, August 2007, April 11, 2008, May 16, 2008 and May 29, 2008 convertible debentures are recorded in accordance with FASB ASC 815-15-25 and the entire hybrid instrument was initially recorded at fair value, with subsequent changes in fair value charged or credited to income each period. These financial instruments are valued using the common stock equivalent approach. The common stock equivalent is calculated using the shares indexed to the debentures valued at the market price of our stock and the present value of the coupon.

Subsequent to the January 5, 2010 amendment, the shares indexed to the debentures were calculated using the variable conversion price based on the 125 day look-back period and the present value of the coupon from inception of the debentures to the revised maturity date of July 29, 2012.

Current Period Valuations - For the Series C Preferred Stock and the August 2006 and December 2006 debentures, due to our previous default position with respect to these instruments, the carrying value of each instrument in effect as of December 31, 2006 was written up to its full face value during the fourth quarter of 2006. For these instruments and the Series D Convertible Preferred Stock and the July 2008, October 2008, April 2009, May 2009, June 2009, July 2009 and August 2009 debentures, the embedded derivative instrument, primarily the conversion feature, has been separated and accounted for as a derivative instrument liability, as discussed above. This derivative instrument liability is marked-to-market each reporting period.

The March 2007, August 2007, April 2008 and May 2008 debentures were each initially recorded at their full fair value pursuant to FASB ASC 815-15-25. That fair value is marked-to-market each reporting period, with any changes in the fair value charged or credited to income.

On January 5, 2010, the terms of all of the debentures were modified to extend the stated maturity date to July 29, 2012 and increase the look-back period used to calculate the variable conversion price per share for all debentures to a period of 125 days which increased our future anticipated cash flows related to those instruments. Because that increase exceeded the threshold prescribed by FASB ASC 470-50, Debt Modifications and Extinguishments, the modification of the amounts due under these instruments was accounted for as an extinguishment. Accordingly, the original convertible debentures were considered extinguished and the revised convertible debentures were recorded at their fair value, resulting in an extinguishment loss of approximately (\$5.6) million.

For instruments which were recorded under FASB ASC 815-15, the instruments were first adjusted to fair value as of January 5, 2010 using the conversion rate and maturity date prior to the amendment. The fair value of the instrument was then calculated using the modified conversion rate and maturity date to determine the fair value of the instrument subsequent to the amendment. The difference in the fair value before and after the amendment was recorded as an extinguishment loss.

For instruments recorded under FASB ASC 815-10, the embedded conversion feature was first adjusted to fair value as of the date of the amendment using the conversion rate and maturity date prior to the amendment. The carrying value of the host instrument and the embedded conversion feature, less any deferred financing costs, was then compared with the fair value of the hybrid instrument subsequent to the amendment and the difference was recorded as an extinguishment loss.

For our Series C and Series D Convertible Preferred Stock and convertible debentures, the following table reflects the face value of the instruments and, as appropriate, either their amortized cost carrying value and the fair value of the separately-recognized compound embedded derivative or, for those debentures recorded in their entirety at fair value, their fair value, as well as for each of the instruments and the number of common shares (in thousands) into which the instruments are convertible as of March 31, 2010 and December 31, 2009.

Edgar Filing: NEOMEDIA TECHNOLOGIES INC - Form 10-Q

March 31, 2010	Face Value	Carrying Value	Embedded Conversion Feature (in thousands)	Fair Value	Common Stock Shares

The terms of the embedded conversion features in the convertible instruments presented above provide for variable conversion rates that are indexed to our trading common stock price. As a result, the number of indexed shares is subject to continuous fluctuation. For presentation purposes, the number of shares of common stock into which the embedded conversion feature of the Series C and Series D Preferred Stock was convertible as of March 31, 2010 was calculated as face value plus assumed dividends (if declared), divided by the lesser of the fixed rate or the calculated variable conversion price using the 125 day look-back period. The number of shares of common stock into which the embedded conversion feature in the convertible debentures was convertible as of March 31, 2010 was calculated as the face value of each instrument divided by the variable conversion price using a 125 day look-back period.

The March 2007, August 2007, April 2008 and May 2008 debentures are carried in their entirety at fair value in accordance with FASB ASC 815-15-25 and the value of the embedded conversion feature is effectively embodied in those fair values.

Changes in the fair value of convertible instruments that are carried in their entirety at fair value (the March 2007, August 2007, April 2008 and May 2008 debentures) are reported as "Gain (loss) from change in fair value of hybrid financial instruments" in the accompanying consolidated statements of operations. The changes in fair value of these hybrid financial instruments were as follows:

	Three Months Ended March 31,	
	2010	2009
	(in thousands)	
March 27, 2007	\$ 12,088	\$ (16,025)
August 24, 2007	3,212	(3,641)
April 11, 2008	713	(795)
May 16, 2008	915	(997)
May 29, 2008	1,444	(1,573)
Gain (loss) from changes in fair value of hybrid instruments	\$ 18,372	\$ (23,031)

Changes in the fair value of derivative instrument liabilities related to the bifurcated embedded derivative features of convertible instruments not carried at fair value are reported as “Gain (loss) from change in fair value of derivative liability – Series C and Series D preferred stock and debentures” in the accompanying consolidated statement of operations. The changes in fair value of these derivative financial instruments were as follows:

	Three Months Ended March 31,	
	2010	2009
	(in thousands)	
Series C Convertible Preferred Stock	\$ 14,628	\$ (27,240)
Series D Convertible Preferred Stock	4,041	-
August 24, 2006	10,962	(12,075)
December 29, 2006	5,342	(6,165)
July 10, 2008	267	(256)
July 29, 2008	3,497	(914)
October 28, 2008	3,300	(1,004)
May 1, 2009	470	-
June 5, 2009	996	-
July 15, 2009	505	-
August 14, 2009	753	-
	44,761	(47,654)
Less: Day-one loss from Series D Convertible Preferred financing	(4,582)	-
Gain (loss) from change in fair value of derivative liability	\$ 40,179	\$ (47,654)

Warrants - YA Global holds warrants to purchase shares of our common stock that were issued in connection with the convertible debentures and the Series C and Series D Preferred Stock. The warrants are exercisable at the lower of a fixed exercise price or a specified percentage of the current market price. From time to time, the fixed exercise prices of the warrants held by YA Global have been reduced as an inducement for YA Global to enter into subsequent financing arrangements. In addition to the warrants issued to YA Global, certain other warrants have been issued to consultants and other service providers.

The warrants issued to YA Global and others do not meet all of the established criteria for equity classification in FASB ASC 815-40, Derivatives and Hedging – Contracts in Entity’s Own Equity, and accordingly, are recorded as derivative liabilities at fair value. Changes in the fair value of the warrants are charged or credited to income each period.

The January 5, 2010 investment agreement with YA Global amended the exercise price of warrants indexed to 350,000 shares of common stock, which were issued in July 2008. Due to down-round anti-dilution provisions, the exercise price of the warrants prior to the amendment was based on the lowest conversion price of convertible debentures issued subsequent to July 2008; however, the amendment fixed the exercise price at \$1.00, subject to subsequent adjustment for anti-dilution. The amendment reduced the exercise price of the July 2008 warrants resulting in an approximate decrease in fair value of \$3,500.

In connection with the January 5, 2010 investment agreement, we also issued to YA Global warrants to purchase 225,000 shares of our common stock at an exercise price of \$1.00, expiring after seven years. These warrants were accounted for as a derivative liability and their fair value at inception was approximately \$2.4 million.

The following table summarizes the warrants outstanding (in thousands) and their fair value:

March 31, 2010	December 31, 2009		March 31, 2010	December 31, 2009
Exercise Price	Exercise Price	Expiration Date	Fair Value	Fair Value
		Warrants	Warrants	Warrants
