Nine Months Ended

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. However, such information reflects all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of results for the unaudited interim periods.

The results of operations for the nine month period ended March 31, 2011 are not necessarily indicative of the results to be expected for the fiscal year ending June 30, 2011 or any other period. The unaudited consolidated financial statements and notes presented herein should be read in conjunction with the audited consolidated financial statements and related notes thereto included in Eagle's Form 10-K for the fiscal year ended June 30, 2010.

The Company evaluated subsequent events for potential recognition and/or disclosure through May 16, 2011 the date the consolidated financial statements were issued.

On April 5, 2010, the Company completed its second-step conversion from the partially-public mutual holding company structure to the fully publicly-owned stock holding company structure. As part of that transaction it also completed a related offering of its common stock. As a result of the conversion and offering, the Company became the stock holding company for American Federal Savings Bank, and Eagle Financial MHC and Eagle Bancorp ceased to exist. The Company sold a total of 2,464,274 shares of common stock at a purchase price of \$10.00 per share in the offering for gross proceeds of \$24.6 million. Concurrent with the completion of the offering, shares of Eagle Bancorp common stock owned by the public were exchanged. Stockholders of Eagle Bancorp received 3.800 shares of the Company's common stock for each share of Eagle Bancorp common stock that they owned immediately prior to completion of the transaction. Accordingly, as of April 5, 2010, the Company had 8,000,000 shares of common stock authorized and 4,083,127 issued and outstanding.

Mortgage-backed & CMOs	6,729	38	-	-		
Total	\$16,587	\$208	\$5,130	\$495		

In evaluating debt securities for other-than-temporary impairment losses, management assesses whether the Company intends to sell or if it is more likely than not that it will be required to sell impaired debt securities. In so doing, management considers contractual constraints, liquidity, capital, asset/liability management and securities portfolio objectives. With respect to its impaired debt securities at March 31, 2011 and June 30, 2010, management determined that it does not intend to sell and that there is no expected requirement to sell any of its impaired debt securities.

As of March 31, 2011 and June 30, 2010, there were respectively, 58 and 48, securities in an unrealized loss position and were considered to be temporarily impaired and therefore an impairment charge has not been recorded. All of such temporarily impaired investments are debt securities.

-9-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 2. INVESTMENT SECURITIES - continued

At March 31, 2011, 53 U.S. Government and agency securities and municipal obligations had unrealized losses with aggregate depreciation of less than 4.78% from the Company's amortized cost basis of these securities. We believe these unrealized losses are principally due to interest rate movements and recent credit concerns in the municipal bond market. As such, the Company determined that none of such securities had other-than-temporary impairment.

At March 31, 2011, 5 mortgage backed and CMO securities had unrealized losses with aggregate depreciation of less than 5.24% from the Company's cost basis of these securities. We believe these unrealized losses are principally due to the credit market's concerns regarding the stability of the mortgage market and potentially rising interest rates. One of the CMO securities is a non-agency security. At March 31, 2011 the fair value of this non-agency security totaled \$401,000 with an unrealized loss of \$71,000, or 15.04% of the Company's amortized cost basis. Management considers available evidence to assess whether it is more likely than not that all amounts due would not be collected. In such assessment, management considers the severity and duration of the impairment, the credit ratings of the security, the overall deal and payment structure, including the Company's position within the structure, underlying obligor, financial condition and near term prospects of the issuer, delinquencies, defaults, loss severities, recoveries, prepayments, cumulative loss projections, discounted cash flows and fair value estimates. There has been no disruption of the scheduled cash flows on any of the securities. Management's analysis as of March 31, 2011 revealed no expected credit losses on these securities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 3. LOANS RECEIVABLE

Loans receivable consist of the following:

	March 31, 2011 (Unaudited (In t	2010	
First mortgage loans: Residential mortgage (1-4 family)	\$71,420	\$73,010

Money market	28,582	29,021
Time certificates of deposit	85,675	85,009
Total	\$210,676	\$197,939

NOTE 5. EARNINGS PER SHARE

Basic earnings per share for the nine months ended March 31, 2011 was computed using 3,899,808 weighted average shares outstanding. Basic earnings per share for the nine months ended March 31, 2010 was computed using 4,080,128 weighted average shares outstanding adjusted for the 3.80 to 1.0 exchange ratio in the second-step conversion. Diluted earnings per share was computed using the treasury stock method by adjusting the number of shares outstanding by the shares purchased. The weighted average shares outstanding for the diluted earnings per share calculations was 3,899,808 for the nine months ended March 31, 2011 and 4,646,188 for the nine months ended March 31, 2010 adjusted for the 3.8 to 1.0 exchange ratio in the second-step conversion.

NOTE 6. DIVIDENDS AND STOCK REPURCHASE PROGRAM

For the fiscal year Eagle has paid dividends of \$0.07 per share on August 27, 2010, November 26, 2010, and February 25, 2011. A dividend of \$0.07 per share was declared on April 21, 2011, payable May 27, 2011 to stockholders of record on May 6, 2011.

On April 26, 2011, the Company announced that its Board of Directors authorized a common stock repurchase program for 204,156 shares of common stock, effective April 27, 2011. The program is intended to be implemented through purchases made from time to time in the open market or through private transactions. The program will terminate on April 19, 2012.

On April 21, 2011, the Company entered into a pre-arranged Rule 10b5-1 written trading plan ("the Trading Plan") with a broker to facilitate the repurchase of its shares of common stock, in conformity with the provisions of Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. A broker selected by the Company will have the authority under the terms and limitations specified in the Trading Plan to repurchase shares on the Company's behalf in accordance with the terms of the Trading Plan. The Trading Plan, which will facilitate the Company's share repurchase program, went into effect on April 27, 2011 and may be terminated by the Company at any time. The Trading Plan enables the Company to continue to repurchase shares without suspension for self-imposed trading blackout periods. The shares to be repurchased under the Trading Plan would be in accordance with and subject to the limitations of the stock repurchase program.

-15-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

After the expiration of the current Trading Plan, the Company may from time to time enter into subsequent trading plans under Rule 10b5-1 to facilitate the repurchase of its common stock pursuant to its share repurchase program. Information regarding share repurchases will be available in the Company's periodic reports on Form 10-Q and 10-K filed with the Securities and Exchange Commission as required by the applicable rules of the Exchange Act.

-16-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 7. FAIR VALUE DISCLOSURES

Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. FASB ASC 825 allows the Company to elect to apply fair value accounting for designated instruments to improve financial reporting and mitigate volatility in reported earnings. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

FASB ASC 820 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, FASB ASC 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs - Significant unobservable inputs that reflect an entity's own assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value.

While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Investment Securities Available for Sale – Securities classified as available for sale are reported at fair value utilizing Level 1 and Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayments speeds, credit information and the bond's terms and conditions, among other things.

-17-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 7. FAIR VALUE DISCLOSURES - continued

Loan Subject to Fair Value Hedge – The Company has one loan that is carried at fair value subject to a fair value hedge. Fair value is determined utilizing valuation models that consider the scheduled cash flows through anticipated maturity and is considered a Level 3 input.

Loans Held for Sale – These loans are reported at the lower of cost or fair value. Fair value is determined based on expected proceeds based on sales contracts and commitments and are considered Level 2 inputs.

Impaired Loans – Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on internally customized discounting criteria.

Repossessed Assets – Real Estate and other assets acquired in the settlement of loans are reported at fair value less estimated costs to dispose of the property using Level 2 inputs. The fair values are determined by appraisals using valuation techniques consistent with the market approach using recent sales of comparable properties. In cases where such inputs are unobservable, the balance is reflected within the Level 3 hierarchy.

Derivative financial instruments – Fair values for interest rate swap agreements are based upon the amounts required to settle the contracts. These instruments are valued using Level 3 inputs utilizing valuation models that consider: (a) time value, (b) volatility factors and (c) current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Although the Company utilizes counterparties' valuations to assess the reasonableness of its prices and valuation techniques, there is not sufficient corroborating market evidence to support classifying these assets and liabilities as Level 2.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of March 31, 2011, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1 Inputs	_	Level 2 Inputs	thousa	Level 3 Inputs		7	Total Fair Value	
Financial Assets:			()				
Investment securities									
available-for-sale	\$ -	\$	101,702	\$	-		\$	101,702	
Loan subject to fair value hedge	-		-		10,470			10,470	
Loans held-for-sale	-		926		-			926	
Financial Liabilities:									
Derivative	-		-		(969)		(969)

The following table presents, for the nine months ended March 31, 2011, the changes in Level 3 assets and liabilities that are measured at fair value on a recurring basis.

Financial Assets:	Balance as of July 1, 2010	Total Realized/ Unrealized Gains (Losses) Included in Noninterest Income (In the	Purchases, Sales, Issuances, and Settlements, net housands)	Balance as of March 31, 2011

Financial Liabilities:				
Derivative	-	969	-	969

-18-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 7. FAIR VALUE DISCLOSURES - continued

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table summarizes financial assets and nonfinancial liabilities measured at fair value on a nonrecurring basis as of March 31, 2011, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1 Inputs (In thousands)	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Impaired loans	\$ -	\$ -	\$ 892	\$ 892
Repossessed assets	_	_	1,321	1,321

As of March 31, 2011, certain impaired loans were remeasured and reported at fair value through a specific valuation allowance with allocation of the allowance for loan losses based upon the fair value of the underlying collateral. Impaired loans with a carrying value of \$1,709,000 were reduced by specific valuation allowance allocations totaling \$817,000 to a total reported fair value of \$892,000 based on collateral valuations utilizing Level 3 valuation inputs.

Repossessed assets are recorded at market value less estimated cost to sell, and are measured for impairment by comparing the carrying value with the current fair value of the assets. Repossessed assets with a carrying amount of \$1,371,000 were reduced by valuation adjustments of \$50,000 to a total reported fair value of \$1,321,000 base on collateral valuations utilizing Level 3 valuation inputs as of March 31, 2011.

Those financial instruments not subject to the initial implementation of FASB ASC 820 are required under FASB ASC 825 to have their fair value disclosed, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. Below is a table that summarizes the fair market values of all financial instruments of the Company at March 31, 2011, and June 30, 2010, followed by methods and assumptions that were used by the Company in estimating the fair value of the classes of financial instruments not covered by FASB ASC 820.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

borrowings	62,946	65,558	67,224	70,952	
Subordinated debentures	5,155	3,739	5,155	3,872	

The following methods and assumptions were used by the Company in estimating the fair value of the following classes of financial instruments.

Cash and interest-bearing accounts – The carrying amounts approximate fair value due to the relatively short period of time between the origination of these instruments and their expected realization.

Securities held-to-maturity – For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U. S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayments speeds, credit information and the bond's terms and conditions, among other things.

Stock in the FHLB – The fair value of stock in the FHLB approximates redemption value.

Loans receivable – Fair values are estimated by stratifying the loan portfolio into groups of loans with similar financial characteristics. Loans are segregated by type such as real estate, commercial, and consumer, with each category further segmented into fixed and adjustable rate interest terms.

For mortgage loans, the Company uses the secondary market rates in effect for loans that have similar characteristics. The fair value of other fixed rate loans is calculated by discounting scheduled cash flows through the anticipated maturities adjusted for prepayment estimates. Adjustable interest rate loans are assumed to approximate

fair value because they generally reprice within the short term.

Fair values are adjusted for credit risk based on assessment of risk identified with specific loans, and risk adjustments on the remaining portfolio based on credit loss experience.

Assumptions regarding credit risk are determined based on management's judgment using specific borrower information, internal credit quality analysis, and historical information on segmented loan categories for non-specific borrowers.

Mortgage Servicing Rights – Fair values are estimated by stratifying the mortgage servicing portfolio into groups of loans with similar financial characteristics, such as loan type, interest rate, and expected maturity. The Company obtains market survey data estimates and bid quotations from secondary market investors who regularly purchase mortgage servicing rights. Assumptions regarding loan payoffs are determined using historical information on segmented loan categories for nonspecific borrowers.

-20-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 7. FAIR VALUE DISCLOSURES - continued

Cash surrender value of life insurance – The carrying amount for cash surrender value of life insurance approximates fair value as policies are recorded at redemption value.

Deposits and time certificates of deposit – The fair value of deposits with no stated maturity, such as checking, passbook, and money market, is equal to the amount payable on demand. The fair value of time certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar maturities.

Federal Funds purchased – The carrying amounts approximate fair value due to the relatively short period of time between the origination of these instruments and their expected realization.

Advances from the FHLB & Subordinated Debentures – The fair value of the Company's advances and debentures are estimated using discounted cash flow analysis based on the interest rate that would be effective March 31, 2011 and June 30, 2010, respectively if the borrowings repriced according to their stated terms.

NOTE 8. DERIVATIVES AND HEDGING ACTIVITIES

The Company is exposed to certain risks relating to its ongoing business operations. The primary risk managed by using derivative instruments is interest rate risk. The Company entered into an interest rate swap agreement on August 27, 2010 with a third party to manage interest rate risk associated with a fixed-rate loan. The interest rate swap agreement effectively converted the loan's fixed rate into a variable rate. The derivatives and hedging accounting guidance (FASB ASC 815-10) requires that the Company recognize all derivative instruments as either assets or liabilities at fair value in the statement of financial position. In accordance with this guidance, the Company designates the interest rate swap on this fixed-rate loan as a fair value hedge.

The Company is exposed to credit-related losses in the event of nonperformance by the counterparties to this agreement. The Company controls the credit risk of its financial contracts through credit approvals, limits and monitoring procedures, and does not expect any counterparties to fail their obligations. The Company deals only with primary dealers.

If certain hedging criteria specified in derivatives and hedging accounting guidance are met, including testing for hedge effectiveness, hedge accounting may be applied. The hedge effectiveness assessment methodologies for similar hedges are performed in a similar manner and are used consistently throughout the hedging relationships.

The hedge documentation specifies the terms of the hedged item and the interest rate swap. The documentation also indicates that the derivative is hedging a fixed-rate item, that the hedge exposure is to the changes in the fair value of the hedged item, and that the strategy is to eliminate fair value variability by converting fixed-rate interest payments to variable-rate interest payments.

For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current earnings. The Company includes the gain or loss on the hedged items in the same line item—noninterest income—as the offsetting loss or gain on the related interest rate swap.

The fixed rate loan hedged has an original maturity of 20 years and is not callable. This loan is hedged with a "pay fixed rate, receive variable rate" swap with a similar notional amount, maturity, and fixed rate coupons. The swap is not callable. At March 31, 2011, the loan had an outstanding principal balance of \$11,934,000, and the interest rate swap had a notional value of \$11,934,000.

NOTE 9. RECENTLY ISSUED PRONOUNCEMENTS

GAAP Codification – On July 1, 2009, the FASB's GAAP Codification became effective as the sole authoritative source of GAAP. This codification reorganizes current GAAP for non-governmental entities into a topical index to facilitate accounting research and to provide users additional assurance that they have referenced all related literature pertaining to a given topic. Existing GAAP prior to the Codification was not altered in the compilation of the GAAP Codification. The GAAP Codification encompasses all FASB Statements of Financial Accounting Standards, Emerging Issues Task Force statements, FASB Staff Positions, FASB Interpretations, FASB Derivative Implementation Guides, American Institute of Certified Public Accountants Statement of Positions, Accounting Principles Board Opinions and Accounting Research Bulletins along with the remaining body of GAAP effective as of June 30, 2009. Financial Statements issued for all interim and annual periods ending after September 15, 2009, will

need to reference accounting guidance embodied in the Codification as opposed to referencing the previously authoritative pronouncements.

On November 14, 2008, the Securities and Exchange Commission ("SEC") issued its long-anticipated proposed International Financial Reporting Standards ("IFRS") roadmap outlining milestones that, if achieved, could lead to mandatory transition to IFRS for U.S. domestic registrants starting in 2014. IFRS is a comprehensive series of accounting standards published by the International Accounting Standards Board (IASB). Under the proposed roadmap, the Company could be required through its parent company to prepare financial statements in accordance with IFRS, and the SEC will make a determination in 2011 regarding the mandatory adoption of IFRS for U.S. domestic registrants. Management is currently assessing the impact that this potential change would have on the Company's consolidated financial statements, and will continue to monitor the development of the potential implementation of IFRS.

In April 2009, the FASB issued new guidance impacting ASC Topic 820, Fair Value Measurements and Disclosures. This ASC provides additional guidance in determining fair values when there is no active market or where the price inputs being used represent distressed sales. It reaffirms the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. The adoption of this new guidance did not have a material effect on Company's results of operations or financial position.

-22-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 9. RECENTLY ISSUED PRONOUNCEMENTS - continued

In April 2009, the FASB issued new guidance impacting ASC 825-10-50, Financial Instruments, which relates to fair value disclosures for any financial instruments that are not currently reflected on the balance sheet of companies at fair value. This guidance amended existing GAAP to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This guidance is effective for interim and annual periods ending after June 15, 2009. The Company has presented the necessary disclosures in Note 7 to the financial statements.

In June 2009, the FASB issued new authoritative accounting guidance under ASC Topic 810, Consolidation, which amends prior guidance to change how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. The new authoritative accounting guidance requires additional disclosures about the reporting entity's involvement with variable-interest entities and any significant changes in risk exposure due to that involvement as well as its affect on the entity's financial statements. The new authoritative accounting guidance under ASC Topic 810 will be effective January 1, 2010. The adoption of the guidance did not have a material effect on the Company's consolidated financial position or results of operations.

In June 2009, the FASB issued ASC 860, Transfers and Servicing, to improve the information included in an entity's financial statements about a transfer of financial assets and the effects of a transfer on its financial position, financial performance and cash flows. The guidance eliminates the exceptions for qualifying special-purpose entities from the consolidation guidance and the exception that permitted sale accounting for certain mortgage securitizations when a transferor has not surrendered control over the transferred financial assets. In addition, the amendments require enhanced disclosures about the risks that a transferor continues to be exposed to because of its continuing involvement in transferred financial assets. The guidance is effective for the first reporting period (including interim periods) that begins after November 15, 2009. The adoption of the guidance did not have a material effect on the Company's consolidated financial position or results of operations.

In August 2009, the FASB issued ASU No. 2009-05, Fair Value Measurements and Disclosures (Topic 820) - Measuring Liabilities at Fair Value. This ASU provides amendments for fair value measurements of liabilities. It provides clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, a reporting entity is required to measure fair value using one or more techniques. ASU 2009-05 also clarifies that when estimating a fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. ASU 2009-05 is effective for the first reporting period (including interim periods) beginning after issuance or fourth quarter 2009. The adoption of the guidance did not have a material effect on the Company's consolidated financial position or results of operations.

In July 2010, the FASB issued Accounting Standards Update (ASU) 2010-20, "Disclosures About the Credit Quality of Financing Receivables and the Allowance for Credit Losses." The purpose of this Update is to improve transparency by companies that hold financing receivables, including loans, leases and other long-term receivables. The Update requires such companies to disclose more information about the credit quality of their financing receivables and the

credit reserves against them. For public entities, this guidance is effective for the first interim or annual reporting period ending after December 15, 2010, with the exception of certain disclosures which include information for activity that occurs during a reporting period (activity in the allowance for credit losses and modifications of financing receivables) which will be effective for the first interim or annual period beginning after December 15, 2010. The Company has presented the necessary disclosures in Note 3 to the financial statements.

The FASB issued new authoritative accounting guidance under ASC Topic 855, Subsequent Events, which established general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. This guidance sets forth (i) the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements and (iii) the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. This new guidance was effective for the period ended December 31, 2010 and did not have a significant impact on the Company's consolidated financial statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Note Regarding Forward-Looking Statements

This report includes "forward-looking statements" within the meaning and protections of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. All statements other than statements of historical fact are statements that could be forward-looking statements. You can identify these forward-looking statements through our use of words such as "may," "will," "anticipate," "assume," "should," "indicate," "would," "believe," "contemplate," "expect," "estimate," "contin "could," "intend," "target" and other similar words and expressions of the future. These forward-looking statements include, but are not limited to:

statements of our goals, intentions and expectations; statements regarding our business plans, prospects, growth and operating strategies; statements regarding the asset quality of our loan and investment portfolios; and estimates of our risks and future costs and benefits.

These forward-looking statements are based on current beliefs and expectations of our management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change.

The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements:

changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;

general economic conditions, either nationally or in our market areas, that are worse than expected;

competition among depository and other financial institutions;

changes in the prices, values and sales volume of residential and commercial real estate in Montana;

inflation and changes in the interest rate environment that reduce our margins or reduce the fair value of financial instruments;

changes in the securities markets;

our ability to enter new markets successfully and capitalize on growth opportunities;

our ability to successfully integrate acquired entities, if any;

changes in consumer spending, borrowing and savings habits;

changes in our organization's compensation and benefit plans;

our ability to continue to increase and manage our commercial and residential real estate, multi-family, and commercial business loans;

possible impairments of securities held by us, including those issued by government entities and government sponsored enterprises;

the level of future deposit premium assessments;

the impact of the current recession on our loan portfolio (including cash flow and collateral values), investment portfolio, customers and capital market activities;

the impact of recently enacted legislation to restructure the U.S. financial and regulatory system, including proposals to reform the housing markets and government-sponsored enterprises serving such markets;

the failure of assumptions underlying the establishment of allowance for possible loan losses and other estimates; changes in the financial performance and/or condition of our borrowers and their ability to repay their loans when due; and

the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Securities and Exchange Commission, the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements. For a further list and description of various risks, relevant factors and uncertainties that could cause future results or events to differ materially from those expressed or implied in our forward-looking statements, see the Item 1A, "Risk Factors" and Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections contained elsewhere in this report, as well as our Annual Report on Form 10-K for the fiscal year ended June 30, 2010, any subsequent Reports on Form 10-Q and Form 8-K, and other filings with the SEC. We do not undertake any obligation to publicly update or correct any forward-looking statements to reflect events or circumstances that subsequently occur, or of which we hereafter become aware.

-24-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

The Company's primary activity is its ownership of its wholly owned subsidiary, American Federal Savings Bank (the "Bank"). The Bank is a federally chartered savings bank, engaging in typical banking activities: acquiring deposits from local markets and investing in loans and investment securities. The Company, as a unitary thrift holding company, and the Bank, as a federally chartered savings bank currently operate under a consolidated regulatory regime in which the Office of Thrift Supervision (the "OTS"), has served as the principal federal regulator for both entities. Recent federal legislation mandated that the consolidated regulatory functions of the OTS be transferred to two federal agencies and that the OTS be merged into the Office of the Comptroller of the Currency (the "OCC"). Thus, as a result of the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") and effective July 21, 2011, the Federal Reserve Board (the "FRB") will become the principal federal bank regulatory agency for the Company and the OCC the principal federal regulator for the Bank. The Bank's charter will not be affected and the Bank will continue to operate, as a federal stock savings bank. Its deposits will remain insured by the Federal Deposit Insurance Corporation. Because the Dodd-Frank Act did not eliminate the thrift charter under which the Bank has historically operated, the Bank's traditional lending and investment activities should not be affected. Further, to ensure regulatory continuity, the Dodd-Frank Act requires that the OCC designate a new Deputy Comptroller who will be responsible for the supervision and examination of federal savings associations.

The Bank's primary component of earnings is its net interest margin (also called spread or margin), the difference between interest income and interest expense. The net interest margin is managed by management (through the pricing of its products and by the types of products offered and kept in portfolio), and is affected by moves in interest rates. Noninterest income in the form of fee income and gain on sale of loans adds to the Bank's income.

The Bank has a strong mortgage lending focus, with the majority of its loans in single-family residential mortgages. This has led to successfully marketing home equity loans to its customers, as well as a wide range of shorter term consumer loans for various personal needs (automobiles, recreational vehicles, etc.). In recent years the Bank has focused on adding commercial loans to its portfolio, both real estate and non-real estate. The purpose of this diversification is to mitigate the Bank's dependence on the mortgage market, as well as to improve its ability to manage its spread. The Bank's management recognizes the need for sources of fee income to complement its margin, and the Bank now maintains a significant loan serviced portfolio, which provides a steady source of fee income. The gain on sale of loans also provides significant fee income in periods of high mortgage loan origination volumes. Fee income is also supplemented with fees generated from the Bank's deposit accounts. The Bank has a high percentage of non-maturity deposits, such as checking accounts and savings accounts, which allows management flexibility in managing its spread. Non-maturity deposits do not automatically reprice as interest rates rise, as do certificates of deposit.

For the past several years, management's focus has been on improving the Bank's core earnings. Core earnings can be described as income before taxes, with the exclusion of gain on sale of loans and adjustments to the market value of the Bank's loan serviced portfolio. Management believes that the Bank will need to continue to focus on increasing net interest margin, other areas of fee income, and control operating expenses to achieve earnings growth going forward. Management's strategy of growing the bank's loan portfolio and deposit base is expected to help achieve these goals as follows: loans typically earn higher rates of return than investments; a larger deposit base will yield higher fee income; increasing the asset base will reduce the relative impact of fixed operating costs. The biggest

challenge to the strategy is funding the growth of the Bank's balance sheet in an efficient manner. Deposit growth will be difficult to maintain due to fierce competition and wholesale funding (which is usually more expensive than retail deposits) will likely be needed to supplement it.

The level and movement of interest rates impacts the Bank's earnings as well. The Federal Reserve's Federal Open Market Committee ("FOMC") did not change the federal funds target rate which remained at 0.25% during the nine months ended March 31, 2011.

Financial Condition

Comparisons of financial condition in this section are between March 31, 2011 and June 30, 2010.

Total assets at March 31, 2011 were \$334.60 million, an increase of \$8.86 million, or 2.72%, from \$325.74 million at June 30, 2010. This increase in assets was primarily attributable to an increase in commercial real estate loans.

-25-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Financial Condition - continued

Loans receivable increased \$16.36 million, or 9.65%, to \$185.87 million at March 31, 2011, from \$169.50 million at June 30, 2010. Commercial real estate loans was the loan category with the largest increase, \$21.95 million. This increase was primarily from the origination of two relatively large loans, a \$12.1 million commercial real estate loan secured by a detention facility, and a \$10.0 million commercial real estate loan secured by a hotel. The detention facility loan is supported by a 90% guarantee from the USDA Rural Development. The hotel loan has a 70% USDA Rural Development guarantee. The presence of USDA Rural Development loan guarantees provides certain regulatory benefits for such loans including an exemption of the guaranteed portions from loan to one borrower limitations and a lower risk weighted capital requirements. The detention facility loan has a term of 20 years and is fully amortizing and has been converted from a fixed to variable rate tied to one month LIBOR using an interest rate swap with a third party. The hotel loan has a term of 25 years and is fully amortizing. Its rate is adjustable every five years.

Both home equity and consumer loans decreased moderately, while construction loans decreased by \$2.22 million. The decrease in construction loans was primarily due to the conversion of the detention facility loan to permanent financing. Total loan originations were \$162.27 million for the nine months ended March 31, 2011, with single family mortgages accounting for \$102.50 million of the total. Home equity and construction loan originations totaled \$8.39 million and \$5.72 million, respectively, for the same period. Commercial real estate and land loan originations totaled \$35.8 million. Loans held-for-sale decreased to \$926,000 at March 31, 2011 from \$7.70 million at June 30, 2010.

Total cash and cash equivalents increased by \$10.56 million, and securities available-for-sale decreased \$12.83 million.

Deposits increased \$12.74 million, or 6.4%, to \$210.68 million at March 31, 2011 from \$197.94 million at June 30, 2010. Growth occurred in both checking and savings accounts. Management attributes the increase in these deposits to increased marketing of checking accounts as well as customers' preference for placing funds in secure, federally insured accounts.

Advances from the Federal Home Loan Bank and other borrowings decreased \$4.28 million, or 6.36%, to \$62.95 million from \$67.22 million as a result of continued growth in deposits.

Total shareholders' equity increased \$518,000 or 0.99%, to \$52.95 million at March 31, 2011 from \$52.43 million at June 30, 2010. This was a result of net income for the period of \$1.93 million offset by a decrease in accumulated other comprehensive income of \$676,000 (mainly due to a decrease in net unrealized gains on securities available-for-sale). The increase was also partially offset by dividends paid for the period.

Results of Operations for the Three Months Ended March 31, 2011 and 2010

Net Income. Eagle's net income was \$408,000 versus \$479,000 for the three months ended March 31, 2011 and 2010, respectively. The decrease of \$71,000, or 14.8%, was due to increases in noninterest expense of \$609,000 and loan loss provision of \$62,000, offset by increases in net interest income of \$329,000, and noninterest income of

\$223,000. Eagle's tax provision was \$48,000 lower in the current quarter. Basic earnings per share were \$0.10 for the current period, compared to \$0.12 for the previous year's period.

Net Interest Income. Net interest income increased to \$2.80 million for the quarter ended March 31, 2011, from \$2.47 million for the previous year's quarter. This increase of \$329,000 was the result of a decrease in interest expense of \$242,000 in addition to an increase in interest and dividend income of \$87,000.

-26-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations for the Three Months Ended March 31, 2011 and 2010 - continued

Interest and Dividend Income. Total interest and dividend income was \$3.77 million for the quarter ended March 31, 2011, compared to \$3.69 million for the quarter ended March 31, 2010, an increase of \$87,000, or 2.36%. Interest and fees on loans increased to \$2.88 million for the three months ended March 31, 2011 from \$2.72 million for the same period ended March 31, 2010. This increase of \$158,000, or 5.81%, was due primarily to the increase in the average balances on loans for the quarter ended March 31, 2011. Average balances for loans receivable, net, for the quarter ended March 31, 2011 were \$188.85 million, compared to \$172.50 million for the previous year. This represents an increase of \$16.35 million, or 9.48%. The average interest rate earned on loans receivable decreased by 21 basis points, from 6.30% to 6.09%. Interest and dividends on investment securities available-for-sale (AFS) decreased to \$890,000 for the quarter ended March 31, 2011 from \$958,000 for the same quarter last year. Average balances on investments increased to \$103.37 million for the quarter ended March 31, 2011, compared to \$92.87 million for the quarter ended March 31, 2010. The average interest rate earned on investments decreased to 3.44% from 4.13%. Interest on deposits with banks decreased to \$6,000 from \$7,000, due to a decrease in the average interest rate earned. Average balances on deposits with banks increased to \$7.48 million for the quarter ended March 31, 2011, compared to \$6.70 million for the quarter ended March 31, 2010. The average rates on deposit with banks decreased from 0.42% at March 31, 2010 to 0.32% at March 31, 2011.

Interest Expense. Total interest expense declined significantly in the quarter to \$974,000 from \$1.22 million for the quarter ended March 31, 2010, a decrease of \$242,000, or 19.90%. The decrease was attributable to decreases in interest on deposits and borrowings offset by increases in average deposit balances and borrowings. Decreases in rates on deposits caused a decline in deposit interest of \$160,000, or 32.92% over the quarter ended March 31, 2010. The decrease was attributable to a decrease in average rates paid on numerous deposit accounts. For example, interest bearing checking account rates declined from 0.19% to 0.06%, and money market accounts decreased from 0.32% to 0.13%. This decline was offset to a degree by increases in average balances and borrowing during the period. Average balances in interest-bearing deposit accounts increased to \$186.95 million for the quarter ended March 31, 2011, compared to \$183.27 million for the same quarter in the previous year. Though the average balance of borrowings increased, a decrease in the average rate paid, resulted in a decrease in interest paid on borrowings to \$648,000 for the quarter ended March 31, 2011 versus \$730,000 paid in the previous year's quarter. The average rate paid on borrowings decreased from 4.20% last year to 3.63% this year and the average rate paid on liabilities decreased 41 basis points from the quarter ended March 31, 2010 to the quarter ended March 31, 2011.

Provision for Loan Losses. Provisions for loan losses are charged to earnings to maintain the total allowance for loan losses at a level considered adequate by Eagle's subsidiary, American Federal Savings Bank, to provide for probable loan losses based on prior loss experience, volume and type of lending conducted by the Bank, national and local economic conditions, and past due loans in portfolio. The Bank's policies require a review of assets on a quarterly basis. The Bank classifies loans as well as other assets if warranted. While the Bank believes it uses the best information available to make a determination with respect to the allowance for loan losses, it recognizes that future adjustments may be necessary. The Bank recorded \$276,000 in provision for loan losses for the quarter ended March 31, 2011 and \$214,000 in the quarter ended March 31, 2010. This increase was based on an analysis of a variety of factors. Loan portfolio growth was the primary factor. Total nonperforming loans increased from \$1.85 million at March 31, 2010 to \$2.33 million at March 31, 2011. The Bank currently has \$1.37 million in foreclosed real estate property and other repossessed property with a net book value of \$1.32 million.

Noninterest Income. Due to significant declines in long term interest rates, the Bank experienced significant refinancing activity in residential real estate. This increased activity caused total noninterest income to increase to \$944,000 for the quarter ended March 31, 2011, from \$721,000 for the quarter ended March 31, 2010, an increase of \$223,000 or 30.93%. Of this amount net gain on sale of loans increased to \$333,000 for the quarter ended March 31, 2011 from \$190,000 for the quarter ended March 31, 2010. During this period, \$17.38 million 1-4 family mortgage loans were originated compared to \$15.74 million in the quarter ended March 31, 2010. In addition, \$20.87 million of mortgage loans were sold during the period compared to \$11.12 million sold in the quarter ended March 31, 2010. Also, other income increased \$67,000 from the prior year which was largely due to the increase in the fair value of the interest rate swap described earlier.

Noninterest Expense. Noninterest expense increased by \$609,000 or 27.02% to \$2.86 million for the quarter ended March 31, 2011, from \$2.25 million for the quarter ended March 31, 2010. This increase was primarily due to increases in the amortization of the mortgage servicing rights of \$232,000 which were due to the increase in the refinance activity that caused the increase in net gain on sale of loans noted above. Salaries and employee benefits increased by \$135,000 or 11.37%. This increase was due to merit raises and inflationary increases in costs associated with employees. Also, the Bank had a slightly larger staff period over period. Other expense categories showed minor changes.

Income Tax Expense. Eagle's income tax expense was \$196,000 for the quarter ended March 31, 2011, compared to \$244,000 for the quarter ended March 31, 2010. The effective tax rate for the quarter ended March 31, 2011 was 32.5% and was 33.7% for the quarter ended March 31, 2010.

-27-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations for the Nine Months Ended March 31, 2011 and 2010

Net Income. Eagle's net income was \$1.93 million and \$1.88 million for the nine months ended March 31, 2011 and 2010, respectively. The increase of \$51,000, or 2.72%, was due to increases in net interest income of \$802,000 and noninterest income of \$1.06 million, offset by increases in noninterest expense of \$1.47 million and loan loss provision of \$337,000. Eagle's tax provision was \$4,000 higher in the current period. Basic earnings per share were \$0.49 for the current period, compared to \$0.46 (adjusted for the 3.8000 to 1.000 exchange ratio in the second-step conversion) for the previous year's period.

Net Interest Income. Net interest income increased to \$8.10 million for the nine months ended March 31, 2011, from \$7.30 million for the previous year's period. This increase of \$802,000 was the result of a slight increase in interest and dividend income of \$55,000 aided by a decrease in interest expense of \$747,000.

Interest and Dividend Income. Total interest and dividend income was \$11.26 million for the nine months ended March 31, 2011, compared to \$11.21 million for the nine months ended March 31, 2010, representing an increase of \$55,000, or 0.49%. Interest and fees on loans increased to \$8.49 million for the nine months ended March 31, 2011 from \$8.21 million for the same period ended March 31, 2010. This increase of \$287,000, or 3.50%, was due primarily to the increase in the average balances on loans for the nine months ended March 31, 2011. Average balances for loans receivable, net, for the nine months ended March 31, 2011 were \$184.09 million, compared to \$171.94 million for the previous year. This represents an increase of \$12.16 million, or 7.07%. The average interest rate earned on loans receivable decreased by 21 basis points, from 6.36% to 6.15%. Interest and dividends on investment securities available-for-sale (AFS) decreased to \$2.75 million for the nine months ended March 31, 2011 from \$2.97 million for the same period last year. Average balances on investments increased to \$107.97 million for the nine months ended March 31, 2011, compared to \$91.58 million for the nine months ended March 31, 2010. The average interest rate earned on investments decreased to 3.40% from 4.34%. Interest on deposits with banks decreased to \$15,000 from \$22,000, due to a decrease in average balances. Average balances on deposits with banks decreased to \$5.38 million for the nine months ended March 31, 2010.

Interest Expense. Total interest expense decreased to \$3.16 million for the nine months ended March 31, 2011, from \$3.91 million for the nine months ended March 31, 2010, a decrease of \$747,000, or 19.10%, primarily due to decreases in interest paid on deposits. Interest on deposits decreased to \$1.09 million for the nine months ended March 31, 2011, from \$1.69 million for the nine months ended March 31, 2010. This decrease of \$596,000, or 35.35%, was the result of a 0.47% decrease in average rates paid on deposit accounts. Interest bearing checking accounts decreased in average rates paid from 0.22% to 0.07%, and money market accounts decreased from 0.49% to 0.18%. Average balances in interest-bearing deposit accounts increased to \$184.99 million for the nine months ended March 31, 2011, compared to \$179.77 million for the same period in the previous year. A decrease in the average balance of borrowings, partially aided by a small decrease in the average rate paid, resulted in a decrease in interest paid on borrowings to \$2.07 million versus \$2.22 million paid in the same period ended March 31, 2010. The average rate paid on borrowings decreased from 4.12% last year to 3.96% this year. The average rate paid on liabilities decreased 0.41% from the nine months ended March 31, 2010 to the nine months ended March 31, 2011.

Provision for Loan Losses. Provisions for loan losses are charged to earnings to maintain the total allowance for loan losses at a level considered adequate by the Bank, to provide for probable loan losses based on prior loss experience, volume and type of lending conducted by the Bank, national and local economic conditions, and past due loans in its portfolio. The Bank's policies require a review of assets on a quarterly basis. The Bank classifies loans as well as other assets if warranted. While the Bank believes it uses the best information available to make a determination with respect to the allowance for loan losses, it recognizes that future adjustments may be necessary. The Bank took a \$793,000 provision for loan losses for the nine months ended March 31, 2011 versus \$456,000 in the nine months ended March 31, 2010. This was due to an increase in loan delinquencies and to the weakened local and national economy, along with an increase in the loan portfolio balances. Total real estate and other assets acquired in settlement of loans, net of allowance for losses increased from \$619,000 at June 30, 2010 to \$1.32 million at March 31, 2011.

Noninterest Income. Total noninterest income increased to \$3.78 million for the nine months ended March 31, 2011, from \$2.72 million for the prior year period, an increase of \$1.06 million or 38.82%. This increase is principally due to an increase of \$983,000 in net gain on sale of loans to \$1.96 million for the nine months ended March 31, 2011 from \$979,000 for the nine months ended March 31, 2010.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations for the Nine Months Ended March 31, 2011 and 2010 - continued

Noninterest Expense. Noninterest expense increased by \$1.47 million or 21.43% to \$8.31 million for the nine months ended March 31, 2011, from \$6.84 million for the nine months ended March 31, 2010. This increase was primarily due to increases in amortization of mortgage servicing rights of \$668,000, occupancy costs of \$168,000, and salaries and employee benefits of \$203,000. The increase in salaries and employee benefits expense was due to merit raises, and other inflationary items such as health insurance premiums in addition to a slightly larger staff. The increase in occupancy costs were due to the opening of the Oak Street branch in Bozeman, Montana in October 2009, thereby only operating for 5 and a half months in the previous nine month period ended March 31, 2010. The increase in the amortization of mortgage servicing rights resulted from an increase in refinance activity that occurred during the period compared to the previous period. Other expense categories showed minor changes.

Income Tax Expense. Eagle's income tax expense was \$847,000 for the nine months ended March 31, 2011, compared to \$843,000 for the nine months ended March 31, 2010. The effective tax rate for the nine months ended March 31, 2011 was 30.52% and was 30.99% for the nine months ended March 31, 2010.

Liquidity, Interest Rate Sensitivity and Capital Resources

The Bank is required to maintain minimum levels of liquid assets as defined by the Office of Thrift Supervision ("OTS") regulations. The OTS has eliminated the statutory requirement based upon a percentage of deposits and short-term borrowings. The OTS states that the liquidity requirement is retained for safety and soundness purposes, and that appropriate levels of liquidity will depend upon the types of activities in which the company engages. For internal reporting purposes, the Bank uses policy minimums of 1.0%, and 8.0% for "basic surplus" and "basic surplus with FHLB" as internally defined. In general, the "basic surplus" is a calculation of the ratio of unencumbered short-term assets reduced by estimated percentages of CD maturities and other deposits that may leave the Bank in the next 90 days divided by total assets. "Basic surplus with FHLB" adds to "basic surplus" the additional borrowing capacity the Bank has with the FHLB of Seattle. The Bank exceeded those minimum ratios as of both March 31, 2011 and March 31, 2010.

The Bank's primary sources of funds are deposits, repayment of loans and mortgage-backed and collateralized mortgage obligation securities, maturities of investments, funds provided from operations, and advances from the Federal Home Loan Bank of Seattle and other borrowings. Scheduled repayments of loans and mortgage-backed and collateralized mortgage obligation securities and maturities of investment securities are generally predictable. However, other sources of funds, such as deposit flows and loan prepayments, can be greatly influenced by the general level of interest rates, economic conditions and competition. The Bank uses liquidity resources principally to fund existing and future loan commitments. It also uses them to fund maturing certificates of deposit, demand deposit withdrawals and to invest in other loans and investments, maintain liquidity, and meet operating expenses.

Liquidity may be adversely affected by unexpected deposit outflows, higher interest rates paid by competitors, and similar matters. Management monitors projected liquidity needs and determines the level desirable, based in part on commitments to make loans and management's assessment of the bank's ability to generate funds.

At December 31, 2010 (the most recent report available), the Bank's measure of sensitivity to interest rate movements, as measured by the OTS in a 200 basis point rise in interest rates scenario, decreased to 239 basis points from 258 basis points at December 31, 2010. The Bank is well within the guidelines set forth by the Board of Directors for interest rate risk sensitivity. The Bank's tier I core capital ratio, as measured by the OTS, increased from 9.15% as of March 31, 2010 to 12.86% as of March 31, 2011. The Bank's strong capital position helps to mitigate its interest rate risk exposure.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Liquidity, Interest Rate Sensitivity and Capital Resources - continued

As of March 31, 2011, the Bank's regulatory capital was in excess of all applicable regulatory requirements. At March 31, 2011, the Bank's tangible, core, and risk-based capital ratios amounted to 12.86%, 12.86%, and 19.58%, respectively, compared to regulatory requirements of 1.50%, 3.0%, and 8.0%, respectively. See the following table (amounts in thousands):

	At March 31,	At March 31, 2011		
	(Unau	(Unaudited)		
	Dollar	% of		
	Amount	Assets		
Tangible capital:				
Capital level	\$40,850	12.86		
Requirement	4,766	1.50		
Excess	36,084	11.36		
Core capital:				
Capital level	40,850	12.86		
Requirement	9,532	3.00		
Excess	31,318	9.86		
Risk-based capital:				
Capital level	41,684	19.58		
Requirement	17,033	8.00		
Excess	24,651	11.58		

Impact of Inflation and Changing Prices

Our financial statements and the accompanying notes have been prepared in accordance with generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering the change in the relative purchasing power of money over time and due to inflation. The impact of inflation is reflected in the increased cost of our operations. Interest rates have a greater impact on our performance than do the general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Item 3. Quantitative and Qualitative Disclosures About Market Risk

CONTROLS AND PROCEDURES

Item 4. Controls and Procedures

As of the end of the period covered by this report, we conducted an evaluation under the supervision and with the participation of our management including our Chief Executive Officer ("CEO") and our Chief Financial Officer ("CFO") of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, to ensure that information required to be disclosed by us in the reports filed or submitted by us under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, including to ensure that information required to be disclosed by us in the reports filed or submitted by us under the Exchange Act is accumulated and communicated to management to allow timely decisions regarding required disclosure. Based on that evaluation, our CEO and CFO concluded that as of March 31, 2011, our disclosure controls and procedures were effective. During the last fiscal quarter, there were no changes in the Company's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that have materially affected, or were reasonably likely to materially affect, the Company's internal control over financial reporting.
