ATRION CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) Basis of Presentation

The accompanying unaudited consolidated financial statements of Atrion Corporation and its subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, these statements include all adjustments necessary to present a fair statement of our consolidated results of operations, financial position and cash flows. Operating results for any interim period are not necessarily indicative of the results that may be expected for the full year. Preparation of the Company's financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts in the financial statements and notes. Actual results could differ from those estimates. This Quarterly Report on Form 10-Q should be read in conjunction with the Company's consolidated financial statements and notes included in its Annual Report on Form 10-K for the fiscal year ended December 31, 2011 ("2011 Form 10-K"). References herein to "Atrion," the "Company," "we," "our," and "us" refer to Atrion Corporation and its subsidiaries.

(2) Inventories

Inventories are stated at the lower of cost or market. Cost is determined by using the first-in, first-out method. The following table details the major components of inventories (in thousands):

	March 31, 2012	December 31, 2011
Raw materials	\$ 9,536	\$ 9,074
Work in process	5,746	4,843
Finished goods	10,362	10,665
Total inventories	\$ 25,644	\$ 24,582

(3) Income per share

The following is the computation for basic and diluted income per share:

	Three months ended March 31, 2012	2011
	(in thousands, except per share amounts)	
Net income	\$ 5,377	\$ 6,858
Weighted average basic shares outstanding	2,015	2,016
Add: Effect of dilutive securities	11	14
Weighted average diluted shares outstanding	2,026	2,030
Earnings per share:		
Basic	\$ 2.67	\$ 3.40

Diluted	\$ 2.65	\$ 3.38
---------	---------	---------

ATRION CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Incremental shares from stock options, unvested restricted stock and stock units were included in the calculation of weighted average diluted shares outstanding using the treasury stock method. Dilutive securities representing 26 and 8 shares of common stock for the quarters ended March 31, 2011 and 2012, respectively, were excluded from the computation of weighted average diluted shares outstanding because their effect would have been anti-dilutive.

(4) Investments

As of March 31, 2012, we held certain investments that are required to be measured for disclosure purposes at fair value on a recurring basis. These investments are considered Level 2 investments. We consider as current assets those investments which will mature in the next 12 months. The remaining investments are considered non-current assets. The amortized cost and fair value of our investments that are being accounted for as held-to-maturity securities, and the related gross unrealized gains and losses, were as follows as of March 31, 2012 (in thousands):

	Cost	Gross Unrealized		Fair Value
		Gains	Losses	
Short-term Investments:				
Corporate bonds	\$ 20,164	\$ 182	\$ 1	\$ 20,345
Long-term Investments				
Corporate bonds	\$ 15,347	\$ 113	\$ 48	\$ 15,412

At March 31, 2012, the length of time until maturity of these securities ranged from five to 31 months.

(5) Income Taxes

Our effective tax rate for the first quarter of 2012 was 34.7 percent, compared with 34.2 percent for the first quarter of 2011. The increase in the effective tax rate for the 2012 period is primarily a result of the absence of tax incentives for research and development expenditures in the 2012 period and an increase in state income taxes.

(6) Recent Accounting Pronouncements

From time to time, new accounting standards updates applicable to us are issued by the Financial Accounting Standards Board, or FASB, which we will adopt as of the specified effective date. Unless otherwise discussed, we believe the impact of recently issued standards updates that are not yet effective will not have a material impact on our consolidated financial statements upon adoption.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We develop and manufacture products primarily for medical applications. We market components to other equipment manufacturers for incorporation in their products and sell finished devices to physicians, hospitals, clinics and other treatment centers. Our medical products primarily serve the fluid delivery, cardiovascular, and ophthalmology markets. Our other medical and non-medical products include instrumentation and disposables used in dialysis and valves and inflation devices used in marine and aviation safety products.

Our products are used in a wide variety of applications by numerous customers. We encounter competition in all of our markets and compete primarily on the basis of product quality, price, engineering, customer service and delivery time.

Our strategy is to provide a broad selection of products in the areas of our expertise. Research and development efforts are focused on improving current products and developing highly-engineered products that meet customer needs and have the potential for broad market applications and significant sales. Proposed new products may be subject to regulatory clearance or approval prior to commercialization and the time period for introducing a new product to the marketplace can be unpredictable. We also focus on controlling costs by investing in modern manufacturing technologies and controlling purchasing processes. We have been successful in consistently generating cash from operations and have used that cash to reduce indebtedness, to fund capital expenditures, to repurchase stock and to pay dividends.

Our strategic objective is to further enhance our position in our served markets by:

Focusing on customer needs;
Expanding existing product lines and developing new products;
Maintaining a culture of controlling cost; and
Preserving and fostering a collaborative, entrepreneurial management structure.

For the three months ended March 31, 2012, we reported revenues of \$29.2 million, operating income of \$7.9 million and net income of \$5.4 million, down 4 percent, 21 percent and 22 percent, respectively, from the three months ended March 31, 2011.

Results for the three months ended March 31, 2012

Consolidated net income totaled \$5.4 million, or \$2.67 per basic and \$2.65 per diluted share, in the first quarter of 2012. This is compared with consolidated net income of \$6.9 million, or \$3.40 per basic and \$3.38 per diluted share, in the first quarter of 2011. The income per basic share computations are based on weighted average basic shares outstanding of 2,014,879 in the 2012 period and 2,016,180 in the 2011 period. The income per diluted share computations are based on weighted average diluted shares outstanding of 2,025,849 in the 2012 period and 2,029,585 in the 2011 period.

Consolidated revenues of \$29.2 million for the first quarter of 2012 were 4 percent lower than revenues of \$30.6 million for the first quarter of 2011. This decrease was primarily related to reduced shipments to a large customer with which we have a long-term contract that had accumulated too large of an inventory of one of our products in 2011.

Revenues by product line were as follows (in thousands):

	Three Months Ended March 31,	
	2012	2011
Fluid Delivery	\$ 11,380	\$ 11,727
Cardiovascular	9,310	8,409
Ophthalmology	3,658	5,544
Other	4,891	4,909
Total	\$ 29,239	\$ 30,589

Cost of goods sold of \$15.4 million for the first quarter of 2012 was \$373,000 higher than in the comparable 2011 period. Our cost of goods sold in the first quarter of 2012 was 52.7 percent of revenues compared with 49.2 percent of revenues in the first quarter of 2011. The primary contributors to the increase in our cost of goods sold as a percent of revenue were product mix and lower manufacturing efficiencies due to reduced volumes partially offset by the impact of continued cost improvement initiatives.

Gross profit of \$13.8 million in the first quarter of 2012 was \$1.7 million, or 11 percent, lower than in the comparable 2011 period. Our gross profit percentage in the first quarter of 2012 was 47.3 percent of revenues compared with 50.8 percent of revenues in the first quarter of 2011. The decrease in gross profit percentage in the 2012 period compared to the 2011 period was primarily related to product mix and lower manufacturing efficiencies partially offset by continued cost improvements.

Our first quarter 2012 operating expenses of \$5.9 million were \$430,000 higher than the operating expenses for the first quarter of 2011. This increase was comprised of a \$397,000 increase in Research and Development, or R&D, expenses and an \$86,000 increase in General and Administrative, or G&A, expenses partially offset by a \$53,000 decrease in Selling expenses. The increase in R&D costs was primarily related to increased compensation, supplies and outside services. The increase in G&A expenses for the first quarter of 2012 was principally attributable to increased benefits and increased outside services partially offset by decreased compensation. The decrease in Selling expenses for the first quarter of 2012 was primarily related to reduced travel, outside services and other miscellaneous expenses.

Operating income in the first quarter of 2012 decreased \$2.2 million to \$7.9 million, a 21 percent decrease from operating income in the quarter ended March 31, 2011. Operating income was 27 percent of revenues in the first quarter of 2012 compared to 33 percent of revenues in the first quarter of 2011. The major contributor to the decrease in operating income for the first quarter of 2012 was the previously mentioned decrease in shipments. We expect that our customer's inventory correction will taper off as the year progresses, with full year 2012 showing an overall decline in operating income of approximately 10% as compared to 2011.

Income tax expense for the first quarter of 2012 was \$2.9 million compared to income tax expense of \$3.6 million for the same period in the prior year. The effective tax rate for the first quarter of 2012 was 34.7 percent, compared with 34.2 percent for the first quarter of 2011. The increase in the effective tax rate for the 2012 period was primarily a result of the absence of tax incentives for research and development expenditures in the 2012 period and an increase in state income taxes. We expect the effective tax rate for the remainder of 2012 to be within a range of 34.0 to 35.0 percent.

Liquidity and Capital Resources

We have a \$40.0 million revolving credit facility with a money center bank that can be utilized for the funding of operations and for major capital projects or acquisitions, subject to certain limitations and restrictions. Borrowings under the credit facility bear interest that is payable monthly at 30-day, 60-day or 90-day LIBOR, as selected by us, plus one percent. From time to time prior to October 1, 2016 and assuming an event of default is not then existing, we can convert outstanding advances under the revolving line of credit to term loans with a term of up to two years. We had no outstanding borrowings under our credit facility at March 31, 2012 or at December 31, 2011. The credit facility contains various restrictive covenants, none of which is expected to impact our liquidity or capital resources. At March 31, 2012, we were in compliance with all financial covenants. We believe that the bank providing the credit facility is highly-rated and that the entire \$40.0 million under the credit facility is currently available to us. If that bank were unable to provide such funds, we believe that such inability would not impact our ability to fund operations.

At March 31, 2012, we had a total of \$54.5 million in cash and cash equivalents, short-term investments and long-term investments, a decrease of \$800,000 from December 31, 2011. The principal contributor to this decrease was the purchase of treasury stock.

Cash flows from operating activities generated \$5.0 million for the three months ended March 31, 2012 as compared to \$7.4 million for the three months ended March 31, 2011. The decrease in the 2012 period was primarily attributable to decreased operational results as compared to the 2011 period and increased cash requirements for working capital items, specifically accounts payable and accrued liabilities for the 2012 period. During the first quarter of 2012, we expended \$2.8 million for the addition of property and equipment, \$9.0 million for investments, \$2.0 million for treasury stock and \$985,000 for dividends. During that same period, maturities of investments generated \$4.0 million.

At March 31, 2012, we had working capital of \$70.2 million, including \$18.9 million in cash and cash equivalents and \$20.2 million in short-term investments. The \$3.5 million decrease in working capital during the first quarter of 2012 was primarily related to decreases in cash and cash equivalents and prepaid expenses partially offset by decreases in accounts payable and accrued liabilities and increases to accounts receivable and inventories. The net decrease in cash and short-term investments was primarily related to reductions in accounts payable and accrued liabilities and purchases of treasury stock. The decrease in prepaid expenses is related to prepaid taxes applied to current year tax liabilities

We believe that our \$54.5 million in cash, cash equivalents, short-term investments and long-term investments, along with cash flows from operations and available borrowings of up to \$40.0 million under our credit facility will be sufficient to fund our cash requirements for at least the foreseeable future. We believe that our strong financial position would allow us to access equity or debt financing should that be necessary and our capital resources should not be materially impacted by the current economic environment. Additionally, we believe that our cash and cash equivalents, short-term investments and long-term investments, as a whole, will continue to increase during the remainder of 2012.

Forward-Looking Statements

Statements in this Management's Discussion and Analysis and elsewhere in this Quarterly Report on Form 10-Q that are forward-looking are based upon current expectations, and actual results or future events may differ materially. Therefore, the inclusion of such forward-looking information should not be regarded as a representation by us that our objectives or plans will be achieved. Such statements include, but are not limited to, our operating income for 2012, our effective tax rate for the remainder of 2012, our ability to fund our cash requirements for the foreseeable future with our current assets, long-term investments, cash flow and borrowings under the credit facility, the impact that the inability of the bank providing the credit facility to provide funds thereunder would have on our ability to fund operations, our access to equity and debt financing, the impact of the current economic environment on our capital resources and the increase in cash, cash equivalents, and investments in the remainder of 2012. Words such as "expects," "believes," "anticipates," "intends," "should," "plans," and variations of such words and similar expressions are intended to identify such forward-looking statements. Forward-looking statements contained herein involve numerous risks and uncertainties, and there are a number of factors that could cause actual results or future events to differ materially, including, but not limited to, the following: changing economic, market and business conditions; acts of war or terrorism; the effects of governmental regulation; the impact of competition and new technologies; slower-than-anticipated introduction of new products or implementation of marketing strategies; implementation of new manufacturing processes or implementation of new information systems; our ability to protect our intellectual property; changes in the prices of raw materials; changes in product mix; intellectual property and product liability claims and product recalls; the ability to attract and retain qualified personnel; and the loss of, or any material reduction in sales to, any significant customers. In addition, assumptions relating to budgeting, marketing, product development and other management decisions are subjective in many respects and thus susceptible to interpretations and periodic review which may cause us to alter our marketing, capital expenditures or other budgets, which in turn may affect our results of operations and financial condition.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

For the quarter ended March 31, 2012, we did not experience any material changes in market risk exposures that affect the quantitative and qualitative disclosures presented in our 2011 Form 10-K.

Item 4. Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of March 31, 2012. Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective. There were no changes in our internal control over financial reporting for the quarter ended March 31, 2012 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we may be involved in claims or litigation that arise in the normal course of business. We are not currently a party to any legal proceedings, which, if decided adversely, would have a material adverse effect on our business, financial condition, or results of operations.

Item 1A. Risk Factors

There were no material changes to the risk factors disclosed in our 2011 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The table below sets forth information with respect to our purchases of our common stock during each of the three months in the period ended March 31, 2012.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (1)
1/1/2012 through 1/31/2012	-	-	-	192,000
2/1/2012 through 2/29/2012	906	\$ 206.33	906	191,094
3/1/2012 through 3/31/2012	9,094	\$ 202.21	9,094	182,000
Total	10,000	\$ 202.58	10,000	182,000

(1) On August 16, 2011, our Board of Directors approved a new stock repurchase program pursuant to which we can repurchase up to 200,000 shares of our common stock from time to time in open market or privately-negotiated transactions. The new stock repurchase program has no expiration date but may be terminated by our Board of Directors at any time.
