268,795	284,186	305,984

Included in 'Wages and salaries' above are share-based payments arrangements, as follows:

Share-based payments income statement charge

	2013 US\$m	2012 US\$m	2011 US\$m
Restricted and performance share awards ¹	599	912	1,041
Savings-related and other share award option plans ²	63	96	121
	662	1,008	1,162
Equity-settled share-based payments	630	988	1,154
Cash-settled share-based payments	32	20	8

¹ Restricted share awards include awards granted under the Group Performance Share Plan ('GPSP').

² Includes US\$1m relating to the HSBC International Employee Share Purchase Plan. This new broad-based employee plan was launched in Hong Kong in September 2013.

The above 'Share-based payments income statement charge' includes US\$542m (2012: US\$837m; 2011: US\$974m) relating to deferred share awards. These awards are generally granted to employees early in the year following the year to which the award relates. The charge for these awards is recognised from the start of the period to which the service relates to the end of the vesting period. The vesting period is the period over which the employee satisfies certain service conditions in order to become entitled to the award. Due to the staggered vesting profile of certain deferred share awards, the employee becomes entitled to a portion of the award on an annual basis during the vesting period. The income statement charge reflects this vesting profile.

In addition, 'Wages and salaries' also includes US\$154m (2012: US\$111m; 2011: US\$88m) in respect of deferred cash awards for current and prior performance years. The reconciliation of total incentive awards (both deferred and non-deferred) to income statement charge is as follows:

Reconciliation of total incentive awards granted to incentive awards in employee compensation and benefits

	2013 US\$m	2012 US\$m	2011 US\$m
Total incentive awards approved and granted for the current year ¹	3,920	3,689	3,966
Less: deferred bonuses awarded for the current year but not amortised	(436)	(355)	(369)

Total incentives awarded and recognised in the current year	3,484	3,334	3,597
Current year charges for deferred bonuses from previous years	427	671	897
Other ²	(164)	(28)	(261)
Total incentive awards for the current year included in employee compensation and benefits	3,747	3,977	4,233

1 This represents the amount of the Group variable pay pool that has been approved and granted. The total amount of Group variable pay pool approved by the Group Remuneration Committee is disclosed in the Directors' Remuneration Report on page 380.

2 This mainly comprises incentive awards paid to employees acting as selling agents, which form an integral part of the effective interest of a financial instrument, recognised as an adjustment to the effective interest rate and recorded in 'Interest income'.

The following table identifies the charge recognised in the current year, or expected to be recognised in future years, in relation to deferred bonus awards from the current year and prior year bonus pools.

Income statement charge for current and prior year bonus pools

	Current year bonus pool ¹ US\$m	Prior year bonus pools US\$m	Total US\$m

¹ Restricted share awards include awards granted under the Group Performance Share Plan ('GPSP').

HSBC share option plans

Main plans	Policy	Purpose
Savings-related share option plans	<ul style="list-style-type: none"> · Two plans: the UK plan and the International Plan. The last grant of options under the International Plan was in 2012. · Eligible employees save up to £250 per month (or for options granted prior to 2013, the equivalent in US dollars, Hong Kong dollars or euros), with the option to use the savings to acquire shares. · Exercisable within six months following either the third or fifth anniversaries of the commencement of a three-year or five-year contract, respectively, (or for options granted prior to 2013, three months following the first anniversary of the commencement of a one-year savings contract). · The exercise price is set at a 20% (2012: 20%) discount to the market value immediately preceding the date of invitation (except for the one-year options granted under the US sub-plan prior to 2013 where a 15% discount was applied). · Plan ceased in May 2005. · Exercisable between third and tenth anniversaries of the date of grant. 	<ul style="list-style-type: none"> · To align the interests of all employees with the creation of shareholder value.
HSBC Holdings Group share		<ul style="list-style-type: none"> · Long-term incentive plan between 2000 and 2005 during which certain HSBC

option plan employees were awarded share options.

The table on page 456 shows the movement on HSBC share option plans during the year.

Calculation of fair values

The fair values of share options at the date of grant of the option are calculated using a Black-Scholes model.

The fair value of a share award is based on the share price at the date of the grant.

Significant weighted average assumptions used to estimate the fair value of options granted

	Savings-related share option plans		
	1-year plan	3-year plans	5-year plans
2013			
Risk-free interest rate ¹ (%)	n/a	0.91	1.73
Expected life (years)	n/a	3	5
Expected volatility ² (%)	n/a	20	20
Share price at grant date (£)	n/a	6.89	6.89
2012			
Risk-free interest rate ¹ (%)	0.4	0.6	1.2
Expected life (years)	1	3	5
Expected volatility ² (%)	25	25	25
Share price at grant date (£)	5.46	5.46	5.46
2011			
Risk-free interest rate ¹ (%)	0.8	1.7	2.5
Expected life (years)	1	3	5
Expected volatility ² (%)	25	25	25
Share price at grant date (£)	6.37	6.37	6.37

¹ The risk-free rate was determined from the UK gilts yield curve. A similar yield curve was used for the HSBC Holdings Savings-Related Share Option Plan: International.

² Expected volatility is estimated by considering both historic average share price volatility and implied volatility derived from traded options over HSBC Holdings ordinary shares of similar maturity to those of the employee options.

The expected US dollar denominated dividend yield was determined to be 4.5% per annum in line with consensus analyst forecasts (2012: 5.0%; 2011: 4.5%).

HSBC subsidiary company share option plans

There are employee share option plans relating to HSBC Bank Bermuda as a result of the acquisition of this entity.

Options granted prior to public announcement of the acquisition vested on acquisition and are not included in the table below. Full details of the options under these plans that lapsed during 2013 can be found in Note 38. There were no options outstanding under these plans as at 31 December 2013.

.....			

HSBC has been progressively offering all new employees membership of defined contribution plans.

The majority of the Group's defined benefit plans are funded plans. The assets of most of the larger plans are held in trusts or similar funds separate from HSBC. The plans are reviewed at least annually or in accordance with local

practice and regulations by qualified actuaries. The actuarial assumptions used to calculate the defined benefit obligations and related current service costs vary according to the economic conditions of the countries in which the plans are situated.

At 31 December 2013, the present values of the defined benefit obligations of The HSBC Bank (UK) Pension Scheme was US\$29,629m (2012: US\$26,475m), The HSBC Group Hong Kong Local Staff Retirement Benefit Scheme was US\$1,326m (2012:US\$1,476m) and the HSBC North America (US) Retirement Income Plan was US\$3,892m (2012: US\$4,374m). These defined benefit pension plans covered 12% of HSBC's employees and represented 84% of the Group's present value of defined benefit obligations. The Pension Risk section on page 260 and the Appendix to Risk on page 266 contain details about the characteristics and risks and amount, timing and uncertainty of future cash flows and policies and practices associated with these three schemes.

The determinations described in the Pension Risk section on page 260 for actuarial funding valuation purposes are based on different methods and assumptions from those used for financial reporting purposes, and as a result should neither be compared nor related to other determinations included in these financial statements. There is no actuarial deficit in the Principal plan.

HSBC healthcare benefits plans

HSBC also provides post-employment healthcare benefits under plans in the UK, the US, Bermuda, Canada, Mexico and Brazil, the majority of which are unfunded. The majority of post-employment healthcare benefits plans are defined benefit plans and are accounted for in the same manner as defined benefit pension plans. The plans are reviewed at least annually or in accordance with local practice and regulations by qualified actuaries. The actuarial assumptions used to calculate the defined benefit obligation and related current service cost vary according to the economic conditions of the countries in which they are situated.

At 31 December 2013, the present value of the defined benefit obligation of HSBC's healthcare benefit plans was US\$1,106m (2012: US\$1,280m). In aggregate, healthcare benefit plans comprised 3% of HSBC's present value of defined benefit obligations.

Present value of defined benefit obligation relating to:

- actives	(7,625)	(5,572)
- deferreds	(7,094)	(2,290)
- pensioners	(11,756)	(3,719)

1 (Gains) and losses from settlements arise as the difference between assets distributed and liabilities extinguished on settlements.

2 IAS 19 discloses how the maximum economic benefit available under the effect of the asset ceiling was determined, i.e. are benefits available in the form of refunds, reductions in future contributions or a combination of both.

3 On transition to IAS 19 Revised, unrecognised past service cost of US\$19m at 31 December 2012 has been recognised as an actuarial experience gain.

HSBC expects to make US\$655m of contributions to defined benefit pension plans during 2014. Benefits expected to be paid from the plans to retirees over each of the next five years, and in aggregate for the five years thereafter, are as follows:

Benefits expected to be paid from plans

	2014 US\$m	2015 US\$m	2016 US\$m	2017 US\$m	2018 US\$m	2019-2023 US\$m
HSBC Bank (UK) Pension Scheme1	995	1,028	1,063	1,098	1,134	6,424
Other plans1	524	523	542	585	613	3,530
.....						

1 The duration of the defined benefit obligation is 19.5 years for the HSBC Bank (UK) Pension Scheme under the disclosure assumptions adopted (2012: 19.3 years) and 13.7 years for all other plans combined (2012: 14.6 years).

Included within 'Employee compensation and benefits' are components of net periodic benefit cost related to HSBC's defined benefit pension plans and other post-employment benefits, as follows:

Total (income)/expense recognised in the income statement in 'Employee compensation and benefits'

	2013 US\$m	2012 US\$m
Defined benefit pension plans		
Current service cost	458	503
.....		
Net interest income on the net defined benefit asset/liability	(60)	(149)
.....		
Past service cost and (gains)/losses on settlements	(394)	30
.....		
Administrative costs and taxes paid by plan1	50	43
.....		
	54	427

Defined benefit healthcare plans	67	49
.....		
Total (income)/expense	121	476
.....		

1 Amounts previously disclosed within 'Current service cost' disclosed separately under the requirements of IAS 19 revised.

In 2013, following consultation on various employee benefit proposals, HSBC announced to employees in the UK that the future service accrual for active members of the Defined Benefit Section ('DBS') would cease with effect from 30 June 2015. As a result, defined benefit pensions based on service to 30 June 2015 will continue to be linked to final salary on retirement (underpinned by increases in CPI) but all active members of the DBS will become members of the Defined Contribution Section from 1 July 2015. As part of these amendments, the HSBC Bank (UK) Pension Scheme ('the Scheme') will cease to deliver ill-health benefits to active members of the DBS and these benefits will, instead, be covered via insurance policies from 1 January 2015, consistent with other UK employees. This resulted in a reduction in the defined benefit obligation of the Scheme and a corresponding gain of US\$430m, recorded in 'Past service cost and (gains)/losses on settlements' in the table above.

1 This column shows equities, bonds and contractually linked instruments issued by HSBC, property used by HSBC and derivatives entered into with HSBC.

The fair value of plan assets included derivatives entered into with HSBC Bank plc by the HSBC Bank (UK) Pension Scheme and the HSBC International Staff Retirement Benefits Scheme with positive fair values of US\$2,827m at 31 December 2013 (2012: US\$5,226m) and US\$399m (2012: US\$328m), respectively. Further details of these swap arrangements are included in Note 44.

The actual return on plan assets for the year ended 31 December 2013 was a positive return of US\$2,254m (2012: positive US\$2,784m).

Post-employment defined benefit plans' principal actuarial financial assumptions

The present value of the defined benefit pension obligations disaggregated by the nature of the benefits provided.

	2013			2012		
	Final salary pension	lump sum	Cash balance	Final salary pension	lump sum	Cash balance
HSBC Bank (UK) Pension Scheme	25,970	3,659	-	23,430	3,045	-
Hong Kong	-	1,362	-	-	1,476	-
US	3,423	233	236	3,781	318	275

The principal actuarial financial assumptions used to calculate the Group's obligations for the largest defined benefit pension plans at 31 December for each year, and used as the basis for measuring periodic costs under the plans in the following years, were as follows:

Principal actuarial assumptions

	Discount rate %	Inflation rate %	Rate of increase for pensions ¹ %	Rate of pay increase %	Interest credit rate %
At 31 December 2013					
UK2	4.45	3.60	3.30	4.10	n/a

.....					
Hong Kong	1.47	n/a	n/a	5.00	n/a
.....					
US	4.60	2.50	n/a	2.75	4.75
.....					

1 Rate of increase for pensions in payments and deferred pensions (except for the UK).

2 Rate of increase for pensions in the UK is for pensions in payment only, capped at 5%. Deferred pensions are projected to increase in line with the CPI, capped at 5%. For 2010, deferred pensions were projected to increase in line with the RPI, capped at 5%.

HSBC determines the discount rates to be applied to its obligations in consultation with the plans' local actuaries, on the basis of current average yields of high quality (AA rated or equivalent) debt instruments, with maturities consistent with those of the defined benefit obligations. In countries where there is not a deep market in corporate bonds, government bond yields are used. The yield curve is extrapolated when the term of the liabilities is longer than the duration of available bonds, in which case the discount rate takes into account the term of the liabilities and the shape of the yield curve. When determining the discount rate with reference to a bond index, an appropriate index for the specific region is used.

Mortality tables and average life expectancy at age 65

Mortality table	Life expectancy at age 65 for a male member currently:		Life expectancy at age 65 for a female member currently:

2 The significant plans in Hong Kong are lump sum plans which do not use a post-retirement mortality table.

Actuarial assumption sensitivities

The discount rate is sensitive to changes in market conditions arising during the reporting period. The mortality rates used are sensitive to experience from the plan member profile. The following table shows the effect of changes in these and the other key assumptions on the principal defined benefit pension plan:

The effect of changes in key assumptions on the principal plan

	HSBC Bank (UK) Pension Scheme	
	2013 US\$m	2012 US\$m

HSBC Holdings

Employee compensation and benefit expense in respect of HSBC Holdings' employees in 2013 amounted to US\$542m (2012: US\$439m). The average number of persons employed by HSBC Holdings during 2013 was 1,525 (2012: 1,323).

Employees of HSBC Holdings who are members of defined benefit pension plans are principally members of either the HSBC Bank (UK) Pension Scheme or the HSBC International Staff Retirement Benefits Scheme. HSBC Holdings

Edgar Filing: HSBC HOLDINGS PLC - Form 6-K

pays contributions to such plans for its own employees in accordance with the schedules of contributions determined by the Trustees of the plan and recognises these contributions as an expense as they fall due.

Directors' emoluments

The aggregate emoluments of the Directors of HSBC Holdings, computed in accordance with the Companies Act 2006 and the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008 were:

	2013 US\$000	2012 US\$000	2011 US\$000
Fees	4,027	5,435	5,108
.....			
Salaries and other emoluments	9,488	10,316	12,906
.....			
Annual incentives	7,357	13,983	12,516
.....			
Total.....	20,872	29,734	30,530
Vesting of long-term incentive awards	-	5,733	2,596
.....			

In addition, there were payments under retirement benefit agreements with former Directors of US\$1,198,744 (2012: US\$1,171,796). The provision at 31 December 2013 in respect of unfunded pension obligations to former Directors amounted to US\$19,729,103 (2012: US\$19,285,971).

During the year, aggregate contributions to pension schemes in respect of Directors were nil (2012: US\$29,078).

Discretionary annual incentives for Directors are based on a combination of individual and corporate performance and are determined by the Group Remuneration Committee. Details of Directors' remuneration, share options and awards under the HSBC Share Plan and HSBC Share Plan 2011 are included in the 'Directors' Remuneration Report' on page 378 to 407.

8 Auditors' remuneration

.....			
Total fees payable	80.4	80.5	87.1
.....			

1 Fees payable to KPMG for the statutory audit of the consolidated financial statements of HSBC and the separate financial statements of HSBC Holdings. They include amounts payable for services relating to the consolidation returns of HSBC Holdings' subsidiaries which are clearly identifiable as being in support of the Group audit opinion. Until 2012, these fees were included in 'Fees for other services provided to HSBC'. Comparative information has been updated accordingly. The adjustment reduced 'Fees for other services provided to HSBC' and increased 'Fees for HSBC Holdings' statutory audit' by US\$10.5m in 2011. There was no effect on basic or diluted earnings per share following the change.

2 Fees payable for the statutory audit of the financial statements of HSBC's subsidiaries.

3 Including services for assurance and other services that relate to statutory and regulatory filings, including comfort letters and interim reviews.

4 Including valuation and actuarial services, translation services, ad-hoc accounting advice, review of financial models, advice on IT security and business continuity, corporate finance transactions and performing agreed-upon IT testing procedures.

No fees were payable by HSBC to KPMG for the following types of services: internal audit services, services related to litigation and recruitment and remuneration.

Fees payable by HSBC's associated pension schemes to KPMG

	2013 US\$000	2012 US\$000	2011 US\$000
Audit of HSBC's associated pension schemes	379	256	248

.....			
Taxation-related services	-	-	11
.....			
- taxation advisory services	-	-	11
.....			
Total fees payable	384	256	259
.....			

No fees were payable by HSBC's associated pension schemes to KPMG for the following types of services: audit related assurance services, internal audit services, other assurance services, services related to corporate finance transactions, valuation and actuarial services, litigation, recruitment and remuneration, and information technology.

In addition to the above, KPMG estimate they have been paid fees of US\$5.3m (2012: US\$3.3m; 2011: US\$8.6m) by parties other than HSBC but where HSBC is connected with the contracting party and may therefore be involved in appointing KPMG. These fees arise from services such as auditing mutual funds managed by HSBC and reviewing the financial position of corporate concerns which borrow from HSBC.

Fees payable to KPMG for non-audit services for HSBC Holdings are not disclosed separately because such fees are disclosed on a consolidated basis for the HSBC Group.

¹ Overseas tax included Hong Kong profits tax of US\$1,133m (2012: US\$1,049m; 2011: US\$997m). The Hong Kong tax rate applying to the profits of subsidiaries assessable in Hong Kong was 16.5% (2012: 16.5%; 2011: 16.5%). Other overseas subsidiaries and overseas branches provided for taxation at the appropriate rates in the countries in which they operate.

Tax reconciliation

The tax charged to the income statement differs to the tax charge that would apply if all profits had been taxed at the UK corporation tax rate as follows:

	2013		2012		2011

Tax expense	4,765	21.1	5,315	25.7	3,928	18.0

The effective tax rate for the year was 21.1% compared with 25.7% for 2012. The effective tax rate for the year benefited from the non-taxable gain on the reclassification of Industrial Bank as a financial investment and the disposal of our operations in Panama and our investment in Ping An. The effective tax rate in 2012 was higher because of the non tax deductible effect of fines and penalties as part of the settlement of investigations into past inadequate compliance with anti-money laundering and sanction laws.

The UK Government announced that the main rate of corporation tax for the year beginning 1 April 2013 will reduce from 24% to 23%, to be followed by a further 2% reduction to 21% for the year beginning 1 April 2014 and a 1% reduction to 20% for the year beginning 1 April 2015. The reduction in the corporate tax rate to 23%, which was enacted through the 2012 Finance Act, and this resulted in a weighted average rate of 23.25% for 2013 (2012: 24.5%; 2011: 26.5%). The reductions to 21% and 20% that were announced in the 2012 Autumn Statement and 2013 Budget, respectively, became enacted through the 2013 Finance Act on 17 July 2013. It is not expected that the future rate reductions will have a significant effect on the Group.

The Group's legal entities are subject to routine review and audit by tax authorities in the territories in which the Group operates. The Group provides for potential tax liabilities that may arise on the basis of the amounts expected to be paid to the tax authorities. The amounts ultimately paid may differ materially from the amounts provided depending on the ultimate resolution of such matters.

Deferred taxation

The table overleaf shows the gross deferred tax assets and liabilities recognised in the balance sheet and the related amounts recognised in the income statement, other comprehensive income and directly in equity.

The amounts presented in the balance sheet are different from the amounts disclosed in the table overleaf as they are presented after offsetting asset and liability balances where HSBC has the legal right to set-off and intends to settle on a net basis.

The net deferred tax assets totalled US\$6.5bn at 31 December 2013 (2012: US\$6.5bn). The main items to note are:

US

The net deferred tax asset relating to HSBC's operations in the US was US\$4.4bn (2012: US\$4.6bn). The deferred tax assets included in this total reflected the carry forward of tax losses and tax credits of US\$0.7bn (2012: nil), deductible temporary differences in respect of loan impairment allowances of US\$1.2bn (2012: US\$2.0bn) and other temporary differences of US\$2.5bn (2012: US\$2.6bn).

Deductions for loan impairments for US tax purposes generally occur when the impaired loan is charged off, or if earlier, when the impaired loan is sold. The tax deduction is often in the period subsequent to that in which the impairment is recognised for accounting purposes. As a result, the amount of the associated deferred tax asset should generally move in line with the impairment allowance balance.

On the evidence available, including historical levels of profitability, management projections of future income and HSBC Holdings' commitment to continue to retain sufficient capital in North America to recover the deferred tax asset, it is expected that there will be sufficient taxable income generated by the business to realise these assets. Management projections of profits from the US operations are prepared for a ten year period and include assumptions about future house prices and US economic conditions, including unemployment levels.

Management projections of profits from the US operations currently indicate that tax losses and tax credits will be fully recovered by 2017. The current level of the deferred tax asset in respect of loan impairment allowances and other deductible temporary differences is projected to reduce over the ten year period.

As there has been a recent history of losses in HSBC's US operations, management's analysis of the recognition of these deferred tax assets significantly discounts any future expected profits from the US operations and relies on capital support from HSBC Holdings, including tax planning strategies in relation to such support. The principal strategy involves generating future taxable profits through the retention of capital in the US in excess of normal regulatory requirements in order to reduce deductible funding expenses or otherwise deploy such capital to increase levels of taxable income. As financial performance in our US operations improves it is anticipated that projected future profits from US operations will be relied on in the evaluation of the recognition of the deferred tax asset in future periods.

Brazil

The net deferred tax asset relating to HSBC's operations in Brazil was US\$1.0bn (2012: US\$0.9bn). The deferred tax assets included in this total reflected the carry forward of tax losses of US\$0.1bn (2012: nil), deductible temporary differences in respect of loan impairment allowances of US\$0.7bn (2012: US\$0.9bn) and other temporary differences of US\$0.2bn (2012: nil).

Deductions for loan impairments for Brazilian tax purposes generally occur when the impaired loan is charged off, often in the period subsequent to that in which the impairment is recognised for accounting purposes. As a result, the amount of the associated deferred tax asset should generally move in line with the impairment allowance balance.

Management projections of profits from the Brazilian operations currently indicate that the tax losses will be fully recovered within the next five years and that the other temporary differences will be recovered within the next ten years. Loan impairment deductions are recognised for tax purposes typically within two years of the accounting recognition.

On the evidence available, including historic levels of profitability, management projections of income and the state of the Brazilian economy, it is anticipated that there will be sufficient taxable income generated by the business to realise these assets when deductible for tax purposes.

Mexico

The net deferred tax asset relating to HSBC's operations in Mexico was US\$0.5bn (2012: US\$0.6bn). The deferred tax assets included in this total related primarily to deductible temporary differences in respect of accounting provisions for the loan portfolio. The annual deduction for loan impairment charges was historically capped under Mexican legislation at 2.5% of the average qualifying loan portfolio. The balance is carried forward to future years without expiry.

Following the clarification of tax law by the Mexican fiscal authority during the second quarter of the year, which led to a write down of the deferred tax assets on loan impairments of US\$0.3bn, management's analysis of the recognition of these deferred tax assets now relies on the primary strategy of selling certain loan portfolios, the losses on which are deductible for tax in Mexico when sold. Any such deductions for tax would lead to the reversal of the carried forward loan impairment provision recognised for deferred tax purposes.

On the evidence available, including historical and projected levels of loan portfolio growth, loan impairment rates and profitability, it is anticipated that the business will now realise these assets over a shorter period, within the next 6 years, than originally was the case under the previous strategy of projecting loan portfolio growth, loan impairment rates and profitability, which anticipated that the assets would be realised within the next 15 years.

1 Fair value of own debt.

On 8 September 2013, the Mexican Government proposed a number of tax reforms that were approved by the Chamber of Senate on 31 October 2013 and published in the Official Gazette on 11 December 2013. The tax reforms include a new basis of tax deduction for loan impairment charges that will allow banks to recognise tax deductions as and when loans are written off the balance sheet. The reforms also brought in transitional rules to allow banks to continue to claim any unclaimed deductions with regard to the 2.5% pool as at 31 December 2013. These transitional rules are subject to further clarification by the Mexican fiscal authority. It is not expected that the tax reform will have a significant effect on the deferred tax assets held in HSBC's operations in Mexico.

There were no material carried forward tax losses or tax credits recognised within the Group's deferred tax assets in Mexico.

UK

The net deferred tax asset relating to HSBC's operations in the UK was US\$0.4bn (2012: US\$0.3bn). The deferred tax asset in respect of the carry forward of tax losses and tax credits reversed in full during the year (2012: US\$0.3bn). The closing net deferred tax asset represents other temporary differences of US\$0.4bn (2012: nil).

On the evidence available, including historical levels of profitability and management projections of future income it is anticipated that there will be sufficient taxable income generated by the business to recover the net deferred tax asset within the next ten years.

Unrecognised deferred tax

The amount of temporary differences, unused tax losses and tax credits for which no deferred tax asset is recognised in the balance sheet was US\$22.0bn (2012: US\$16.6bn). These amounts included unused state losses arising in our US operations of US\$17.3bn (2012: US\$12.6bn).

Of the total amounts unrecognised, US\$5.0bn (2012: US\$3.9bn) had no expiry date, US\$1.0bn (2012: US\$0.3bn) was scheduled to expire within ten years and the remaining will expire after ten years.

Deferred tax is not recognised in respect of the Group's investments in subsidiaries and branches where remittance or other realisation is not probable, and for those associates and interests in joint ventures where it has been determined that no additional tax will arise. No amount is disclosed for the unrecognised deferred tax or the 2013 and 2012 temporary differences associated with such investments as it is impracticable to determine the amount of income taxes that would be payable when any temporary differences reverse. Deferred tax of US\$20m (2012: US\$269m) has, however, been provided in respect of distributable reserves of associates that, on distribution, would attract withholding tax.

¹ HSBC Holdings issued Perpetual Subordinated Capital Securities of US\$3,800m in June 2010 and US\$2,200m in April 2008 which are classified as equity under IFRSs.

The Directors declared after the end of the year a fourth interim dividend in respect of the financial year ended 31 December 2013 of US\$0.19 per ordinary share, a distribution of approximately US\$3,578m. The fourth interim dividend will be payable on 30 April 2014 to holders of record on 13 March 2014 on the Hong Kong Overseas Branch Register and 14 March 2014 on the Principal Register in the UK or the Bermuda Overseas Branch Register. No liability is recorded in the financial statements in respect of the fourth interim dividend for 2013.

On 15 January 2014, HSBC paid a further coupon on the capital securities of US\$0.508 per security, a distribution of US\$44m. No liability is recorded in the balance sheet at 31 December 2013 in respect of this coupon payment.

¹¹ Earnings per share

Edgar Filing: HSBC HOLDINGS PLC - Form 6-K

'Basic earnings per ordinary share' is calculated by dividing the profit attributable to ordinary shareholders of the parent company by the weighted average number of ordinary shares outstanding, excluding own shares held. 'Diluted earnings per ordinary share' is calculated by dividing the basic earnings, which require no adjustment for the effects of dilutive potential ordinary shares, by the weighted average number of ordinary shares outstanding, excluding own shares held, plus the weighted average number of ordinary shares that would be issued on conversion of dilutive potential ordinary shares.

Profit attributable to the ordinary shareholders of the parent company

12 Segmental analysis

HSBC's operates a matrix management structure which includes geographical regions, global businesses and global functions. HSBC's operating segments are Europe, Hong Kong, Rest of Asia-Pacific, Middle East and North Africa ('MENA'), North America and Latin America. These geographical operating segments represent the most appropriate information for the users of the financial statements to best evaluate the nature and financial effects of HSBC's business activities and the economic environments in which it operates.

Geographical information is classified by the location of the principal operations of the subsidiary or, for The Hongkong and Shanghai Banking Corporation, HSBC Bank, HSBC Bank Middle East and HSBC Bank USA, by the location of the branch responsible for reporting the results or advancing the funds.

HSBC's chief operating decision-maker is the Group Management Board ('GMB') which operates as a general management committee under the direct authority of the Board. Information provided to GMB to make decisions about allocating resources to, and assessing the performance of, operating segments is measured in accordance with IFRSs. The financial information shown below includes the effects of intra-HSBC transactions between operating segments which are conducted on an arm's length basis and are eliminated in arriving at the total. Shared costs are included in operating segments on the basis of the actual recharges made.

Products and services

HSBC provides a comprehensive range of banking and related financial services to its customers in its six geographical regions. The products and services offered to customers are organised by global business.

- Retail Banking and Wealth Management ('RBWM') offers a broad range of products and services to meet the personal banking and wealth management needs of individual customers. Typically, customer offerings include personal banking products (current and savings accounts, mortgages and personal loans, credit cards, debit cards and local and international payment services) and wealth management services (insurance and investment products, global asset management services and financial planning services).
- Commercial Banking ('CMB') offers a broad range of products and services to serve the needs of our commercial customers, including small and medium-sized enterprises, mid-market enterprises and corporates. These include credit and lending, international trade and receivables finance, treasury management and liquidity solutions (payments and cash management and commercial cards), commercial insurance and investments. CMB also offers its customers access to products and services offered by other global businesses, for example Global Banking & Markets ('GB&M'), which include foreign exchange products, raising capital on debt and equity markets and advisory services.
- GB&M provides tailored financial solutions to major government, corporate and institutional clients and private investors worldwide. The client-focused business lines deliver a full range of banking capabilities including financing, advisory and transaction services, a markets business that provides services in credit, rates, foreign exchange, money markets and securities services, and principal investment activities.
- Global Private Banking ('GPB') provides a range of services to high net worth individuals and families with complex and international needs within the Group's priority markets.

Financial information

In the following segmental analysis, the benefit of shareholders' funds impacts the analysis only to the extent that these funds are actually allocated to businesses in the segment by way of intra-HSBC capital and funding structures.
