Report of Independent Auditors

To the Participants and the Retirement Committee

of the PSI 401(k) Plan

We have audited the accompanying statements of net assets available for benefits of the PSI 401(k) Plan as of December 31, 2002 and 2001, and the related statement of changes in net assets available for benefits for the year ended December 31, 2002. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our report dated September 27, 2002, we were unable to, and did not, express an opinion on the statement of net assets available for benefits as of December 31, 2001 because, at the instruction of the plan administrator, we did not perform any auditing procedures with respect to the information summarized in Note 3 in those financial statements. The plan administrator has now instructed us to perform, and we did perform, an audit of the statement of net assets available for benefits as of December 31, 2001 in accordance with auditing standards generally accepted in the United States of America. Accordingly, we are now able to express an opinion on this financial statement.

In our opinion, the financial statements referred to in the first paragraph of this report present fairly, in all material respects, the net assets available for benefits of the PSI 401(k) Plan at December 31, 2002 and 2001, and the changes in net assets available for benefits for the year ended December 31, 2002 in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedule is presented for the purpose of additional analysis and is not a required part of the basic financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedule is the responsibility of the Plan's management. The supplemental schedule has been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

d. Participant accounts

e. Vesting

Participants are immediately vested in their contributions and the Company fixed-dollar matching contribution. Participants become 100% vested in the Company percentage-matching contributions after five years of service, at age 65, or as a result of death or disability. Vesting of the Company percentage-matching contributions occurs at the rate of 20% per year of service. As of January 1, 2003, new hires will be vested on a new schedule. It is a three-year vesting period over which no amount will be vested until the end of three years. At that time, the employee will be 100% vested.

The unvested benefits of a participant who has terminated employment are forfeited as of the termination date and may be applied to reduce the Company's future contribution. For the year ended December 31, 2002, forfeitures amounted to \$321,773.

f. Benefit payments

Benefits from the Plan are paid in a lump sum following a participant's normal retirement, disability retirement, termination of service or death. g. Other payments

Participants may withdraw post-tax contributions at any time. Vested pre-tax contributions can be withdrawn, without penalties, when reaching age 59 1/2 or upon experiencing a qualified financial hardship as defined by the IRS. Withdrawals may be subject to tax.

PSI 401(k) Plan**Notes to the Financial Statements**

h. Loans to Participants

Loans are made to plan participants from each of the investment funds based on their participation within each fund. The loans are subject to certain limitations as described in the Plan document. Applications for such loans must be approved by the PSI Benefits Department. The minimum and maximum term for a loan is six months and sixty months, respectively. Loans that are not repaid within the sixty-month maximum are treated as a distribution from the Plan. Terminated employees with an outstanding loan balance have up to 90 days to repay the loan or it will be treated as a distribution from the plan. On a semi-monthly basis, loan principal repayments and accrued interest paid on the loan are received and transferred to the fund elected by the participant. Loans are charged interest at the prevailing prime rate of interest on the day the loan application is received by the Benefits Department. Included in the 2002 Benefits paid to participants on the statement of changes in net assets available for benefits are defaulted loans of \$2,163,803.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIESa. Basis of accounting

The financial statements of the Plan are presented on the accrual basis of accounting.

b. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

c. Investment Valuation and Income Recognition

The investments are carried at fair value. Shares of registered investment companies are valued at quoted market prices which represent the net asset value of shares held by the Plan at year end. Participant loans are recorded at face value plus accrued interest, which approximates fair value.

Purchases and sales are recorded on trade date at purchase cost and/or sales proceeds. Dividend income is recorded on the ex-dividend date. Interest income is recognized on the accrual basis.

d. Payment of Benefits

Benefits are recorded at the time of payment.

3. INVESTMENT CONTRACT WITH INSURANCE COMPANY

In 2002, the Plan entered into an investment contract with The Prudential Insurance Company of America (the Issuer). The Prudential Guaranteed Interest Account is included in the financial statements at contract value (which represents contributions made under the contract, less participant withdrawals), because it is fully benefit responsive. The contract value approximates fair value. For 2002 the crediting interest rate on the contributions was 3.90%. The crediting interest rate is reset quarterly based on an agreed upon formula with the Issuer and cannot be less than 3%.

The Company has obtained certifications from the Trustee that such information is complete and accurate in accordance with section 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
