**Taiwan Semiconductor Reports 5% Increase in
Sequential EPS Driven by 5% Higher Revenue**

Hsin-Chu, Taiwan, R.O.C., January 29, 2004 Taiwan Semiconductor Manufacturing Company, Ltd. today announced revenues of NT\$57.78 billion, net income of NT\$16 billion and fully diluted earnings per share of NT\$0.79 (US\$0.12 per ADS unit) for the fourth quarter ended December 31, 2003. For the full year of 2003, TSMC's revenue was NT\$201.9 billion, 25% higher than in year 2002. Net income for the entire year grew 119% to NT\$47.3 billion, while fully diluted earnings per share jumped 122% to NT\$2.33 (US\$0.34 per ADS unit).

On a sequential basis, fourth quarter results represent a 5.3% increase in revenue, a 5.5% increase in net income and a 5.2% increase in fully diluted EPS. All figures were prepared in accordance with R.O.C. GAAP on an unconsolidated basis.

The increase in fourth quarter revenue resulted from a 13.5% increase in wafer shipments, a 5.5% decline in wafer average selling price (ASP), and a weaker U.S. dollar exchange rate. Gross Margin for the quarter improved slightly to 39.3% from 39.1% in the previous quarter due to higher utilization levels. Net Margin for the quarter was 27.7% as compared to 27.6% previously.

Lora Ho, vice president and chief financial officer, said the Company's key financial indicators cash flow, liquidity, and debt coverage remained healthy.

Fourth quarter's results brought TSMC's revenues for both the quarter and the full year to new records. We are proud to be among the very few industry leaders whose 2003 top-line performance has surpassed levels achieved in the past, said Ho. We expect the performance of the coming quarter to be at least as good as that of the fourth quarter.

Ho also confirmed that key industry drivers such as outsourcing, capital efficiency requirements, and the increased complexity of advanced integrated circuits continue to favor TSMC.

Ho said that, based upon the current business outlook, management's expectations for first quarter 2004 performance are:

Wafer shipments to increase by a low single digit percentage point sequentially;

ASP to decline slightly, but magnitude is less than that of the previous quarter;

Overall utilization rate to be about 100 percent or slightly higher;

Gross profit margin percentage to remain essentially unchanged sequentially;

Demand to improve in the communications segment, remain flat for consumer segment, but experience seasonal decline in the computer segment.

Ho said management also expects 2004 capital expenditure to be about US\$2 billion.

EPS of NT\$0.79 for 4Q03 presents a 5.2% increase compared with 3Q03. The operating results of 4Q03 are summarized below:

Net sales grew 5.3% sequentially to NT\$57.8 billion, resulting largely from a 13.5% increase in wafer shipments, a 5.5% decrease in wafer ASP, and a slightly unfavorable foreign exchange.

Gross profit rose 5.9% sequentially to NT\$22.7 billion mainly driven by higher capacity utilization, as gross margin improved to 39.3% from 39.1% in 3Q03.

Operating expenses of NT\$6.1 billion increased 22.6% sequentially. Higher research and development expenditures were the main reason behind the increase.

Net gain from non-operating items amounted to NT\$943 million. This represents a NT\$722 million improvement on a sequential basis; mainly reflecting improved operating performance by TSMC subsidiary/affiliates as well as capital gains from the disposal of venture capital equity investments.

Income before tax rose 5.1% sequentially to NT\$17.6 billion. After NT\$1.6 billion net tax expense, TSMC's 4Q03 net income increased 5.5% to NT\$16.0 billion while net margin improved slightly to 27.7%.

Revenue Analysis:

Net sales of NT\$57.8 billion was 5.3% higher than the NT\$54.9 billion recorded in 3Q03. The growth in TSMC wafer sales was attributable to 13.5% higher wafer shipments, and was offset partially by 5.5% lower average selling price in U.S. dollar terms and a stronger NT dollar.

Edgar Filing: TAIWAN SEMICONDUCTOR MANUFACTURING CO LTD - Form 6-K

Communication applications, especially wireless, were the principal revenue drivers in the quarter. The decrease in demand for Computer and Consumer applications resulted from the seasonality of these applications.

Demand from mature technologies strengthened in 4Q03. Revenue from advanced technology wafers decreased from 66% to 63% of the Company's total wafer sales in the quarter.

Revenue from the IDM segment strengthened to 29% of net sales during the quarter versus 26% in 3Q03.

On a geographical basis, the revenue mix changed little from the previous period.

Revenue contributed by TSMC subsidiary/affiliates amounted to 12% (NT\$7.2 billion) of net sales during the quarter versus 11% (NT\$5.8 billion) in 3Q03.

ASP Trend:

Average selling price in U.S. dollars declined 5.5% versus 3Q03. This was mainly due to a product mix shift in favor of mature technologies as well as a competitive pricing environment in 4Q03.

Net working capital of NT\$128.0 billion was NT\$20.0 billion greater than that in the third quarter, reflecting stronger operating cash flows.

Receivable/Inventory Days Trend:

Turnover of receivables improved to the equivalent of 40 days revenue compared to 41 days experienced in the last quarter. The improvement was due to better management of collections during the quarter.

On a year-to-date basis, inventories amounted to an equivalent of 36 days of cost-of-goods-sold, representing a slight decrease from 38 days in the previous quarter.

Summary of Cash Flow:

During 4Q03, TSMC generated NT\$31.5 billion operating cash inflow due mainly to higher net income.

Net cash used in investing activities totaled NT\$15.9 billion, including acquisitions of fixed assets in the amount of NT\$12.8 billion and increases in short-term investments of NT\$0.9 billion. Increases in short-term investments are mainly for purchasing government bonds. Net financing uses of NT\$0.1 billion reflect the return of guarantee deposits to a few customers.

TSMC ended the quarter with NT\$15.6 billion more cash and NT\$0.9 billion more short-term investments than the previous quarter. In total, cash & short-term investment increased by NT\$16.5 billion sequentially.

Operating Cash Flow Trend:

Operating cash flow of NT\$31.5 billion was 7% lower than in the previous quarter, largely due to a higher net income, essentially flat depreciation, and reclassification of NT\$5.0 billion corporate bond to short-term liabilities.

V-3. Capital Commitment and Capacity Highlights

Actual 2003 capital expenditure: US\$1.1 billion.

Estimated 2004 capital expenditure to be about US\$2 billion.

Estimated 2004 capacity (excluding VIS): to be around 4.6 million wafers at 8 -equivalent, 15% growth year over year.

Capital Spending:

TSMC's capital expenditures during the quarter totaled US\$373.0 million, 58% higher than in the previous quarter. Most of the spending was for capacity ramp-up in Fab 12. During 2003, capital expenditures totaled US\$1.1 billion.

TSMC remains fully committed to providing capacity that meets both the fabrication and technological needs of its customers. The Company intends, however, to manage capacity in accordance with the strength of actual and sustainable demand so as to meet its return objectives for shareholders.
