SMITHFIELD FOODS, INC.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

Note 1: General

Smithfield Foods, Inc., together with its subsidiaries (the Company), is the largest hog producer and pork processor in the world and the fifth largest beef processor in the United States (U.S.). The Company conducts its business through six reporting segments, Pork, Beef, International, Hog Production (HP), Other and Corporate, each of which is comprised of a number of subsidiaries. Prior to the fourth quarter of fiscal 2005, the Company conducted its business through five reporting segments, Pork, Beef, HP, Other and Corporate.

These statements should be read in conjunction with the Consolidated Financial Statements and related notes, which are included in the Company's Annual Report on Form 10-K for the fiscal year ended May 1, 2005. The interim consolidated condensed financial information furnished herein is unaudited. The information reflects all adjustments (which include only normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the financial position and results of operations for the periods included in the report.

Certain prior year amounts have been reclassified to conform to current year presentations.

Note 2: Acquisitions

The following acquisitions were accounted for using the purchase method of accounting and, accordingly, the accompanying financial statements include the financial position and the results of operations from the dates of acquisition.

In November 2004 (fiscal 2005), the Company acquired Morliny S.A. (Morliny) and Comtim Group SRL (Comtim) reported in the International segment for approximately \$71.3 million plus the assumption of certain liabilities. Morliny is a meat processor in Poland, and Comtim is an integrated meat processing company in Romania. The balance of the purchase price in excess of the fair value of the assets acquired and the liabilities assumed at the date of acquisition was recorded as goodwill totaling \$21.5 million.

In November 2004 (fiscal 2005), the Company also acquired majority positions in two companies reported in the Pork segment for approximately \$31.4 million plus the assumption of certain liabilities. The balance of the purchase price in excess of the fair value of the assets acquired and liabilities assumed at the date of acquisition was recorded as goodwill totaling \$26.6 million.

In July 2004 (fiscal 2005), the Company acquired Jean Caby S.A. and related companies (Jean Caby) reported in the International segment for \$33.4 million plus the assumption of certain liabilities. Jean Caby produces and markets cured and cooked processed meats including deli cooked hams, dry sausages, cocktail sausages and hot dogs. The balance of the purchase price in excess of the fair value of the assets acquired and the liabilities assumed at the date of the acquisition was recorded as goodwill totaling \$10.6 million.

Had the acquisitions of Morliny, Comtim, the two Pork segment companies and Jean Caby occurred at the beginning of the preceding fiscal year, there would not have been a material effect on sales, net income or net income per diluted share or on the Company's financial position for the 13 or 39 weeks ended January 30, 2005.

Note 3: Facility Closures

In October 2005 (fiscal 2006), the Company ceased fresh pork processing operations at its subsidiary, The Smithfield Packing Company, Incorporated's (Smithfield Packing), Smithfield facility. During the 39 week period ended January 29, 2006, the Company recorded, in cost of sales, accelerated depreciation totaling \$7.9 million and an impairment charge totaling \$8.4 million related to Smithfield Packing's east coast restructuring plan.

Table of Contents

The decrease in sales in the International segment was mainly due to an eight percent decrease in the average unit selling price, primarily due to the effect of foreign currencies and a change in product mix from last years quarter. Total fresh pork and processed meats volumes in the International segment, including acquisitions, remained the same with fresh pork volumes increasing 27% and processed meats volumes decreasing 15% percent primarily due to difficult industry conditions in Poland and France. Average unit selling prices decreased eight percent primarily due to the effect of foreign currencies.

Equity in income of affiliates decreased \$0.8 million, or 21%, to \$3.1 million for the 13 weeks ended January 29, 2006 from \$3.9 million for the 13 weeks ended January 30, 2005.

These increases were partially offset by higher plant energy and transportation costs and a five percent decrease in the average unit selling price.

The Company's cattle feeding interests reported a small profit, reflecting improved results near the end of the quarter.

International segment operating profit decreased \$3.9 million, or 71%, to \$1.6 million for the 13 weeks ended January 29, 2006 from \$5.5 million for the 13 weeks ended January 30, 2005. These results were partially offset by startup losses in the Company's biodiesel renewable energy project.

Corporate expenses decreased \$2.7 million, or 11%, to \$22.1 million for the 13 weeks ended January 29, 2006 from \$24.8 million for the 13 weeks ended January 30, 2005. The decrease is primarily due to lower variable compensation expense related to the decrease in overall Company profits.

Interest expense increased \$1.4 million, or four percent, to \$37.5 million for the 13 weeks ended January 29, 2006 from \$36.1 million for the 13 weeks ended January 30, 2005. The increase was mainly due to increased debt and higher rates on variable rate debt.

profitability in the Pork, Beef and Other segments partially offset by decreased profitability in the HP and International segments and the Company's \$16.3 million plant closure charges related to its east coast restructuring plan.

Selling, general and administrative expenses increased \$56.5 million, or 12%, to \$532.7 million for the 39 weeks ended January 29, 2006 from \$476.2 million for the 39 weeks ended January 30, 2005. This increase was mainly due to the inclusion of acquired businesses in the current year period and the effect of foreign exchange gains in the prior year period which were partially offset by lower variable compensation.

Equity in income of affiliates increased \$4.0 million, or 35%, to \$15.3 million for the 39 weeks ended January 29, 2006 from \$11.3 million for the 39 weeks ended January 30, 2005. Operating profit by reportable segment for the fiscal periods indicated consists of the following:

(In millions)	January 29, 2006	39 Weeks Ended January 30, 2005	\$ Change

The increase was mainly due to a 14% decrease in live hog market prices and strong processed meats margins. These increases were partially offset by the Company's plant closure charges and depressed fresh pork margins.

Beef segment operating profit increased \$12.2 million to \$5.2 million for the 39 weeks ended January 29, 2006 compared to an operating loss of \$7.0 million for the 39 weeks ended January 30, 2005. The increase was mainly due to \$9.2 million of losses incurred by Showcase Foods in the prior year period and a four percent increase in volumes, partially offset by continuing depressed market conditions for beef as many key export markets remained closed to U.S. beef for most of the period.

International segment operating profit decreased \$17.2 million to a \$4.9 million loss for the 39 weeks ended January 29, 2006 from a profit of \$12.3 million for the 39 weeks ended January 30, 2005. The decrease was mainly due to the continuing effect of the temporary shutdown and product recall at the Company's Constar plant in Poland which contributed to an 18% decrease in processed meats volumes. Also contributing to the decrease were competitive pricing pressures in France and higher raw material costs in Poland.

During the first quarter of fiscal 2006, the Company's Polish operations temporarily shut down a red meat plant in connection with media reports on food safety and related issues. The Company voluntarily shut down the plant for ten days and recalled some previously shipped product. The shutdown and returns resulted in approximately \$5 million of operating losses during the first quarter of fiscal 2006. In addition, since the voluntary shutdown, the Company has experienced a sharp reduction in processed meats volumes from their Polish operations and has incurred increased marketing and promotion expenditures in the areas affected by the product recall in order to attempt to improve processed meats volumes.

LIQUIDITY AND CAPITAL RESOURCES

The Company has available a variety of sources of liquidity and capital resources, both internal and external. These resources provide funds required for current operations, acquisitions, debt retirement and other capital requirements.

The meat processing industry is characterized by high sales volume and rapid turnover of inventories and accounts receivable. Because of the rapid turnover rate, the Company considers its meat inventories and accounts receivable highly liquid and readily convertible into cash. The HP segment also has rapid turnover of accounts receivable. Although inventory turnover in the HP segment is slower, mature hogs are readily convertible into cash. Borrowings under the Company's credit facilities are used, in part, to finance increases in the levels of inventories and accounts receivable resulting from seasonal and other market-related fluctuations in raw material costs.

Cash provided by operations was \$360.5 million for the 39 weeks ended January 29, 2006 and \$29.4 million for the 39 weeks ended January 30, 2005. The prior year period's working capital increase was the result of higher live hog prices and increased cattle at the Company's cattle feedlots.

Cash Flows from Investing Activities

In January 2006, the Company and six of its subsidiaries executed a consent decree with the Water Keeper Alliance, Larry Baldwin, d/b/a Lower Neuse Riverkeeper and the Neuse River Foundation, Inc. to settle certain actions against the Company and the six subsidiaries referred to as the Citizens Suits. The consent decree was filed with the United States District Court for the Eastern District of North Carolina (the District Court) and simultaneously presented to the U.S. Department of Justice and the U.S. Environmental Protection Agency for their review and comment for a period of up to forty-five days. After the review period, the consent decree may be entered by the District Court. If the consent decree is not entered by the District Court, each of the parties shall retain all rights it had in the Citizen Suits before filing the consent decree.

The consent decree provides, among other things, that (1) the Company's subsidiary, Murphy-Brown LLC, will undertake a series of measures designed to enhance the performance of the swine waste management systems on approximately 260 company-owned farms in North Carolina and thereby reduce the potential for surface water or ground water contamination from these farms, and (2) the Company and its subsidiaries will pay the plaintiffs for a specified amount of their legal fees. The effect of the consent decree on the Company will not have a material adverse effect on the Company's financial condition or results of operations. The consent decree resolves all claims in the actions and also contains a broad release and covenant not to sue for any other claims or actions that the plaintiffs might be able to bring against the Company and its subsidiaries related to swine waste management at the farms covered by the consent decree. There are certain exceptions to the release and covenant not to sue related to future violations and the swine waste management technology development initiative pursuant to a July 2000 agreement between the Company and its subsidiaries and the North Carolina Attorney General. The Company and its subsidiaries may bring a motion to terminate the consent decree once seven years have elapsed from the date of entry.
