1. Overview

A. Industry

(1) Industry characteristics and growth potential

TFT-LCD technology is one of the most widely used technologies in the manufacture of flat panel displays and the demand for flat panel displays is growing rapidly. The flat panel display industry is characterized by high entry barriers due to rapidly evolving technology, capital-intensive characteristics, and the significant investments required to achieve economies of scale, among other factors. There is strong competition between a limited number of players within the industry and production capacity in the industry, including ours, is being continually increased.

The demand for LCD panels for Notebook Computers & Monitors has been closely related to the IT industry cycle. The demand for LCD panels for TVs is growing with the start of HDTV broadcasting and as LCD TV is anticipated to play a key role in the digital display market. There is a competition between TFT-LCD and PDP technologies in the area of large flat TV products. In addition, LCD panel markets for applications, such as mobile phones, PDAs, medical applications and automobile navigation systems, among others, are growing steadily.

The average selling prices of our display panels have declined in general and are expected to continually decline with time irrespective of industry-wide fluctuations as a result of, among other factors, technology advances and cost reductions.

(2) Cyclicalities

The TFT-LCD business has high cyclicalities as well as being a capital intensive business. In spite of the increase in demand for products, this industry has experienced periodic volatility caused by imbalances between demand and supply due to capacity expansion within the industry.

Intense competition and expectations of demand growth may lead panel manufacturers to invest in manufacturing capacity on similar schedules, resulting in a surge in capacity when production is ramped up at new fabrication facilities.

During such surges in capacity growth, our customers can exert and have exerted strong downward pricing pressure, resulting in sharp declines in average selling prices and significant fluctuations in our gross margins. Conversely, demand surges and fluctuations in the supply chain can lead to price increases.

(3) Competitiveness

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, performance and reliability, successful and timely investment and product development, success of our end-brand customers in marketing their brands and products, component and raw material supply costs, foreign exchange rate and general economic and industry conditions.

Core competitiveness includes technology leadership, capability to design new products and premium products, timely investment in advanced fabs, cost leadership through application of large production lines, innovation of process and productivity, and collaborative customer relationships.

Most importantly, cost leadership and stable and long-term relationships with customers are critical to secure profit even in a buyer's market.

A substantial portion of our sales is attributable to a limited group of end-brand customers and their designated system integrators. The loss of these end-brand customers, as a result of customers entering into strategic supplier arrangements with our competitors or otherwise, would thus result in reduced sales.

Developing new products and technologies that can be differentiated from those of our competitors is critical to the success of our business. We take active measures to protect our intellectual property internationally by obtaining patents and undertaking monitoring activities in our major markets. It is also necessary to recruit and retain the experienced key staffs and highly skilled line operators.

(4) Sourcing material

Materials are sourced in-house (color filters) as well as from domestic and overseas vendors. Recently, the domestic portion has grown due to the active participation of domestic vendors.

The shortage of raw materials may arise temporarily due to the rapid increase in demand for raw materials resulting from capacity expansion in the TFT-LCD industry.

We have purchased, and expect to purchase, a substantial portion of our equipment from a limited number of qualified foreign and local suppliers. From time to time, increased demand for new equipment may cause lead times to extend beyond those normally required by the equipment vendors.

(5) Others

Most TFT-LCD panel makers are located in Asia.

- a. Korea: LG.Philips LCD, Samsung Electronics (including Joint Venture between Samsung Electronics and Sony Corporation), BOE-Hydis
- b. Taiwan: AU Optronics, Chi Mei Optoelectronics, CPT, QDI, etc.
- c. Japan: Sharp, IPS-Alpha, etc.
- d. China: SVA-NEC, BOE-OT, etc.

B. Company

(1) Business overview

We started the TFT-LCD business in 1998. We currently operate seven fabrication facilities located in Gumi and Paju, Korea and four module facilities located in Gumi & Paju, Korea and Nanjing, China.

We became the first LCD maker in the world which commenced commercial production at a 4th generation fab (P3) in July 2000 and at a 5th generation fab (P4) in March 2002, and we started mass production at our 6th generation fab (P6) in August 2004, which allows us to produce LCD panels for large TVs and monitors. Following mass production at our 7th generation fab (P7) in January 2006, we became a panel maker who operates both 6th and 7th generation lines, which we believe will strengthen our position as a leader in the LCD TV market.

Non-consolidated sales revenue in the first half of 2006 increased by about 19% to KRW 4,504 billion compared to KRW 3,799 billion in the first half of 2005.

Due to a sudden fall in product prices and appreciation of KRW, we incurred a non-consolidated operating loss of KRW 410 billion in the first half of 2006 compared with an operating loss of KRW 134 billion in the first half of 2005. We also incurred a non-consolidated net loss of KRW 274 billion in the first half of 2006 compared with a non-consolidated net loss of KRW 38 billion in the first half of 2005.

Business area of the company for disclosure is limited to LCD business.

Total	19.3%	22.2%	20.9%

(3) Market characteristics

Due to the recent high growth in the display appliance market for the flat display format, the scale of the LCD market is growing at a rapid rate, resulting in expansion of the market centered mainly in America, Japan, Europe and China.

(4) New business

Due to our downward adjustment of 2006 capital expenditure, P7 is expected to reach a production capacity of 75,000 input glass sheets per month by the end of 2006.

We have commenced building construction of P8 at our Paju display cluster in Korea in anticipation of growth in the TFT-LCD market, and decided to invest in a multi-purpose generation 5.5 facility at P8 plant to meet our customer's forthcoming needs, particularly in the expanding wide format notebook and high-end monitor segments.

In September 2005, we entered into an agreement to build a back-end module production plant in Wroclaw, Poland, becoming the first global LCD industry player to commence such a production facility in Europe. We broke ground on the plant in June 2006 and expect to begin production during the first half of 2007.

In May 2006, we have entered into an investment agreement with the Guangzhou Development District Administrative Committee to construct a module production plant in Guangzhou, China, and in August 2006, we established LG.Philips LCD Guangzhou Co., Ltd.

Ordinary income (loss) per share is computed by dividing ordinary income (loss) allocated to common stock, which is net income (loss) allocated to common stock as adjusted by extraordinary gains or losses, net of related income taxes, by the weighted-average number of common shares outstanding during the period.

Earnings (loss) per share for the three-month and six-month periods ended June 30, 2006 and 2005, is calculated as follows:

<i>(in millions, except for per share amount)</i>	For the three-month periods ended June 30,		For the six-month periods ended June 30,	
	2006	2005	2006	2005

Earnings (loss) per share	(Won) (899)	(Won) 126	(Won) (766)	(Won) (116)

2. Summary of Significant Accounting Policies

The significant accounting policies followed by the Company and its consolidated subsidiaries (collectively referred to as the consolidated companies) in the preparation of the accompanying consolidated financial statements, are same as those followed by the company in its preparation of annual consolidated financial statements and are summarized below.

Basis of Consolidated Financial Statement Presentation

The Company maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles in other countries. Accordingly, these consolidated financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying consolidated financial statements have been condensed, restructured and translated into English from the Korean language consolidated financial statements. Certain information attached to the Korean language financial statements, but not required for a fair presentation of the Company's financial position and results of operations, is not presented in the accompanying consolidated financial statements.

Accounting Estimates

The preparation of the financial statements requires management to make estimates and assumptions that affect amounts reported therein. Although these estimates are based on management's best knowledge of current events and actions that the Company may undertake in the future, actual results may differ from those estimates.

Application of the Statements of Korean Financial Accounting Standards

The Korean Accounting Standards Board has published a series of Statements of Korean Financial Accounting Standards (SKFAS), which will gradually replace the existing financial accounting standards established by the Korean Financial Supervisory Commission. As SKFAS Nos. 15 through 17 became applicable to the Company on January 1, 2005, the Company adopted these Standards in its financial statements covering periods beginning January 1, 2005.

And as SKFAS Nos. 18 through 20 became effective for the Company on January 1, 2006, the Company adopted these Standards in its financial statements for the six-month period ended June 30, 2006.

3. Financial Instruments

As of June 30, 2006 and December 31, 2005, long-term financial instruments represent key money deposits required to maintain checking accounts and, accordingly, the withdrawal of such deposits is restricted.

ownership of certain patents. In June 2006, the American Arbitration Association decided that the ownership of certain patents is in the Company.

In May 2004, the Controlling Company filed a complaint against Tatung Co., the parent company of Chunghwa Picture Tubes and ViewSonic Corp. and others, claiming patent infringement of rear mountable liquid crystal display devices in the United States District of Delaware and the Patent Country Court in the United Kingdom. On September 20, 2005, the United States District Court for the Central District of California dismissed the patent case against Tatung Company and other defendants regarding the patent infringement by Chunghwa Picture Tubes relating to side mounting patent. Thereafter, the Controlling Company has revised its claim and has refilled the above complaint including the side mounting patent. The Controlling Company's management does not expect that the outcome in any of these legal proceedings, individually or collectively, will have any material adverse effect on the Controlling Company's financial condition, results of operations or cash flows.

LG. Philips LCD Co., Ltd.**Notes to Consolidated Financial Statements (Unaudited)****June 30, 2006 and 2005****6. Stock Appreciation Plan**

Effective January 1, 2005, the company adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 123(R), Share-Based Payment (SFAS 123(R)). SFAS 123(R) establishes accounting for stock-based awards exchanged for employee services. SFAS No. 123(R) requires that an award that is classified as a liability to be initially measured at its grant date fair value and remeasured at fair value at the end of each reporting period until the award is settled or expires. The measurement is based on the current stock price and other relevant factors. The difference between the fair value amounts is recognized as compensation expense during the requisite service period, based on the percentage of the requisite service that the employee has rendered as of that date. In accordance with SFAS No. 123(R), compensation expense is remeasured at each reporting date, based on the fair value of the award, and is recognized as expense over the employee requisite service period.

The following table shows total stock-based compensation expense included in the consolidated statement of operations:

<i>(in millions of Korean won)</i>	June 30, 2006
Cost of goods sold	(Won) 405
Selling general and administrative	217
Income tax benefits	(308)
Total stock-based compensation expense	314

The company estimates the fair value of stock options using a Black-Scholes valuation model, consistent with the provisions of SFAS 123(R) and Securities and Exchange Commission (SEC) Staff Accounting Bulletin No. 107. Key input assumptions used to estimate the fair value of stock options include the grant price of the award, the expected option term, volatility of the company's stock, the risk-free rate and the company's dividend yield. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by selected managements who receive SARs, and subsequent events are not indicative of the reasonableness of the original estimates of fair value made by the company under SFAS 123(R).
