**FOR IMMEDIATE RELEASE**

**Hitachi Strengthens Car Information Systems Operations**

Boost R&D efficiency by

consolidating development capabilities to Clarion Group

Tokyo, December 11, 2007 Hitachi, Ltd. (TSE: 6501 / NYSE: HIT) and Clarion Co., Ltd. (TSE: 6796) today announced that they are taking steps to improve the efficiency of product development in the CIS (Car Information Systems) business. The companies plan to dissolve HCX Corporation, their joint-venture for development, on March 31, 2008, and simultaneously transfer its research and development resources to Clarion and its wholly-owned subsidiary, Xanavi Informatics Corporation.

Improving product development by the consolidation of development capabilities to Clarion will strengthen Hitachi's CIS business, business that is believed to continue to expand and diversify in step with advances in automotive internal-external information networking.

Hitachi is committed to strengthening automotive systems operations, including the CIS sector, as a core business of the Hitachi Group. In December 2000, Hitachi, Clarion and Xanavi established HCX\* to develop CIS products, with particular emphasis on establishing a common platform for car navigation systems.

Hitachi and Clarion have progressively reinforced CIS business collaboration. A comprehensive alliance concluded between the companies in 2005 was followed by Clarion becoming a consolidated subsidiary of Hitachi in 2006. Further measures to integrate the Hitachi Group's CIS business operations continued into 2007, with Hitachi's wholly-owned subsidiary Xanavi being made a wholly-owned subsidiary of Clarion in a move aimed at consolidating Clarion and Xanavi production and purchasing functions under Clarion.

By concentrating additional development power within the Clarion Group, the upcoming transfer of HCX development resources will provide Hitachi with the higher product development efficiency it needs to create highly competitive CIS products for a market that is expected to broaden and deepen with advances in networking between cars and the outside world.

In moving forward with CIS business expansion, Hitachi and Clarion are placing priority on the development of basic software and advanced technologies that provide a platform for product enhancement and on achieving higher across-the-board efficiency in areas ranging from material procurement and production to marketing and services.

\* In 2005, HCX shares owned by Xanavi were transferred to Hitachi, thereby making HCX a joint venture company between Hitachi and Clarion.

**Table of Contents**

- 2 -

1. Profile of HCX Corporation

- 1) Headquarters : 12-6, Higashishinagawa 4-chome, Shinagawa-ku, Tokyo
- 2) President : Shoichi Minagawa
- 3) Lines of business : Development of communications equipment, devices and systems for installation in automobiles
- 4) Established : December 21, 2000
- 5) Capital : 100 million yen (as of September 30, 2007)
- 6) Issued shares : 2,000
- 7) Fiscal year : April 1 to March 31
- 8) Number of employees : 47 (as of November 30, 2007)
- 9) Principal shareholders and ownership : Hitachi, Ltd. : 66%  
Clarion Co., Ltd. : 34%

2. Dissolution schedule

HCX will be dissolved and its development resources transferred to Clarion and Xanavi on March 31, 2008.

3. Future prospects

As the effect of the dissolution on the consolidated results of Hitachi and Clarion will be minimal, the companies have not revised their financial forecasts.
