**NEWS RELEASE**

**Release Time** IMMEDIATE  
**Date** 20 January 2011  
**Number** 02/11

**BHP BILLITON PRODUCTION REPORT FOR THE HALF YEAR ENDED 31 DECEMBER 2010**

BHP Billiton continues to benefit from its consistent deployment of capital towards high quality growth projects, with three commodities and five businesses recording half yearly production records.

Record iron ore production and shipments were achieved for both the half year and quarter. Western Australia Iron Ore shipments rose to an annualised rate of 148 million tonnes per annum in the quarter (100% basis).

Other quarterly production records were achieved at Hunter Valley Energy Coal (Australia) and the Alumar refinery (Brazil), while both Olympic Dam (Australia) and Antamina (Peru) reported record milling rates. Record exports from Hunter Valley Energy Coal for the quarter and half year reflected first production from the MAC20 project.

Queensland Coal (Australia) production was significantly affected by the persistent rain and flooding that impacted the Bowen Basin during the period. In the December 2010 quarter, Queensland Coal production declined by 30% when compared with the September 2010 quarter, while sales declined by 15%. The decision to increase pumping and drainage capacity following severe wet weather in the March 2008 quarter has minimised inpit water accumulation, although heavy rainfall that persisted for much of the December 2010 half year has significantly restricted overburden removal. When combined with disruption to external infrastructure, we expect an ongoing impact on production, sales and unit costs for the remainder of the 2011 financial year.

Permitting delays in the Gulf of Mexico (USA) continue to impact our Petroleum operations, causing the deferral of drilling of high volume production wells. Our current expectation is that production volumes for the 2011 financial year will be in line with the 2010 financial year.

Robust growth in developing economies remains the primary driver of commodity demand and further positive signs are emerging in the United States following the Federal Reserve's ongoing efforts to stimulate the economy. When coupled with supply side constraint, which has been further exacerbated by weather related disruptions in countries such as Australia, Colombia and South Africa, BHP Billiton remains confident in the fundamentals for its core products.

**Petroleum**

	DEC 2010 HALF	DEC 2010 QTR	DEC H09 vs DEC	DEC Q10 vs DEC Q09	DEC Q10 vs SEPT Q10
Crude Oil, Condensate and Natural Gas Liquids ( 000 bbl)	48,944	23,494	0%	-1%	-8%
Natural Gas (bcf)	188.37	82.54	-1%	-9%	-22%
Total Petroleum Products (million boe)	80.34	37.25	0%	-4%	-14%

**Total Petroleum Production** Production was in line with the December 2009 half year as the successful ramp up of Pyrenees (Australia) was offset by the deferral of production well drilling in the Gulf of Mexico and severe flooding in Pakistan. Production was lower than the September 2010 quarter following lower than average seasonal demand in Eastern Australia and planned downtime activities at operated and

## Edgar Filing: BHP BILLITON LTD - Form 6-K

non-operated facilities.

Our current expectation is that production volumes for the 2011 financial year will be in line with the 2010 financial year.

**Crude Oil, Condensate, and Natural Gas Liquids** Production growth at Pyrenees in the December 2010 half year was offset by the drilling moratorium in the Gulf of Mexico and associated permitting delays. There were no weather related impacts in the Gulf of Mexico through the hurricane season.

**Natural Gas** Strong LNG production from North West Shelf (Australia) in the December 2010 half year was offset by severe flooding in Pakistan. Quarterly production was lower than comparable periods following a steeper than average decline in seasonal demand in Eastern Australia.

**Aluminium**

			DEC H10	DEC Q10	DEC Q10
	DEC	DEC	vs	vs	vs
	2010	2010	DEC	DEC	SEPT
	HALF	QTR	H09	Q09	Q10
Alumina ( 000 tonnes) (a)	2,025	1,025	14%	9%	2%
Aluminium ( 000 tonnes)	628	314	0%	0%	0%

**Alumina** Production was higher than all comparable periods due to the ongoing ramp up of the Alumar refinery. Production in the December 2009 half year was impacted by an unplanned calciner outage at Worsley (Australia).

**Aluminium** Production across all operations was in line with comparable periods.

**Base Metals**

			DEC H10	DEC Q10	DEC Q10
	DEC	DEC	vs	vs	vs
	2010	2010	DEC	DEC	SEPT
	HALF	QTR	H09	Q09	Q10
Copper ( 000 tonnes)	593.5	302.3	7%	11%	4%
Lead (tonnes)	134,066	64,925	8%	3%	-6%
Zinc (tonnes)	77,142	36,945	-27%	-38%	-8%
Silver ( 000 ounces)	23,723	11,571	6%	-1%	-5%
Uranium Oxide Concentrate (Uranium) (tonnes)	1,967	957	33%	175%	-5%

**Copper** Production was higher than all comparable periods and reflected solid performance across all operations, including record milling rates for Olympic Dam and Antamina. Additionally, the Pampa Norte Cerro Colorado (Chile) operation reported record milling rates for the December 2010 half year. The December 2009 quarter was impacted by the Clark Shaft outage at Olympic Dam and industrial action at the Pampa Norte Spence (Chile) operation.

Escondida (Chile) continues to expect production for the 2011 financial year to decline by five to 10 per cent when compared with the 2010 financial year, mainly due to lower ore grades.

At 31 December 2010, the Group had 287,276 tonnes of outstanding copper sales that were revalued at a weighted average price of US\$4.30 per pound. The final price of these sales will be determined over the remainder of the 2011 financial year. In addition, 236,584 tonnes of copper sales from the 2010 financial year were subject to a finalisation adjustment in the current period. The finalisation adjustment and provisional pricing impact as at 31 December 2010 will increase earnings(b) by US\$667 million for the period.

**Lead/Silver** Cannington (Australia) production was higher than the December 2009 half year with stronger grades more than offsetting lower milling rates due to planned maintenance.

**Zinc** Production decreased in the December 2010 quarter as the Antamina mine plan progressed through a copper rich ore zone.

**Uranium** Olympic Dam achieved record ore hoisting rates for the December 2010 half year following the successful repair of the Clark Shaft. Lower uranium grades and planned maintenance impacted production during the quarter.

**Diamonds & Specialty Products**

			DEC H10	DEC Q10	DEC Q10
	DEC	DEC	vs	vs	vs
	2010	2010	DEC	DEC	SEPT
	HALF	QTR	H09	Q09	Q10

Edgar Filing: BHP BILLITON LTD - Form 6-K

Diamonds ( 000 carats)	1,379	676	-10%	-11%	-4%
------------------------	-------	-----	------	------	-----

**Diamonds** Production for the December 2010 quarter was lower than both comparable periods due to a decrease in ore processed and lower average grade. Production continues to be influenced by the variability of ore sources due to the mix of open pit and underground mining.

**Stainless Steel Materials**

	DEC 2010 HALF	DEC 2010 QTR	DEC vs DEC H09	DEC vs DEC Q09	DEC vs SEPT Q10
Nickel ( 000 tonnes) (c)	81.5	43.0	-3%	-12%	12%

**Nickel** Contained nickel production was marginally lower than the December 2009 half year, which included the drawdown of accumulated Nickel West (Australia) concentrate stocks. Metal volumes were impacted by the disruption of hydrogen and nitrogen gas supply at the Nickel West Kwinana refinery (Australia), however this was offset by the increased export of nickel in matte production.

As announced previously, Cerro Matoso (Colombia) production will be impacted for nine months due to the planned replacement of one of its two furnaces, commencing in the second half of the 2011 financial year.

### Iron Ore

	DEC 2010 HALF	DEC 2010 QTR	DEC vs DEC H09	DEC vs DEC Q09	DEC vs SEPT Q10
			DEC H10	DEC Q10	DEC Q10
Iron Ore ( 000 tonnes)	65,649	33,666	5%	4%	5%

**Iron Ore** Record production and shipments were achieved for both the half year and quarter ended December 2010 despite the impact of ongoing tie-in activities related to its growth projects. Western Australia Iron Ore shipments rose to an annualised rate of 148 million tonnes per annum in the quarter (100% basis).

Samarco (Brazil) continued to operate above nameplate capacity during the period, recording strong performance across all three pellet plants.

BHP Billiton remains committed to its long term customer relationships and the transition to shorter term market based pricing.

### Manganese

	DEC 2010 HALF	DEC 2010 QTR	DEC vs DEC H09	DEC vs DEC Q09	DEC vs SEPT Q10
			DEC H10	DEC Q10	DEC Q10
Manganese Ore ( 000 tonnes)	3,951	1,829	47%	19%	-14%
Manganese Alloy ( 000 tonnes)	391	192	102%	47%	-4%

**Manganese Ore** Half year production records were achieved for manganese ore and at GEMCO (Australia), facilitated by a significant improvement in market demand when compared with the December 2009 half year. Production was lower than the September 2010 quarter and reflected safety related downtime at Hotazel (South Africa) and wet weather impacts at GEMCO.

Record sales for the December quarter benefited from inventory that was accumulated in the prior quarter when port maintenance was undertaken at GEMCO.

**Manganese Alloy** Production in the December 2010 quarter was broadly in line with the September 2010 quarter. Record manganese alloy sales were also achieved during the quarter.

### Metallurgical Coal

	DEC 2010 HALF	DEC 2010 QTR	DEC vs DEC H09	DEC vs DEC Q09	DEC vs SEPT Q10
			DEC H10	DEC Q10	DEC Q10
Metallurgical Coal ( 000 tonnes)	18,086	7,787	-1%	-12%	-24%

**Metallurgical Coal** Queensland Coal production was significantly affected by the persistent rain and flooding that impacted the Bowen Basin in the December 2010 half year. In the December 2010 quarter, Queensland Coal production declined by 30 per cent when compared with the September 2010 quarter. The decline in Queensland Coal sales, however, was limited to 15 per cent and benefited from the relatively healthy level of inventory that was held across our supply chain at the commencement of the quarter.

BHP Billiton continues to assess the impact of the extreme weather events and confirms that force majeure has been declared for the majority of our Bowen Basin products, including Goonyella Riverside, Peak Downs, Norwich Park, Gregory Crinum, South Walker and Blackwater.

## Edgar Filing: BHP BILLITON LTD - Form 6-K

The decision to increase pumping and drainage capacity following severe wet weather in the March 2008 quarter has minimised inpit water accumulation, although heavy rainfall that persisted for much of the December 2010 half year has significantly restricted overburden removal. When combined with disruption to external infrastructure, we expect an ongoing impact on production, sales and unit costs for the remainder of the 2011 financial year.

Illawarra (Australia) recorded another quarter of robust production. Two longwall moves are expected to constrain volumes in the March 2011 quarter.

**Energy Coal**

	DEC 2010 HALF	DEC 2010 QTR	DEC H10 vs DEC H09	DEC Q10 vs DEC Q09	DEC Q10 vs SEPT Q10
Energy Coal ( 000 tonnes)	33,619	16,513	0%	7%	-3%

**Energy Coal** Production was higher than the December 2009 quarter having benefited from the start up of the MAC20 project at Hunter Valley Energy Coal and the ongoing ramp up of Klipspruit (South Africa). Record rainfall continued to constrain production at Cerrejon Coal (Colombia). Production was lower than the September 2010 quarter and largely reflected an unplanned outage at New Mexico Coal (USA).

Record exports from Hunter Valley Energy Coal for the quarter and half year, which included a greater proportion of high ash sales, reflected first production from the MAC20 project and the ongoing ramp up of the Newcastle Coal Infrastructure Group (NCIG) port facilities. The increase in sales is occurring as operations are experiencing adverse movements in currency markets, particularly in South Africa and Australia, and additional operating costs ahead of full production from the delivery of growth projects.

(a) Excluding Suriname which was sold effective 31 July 2009.

(b) Earnings before interest and tax.

(c) Excluding Yabulu which was sold effective 31 July 2009.

Throughout this report, unless otherwise stated, production volumes refer to BHP Billiton share and exclude suspended and sold operations.

- (a) LPG and Ethane are reported as Natural Gas Liquid (NGL). Product-specific conversions are made and NGL is reported in barrels of oil equivalent (boe).
- (b) Suriname was sold effective 31 July 2009.

## Edgar Filing: BHP BILLITON LTD - Form 6-K

- (c) Metal production is reported on the basis of payable metal.
- (d) Includes Cerro Colorado and Spence.
- (e) Yabulu was sold effective 31 July 2009.
- (f) Iron ore production is reported on a wet tonnes basis.
- (g) Newman includes Mt Newman Joint Venture and Jimblebar.
- (h) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.
- (i) Production includes Medium Carbon Ferro Manganese.
- (j) Metallurgical coal production is reported on the basis of saleable product. Production figures include some thermal coal.
- (k) Shown on 100% basis. BHP Billiton interest in saleable production is 80%.
