If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): n/a

NEWS RELEASE

Release Time IMMEDIATE

Date 20 July 2011

Number 21/11

BHP BILLITON PRODUCTION REPORT FOR THE YEAR ENDED 30 JUNE 2011

Annual production records were achieved across four commodities and ten operations as a result of our strategy to invest throughout the economic cycle.

Eleventh consecutive annual production record achieved in Iron Ore while Western Australia Iron Ore shipments rose to an annualised rate of 155 million tonnes per annum in the June 2011 quarter (100% basis).

Annual production and sales records for Hunter Valley Energy Coal (Australia) following the commissioning and ramp up of the MAC20 project and utilisation of our Newcastle Coal Infrastructure Group (NCIG) port capacity.

The successful integration of the Fayetteville Shale (USA), combined with strong underlying performance from existing assets, delivered an increase in annual petroleum production, despite the ongoing impact of permitting delays in the Gulf of Mexico (USA). Annual production records were achieved for natural gas and at North West Shelf (Australia).

Copper production increased during the 2011 financial year as Olympic Dam (Australia) reported annual material mined and milling records. Strong operating performance was similarly reported at Pampa Norte (Chile) and Antamina (Peru), where record annual milling rates were recorded.

Petroleum

	JUN 2011 YTD	JUN 2011 QTR	vs JUN YTD10	vs JUN Q10	JUN Q11 vs MAR Q11
Crude oil, condensate and natural gas liquids (000 bbl)	91,874	21,288	-5%	-17%	-2%
Natural gas (bcf)	405.06	131.79	10%	45%	55%
Total petroleum products (million boe)	159.38	43.25	1%	6%	21%

Total petroleum production The successful integration of the Fayetteville Shale, combined with strong underlying performance from existing assets, delivered an increase in annual petroleum production, despite the ongoing impact of permitting delays in the Gulf of Mexico.

During the June 2011 quarter, BHP Billiton brought the first new deepwater well into production since the Gulf of Mexico moratorium was enacted in May 2010. This important milestone, achieved at the BHP Billiton operated Shenzi field (USA), followed previous regulatory approvals for water injection and production well drilling. However, permitting delays in the Gulf of Mexico continue to impact our Petroleum operations and the drilling of high volume production wells. When excluding volume growth from the Fayetteville Shale acquisition, we continue to expect production to be lower in the 2012 financial year.

Crude oil, condensate and natural gas liquids Strong performance from the BHP Billiton operated Pyrenees field (Australia) during the year was offset by lower production in the Gulf of Mexico, planned maintenance at Bass Strait (Australia) and tie-in activities at North West Shelf.

Natural gas Natural gas production was higher than all comparable periods following the acquisition of the Fayetteville Shale, first production from the Angostura Gas Phase II project (Trinidad and Tobago) and record annual performance at North West Shelf. The seasonal increase in demand in South Eastern Australia resulted in higher natural gas production at Bass Strait in the June 2011 quarter.

Aluminium

	JUN 2011 YTD	JUN 2011 QTR	JUN YTD11 vs JUN YTD10	JUN Q11 vs JUN Q10	JUN Q11 vs MAR Q11
Alumina (000 tonnes) (a)	4,010	1,026	7%	7%	7%
Aluminium (000 tonnes)	1,246	313	0%	1%	3%

Alumina The ongoing ramp up of the Alumar refinery (Brazil) contributed to a seven per cent increase in total alumina production for the 2011 financial year. A nine per cent increase in alumina production at Worsley (Australia) for the quarter was associated with the processing of hydrate accumulated during the recent calciner outage.

Aluminium Production was in line with comparable periods with all operations running close to capacity.

Base Metals

	JUN 2011 YTD	JUN 2011 QTR	JUN YTD11 vs JUN YTD10	JUN Q11 vs JUN Q10	JUN Q11 vs MAR Q11
Copper (000 tonnes)	1,139.4	272.3	6%	-6%	0%
Lead (tonnes)	244,554	58,578	-2%	-7%	13%
Zinc (tonnes)	152,127	34,733	-23%	-24%	-14%
Silver (000 ounces)	42,656	9,877	-6%	-13%	9%
Uranium oxide concentrate (Uranium) (tonnes)	4,045	1,015	77%	43%	-5%

Copper Copper production increased during the 2011 financial year as Olympic Dam reported annual material mined and milling records, further emphasising the strong recovery in performance that followed last year's Clark Shaft outage. Strong operating performance was similarly reported at Pampa Norte and Antamina, where record annual milling rates mitigated the impact of lower grades. Record annual copper cathode production was delivered into a strong pricing environment.

Consistent with prior guidance, production at Escondida (Chile) declined by eight per cent compared with the 2010 financial year, largely due to lower ore grades. While Escondida production is likely to remain largely unchanged in the 2012 financial year, volumes are expected to be weighted to the second half, consistent with the mine plan. Production is expected to improve beyond the 2012 financial year as mining activities progress towards higher grade ore with completion of the Escondida Ore Access project in the main pit.

At 30 June 2011 the Group had 239,156 tonnes of outstanding copper sales that were revalued at a weighted average price of US\$4.25 per pound. The final price of these sales will be determined in the 2012 financial year.

In addition, 236,584 tonnes of copper sales from the 2010 financial year were subject to a finalisation adjustment in 2011. The finalisation adjustment and provisional pricing impact as at 30 June 2011 will increase earnings(b) by US\$650 million for the year (year ended June 2010 was a US\$303 million gain).

Lead/silver Production recovered following weather related disruptions at Cannington (Australia) in the March 2011 quarter.

Zinc Production was lower than all comparable periods as lower zinc grades at Antamina offset strong operating performance that included annual material mined and milling records.

Uranium Olympic Dam achieved record mining and milling rates for the 2011 financial year following the successful repair of the Clark Shaft.

Diamonds & Specialty Products

	JUN 2011 YTD	JUN 2011 QTR	JUN YTD11 vs JUN YTD10	JUN Q11 vs JUN Q10	JUN Q11 vs MAR Q11
Diamonds (000 carats)	2,506	576	-18%	-22%	5%

Diamonds Production was lower than the year and quarter ended June 2010 primarily due to lower average ore grades. Production continues to be influenced by the variability of ore sources due to the mix of open pit and underground mining. Consistent with the mine plan, BHP Billiton expects lower average ore grades to impact EKATI (Canada) production in the 2012 financial year.

Stainless Steel Materials

	JUN 2011 YTD	JUN 2011 QTR	JUN YTD11 vs JUN YTD10	JUN Q11 vs JUN Q10	JUN Q11 vs MAR Q11
Nickel (000 tonnes) (c)	152.7	38.2	-12%	-16%	16%

Nickel The Nickel West Kalgoorlie smelter (Australia) achieved record matte production during the 2011 financial year, offsetting lower metal production that was constrained by the availability of hydrogen supply. Our wholly owned Nickel West mines performed strongly throughout the year, although the adverse movement in currency markets continued to flow through to our cost base.

Production at Cerro Matoso (Colombia) continues to be impacted by the planned furnace replacement, which commenced in February 2011 and is currently being commissioned.

Iron Ore

	JUN 2011 YTD	JUN 2011 QTR	JUN YTD11 vs JUN YTD10	JUN Q11 vs JUN Q10	JUN Q11 vs MAR Q11
Iron ore (000 tonnes)	134,406	35,526	8%	14%	7%

Iron ore BHP Billiton's commitment to invest through all phases of the economic cycle delivered an eleventh consecutive annual production record in iron ore. Western Australia Iron Ore benefited from the dual tracking of the company's rail infrastructure, increasing overall system capability. Western Australia Iron Ore shipments rose to a record annualised rate of 155 million tonnes per annum in the June 2011 quarter (100% basis).

Samarco (Brazil) production recovered strongly following planned maintenance in the March 2011 quarter.

Manganese

	JUN 2011 YTD	JUN 2011 QTR	JUN YTD11 vs JUN YTD10	JUN Q11 vs JUN Q10	JUN Q11 vs MAR Q11
Manganese ore (000 tonnes)	7,093	1,790	16%	4%	32%
Manganese alloy (000 tonnes)	753	190	29%	-13%	10%

Manganese ore Record annual production and sales reflected a full year contribution from the GEMCO (Australia) phase 1 expansion project and the improvement in market demand that occurred notwithstanding a general softening in prices in the latter part of the 2011 financial year. Production in the March 2011 quarter was impacted by safety related downtime at Hotazel (South Africa) and heavy rainfall at GEMCO.

Manganese alloy Metalloys (South Africa) and TEMCO (Australia) reported annual sales records despite maintenance activities that were undertaken during the March and June 2011 quarters.

Metallurgical Coal

	JUN 2011 YTD	JUN 2011 QTR	JUN YTD11 vs JUN YTD10	JUN Q11 vs JUN Q10	JUN Q11 vs MAR Q11
Metallurgical coal (000 tonnes)	32,678	7,922	-13%	-28%	19%

Metallurgical coal The remnant effects of wet weather that persisted for much of the 2011 financial year continued to restrict our Queensland Coal (Australia) business, despite an unrelenting focus on recovery efforts. While production did improve in the June 2011 quarter, sales remained well below the record level achieved in the previous corresponding quarter. We continue to expect production, sales and unit costs to be impacted, to some extent, for the remainder of the 2011 calendar year.

Illawarra Coal (Australia) production was impacted by longwall moves at both Dendrobium and Appin during the June 2011 quarter. A longwall move at West Cliff is scheduled to commence in September 2011.

Energy Coal

	JUN 2011 YTD	JUN 2011 QTR	JUN YTD11 vs JUN YTD10	JUN Q11 vs JUN Q10	JUN Q11 vs MAR Q11
Energy coal (000 tonnes)	69,500	18,338	5%	13%	5%

Energy coal Annual production and sales records for Hunter Valley Energy Coal followed the successful commissioning and ramp up of the MAC20 project and utilisation of our Newcastle Coal Infrastructure Group (NCIG) port capacity. Strong performance at South Africa Coal, which delivered a 13 per cent increase in annual production, was partly offset by planned and unplanned outages at New Mexico Coal (USA) and weather related disruptions at Cerrejon Coal (Colombia).

- (a) Excluding Suriname which was sold effective 31 July 2009.
- (b) Earnings before interest and tax.
- (c) Excluding Yabulu which was sold effective 31 July 2009.

Throughout this report, unless otherwise stated, production volumes refer to BHP Billiton share and exclude suspended and sold operations.

- (a) LPG and Ethane are reported as Natural Gas Liquid (NGL). Product-specific conversions are made and NGL is reported in barrels of oil equivalent (boe).
- (b) Suriname was sold effective 31 July 2009.
- (c) Metal production is reported on the basis of payable metal.

Edgar Filing: BHP BILLITON LTD - Form 6-K

- (d) Includes Cerro Colorado and Spence.
- (e) Yabulu was sold effective 31 July 2009.
- (f) Iron ore production is reported on a wet tonnes basis.
- (g) Newman includes Mt Newman Joint Venture and Jimblebar.
- (h) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.
- (i) Production includes Medium Carbon Ferro Manganese.
- (j) Metallurgical coal production is reported on the basis of saleable product. Production figures include some thermal coal.
- (k) Shown on 100% basis. BHP Billiton interest in saleable production is 80%.
