⁽¹⁾ Interest rates vary as LIBOR varies. At March 31, 2012, the interest rate was between 1.1% and 1.2%.

In 2008, the Company entered into a Term Loan Agreement ("Term Loan") with certain financial institutions, whereby it borrowed an aggregate principal amount of \$165.0 million. During 2011, the Company repaid \$20.0 million of the Term Loan. The Term Loan matures in June 2013, and borrowings generally bear interest at a variable rate equal to a margin over LIBOR. The margin varies with the ratio of the Company's total funded debt to consolidated earnings before interest, taxes, depreciation, and amortization ("EBITDA") as defined in the Loan Agreement. These interest rates also vary as LIBOR varies. At March 31, 2012, the interest rate of 1.2% was based on a margin over LIBOR.

The Company also has a \$500.0 million revolving credit facility (the "Facility") that matures in June 2016. The Facility permits the Company to borrow at interest rates based upon a margin above LIBOR. The margin varies with the ratio of total funded debt to EBITDA, net of specified cash, as defined in the Facility. These interest rates also vary as LIBOR varies. At March 31, 2012, the interest rate of 1.7% was based on a margin over LIBOR. The Company pays a commitment fee on the unused amount of the Facility, which also varies with the ratio of total funded debt to EBITDA.

The Notes, the Term Loan, and the Facility require the Company to meet specified financial ratios and to satisfy certain financial condition tests. The Company was in compliance with all financial debt covenants as of March 31, 2012.

The Company entered into interest rate swap agreements to manage fluctuations in cash flows resulting from interest rate risk. (See also Note 14 of Notes to Condensed Consolidated Financial Statements.)

At March 31, 2012, other notes payable of approximately \$20.2 million were outstanding with a weighted average interest rate of 2.4%.

9. PENSION PLANS

The Company's net periodic defined benefit pension cost is comprised of the following components (in millions):

	Three Months Ended	
	March 31, 2012	April 2, 2011
Service cost	\$ 0.6	\$ 0.7
Interest cost	1.9	2.0
Expected return on plan assets	(1.8)	(1.8)
Amortization of prior service cost and net actuarial loss	0.9	0.9
Net periodic benefit expense	\$ 1.6	\$ 1.8

The estimated net actuarial loss and prior service cost for defined benefit pension plans that will be amortized from accumulated other comprehensive income (loss) into net periodic benefit cost during the 2012 fiscal year is \$3.6 million and \$0.2 million, respectively.

During the first three months of 2012 and 2011, the Company contributed \$1.8 million and \$0.6 million, respectively, to defined benefit pension plans. The Company expects to contribute an additional \$5.9 million, for total contributions of \$7.7 million in 2012. The Company contributed a total of \$6.5 million in 2011. The assumptions used in the valuation of the Company's pension plans and in the target investment allocation have remained the same as those disclosed in the Company's 2011 Annual Report on Form 10-K filed on February 29, 2012.

10. SHAREHOLDERS' EQUITY

Edgar Filing: REGAL BELOIT CORP - Form 10-Q

The Company recognized approximately \$2.1 million and \$1.8 million in share-based compensation expense for the three month period ended March 31, 2012 and April 2, 2011, respectively. The total excess income tax benefit recognized relating to share-based compensation for the three months ended March 31, 2012 and April 2, 2011 was approximately \$0.6 million and \$0.4 million, respectively. The Company recognizes compensation expense on grants of share-based compensation awards on a straight-line basis over the vesting period of each award. As of March 31, 2012, total unrecognized compensation cost related to share-based compensation awards was approximately \$17.9 million, net of estimated forfeitures, which the Company expects to recognize over a weighted average period of approximately 2.9 years.

The Company was authorized, as of March 31, 2012, to deliver up to 5.0 million shares of common stock upon exercise of non-qualified stock options or incentive stock options, or upon grant or in payment of stock appreciation rights, restricted stock and restricted stock units. Approximately 1.3 million shares were available for future grant or payment under the various plans at March 31, 2012.

Share-based Incentive Awards

The Company uses several forms of share-based incentive awards, including non-qualified stock options, incentive stock options, and stock appreciation rights (SARs). All grants are made at prices equal to the fair market value of the stock on the grant dates, and expire ten years from the grant date.

The majority of the Company's annual share-based incentive awards are made in the fiscal second quarter.

A summary of share-based awards (options and SARs) as of March 31, 2012 follows below. Forfeitures of share-based awards during the three months ended March 31, 2012 totaled 5,610.

		Wtd. Avg. Exercise Price	Wtd. Avg. Remaining Contractual Term (years)	Average Intrinsic Value (in millions)
Number of Shares	Shares

The Company values restricted stock and restricted stock unit awards at the closing market value of its common stock on the date of grant and restrictions generally lapse three years after the date of the grant. In the first three months of 2012, 750 shares of restricted stock vested with a weighted average fair value of \$58.77 per share and 1,461 restricted stock awards were granted with a weighted average fair value of \$68.44 per share.

11. INCOME TAXES

The effective tax rate for the three months ended March 31, 2012 was 26.3% versus 31.2% for the three months ended April 2, 2011. The change in the effective rates was primarily driven by the worldwide distribution of income and the reduction of a non-U.S. tax item of \$1.4 million.

As of both March 31, 2012 and December 31, 2011, the Company had approximately \$7.1 million of unrecognized tax benefits, all of which would affect its effective tax rate if recognized. The Company recognizes interest and penalties related to uncertain tax positions in income tax expense.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. Federal tax returns from 2008 through 2011 and various state tax returns remain subject to income tax examinations by tax authorities.

12. EARNINGS PER SHARE (EPS)

The numerator for the calculation of basic and diluted earnings per share is Net Income Attributable to Regal Beloit Corporation. The denominator is computed as follows (in millions):

	Three Months Ended	
	March 31, 2012	April 2, 2011
Denominator for basic EPS (weighted average)	41.6	38.6
Effect of dilutive securities	0.4	0.5
Denominator for diluted EPS	42.0	39.1

Edgar Filing: REGAL BELOIT CORP - Form 10-Q

The Effect of dilutive securities represents the dilution impact of equity awards for the three months ended March 31, 2012 and April 2, 2011, respectively. As of the above periods, the Company had approximately 0.4 million and 0 shares, respectively, where the exercise price was above the market price, and which were excluded from the calculation of the effect dilutive shares as the effect of such options was anti-dilutive.

13. CONTINGENCIES

One of the Company's subsidiaries that it acquired in 2007 is subject to numerous claims filed in various jurisdictions relating to certain sub-fractional motors that were primarily manufactured through 2004 and that were included as components of residential and commercial ventilation units marketed by a third party. These claims generally allege that the ventilation units were the cause of fires. Based on the current facts, the Company does not believe these claims, individually or in the aggregate, will have a material effect on its results of operations or financial condition. The Company is, from time to time, party to litigation that arises in the normal course of its business operations, including product warranty and liability claims, contract disputes and environmental, asbestos, employment and other litigation matters. The Company's products are used in a variety of industrial, commercial and residential applications that subject the Company to claims that the use of its products is alleged to have resulted in injury or other damage. The Company accrues for anticipated costs in defending against such lawsuits in amounts that the Company believes are adequate, and the Company does not believe that the outcome of any such lawsuit, individually or in the aggregate, will have a material effect on the Company's financial position or its results of operations.

14. DERIVATIVE INSTRUMENTS

The Company is exposed to certain risks relating to its ongoing business operations. The primary risks managed by using derivative instruments are commodity price risk, currency exchange, and interest rate risk. Forward contracts on certain commodities are entered into to manage the price risk associated with forecasted purchases of materials used in the Company's manufacturing process. Forward contracts on certain currencies are entered into to manage forecasted cash flows in certain foreign currencies. Interest rate swaps are entered into to manage interest rate risk associated with the Company's floating rate borrowings.

The Company must recognize all derivative instruments as either assets or liabilities at fair value in the condensed consolidated balance sheets. The Company designates commodity forward contracts as cash flow hedges of forecasted purchases of commodities, currency forward contracts as cash flow hedges of forecasted foreign currency cash flows and interest rate swaps as cash flow hedges of forecasted LIBOR-based interest payments. There were no significant collateral deposits on derivative financial instruments as of March 31, 2012.

Cash flow hedges

For derivative instruments that are designated and qualify as a cash flow hedge, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income or loss and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or changes in market value of derivatives not designated as hedges are recognized in current earnings.

At March 31, 2012, the Company had an additional (\$0.7) million, net of tax, of derivative losses on closed hedge instruments in Accumulated Other Comprehensive Income (Loss) (AOCI) that will be realized in earnings when the hedged items impact earnings. At April 2, 2011, the Company had an additional \$5.8 million, net of tax, of derivative gains on closed hedge instruments in AOCI that was realized in earnings when the hedged items impacted earnings.

As of March 31, 2012, the Company had outstanding the following commodity forward contracts (with maturities extending through June 2013) to hedge forecasted purchases of commodities (notional amounts expressed in terms of the dollar value of the hedged item in millions):

	Notional Amount
Copper	\$ 130.0
Aluminum	9.9

As of March 31, 2012, the Company had outstanding the following currency forward contracts (with maturities extending through December 2013) to hedge forecasted foreign currency cash flows (in millions):

Indian Rupee	42.8
Chinese Renminbi	41.4
Australian Dollar	5.2
Thai Baht	1.0

As of March 31, 2012, the total notional amount of the Company's receive-variable/pay-fixed interest rate swaps was \$250.0 million (with maturities extending to August 2017).

15. FAIR VALUE

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The inputs used to measure fair value are classified into the following hierarchy:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities
- Level 2 Unadjusted quoted prices in active markets for similar assets or liabilities, or
Unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or
Inputs other than quoted prices that are observable for the asset or liability
- Level 3 Unobservable inputs for the asset or liability

The Company uses the best available information in measuring fair value. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The following table sets forth the Company's financial assets and liabilities that were accounted for at fair value on a recurring basis as of March 31, 2012 and December 31, 2011 (in millions):

	March 31, 2012	December 31, 2011	Classification
Assets:			
Prepaid Expenses and Other Current Assets:			
Derivative Currency Contracts	\$ 18.2	\$ 0.5	Level 2
Derivative Commodity Contracts	16.4	2.6	Level 2
Other Noncurrent Assets:			
Derivative Currency Contracts	4.5	0.1	Level 2
Derivative Commodity Contracts	2.5	1.0	Level 2
Liabilities:			
Other Accrued Expenses:			
Deferred Contingent Purchase Price	\$ 4.0	\$ 2.0	Level 3
Hedging Obligations Current:			
Derivative Currency Contracts	3.2	13.6	Level 2
Derivative Commodity Contracts	11.2	12.5	Level 2
Hedging Obligations:			
Interest Rate Swap	39.8	42.0	Level 2
Derivative Currency Contracts	2.2	11.7	Level 2
Derivative Commodity Contracts	0.4	1.4	Level 2
Other Noncurrent Liabilities:			
Deferred Contingent Purchase Price	19.8	21.5	Level 3

The table below sets forth a summary of changes in fair market value of the Company's Level 3 liabilities for the three months ended March 31, 2012 and April 2, 2011 (in millions):

	XXXXX Three Months Ended March 31, 2012	XXXXX Three Months Ended April 2, 2011
Beginning Balance	\$ 23.5	\$ 11.0
Valuation Adjustments	0.3	(1.2)
Ending Balance	\$ 23.8	\$ 9.8

The Company's derivative contracts are valued at fair value using the market or income approaches. The Company measures the fair value of foreign exchange contracts using Level 2 inputs based on observable spot and forward rates in active markets. The Company measures the fair value of commodity contracts using Level 2 inputs through observable market transactions in active markets provided by financial institutions. The Company measures the fair value of interest rate swaps using Level 2 inputs in an income approach for valuation based on expected interest rate yield curves over the remaining duration of the interest rate swaps. During the quarter ended March 31, 2012, there were no transfers between classification Levels 1, 2 or 3.

The Level 3 liabilities described above are comprised entirely of the deferred contingent purchase price of two of the Company's acquisitions as discussed in Note 3, and are measured using Level 3 inputs. In connection with the two acquisitions, the Company recorded a contingent consideration fair value of \$23.8 million, as of March 31, 2012, which reflects a \$0.3 million increase in the liability from December 31, 2011. The contingent consideration, payable in cash, is based upon sales or earnings before interest and income taxes for the acquired businesses for the applicable contingency period. The fair value of the contingent consideration is a Level 3 input; the measurement of which is derived using a probability weighted discounted cash flow analysis. The Company has estimated that the maximum contingent amount will be paid under both agreements so the key assumption is the estimated timing of the payments. The discounted cash flow utilized risk-based discount rates ranging from approximately 5.0% to 8.0%.

16. RELATED PARTY TRANSACTIONS

As part of the consideration paid for the acquisition of certain assets of Elco S.p.A. on November 1, 2010, the Company assumed \$22.3 million payable to an entity that is affiliated with its Elco Group B.V. joint venture partner resulting from a bankruptcy proceeding involving Elco S.p.A. The amount is payable in semi-annual payments that end in the third quarter of 2012. During the first three months of 2012, \$5.3 million was paid by the Company. The Company has included the remaining balance in Other Accrued Expenses.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Unless the context requires otherwise, references in this Item 2 to we, us, our or the Company refer collectively to Regal Beloit Corporation and its subsidiaries.

Overview

Over the past several years, as part of our strategic growth plans, we have typically acquired multiple businesses in any given fiscal year. When we refer to the financial impact of the recently acquired businesses, we are referring to the results of operations of acquired businesses prior to the first anniversary of their acquisition.

On an ongoing basis, we focus on a variety of key indicators to monitor business performance. These indicators include organic and total sales growth (including volume and price components), gross profit margin, operating profit, net income and earnings per share, and measures to optimize the management of working capital, capital expenditures, cash flow and Return On Invested Capital (ROIC). We monitor these indicators, as well as our corporate governance practices (including our Code of Business Conduct and Ethics), to ensure that we maintain business health and strong internal controls.

To achieve our financial objectives, we are focused on initiatives to drive and fund growth. We seek to capture significant opportunities for growth by identifying and meeting customer product needs within our core product categories, developing new products, and identifying category expansion opportunities. We meet these customer product needs through focused product research and development efforts as well as through a disciplined acquisition strategy. Our acquisition strategy emphasizes acquiring companies that offer market growth potential as a result of geographic base, technology or synergy opportunities. The cash flow needed to fund our growth is developed through continuous, corporate-wide initiatives to lower costs and increase effective asset utilization.

We also prioritize investments that generate higher return on capital businesses. Our management team is compensated based on a modified Economic Value Added (EVA) program which reinforces capital allocation disciplines that drive increases in shareholder value. The key metrics in our program include total sales growth, organic sales growth, operating margin percent and operating cash flow as a percent of net income and ROIC.

Given the current global economic uncertainty, we anticipate that the near-term operating environment will remain challenging. Slower economic growth or recessions in the U.S. and international markets may reduce the demand for our products. In particular, we have seen recent period-to-period declines in sales of our products used in residential HVAC applications, in part due to continued weakness in the U.S. residential housing markets as well as the adverse mix impact of the R22 dry-ship conversion.

Net sales for the first quarter 2012 increased 21.9% to \$807.9 million compared to \$662.7 million in the first quarter 2011. Net sales for the first quarter 2012 included \$202.9 million of incremental net sales from recently acquired businesses.

Net Income Attributable to Regal Beloit Corporation increased 25.5% to \$48.7 million for the first quarter 2012 compared to \$38.8 million for the first quarter 2011. Diluted earnings per share increased to \$1.16 for the first quarter 2012 compared to \$0.99 for the first quarter 2011.

Sales growth rate	23.1%	30.0%
Mechanical segment	\$ 76.5	\$ 68.4
Sales growth rate	11.9%	36.5%

Net sales for the first quarter 2012 included \$202.9 million of incremental net sales from the acquired businesses. Excluding the acquired businesses, net sales for the first quarter 2012 also reflected (i) price increases of approximately 2.9% to offset increased material costs, (ii) an approximately 10.8% decrease related to volume and mix changes and (iii) a decrease in foreign currency translation of approximately 0.6%.

In the Electrical segment, net sales for the first quarter 2012 included \$194.6 million of incremental net sales from the acquired businesses. North American residential HVAC motor net sales, excluding the acquired businesses, decreased 30.2% in the first quarter 2012 from the first quarter 2011. The decrease was driven by a difficult comparison to the 17.9% net sales increase experienced in the first quarter of 2011, as well as a decline in consumer demand for residential HVAC equipment and the adverse impact of the R22 dry ship conversion.

North American commercial and industrial motor net sales, excluding the divested pool and spa business, increased 7.0% in the first quarter 2012 from the first quarter 2011 primarily due to improving economic conditions, sales of energy efficient motors, pricing initiatives to offset commodity inflation and growth in our North American generator business. Mechanical segment net sales for the first quarter 2012 included \$8.4 million from the acquisition of Milwaukee Gear Company. Mechanical segment net sales in North America increased, which helped offset weakness in mechanical sales in Europe and Asia.

Net sales of high efficiency products were 18.1% of total net sales in the first quarter 2012 compared to 18.0% in the first quarter of 2011. The impact of foreign currency exchange rates decreased total net sales by 0.6% for the first quarter 2012 compared to the first quarter 2011. Net sales to regions outside of the United States were 34.2% of total net sales for the first quarter 2012 compared to 36.9% of total net sales for the first quarter 2011.

Gross profit margin for the Mechanical segment was 24.5% for the first quarter 2012, compared to 28.1% in the first quarter 2011. The decrease in the gross margin for the Mechanical segment was primarily due to \$0.5 million of inventory purchase accounting adjustments related to the acquisition of Milwaukee Gear Company.

Electrical segment operating expenses for the first quarter 2012 included \$24.3 million related to the acquired businesses, net of an incremental reduction of \$6.5 million of acquisition related expenses.

Mechanical segment operating expenses decreased primarily due to a gain on sale of assets of \$1.3 million, partially offset by a \$0.5 million increase related to the acquired businesses.

Net interest expense for the first quarter 2012 was \$11.4 million compared to \$4.8 million for the first quarter 2011. The effective tax rate for the first quarter 2012 was 26.3% compared to 31.2% for the first quarter 2011. The change in the effective rates was primarily driven by the worldwide distribution of income and the reduction of a non-U.S. tax item of \$1.4 million.

Liquidity and Capital Resources

Our principal source of liquidity is operating cash flow. In addition to operating income, other significant factors affect the our working capital levels, capital expenditures, dividends, acquisitions, availability of debt financing, and the ability to attract long-term capital on acceptable terms.

Cash flow provided by operating activities (operating cash flow) was \$68.5 million for the three months ended March 31, 2012, a \$12.3 million increase from the three months ended April 2, 2011. The increase in operating cash flow was driven by higher sales volume from 2011 acquisitions reflected in full quarter 2012 operating results. Net income was \$9.1 million higher for the first quarter 2012 compared to the first quarter 2011.

Cash flow used in investing activities was \$110.5 million for the first three months of 2012, a \$130.2 million increase from the first three months of 2011. Capital expenditures were \$19.8 million in the first quarter of 2012. Business acquisitions were \$93.0 million for the first three months of 2012, driven by the acquisition of Milwaukee Gear Company, compared to \$8.6 million in the first three months of 2011.

Cash flow provided by financing activities for the first three months of 2012 was \$61.8 million compared to \$7.2 million in the first three months of 2011, primarily due to the use of the revolving credit facility to fund the Milwaukee Gear acquisition.

Working capital was \$857.0 million at March 31, 2012, an increase of 11.8% from \$766.6 million at December 31, 2011.

The following table presents selected financial information and statistics as of March 31, 2012 and December 31, 2011 (in millions):

	March 31, 2012	December 31, 2011
Cash and Cash Equivalents	\$ 164.2	\$ 142.6
Trade Receivables, Net	508.7	424.2
Inventories, Net	590.6	575.8
Working Capital	857.0	766.6
Current Ratio	2.6:1	2.5:1

Cash and Cash Equivalents totaled \$164.2 million at March 31, 2012. A significant amount of operating income is earned in jurisdictions where it is deemed to be permanently reinvested. Our most prominent jurisdiction of operation is the U.S. We currently do not intend nor foresee a need to repatriate funds to the U.S., and no provision for U.S. income taxes has

been made with respect to such earnings. It is expected that existing cash and cash equivalents available to the U.S., the cash generated by U.S. operations, committed credit lines as well as the expected ability to access the capital markets will be sufficient to fund U.S. operating and capital needs for at least the next twelve months and thereafter for the foreseeable future. There are no current trends, demands or uncertainties that are believed reasonably likely to require repatriation or to have a material impact on the Company's ability to fund its U.S. operations.

At March 31, 2012, we had \$750.0 million of senior notes (the "Notes") outstanding. Details on the senior notes at March 31, 2012 were (in millions):

	Principal	Interest Rate	Maturity
Floating Rate Series 2007A	\$ 150.0	Floating ⁽¹⁾	August 2014
Floating Rate Series 2007A	100.0	Floating ⁽¹⁾	August 2017
Fixed Rate Series 2011A	100.0	4.10%	July 2018
Fixed Rate Series 2011A	230.0	4.8 to 5.0%	July 2021
Fixed Rate Series 2011A	170.0	4.9 to 5.1%	July 2023

\$ 750.0

⁽¹⁾ Interest rates vary as LIBOR varies. At March 31, 2012, the interest rate was between 1.1% and 1.2%.

We have interest rate swap agreements to manage fluctuations in cash flows resulting from interest rate risk.

In 2008, we entered into a Term Loan Agreement ("Term Loan") with certain financial institutions, pursuant to which it borrowed an aggregate principal amount of \$165.0 million. During 2011, we repaid \$20.0 million of the Term Loan. The Term Loan matures in June 2013, and borrowings generally bear interest at a variable rate equal to a margin over LIBOR which varies with the ratio of our total funded debt to consolidated earnings before interest, taxes, depreciation, and amortization ("EBITDA") as defined in the Term Loan. These interest rates also vary as LIBOR varies. At March 31, 2012, the interest rate of 1.2% was based on a margin over LIBOR.

We also have a \$500.0 million revolving credit facility that matures in 2016. The Facility permits borrowing at interest rates based upon a margin above LIBOR. The margin varies with the ratio of total funded debt to EBITDA as defined in the Facility. These interest rates also vary as LIBOR varies. At March 31, 2012, the interest rate of 1.7% was based on a margin over LIBOR. We pay a commitment fee on the unused amount of the Facility, which also varies with the ratio of our total funded debt to our EBITDA. We had \$380.0 million of available borrowing capacity under the Facility at March 31, 2012.

The Notes, the Term Loan and the Facility require us to meet specified financial ratios and to satisfy certain financial condition tests. We were in compliance with all financial debt covenants as of March 31, 2012.

Critical Accounting Policies and Estimates

Our disclosures of critical accounting policies, which are contained in its Annual Report on Form 10-K for the year ended December 31, 2011, have not materially changed since that report was filed.

The Condensed Consolidated Financial Statements are prepared in accordance with generally accepted accounting principles that often require management to make judgments, estimates and assumptions regarding uncertainties that affect the reported amounts presented and disclosed in the financial statements. Management reviews these estimates and assumptions based on historical experience, changes in business conditions and other relevant factors they believe to be reasonable under the circumstances. In any given reporting period, our actual results may differ from the estimates and assumptions used in preparing the Condensed Consolidated Financial Statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk relating to our operations due to changes in interest rates, foreign currency exchange rates and commodity prices of purchased raw materials. We manage the exposure to these risks through a combination of normal operating and financing activities and derivative financial instruments such as interest rate swaps, commodity cash flow hedges and foreign currency forward exchange contracts. All hedging transactions are authorized and executed pursuant to clearly defined policies and procedures, which strictly prohibit the use of financial instruments for speculative purposes.

All hedges are recorded on the balance sheet at fair value and are accounted for as cash flow hedges, with changes in fair value recorded in Accumulated Other Comprehensive Income (Loss) (AOCI) in each accounting period. The ineffective portion of the change in fair value, if any, is recorded in earnings in the period of change.

Interest Rate Risk

We are exposed to interest rate risk on certain of our short-term and long-term debt obligations used to finance our operations and acquisitions. At March 31, 2012, net of interest rate swaps, we had \$507.6 million of fixed rate debt and \$478.6 million of variable rate debt. As a result, interest rate changes in variable rate debt impact future earnings and cash flow assuming other factors are constant. We utilize interest rate swaps to manage fluctuations in cash flows resulting from exposure to interest rate risk on forecasted variable rate interest payments. We have LIBOR-based floating rate borrowings, which expose us to variability in interest payments due to changes in interest rates. A hypothetical 10% change in the weighted average borrowing rate on outstanding variable rate debt at March 31, 2012 would result in a change in after-tax annualized earnings of approximately \$0.2 million.

We entered into pay fixed/receive LIBOR-based floating interest rate swaps to manage fluctuations in cash flows resulting from interest rate risk. These interest rate swaps have been designated as cash flow hedges against forecasted LIBOR-based interest payments. Details regarding these instruments, as of March 31, 2012, are as follows (in millions):

Instrument	Notional Amount	Maturity	Rate Paid	Rate Received	Fair Value (Loss)
Swap	\$ 150.0	August 23, 2014	5.3%	LIBOR (3 month)	\$ (17.6)
Swap	100.0	August 23, 2017	5.4%	LIBOR (3 month)	(22.2)

As of March 31, 2012 and December 31, 2011, the interest rate swap liability of (\$39.8) million and (\$42.0) million, respectively, was included in Hedging Obligations. The unrealized loss on the effective portion of the contracts net of tax of (\$24.7) million and (\$26.0) million as of March 31, 2012 and December 31, 2011, respectively, was recorded in AOCI.

Foreign Currency Risk

We are also exposed to foreign currency risks that arise from normal business operations. These risks include the translation of local currency balances of foreign subsidiaries, intercompany loans with foreign subsidiaries and transactions denominated in foreign currencies. Our objective is to minimize its exposure to these risks through a combination of normal operating activities and the utilization of foreign currency exchange contracts to manage our exposure on the transactions denominated in currencies other than the applicable functional currency. Contracts are executed with creditworthy banks and are denominated in currencies of major industrial countries. We do not hedge our exposure to the translation of reported results of foreign subsidiaries from local currency to United States dollars.

As of March 31, 2012, derivative currency assets (liabilities) of \$18.2 million, \$4.5 million, (\$3.2) million, and (\$2.2) million, are recorded in Prepaid Expenses, Other Noncurrent Assets, Hedging Obligations-Current, and Hedging Obligations, respectively. As of December 31, 2011, derivative currency assets (liabilities) of \$0.5 million, \$0.1 million, (\$13.6) million, and (\$11.7) million are recorded in Prepaid Expenses, Other Noncurrent Assets, Hedging Obligations-Current, and Hedging Obligations, respectively. The unrealized gain (loss) on the effective portion of the contracts of \$10.7 million net of tax, and (\$15.4) million net of tax, as of March 31, 2012 and December 31, 2011, was recorded in AOCI. At March 31, 2012, we had an additional (\$0.1) million, net of tax, of currency losses on closed hedge instruments in AOCI that will be realized in earnings when the hedged items impact earnings. At December 31, 2011, we had an additional \$0.3 million of derivative currency gains on closed hedge instruments in AOCI that were realized in 2012 earnings when the hedged items impacted earnings.

The following table quantifies the outstanding foreign exchange contracts intended to hedge non-U.S. dollar denominated receivables and payables and the corresponding impact on the value of these instruments assuming a hypothetical 10% appreciation/depreciation of their counter currency on March 31, 2012 (in millions):

Currency	Notional Amount	Fair Value	Foreign Exchange Gain (Loss) From:	
			10% Appreciation of Counter Currency	10% Depreciation of Counter Currency
Mexican Peso	\$ 231.6	\$ 19.7	\$ 23.2	\$ (23.2)
Indian Rupee	42.8	(2.5)	4.3	(4.3)
Chinese Renminbi	41.4	0.1	4.1	(4.1)
Australian Dollar	5.2	0.2	0.5	(0.5)
Thai Baht	1.0		0.1	(0.1)

Gains and losses indicated in the sensitivity analysis would be offset by gains and losses on the underlying forecasted non-U.S. dollar denominated cash flows.

Commodity Price Risk

We periodically enter into commodity hedging transactions to reduce the impact of changing prices for certain commodities such as copper and aluminum based upon forecasted purchases of such commodities. These transactions are designated as cash flow hedges and the contract terms of commodity hedge instruments generally mirror those of the hedged item, providing a high degree of risk reduction and correlation.

Derivative commodity assets (liabilities) of \$16.4 million, \$2.5 million, (\$11.2) million, and (\$0.4) million are recorded in Prepaid Expenses, Other Noncurrent Assets, Hedging Obligations-Current, and Hedging Obligations, respectively, at March 31, 2012. Derivative commodity assets (liabilities) of \$2.6 million, \$1.0 million, (\$12.5), and (\$1.4) million are recorded in Prepaid Expenses, Other Noncurrent Assets, Hedging Obligations-Current and Hedging Obligations, respectively, at December 31, 2011. The unrealized gain (loss) on the effective portion of the contracts of \$4.4 million net of tax and (\$6.4) million net of tax, as of March 31, 2012 and December 31, 2011, respectively, was recorded in AOCI. At March 31, 2012, we had an additional (\$0.6) million, net of tax, of derivative commodity losses on closed hedge instruments in AOCI that will be realized in earnings when the hedged items impact earnings. At December 31, 2011, there was an additional (\$3.0) million, net of tax, of derivative commodity losses on closed hedge instruments in AOCI that were realized in 2012 earnings when the hedged items impacted earnings.

The following table quantifies the outstanding commodity contracts intended to hedge raw material commodity prices and the corresponding impact on the value of these instruments assuming a hypothetical 10% appreciation/depreciation of their prices on March 31, 2012 (dollars in millions):

Commodity	Notional Amount	Fair Value	Foreign Exchange Gain (Loss) From:	
			10% Appreciation of Commodity Prices	10% Depreciation of Commodity Prices
Copper	130.0	\$ 7.4	\$ 13.0	\$ (13.0)
Aluminum	9.9	(0.1)	1.0	(1.0)

Gains and losses indicated in the sensitivity analysis would be offset by the actual prices of the commodities.

The net AOCI balance of (\$10.3) million loss at March 31, 2012 is net of \$5.4 million of net current deferred gains expected to be realized in the next twelve months.
