Table of Contents**NEOGEN CORPORATION AND SUBSIDIARIES****NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****1. BASIS OF PRESENTATION**

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (generally accepted accounting principles) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation have been included. The results of operations for the three and six month periods ended November 30, 2014 are not necessarily indicative of the results to be expected for the fiscal year ending May 31, 2015. For more complete financial information, these consolidated financial statements should be read in conjunction with the May 31, 2014 audited consolidated financial statements and the notes thereto included in the Company's annual report on Form 10-K for the year ended May 31, 2014.

2. INVENTORIES

Inventories are stated at the lower of cost, determined on the first-in, first-out method, or market. The components of inventories follow:

	November 30, 2014	May 31, 2014
	<i>(In thousands)</i>	
Raw Materials	\$ 21,332	\$ 21,515
Work-in-process	4,469	3,681
Finished and purchased goods	27,696	25,982
	\$ 53,497	\$ 51,178

3. NET INCOME PER SHARE

The calculation of net income per share attributable to Neogen Corporation follows:

	Three Months Ended November 30,		Six Months Ended November 30,	
	2014	2013	2014	2013
	<i>(In thousands, except per share amounts)</i>			
Numerator for basic and diluted net income per share:				
Net Income attributable to Neogen shareholders	\$ 7,806	\$ 6,207	\$ 16,689	\$ 14,045
Denominator:				
Denominator for basic net income per share:				
Weighted average shares	36,941	36,458	36,858	36,302
Effect of dilutive stock options and warrants	438	916	473	939
Denominator for diluted net income per share	37,379	37,374	37,331	37,241
Net income attributable to Neogen Corporation per share:				
Basic	\$ 0.21	\$ 0.17	\$ 0.45	\$ 0.39
Diluted	\$ 0.21	\$ 0.17	\$ 0.45	\$ 0.38

The Board of Directors declared a 3 for 2 stock split effective October 31, 2013. All share and per share amounts in this Form 10-Q reflect amounts as if the split took place at the beginning of the periods presented.

Table of Contents**4. SEGMENT INFORMATION**

The Company has two reportable segments: Food Safety and Animal Safety. The Food Safety segment produces and markets diagnostic test kits and related products used by food producers and processors to detect harmful natural toxins, foodborne bacteria, allergens and levels of general sanitation. The Animal Safety segment is primarily engaged in the production and marketing of products dedicated to animal health, including a complete line of consumable products marketed to veterinarians and animal health product distributors; the segment also provides genetic identification services. Additionally, Animal Safety produces and markets rodenticides, disinfectants and insecticides to assist in the control of rodents and disease in and around agricultural, food production and other facilities.

Segment information as of and for the three months ended November 30, 2014 and 2013 follows:

	Food Safety	Animal Safety	Corporate and Eliminations (1)	Total
	<i>(In thousands)</i>			
Fiscal 2015

Operating income (loss)	15,712	12,141	(1,517)	26,336
Fiscal 2014				
Product revenues to external customers	\$ 56,135	\$ 48,440	\$ 0	\$ 104,575
Service revenues to external customers	2,263	11,309	0	13,572
Total revenues to external customers	58,398	59,749	0	118,147
Operating income (loss)	14,987	8,577	(1,457)	22,107

Edgar Filing: NEOGEN CORP - Form 10-Q

- (1) Includes corporate assets, consisting principally of cash and cash equivalents, marketable securities, deferred assets and overhead expenses not allocated to specific business segments. Also includes the elimination of intersegment transactions.

Table of Contents**5. EQUITY COMPENSATION PLANS**

Options are generally granted under the employee and director stock option plan for five-year periods and become exercisable in equal annual installments during that period. Certain non-qualified options are granted for ten-year periods. A summary of stock option activity during the six months ended November 30, 2014 follows:

	Shares	Weighted-Average Exercise Price
Options outstanding at June 1, 2014	1,869,000	\$ 25.69
Granted	516,000	39.69
Exercised	(221,000)	15.88
Forfeited	(29,000)	33.74
Options outstanding at November 30, 2014	2,135,000	29.99

During the three and six month periods ended November 30, 2014 and 2013, the Company recorded \$1,053,000 and \$906,000 and \$1,959,000 and \$1,695,000 of compensation expense related to its share-based awards.

The weighted-average fair value of stock options granted during fiscal 2015 and fiscal 2014, estimated on the date of grant using the Black-Scholes option pricing model was \$11.88 and \$9.87 respectively, per option. The fair value of stock options granted was estimated using the following weighted-average assumptions.

	FY2015	FY2014
Risk-free interest rate	1.2%	0.8%
Expected dividend yield	0%	0%
Expected stock price volatility	36.2%	33.1%
Expected option life	4.0 years	4.0 years

The Company has an Employee Stock Purchase plan that provides for employee stock purchases at a 5% discount to market price. The discount is recorded in administrative expense as of the date of purchase.

6. NEW ACCOUNTING PRONOUNCEMENTS

In May 2014, the FASB issued a new standard on revenue recognition. The new standard outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the revenue model is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The standard is designed to create greater comparability for financial statement users across industries and jurisdictions and also requires enhanced disclosures. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. Early adoption is not permitted. The Company is currently evaluating the impact of the adoption of this standard on its consolidated financial statements.

Table of Contents**7. BUSINESS AND PRODUCT LINE ACQUISITIONS**

The consolidated statements of income reflect the results of operations for business acquisitions since the respective dates of purchase. All are accounted for using the acquisition method.

On July 1, 2013, the Company acquired the assets of SyrVet Inc., a veterinary business based in Waukee, Iowa. SyrVet offered a product line similar to Neogen's Ideal Instruments line of veterinary instruments with a strong presence in Mexico and Latin America. Consideration for the purchase was \$10,012,000 in cash and up to \$1,500,000 of a contingent consideration liability, due at the end of the first year, based on an excess net sales formula. The final purchase price allocation, based upon the fair value of these assets determined using the income approach, included accounts receivable of \$747,000, net inventory of \$2,195,000, property and equipment of \$556,000, current liabilities of \$226,000, contingent consideration liabilities of \$930,000, non-amortizable trademarks of \$790,000, intangible assets of \$4,810,000 (with an estimated life of 15 years) and the remainder to goodwill (deductible for tax purposes). These values are Level 3 fair value measurements. This business has been relocated to Lexington, Kentucky and integrated with the Company's current operations there, reporting within the Animal Safety segment. In August 2014, the Company paid \$689,000 for contingent consideration; the remaining \$241,000 of the accrual was reversed to Other Income.

On November 1, 2013, the Company acquired the assets of Prima Tech Incorporated, a veterinary instrument company based in Kenansville, North Carolina. Prima Tech manufactures devices used by farmers, ranchers, and veterinarians to inject animals, provide topical applications, and to use for oral administration. Prima Tech is also a supplier of products used in artificial insemination in the swine industry. Consideration for the purchase was \$12,068,000 in cash and up to \$600,000 of contingent consideration, due at the end of the first year, based on an excess net sales formula. The Company has estimated the contingent consideration liability to be \$146,000 based on forecasted sales. The final purchase price allocation, based upon the fair value of these assets determined using the income approach, included accounts receivable of \$963,000, net inventory of \$2,796,000, property and equipment of \$1,653,000, prepaid assets of \$8,000, current liabilities of \$1,840,000, contingent consideration liabilities of \$146,000, non-amortizable trademarks of \$1,500,000, intangible assets of \$4,400,000 (with an estimated life of 5-15 years) and the remainder to goodwill (deductible for tax purposes). These values are Level 3 fair value measurements. This business will continue to operate in its current location and reports within the Animal Safety segment. In October 2014, the company accrued an additional \$454,000 for contingent consideration, which was charged to Other Expense.

On January 2, 2014, the Company acquired all of the stock of Chem-Tech Ltd., a pest control manufacturing and distribution business located in Pleasantville, Iowa. Consideration for the purchase was \$17,185,000 in cash and up to \$1,000,000 of a contingent consideration liability, due at the end of the first year, based on an excess sales formula. The Company has estimated the contingent consideration liability to be \$400,000, based on forecasted sales. The preliminary purchase price allocation included accounts receivable of \$380,000, net inventory of \$4,096,000, prepaid assets of \$225,000, property and equipment of \$682,000, current liabilities of \$184,000, contingent consideration liabilities of \$400,000, non-amortizable trademarks of \$662,000, intangible assets of \$7,536,000 (with an estimated life of 15 years) and the remainder to goodwill (deductible for tax purposes). These values are Level 3 fair value measurements. This business will continue to operate in its current location and reports within the Animal Safety segment.

On October 1, 2014, the Company acquired all of the stock of Biolumix, Inc., a manufacturer and marketer of automated systems for the detection of microbial contaminants located in Ann Arbor, Michigan. Consideration for the purchase was \$4,514,000 in cash. The preliminary purchase price allocation included accounts receivable of \$499,000, net inventory of \$421,000, prepaid assets of \$48,000, property and equipment of \$159,000, current liabilities of \$130,000, a long-term deferred tax liability of \$780,000, intangible assets of \$2,109,000 (with an estimated life of 5-15 years) and the remainder to goodwill (non-deductible for tax purposes). These values are Level 3 fair value measurements. This business will continue to operate in its current location and reports within the Food Safety segment.

On December 8, 2014, subsequent to the end of the second quarter, Neogen Corporation acquired the food safety and veterinary genomic assets of its Chinese distributor Beijing Anapure BioScientific Co., Ltd. Consideration for the purchase was \$2,040,000. Due to the timing of the transaction, the preliminary allocation was not complete at the time of filing.

Goodwill recognized in the acquisitions discussed above relates primarily to enhancing the Company's strategic platform for the expansion of available product offerings.

Table of Contents

8. LONG TERM DEBT

The Company has a financing agreement with a bank providing for an unsecured revolving line of credit of \$12,000,000, which matures on September 1, 2017. There were no advances against this line of credit during fiscal 2015 and fiscal 2014 and no balance outstanding at November 30, 2014. Interest is at LIBOR plus 100 basis points (rate under the terms of the agreement was 1.17% at November 30, 2014). Financial covenants include maintaining specified levels of tangible net worth, debt service coverage, and funded debt to EBITDA, each of which the Company was in compliance with at November 30, 2014.

9. COMMITMENTS AND CONTINGENCIES

The Company is involved in environmental remediation and monitoring activities at its Randolph, Wisconsin manufacturing facility and accrues for related costs when such costs are determined to be probable and estimable. The Company is currently expensing annual costs of remediation, which have ranged from \$47,000 to \$79,000 per year over the past five years. The Company's estimated liability for these costs of \$916,000 at November 30, 2014 and May 31, 2014, measured on an undiscounted basis over an estimated period of 15 years, is recorded within other long-term liabilities in the consolidated balance sheet.

The Company is subject to certain legal and other proceedings in the normal course of business that, in the opinion of management, should not have a material effect on its future results of operations or financial position.

10. STOCK PURCHASE

In December 2008, the Company's Board of Directors authorized a program to purchase, subject to market conditions, up to 1,125,000 shares of the Company's common stock. As of November 30, 2014, 112,026 cumulative shares had been purchased in negotiated and open market transactions for a total price, including commissions, of approximately \$923,000. Shares purchased under the program were retired. There have been no purchases in fiscal 2015 and there were none in fiscal 2014.

PART I FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information in this Management's Discussion and Analysis of Financial Condition and Results of Operations contains both historical financial information and forward-looking statements. Neogen does not provide forecasts of future performance. While management is optimistic about the Company's long-term prospects, historical financial information may not be indicative of future financial performance.

Safe Harbor and Forward-Looking Statements

Forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, are made throughout this Quarterly Report on Form 10-Q. For this purpose, any statements contained herein that are not statements of historical fact may be deemed to be forward looking statements. Without limiting the foregoing, the words "believes," "anticipates," "plans," "expects," "seeks," "estimates," and similar expressions are intended to identify forward-looking statements. There are a number of important factors, including competition, recruitment and dependence on key employees, impact of weather on agriculture and food production, identification and integration of acquisitions, research and development risks, patent and trade secret protection, government regulation and other risks detailed from time to time in the Company's reports on file at the Securities and Exchange Commission, that could cause Neogen Corporation's results to differ materially from those indicated by such forward-looking statements, including those detailed in this Management's Discussion and Analysis of Financial Condition and Results of Operations.

In addition, any forward-looking statements represent management's views only as of the day this Quarterly Report on Form 10-Q was first filed with the Securities and Exchange Commission and should not be relied upon as representing management's views as of any subsequent date. While management may elect to update forward-looking statements at some point in the future, it specifically disclaims any obligation to do so, even if its views change.

Critical Accounting Policies and Estimates

The discussion and analysis of the Company's financial condition and results of operations are based on the consolidated financial statements that have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires that management make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, management evaluates the estimates, including those related to receivable allowances, inventories, accruals, goodwill and other intangible assets. These estimates are based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

There were no significant changes to our contractual obligations or contingent liabilities and commitments disclosed in the Company's Annual Report or Form 10-K for the fiscal year ended May 31, 2014.

There have been no material changes to the critical accounting policies and estimates disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended May 31, 2014.

Table of Contents**Executive Overview**

Neogen Corporation revenues for the second quarter ended November 30, 2014 were \$68.5 million, an increase of \$8.9 million, or 14.9%, compared to the same period in the prior year. For the year to date ended November 30, 2014, revenues were \$136.1 million, an increase of \$18.0 million, or 15.2%, compared to the prior year. Food Safety revenues increased by 16.0% and 9.5% for the comparative quarter and six-month periods ended November 30, 2014, respectively. Organic revenue growth for Food Safety was 13.0% for the quarter and 8.0% for the comparative year-to-date period; the Biolumix acquisition, which occurred on October 1, 2014, accounted for the difference. Animal Safety revenues increased by 13.8% and 20.7%, respectively, for the same comparative periods. Organic growth for the Animal Safety segment was 2.2% for the second quarter; year-to-date revenues were flat. The bulk of the growth for the comparative periods came from the following acquisitions: Syrvet (July 2013), Prima Tech (November 2013), and Chem-Tech (January 2014). Overall organic sales growth for the Company was 7.4% and 4.2% for the second quarter and six-month period ended November 30, 2014, respectively.

International sales were 40.3% of total sales in the second quarter, compared to 39.0% of total sales in the same period of the prior year. For the six months ended November 30, 2014, international sales were 38.6% of total sales compared to 40.7% of total sales for the same period in the prior year. Neogen Europe sales increased by 20.2% for the second quarter and were up 14.1% on a year-to-date basis. The revenue increase for the second quarter was primarily due to increased genomic services to European customers and increased sales of mycotoxin test kits, due to a DON outbreak in eastern Europe. Growth at Neogen Latinoamerica benefitted from the transfer of certain Animal Safety customers in Mexico and Central America, in an effort to better serve customers located in those countries. Excluding the impact of this transfer, organic sales growth would have been 7.2% for Food Safety and 7.6% for Animal Safety in the second quarter compared to the prior year. On a year-to-date basis, overall organic growth was 4.0% for Food Safety and 4.3% for Animal Safety. Revenues for Neogen do Brasil declined 4.1% for the quarter and 6.5% for the year-to-date, due primarily to drought conditions in Brazil, which have reduced sales of test kits for drug residues due to lower milk production.

Service revenue was \$7.7 million in the second quarter, an increase of 20.5% compared to the same period of the prior year. For the six-month period, service revenue was \$16.0 million, or 18.0% higher than the comparable prior year period. The increase for both periods was due to increased sales of new genomic custom chips developed primarily for the beef and dairy cattle and pork industries, for both domestic and international customers, particularly in Europe.

Gross margin was 50.0% for the second quarter, compared to 49.5% for the November 2013 quarter. The increase in margin percentage for the second quarter was due primarily to product mix shift and increased efficiencies within the Animal Safety segment. On a year-to-date basis, gross margin was 50.2% compared to 50.7% in the prior fiscal year. Gross margin in the first quarter of fiscal 2015 was 50.4%

Operating expenses increased by 7.6% for the second quarter of fiscal 2015, compared to the same quarter in the prior year. Sales and marketing expenses increased \$1.5 million, or 13.6%, compared to the second quarter in the prior year, and increased 15.9% for the year-to-date period. Increases in each comparative period were primarily due to increased headcount, shipping and advertising. For the second quarter, general and administrative costs declined by \$186,000, or 3.0%, due primarily to a decrease in legal fees, and one-time costs relating to prior year acquisitions which were not incurred this year. These declines were partially offset by increased amortization of certain intangible assets from recent acquisitions and higher stock option expenses. For the year to date, general and administrative expenses increased \$292,000, or 2.5%, due to amortization and stock option expense increases. Research and development expenses were \$2.5 million for the second quarter of fiscal 2015, up 7.4% over the same period a year ago, primarily due to increases in contracted services and project costs incurred in commercializing new products. Year-to-date research and development expenses were 11.1% higher than last year.

Operating margin was 18.8% for the second quarter, compared to 16.3% in the November 2013 quarter, due to the improved gross margin percentage and moderate growth in operating expenses. On a year-to-date basis, operating margin was 19.4% compared to 18.7% in the same period of the prior year.

During the second quarter of fiscal 2015, other expense includes \$454,000 recorded to reflect additional contingent consideration related to the Prima Tech acquisition, due to sales exceeding projected levels. On a year-to-date basis, change in purchase consideration of \$213,000 reflects the \$454,000 recorded during the second quarter, offset by a \$241,000 over accrual for contingent consideration related to the Syrvet acquisition recorded in the first quarter of fiscal 2015. The remainder is largely the result of currency losses recorded as the U.S. dollar strengthened during the first half of fiscal 2015. For the quarter ended November 30, 2013, currency losses were minimal; however, for the year-to-date period ended November 30, 2013, currency losses were \$710,000.

Rodenticides, Disinfectants & Insecticides	22,617	16,461	6,156	37.4%
DNA Testing Service	12,502	11,308	1,194	10.6%
	\$ 72,136	\$ 59,749	\$ 12,387	20.7%
Total Revenues	\$ 136,054	\$ 118,147	\$ 17,907	15.2%

The Company's Food Safety segment revenues were \$33.0 million in the second quarter of fiscal 2015, an increase of 16.0% compared to the same period in the prior year. On a year-to-date basis, Food Safety revenues were \$63.9 million, 9.5% higher than the comparable period of the prior year. Sales from the Biolumix acquisition, which occurred October 1, 2014, contributed \$852,000 to the growth for both the quarter and year-to-date periods. Natural Toxins, Allergens and Drug Residues increased 6.7% in the second quarter and 1.8% on a year-to-date basis, both compared to the same periods of the prior year. Increases in this category were driven by growth of allergen test kits, particularly for the

Edgar Filing: NEOGEN CORP - Form 10-Q

detection of gluten, as demand continues to increase due to higher consumer awareness and increased recalls due to inadvertent allergenic contamination. Included within this category and partially offsetting these gains are the sales of meat speciation kits, which are down 41.9% for the quarter and 46.9% for the year, due to a decline in testing and competitor entry into the market. Overall allergen sales increased 10.6% for the quarter and 11.1% on a year-to-date basis. In the second quarter of fiscal 2015, natural toxin sales increased 9.5% led by sales of DON test kits due to outbreaks in eastern Europe and Canada. Natural toxin test kit sales also benefitted in the second quarter due to delayed harvests in the U.S caused by the harsh weather last spring which resulted in late crop plantings. On a year-to-date basis, natural toxin revenues increased 2.7%. The lower growth for the year-to-date period is due to a difficult comparison in the first quarter of the prior year caused by high demand due to aflatoxin outbreaks, primarily in eastern Europe. Sales of drug residue test kits are down 2.2% in the second quarter and 7.7% on a year-to-date basis, both as compared to the same period in the prior year. Currency translation and lower sales to customers in eastern Europe due to delays in the launch of a new product in that region contributed to the decline.

Table of Contents

Bacterial and General Sanitation revenues rose 19.2% in the second quarter of fiscal 2015; for the year-to-date period, sales increased 11.0%. Sales from the October Biolumix acquisition contributed \$852,000 towards the growth. Without these sales, the increase in this category would have been 4.8% for the second quarter of fiscal 2015 and 3.9% for the year to date. The organic increase in this category was led by sales of ampoule media and filters, as the Company continues to increase market share in this product line, particularly in the beverage industry. The second quarter of fiscal 2015 also benefitted from additional sales of Listeria test kits, due to increased penetration into the commercial lab market, and Soleris consumables.

Dry Culture Media and Other sales increased 32.1% for the quarter and 23.4% for the six-month periods ended November 30, 2014, as compared to the same periods in the prior year. Genomics sales to European customers had strong growth for both the quarter and year-to-date periods due to increased market share for services and the sale of new product offerings. Also within this category, Acumedia sales were flat for the second quarter and decreased 2.3% on a year-to-date basis, both as compared to the prior year. While sales of Acumedia products to food safety customers increased, this was offset by a decrease in sales to the traditional media market due to continued credit issues with one large customer and lower volumes at another significant customer. Also included within this category were sales of Animal Safety products to customers in Mexico and Central America which were transferred to the Company's Neogen Latinoamerica subsidiary.

Animal Safety segment revenues were \$35.5 million for the quarter ended November 30, 2014, a 13.8% increase, and year-to-date revenues were \$72.1 million, a 20.7% increase, both compared to the same period in the prior year. Life Sciences sales increased 20.2% for the quarter and 21.3% on a year-to-date basis, led by forensic kit sales to commercial testing labs to meet new testing requirements in Brazil for commercial drivers. Revenues of Veterinary Instruments and Disposables increased 35.2% in the second quarter and 44.1% for the year to date. This category benefitted from the Prima Tech and Syrvet acquisitions. On an organic basis, sales increased 14.5% for the quarter and 12.2% for the year-to-date period, due to targeted marketing programs.

Animal Care and Other sales were \$8.7 million and \$16.3 million for the quarter-to-date and year-to-date periods, respectively. Sales for the quarter were flat while sales for the six-month period were down 4.0%. Within this category in the prior year, the Company recorded strong sales of a wound care product caused by a supply disruption in the market. This product was available for sale from all competitors in the current fiscal year. Additionally, a distributed antibiotic was discontinued by the manufacturer towards the end of fiscal 2014, so there are no comparable sales in the current fiscal year. Offsetting these losses were higher sales of small animal supplements due to distributor order timing. Rodenticides, Insecticides and Disinfectants revenues increased 13.2% for the quarter and 10.6% on a year-to-date basis, primarily due to the Chem-Tech acquisition in January, 2014.

DNA Testing Services revenues increased 8.6% in the second quarter and 10.6% for the year-to-date period, both compared to the same period in the prior year. For both periods, improvements to a number of proprietary service offerings has helped the Company to increase sales to existing customers and gain market share.

Table of Contents

Financial Condition and Liquidity

The overall cash, cash equivalents and marketable securities position of the Company was \$94,305,000 at November 30, 2014, compared to \$76,496,000 at May 31, 2014. Approximately \$23,367,000 in cash was generated from operations during the first six months of fiscal 2015. Net cash proceeds of \$3,248,000 were realized from the exercise of stock options and issuance of shares under the Company's Employee Stock Purchase Plan during the first six months of fiscal 2015. The Company spent \$4,705,000 for property, equipment and other non-current assets in the first half of fiscal 2015, and \$4,514,000 to purchase Biolumix, Inc. on October 1, 2014.

Accounts receivable were essentially flat compared to May 31, 2014 balances, despite the increase in revenues. Inventory levels declined by \$1,590,000 from August 31, 2014, as the Company works to reduce inventories acquired in recent acquisitions, and as a result of programs instituted at each operation to improve the Company's inventory turns during fiscal 2015. Despite the improvement in the second quarter, for the year to date, inventories have increased \$2,319,000, or 4.5%, due primarily to increases in the Animal Safety distribution business.

Inflation and changing prices are not expected to have a material effect on operations, as management believes it will continue to be successful in offsetting increased input costs with price increases and/or cost efficiencies.

Management believes that the Company's existing cash and marketable securities balances at November 30, 2014, along with available borrowings under its credit facility and cash expected to be generated from future operations, will be sufficient to fund activities for the foreseeable future. However, existing cash and borrowing capacity may not be sufficient to meet the Company's cash requirements to commercialize products currently under development or its plans to acquire other organizations, technologies or products that fit within the Company's mission statement. Accordingly, the Company may choose to issue equity securities or enter into other financing arrangements for a portion of its future financing needs.

Table of Contents

PART I FINANCIAL INFORMATION

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company has interest rate and foreign exchange rate risk exposure. It has no long-term fixed rate investments or borrowings. Primary interest rate risk is due to potential fluctuations in interest rates for variable rate borrowings; currently, there are no short-term borrowings outstanding and there were none during the quarter.

Foreign exchange risk exposure arises because the Company markets and sells its products throughout the world. The Company also could be affected by weak economic conditions in foreign markets that could reduce demand for its products. Additionally, revenues in certain foreign countries as well as certain expenses related to those revenues are transacted in currencies other than the U.S. Dollar. The Company's operating results are primarily exposed to changes in exchange rates between the U.S. Dollar, the British Pound Sterling and the Euro. When the U.S. Dollar weakens against foreign currencies, the dollar value of revenues denominated in foreign currencies increases. When the U.S. Dollar strengthens, the opposite situation occurs. Additionally, previously recognized revenues in the course of collection can be affected positively or negatively by changes in exchange rates. The Company uses derivative financial instruments to help manage the economic impact of fluctuations in certain currency exchange rates. These contracts are adjusted to fair value through earnings.

Neogen has assets, liabilities and operations outside of the United States, located in Scotland, Brazil, Mexico and China, where the functional currency is the British Pound Sterling, Brazilian Real, Mexican Peso and Chinese Yuan, respectively. The Company's investments in foreign subsidiaries are considered to be long-term.

PART I FINANCIAL INFORMATION

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

An evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of November 30, 2014 was carried out under the supervision and with the participation of the Company's management, including the Chairman & Chief Executive Officer and the Vice President & Chief Financial Officer (the Certifying Officers). Based on the evaluation, the Certifying Officers concluded that the Company's disclosure controls and procedures are effective.

Changes in Internal Controls Over Financial Reporting

There was no change to the Company's internal control over financial reporting during the quarter ended November 30, 2014 that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
