Letter from the Chairman of the Board & President

Dear Shareholder,

The global equity markets generated strong results during the reporting period against a backdrop of solid corporate profits and signs of improving global growth. Meanwhile, the global fixed income market generated strong results as U.S. monetary policy tightened, whereas many international central banks maintained accommodative monetary policies.

For the six-month reporting period ended June 30, 2017

The U.S. economy continued to expand at a relatively modest pace during the reporting period. Looking back, U.S. gross domestic product (GDP), which represents the value of goods and services produced in the country, the broadest measure of economic activity and the principal indicator of economic performance, expanded at a revised annual pace of 1.8% during the fourth quarter of 2016. GDP growth then moderated, growing at a revised annual pace of 1.2% for the first quarter of 2017. Finally, the Commerce Department s initial reading released after the reporting period had ended showed that second quarter 2017 GDP grew at an annual pace of 2.6%.

The Federal Reserve (Fed) continued to normalize monetary policy, with two interest rate hikes during the reporting period. The first occurrence was in March 2017, followed by a second rate hike in June 2017. The second move put the federal funds rate between 1.00% and 1.25%. In its official statement following the Fed s June meeting, the Fed said, The Committee expects that economic conditions will evolve in a manner that will warrant gradual increases in the federal funds rate; the federal funds rate is likely to remain, for some time, below levels that are expected to prevail in the longer run. The Fed also indicated that it expects to begin reducing its balance sheet later this year.

Economic activity outside the U.S. generally improved during the reporting period. Nevertheless, a number of central banks, including the European Central Bank, Bank of England and Bank of Japan, maintained their highly accommodative monetary policies. However, toward the end of the reporting period, several central banks indicated that they may pare back their quantitative easing programs should growth improve and inflation increase.

The municipal (or muni) market posted positive returns during the first five months of the reporting period. The municipal market was supported by generally positive fundamentals, moderating supply and strong investor demand. The Bloomberg Barclays Municipal Bond Index gained 3.57% during the six months ended June 30, 2017. In comparison, the overall taxable fixed income market, as measured by the Bloomberg Barclays U.S. Aggregate Bond Index, returned 2.27% over the same period.

Outlook

PIMCO s baseline view is that the U.S. economy is likely to grow at about 2% per year, with inflation running close to the Fed s target of 2%. PIMCO s forecast for the federal funds rate at the end of its secular horizon is anchored in a New Neutral range of 2% to 3%, but with the risks skewed to the downside on rates. In PIMCO s view, of real concern for the U.S. outlook, as well as the global outlook, is the

driving-without-a-spare-tire risk at this late stage of the business cycle. In the next recession, whenever it occurs, PIMCO believes the Fed and other central banks will have less room to cut rates than in past cycles. Some countries for example, the U.S., China, Germany will likely have some fiscal space to deploy in the next downturn, but with sovereign debt levels already elevated, fiscal policy is unlikely to fully offset the constraints on monetary policy in the next global downturn.

PIMCO s policy outlook for munis looks brighter for the next six to 12 months than it did earlier in the year. In PIMCO s view, the risk of trade wars with other countries has receded, and that has scaled back both PIMCO s view of the expected size of fiscal stimulus in the U.S. and its assessment of near-term inflation pressures. PIMCO has more confidence in its base case scenario of a less ambitious tax reform lite given the current failure of a repeal/replace of the Affordable Care Act. The upshot for munis is a tax reform backdrop that, while not without risk, should not fundamentally alter the long-term valuation paradigm for tax-efficient investors. PIMCO is a bit more positive on federal tax-exempt municipal bonds than their taxable alternatives, and high yield municipal spreads look compelling

2 PIMCO CLOSED-END FUNDS

Table of Contents

relative to high yield corporate spreads. PIMCO s views reflect municipal credit spreads underperformance relative to the post-election rally in other U.S. credit asset classes.

In the following pages of this PIMCO Closed-End Funds Semiannual Report, please find specific details regarding investment performance and a discussion of factors that most affected the Funds performance over the six months ended June 30, 2017.

Thank you for investing with us. We value your trust and will continue to work diligently to meet your investment needs. If you have questions regarding any of your PIMCO Closed-End Funds investments, please contact your financial advisor or call the Funds shareholder servicing agent at (844) 33-PIMCO or (844) 337-4626. We also invite you to visit our website at www.pimco.com to learn more about our views.

Sincerely,

Hans W. Kertess Chairman of the Board of Trustees Peter G. Strelow President

SEMIANNUAL REPORT JUNE 30, 2017

Important Information About the Funds

We believe that bond funds have an important role to play in a well-diversified investment portfolio. It is important to note, however, that in an environment where interest rates trend upward, rising rates would negatively impact the performance of most bond funds, and fixed-income securities held by a Fund are likely to decrease in value. A wide variety of factors can cause interest rates to rise (e.g., central bank monetary policies, inflation rates, general economic conditions). This risk may be particularly acute in the current market environment because market interest rates are currently near historically low levels. This, combined with recent economic recovery, the Federal Reserve Board's conclusion of its quantitative easing program, and increases in federal funds interest rates in 2015, 2016 and 2017, which had not occurred since 2006, could potentially increase the probability of an upward interest rate environment in the near future. To the extent the Federal Reserve Board continues to raise interest rates, there is a risk that rates across the financial system may rise. Further, while the U.S. bond market has steadily grown over the past three decades, dealer inventories of corporate bonds have remained relatively stagnant. As a result, there has been a significant reduction in the ability of dealers to make markets in corporate bonds. All of the factors mentioned above, individually or collectively, could lead to increased volatility and/or lower liquidity in the fixed income markets, which could result in increased losses to a Fund. Bond funds and individual bonds with a longer duration (a measure of the sensitivity of a security s price to changes in interest rates) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities or funds with shorter durations. In addition, in the current low interest rate environment, the market price of the Funds common shares may be particularly sensitive to changes in interest rates or the perception that there will

Investing in the municipal bond market involves the risks of investing in debt securities generally and certain other risks. The amount of public information available about the municipal bonds in which a Fund may invest is generally less than that for corporate equities or bonds, and the investment performance of a Fund s investment in municipal bonds may therefore be more dependent on the analytical abilities of PIMCO than its investments in taxable bonds. The secondary market for municipal bonds also tends to be less well-developed or liquid than many other securities markets, which may adversely affect a Fund s ability to sell its bonds at attractive prices.

The ability of municipal issuers to make timely payments of interest and principal may be diminished during general economic downturns, by litigation, legislation or political events, or by the bankruptcy of the issuer. Laws, referenda, ordinances or regulations enacted in the future by Congress or state legislatures or the applicable governmental entity could extend the time for payment of principal and/or interest, or impose other constraints on enforcement of such obligations, or on the ability of municipal issuers to levy taxes. Issuers of municipal securities

also might seek protection under the bankruptcy laws. In the event of bankruptcy of such an issuer, a Fund could experience delays in collecting principal and interest and the Fund may not, in all circumstances, be able to collect all principal and interest to which it is entitled. To enforce its rights in the event of a default in the payment of interest or repayment of principal, or both, a Fund may take possession of and manage the assets securing the issuer s obligations on such securities, which may increase the Fund s operating expenses. Any income derived from the Fund s ownership or operation of such assets may not be tax-exempt.

A Fund that has substantial exposures to California municipal bonds may be affected significantly by economic, regulatory or political developments affecting the ability of California issuers to pay interest or repay principal. Certain issuers of California municipal bonds have experienced serious financial difficulties in the past and reoccurrence of these difficulties may impair the ability of certain California issuers to pay principal or interest on their obligations. Provisions of the California Constitution and State statutes that limit the taxing and spending authority of California governmental entities may impair the ability of California issuers to pay principal and/or interest on their obligations. While California s economy is broad, it does have major concentrations in high technology, aerospace and defense-related manufacturing, trade, entertainment, real estate and financial services, and may be sensitive to economic problems affecting those industries. Future California political and economic developments, constitutional amendments, legislative measures, executive orders, administrative regulations, litigation and voter initiatives could have an adverse effect on the debt obligations of California issuers.

A Fund that has substantial exposures to New York municipal bonds may be affected significantly by economic, regulatory or political developments affecting the ability of New York issuers to pay interest or repay principal. While New York s economy is broad, it does have concentrations in the financial services industry, and may be sensitive to economic problems affecting that industry. Certain issuers of New York municipal bonds have experienced serious financial difficulties in the past and reoccurrence of these difficulties may impair the ability of certain New York issuers to pay principal or interest on their obligations. The financial health of New York City affects that of the State, and when New York City experiences financial difficulty it may have an adverse effect on New York municipal bonds held by a Fund. The growth rate of New York has at times been somewhat slower than the nation overall. The economic and financial condition of New York also may be affected by various financial, social, economic and political factors.

The use of derivatives may subject the Funds to greater volatility than investments in traditional securities. The Funds may use derivative instruments for hedging purposes or as part of an investment strategy.

4 PIMCO CLOSED-END FUNDS

Table of Contents

Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, call risk, credit risk, management risk and the risk that a Fund could not close out a position when it would be most advantageous to do so. Certain derivative transactions may have a leveraging effect on a Fund. For example, a small investment in a derivative instrument may have a significant impact on a Fund s exposure to interest rates, currency exchange rates or other investments. As a result, a relatively small price movement in a derivative instrument may cause an immediate and substantial loss or gain, which translates into heightened volatility in a Fund s net asset value (NAV). A Fund may engage in such transactions regardless of whether the Fund owns the asset, instrument or components of the index underlying a derivative instrument. A Fund may invest a significant portion of its assets in these types of instruments. If it does, a Fund s investment exposure could far exceed the value of its portfolio securities and its investment performance could be primarily dependent upon securities it does not directly own. The regulation of the derivatives markets has increased over the past several years, and additional future regulation of the derivatives markets may make derivatives more costly, may limit the availability or reduce the liquidity of derivatives, or may otherwise adversely affect the value or performance of derivatives. Any such adverse future developments could impair the effectiveness of a Fund s derivative transactions and cause a Fund to lose value. For instance, in December 2015, the SEC proposed new regulations applicable to a registered investment company s use of derivatives and related instruments. If adopted as proposed, these regulations could significantly limit or impact a Fund s ability to invest in derivatives and other instruments, limit a Fund s ability to employ certain strategies that use derivatives and/or adversely affect a Fund s performance, efficiency in i

A Fund s use of leverage creates the opportunity for increased income for the Fund s common shareholders, but also creates special risks. Leverage is a speculative technique that may expose a Fund to greater risk and increased costs. If shorter-term interest rates rise relative to the rate of return on a Fund s portfolio, the interest and other costs of leverage to the Fund could exceed the rate of return on the debt obligations and other investments held by the Fund, thereby reducing return to the Fund s common shareholders. In addition, fees and expenses of any form of leverage used by a Fund will be borne entirely by its common shareholders (and not by preferred shareholders, if any) and will reduce the investment return of the Fund s common shares. There can be no assurance that a Fund s use of leverage will result in a higher yield on its common shares, and it may result in losses. Leverage creates several major types of risks for a Fund s common shareholders, including: (1) the likelihood of greater volatility of net asset value and

market price of the Fund s common shares, and of the investment return to the Fund s common shareholders, than a comparable portfolio without leverage; (2) the possibility either that the Fund s common share dividends will fall if the interest and other costs of leverage rise, or that dividends paid on the Fund s common shares will fluctuate because such costs vary over time; and (3) the effects of leverage in a declining market or a rising interest rate environment, as leverage is likely to cause a greater decline in the net asset value of the Fund s common shares than if the Fund were not leveraged and may result in a greater decline in the market value of the Fund s common shares.

There is a risk that a Fund investing in a tender option bond program will not be considered the owner of a tender option bond for federal income tax purposes, and thus will not be entitled to treat such interest as exempt from federal income tax. Certain tender option bonds may be illiquid or may become illiquid as a result of, among other things, a credit rating downgrade, a payment default or a disqualification from tax-exempt status. A Fund s investment in the securities issued by a tender option bond trust may involve greater risk and volatility than an investment in a fixed rate bond, and the value of such securities may decrease significantly when market interest rates increase. Tender option bond trusts could be terminated due to market, credit or other events beyond the Funds control, which could require the Funds to reduce leverage and dispose of portfolio investments at inopportune times and prices. A Fund may use a tender option bond program as a way of achieving leverage in its portfolio, in which case the Fund will be subject to leverage risk.

High-yield bonds (commonly referred to as junk bonds) typically have a lower credit rating than other bonds. Lower-rated bonds generally involve a greater risk to principal than higher-rated bonds. Further, markets for lower-rated bonds are typically less liquid than for higher-rated bonds, and public information is usually less abundant in such markets. Thus, high yield investments increase the chance that a Fund will lose money on its investment. The Funds may also invest in bonds and other instruments that are not rated, but which PIMCO considers to be equivalent to high-yield investments. The Funds may hold defaulted securities that may involve special considerations including bankruptcy proceedings, other regulatory and legal restrictions affecting the Funds ability to trade, and the availability of prices from independent pricing services or dealer quotations. Defaulted obligations might be repaid only after lengthy workout or bankruptcy proceedings, during which the

issuer might not make any interest or other payments. Defaulted securities are often illiquid and may not be actively traded. Sale of securities in bankrupt companies at an acceptable price may be difficult and differences compared to the value of the securities used by the Funds could be material.

SEMIANNUAL REPORT JUNE 30, 2017

5

Table of Contents

Important Information About the Funds (Cont.)

Variable and floating rate securities generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely floating rate securities will not generally increase in value if interest rates decline. Inverse floating rate securities may also exhibit greater price volatility than a fixed rate obligation with similar credit quality. When a Fund holds variable or floating rate securities, a decrease (or, in the case of inverse floating rate securities, an increase) in market interest rates will adversely affect the income received from such securities and the NAV of the Funds—shares.

As the use of technology has become more prevalent in the course of business, the Funds have become potentially more susceptible to operational and information security risks resulting from breaches in cyber security. A breach in cyber security refers to both intentional and unintentional cyber events that may, among other things, cause a Fund to lose proprietary information, suffer data corruption and/or destruction or lose operational capacity, result in the unauthorized release or other misuse of confidential information, or otherwise disrupt normal business operations. Cyber security breaches may involve unauthorized access to a Fund s digital information systems (e.g., through hacking or malicious software coding), but may also result from outside attacks such as denial-of-service attacks (i.e., efforts to make network services unavailable to intended users). In addition, cyber security breaches involving a Fund s third party service providers (including but not limited to advisers, sub-advisers, administrators, transfer agents, custodians, distributors and other third parties), trading counterparties or issuers in which a Fund invests can also subject a Fund to many of the same risks associated with direct cyber security breaches. Moreover, cyber security breaches involving trading counterparties or issuers in which a Fund invests could adversely impact such counterparties or issuers and cause the Fund s investment to lose value.

Cyber security failures or breaches may result in financial losses to a Fund and its shareholders. These failures or breaches may also result in disruptions to business operations, potentially resulting in financial losses; interference with a Fund s ability to calculate its net asset value, process shareholder transactions or otherwise transact business with shareholders; impediments to trading; violations of applicable privacy and other laws; regulatory fines; penalties; reputational damage; reimbursement or other compensation costs; additional compliance and cyber security risk management costs and other adverse consequences. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future.

Like with operational risk in general, the Funds have established business continuity plans and risk management systems designed to reduce the risks associated with cyber security. However, there are

inherent limitations in these plans and systems, including that certain risks may not have been identified, in large part because different or unknown threats may emerge in the future. As such, there is no guarantee that such efforts will succeed, especially because the Funds do not directly control the cyber security systems of issuers in which a Fund may invest, trading counterparties or third party service providers to the Funds. There is also a risk that cyber security breaches may not be detected. The Funds and their shareholders could be negatively impacted as a result.

The common shares of the Funds trade on the New York Stock Exchange. As with any stock, the price of a Fund s common shares will fluctuate with market conditions and other factors. If you sell your common shares of a Fund, the price received may be more or less than your original investment. Shares of closed-end management investment companies frequently trade at a discount from their net asset value.

The common shares of a Fund may trade at a price that is less than the initial offering price and/or the net asset value of such shares. Further, if a Fund s shares trade at a price that is more than the initial offering price and/or the net asset value of such shares, including at a substantial premium and/or for an extended period of time, there is no assurance that any such premium will be sustained for any period of time and will not decrease, or that the shares will not trade at a discount to net asset value thereafter.

The Funds may be subject to various risks, including, but not limited to, the following: asset allocation risk, credit risk, stressed securities risk, distressed and defaulted securities risk, corporate bond risk, market risk, issuer risk, liquidity risk, equity securities and related market risk, mortgage-related and other asset-backed securities risk, extension risk, prepayment risk, privately issued mortgage-related securities risk, mortgage market/ subprime risk, currency risk, redenomination risk, non-diversification risk, management risk, municipal bond risk, tender option bond risk, inflation-indexed security risk, senior debt risk, loans, participations and assignments risk, reinvestment risk, real estate risk, U.S. Government securities risk, foreign (non-U.S.) government securities risk, valuation risk, segregation and cover risk, focused investment risk, credit default swaps risk, event-linked securities risk, counterparty risk, preferred securities risk, confidential information access risk, other investment companies risk, private placements risk, inflation/deflation risk, regulatory risk, tax risk, recent economic conditions risk, market disruptions and geopolitical risk, potential conflicts of interest involving allocation of investment opportunities, repurchase agreements risk, securities lending risk, zero-coupon bond and payment-in-kind securities risk, portfolio turnover risk, smaller company risk, short sale risk and convertible securities risk. A description of certain of these risks is available in the Notes to Financial Statements of this Report.

6 PIMCO CLOSED-END FUNDS

Table of Contents

On each Fund Summary page in this Shareholder Report, the Average Annual Total Return table measures performance assuming that all dividend and capital gain distributions were reinvested. Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions. Total return for a period of more than one year represents the average annual total return. Performance at market price will differ from results at NAV. Although market price returns tend to reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about a Fund, market conditions, supply and demand for the Fund s shares, or changes in the Fund s dividends. Performance shown is net of fees and expenses.

The following table discloses the commencement of operations and diversification status of each Fund:

Fund Name	Commencement of Operations	Diversification Status
PIMCO Municipal Income Fund	06/29/01	Diversified
PIMCO Municipal Income Fund II	06/28/02	Diversified
PIMCO Municipal Income Fund III	10/31/02	Diversified
PIMCO California Municipal Income Fund	06/29/01	Diversified
PIMCO California Municipal Income Fund II	06/28/02	Diversified
PIMCO California Municipal Income Fund III	10/31/02	Diversified
PIMCO New York Municipal Income Fund	06/29/01	Non-diversified
PIMCO New York Municipal Income Fund II	06/28/02	Non-diversified
PIMCO New York Municipal Income Fund III	10/31/02	Non-diversified

PIMCO has adopted written proxy voting policies and procedures (Proxy Policy) as required by Rul\(100.4\) 6(4)-6 under the Investment Advisers Act of 1940. The Proxy Policy has been adopted by the Funds as the policies and procedures that PIMCO will use when voting proxies on behalf of the Funds. A description of the policies and procedures that PIMCO uses to vote proxies relating to portfolio securities of each Fund, and information about how each Fund voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, are available without charge, upon request, by calling the Funds at (844) 33-PIMCO (844-337-4626), on the Funds website at www.pimco.com, and on the Securities and Exchange Commission s (SEC) website at http://www.sec.gov.

An investment in a Fund is not a deposit of a bank and is not guaranteed or insured by the Federal Deposit Insurance Corporation or any other government agency. It is possible to lose money on investments in the Funds.

The Trustees are responsible generally for overseeing the management of the Funds. The Trustees authorize the Funds to enter into service agreements with the Investment Manager and other service providers

in order to provide, and in some cases authorize service providers to procure through other parties, necessary or desirable services on behalf of the Funds. Shareholders are not parties to or third-party beneficiaries of such service agreements. Neither a Fund soriginal or any subsequent prospectus or Statement of Additional Information (SAI), any press release or shareholder report, any contracts filed as exhibits to a Fund sorigistration statement, nor any other communications, disclosure documents or regulatory filings from or on behalf of a Fund creates a contract between or among any shareholders of a Fund, on the one hand, and the Fund, a service provider to the Fund, and/or the Trustees or officers of the Fund, on the other hand. The Trustees (or the Funds and their officers, service providers or other delegates acting under authority of the Trustees) may amend its most recent or use a new prospectus or SAI with respect to a Fund, adopt and disclose new or amended policies and other changes in press releases and shareholder reports and/or amend, file and/or issue any other communications, disclosure documents or regulatory filings, and may amend or enter into any contracts to which a Fund is a party, and interpret the investment objective(s), policies, restrictions and contractual provisions applicable to any Fund, without shareholder input or approval, except in circumstances in which shareholder approval is specifically required by law (such as changes to fundamental investment policies) or where a shareholder approval requirement was specifically disclosed in a Fund s prospectus, SAI or shareholder report and is otherwise still in effect.

Each Fund files a complete schedule of its portfolio holdings with the SEC for the first and third quarters of its fiscal year on Form N-Q. A copy of each Fund s FormN-Q is available on the SEC s website at http://www.sec.gov and may be reviewed and copied at the SEC s Public Reference Room in Washington, D.C., and is available without charge, upon request by calling the Funds at (844) 33-PIMCO (844-337-4626) and on the Funds website at www.pimco.com.

Updated portfolio holdings information about a Fund will be available at www.pimco.com approximately 15 calendar days after such Fund s most recent fiscal quarter end, and will remain accessible until such Fund files a Form N-Q or a shareholder report for the period which includes the date of the information. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

* (Cumulative return
(1)	Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and the principal value of an investment will fluctuate. Total return, market price, NAV, market price distribution yield, and NAV distribution yield will fluctuate with changes in market conditions. For performance current to the most recent month-end, visit www.pimco.com or call (844) 33-PIMCO.
(2)	Distribution yields are not performance and are calculated by annualizing the most recent distribution per share and dividing by the NAV or market price, as applicable, as of the reported date. Distributions may be comprised of ordinary income, net capital gains, and/or a return of capital (ROC) of your investment in the Fund. Because the distribution rate may include a ROC, it should not be confused with yield or income. If the Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income in accordance with its policies and good accounting practices, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. Please refer to the most recent Section 19 Notice, if applicable, for additional information regarding the estimated composition of distributions. Please visit www.pimco.com for most recent Section 19 Notice, if applicable. Final determination of a distribution s tax character will be made on Form 1099 DIV sent to shareholders each January.
(3)	Represents total effective leverage outstanding, as a percentage of total managed assets. Total effective leverage consists of preferred shares, reverse repurchase agreements and other borrowings, credit default swap notional and floating rate notes issued in tender option bond transactions, as applicable (collectively Total Effective Leverage). The Fund may engage in other transactions not included in Total Effective Leverage disclosed above that may give reto a form of leverage, including certain derivative transactions. For the purpose of calculating Total Effective Leverage outstanding as a percentage of total managed assets, total managed assets refer to total assets (including assets attributable to Total Effective Leverage that may be outstanding) minus accrued liabilities (other than liabilities representing Total Effective Leverage).
In	vestment Objective and Strategy Overview
ΡI	MCO Municipal Income Fund s investment objective is to seek to provide current income exempt from federal income tax.
Fı	and Insights at NAV
Tł	te following affected performance during the reporting period:
»	Duration exposure contributed to performance, as municipal yields moved lower.
»	Exposure to the revenue-backed sector contributed to performance, as the sector outperformed the general municipal bond market.
»	Exposure to the tobacco sector contributed to performance, as the sector outperformed the general municipal bond market.
»	Exposure to the industrial revenue sector contributed to performance, as the sector outperformed the general municipal bond market.
»	Exposure to the health care sector contributed to performance, as the sector outperformed the general municipal bond market.

» A modest allocation to Virgin Islands-domiciled securities detracted from performance.

If the Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income in accordance with its policies and good accounting practices, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. Please refer to the most recent Section 19 Notice, if applicable, for additional information regarding the estimated composition of distributions. Please visit www.pimco.com for most recent Section 19 Notice, if applicable. Final determination of a distribution s tax character will be made on Form 1099 DIV sent to shareholders each January.
(3)	Represents total effective leverage outstanding, as a percentage of total managed assets. Total effective leverage consists of preferred shares, reverse repurchase agreements and other borrowings, credit default swap notional and floating rate notes issued in tender option bond transactions, as applicable (collectively Total Effective Leverage). The Fund may engage in other transactions not included in Total Effective Leverage disclosed above that may give rise to a form of leverage, including certain derivative transactions. For the purpose of calculating Total Effective Leverage outstanding as a percentage of total managed assets, total managed assets refer to total assets (including assets attributable to Total Effective Leverage that may be outstanding) minus accrued liabilities (other than liabilities representing Total Effective Leverage).
In	vestment Objective and Strategy Overview
	MCO New York Municipal Income Fund II s investment objective is to seek to provide current income exempt from federal, New York State and New York y income tax.
Fu	nd Insights at NAV
Th	e following affected performance during the reporting period:
»	The Fund s duration exposure contributed to performance, as municipal bond yields moved lower.
»	Exposure to the revenue-backed sector contributed to performance, as the sector outperformed the general municipal bond market.
»	Exposure to the tobacco sector contributed to performance, as the sector outperformed the general municipal bond market.
»	Exposure to the industrial revenue sector contributed to performance, as the sector outperformed the general municipal bond market.
»	A modest allocation to Virgin Islands-domiciled securities detracted from performance.

^{*} Cumulative return

(1) Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and the principal value of an investment will fluctuate. Total return, market price, NAV, market price distribution yield, and NAV distribution yield will fluctuate with changes in market conditions. For performance current to the most recent month-end, visit www.pimco.com or call (844) 33-PIMCO.	
(2) Distribution yields are not performance and are calculated by annualizing the most recent distribution per share and dividing by the NAV or market price, as applicable, as of the reported date. Distributions may be comprised of ordinary income, net capital gains, and/or a return of capital (ROC) of your investment in the Fund. Because the distribution rate may include a ROC, it should not be confused with yield or income. If the Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income in accordance with its policies and good accounting practices, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. Please refer to the most recent Section 19 Notice, if applicable, for additional information regarding the estimated composition of distributions. Please visit www.pimco.com for most recent Section 19 Notice, if applicable. Final determination of a distribution s tax character will be made on Form 1099 DIV sent to shareholders each January.	,

- + Unaudited
- * Annualized
- ${}^{\wedge}$ Reflects an amount rounding to less than one cent.
- (a) Per share amounts based on average number of common shares outstanding during the year.
- (b) The tax characterization of distributions is determined in accordance with federal income tax regulations. The actual tax characterization of distributions paid is determined at the end of the fiscal year. See Note 2, Distributions Common Shares, in the Notes to Financial Statements for more information.
- (c) Total investment return is calculated assuming a purchase of a common share at the market price on the first day and a sale of a common share at the market price on the last day of each year or period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Funds dividend reinvestment plan. Total investment return does not reflect brokerage commissions in connection with the purchase or sale of Fund shares.
- $(d) \ Calculated \ on \ the \ basis \ of \ income \ and \ expenses \ applicable \ to \ both \ common \ and \ preferred \ shares \ relative \ to \ the \ average \ net \ assets \ of \ common \ shareholders.$
- (e) Interest expense primarily relates to participation in borrowing and financing transactions. See Note 5, Borrowings and Other Financing Transactions, in the Notes to Financial Statements for more information.
- (f) Fiscal year end changed from April 30th to December 31st.
- (g) Fiscal year end changed from May 31st to December 31st.
- (h) Fiscal year end changed from September 30^{th} to December 31^{st} .

(i)

Total distributions for the period ended December 31, 2015 may be lower than prior fiscal years due to fiscal year end changes resulting in a reduction of the amount of days in the period ended December 31, 2015.

SEMIANNUAL REPORT JUNE 30, 2017 33

Schedule of Investments PIMCO Municipal Income Fund (Cont.)

June 30, 2017 (Unaudited)

- (e) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction.
- (f) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2017.

(g) RESTRICTED SECURITIES:

NOTES TO SCHEDULE OF INVESTMENTS (AMOUNTS IN THOUSANDS*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) When-issued security.
- (b) Zero coupon security.
- (c) Coupon represents a yield to maturity.
- (d) Security becomes interest bearing at a future date.
- (e) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Borrowings and Other Financing Transactions, in the Notes to Financial Statements for more information.
- (f) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2017.

NOTES TO SCHEDULE OF INVESTMENTS (AMOUNTS IN THOUSANDS*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) When-issued security.
- (b) Zero coupon security.
- (c) Coupon represents a yield to maturity.
- (d) Security becomes interest bearing at a future date.
- (e) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Borrowings and Other Financing Transactions, in the Notes to Financial Statements for more information.
- (f) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2017.

⁽¹⁾ Includes accrued interest.

⁽²⁾ Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Master Arrangements, in the Notes to Financial Statements for more information regarding master netting arrangements.

There were no significant transfers among Levels 1, 2, or 3 during the period ended June 30, 2017.

NOTES TO SCHEDULE OF INVESTMENTS (AMOUNTS IN THOUSANDS*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- (a) Zero coupon security.
- (b) Coupon represents a yield to maturity.
- (c) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Borrowings and Other Financing Transactions, in the Notes to Financial Statements for more information.
- (d) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2017.

BORROWINGS AND OTHER FINANCING TRANSACTIONS SUMMARY

The following is a summary by counterparty of the market value of Borrowings and Other Financing Transactions and collateral pledged/(received) as of June 30, 2017:

Counterparty	Agi Pr	urchase reement oceeds to be cceived	fo Rev Repui	able or erse rchase ements	fo Sale-B	able or uyback actions	Borro Other	Total owings and Financing nsactions	ollateral d/(Received)	Net osure ⁽²⁾
Global/Master Repurchase Agreement BCY	\$	3,500	\$	0	\$	0	\$	3,500	\$ (3,616)	\$ (116)
Total Borrowings and Other Financing Transactions	\$	3,500	\$	0	\$	0				

⁽¹⁾ Includes accrued interest.

FAIR VALUE MEASUREMENTS

The following is a summary of the fair valuations according to the inputs used as of June 30, 2017 in valuing the Fund s assets and liabilities:

Category and Subcategory	Lev	el 1]	Level 2	Lev	vel 3	Fair Value at 5/30/2017
Investments in Securities, at Value							
Municipal Bonds & Notes							
California	\$	0	\$	477,191	\$	0	\$ 477,191
Illinois		0		8,974		0	8,974
U.S. Virgin Islands		0		1,007		0	1,007
Short-Term Instruments							
Repurchase Agreements		0		3,500		0	3,500
Short-Term Notes		0		300		0	300

⁽²⁾ Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Master Arrangements, in the Notes to Financial Statements for more information regarding master netting arrangements.

Total Investments \$ 0 \$ 490,972 \$ 0 \$ 490,972

There were no significant transfers among Levels 1, 2, or 3 during the period ended June 30, 2017.

NOTES TO SCHEDULE OF INVESTMENTS (AMOUNTS IN THOUSANDS*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- (a) When-issued security.
- (b) Zero coupon security.
- (c) Coupon represents a yield to maturity.
- (d) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Borrowings and Other Financing Transactions, in the Notes to Financial Statements for more information.
- (e) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2017.

FAIR VALUE MEASUREMENTS

The following is a summary of the fair valuations according to the inputs used as of June 30, 2017 in valuing the Fund s assets and liabilities:

Fair Value at Category and Subcategory Level 1 Level 2 Level 3 06/30/2017

NOTES TO SCHEDULE OF INVESTMENTS (AMOUNTS IN THOUSANDS*):

- st A zero balance may reflect actual amounts rounding to less than one thousand.
- (a) When-issued security.
- (b) Zero coupon security.
- (c) Coupon represents a yield to maturity.
- (d) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Borrowings and Other Financing Transactions, in the Notes to Financial Statements for more information.
- (e) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2017.

BORROWINGS AND OTHER FINANCING TRANSACTIONS

FAIR VALUE MEASUREMENTS

The following is a summary of the fair valuations according to the inputs used as of June 30, 2017 in valuing the Fund s assets and liabilities:

SEMIANNUAL REPORT JUNE 30, 2017 51

A zero balance may reflect actual amounts rounding to less than one thousand.

Security is in default.

Table of Contents

Schedule of Investments PIMCO New York Municipal Income Fund (Cont.)

June 30, 2017 (Unaudited)

- (a) Zero coupon security.
- (b) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Borrowings and Other Financing Transactions, in the Notes to Financial Statements for more information.

NOTES TO SCHEDULE OF INVESTMENTS (AMOUNTS IN THOUSANDS*):

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Zero coupon security.
- (b) Coupon represents a yield to maturity.
- (c) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Borrowings and Other Financing Transactions, in the Notes to Financial Statements for more information.
- (d) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2017.

Total Borrowings and Other Financing Transactions	\$	7,701	\$	0	\$	0				

⁽¹⁾ Includes accrued interest.

54 PIMCO CLOSED-END FUNDS

See Accompanying Notes

⁽²⁾ Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Master Arrangements, in the Notes to Financial Statements for more information regarding master netting arrangements.

June 30, 2017 (Unaudited)

FAIR VALUE MEASUREMENTS

The following is a summary of the fair valuations according to the inputs used as of June 30, 2017 in valuing the Fund s assets and liabilities:

Notes to Financial Statements

1. ORGANIZATION

PIMCO Municipal Income Fund, PIMCO Municipal Income Fund II, PIMCO Municipal Income Fund III, PIMCO California Municipal Income Fund, PIMCO California Municipal Income Fund III, PIMCO New York Municipal Income Fund, PIMCO New York Municipal Income Fund III (each a Fund and collectively the Funds) are organized abosed-end management investment companies registered under the Investment Company Act of 1940, as amended, and the rules and regulations thereunder (the Act). Each Fund was organized as a Massachusetts business trust on the dates shown in the table below. Pacific Investment Management Company LLC (PIMCO or the Manager) serves as the Funds investment manager.

	Formation
Fund Name	Date
PIMCO Municipal Income Fund	May 9, 2001
PIMCO Municipal Income Fund II	March 29, 2002
PIMCO Municipal Income Fund III	August 20, 2002
PIMCO California Municipal Income Fund	May 10, 2001
PIMCO California Municipal Income Fund II	March 29, 2002
PIMCO California Municipal Income Fund III	August 20, 2002
PIMCO New York Municipal Income Fund	May 10, 2001
PIMCO New York Municipal Income Fund II	March 29, 2002
PIMCO New York Municipal Income Fund III	August 20, 2002

2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by each Fund in the preparation of its financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP). Each Fund is treated as an investment company under the reporting requirements of U.S. GAAP. The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

(a) Securities Transactions and Investment Income Securities transactions are recorded as of the trade date for financial reporting purposes. Realized gains (losses) from securities sold are recorded on the identified cost basis. Securities purchased or sold on a when-issued or delayed-delivery basis may be settled beyond a standard settlement period for the security after the trade date. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as a Fund is informed of the ex-dividend date. Interest income, adjusted for the accretion of discounts and

amortization of premiums, is recorded on the accrual basis from settlement date, with the exception of securities with a forward starting effective date, where interest income is recorded on the accrual basis from effective date. For convertible securities, premiums attributable to the conversion feature are not amortized. Estimated tax liabilities on certain foreign securities are recorded on an accrual basis and are reflected as components of interest income or net change in unrealized appreciation (depreciation) on investments on the Statements of Operations, as appropriate. Tax liabilities realized as a result of such security sales are reflected as a component of net realized gain (loss) on investments on the Statements of Operations. Paydown gains (losses) on mortgage-related and other asset-backed securities, if any, are recorded as components of interest income on the Statements of Operations. Income or short-term capital gain distributions received from registered investment companies, if any, are recorded as dividend income. Long-term capital gain distributions received from registered investment companies, if any,

are recorded as realized gains.

Debt obligations may be placed on non-accrual status and related interest income may be reduced by ceasing current accruals and writing off interest receivable when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. A debt obligation is removed from non-accrual status when the issuer resumes interest payments or when collectability of interest is probable.

(b) Distributions Common Shares The following table shows the anticipated frequency of distributions from net investment income and gains from the sale of portfolio securities and other sources to common shareholders.

	Distribution	n Frequency
Fund Name	Declared	Distributed
PIMCO Municipal Income Fund	Monthly	Monthly
PIMCO Municipal Income Fund II	Monthly	Monthly
PIMCO Municipal Income Fund III	Monthly	Monthly
PIMCO California Municipal Income Fund	Monthly	Monthly
PIMCO California Municipal Income Fund II	Monthly	Monthly
PIMCO California Municipal Income Fund III	Monthly	Monthly
PIMCO New York Municipal Income Fund	Monthly	Monthly
PIMCO New York Municipal Income Fund II	Monthly	Monthly
PIMCO New York Municipal Income Fund III	Monthly	Monthly

Net realized capital gains earned by each Fund, if any, will be distributed at least annually.

Income distributions and capital gain distributions are determined in accordance with income tax regulations which may differ from U.S. GAAP. Differences between tax regulations and U.S. GAAP may cause timing differences between income and capital gain recognition. Further, the character of investment income and capital gains may be different for certain transactions under the two methods of accounting.

58 PIMCO CLOSED-END FUNDS

Table of Contents

June 30, 2017 (Unaudited)

As a result, income distributions and capital gain distributions declared during a fiscal period may differ significantly from the net investment income (loss) and realized gains (losses) reported on each Fund s annual financial statements presented under U.S. GAAP.

If a Fund estimates that a portion of one of its dividend distributions may be comprised of amounts from sources other than net investment income in accordance with its policies and good accounting practices, the Fund will notify shareholders of record of the estimated composition of such distribution through a Section 19 Notice. For these purposes, a Fund estimates the source or sources from which a distribution is paid, to the close of the period as of which it is paid, in reference to its internal accounting records and related accounting practices. If, based on such accounting records and practices, it is estimated that a particular distribution does not include capital gains or paid-in surplus or other capital sources, a Section 19 Notice generally would not be issued. It is important to note that differences exist between a Fund s daily internal accounting records and practices, the Fund s financial statements presented in accordance with U.S. GAAP, and recordkeeping practices under income tax regulations. For instance, the Fund s internal accounting records and practices may take into account, among other factorstax-related characteristics of certain sources of distributions that differ from treatment under U.S. GAAP. Examples of such differences may include, among others, the treatment of paydowns on mortgage-backed securities purchased at a discount and periodic payments under interest rate swap contracts. Accordingly, among other consequences, it is possible that a Fund may not issue a Section 19 Notice in situations where the Fund s financial statements prepared later and in accordance with U.S. GAAP and/or the final tax character of those distributions might later report that the sources of those distributions included capital gains and/or a return of capital. Please visit www.pimco.com for the most recent Section 19 Notice, if applicable, for additional information regarding the estimated composition of distributions. Final determination of a distribution s tax character will be reported on Form 10

Distributions classified as a tax basis return of capital, if any, are reflected on the Statements of Changes in Net Assets and have been recorded to paid in capital. In addition, other amounts have been reclassified between undistributed (overdistributed) net investment income (loss), accumulated undistributed (overdistributed) net realized gain (loss) and/or paid in capital to more appropriately conform U.S. GAAP to tax characterizations of distributions.

(c) New Accounting Pronouncements In August 2014, the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update (ASU), ASI014-15 requiring management to evaluate whether there are conditions or events, considered in the aggregate,

that raise substantial doubt about the entity s ability to continue as a going concern. The ASU is effective prospectively for annual periods ending after December 15, 2016, and interim periods thereafter. The Funds have adopted the ASU. The implementation of the ASU did not have an impact on the Funds financial statements.

In May 2015, the FASB issued ASU 2015-07 which removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the NAV per share practical expedient. The ASU also removes the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the NAV per share practical expedient. The ASU is effective for annual periods beginning after December 15, 2015 and interim periods within those annual periods. The Funds have adopted the ASU. The implementation of the ASU did not have an impact on the Funds financial statements.

In March 2016, the FASB issued ASU 2016-05 which provides guidance related to the impact of derivative contract novations on certain relationships under Accounting Standards Codification (ASC) 815. The ASU is effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. The Funds have adopted the ASU. The implementation of the ASU did not have an impact on

the Funds financial statements.

In August 2016, the FASB issued ASU 2016-15 which amends ASC 230 to clarify guidance on the classification of certain cash receipts and cash payments in the Statement of Cash Flows. The ASU is effective for annual periods beginning after December 15, 2017, and interim periods within those annual periods. At this time, management is evaluating the implications of these changes on the financial statements.

In October 2016, the U.S. Securities and Exchange Commission (SEC) adopted new rules and forms, and amendments to certain current rules and forms, to modernize reporting and disclosure of information by registered investment companies. The amendments to Regulation S-X will require standardized, enhanced disclosure about derivatives in investment company financial statements, and will also change the rules governing the form and content of such financial statements. The compliance date for these amendments is August 1, 2017. Compliance is based on reporting period-end date. At this time, management is assessing the anticipated impact of these regulatory developments.

In November 2016, the FASB issued ASU 2016-18 which amends ASC 230 to provide guidance on the classification and presentation of changes in restricted cash and restricted cash equivalents on the Statement of Cash Flows. The ASU is effective for annual periods beginning after December 15, 2017, and interim periods within those annual periods. At this time, management is evaluating the implications of these changes on the financial statements.

Notes to Financial Statements (Cont.)

In March 2017, the FASB issued ASU 2017-08 which provides guidance related to the amortization period for certain purchased callable debt securities held at a premium. The ASU is effective for annual periods beginning after December 15, 2018, and interim periods within those annual periods. The Funds have adopted the ASU. The implementation of the ASU did not have an impact on the Funds financial statements.

3. INVESTMENT VALUATION AND FAIR VALUE MEASUREMENTS

(a) Investment Valuation Policies The NAV of a Fund s shares is determined by dividing the total value of portfolio investments and other assets attributable to that Fund less any liabilities by the total number of shares outstanding of that Fund.

On each day that the New York Stock Exchange (NYSE) is open, Fund shares are ordinarily valued as of the close of regular trading (NYSE Close). Information that becomes known to the Funds or their agents after the time as of which NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of a security or the NAV determined earlier that day. Each Fund reserves the right to change the time as of which its respective NAV is calculated if the Fund closes earlier, or as permitted by the SEC.

For purposes of calculating NAV, portfolio securities and other assets for which market quotes are readily available are valued at market value. Market value is generally determined on the basis of official closing prices or the last reported sales prices, or if no sales are reported, based on quotes obtained from established market makers or prices (including evaluated prices) supplied by the Funds—approved pricing services, quotation reporting systems and other third-party sources (together, Pricing Services—). The Funds will normally use pricing data for domestic equity securities received shortly after the NYSE Close and do not normally take into account trading, clearances or settlements that take place after the NYSE Close. If market value pricing is used, a foreign (non-U.S.) equity security traded on a foreign exchange or on more than one exchange is typically valued using pricing information from the exchange considered by PIMCO to be the primary exchange. A foreign (non-U.S.) equity security will be valued as of the close of trading on the foreign exchange, or the NYSE Close, if the NYSE Close occurs before the end of trading on the foreign exchange. Domestic and foreign (non-U.S.) fixed income securities, non-exchange traded derivatives, and equity options are normally valued on the basis of quotes obtained from brokers and dealers or Pricing Services using data reflecting the earlier closing of the principal markets for those securities. Prices obtained from Pricing Services may be based on, among other things, information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Certain fixed income securities purchased on a delayed-delivery basis are marked to

market daily until settlement at the forward settlement date. Exchange-traded options, except equity options, futures and options on futures are valued at the settlement price determined by the relevant exchange. Swap agreements are valued on the basis of bid quotes obtained from brokers and dealers or market-based prices supplied by Pricing Services. A Fund s investments impen-end management investment companies, other than exchange-traded funds (ETFs), are valued at the NAVs of such investments.

Investments for which market quotes or market based valuations are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction. The Board has adopted methods for valuing securities and other assets in circumstances where market quotes are not readily available, and has delegated to PIMCO the responsibility for applying the fair valuation methods. In the event that market quotes or market based valuations are not readily available, and the security or asset cannot be valued pursuant to a Board approved valuation method, the value of the security or asset will be determined in good faith by the Valuation Oversight Committee of the Board (Valuation Oversight Committee), generally based on recommendations provided by the Manager. Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information, bid/ask information,

indicative market quotations (Broker Quotes), Pricing Services prices), including where events occur after the close of the relevant market, but prior to the NYSE Close, that materially affect the values of a Funds securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities trade do not open for trading for the entire day and no other market prices are available. The Board has delegated to the Manager the responsibility for monitoring significant events that may materially affect the values of a Funds securities or assets and for determining whether the value of the applicable securities or assets should be reevaluated in light of such significant events.

When a Fund uses fair valuation to determine the value of a portfolio security or other asset for purposes of calculating its NAV, such investments will not be priced on the basis of quotes from the primary market in which they are traded, but rather may be priced by another method that the Board or persons acting at their direction believe reflects fair value. Fair valuation may require subjective determinations about the value of a security. While the Funds policy is intended to result in a calculation of a Fund s NAV that fairly reflects security values as of the time of pricing, the Funds cannot ensure that fair values determined by the Board or persons acting at their direction would accurately reflect the price that a Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance,

60 PIMCO CLOSED-END FUNDS

Table of Contents

June 30, 2017 (Unaudited)

in a forced or distressed sale). The prices used by a Fund may differ from the value that would be realized if the securities were sold.

(b) Fair Value Hierarchy U.S. GAAP describes fair value as the price that a Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. It establishes a fair value hierarchy that prioritizes inputs to valuation methods and requires disclosure of the fair value hierarchy, separately for each major category of assets and liabilities, that segregates fair value measurements into levels (Level 1, 2, or 3). The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Levels 1, 2, and 3 of the fair value hierarchy are defined as follows:

Level 1 Quoted prices in active markets or exchanges for identical assets and liabilities.

Level 2 Significant other observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market corroborated inputs.

Level 3 Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by the Board or persons acting at their direction that are used in determining the fair value of investments.

In accordance with the requirements of U.S. GAAP, the amounts of transfers between Levels 1 and 2 and transfers into and out of Level 3, if material, are disclosed in the Notes to Schedule of Investments for each respective Fund.

For fair valuations using significant unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to realized gain (loss), unrealized appreciation (depreciation), purchases and sales, accrued discounts (premiums), and transfers into and out of the Level 3 category during the period. The end of period value is used for the transfers between Levels of a Fund s assets and liabilities. Additionally, U.S. GAAP requires quantitative information regarding the significant unobservable inputs used in the determination of fair value of assets or liabilities categorized as Level 3 in the fair value hierarchy. In accordance with the requirements of U.S. GAAP, a fair value hierarchy, and if material, a Level 3 reconciliation and details of significant unobservable inputs, have been included in the Notes to Schedule of Investments for each respective Fund.

(c) Valuation Techniques and the Fair Value Hierarchy Level 1 and Level 2 trading assets and trading liabilities, at fair value The valuation methods (or techniques) and significant inputs used in determining the fair values of portfolio securities or other assets and liabilities categorized as Level 1 and Level 2 of the fair value hierarchy are as follows:

Fixed income securities including corporate, convertible and municipal bonds and notes, U.S. government agencies, U.S. treasury obligations, sovereign issues, bank loans, convertible preferred securities and non-U.S. bonds are normally valued on the basis of quotes obtained from brokers and dealers or Pricing Services that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. The Pricing Services internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as

described above are categorized as Level 2 of the fair value hierarchy.

Fixed income securities purchased on a delayed-delivery basis or as a repurchase commitment in a sale-buyback transaction are marked to market daily until settlement at the forward settlement date and are categorized as Level 2 of the fair value hierarchy.

Level 3 trading assets and trading liabilities, at fair value When a fair valuation method is applied by PIMCO that uses significant unobservable inputs, investments will be priced by a method that the Board or persons acting at their direction believe reflects fair value and are categorized as Level 3 of the fair value hierarchy.

Short-term debt instruments (such as commercial paper) having a remaining maturity of 60 days or less may be valued at amortized cost, so long as the amortized cost value of such short-term debt instrument is approximately the same as the fair value of the instrument as determined without the use of amortized cost valuation. These securities are categorized as level 2 or level 3 of the fair value hierarchy depending on the source of the base price.

4. SECURITIES AND OTHER INVESTMENTS

(a) Investments in Securities

Restricted Securities Certain Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities may generally be sold privately, but are required to be registered or exempted from such registration before being sold to the public. Private placement securities are generally considered to be restricted except for those securities traded between qualified institutional investors under the provisions of Rule 144A of the Securities Act of 1933. Disposal of restricted securities may involve time-consuming negotiations and expenses, and prompt sale at an acceptable price may be difficult to

SEMIANNUAL REPORT JUNE 30, 2017

61

Table of Contents

Notes to Financial Statements (Cont.)

achieve. Restricted securities held by the Funds at June 30, 2017 are disclosed in the Notes to Schedules of Investments.

U.S. Government Agencies or Government-Sponsored Enterprises Certain Funds may invest in securities of U.S. Government agencies or government-sponsored enterprises. U.S. Government securities are obligations of and, in certain cases, guaranteed by, the U.S. Government, its agencies or instrumentalities. Some U.S. Government securities, such as Treasury bills, notes and bonds, and securities guaranteed by the Government National Mortgage Association (GNMA or Ginnie Mae), are supported by the full faith and credit of the U.S. Government; others, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Department of the Treasury (the U.S. Treasury); and others, such as those of the Federal National Mortgage Association (FNMA or Fannie Mae), are supported by the discretionary authority of the U.S. Government to purchase the agency s obligations.

U.S. Government securities may include zero coupon securities. Zero coupon securities do not distribute interest on a current basis and tend to be subject to a greater risk than interest-paying securities. Government-related guarantors (i.e., not backed by the full faith and credit of the U.S. Government) include FNMA and the Federal Home Loan Mortgage Corporation (FHLMC or Freddie Mac). FNMA is a government-sponsored corporation. FNMA purchases conventional (i.e., not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC issues Participation Certificates (PCs), which are pass-through securities, each representing an undivided interest in a pool of residential mortgages. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the U.S. Government.

When-Issued Transactions Certain Funds may purchase or sell securities on a when-issued basis. These transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Transactions to purchase or sell securities on a when-issued basis involve a commitment by a Fund to purchase or sell these securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. A Fund may sell when-issued securities before they are delivered, which may result in a realized gain (loss).

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The following disclosures contain information on a Fund s ability to lend or borrow cash or securities to the extent permitted under the Act, which may be viewed as borrowing or financing transactions by a Fund. The location of these instruments in each Fund s financial statements is described below. For a detailed description of credit and counterparty risks that can be associated with borrowings and other financing transactions, please see Note 6, Principal Risks.

(a) Repurchase Agreements Certain Funds may engage in repurchase agreements. Under the terms of a typical repurchase agreement, a Fund purchases an underlying debt obligation (collateral) subject to an obligation of the seller to repurchase, and a Fund to resell, the obligation at an agreed-upon price and time. The underlying securities for all repurchase agreements are held by a Fund s custodian or designated subcustodians under tri-party repurchase agreements and in certain instances will remain in custody with the counterparty. The market value of the collateral must be equal to or exceed the total amount of the repurchase obligations, including interest. Repurchase agreements, if any, including accrued interest, are included on the Statements of Assets and Liabilities. Interest earned is recorded as a component of interest income on the Statements of Operations. In periods of increased demand for collateral, a Fund may pay a fee for the receipt of collateral, which may result in interest expense to the Fund.

(b) Tender Option Bond Transactions Certain Funds may leverage their assets through the use of tender option bond transactions. In a tender option bond transaction (TOB), a tender option bond trust (TOB Trust) issues floating rate certificates (TOB Floater) and residual interest certificates (TOB Residual) and utilizes the proceeds of such issuance to purchase a fixed-rate municipal bond (Fixed Rate Bond). The TOB Floater is generally issued to third party investors (typically a money market fund) and the TOB Residual is generally issued to the Fund that sold or identified the Fixed Rate Bond. The TOB Trust divides the income stream provided by the Fixed Rate Bond to create two securities, the TOB Floater, which is a short-term security, and the TOB Residual, which is a longer-term security. The interest rates payable on the TOB Residual issued to a Fund bear an inverse relationship to the interest rate on the TOB Floater. The interest rate on the TOB Floater is reset by a remarketing process typically every 7 to 35 days. After income is paid on the TOB Floater at current rates, the residual income from the Fixed Rate Bond goes to the TOB Residual. Therefore, rising short-term rates result in lower income for the TOB Residual, and vice versa. In the case of a TOB Trust that utilizes the cash received from the issuance of the TOB Floater and TOB Residual (less transaction expenses) to purchase the Fixed Rate Bond from a Fund, the Fund may then invest the cash received in additional securities, generating leverage for the Fund. Other funds managed or

62 PIMCO CLOSED-END FUNDS

Table of Contents

June 30, 2017 (Unaudited)

advised by PIMCO (the PIMCO-Managed Funds) may also contribute municipal bonds to a TOB Trust into which a Fund has contributed Fixed Rate Bonds. If multiple PIMCO-Managed Funds participate in the same TOB Trust, the economic rights and obligations under the TOB Residual will be shared among the funds ratably in proportion to their participation in the TOB Trust.

The TOB Residual may be more volatile and less liquid than other municipal bonds of comparable maturity. In most circumstances the TOB Residual holder bears substantially all of the underlying Fixed Rate Bond s downside investment risk and also benefits from any appreciation in the value of the underlying Fixed Rate Bond. Investments in a TOB Residual typically will involve greater risk than investments in Fixed Rate Bonds.

The TOB Residual held by a Fund provides the Fund with the right to: (1) cause the holders of the TOB Floater to tender their notes at par, and (2) cause the sale of the Fixed-Rate Bond held by the TOB Trust, thereby collapsing the TOB Trust. TOB Trusts are generally supported by a liquidity facility provided by a third party bank or other financial institution (the Liquidity Provider) that provides for the purchase of TOB Floaters that cannot be remarketed. The holders of the TOB Floaters have the right to tender their certificates in exchange for payment of par plus accrued interest on a periodic basis (typically weekly) or on the occurrence of certain mandatory tender events. The tendered TOB Floaters are remarketed by a remarketing agent, which is typically an affiliated entity of the Liquidity Provider. If the TOB Floaters cannot be remarketed, the TOB Floaters are purchased by the TOB Trust either from the proceeds of a loan from the Liquidity Provider or from a liquidation of the Fixed Rate Bond.

The TOB Trust may also be collapsed without the consent of a Fund, as the TOB Residual holder, upon the occurrence of certain tender option termination events (or TOTEs) as defined in the TOB Trust agreements. Such termination events typically include the bankruptcy or default of the Fixed Rate Bond, a substantial downgrade in credit quality of the Fixed Rate Bond, or a judgment or ruling that interest on the Fixed Rate Bond is subject to federal income taxation. Upon the occurrence of a termination event, the TOB Trust would generally be liquidated in full with the proceeds typically applied first to any accrued fees owed to the trustee, remarketing agent and liquidity provider, and then to the holders of the TOB Floater up to par plus accrued interest owed on the TOB Floater and a portion of gain share, if any, with the balance paid out to the TOB Residual holder. In the case of a mandatory termination event (MTE), after the payment of fees, the TOB Floater holders would be paid before the TOB Residual holders (i.e., the Funds). In contrast, in the case of a TOTE, after payment of fees, the TOB Floater holders and the TOB Residual holders would be paid pro rata in proportion to the respective face values of their certificates.

Each Fund s transfer of Fixed Rate Bonds to a TOB Trust is generally considered a secured borrowing for financial reporting purposes. The Funds may account for the transactions described above as secured borrowings by including all or a portion of the Fixed Rate Bonds transferred to the TOB Trust in their Schedules of Investments, and account for the TOB Floater as a liability under the caption Payable for tender option bond floating rate certificates in the Funds Statements of Assets and Liabilities. Interest income, including amortization and accretion of premiums and discounts, from the underlying municipal bonds is recorded by each Fund on an accrual basis and is shown as interest on the Statements of Operations. Interest payable for the TOB Floater liability is shown as interest expense on the Statements of Operations.

The Funds may also purchase TOB Residuals in a secondary market transaction without transferring a fixed rate municipal bond into a TOB Trust. Such transactions are not accounted for as secured borrowings but rather as a security purchase with the TOB Residual being included in the Schedule of Investments.

In December 2013, regulators finalized rules implementing Section 619 (the Volcker Rule) and Section 941 (the Risk Retention Rules) of the Dodd-Frank Wall Street Reform and Consumer Protection Act. Both the Volcker Rule and the Risk Retention Rules apply to tender option bond programs and require that such programs be restructured. In particular, these rules preclude banking entities from (i) sponsoring or acquiring interests in the trusts used to hold a municipal bond in the creation of TOB Trusts; and (ii) continuing to service or maintain relationships with existing programs involving TOB Trusts to the same extent and in the same capacity as existing programs.

At this time, the full impact of these rules is not certain and the implementation of the Volker Rule is still being phased in with respect to TOB Trusts established prior to December 31, 2013 (Legacy TOB Trusts); in response to these rules, industry participants are continuing to explore various structuring alternatives for both Legacy TOB Trusts and TOB Trusts established after December 31, 2013 (Non-Legacy TOB Trusts). For example, under a new tender option bond structure, the Funds would hire service providers to assist the Funds with establishing, structuring and sponsoring a TOB Trust. Service providers to a TOB Trust, such as administrators, liquidity providers, trustees and remarketing agents would be acting at the direction of, and as agent of, the Funds as the TOB residual holders. This structure is relatively new to the TOBs marketplace and it is possible that regulators could take positions that could limit the market for such newly structured TOB Trust transactions or the Funds ability to hold TOB Residuals. Because of the important role that tender option bond programs play in the municipal bond market, it is possible that implementation of these rules and any resulting impact may adversely impact the municipal

SEMIANNUAL REPORT JUNE 30, 2017 63

Notes to Financial Statements (Cont.)

bond market and the Funds. For example, as a result of the implementation of these rules, the municipal bond market may experience reduced demand or liquidity and increased financing costs. Under the new TOB Trust structure, the Funds have certain additional duties and responsibilities, which may give rise to certain additional risks including, but not limited to, compliance, legal, regulatory and operational risks.

The Risk Retention Rules took effect in December 2016 and require the sponsor to a TOB Trust to retain at least five percent of the credit risk of the underlying assets supporting the TOB Trust s municipal bonds. The Risk Retention Rules may adversely affect the Funds ability to engage in TOB Trust transactions or increase the costs of such transactions in certain circumstances.

The Funds have restructured their Legacy TOB Trusts in conformity with regulatory guidelines. Under the new TOB Trust structure, the Liquidity Provider or remarketing agent will no longer purchase the tendered TOB Floaters, even in the event of failed remarketing. This may increase the likelihood that a TOB Trust will need to be collapsed and liquidated in order to purchase the tendered TOB Floaters. The TOB Trust may draw upon a loan from the Liquidity Provider to purchase the tendered TOB Floaters. Any loans made by the Liquidity Provider will be secured by the purchased TOB Floaters held by the TOB Trust and will be subject to an increased interest rate based on the number of days the loan is outstanding.

For the period ended June 30, 2017, the Funds average leverage outstanding from the use of TOB transactions and the daily weighted average interest rate, including fees, were as follows:

Fund Name	Average Leverage Outstanding (000s)	Weighted Average Interest Rate*
PIMCO Municipal Income Fund	\$ 33,685	2.09%
PIMCO Municipal Income Fund II	94,186	1.31%
PIMCO Municipal Income Fund III	42,090	1.42%
PIMCO California Municipal Income Fund	53,362	1.98%
PIMCO California Municipal Income Fund II	48,373	1.32%
PIMCO California Municipal Income Fund III	48,060	2.30%
PIMCO New York Municipal Income Fund	19,942	2.08%
PIMCO New York Municipal Income Fund II	21,284	1.30%
PIMCO New York Municipal Income Fund III	9,265	1.48%

^{*} Annualized

6. PRINCIPAL RISKS

In the normal course of business, the Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to such things as changes in the market (market risk) or failure or inability of the other party to a transaction to perform (credit and counterparty risk). See below for a detailed description of select principal
