I. Operating Results and Financial Conditions

2017 in Review

Looking back at the global economy in 2017, the U.S. economy continued to grow steadily as employment conditions and corporate earnings improved. In Europe, the economy remained stable as unemployment rates decreased and capital investment increased due to strong exports. The Chinese economy rallied due to public investments while the economies of emerging countries realized moderate recovery as the economies of Russia and Brazil bottomed out owing to the rising price of natural resources. In Japan, corporate earnings improved and consumer spending showed signs of recovery. As a result, the global economy overall continued to recover more robustly than was expected at the beginning of the year.

As for the markets in which Canon operates amid these conditions, demand for office multifunction devices (MFDs) and laser printers remained at around the same level as the previous year. While demand for cameras shrank moderately, demand for inkjet printers increased from the previous year with the economies recovering in emerging countries. Additionally, there was solid demand for medical equipment, mainly outside of Japan. Within the Industry and Others sector, demand for flat panel display (FPD) lithography equipment and manufacturing equipment for organic LED (OLED) panels enjoyed strong growth and the demand for network camera also enjoyed solid growth.

The average value of the yen during the year was ¥112.13 against the U.S. dollar, a year-on-year depreciation of approximately ¥4, and ¥126.69 against the euro, a year-on-year depreciation of approximately ¥6.

During 2017, unit sales of office MFDs increased compared with the previous year due to the expanded sales of color models. Additionally, unit sales of laser printers increased compared with the previous year, supported by the steady sales of newly launched models, as demand recovered in emerging countries. While unit sales of interchangeable-lens digital cameras decreased compared with the previous year, unit sales of digital compact cameras remained at around the same level amid the shrinking market, owing to increased sales of high-value-added models. Looking at inkjet printers, unit sales increased compared with the previous year, thanks to such factors as strong sales of newly launched home-use models and refillable ink tank models for emerging countries. Additionally, sales of semiconductor lithography equipment, FPD lithography equipment, and manufacturing equipment for OLED panels exceeded those of the previous year, thanks to favorable market conditions, and sales of network cameras increased steadily in response to the growing market. Under these conditions, along with the impact of acquiring Toshiba Medical Systems Corporation (TMSC) (Canon Medical Systems Corporation as of January 4th, 2018), net sales for the year increased by 19.9% year on year to ¥4,080.0 billion. Although the gross profit ratio decreased by 0.4 points to 48.8% due to the effect of the product mix, gross profit increased by 19.0% year on year to ¥1,992.7 billion, thanks to such factors as the increase in sales and continuous cost reduction efforts. Operating expenses increased by 15.0% year on year, mainly due to impairment loss on goodwill of commercial printing business in Office Business Unit and the impact of acquiring TMSC. As a result, operating profit increased by 44.8% to ¥331.5 billion. Adjusted operating profit, which excludes impairment losses on goodwill from operating profit as they are considered nonrecurring charges, increased by 59.7% to ¥365.4 billion. Other income (deductions) increased by ¥6.6 billion mainly due to gain on securities contributed to retirement benefit trust and foreign currency exchange losses while income before income taxes increased by 44.6% year on year to ¥353.9 billion and net income attributable to Canon Inc. increased by 60.6% to ¥241.9 billion.

Basic net income attributable to Canon Inc. shareholders per share for the year was ¥222.88, a year-on-year increase of ¥84.93.

Results by Segment

Looking at Canon's full-year performance by business unit, beginning with the Office Business Unit, unit sales of office MFDs increased from the previous year and achieved higher growth than the market average, supported by steady sales of next-generation color models designed to strengthen the product lineup such as the newly launched color A3 (12 x18 ") imageRUNNER ADVANCE C3500 series for small- and medium-size offices. Among high-speed continuous-feed printers, unit sales of the Océ-produced VarioPrint i300, a high-speed sheet-fed color inkjet press that offers superior low-running-cost performance, increased. As for laser printers, sales of both hardware and consumables increased from the previous year, supported by steady sales of new models that achieve low power consumption and compact body designs. These factors resulted in total sales for the business unit of ¥1,865.9 billion, a year-on-year increase of 3.2%, while operating profit totaled ¥180.6 billion, a year-on-year increase of 6.6%. Adjusted operating profit, which excludes impairment losses on goodwill from operating profit, increased by 26.6% to ¥214.6 billion.

Within the Imaging System Business Unit, while the pace of decline in demand for interchangeable-lens digital cameras is gradually decelerating, the sales of the advanced-amateur-models including the EOS 6D Mark II enjoyed solid demand, allowing Canon to maintain the top share, mainly in the United States, Europe, and Japan. As for compact-system cameras, the advanced-amateur-model EOS M6 and the entry-level EOS M100 enjoyed strong demand. As for digital compact cameras, amid the shrinking market, unit sales remained at the same level as the previous year, supported by the increased sales of such high-value-added models as the newly launched G9 X Mark II part of the high-image-quality PowerShot G-series lineup. As for inkjet printers, the newly designed home-use TS-series, refillable ink tank models targeting emerging countries and the imagePROGRAF PRO series of large format inkjet printer targeting the professional photo and graphic art markets enjoyed strong demand, resulting in unit sales increasing from the previous year. As a result, sales for the business unit increased by 3.7% year on year to ¥1,136.2 billion, while operating profit totaled ¥175.9 billion, a year-on-year increase of 21.8%.

Within the Medical System Business Unit, TMSC's computed tomography (CT) products increased the sales and maintained the top share in the Japanese market thanks to the solid sales of the newly launched Aquilion Precision CT scanner, which delivers the industry's highest level of high-resolution imaging. As for diagnostic ultrasound systems, sale of the Aplio i-series, which delivers proprietary high-resolution imaging technology, remained firm. As a result, sales for the business unit totaled ¥436.2 billion, while operating profit totaled ¥22.5 billion.

In the Industry and Others Business Unit, unit sales of semiconductor lithography equipment increased from the previous year as a result of increasing demand for memory devices used in data centers. Additionally, sales of FPD lithography equipment and manufacturing equipment for OLED panels increased significantly in response to continued growing demand for high-definition OLED displays used in mobile devices. As for network cameras, amid increasing market demand, Axis enjoyed solid sales, resulting in a considerable sales increase compared with the previous year. Consequently, sales for the business unit increased by 25.2% year on year to ¥731.7 billion, while operating profit grew by ¥49.3 billion from the previous year to ¥56.8 billion.

Cash Flow

During 2017, cash flow from operating activities totaled ¥590.6 billion, an increase of ¥90.3 billion compared with the previous year, mainly owing to improvements in profitability. Cash flow from investing activities decreased by ¥672.1 billion year on year to ¥165.0 billion due to the payment made in the previous year for the right to acquire all of the shares of TMSC. Accordingly, free cash flow totaled ¥425.5 billion, an increase of ¥762.4 billion compared with the corresponding year-ago period.

Cash flow from financing activities recorded an outlay of ¥340.5 billion, mainly owing to the dividend payout, the repurchasing of treasury stock and the repayment of long-term debt.

Owing to these factors, as well as the impact of foreign currency translation adjustments, cash and cash equivalents increased by ¥91.6 billion to ¥721.8 billion from the end of the previous year.

Outlook

As for the outlook for 2018, the U.S. economy is expected to recover stronger as corporate earnings and capital investments steadily improve thanks to tax reform. The European economy is expected to recover slowly due to increasing uncertainty surrounding the U.K.'s decision to leave the EU, although consumer spending is expected to remain stable due to solid employment conditions. Looking at China, the economy is expected to stabilize through public investments and solid consumer spending. Emerging economies, including Southeast Asia, are expected to continue to grow due to strong exports. With regard to the Japanese economy, the outlook indicates a trend of gradual recovery supported by improved employment conditions and consumer spending. Overall, the global economy is expected to continue achieving moderate growth, despite such concerns as increasing geopolitical risks.

In the businesses in which Canon is involved, for office MFDs, demand for color models is expected to grow moderately and make up for the contraction of the market for monochrome models, leading to the same level of demand overall compared with the previous year. Looking at the laser printer market, although the demand in developed countries is expected to decrease, demand in emerging countries continues to recover, resulting in overall demand remaining at the same level as the previous year. For interchangeable-lens digital cameras, demand is expected to decrease moderately. Projections for digital compact cameras indicate continued market contraction, centered mainly on low-priced models, despite solid demand for high-value-added models. With regard to inkjet printers, demand is expected to continue to exceed that of the previous year. As for the medical equipment market, demand is expected to remain firm in response to replacement demand for medical equipment in developed countries, increasing medical needs associated with population growth in emerging countries and changes in the prevalence of diseases. Looking at industrial equipment, within the semiconductor lithography equipment segment, the market is expected to enjoy healthy growth due to the increase in demand for memory devices used in data centers and mobile devices. The outlook for FPD lithography equipment and OLED panel manufacturing equipment points to continued active capital investment by panel manufacturers, which is expected to increase demand. The network camera market is also expected to grow in response to the increasing use of network cameras for diverse applications in such areas as marketing support in addition to disaster monitoring and crime prevention applications.

With regard to currency exchange rates for the year, on which Canon's performance outlook is based, Canon anticipates exchange rates of ¥110 to the U.S. dollar and ¥130 to the euro, representing appreciation of approximately ¥2 against the U.S. dollar and depreciation of approximately ¥3 against the euro compared with the annual average rates of the previous year.

Upon taking into consideration the current economic forecast, Canon projects full-year consolidated net sales in 2018 of ¥4,300.0 billion, a year-on-year increase of 5.4%; operating profit of ¥420.0 billion, a year-on-year increase of 26.7%; income before income taxes of ¥420.0 billion, a year-on-year increase of 18.7%; and net income attributable to Canon Inc. of ¥280.0 billion, a year-on-year increase of 15.7%.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

II. Basic Concept Regarding the Selection of Accounting Standards

Canon is listed on the New York Stock Exchange and, since registering its American Depositary Receipts on the OTC (over-the-counter) market in 1969, has prepared its consolidated financial statements in accordance with U.S. generally accepted accounting principles (GAAP) over the long term.

Canon has continued to adopt U.S. GAAP in order to maintain the continuity of financial statements from the past and to maintain international comparability.

8. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

SIGNIFICANT ACCOUNTING POLICIES

Canon's consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles.

Recently Issued Accounting Guidance

In January 2017, the Financial Accounting Standards Board issued an amendment which eliminates the second step from the impairment test of goodwill. This amendment requires the entity to recognize an impairment charge for the amount by which the carrying amount exceeds the fair value of reporting unit; however, the impairment charge is limited to the amount of goodwill allocated to that reporting unit. Canon early adopted this amended guidance from the impairment test performed after January 1, 2017.
