Note 1 Reporting and Accounting Policies

Nature of Operations

We are a holding company that provides, through our subsidiaries, personal automobile insurance with a focus on the nonstandard market. Although licensed to write insurance in all 50 states and the District of Columbia, we focus on select states that we believe offer the greatest opportunity for premium growth and profitability.

Basis of Consolidation and Reporting

The accompanying consolidated financial statements are unaudited and should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2014. This Quarterly Report on Form 10-Q, including the Condensed Notes to Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations, focuses on our financial performance since the beginning of the year.

These financial statements reflect certain adjustments necessary for a fair presentation of our results of operations and financial position. Such adjustments consist of normal, recurring accruals recorded to match expenses with their related revenue streams and the elimination of all significant inter-company transactions and balances.

We have evaluated events that occurred after September 30, 2015, for recognition or disclosure in our financial statements and the notes to the financial statements.

Schedules may not foot due to rounding.

Estimates

We based certain accounts and balances within these financial statements upon our estimates and assumptions. The amount of reserves for claims not yet paid, for example, is an item that we can only record by estimation. Unrealized capital gains and losses on investments are subject to market fluctuations, and we use judgment in the determination of whether unrealized losses on certain securities are temporary or other-than-temporary. Should actual results differ significantly from these estimates, the effect on our results of operations could be material. The results of operations for the periods presented may not be indicative of our results for the entire year.

Recently Issued Accounting Standards

In May 2015 the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update (ASU) related to the disclosure for short-duration contracts. The guidance requires additional disclosures related to the liability for unpaid claims and claim adjustment expenses in an effort to increase transparency and comparability. The standard is effective for fiscal years beginning after December 15, 2015, and is to be applied retrospectively. The new guidance will have no material impact on our results of operations or financial position.

In April 2015 the FASB issued an ASU related to the presentation of debt issuance costs. The guidance requires debt issuance costs to be presented in the balance sheet as a direct deduction from the carrying amount of the debt liability. The standard is effective for fiscal years beginning after December 15, 2015, and is to be applied

retrospectively. The new guidance will have no material impact on our results of operations or financial position. In May 2014 the FASB issued an ASU related to the accounting for revenue from contracts with customers. Insurance contracts have been excluded from the scope of the guidance. In August 2015 the FASB issued an ASU to defer the effective date from

fiscal years beginning after December 15, 2016, to fiscal years beginning after December 15, 2017. We do not expect the adoption of this standard to have a material impact on our financial condition or results of operations.

Condensed Notes to Consolidated Financial Statements

We do not report our long-term debt at fair value in the Consolidated Balance Sheets. The \$286.2 million and \$291.0 million fair value of our long-term debt at September 30, 2015, and December 31, 2014, respectively, would be included in Level 2 of the fair value hierarchy if it were reported at fair value.

Level 1 includes cash and cash equivalents, U.S. Treasury securities, an exchange-traded fund and equities held in a rabbi trust which funds our Supplemental Employee Retirement Plan ("SERP"). Level 2 includes securities whose fair value was determined using observable market inputs. Level 3 securities are comprised of (i) securities for which there is no active or inactive market for similar instruments; (ii) securities whose fair value is determined based on unobservable inputs; and (iii) securities, other than those backed by the U.S. Government, that are not rated by a nationally recognized statistical rating organization ("NRSRO"). We recognize transfers between levels at the beginning of the reporting period.

A third party nationally recognized pricing service provides the fair value of securities in Level 2. A summary of the significant valuation techniques and market inputs for each class of security follows:

U.S. Government: In determining the fair value for U.S. Government securities we use the market approach. The primary inputs to the valuation include reported trades, dealer quotes for identical or similar assets in markets that are not active, benchmark yields, credit spreads, reference data and industry and economic events.

State and municipal: In determining the fair value for state and municipal securities we use the market approach. The primary inputs to the valuation include reported trades, dealer quotes for identical or similar assets in markets that are not active, benchmark yields, credit spreads, reference data and industry and economic events.

Mortgage-backed securities: In determining the fair value for mortgage-backed securities we use the market approach and to a lesser extent the income approach. The primary inputs to the valuation include reported trades, dealer quotes for identical or similar assets in markets that are not active, benchmark yields, credit spreads, reference data, industry and economic events and monthly payment information.

Asset-backed securities: In determining the fair value for asset-backed securities we use the market approach and to a lesser extent the income approach. The primary inputs to the valuation include reported trades, dealer quotes for identical or similar assets in markets that are not active, benchmark yields, credit spreads, reference data, industry and economic events, monthly payment information and collateral performance.

Corporate: In determining the fair value for corporate securities we use the fair value approach. The primary inputs to the valuation models include reported trades, dealer quotes for identical or similar assets in markets that are not active, benchmark yields, credit spreads (for investment grade securities), observations of equity and credit default swap curves (for high-yield corporates), reference data and industry and economic events.

We review the third party pricing methodologies quarterly and test for significant differences between the market price used to value the security and recent sales activity.

Of the \$2.0 million fair value of securities in Level 3 at September 30, 2015, which consisted of five securities, we priced two based on non-binding broker quotes, one price was provided by our unaffiliated money manager and two securities, which were included in Level 3 because they were not rated by a nationally recognized statistical rating organization, were priced by a nationally recognized pricing service.

During the nine months ended September 30, 2015, one security was transferred from Level 2 into Level 3 because it was no longer rated by a nationally recognized statistical rating organization, and one security was transferred from Level 3 into Level 2 because its fair value was determinable using observable market inputs. There were no transfers of securities between Levels 1 and 2.

The gains or losses included in net earnings are included in the line item "Net realized (losses) gains on investments" in the Consolidated Statements of Earnings. We recognize the net gains or losses included in other comprehensive income in the line item "Unrealized (losses) gains on investments, net" in the Consolidated Statements of Comprehensive Income and the line item "Change in unrealized gain on investments" or the line item "Change in non-credit component of impairment losses on fixed maturities" in the Consolidated Statements of Changes in Shareholders' Equity.

Note 4 Investments

We consider all fixed maturity and equity securities to be available-for-sale and report them at fair value with the net unrealized gains or losses reported after-tax (net of any valuation allowance) as a component of other comprehensive income. The proceeds from sales of securities for the three and nine months ended September 30, 2015, were \$75.9 million and \$232.6 million, respectively. The proceeds for the three and nine months ended September 30, 2014, were \$67.8 million and \$190.1 million, respectively. The proceeds for the nine months ended September 30, 2015, were net of \$2.7 million of receivable for unsettled sales as of September 30, 2015. The proceeds for the nine months ended September 30, 2014, were net of \$1.9 million of receivable for securities sold during the third quarter of 2014 that had not settled at September 30, 2014.

Gross gains of \$1.6 million and gross losses of \$1.9 million were realized on sales of available for sale securities during the three months ended September 30, 2015, compared with gross gains of \$1.1 million and gross losses of \$0.1 million realized on sales during the three months ended September 30, 2014. Gross gains of \$4.3 million and gross losses of \$2.6 million were realized on sales of available for sale securities during the nine months ended September 30, 2015, compared with gross gains of \$3.9 million and gross losses of \$0.3 million realized on sales during the nine months ended September 30, 2014. Gains or losses on securities are determined on a specific identification basis.

Condensed Notes to Consolidated Financial Statements

The determination of whether unrealized losses are “other-than-temporary” requires judgment based on subjective as well as objective factors. Factors we considered and resources we used in our determination include:

- whether the unrealized loss is credit-driven or a result of changes in market interest rates;
- the length of time the security’s market value has been below its cost;
- the extent to which fair value is less than cost basis;
- the intent to sell the security;
- whether it is more likely than not that there will be a requirement to sell the security before its anticipated recovery;
- historical operating, balance sheet and cash flow data contained in issuer SEC filings;
- issuer news releases;
- near-term prospects for improvement in the issuer and/or its industry;
- industry research and communications with industry specialists; and
- third-party research and credit rating reports.

We regularly evaluate for potential impairment each security position that has either of the following: a fair value of less than 95% of its book value or an unrealized loss that equals or exceeds \$100,000.

Condensed Notes to Consolidated Financial Statements

For fixed maturity securities that are other-than-temporarily impaired, we assess our intent to sell and the likelihood that we will be required to sell the security before recovery of our amortized cost. If a fixed maturity security is considered other-than-temporarily impaired but we do not intend to and are not more than likely to be required to sell the security before our recovery of amortized cost, we separate the amount of the impairment into a credit loss component and the amount due to all other factors ("non-credit component"). The excess of the amortized cost over the present value of the expected cash flows determines the credit loss component of an impairment charge on a fixed maturity security. The present value is determined using the best estimate of cash flows discounted at (1) the effective interest rate implicit at the date of acquisition for non-structured securities; or (2) the book yield for structured securities. The techniques and assumptions for determining the best estimate of cash flows vary depending on the type of security. We recognize the credit loss component of an impairment charge in net earnings and the non-credit component in accumulated other comprehensive income. If we intend to sell or will, more likely than not, be required to sell a security, we treat the entire amount of the impairment as a credit loss.

For our securities held with unrealized losses, we believe, based on our analysis, that we will recover our cost basis in these securities and we do not intend to sell the securities nor is it more likely than not that there will be a requirement to sell the securities before they recover in value.

The following table is a progression of credit losses on fixed maturity securities that were bifurcated between a credit and non-credit component (\$ in thousands):

| | Nine months ended September 30, | |
|--------------------------------|---------------------------------|--------|
| | 2015 | 2014 |

The table below sets forth the scheduled maturities of fixed maturity securities at September 30, 2015, based on their fair values (\$ in thousands). We report securities that do not have a single maturity date at average maturity. Actual maturities may differ from contractual maturities because certain securities may be called or prepaid by the issuers.

Note 5 Long-Term Debt

In September 2012 we issued \$275 million principal of senior notes due September 2022 (the “5.0% Senior Notes”). The 5.0% Senior Notes accrue interest at 5.0%, payable semiannually. At the time we issued the 5.0% Senior Notes, we capitalized \$2.2 million of debt issuance costs, which we are amortizing over the term of the 5.0% Senior Notes. We calculated the September 30, 2015, fair value of \$286.2 million using a 228 basis point spread to the ten-year U.S. Treasury Note of 2.039%.

In August 2014 we renewed our agreement for a \$50 million three-year revolving credit facility (the “Credit Agreement”) that requires us to meet certain financial and other covenants. We are currently in compliance with all covenants under the Credit Agreement. At September 30, 2015, there were no borrowings outstanding under the Credit Agreement.

Note 6 Income Taxes

The \$24.0 million of favorable reserve development during the nine months ended September 30, 2015, was primarily due to decreases in severity as well as decreases in loss adjustment expenses related to Florida bodily injury coverages in accident years 2013 and 2014. A decrease in loss adjustment expenses related to California bodily injury coverages in accident years 2013 and 2014 also contributed to the \$11.3 million of favorable reserve development during the three months ended September 30, 2015.

The \$8.6 million of favorable reserve development during the nine months ended September 30, 2014, was primarily due to a decrease in severity in accident year 2013 in Florida bodily injury and in California property damage.

Contingencies

From time to time we and our subsidiaries are named as defendants in various lawsuits incidental to our insurance operations. We consider legal actions relating to claims made in the ordinary course of seeking indemnification for a loss covered by the insurance policy in establishing loss and LAE reserves.

We also face, in the ordinary course of business, lawsuits that seek damages beyond policy limits, commonly known as extra-contractual claims, as well as class action and individual lawsuits that involve issues not unlike those facing other insurance companies and employers. We continually evaluate potential liabilities and reserves for litigation of these types using the criteria established by the Contingencies topic of the FASC. Under this guidance we may only record reserves for a loss if the likelihood of occurrence is probable and we can reasonably estimate the amount. If a material loss is judged to be reasonably possible, we will disclose an estimated range of loss or state that an estimate cannot be made. We consider each legal action using this guidance and record reserves for losses as warranted by establishing a reserve captured within our Consolidated Balance Sheets line-items "Unpaid losses and loss adjustment expenses" for extra-contractual claims and "Other liabilities" for class action and other non-claims related lawsuits. We record amounts incurred on the Consolidated Statements of Earnings within "Losses and loss adjustment expenses" for extra-contractual claims and "Other expenses" for class action and other non-claims related lawsuits.

Certain claims and legal actions have been brought against us for which we have accrued no loss, and for which an estimate of a possible range of loss cannot be made under the above rules. While it is not possible to predict the ultimate outcome of these claims or lawsuits, we do not believe they are likely to have a material effect on our financial condition or liquidity. However, losses incurred because of these cases could have a material adverse impact on net earnings in a given period.

For a description of previously reported contingencies, refer to Note 14 Commitments and Contingencies in the Form 10-K for the year ended December 31, 2014.

ITEM 2

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains certain "forward-looking statements" which anticipate results based on our estimates, assumptions and plans that are subject to uncertainty. We make these statements subject to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. All statements in this report not dealing with historical results or current facts are forward-looking and we base them on estimates, assumptions and projections. Statements which include the words "assumes," "believes," "seeks," "expects," "may," "should," "intends," "likely," "targets," "plans," "anticipates," "estimates" or the negative version of those words and similar statements of a future or forward-looking nature identify forward-looking statements. Examples of such forward-looking statements include statements relating to expectations concerning market conditions, premium growth, earnings, investment performance, expected losses, rate changes and loss experience.

The primary events or circumstances that could cause actual results to differ materially from what we expect include determinations with respect to reserve adequacy, realized gains or losses on the investment portfolio (including other-than-temporary impairments for credit losses), loss cost trends, and competitive conditions in our key Focus States (defined below). We undertake no obligation to publicly update or revise any of the forward-looking statements. For a more detailed discussion of some of the foregoing risks and uncertainties which could cause actual results to differ from those contained in the forward-looking statements see "Risk Factors" contained in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014.

OVERVIEW

During the third quarter of 2015 total gross written premium decreased 3.8% but increased 1.8% during the first nine months of 2015 compared with the same periods of 2014. The majority of the growth during the nine months ended September 30, 2015, came from California personal auto and countrywide Commercial Vehicle, which grew a combined 2.6% and 11.0%, respectively, compared with the prior year. Partially offsetting premium growth in these two areas was premium decline of 47.0% and 42.8%, respectively, for the combined states of Georgia, Nevada and Pennsylvania as we have shifted our focus in these states to renewal only business. See Results of Operations – Underwriting – Premium for a more detailed discussion of our gross written premium.

Net earnings and diluted earnings per share for the three months ended September 30, 2015, were \$15.7 million and \$1.38, respectively, compared with \$14.9 million and \$1.29, respectively, for the three months ended September 30, 2014. Net earnings and diluted earnings per share for the nine months ended September 30, 2015, were \$40.4 million and \$3.52, respectively, compared with \$35.8 million and \$3.10, respectively, for the nine months ended September 30, 2014. The increase in diluted earnings per share for the three and nine months ended September 30, 2015, was primarily due to an increase in favorable development on prior accident year loss and loss adjustment expense reserves recognized during the third quarter and first nine months of 2015.

Included in net earnings for the three and nine months ended September 30, 2015, was \$7.4 million (\$11.3 million pre-tax) and \$15.6 million (\$24.0 million pre-tax) of favorable development on prior accident year loss and LAE reserves. The development during the nine months ended September 30, 2015, was primarily due to decreases in severity as well as decreases in loss adjustment expenses related to Florida bodily injury coverages in accident years 2013 and 2014. A decrease in loss adjustment expenses related to California bodily injury coverages in accident years 2013 and 2014 also contributed to the development during the third quarter. Included in net earnings for the three and nine months ended September 30, 2014, was \$3.5 million (\$5.4 million pre-tax) and \$5.6 million (\$8.6 million pre-tax) of favorable development on prior accident year loss and LAE reserves. The development was primarily due to a decrease in severity in accident year 2013 in Florida bodily injury and in California property damage.

See Results of Operations – Underwriting – Profitability for a more detailed discussion of our underwriting results. Pre-tax net investment income for the three months ended September 30, 2015, was \$10.0 million compared with \$8.8 million for the three months ended September 30, 2014. Pre-tax net investment income for the nine months ended September 30, 2015, was \$27.9 million compared with \$26.7 million for the nine months ended September 30, 2014. Our book value per share increased 1.6% from \$60.75 at December 31, 2014, to \$61.71 at September 30, 2015. This increase was primarily due to earnings partially offset by share repurchases, dividends and a decrease in unrealized gains for the nine months ended September 30, 2015.

Premium

Our insurance subsidiaries provide personal automobile insurance products with a concentration on nonstandard auto insurance. While there is no industry-recognized definition of nonstandard auto insurance, we believe that it is generally understood to mean coverage for drivers who, because of their driving record, age or vehicle type, represent higher than normal risks and pay higher rates for comparable coverage. We also write commercial vehicle insurance and insurance for classic collectible automobiles ("Classic Collector").

We are licensed to write insurance in all 50 states and the District of Columbia, but we focus our operations in targeted urban areas identified in selected Focus States (defined below) that we believe offer the greatest opportunity for premium growth and profitability.

We classify the states in which we operate into two categories:

• "Focus States" – Arizona, California, Florida and Texas.

• "Other States" – Georgia, Nevada and Pennsylvania where we currently offer renewals only, as well as additional states where we are running off our writings.

Georgia, Nevada and Pennsylvania were previously included in the Focus States category. All prior period data has been adjusted to reflect the updated state classification.

We continually evaluate our market opportunities; thus, the Focus States and Other States may change over time as new market opportunities arise, as the allocation of resources changes or as regulatory environments change.

Gross written premium decreased 3.8% during the third quarter but grew 1.8% during the first nine months of 2015, compared with the same periods of 2014. During the first nine months of 2015, Infinity implemented rate revisions in various states with an overall rate increase of 8.6%. Policies in force at September 30, 2015, decreased 4.2% compared with the same period in 2014. Gross written premium for the nine months ended September 30, 2015, increased despite the decline in policies in force primarily due to an increase in average premiums per policy. Personal auto insurance gross written premium in our Focus States decreased 2.3% during the third quarter of 2015 and increased 3.9% for the first nine months of 2015 compared with the same periods of 2014. The decrease in gross written premium for the third quarter of 2015 compared with the same period of 2014 was primarily due to premium declines in Florida and Texas, slightly offset by 0.9% growth in California. The increase in gross written premium for the first nine months of 2015 compared with the same period of 2014 was primarily due to 10.2% growth in California. California's premium growth, most of which occurred during the first half of 2015, was primarily due to an increase in new business as a result of an improving economy and higher average written premiums. Gross written premium growth during the first nine months of 2015 was partially offset by a decline in the Other States as we discontinued writing new business in Georgia, Nevada and Pennsylvania effective January 1, 2015. Commercial Vehicle gross written premium grew 12.6% and 15.9% during the third quarter and first nine months of 2015, respectively, when compared with the same periods of 2014. This growth was primarily due to renewal premium growth and higher average premiums in California, Florida and Texas.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Profitability

A key operating performance measure of insurance companies is underwriting profitability, as opposed to overall profitability or net earnings. We measure underwriting profitability by the combined ratio. When the combined ratio is under 100%, we consider underwriting results profitable; when the ratio is over 100%, we consider underwriting results unprofitable. The combined ratio does not reflect investment income, other income, interest expense, corporate general and administrative expenses, other expenses or federal income taxes.

While we report financial results in accordance with GAAP for shareholder and other users' purposes, we report it on a statutory basis for insurance regulatory purposes. We evaluate underwriting profitability based on a combined ratio calculated using statutory accounting principles. The statutory combined ratio represents the sum of the following ratios: (i) losses and LAE incurred as a percentage of net earned premium; and (ii) underwriting expenses incurred, net of installment and other fees, as a percentage of net written premium. Certain expenses are treated differently under statutory and GAAP accounting principles. Under GAAP, commissions, premium taxes and other variable costs incurred in connection with writing new and renewal business are capitalized as deferred policy acquisition costs and amortized on a pro rata basis over the period in which the related premium is earned; on a statutory basis these items are expensed as incurred. Additionally, bad debt charge-offs on agent balances and premium receivables are included only in the GAAP combined ratios.

The discussion of underwriting results that follows will focus on statutory ratios and the components thereof, unless otherwise indicated.

The statutory combined ratio for the three and nine months ended September 30, 2015, decreased by 0.6 point and 0.9 point from the same periods of 2014. The third quarter and first nine months of 2015 included \$11.3 million and \$24.0 million, respectively, of favorable development on prior accident year loss and LAE reserves primarily due to decreases in severity as well as decreases in loss adjustment expenses related to Florida bodily injury coverages in accident years 2013 and 2014. A decrease in loss adjustment expenses related to California bodily injury coverages in

accident years 2013 and 2014 also contributed to the development in the third quarter. The third quarter and first nine months of 2014 included \$5.4 million and \$8.6 million, respectively, of favorable development on prior accident year loss and LAE reserves. The third quarter of 2015 included \$2.4 million of unfavorable development from the first two accident quarters of the year compared with \$6.4 million of favorable development recognized from the first two accident quarters of 2014 during the third quarter of 2014. Excluding the effect of development, the statutory combined ratio decreased 1.5 points during the third quarter, but increased 0.6 point for the nine months ended September 30, 2015, compared with the same periods of 2014.

The GAAP combined ratio for the three and nine months ended September 30, 2015, decreased by 0.7 point and 0.9 point, respectively, from the same periods of 2014. Excluding the effect of development, the GAAP combined ratio decreased by 1.6 points during the third quarter of 2015. For the nine months ended September 30, 2015, the GAAP combined ratio excluding

development increased 0.6 point, primarily due to a higher accident year loss ratio as a result of increasing loss costs in personal injury protection, collision coverages and property damage, somewhat offset by a declining expense ratio primarily due to lower salary expenses.

Losses from catastrophes were \$0.3 million and \$1.4 million for the three and nine months ended September 30, 2015, respectively, compared with \$0.4 million and \$2.2 million for the same periods of 2014.

The 2.2 points and 2.8 points decline in the Focus States combined ratio for the three and nine months ended September 30, 2015, was primarily due to improvement in calendar year loss ratios as a result of favorable development from prior accident year loss and LAE reserves in Florida and California, as well as an increase in average written premiums in each of the four states.

The combined ratio in the Other States decreased by 4.2 points and increased by 15.9 points during the three and nine months ended September 30, 2015, respectively, from the same periods of 2014. The increase was primarily due to a deterioration in the current accident year combined ratio in Pennsylvania, as well as favorable development in the first nine months of 2014 from prior accident year loss and LAE reserves in Pennsylvania.

The combined ratio in Commercial Vehicle increased by 18.1 points and 9.8 points during the three and nine months ended September 30, 2015, respectively, compared with the same periods of 2014, primarily due to increases in both frequency and severity, resulting in higher new business loss ratios, particularly in Florida.

Installment and Other Fee Income

Installment and other fees charged to policyholders was \$24.0 million and \$73.1 million for the three and nine months ended September 30, 2015, respectively, compared with \$23.3 million and \$71.4 million, respectively, for the three and nine months ended September 30, 2014. The increase in fee income during the first nine months of 2015 was primarily related to the premium growth in California.

Net Investment Income

Net investment income is comprised of gross investment income less investment management fees and expenses, as shown in the following table (\$ in thousands):

Gross and net investment income for the three and nine months ended September 30, 2015, includes \$1.1 million of make whole proceeds. In prior periods, make whole proceeds were included in realized gains and losses. The book yield on our portfolio continues to exceed our new money rates. Therefore, we expect that investment returns will gradually decline as proceeds from maturing or prepaid investments are expected to be reinvested at yields lower than the average book yield for the total portfolio.

The following table provides information about our fixed maturity investments at September 30, 2015, which are sensitive to interest rate risk. The table shows expected principal cash flows by expected maturity date for each of the five subsequent years and collectively for all years thereafter. Callable bonds and notes are included based on call date or maturity date depending upon which date produces the most conservative yield. Mortgage Backed Securities (MBS) and sinking fund issues are included based on maturity year adjusted for expected payment patterns.

Realized Gains (Losses) on Investments

We recorded impairments for unrealized losses deemed other-than-temporary and realized gains and losses on sales and disposals, as follows (before tax, \$ in thousands):

For our securities held with unrealized losses, we believe, based on our analysis, that (i) we will recover our cost basis in these securities; and (ii) we do not intend to sell the securities nor is it more likely than not that there will be a requirement to sell the securities before they recover in value. Should either of these beliefs change with regard to a particular security, a charge for impairment would likely be required. While it is not possible to predict accurately if or when a specific security will become impaired, charges for other-than-temporary impairments could be material to results of operations in a future period.

Interest Expense

At September 30, 2015, we had \$275 million principal outstanding of Senior Notes that accrue interest at 5.0% (the "5.0% Senior Notes"). We recognized \$3.4 million and \$10.3 million of interest expense on the 5.0% Senior Notes in the Consolidated Statements of Earnings for the three and nine months ended September 30, 2015, and 2014, respectively. Refer to Note 5 to the Consolidated Financial Statements for additional information on the 5.0% Senior Notes.

Income Taxes

Our GAAP effective tax rate for the three and nine months ended September 30, 2015, was 31.0% and 31.2%, respectively, compared with 31.6% and 30.4% for the three and nine months ended September 30, 2014. The GAAP effective tax rate has increased in 2015 primarily as a result of an improvement in the underwriting profit, which is taxed at 35%. Refer to Note 6 to the Consolidated Financial Statements for additional information on income taxes.

LIQUIDITY AND CAPITAL RESOURCES

Sources of Funds

We are a holding company and our insurance subsidiaries conduct our operations. Accordingly, we will have continuing cash needs for administrative expenses, the payment of interest on borrowings, shareholder dividends, share repurchases and taxes.

Funds to meet expenditures at the holding company level come primarily from dividends and tax payments from the insurance subsidiaries, as well as cash and investments held by the holding company. As of September 30, 2015, the holding company had \$136.8 million of cash and investments. In 2015 our insurance subsidiaries may pay us up to \$68.1 million in ordinary dividends without prior regulatory approval. For the nine months ended September 30, 2015, our insurance subsidiaries have paid us ordinary dividends of \$45.0 million.

Our insurance subsidiaries generate liquidity to satisfy their obligations primarily by collecting and investing premiums in advance of paying claims and generating investment income on their \$1.4 billion investment portfolio. Our insurance subsidiaries generated positive cash flows from operations of \$23.8 million and \$79.9 million during the three and nine months ended September 30, 2015, respectively, compared with positive operating cash flows of \$38.7 million and \$101.2 million, respectively, during the three and nine months ended September 30, 2014.

At September 30, 2015, we had \$275 million principal outstanding of 5.0% Senior Notes. The 5.0% Senior Notes accrue interest at 5.0%, payable semiannually each March and September. Refer to Note 5 to the Consolidated Financial Statements for more information on our long-term debt.

In August 2014 we renewed our agreement for a \$50 million three-year revolving credit facility (the "Credit Agreement") that requires us to meet certain financial and other covenants. We are currently in compliance with all covenants under the Credit Agreement. At September 30, 2015, there were no borrowings outstanding under the Credit Agreement.

In June 2013 we filed a "shelf" registration statement with the Securities and Exchange Commission registering \$300.0 million of our securities, which will allow us to sell any combination of senior or subordinated debt securities, common stock, preferred stock, warrants, depositary shares and units in one or more offerings should we choose to do so in the future.

Uses of Funds

In February 2015 we increased our quarterly dividend to \$0.43 per share from \$0.36 per share. At this current amount, our 2015 annualized dividend payments would be approximately \$19.6 million.

On November 4, 2014, our Board of Directors increased the authority of our share and debt repurchase program to a total of \$75 million and extended the date to execute the program from December 31, 2014, to December 31, 2016. During the first quarter of 2015 we repurchased 25,800 shares at an average cost, excluding commissions, of \$77.46 per share. During the second quarter of 2015 we repurchased 60,300 shares at an average cost, excluding commissions, of \$75.56 per share. During the third quarter of 2015 we repurchased 121,378 shares at an average cost, excluding commissions, of \$77.91 per share. As of September 30, 2015, we had \$58.0 million of authority remaining under this program.

We believe that cash balances, cash flows generated from operations or borrowings, and maturities and sales of investments are adequate to meet our future liquidity needs and those of our insurance subsidiaries.

Reinsurance

We use excess of loss, catastrophe and extra-contractual loss reinsurance to mitigate the financial impact of large or catastrophic losses. During 2015 our catastrophe reinsurance protection covers 100% of \$55 million in excess of \$5 million per event. Our excess of loss reinsurance provides protection for commercial auto losses up to \$700,000 for claims in excess of \$300,000 per occurrence. Our extra-contractual loss reinsurance provides protection for losses up to \$10 million in excess of \$5 million for any single extra-contractual loss. We also use reinsurance to mitigate losses on our Classic Collector business.

Premium ceded under all reinsurance agreements for the three and nine months ended September 30, 2015, was \$3.6 million and \$11.0 million, respectively, compared with \$3.5 million and \$9.9 million for the same periods of 2014.

Investments

Our consolidated investment portfolio at September 30, 2015, contained approximately \$1.4 billion in fixed maturity securities, \$90.0 million in equity securities and \$5.2 million in short-term investments. All of these are carried at fair value with unrealized gains and losses reported in accumulated other comprehensive income, a separate component of shareholders' equity, on an after-tax basis. At September 30, 2015, we had pre-tax net unrealized gains of \$10.4 million on fixed maturities and pre-tax net unrealized gains of \$8.2 million on equity securities. Combined, the pre-tax net unrealized gain declined by \$17.3 million for the nine months ended September 30, 2015. This decrease occurred as a result of higher market interest rates affecting our fixed portfolio as well as lower equity markets. The average option adjusted duration of our fixed maturity portfolio was 3.2 years at September 30, 2015, compared with 3.1 years at December 31, 2014.

Since we carry all of these securities at fair value in our balance sheet, there is virtually no effect on liquidity or financial condition upon the sale and ultimate realization of unrealized gains and losses.

Approximately 91.5% of our fixed maturity investments at September 30, 2015, were rated "investment grade," and, as of the same date, the average credit rating of our fixed maturity portfolio was AA-. Investment grade securities generally bear lower yields and have lower degrees of risk than those that are unrated or non-investment grade. We believe that a high quality investment portfolio is more likely to generate a stable and predictable investment return. Fair values of instruments are based on (i) quoted prices in active markets for identical assets (Level 1); (ii) quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-derived valuations in which all significant inputs are observable in active markets (Level 2); or (iii) valuations derived from valuation techniques in which one or more significant inputs are unobservable in the marketplace (Level 3).

Our Level 1 securities are U.S. Treasury securities, an exchange-traded fund and equity securities held in a rabbi trust.

Our Level 2 securities are comprised of securities whose fair value was determined using observable market inputs.

Our Level 3 securities are comprised of (i) securities for which there is no active or inactive market for similar instruments; (ii) securities whose fair value is determined based on unobservable inputs; and (iii) securities that nationally recognized statistical rating organizations do not rate.

We categorize securities by rating based upon available ratings issued by Moody's, Standard & Poor's or Fitch. If all three ratings are available but not equivalent, we exclude the lowest rating and the lower of the remaining ratings is used. If ratings are only available from two agencies, the lowest is used. This methodology is consistent with that used by the major bond indices.

The following table presents the credit rating and fair value of our fixed maturity portfolio by major security type at September 30, 2015, (\$ in thousands):

Quantitative and Qualitative Disclosures about Market Risk

As of September 30, 2015, there were no material changes to the information provided in our Form 10-K for the year ended December 31, 2014, under the caption “Exposure to Market Risk” in Management’s Discussion and Analysis of Financial Condition and Results of Operations. Refer to Item 2 Management’s Discussion and Analysis under the caption “Investments” for updates to disclosures made under the sub caption “Credit Risk” in our Form 10-K for the year ended December 31, 2014.

ITEM 4

Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of the Company’s management, including its Principal Executive Officer and Principal Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Securities Exchange Act Rules 13a-15(e) and 15d-15(e)) as of September 30, 2015. Based on that evaluation, we concluded that the controls and procedures are effective in providing reasonable assurance that material information required to be disclosed in our reports filed with or submitted to the Securities and Exchange Commission (“SEC”) under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and that such information is accumulated and communicated to our management, including our Principal Executive Officer and Principal Financial Officer, as appropriate.

Changes in Internal Control over Financial Reporting

During the fiscal quarter ended September 30, 2015, there have been no changes to our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
