

Edgar Filing: NANTUCKET INDUSTRIES INC - Form 8-K

enable the prospective clients to choose appropriate providers and financial arrangements that best meet their individual needs. The business plan also includes the complete development and market implementation of a high quality musculoskeletal disease management program for target markets with directed care of workers' compensation cases.

Comprehensive was organized in June, 2002 with headquarters in Austin, Texas. The company has been focused on specialty health benefits products, including three levels of provider networks and one limited indemnity medical insurance plan. These products have been trademarked as ChiroCare Select, ChiroCare Advantage, ChiroCare Optima and CNS 500 Plan. The company is currently working on expanding its product with additional benefits and alternative benefit funding options. These new expanded products will be offered through a captive retail sales operation to individuals and small employers; and customized private label versions of the products through its broker and consultant relationships to associations, unions political subdivisions and large employers. The offerings are alternative cost and quality benefit solutions to prospects and clients who are uninsured or underinsured through existing traditional defined benefit health plans.

Comprehensive's goals include a plan to develop disease management treatment guidelines that would address back, neck and upper extremity musculoskeletal conditions specifically for workers' compensation. During the past year, these guidelines have been codified and copyrighted. Through an affiliation with Health Partners, the strategy is to develop exclusive provider organizations (EPO) in markets where state regulation enables workers' compensation plans to direct injured workers to specific health care providers. Comprehensive's EPOs will be marketed to workers' compensation and employee benefit plans on the basis access fees, case management fees and shared savings of future medical costs versus historic medical costs and patient outcomes

The company will continue to refine and improve its Predictive Model of evidence based treatment guidelines and disease management for musculoskeletal injuries and illnesses. The quality and cost effective management of these conditions will continue to be a primary focus for the company's medical and network development staff in preparation for additional market introductions.
