SR Telecom Awarded swing Contract in French Polynesia Rural telephony modernization program valued at more than \$2.5 million

MONTREAL, April 20, 2004 SR TelecomTM Inc. (TSX: SRX; Nasdaq: SRXA) today announced that its **swing** fixed wireless access system has been selected by the Office des Postes et Télécommunications (OPT) in French Polynesia for a rural telephony modernization project in the Marquesas islands. The contract is valued at more than \$2.5 million over the next two years, of which approximately \$1.7 million in equipment and services will be delivered this year. Deliveries are expected to begin during the third quarter.

The **swing** systems will enable the OPT to deliver toll-quality voice and internet access services to the rural communities in the Marquesas archipelago, a group of twelve islands located in the South Pacific ocean. The OPT will also benefit from the **swing** system's WLL feature, serving individual residences by means of a small indoor terminal without the need for a wired connection to a terminal station.

We are delighted to continue our long-standing business relationship with the OPT as they work to modernize their wireless telecommunications network, said Claude Giguère, SR Telecom's Senior Vice-President, Sales. Their selection of **swing** equipment is a testament to their continued belief in fixed wireless technology as a cost effective means to satisfy growing subscriber demands, and to the quality of the equipment and services that SR Telecom provides. We expect to see more modernization projects like this elsewhere in the world as operators begin to deliver a whole new range of services to their subscribers.

About swing

swing is an advanced and flexible network that enables operators to address high, medium and low traffic densities with a single solution by providing excellent voice quality, all CLASS services and 56 kbps data (V90) for Internet access. **swing**'s distribution backbone uses an exclusive point-to-multipoint radio, enabling great distances to be easily spanned with excellent use of spectrum.

About SR Telecom

SR TELECOM (TSX: SRX, Nasdaq: SRXA) is one of the world's leading providers of Broadband Fixed Wireless Access (BFWA) technology, which links end-users to networks using wireless transmissions. For over two decades, the Company's products and solutions have been used by carriers and service providers to deliver advanced, robust and efficient telecommunications services to both urban and remote areas around the globe. SR Telecom's products have been deployed in over 120 countries, connecting nearly two million people.

The Company's unrivalled portfolio of BFWA products enables its growing customer base to offer carrier-class voice, broadband data and high-speed Internet services. Its turnkey solutions include equipment, network planning, project management, installation and maintenance.

SR Telecom is an active member of WiMAX Forum, a cooperative industry initiative which promotes the deployment of broadband wireless access networks by using a global standard and certifying interoperability of products and technologies.
