UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-Q
QUARTERLY REPORT UNDER SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
FOR THE QUARTERLY PERIOD ENDED March 31, 2013
Commission File Number 001-32300
SMARTPROS LTD.
(Exact name of small business issuer as specified in its charter)

Delaware
(State or other jurisdiction
of incorporation or organization)

13-4100476
(I.R.S. Employer
Identification No.)

12 Skyline Drive, Hawthorne, New York 10532

(Address of principal executive office)

(914) 345-2620
(Issuer's telephone number, including area code)

Check whether the issuer: (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the issuer was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Number of shares outstanding of each of the issuer's classes of common equity, as of the latest practicable date: As of May 7, 2013, there were 4,680,941 shares of common stock outstanding.

FORWARD-LOOKING STATEMENTS

Some of the statements made in this Quarterly Report on Form 10-Q are “forward-looking statements” within the meaning of Section 21E of the Securities and Exchange Act of 1934. These statements relate to our plans and objectives for future operations as well as to market trends and expectations. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any expressed or implied future results, performance or achievements. The forward-looking statements included in this report are based on current expectations, plans and assumptions relating to the future operation of our business. These expectations, plans and assumptions involve judgments with respect to, among other things, future economic, competitive and market conditions and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond our control. Although we believe that our expectations, plans and assumptions underlying the forward-looking statements are reasonable, we cannot assure you that the forward-looking statements included in this report will, ultimately, prove to be accurate. In light of the significant uncertainties inherent in the forward-looking statements included in this report, the fact that we have included forward-looking statements in this report should not be interpreted as a representation by us or any other person that our objectives and plans will be achieved. We undertake no obligation to revise or update publicly any forward-looking statements for any reason.

Forward-looking statements in this report include statements relating to our operating results, the development of new products, the timing of the launch of such products and the timing of any revenue to be generated from such products as well as statements regarding our plans for acquisitions. Whether or not our expectations regarding such forward-looking statements are ultimately realized depends on such factors as our ability to increase revenues, control costs, complete the development of new products in a timely manner and on budget, our ability to successfully market our products, general economic conditions, our ability to successfully identify acquisition candidates and our ability to successfully complete those acquisitions and integrate the newly acquired business into our existing operating and business platform.

The terms "we," "our," "us," or any derivative thereof, as used herein shall mean SmartPros Ltd., a Delaware corporation, its subsidiaries and its predecessors.

Notes to Condensed Consolidated Financial Statements (Unaudited)

Note 1. Basis of Presentation

The unaudited condensed consolidated financial statements of SmartPros Ltd. and subsidiaries (“SmartPros” or the “Company”), including these notes, have been prepared by the Company in accordance with U.S. generally accepted accounting principles (“GAAP”) for interim financial information and pursuant to the rules and regulations promulgated by the U.S. Securities and Exchange Commission (the “SEC”). Accordingly, certain information and disclosures normally included in financial statements prepared in accordance with GAAP have been omitted or condensed. However, in the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. These unaudited condensed consolidated financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the year ended December 31, 2012 and the notes thereto included in the Company’s Annual Report on Form 10-K filed with the SEC on March 22, 2013. Results of consolidated operations for the interim periods are not necessarily indicative of a full year’s operating results. The unaudited condensed consolidated financial statements herein include the accounts of the Company and its wholly owned subsidiaries, SmartPros Legal and Ethics, Ltd. (“SLE”), Skye Multimedia Ltd. (“Skye”) and Loscalzo Associates Ltd. (“Loscalzo”). All material inter-company accounts and transactions have been eliminated.

Note 2. Description of Business and Summary of Significant Accounting Policies

Nature of Operations

The Company, a Delaware corporation, was organized in 1981 under the name Center for Video Education Inc. for the purpose of producing educational programs primarily directed to the accounting profession. SmartPros’ primary products and services include the following:

Video and Internet-based subscription programs, live training seminars, Webinars and other continuing professional education programs and services for the accounting profession, tax and finance professionals. The Company is a leading provider of training to certified public accountants, accountants in industry and financial professionals.

• A series of continuing education courses for engineers, as well as courses designed for candidates of the various professional engineering exams. In addition, we have a series of health and safety courses.

• Online training solutions for the insurance, securities and banking industries under the trade name Financial Campus, as well as courses designed for live training.

• A subscription-based program called WatchIT as well as custom courses for corporate information technology professionals.

• Ethics, governance, compliance and human resources programs for corporate clients and online and customized training for the legal profession.

• Training solutions for a number of industries including pharmaceutical and professional services firms.

• Custom videos, use of its recording studio and editing facilities, web development and other multi-media technology consulting services.

While management monitors the revenue streams of the various products and services, operations are managed and financial performance is evaluated on a company-wide basis. Accordingly, all of the Company’s operations are considered to be aggregated in one reportable segment.

SmartPros is headquartered in Hawthorne, New York, where it maintains its corporate offices, new media lab and video production facilities.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Table of Contents

Revenue Recognition

The Company recognizes revenue from its subscription services as earned. Subscriptions are generally billed on an annual basis, deferred at the time of billing and amortized into revenue on a monthly basis over the term of the subscription, generally one year. Engineering products are non-subscription based and revenue is recognized upon shipment or, in the case of online sales, upon receipt of payment. Revenues from other non-subscription services, such as website design, video production, consulting services, and custom projects, are recognized on a proportional performance basis where sufficient information relating to project status and other supporting documentation is available. The contracts may have different billing arrangements resulting in either unbilled or deferred revenue. The Company obtains either signed agreements or purchase orders from its non-subscription customers outlining the terms and conditions of the products or services to be provided. Otherwise, revenues are recognized after completion and/or delivery of services to the customer. Revenue from live training programs is recognized upon completion of the conference or seminar, which usually lasts one to three days. Expenses directly related to the seminars including marketing expenses are charged to expense in the quarter in which the seminar is held.

Capitalized Course Costs

Capitalized course costs include the direct cost of internally developed proprietary educational products and materials that have extended useful lives. Amortization of these capitalized course costs commences when the courses are available for sale from the Company's catalog. The amortization period is the estimated useful lives of the courses, which are usually five years. Other costs incurred in connection with any of the Company's monthly subscription products, library content or custom work is charged to expense as incurred. We capitalized approximately \$107,000 in course costs during the current quarter.

Deferred Revenue

Deferred revenue related to subscription services represents the portion of unearned subscription revenue amortized on a straight-line basis as earned. Deferred revenues from seminars represent paid registrations for future programs. Deferred revenue related to website design, video production, custom e-learning programs, technology or other services represents that portion of amounts billed by the Company, or cash collected by the Company for which services have not yet been provided or earned in accordance with the Company's revenue recognition policy. The Cognistar Legal division, the Financial Services division and the SmartIT Information Technology division recognize revenue either immediately from the direct sale of courses on a prepaid basis or on a deferred basis as earned, from the sale of subscriptions to their various products or from custom projects.

Earnings (Loss) Per Share

Basic earnings or loss per common share is net income or loss, as the case may be, divided by the weighted average number of shares outstanding of the Company's common stock, par value \$.0001 per share (the "Common Stock") during the period. Basic earnings or loss per share exclude any dilutive effects of options, warrants and convertible securities. Diluted earnings per common share include the dilutive effect of shares of Common Stock issuable under stock options and warrants. Diluted earnings per share are computed using the weighted average number of Common Stock and Common Stock equivalent shares outstanding during the period. For the three month periods ended March 31, 2013 and 2012, the inclusion of Common Stock equivalents of 340,317 and 344,587 shares, respectively, would be anti-dilutive.

Note 3. Stock-Based Compensation

The Company's 2009 Incentive Compensation Plan (the "2009 Plan") permits the grant of options and restricted stock to employees, directors and consultants. The total number of shares currently reserved for grants under the 2009 Plan is 800,000. Restricted stock grants under the 2009 Plan may not exceed 200,000 shares in the aggregate. The number of shares available for issuance under the 2009 Plan is reduced by the sum of the number of shares (a) issued upon exercise of options granted pursuant to the Company's 1999 Stock Option Plan (the "1999 Plan") and (b) issuable upon exercise of outstanding options granted under the 1999 Plan. As options granted under the 1999 Plan are forfeited or terminated, the number of options available for grant under the 2009 Plan increase (but may not exceed 800,000 in the aggregate). Restricted stock grants under the 1999 Plan have no impact on the availability of restricted stock grants under the 2009 Plan.

Edgar Filing: SmartPros Ltd. - Form 10-Q

As of March 31, 2013, 340,317 options were outstanding, of which 150,667 and 189,650 were granted under our 1999 Plan and 2009 Plan, respectively, and of which 225,817 are currently exercisable. In February 2013, the Company granted 35,000 options to various employees. The exercise price of the grant is \$1.47 per share. The options have varying vesting dates, 15,000 options vest one-half each, one and two years from dates of grant. The remaining 20,000 options vest three years from date of issuance. The options expire ten years from date of issuance. In February 2013, the Company also granted 39,500 shares of its restricted Common Stock to various employees and its three independent directors. The grants have varying

Table of Contents

vesting terms; 15,000 vests one-half each, one and two years from date of issuance; 9,000 vesting one-third each year on the anniversary date of the date of issuance and the remaining 15,500 vests three years from date of issuance. The fair market value per share on the date of issuance was \$1.47. Restricted stock grants outstanding as of March 31, 2013 totaled 76,111, none of which had vested. All of these outstanding restricted stock grants were made under the 2009 Plan. As of March 31, 2013, 358,850 shares are available under the 2009 Plan, of which 82,555 shares are available for restricted stock grants. All stock options granted under the 2009 Plan are granted with an exercise price equal to or greater than the fair market value of the Common Stock at the grant date. Employee and director stock options generally expire 10 years from the grant date and have various vesting periods. Restricted stock awards generally vest over a period of three to five years. Non-vested shares and options are subject to forfeiture unless certain time and/or performance requirements are satisfied.

Current accounting standards permit the use of a valuation model to calculate the fair value of stock-based awards. The Company has elected to use the Black-Scholes-Merton (BSM) option-pricing model, which incorporates various assumptions including volatility, expected life, interest rates and dividend yields. The expected volatility is based on the historic volatility of the Common Stock over the most recent period commensurate with the estimated expected life of the Company's stock options, adjusted for the impact of unusual fluctuations not reasonably expected to recur. The expected life of an award is based on historical experience and on the terms and conditions of the stock awards granted to employees and directors. The Company has recorded stock-based compensation expense of approximately \$27,000 and \$31,000 for the three-month periods ended March 31, 2013 and 2012, respectively.

The assumptions used for the three-month period ended March 31, 2013, and the resulting estimates of weighted-average fair value of options granted during those periods are as follows:

Expected life (years)	3-6 Years	
Risk-free interest rate	0.15	%
Expected volatility	40.0	%
Expected dividend	\$0.05	
Weighted-average fair value of options during the period	\$0.35	

The following table represents our stock options granted, exercised and forfeited for the three months ended March 31, 2013:

Stock Options	Number of Shares	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term
Outstanding January 1, 2013	310,487	\$3.11	6.49
Granted	35,000	\$1.47	9.83
Exercised	—	—	—
Forfeited/expired	(5,170)) \$5.32	—
Outstanding at March 31, 2013	340,317	\$2.91	6.70
Exercisable at March 31, 2013	225,817	\$3.46	5.50

Note 4. Income Taxes

The Company recognizes a deferred tax asset available from its temporary differences between net income before taxes as reported on its financial statement and net income for tax purposes, increased by net operating loss carryforwards, which begin to expire in 2023. The Company has recorded a deferred tax asset of \$2,138,000 at March 31, 2013 which is partially offset by a valuation reserve in the amount of \$1,538,000. For the three months ended March 31, 2013, the Company recorded a current income tax benefit of \$220,000 principally attributable to its net loss for the current period, offset by state and local taxes of approximately \$1,400. The current income tax benefit is expected to be utilized against taxable income generated in subsequent quarterly periods of 2013. The Company does not have any uncertain income tax positions that would require disclosure under the Accounting Standards Codification.

Note 5. Stockholders' Equity

During the first quarter of 2013, the Company purchased 73,473 shares of its Common Stock for approximately \$116,000. It has available approximately \$633,000 under its November 2012 stock buy-back program for the purchase of additional shares of its Common Stock. The buy-back program expires in November 2013.

Note 6. Subsequent Events

9

Table of Contents

On May 7, 2013 the Company's board of directors declared a dividend of \$.015 per common share payable on July 5, 2013 to shareholders of record as of June 14, 2013.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition and results of operations should be read in conjunction with the condensed consolidated financial statements and related notes included elsewhere in this report. Some of the statements in this discussion and elsewhere in this report constitute forward-looking statements within the meaning of Section 21E of the Securities and Exchange Act of 1934. See "Forward-Looking Statements" following the Table of Contents of this report. Because this discussion involves risk and uncertainties, our actual results may differ materially from those anticipated in these forward-looking statements.

The terms "we," "our," "us," or any derivative thereof, as used in this report refer to SmartPros Ltd., a Delaware corporation, its subsidiaries and its predecessors.

Overview

We provide learning solutions for accounting/finance, legal, insurance, securities and engineering professionals – five large vertical markets with mandatory continuing education requirements – as well as for tax compliance, banking and information technology professionals. We provide corporate governance, ethics and compliance training for the general corporate market. We also have content consisting of web-based training in the human resources and health and safety areas. We offer off-the-shelf courses and custom-designed programs with delivery methods suited to the specific needs of our clients. Through Loscalzo Associates Ltd. ("Loscalzo"), one of our wholly-owned subsidiaries, and our Executive Enterprise Institute ("EEI") product line within our Accounting division, we are a leading provider of live training to accountants, tax and financial professionals. These courses are delivered through various state CPA societies, accounting firms, corporations or through seminars, Webinars and conferences that they conduct. Our customers include professional firms of all sizes, and a large number of businesses.

We measure our operations using both financial and other metrics. The financial metrics include revenues, gross margins, operating expenses and income from continuing operations. Other key metrics include (i) revenues by sales source, (ii) online sales, (iii) cash flows and (iv) EBITDA.

Some of the most significant issues affecting our business are the following:

- the increasing recognition by professionals and their employers of the importance of continuing professional education in order to maintain their licenses, remain current on new developments and best practices, develop and improve their skills and to generally remain competitive;
- continuing professional education requirements by governing bodies, including states and professional associations;
- the issuance of new laws, case law and regulations affecting the conduct of business and the relationship between employers and their employees;
- the lack of the issuance of new financial accounting standards and the continued delay in the United States to converge with International Financial Reporting Standards;
- the increased competition in today's economy for skilled employees and the recognition that effective training can be used to recruit, train and redeploy employees; and
- the development and acceptance of the Internet as a delivery channel for the types of products and services we offer.

Over the last five years, our annual net revenues have ranged from \$15.9 million to \$18.3 million. We experienced an overall decline in revenues from 2009 through 2012. We attribute this decline to a number of factors, but primarily due to general economic conditions as well as the relative absence of changes in laws, regulations and accounting standards. Many companies have looked at their budgets, reduced their headcounts and considered other factors in evaluating their expenditures for continuing education for their employees. Although, we have made acquisitions of companies, assets and product lines that have enhanced our overall content and product offerings, the staggering effects of the economy have resulted in lowered attendance at our live seminars, pricing pressure on our subscription-based products and reduced interest in custom work. We have countered these pressures by introducing new products, re-mixing our product offerings and changing our selling

Table of Contents

strategies. We continue to believe that our growth will be through acquisitions, the development of new products and cross selling our existing libraries to the various markets we serve.

While our subscription-based revenue in general has not fluctuated much from quarter to quarter or year to year, we have experienced a decline in revenue from live training programs and from custom-designed projects, which has adversely impacted our operating results. We believe that this trend is primarily due to current economic conditions, competition, consolidations in various industries and the relative absence of new accounting standards, laws and regulations. However, we believe that our subscription based products provide a cost-effective means for many companies to provide continuing education for their employees. We are constantly seeking both new markets and new ways to market our products. As we expand our product offerings and the content of our various libraries, we are able to offer more products to the same customer through cross-selling. We also recognize that we will most likely need to invest more money in our sales infrastructure and outbound marketing budgets to drive net revenue.

Business acquisitions or strategic asset purchases are our preferred strategy to increase the breadth and depth of our current product offerings. Unless there are other compelling reasons, we will only consider acquisitions that we believe will be accretive within the first year of ownership. Ultimately, however, our goal is to maximize shareholder value rather than short-term profits. The size of the acquisitions will be determined, in part, by the amount of capital available to us and the liquidity and price of our stock. We may use debt to enhance or augment our ability to consummate larger transactions. We cannot assure that we will be able to identify appropriate acquisition opportunities or negotiate reasonable terms or that any acquired business or assets will deliver the shareholder value that we anticipated at the outset.

With the launch of our SmartPros eCampus (eCampus) Learning Management System (LMS), a robust platform and toolset for managing and deploying corporate training and accredited continuing education programs in multiple formats, we anticipate that this product will help drive opportunities with both existing and new clients. It can also be licensed as a stand-alone-offering to companies of all sizes who are looking for a cost-effective cloud based LMS. In addition, we are developing technology so that our content may be used on iPads, tablets and other similar devices. There are many risks involved with acquisitions, some of which are discussed in Item 1 of Part 1 under the caption "Certain Risk Factors That May Affect Our Growth and Profitability" of our annual report on Form 10-K for the fiscal year ended December 31, 2012. These risks include seasonality of revenues, integrating the acquired business into our existing operations and corporate structure, retaining key employees and minimizing disruptions to our existing business.

Our common stock ("Common Stock") trades on the NASDAQ Capital Market under the symbol "SPRO."

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based on our consolidated financial statements that have been prepared according to accounting principles generally accepted in the United States. In preparing these financial statements, we are required to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. We evaluate these estimates on an ongoing basis. We base these estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions. We consider the following accounting policies to be the most important to the portrayal of our financial condition.

Revenue recognition

A large portion of our revenue is in the form of subscription fees for our monthly accounting update programs or access to our library of accounting, financial services training and legal courses. Other sources of revenue include direct sales of programs or courses on a non-subscription basis or from various forms of live training, fees for Web site design, software development, video production, course design and development and ongoing maintenance fees from our client's use of eCampus or our Smartpros' Professional Education Center ("PEC"), our proprietary learning management systems. Subscriptions are billed on an annual basis, payable in advance and deferred at the time of billing. Sales made over the Internet are by credit card only. Renewals are usually sent out 60 days before the

subscription period ends. Larger transactions are usually dealt with by contract, the financial terms of which depend on the services being provided. Contracts for development and production services typically provide for a significant upfront payment and a series of payments based on deliverables specifically identified in the contract.

Revenue from subscription services are recognized as earned, deferred at the time of billing or payment and amortized into revenue on a monthly basis over the term of the subscription. Engineering products are non-subscription based and revenue is recognized upon shipment of the product or, in the case of online sales, payment. Revenue from non-subscription services provided to customers, such as Web site design, video production, consulting services and custom projects is generally

Table of Contents

recognized on a proportional performance basis where sufficient information relating to project status and other supporting documentation is available. The contracts may have different billing arrangements resulting in either unbilled or deferred revenue. We obtain either a signed agreement or purchase order from our non-subscription customers outlining the terms and conditions of the sale or service to be provided. Otherwise, these services are recognized as revenue after completion and delivery to the customer. Revenue from the sale of other products and services are generally recognized upon shipment or, if later, when our obligations are complete and realization of receivable amounts is assured.

Revenue from live training is recognized when the seminar or conference is completed. These are usually one to three day events.

Impairment of long-lived assets

We review long-lived assets and certain intangible assets at least annually or when events or circumstances indicate that the carrying amounts may not be recovered. We recognize that the economy has not yet fully recovered and has impacted the operations of certain divisions of our company. Therefore, we are continuously reviewing certain intangible assets related to prior acquisitions. In 2012, we recognized an impairment to assets acquired from an acquisition and management continues to monitor the situation as it relates to our overall operations.

Stock-based compensation

Compensation costs are recognized in the financial statements for stock options or grants awarded to employees and directors. Options and warrants granted to non-employees recorded as an expense at the date of grant based on the then estimated fair value of the stock-based instrument granted. Options and grants awarded to employees or directors are expensed over their prespective vesting periods.

Segment accounting

All of our operations constitute a single segment, that of educational services. Revenues from non-educational services, such as video production are not a material part of our operating income.

Income taxes

We account for deferred tax assets available principally from the temporary differences related to our fixed and intangible assets and our net operating loss carryforwards in accordance with the Accounting Standards Codification. We make significant estimates and assumptions in calculating our current period income tax liability and deferred tax assets. The most significant of these are estimates regarding future period earnings. Our net deferred tax asset is estimated by management using a three-year taxable income projection. In the event that our projections change due to economic uncertainties, we may adjust the realizable amount of our deferred tax asset. Management continues to monitor these projections and assumptions on an ongoing basis.

Results of Operations

Our operating results for the first quarter are affected by the seasonality of some of our products, primarily live training, resulting in substantial losses. The first quarter of 2013 as compared to the first quarter of 2012, reflected a 7% increase in net revenues with an accompanying increase in cost of revenues. This resulted in a higher gross profit and a decreased operating loss of \$79,000 or 12%. Our net loss for the three-month period ended March 31, 2013, as compared to the 2012 period reflected a decrease of approximately \$67,000 or 16%. The operating and net losses for the current quarter are the lowest they have been in the past four years. Our net revenues for the period increased approximately \$211,000 from the 2012 period. Our core businesses have remained fairly stable, and we experienced an increase in net revenues from custom work during the quarter. We continue to seek to acquire either content in new or complimentary market; make our sales force more effective and reduce expenses where appropriate. As previously mentioned, in 2012, we acquired content in the human resources and health and safety areas, markets that we previously did not serve. We also entered into an agreement in 2012, with Villanova University to market and distribute their Online Professional Engineering Review Course, "Power for Electrical Engineers", with over 100 hours of online content. In addition, several of our divisions have signed agreements for work that have either been delayed or extended at the request of the client.

Comparison of three months ended March 31, 2013 and 2012

We recorded a \$211,000, or 7% increase in net revenues in the 2013 period compared to the 2012 period. Although we made significant cuts in direct expenses, our product mix resulted in our gross profit margin remaining relatively constant at 55.7% in the 2013 period as compared to 55.4% in the 2012 period. A substantial portion of the increase in gross revenues came from our Skye Multimedia Ltd. ("Skye") division. Skye's custom work has a lower gross profit than subscription based revenue. Operating results for the 2013 period were impacted by overall increases in net revenues from many of our divisions,

12

Table of Contents

as we continue to seek ways to work in a still sluggish economy. General and administrative expenses were approximately \$50,000 higher in the 2013 period as compared to the 2012 period. We continue to believe that these fluctuations in net revenues from period to period are not necessarily indicative of any long-term expectations from all of our divisions. Although, we experienced an increase in net revenues from custom work in this quarter, we cannot be certain that it is indicative of future results. We do see growth potential in our content-based businesses in the various verticals that we service and in technology that we have designed for the financial services industry. Custom work is non-repetitive and subject to market conditions and can vary from quarter to quarter. Our live training divisions revenues were flat as most accounting professionals do not take continuing education in the first quarter of the year. The live training business primarily recognizes its revenues in the second through fourth quarters of the year. Online revenues, which previously were primarily derived from the sales of accounting/finance products, continue to be an important factor to our net revenues. Many of our other products, including our Cognistar Legal library, our Financial Campus courses, our technology training products and our human resources and health and safety, are also delivered online and are also significant generators of net revenues. Approximately 48% of our current period net revenues were derived from online products.

The following table compares our statement of operations data for the three-months ended March 31, 2013 and 2012. The trends suggested by this table may not be indicative of future operating results, which will depend on various factors including the relative mix of products sold (accounting/finance, law, engineering, financial services, sales training – product, technology or compliance and ethics) and the method of sale (video or online) as well as the timing of custom project work, which can vary from quarter to quarter. In addition, our operating results in future periods may also be affected by acquisitions.

	Three months ended March 31,

Net revenues

The increase in net revenues reflected above was due to: (i) a \$219,000 increase in net revenues from our Skye subsidiary; (ii) a \$71,000 increase in net revenues from our Accounting/Finance division; (iii) an increase of \$10,000 from our Engineering division; (iv) a \$19,000 increase in net revenues from our SmartPros Legal and Ethics, Ltd. ("SLE") subsidiary and (v) a \$5,000 increase from other divisions. These increases were offset by a \$113,000 decrease in net revenues from our Financial Services division. Under our long-standing policy, revenue is credited to the originating department regardless of the type of service that is performed. For example, our Skye subsidiary may provide a custom e-learning solution for a client of our SLE subsidiary. However, SLE is credited with the entire amount of the sale.

In the first quarter of 2013, net revenues from the Accounting/Finance division were approximately \$2.2 million, or 69% of net revenues, compared to \$2.1 million, or 71% of net revenues, in the comparable 2012 period. Net revenues from subscription-based products and direct sales of course material on a non-subscription basis were \$1.95 million and \$1.9 million in the 2013 and 2012 periods, respectively. Net revenues from other projects in our Accounting/Finance division that are not subscription based and live-training were relatively constant from 2012 to

2013, as we generally do not generate revenues from live training until the second quarter. Non-subscription-based revenues fluctuate from period to period and are not indicative of any trends. In the 2013 period, net revenues from online sales of accounting products increased by approximately \$103,000 as compared to the 2012 period, primarily as a result of increased usage. Net revenues from our Loscalzo live training subsidiary increased \$3,000 in the 2013 period compared to the 2012. Our EEI live training division's revenues were \$2,000 in the 2013

Table of Contents

period as compared to \$15,000 in 2012 period. This revenue is earned from CPE administration and not live training. EEI's live training business is seasonal and its revenues are primarily earned in the second and fourth calendar quarters. EEI has introduced new products and services to its clients such as Continuing Professional Education (CPE) administration.

For the three-months ended March 31, 2013, Skye generated net revenues of \$359,000 compared to \$140,000 in the first quarter of 2012. Skye's income is derived primarily from designing custom training projects and, as such, varies from quarter to quarter. Therefore, we believe the increase in Skye's net revenue is not indicative of any long-term trends. Skye continues to see competitive pressure from both domestic and foreign sources, especially in pricing. Businesses are continuing to evaluate these types of services and products and their cost effectiveness. We are seeing more requests for proposals and often contracts are signed but the work does not begin for a period of time thereafter. Skye continues to market its iReflect product developed in a joint venture.

Our Financial Services division generated \$324,000 of net revenues in the quarter ended March 31, 2013. For the quarter ended March 31, 2012, this division generated \$437,000 of net revenues. The decrease is due primarily to reduced subscription-based revenues. We recently released our Audit Management System which we believe will have a positive effect on this division's future revenues.

For the quarter ended March 31, 2013, SLE had net revenues of \$128,000 compared to net revenues of \$109,000 for the comparable 2012 quarter. For the 2013 period, \$37,000 of SLE's net revenues was generated by the Working Values Ethics and Compliance division, and \$91,000 was generated by the Cognistar Legal division, as compared to \$72,000 and \$37,000, respectively, in the 2012 period. Net revenues generated by the Working Values Ethics and Compliance division are derived primarily from custom consulting work and can fluctuate from period to period based on a number of factors. The Cognistar Legal division derives its revenue primarily from prepaid usage and direct sales of its courses.

Our Engineering division generated \$154,000 of net revenues in the first quarter of 2013 compared to \$144,000 in the first quarter of 2012. The increase is primarily related to the inclusion of our health and safety library of courses that was acquired in June 2012. Sales of our engineering products are not subscription based. We now include our information technology product, Watch-IT's revenues in the Engineering division.

Net revenues generated by our other divisions, which consist of video production and duplication and consulting in the first quarter of 2013 were \$37,000. In comparison, these divisions recorded \$32,000 of net revenue for the first quarter of 2012.

Cost of revenues

Cost of revenues includes: (i) production costs – i.e., the salaries, benefits and other costs related to personnel, whether our employees or independent contractors, who are used directly in production, including producing our educational programs and/or upgrading our technology; (ii) royalties paid to third parties; (iii) the cost of materials, such as DVD's and packaging supplies; (iv) costs related to live training; and (v) shipping and other costs. There are many different types of expenses that are characterized as production costs and many of them vary from period to period depending on many factors. Generally, subscription based products have higher profit margins than non-subscription based products and online sales have higher profit margins than sales involving physically delivery of materiel.

Our gross profit margins for the three-months ended March 31, 2013 increased slightly from 55.4% in the 2012 period to 55.7% in the 2013 period, primarily due to the increase in revenues. Although, we have made meaningful reductions in both personnel and outsourced labor, our expenses increased from \$1.34 million in 2012 to \$1.43 million in the 2013 period. Most of this increase is directly related to the increase in revenues from our Skye subsidiary, as their custom work requires a significant amount of out-sourced services. We also devote a significant amount of internal and external resources to develop new products and to re-tool existing products and technology. These costs are charged to expense as they are incurred.

Outside labor and direct production costs. Outside labor includes the cost of hiring actors and production personnel such as directors, producers and cameramen and the outsourcing of non-video technology. The cost of such outside labor, which is primarily video production and technology personnel, increased \$116,000. This increase is primarily related to increased net revenue from custom work. Direct production costs, which are costs related to producing videos, courses, custom projects or live instruction and includes such costs as renting equipment and locations and the

use of live instructors for either teaching or developing the courses, decreased \$17,000. We also continue to expend significant sums updating and introducing new courses in our live training programs. The variation in direct production costs are related to the type of production and other projects and do not reflect any trends in our business. As our business grows we may be required to hire additional production personnel, increasing our cost of revenues. Our course libraries require regular updating.

Royalties. Royalty expense increased by \$6,000 in the three-months ended March 31, 2013, compared to the corresponding period in 2012. Royalty expense varies from period to period based on sales and usage of our various

Table of Contents

products. Royalty expense is primarily driven by our accounting course catalog and our engineering product sales. Generally, royalties are paid twice per year and are calculated based on a number of factors, not all of which are available to us on a monthly, or even a quarterly basis. Accordingly, a substantial portion of our royalty expense for the quarter is estimated.

Salaries. Overall, payroll and related costs attributable to production personnel increased by only \$2,000.

Other production related costs. These are other costs directly related to the production of our products or the costs related to live training such as purchases of materials, cost of venues, travel, shipping, and other. These costs increased \$19,000 in the 2013 period from the 2012 period, and is primarily related to travel and other costs from our live training business.

Selling, general and administrative expenses

Selling, general and administrative expenses include corporate overhead, such as compensation and benefits for administrative, sales and marketing and finance personnel, rent, insurance, professional fees, travel and entertainment and office expenses. Selling, general and administrative expenses for the 2013 period increased by approximately \$50,000, or 2.4%, compared to the 2012 period. This increase is attributable to a number of factors, that are highlighted below.

Compensation expense in the 2013 period decreased by \$39,000 compared to the 2012 period. We had 45 and 49 full-time general and administrative employees at March 31, 2013 and 2012, respectively. The decrease in costs is from reduced headcount. In addition, compensation expense includes stock based compensation expense of \$27,000 for the 2013 period and \$31,000 for the 2012 period, a decrease of approximately \$4,000.

Our other selling, general and administrative costs, exclusive of compensation costs, increased by approximately \$50,000, as expenditures related to technology, marketing, advertising and promotion increased from the 2012 period. Subsequent to the first quarter of 2012 we added additional out-sourced customer service and sales people. We make every effort to control our costs, and we can only anticipate that some selling, general and administrative expenses, such as web-bandwidth, insurance, travel and other costs may increase.

Depreciation and amortization

Depreciation and amortization expense decreased by approximately \$4,000, to approximately \$268,000, in the first quarter of 2013 compared to the first quarter of 2012 as some of the assets acquired in prior acquisitions are now fully amortized. We expect our depreciation and amortization expense on our fixed and intangible assets to be less in the current year. In addition, we capitalize internal costs for the development of new courses and other technology, as incurred. We continually replace and add to our computer and other equipment as it ages and as additional equipment is needed to accommodate growth.

Operating loss

For the three-months ended March 31, 2013, the operating loss was approximately \$578,000 compared to an operating loss of approximately \$657,000 in the corresponding 2012 period, primarily as a result of increased revenues.

Other income/expense, net

Other income and expense items consist of interest earned on deposits and the net loss from our iReflect joint venture. We have no debt other than trade payables and accrued liabilities. For the first quarter of 2013 we had net other income of \$3,200 as compared to a net income of \$5,600 in the 2012 period. The loss from our 50% interest in the iReflect joint venture was \$3,247 in the 2013 period compared to \$375 in the 2012 period.

Income taxes

For the three months ended March 31, 2013, we recorded a net \$219,000 current income tax benefit, as compared to a net \$228,000 current income tax benefit in the same 2012 period.

Net loss

For the three months ended March 31, 2013 we recorded a net loss of approximately \$356,000, or \$0.08 per share basic and diluted. For the comparable period in 2012 we recorded net loss of approximately \$423,000, or \$0.09 per share, basic and diluted.

Table of Contents

Liquidity and Capital Resources

At March 31, 2013 we had no long-term debt.

Our working capital as of March 31, 2013 was approximately \$1.9 million compared to \$2.3 million at December 31, 2012. Our current ratio at March 31, 2013 and December 31, 2012 was 1.33 to 1 and 1.38 to 1, respectively. The current ratio is derived by dividing current assets by current liabilities and is a measure used by lending sources to assess our ability to repay short-term liabilities. The largest component of our current liabilities is deferred revenue, which was \$4.9 million at March 31, 2013 and \$5.0 million at December 31, 2012.

At March 31, 2013, we had cash and cash equivalents of approximately \$5.5 million. For the three months ended March 31, 2013, we reported a net increase in cash and cash equivalents of approximately \$583,000 that includes approximately \$467,000 of cash provided by operating activities and approximately \$291,000 of cash provided by investing activities offset by approximately \$175,000 used in financing activities. The primary components of our operating cash flows are net income or loss adjusted for non-cash expenses, such as depreciation and amortization stock-based compensation and deferred and current income taxes, and the changes in our operating assets and liabilities, such as accounts receivable, accounts payable and deferred revenues.

At March 31, 2013, we had approximately \$1.2 million in receivables and \$609,000 in payables and accrued expenses, as compared to \$2.62 million of receivables and \$980,000 in payables at December 31, 2012, exclusive of dividends payable.

In November 2012, our board of directors extended our stock buy back program through November 5, 2013 and increased the funds available to repurchase shares of Common Stock on the NASDAQ Capital Market to \$750,000.

As of March 31, 2013, approximately \$633,000 was available under our stock buy back program.

For the 2013 period, net cash provided by investing activities was approximately \$291,000, which included capital expenditures of approximately \$205,000, consisting of computer equipment and software purchases of \$76,000, \$22,000 for course development and \$107,000 for capitalized software, as compared to approximately \$90,000 expended in the first three-months of 2012. We also made a capital investment in our iReflect joint venture of \$3,000. These expenditures were offset by the redemption of certificates of deposit totaling \$500,000. We anticipate that our capital expenditures for the remainder of 2013 will be substantially lower in 2013 as compared to 2012, as we have completed capitalizing the cost of our new software. We continually upgrade our technology hardware and, as such, we anticipate additional capital expenditures relating to equipment purchases over the next 12 months.

Cash used in financing activities for the three months ended March 31, 2013 reflects dividends paid of approximately \$59,000 and the purchase of approximately \$116,000 of our common stock under our stock buy back program. On May 7, 2013, the board of directors declared a dividend of \$.015 per common share payable on July 5, 2013 to shareholders of record as of June 14, 2013.

We believe that our current cash balances together with cash flow from operations will be sufficient to meet our working capital and capital expenditure requirements for the next 12 months.

In the future, we may issue additional debt or equity securities to satisfy our cash needs. Any debt incurred may be secured or unsecured, bear interest at a fixed or variable rate and may contain other terms and conditions that we deem are reasonable under the circumstances existing at the time. Any sales of equity securities may be at or below current market prices. We cannot assure you that we will be successful in generating sufficient capital to adequately fund our needs.

Item 3. Quantitative and Qualitative Risk Disclosures About Market Risk

As a smaller reporting company we are not required to provide the information required by this Item.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. Management, with the participation of our principal executive officer and principal financial officer, carried out an evaluation of the effectiveness of our “disclosure controls and procedures” (as defined in the Securities Exchange Act of 1934, as amended (the “Exchange Act”) Rules 13a-15(e) and

15d-15(e)) as of the end of the period covered by this quarterly report (the “Evaluation Date”). Based upon that evaluation, our principal executive officer and principal financial officer concluded that, as of the Evaluation Date, our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the

Table of Contents

Exchange Act (i) is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and (ii) is accumulated and communicated to our management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting. There were no changes in our internal controls over financial reporting that occurred during the quarter ended March 31, 2013 covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Recent Sales of Unregistered Securities

None.

Company Purchases of its Equity Securities

On November 6, 2012, our board of directors extended our stock buy back program through November 5, 2013 and increased the funds available to repurchase shares of Common Stock on the NASDAQ Capital Market to \$750,000. During the three month period ended March 31, 2013, we purchased a total of 73,473 shares of Common Stock for \$116,087. As set forth below, approximately \$633,000 was available under our stock buy back program as of March 31, 2013.
