More than 500,000 ADSL Accesses in Services

Brasília, Brazil, December 03, 2004 BRASIL TELECOM S.A. (NYSE: BTM; BOVESPA: BRTO3/BRTO4) and BRASIL TELECOM PARTICIPAÇÕES S.A. (NYSE: BRP; BOVESPA: BRTP3/BRTP4) announce that the group reached more than 500,000 ADSL accesses in service on November 27, 2004.

Four years after its launch in Brasilia and Curitiba, the internet broadband access service is currently offered in approximately 800 cities of Region II, proving that the service is available to a significant proportion of the population.

Over the last 11 months, another 218.1 thousand ADSL clients were added, which represents a 77.4% increase in comparison to December 2003. This performance reflects the success of Brasil Telecom's strategy in offering new speeds and value added services, as *TVFone* and *Turbo Video*.

In 2005, Brasil Telecom intends to continue to perform as in the last years, showing the same commitment to pioneerism and innovation.
