DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

Note 1-Basis of Presentation and Organization

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to interim financial reporting as prescribed by the SEC. The year-end consolidated balance sheet data was derived from audited consolidated financial statements, but does not include all disclosures required by the Generally Accepted Accounting Principles of the United States of America ("GAAP"). The unaudited consolidated financial statements contained in this report include all material adjustments of a normal recurring nature that, in the opinion of management, are necessary for a fair presentation of the results for the interim periods. Certain prior period amounts in our unaudited consolidated financial statements have been reclassified to conform to current year presentation. These interim financial statements should be read together with the consolidated financial statements and notes thereto included in our annual report on Form 10-K for the year ended December 31, 2015, filed with the SEC on February 25, 2016, which we refer to as our "Form 10-K." Unless the context indicates otherwise, throughout this report, the terms "Dynegy," "the Company," "we," "us," "our," and "ours" are used to refer to Dynegy Inc. and its direct and indirect subsidiaries.

Our current business operations are focused primarily on the unregulated power generation sector of the energy industry. We report the results of our power generation business as three segments in our unaudited consolidated financial statements: (i) the Coal segment ("Coal"), (ii) the IPH segment ("IPH") and (iii) the Gas segment ("Gas"). Our consolidated financial results also reflect corporate-level expenses such as general and administrative expense, interest expense and income tax benefit (expense). All significant intercompany transactions have been eliminated. Please read Note 20—Segment Information for further discussion.

IPH and its direct and indirect subsidiaries are organized into ring-fenced groups in order to maintain corporate separateness from Dynegy and its other subsidiaries. Certain of the entities in the IPH segment, including Illinois Power Generating Company ("Genco"), have an independent director whose consent is required for certain corporate actions, including material transactions with affiliates. Further, entities within the IPH segment present themselves to the public as separate entities. They maintain separate books, records and bank accounts and separately appoint officers. Furthermore, they pay liabilities from their own funds, conduct business in their own names and have restrictions on pledging their assets for the benefit of certain other persons. These provisions restrict our ability to move cash out of these entities without meeting certain requirements as set forth in the governing documents. Genco's \$825 million Senior Notes are non-recourse to Dynegy.

Note 2—Accounting Policies

The accounting policies followed by the Company are set forth in Note 2—Summary of Significant Accounting Policies in our Form 10-K. The accompanying unaudited consolidated financial statements include our accounts and the accounts of our majority-owned or controlled subsidiaries. Accounting policies for all of our operations are in accordance with accounting principles generally accepted in the United States of America. There have been no significant changes to our accounting policies during the six months ended June 30, 2016.

Use of Estimates. The preparation of unaudited consolidated financial statements in conformity with GAAP requires management to make informed estimates and judgments that affect our reported financial position and results of operations based on currently available information. Actual results could differ materially from our estimates. The results of operations for the interim periods presented in this Form 10-Q are not necessarily indicative of the results to be expected for the full year or any other interim period due to seasonal fluctuations in demand for our energy products and services, changes in commodity prices, timing of maintenance and other expenditures, and other factors. Accounting Standards Adopted During the Current Period

Hybrid Financial Instruments. In November 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-16-Derivatives and Hedging (Topic 815): Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or Equity. The amendments in this ASU clarify how current GAAP should be interpreted in evaluating the economic characteristics

and risks of a host contract in a hybrid financial instrument that is issued in the form of a share. Specifically, the amendments clarify that an entity should consider all relevant terms and features, including the embedded derivative feature being evaluated for bifurcation, in evaluating the nature of the host contract. Furthermore, the amendments clarify that no single term or feature would necessarily determine the economic characteristics and risks of the host contract. Rather, the nature of the host contract depends upon the economic characteristics and risks of the entire hybrid financial instrument. The amendments in this ASU also clarify that, in evaluating the nature of a host contract, an entity should assess the substance of the relevant terms and features (i.e., the relative strength of the debt-like or

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

equity-like terms and features given the facts and circumstances) when considering how to weight those terms and features. The adoption of this ASU on January 1, 2016, did not have an impact on our unaudited consolidated financial statements.

Debt Issuance Costs. In April 2015, the FASB issued ASU 2015-03-Interest-Imputation of Interest (Subtopic 835-30). The amendments in this ASU require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for our debt issuance costs are not affected by the amendments in this update.

In August 2015, the FASB issued ASU 2015-15-Interest-Imputation of Interest (Subtopic 835-30). The amendments in this ASU further clarify the guidance provided in ASU 2015-03 to include the presentation of debt issuance costs in relation to line-of-credit arrangements. The amendments state these costs may be presented as an asset and subsequently amortized ratably over the term of the arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement.

We adopted these ASUs on January 1, 2016, on a retrospective basis affecting presentation on the unaudited consolidated balance sheets for all periods presented. Accordingly, we reclassified \$80 million in unamortized debt issuance costs within our unaudited consolidated balance sheet as of December 31, 2015.

Consolidation. In February 2015, the FASB issued ASU 2015-02-Consolidation (Topic 810). The amendments in this ASU respond to concerns about the current accounting for consolidation of certain legal entities, in particular: (i) consolidation of limited partnerships and similar legal entities, (ii) evaluating fees paid to a decision maker or a service provider as a variable interest, (iii) the effect of fee arrangements on the primary beneficiary determination, (iv) the effect of related parties on the primary beneficiary determination and (v) consolidation of certain investment funds. The adoption of this ASU on January 1, 2016, did not have an impact on our unaudited consolidated financial statements.

Extraordinary and Unusual Items. In January 2015, the FASB issued ASU 2015-01-Income Statement-Extraordinary and Unusual Items (Subtopic 225-20). The amendments in this ASU eliminate from GAAP the concept of extraordinary items and will no longer require separate classification of these items within the statement of operations. Presentation and disclosure guidance for items that are unusual in nature or occur infrequently will be retained and will be expanded to include items that are both unusual in nature and infrequently occurring. The guidance in this ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of this ASU on January 1, 2016, did not have an impact on our unaudited consolidated financial statements.

Accounting Standards Not Yet Adopted

Credit Losses. In June 2016, the FASB issued ASU 2016-13-Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The amendments in this ASU require the measurement of all expected credit losses for financial assets, which include trade receivables, held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. The guidance in this ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, with early adoption permitted for interim and annual periods beginning after December 15, 2018. We are currently evaluating this ASU and any potential impacts the adoption of this ASU will have on our unaudited consolidated financial statements.

Compensation. In March 2016, the FASB issued ASU 2016-09-Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. The amendments in this ASU simplify several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. The guidance in this ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016, with early adoption permitted. We are currently evaluating this ASU and any potential impacts the adoption of this ASU will

have on our unaudited consolidated financial statements.

Debt Instruments. In March 2016, the FASB issued ASU 2016-06-Derivative and Hedging: Contingent Put and Call Options in Debt Instruments. The amendments in this ASU clarify what steps are required when assessing whether the economic characteristics and risks of call (put) options are clearly and closely related to the economic characteristics and risks of their debt hosts, which is one of the criteria for bifurcating an embedded derivative. An entity performing the assessment under the amendments in this ASU is required to assess the embedded call (put) options solely in accordance with the four-step decision sequence. The amendments are effective for public business entities for fiscal years beginning after December 15, 2016 and interim periods within those fiscal years. All entities have the option of adopting the new requirements early, including adoption in an interim period. If an entity early adopts the new requirements in an interim period, it must reflect any adjustments as of the beginning of the fiscal year that includes that interim period. We are currently evaluating this ASU; however, we do not anticipate the adoption of this ASU will have a material impact on our unaudited consolidated financial statements.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

Leases. In February 2016, the FASB issued ASU 2016-02-Leases (Topic 842). The amendments in this ASU will mainly require lessees to recognize lease assets and lease liabilities, for those leases classified as operating leases under GAAP, in their balance sheet. The lease assets recognized in the balance sheet will represent a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. The lease liability recognized in the balance sheet will represent the lessee's obligation to make lease payments arising from a lease, measured on a discounted basis. The guidance in this ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, with early adoption permitted. We are currently evaluating this ASU and any potential impacts the adoption of this ASU will have on our unaudited consolidated financial statements.

Going Concern. In August 2014, the FASB issued ASU 2014-15-Presentation of Financial Statements-Going Concern (Subtopic 205-40). The amendments in this ASU require management, in connection with preparing financial statements for each annual and interim reporting period, to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued, when applicable). Currently, there is no guidance in GAAP about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern or to provide related footnote disclosures. The amendments in this ASU provide that guidance. In doing so, the amendments should reduce diversity in the timing and content of footnote disclosures. The guidance in this ASU is effective for fiscal years ending after December 15, 2016, and interim periods within those fiscal years, beginning after December 15, 2016, with early adoption permitted. We are currently evaluating this ASU; however, we do not anticipate the adoption of this ASU will have a material impact on our unaudited consolidated financial statements. Revenue from Contracts with Customers. In May 2014, the FASB and International Accounting Standards Board jointly issued ASU 2014-09-Revenue from Contracts with Customers (Topic 606). This ASU, and subsequently issued amendments to the standard, develop a common revenue standard for GAAP and International Financial Reporting Standards by removing inconsistencies and weaknesses in revenue requirements, providing a more robust framework for addressing revenue issues, improving comparability of revenue recognition practices, providing more useful information to users of financial statements, and simplifying the preparation of financial statements. The amendments in ASU 2016-08 are intended to improve the operability and understandability of the implementation guidance on principal versus agent considerations. The guidance in this ASU and its amendments is effective for interim and annual periods beginning after December 15, 2017, with early adoption permitted for interim and annual periods beginning after December 15, 2016. We are currently evaluating this ASU; however, we do not anticipate the adoption of this ASU will have a material impact on our unaudited consolidated financial statements. Note 3—Acquisitions

Delta Transaction. On February 24, 2016, Atlas Power Finance, LLC ("Atlas" or the "Purchaser"), a wholly owned subsidiary of Atlas Power, LLC ("Atlas Power"), entered into a Stock Purchase Agreement, as amended and restated on June 27, 2016 (the "Delta Stock Purchase Agreement") with GDF SUEZ Energy North America, Inc. ("GSENA") and International Power, S.A. (the "Seller"), indirect subsidiaries of Engie S.A. Pursuant to the Delta Stock Purchase Agreement, the Purchaser will acquire approximately 9,058 MW of generation, including (i) 15 natural gas-fired facilities located in Illinois, Massachusetts, New Jersey, Ohio, Pennsylvania, Texas, Virginia, and West Virginia, (ii) one coal-fired facility in Texas, and (iii) one waste coal-fired facility in Pennsylvania for a base purchase price of approximately \$3.3 billion in cash, subject to certain adjustments (the "Delta Transaction"). On June 27, 2016, a wholly owned subsidiary of Dynegy acquired the 35 percent interest in Atlas Power (the "ECP Buyout") held by certain affiliated investment funds of Energy Capital Partners III, LLC (the "ECP Funds").

Atlas Power became an indirect wholly owned subsidiary of Dynegy. In accordance with the agreement with Energy Capital Partners ("ECP"), Dynegy will pay ECP \$375 million (the "ECP Buyout Price") on the later of December 31, 2016 or three months after the closing of the Delta Transaction (the "First Payment Date"). Alternatively, Dynegy may pay

the ECP Buyout Price after the First Payment Date, but in such case, the ECP Buyout Price would be subject to quarterly escalation up to a maximum of \$468.5 million.

The Purchaser and the Seller have agreed to indemnify the other for breaches of representations, warranties and covenants, and for certain other matters, subject to certain exceptions and limitations. The Delta Stock Purchase Agreement contains certain termination rights for both the Purchaser and the Seller, including if the closing does not occur within 12 months following the date of the Delta Stock Purchase Agreement. In the event the Delta Stock Purchase Agreement is terminated under certain circumstances, including the failure to obtain certain regulatory approvals, the Purchaser must pay GSENA the reverse termination fee of \$132 million discussed below.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

Dynegy also entered into an amended and restated limited guarantee in favor of GSENA, pursuant to which Dynegy guarantees 100 percent of the Purchaser's obligation to pay the reverse termination fee of \$132 million if such fee becomes payable. Please read Note 14—Commitments and Contingencies—Indemnifications and Guarantees for further discussion.

The Delta Stock Purchase Agreement includes customary representations, warranties and covenants by the parties. The Delta Transaction is subject to various closing conditions, including (i) expiration of the applicable waiting period, which was received on April 1, 2016, under the Hart-Scott-Rodino Act; (ii) obtaining required approvals from the FERC and the Public Utility Commission of Texas, which was received on July 20, 2016; (iii) no injunction or other orders preventing the consummation of the transactions contemplated under the Delta Stock Purchase Agreement; (iv) the completion of GSENA's internal reorganization in all material respects in accordance with an exhibit attached to the Delta Stock Purchase Agreement; (v) the continuing accuracy of each party's representations and warranties, and (vi) the satisfaction of other customary conditions. On June 8, 2016, we received a letter from FERC requesting additional information, to which we have responded. We expect the Delta Transaction to close in the fourth quarter of 2016 after satisfaction or waiver of these closing conditions.

Delta Transaction Financing. On February 24, 2016, Dynegy entered into a Stock Purchase Agreement with Terawatt Holdings, LP ("Terawatt"), an affiliate of the ECP Funds (the "PIPE Stock Purchase Agreement"), pursuant to which Dynegy will sell and issue to Terawatt at the closing of the Delta Transaction 13,711,152 shares of Dynegy common stock for \$150 million (the "PIPE Transaction"). The closing of the PIPE Transaction is contingent on the closing of the Delta Transaction. In addition, Dynegy has agreed to enter into an Investor Rights Agreement, in the form attached to the PIPE Stock Purchase Agreement (the "Investor Rights Agreement"), with Terawatt at the closing of the PIPE Transaction. Under the Investor Rights Agreement, Terawatt will be entitled to certain rights, including certain registration rights, rights of first refusal with respect to issuances of our common stock and the designation of one individual to serve on our Board of Directors as long as Terawatt and its affiliates own at least 10 percent of our common stock. Further, the Investor Rights Agreement subjects Terawatt to certain obligations, including certain voting obligations and customary standstill and lock-up periods.

On June 21, 2016, pursuant to a registered public offering, Dynegy issued 4.6 million tangible equity units ("TEUs") for proceeds of \$446 million, net of issuance costs of \$14 million. Please read Note 12—Tangible Equity Units for further discussion.

On June 27, 2016, Dynegy Finance IV, Inc. ("Finance IV"), a direct wholly-owned subsidiary of Dynegy, entered into a term loan credit agreement with certain lenders providing for a \$2.0 billion, seven-year senior secured term loan facility (the "Tranche C Term Loan"), the net proceeds of which were placed into escrow pending the closing of the Delta Transaction. Under the escrow agreement, the applicable borrowings are subject to full liquidation and release to the lenders if the Delta Transaction is terminated or not consummated by February 24, 2017.

Also, on June 27, 2016, Dynegy entered into a Third Amendment to the Credit Agreement (the "Third Amendment"), which, upon the release of funds from escrow, provides for (i) a \$75 million revolving loan commitment increase to the incremental tranche B revolving loan commitments (the "Incremental Tranche B Revolver"), which has terms substantially the same as the terms of the existing incremental tranche B revolving loan commitments under the Credit Agreement, and (ii) conversion of the Tranche C Term Loan to an incremental \$2.0 billion senior secured tranche C term loan. Please read Note 13—Debt—Credit Agreement and Finance IV Credit Agreement for further discussion. During the quarter, Dynegy substantially completed its financing for the Delta Transaction. Upon closing, Dynegy intends to use the net proceeds associated with the PIPE Transaction, the TEUs, the Tranche C Term Loan, borrowings under its revolving credit facilities, and cash-on-hand.

EquiPower Acquisition. On April 1, 2015 (the "EquiPower Closing Date"), pursuant to the terms of a stock purchase agreement dated August 21, 2014, as amended, our wholly-owned subsidiary, Dynegy Resource II, LLC purchased 100 percent of the equity interests in EquiPower Resources Corp. ("ERC") from certain affiliates of ECP (collectively, the "ERC Sellers") thereby acquiring (i) five combined cycle natural gas-fired facilities in Connecticut, Massachusetts,

and Pennsylvania, (ii) a partial interest in one natural gas-fired peaking facility in Illinois, (iii) two gas and oil-fired peaking facilities in Ohio, and (iv) one coal-fired facility in Illinois (the "ERC Acquisition").

On the EquiPower Closing Date, in a related transaction, pursuant to a stock purchase agreement and plan of merger dated August 21, 2014, as amended, our wholly-owned subsidiary Dynegy Resource III, LLC purchased 100 percent of the equity interests in Brayton Point Holdings, LLC ("Brayton") from certain affiliates of ECP (collectively, the "Brayton Sellers" and together with the ERC Sellers, the "ECP Sellers"), thereby acquiring a coal-fired facility in Massachusetts (the "Brayton Acquisition").

The ERC Acquisition and the Brayton Acquisition (collectively, the "EquiPower Acquisition") added approximately 6,300 MW of generation in Connecticut, Illinois, Massachusetts, Ohio, and Pennsylvania for an aggregate base purchase price of

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

approximately \$3.35 billion in cash plus approximately \$105 million in common stock of Dynegy, subject to certain adjustments. In aggregate, the resulting operations from the two coal-fired facilities acquired from the ECP Sellers are reported within our Coal segment, while related operations from the six natural gas-fired and two gas and oil-fired facilities are reported within our Gas segment.

Duke Midwest Acquisition. On April 2, 2015, pursuant to the terms of the purchase and sale agreement dated August 21, 2014, as amended, our wholly-owned subsidiary Dynegy Resource I, LLC purchased 100 percent of the membership interests in Duke Energy Commercial Asset Management, LLC and Duke Energy Retail Sales, LLC, from two affiliates of Duke Energy Corporation (collectively, "Duke Energy"), thereby acquiring approximately 6,200 MW of generation in (i) three combined cycle natural gas-fired facilities located in Ohio and Pennsylvania, (ii) two natural gas-fired peaking facilities located in Ohio and Illinois, (iii) one oil-fired peaking facility located in Ohio, (iv) partial interests in five coal-fired facilities located in Ohio, and (v) a retail energy business for a base purchase price of approximately \$2.8 billion in cash (the "Duke Midwest Acquisition"), subject to certain adjustments. We operate two of the five coal-fired facilities, the Miami Fort and Zimmer facilities, with other owners operating the three remaining facilities. The operations from the retail energy business, the five coal-fired and the one oil-fired facilities acquired from Duke Energy are reported within our Coal segment, while related operations from the five natural gas-fired facilities are reported within our Gas segment.

Business Combination Accounting. The EquiPower Acquisition and the Duke Midwest Acquisition (collectively, the "Acquisitions") have been accounted for in accordance with Accounting Standards Codification ("ASC") 805, Business Combinations, with identifiable assets acquired and liabilities assumed recorded at their estimated fair values on the acquisition dates, April 1, 2015 and April 2, 2015, respectively. The valuation of these assets and liabilities is classified as Level 3 within the fair value hierarchy.

To fair value working capital, we used available market information. Asset retirement obligations ("AROs") were recorded in accordance with ASC 410, Asset Retirement and Environmental Obligations. To fair value the acquired property, plant and equipment ("PP&E"), we used a discounted cash flow ("DCF") analysis based upon a debt-free, free cash flow model. The DCF model was created for each power generation facility based on its remaining useful life, and included gross margin forecasts for each facility using forward commodity market prices obtained from third party quotations for the years 2015 and 2016. For the years 2017 through 2024, we used gross margin forecasts based upon commodity and capacity price curves developed internally using forward New York Mercantile Exchange natural gas prices and supply and demand factors. For periods beyond 2024, we assumed a 2.5 percent growth rate. We also used management's forecasts of operations and maintenance expense, general and administrative expense, and capital expenditures for the years 2015 through 2019 and assumed a 2.5 percent growth rate, based upon management's view of future conditions, thereafter. The resulting cash flows were then discounted using plant specific discount rates of approximately 8 percent to 10 percent for gas-fired generation facilities and approximately 9 percent to 13 percent for coal-fired generation facilities, based upon the asset's age, efficiency, region and years until retirement. Contracts with terms that were not at current market prices were also valued using a DCF analysis. The cash flows generated by the contracts were compared with their cash flows based on current market prices with the resulting difference recorded as either an intangible asset or liability. The 3,460,053 shares of common stock of Dynegy, issued as part of the consideration for the EquiPower Acquisition, were valued at approximately \$105 million based on the closing price of Dynegy's common stock on the EquiPower Closing Date.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

As of June 30, 2016, we have completed our valuation of the assets acquired and liabilities assumed in connection with the Acquisitions. The following table summarizes the consideration paid and the fair value amounts recognized for the assets acquired and liabilities assumed related to the EquiPower Acquisition and Duke Midwest Acquisition, as of the respective acquisition dates, April 1, 2015 and April 2, 2015:

(amounts in millions)	EquiPower Acquisition	Duke Midwest Acquisition	Total
Cash	\$ 3,350	\$ 2,800	\$6,150
Equity instruments (3,460,053 common shares of Dynegy)	105		105

	.1	1 1 1 20 6	016

No acquisition costs related to the Acquisitions were incurred during the three and six months ended June 30, 2016. We incurred acquisition costs of \$2 million and \$85 million related to the Acquisitions for the three and six months ended June 30, 2015, respectively. These acquisition costs are included in Acquisition and integration costs in our unaudited consolidated statements of operations.

Revenues of \$468 million and \$1,129 million and operating income of \$20 million and \$177 million, attributable to the Acquisitions, are included in our unaudited consolidated statements of operations for the three and six months ended June 30, 2016, respectively. Revenues of \$507 million and operating income of \$67 million attributable to the

Acquisitions are included in our unaudited consolidated statements of operations for the three and six months ended June 30, 2015, respectively.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

Pro Forma Results. The unaudited pro forma financial results for the six months ended June 30, 2015 assume the EquiPower Acquisition and the Duke Midwest Acquisition occurred on January 1, 2014. The unaudited pro forma financial results may not be indicative of the results that would have occurred had the acquisition been completed as of January 1, 2014, nor are they indicative of future results of operations.

Note 4-Unconsolidated Investments

Equity Method Investments

In connection with the EquiPower Acquisition, we acquired a 50 percent interest in Elwood Energy LLC, a limited liability company ("Elwood Energy") and Elwood Expansion LLC, a limited liability company ("Elwood Expansion" and, together with Elwood Energy, "Elwood"). Elwood Energy owns a 1,576 MW natural gas-fired facility located in Elwood, Illinois. At June 30, 2016 and December 31, 2015, our equity method investment included in our unaudited consolidated balance sheets was \$185 million and \$190 million, respectively. Upon the acquisition of our Elwood investment, we recognized basis differences in the net assets of approximately \$89 million related to working capital, PP&E, debt, and intangibles. These basis differences are being amortized over their respective useful lives. Our risk of loss related to our equity method investment is limited to our investment balance. Holders of the debt of our unconsolidated investment do not have recourse to us and our other subsidiaries.

For the three and six months ended June 30, 2016, we recorded \$1 million and \$3 million in equity earnings related to our investment in Elwood, respectively, which is reflected in Earnings from unconsolidated investments in our unaudited consolidated statements of operations. For the six months ended June 30, 2016, we received a distribution of \$8 million, all of which was considered a return of investment. For the six months ended June 30, 2015, we did not receive any distributions. In July 2016, we received a distribution of \$7 million. At June 30, 2016 and December 31, 2015, we have \$13 million and \$3 million in accounts receivable due from Elwood, respectively, which is included in Accounts receivable, net in our unaudited consolidated balance sheets.

On March 28, 2016, Dynegy Marketing and Trade, LLC ("DMT"), a subsidiary of Dynegy, entered into (i) an Asset Management Agreement and (ii) a Fuel Supply and Fuel Management Services Agreement with Elwood Energy. Under these agreements, DMT provides gas supply and management services to meet Elwood Energy's fuel supply requirements. As of June 30, 2016, we have \$11 million in accounts receivable due from Elwood Energy related to these agreements, which is included in Accounts receivable, net in our unaudited consolidated balance sheets. For the three and six months ended June 30, 2016, we recorded \$11 million in revenues related to these agreements, which is reflected in Revenues in our unaudited consolidated statements of operations.

Note 5-Risk Management Activities, Derivatives, and Financial Instruments

The nature of our business necessarily involves commodity market and financial risks. Specifically, we are exposed to commodity price variability related to our power generation business. Our commercial team manages these commodity price risks with financially and physically settled contracts consistent with our commodity risk management policy. Our treasury team manages our interest rate risk.

Our commodity risk management policy gives us the flexibility to sell energy and capacity and purchase fuel through a combination of spot market sales and near-term contractual arrangements (generally over a rolling one- to three-year time frame). Our commodity risk management goal is to protect cash flow in the near-term while keeping the ability

to capture value longer-term.

Many of our contractual arrangements are derivative instruments and are accounted for at fair value as part of Revenues in our unaudited consolidated statements of operations. We have other contractual arrangements such as capacity forward sales arrangements, tolling arrangements, fixed price coal purchases, and retail power sales which do not receive recurring fair value accounting treatment because these arrangements do not meet the definition of a derivative or are designated as "normal purchase,

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

normal sale," in accordance with ASC 815, Derivatives and Hedging. As a result, the gains and losses with respect to these arrangements are not reflected in our unaudited consolidated financial statements until the delivery occurs. Quantitative Disclosures Related to Financial Instruments and Derivatives

As of June 30, 2016, we had net purchases and sales of derivative contracts outstanding in the following quantities:

Contract Type	Quantity	Unit of Measure	Fair Val	ue
(dollars and quantities in millions)	Purchases (Sales)	5	Asset (Liabilit	y)
Commodity contracts:				
Electricity derivatives (2)	(26)	MWh	\$ (22)
Electricity basis derivatives (3)	(40)	MWh	\$ (9)
Natural gas derivatives (2)	315	MMBtu	\$ (10)
Natural gas basis derivatives	82	MMBtu	\$ (1)
Diesel fuel	1	Gallon	\$ (1)
Coal derivatives (4)		Metric Ton	\$ (17)
Emissions derivatives	4	Metric Ton	\$ (2)
Interest rate swaps	773	U.S. Dollar	\$ (45)
Common stock warrants (5)	16	Warrant	\$ (6)

(1) Includes both asset and liability risk management positions but excludes margin and collateral netting of \$81 million.

(2) Mainly comprised of swaps, options, and physical forwards.

(3)Comprised of FTRs and swaps.

(4)Our net position rounds to less than 1 million tons.

(5)Each warrant is convertible into one share of Dynegy common stock.

Derivatives on the Balance Sheet. The following tables present the fair value and balance sheet classification of derivatives in our unaudited consolidated balance sheets as of June 30, 2016 and December 31, 2015. As of June 30, 2016 and December 31, 2015, there were no gross amounts available to be offset that were not offset in our unaudited consolidated balance sheets.

		June 30, 2016					
			Gross amounts

Total derivative liabilities		\$ (606)	\$ 285	\$ 106	\$ (215)
Total derivatives		\$ (203)	\$ —	\$ 106	\$ (97)

Certain of our derivative instruments have credit limits that require us to post collateral. The amount of collateral required to be posted is a function of the net liability position of the derivative as well as our established credit limit with the respective counterparty. If our credit rating were to change, the counterparties could require us to post additional collateral. The amount of additional collateral that would be required to be posted would vary depending on the extent of change in our credit rating as well as the requirements of the individual counterparty. The aggregate fair value of all commodity derivative instruments with credit-risk-related contingent features that are in a liability position that are not fully collateralized (excluding transactions with our clearing brokers that are fully collateralized) as of June 30, 2016, is \$28 million for which we have posted \$11 million in collateral. Our remaining derivative instruments do not have credit-related contingencies as they are included within our first-lien collateral program.

The following table summarizes our cash collateral posted as of June 30, 2016 and December 31, 2015, within Prepayments and other current assets in our unaudited consolidated balance sheets and the amount applied against short-term risk management activities:

Logation on Palance Sheet	June 30	December	
Location on Balance Sheet		31, 2015	
(amounts in millions)			
Gross collateral posted with counterparties	\$ 127	\$ 162	

Less: Collateral netted against risk management liabilities 81 106

Net collateral within Prepayments and other current assets \$46 \$56

Impact of Derivatives on the Unaudited Consolidated Statements of Operations

The following discussion and table present the location and amount of gains and losses on derivative instruments in our unaudited consolidated statements of operations.

Financial Instruments Not Designated as Hedges. We elect not to designate derivatives related to our power generation business and interest rate instruments as cash flow or fair value hedges. Thus, we account for changes in the fair value of these derivatives within our unaudited consolidated statements of operations.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

Our unaudited consolidated statements of operations for the three and six months ended June 30, 2016 and 2015 include the impact of derivative financial instruments as presented below:

Note 6—Fair Value Measurements

We apply the market approach for recurring fair value measurements, employing valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. We have consistently used the same valuation techniques for all periods presented. Please read Note 2—Summary of Significant Accounting Policies—Fair Value Measurements in our Form 10-K for further discussion.

The following tables set forth, by level within the fair value hierarchy, our financial assets and liabilities that were accounted for at fair value on a recurring basis as of June 30, 2016 and December 31, 2015, and are presented on a gross basis before consideration of amounts netted under master netting agreements and the application of collateral and margin paid:

Level 3 Valuation Methods. The electricity derivatives classified within Level 3 include financial swaps executed in illiquid trading locations or on long dated contracts, capacity contracts, and FTRs. The curves used to generate the fair value of the financial swaps are based on basis adjustments applied to forward curves for liquid trading points, while the curves for the capacity deals are based upon auction results in the marketplace, which are infrequently executed. The forward market price of FTRs is derived using historical congestion patterns within the marketplace and heat rate derivative valuations are derived using a Black-Scholes spread model, which uses forward natural gas and power prices, market implied volatilities, and modeled correlation values. The natural gas derivatives classified within Level 3 include financial swaps, basis swaps, and physical purchases executed in illiquid trading locations or on long dated contracts. The coal derivatives classified within Level 3 include financial swaps executed in illiquid trading locations or on long dated contracts.

Sensitivity to Changes in Significant Unobservable Inputs for Level 3 Valuations. The significant unobservable inputs used in the fair value measurement of our commodity instruments categorized within Level 3 of the fair value hierarchy include estimates of forward congestion, power price spreads, natural gas and coal pricing, and the difference between our plant locational prices to liquid hub prices. Power price spreads, natural gas and coal pricing, and the difference between our plant locational prices to liquid hub prices are generally based on observable markets where available, or derived from historical prices and forward market prices from similar observable markets when not available. Increases in the price of the spread on a buy or sell position in isolation would result in a higher/lower fair value measurement. The significant unobservable inputs used in the valuation of Dynegy's contracts classified as Level 3 as of June 30, 2016 are as follows:

Transaction Type	Quantity Unit of Measure	Net Fair Value	Valuation Technique	Significant Unobservable Input	Significant Unobservable Input Range
(dollars in millions) Electricity derivatives:					

Forward contracts—power (1) (4)	Million MWh	\$(23)	Basis spread + liquid location	Basis spread	\$5.00 - \$7.00
FTRs	(34)	Million MWh	\$(1)	Historical congestion	Forward price	\$0 - \$8.00
Natural gas derivatives (1)	57		Million MMBtu	\$(15)	Illiquid location fixed price	Forward price	\$1.80 - \$2.20
Coal derivatives (1)	—		Thousand Tons	\$1	Illiquid location fixed price	Forward price	\$5.60 - \$6.80

(1)Represents forward financial and physical transactions at illiquid pricing locations.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

Gains and losses recognized for Level 3 recurring items are included in Revenues in our unaudited consolidated statements of operations for commodity derivatives. We believe an analysis of commodity instruments classified as Level 3 should be undertaken with the understanding that these items generally serve as economic hedges of our power generation portfolio. We did not have any transfers between Level 1, Level 2, and Level 3 for the three and six months ended June 30, 2016 and 2015.

Nonfinancial Assets and Liabilities. Nonfinancial assets and liabilities that are measured at fair value on a nonrecurring basis are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of such assets and liabilities and their placement within the fair value hierarchy. During the three and six months ended June 30, 2016, as a result of impairment testing, we measured our Baldwin facility at fair value. See Note 9—Property, Plant and Equipment for further discussion. During the three and six months ended the EquiPower and Duke Midwest acquisitions. See Note 3—Acquisitions for further discussion. Each of these valuations is classified as Level 3 within the fair value hierarchy.

Fair Value of Financial Instruments. The following table discloses the fair value of financial instruments recognized in our unaudited consolidated balance sheets. Unless otherwise noted, the fair value of debt as reflected in the table has been calculated based on the average of certain available broker quotes as of June 30, 2016 and December 31, 2015, respectively.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

On May 3, 2016, Dynegy announced the shutdown of two of the three units at its Baldwin power generation facility in Baldwin, Illinois and one of the two units at its Newton power generation facility in Newton, Illinois. MISO has approved the shutdown of one unit at Baldwin by October 17, 2016 and one unit at Newton by September 15, 2016. Subject to the approval of MISO, we expect to shut down the other Baldwin unit by March 31, 2017. In the second quarter of 2016, due to the recent MISO auction results and the impact of certain unit shutdowns, we performed an impairment analysis on our MISO plants. We performed step one of the impairment analysis using undiscounted cash flows for the estimated useful lives of the facilities and determined the book value of the Baldwin facility would not be recovered. We performed step two of the impairment analysis using a DCF model, utilizing a 13 percent discount rate, and assuming normal operations for the estimated useful lives of the facilities. For the model, gross margin was based on forward commodity market prices obtained from third party quotations for the years 2016 through 2018. For the years 2019 through 2025, we used commodity and capacity price curves developed internally utilizing supply and demand factors. We also used management's forecasts of operations and maintenance expense, general and administrative expense, and capital expenditures for the years 2016 through 2025 and assumed a 2.5 percent growth rate thereafter, based upon management's view of future conditions. The model resulted in a fair value of the Baldwin facility of \$97 million, resulting in an impairment charge of \$645 million recorded to Impairments in our unaudited consolidated statements of operations for the three and six months ended June 30, 2016. The valuation is classified as Level 3 within the fair value hierarchy.

Note 10—Joint Ownership of Generating Facilities

We hold ownership interests in certain jointly owned generating facilities. We are entitled to the proportional share of the generating capacity and the output of each unit equal to our ownership interests. We pay our share of capital expenditures, fuel inventory purchases, and operating expenses, except in certain instances where agreements have been executed to limit certain joint owners' maximum exposure to additional costs. Our share of revenues and operating costs of the jointly owned generating facilities is included within the corresponding financial statement line items in our unaudited consolidated statements of operations.

The following tables present the ownership interests of the jointly owned facilities as of June 30, 2016 and December 31, 2015 included in our unaudited consolidated balance sheets. Each facility is co-owned with one or more other generation companies.

<u>e</u>	June 30, 2	2016

Intangible assets and liabilities, net	\$40	\$ (26)	\$ 14	\$(26))\$50	\$ 24	

The following table presents our amortization expense (revenue) of intangible assets and liabilities for the three and six months ended June 30, 2016 and 2015:

	Three	Six		
	Months	Months		
	Ended	Ended		
	June 30,	June 30,		
(amounts in millions)	2016 2015	2016 2015		
Electricity contracts, net (1)	\$17 \$25	\$33 \$32		
Coal contracts, net (2)	(11)(20)	(23)(23)		
Coal transport contracts, net (2)	(7)(9)	(14)(15)		
Gas transport contracts, net (2)	— (1)	17 (3)		
Total	\$(1) \$(5)	\$13 \$(9)		
1	• • •	. ,		

(1) The amortization of these contracts is recognized in Revenues in our unaudited consolidated statements of operations.

(2) The amortization of these contracts is recognized in Cost of sales in our unaudited consolidated statements of operations.

Note 12—Tangible Equity Units

On June 21, 2016, we issued 4.6 million, 7 percent TEUs at \$100 per unit and received proceeds of \$446 million, net of issuance costs of \$14 million.

Each TEU is comprised of: (i) a prepaid stock purchase contract ("SPC") issued by Dynegy, and (ii) an amortizing note ("Amortizing Note"), with an initial principal amount of \$18.95 that pays an equal quarterly cash installment of \$1.75 per Amortizing Note on January 1, April 1, July 1, and October 1 of each year, with the exception of the first installment payment of \$1.94 due on October 1, 2016. In the aggregate, the annual quarterly cash installments will be equivalent to a 7 percent cash payment per year. Each installment cash payment constitutes a payment of interest and a partial repayment of principal. Each TEU may be separated by a holder into its constituent SPC and Amortizing Note after the initial issuance date of the TEUs, and the separate components may be combined to create a TEU after

the initial issuance date, in accordance with the terms of the SPC. The TEUs are listed on the New York Stock Exchange under the symbol "DYNC".

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

We allocated the proceeds from the issuance of the TEUs to equity and debt based on the relative fair value of the respective components of each TEU as follows:

(in millions, except price per TEU)	SPC	Ai	nortizing ote	Total
Price per TEU	\$81		19	\$100
-				
Gross proceeds	\$373	\$	87	\$460
Less: Issuance costs	(11)	(3)	(14)
Net proceeds	\$362	\$	84	\$446

The fair value of the SPCs was recorded as additional paid in capital, net of issuance costs. The fair value of the Amortizing Notes was recorded as debt, with deferred financing costs recorded as a reduction of the carrying amount of the debt in our unaudited consolidated balance sheet. Deferred financing costs related to the Amortizing Notes will be amortized through the maturity date using the effective interest rate method.

Unless settled early at the holder's or Dynegy's election or redeemed by Dynegy in connection with an acquisition termination redemption, on July 1, 2019, Dynegy will deliver to the SPC holders a number of shares of common stock based on the 20 day volume-weighted average price ("VWAP") of our common stock as follows:

VWAP of Dynegy Common Stock	Common Shares Issued
Equal to or greater than \$19.92	5.0201 shares (minimum settlement rate)
Less than \$19.92, but greater than \$16.13	\$100 divided by VWAP
Less than or equal to \$16.13	6.1996 shares (maximum settlement rate)
In addition, on any business day during the	period beginning on, and including, the business day immediately
following the date of initial issuance of the	TEUs to, but excluding, the third business day immediately precedi

following the date of initial issuance of the TEUs to, but excluding, the third business day immediately preceding the mandatory settlement date, any holder of an SPC may settle any or all of its SPCs early, and Dynegy will deliver a number of shares of Common Stock equal to the minimum settlement rate. Additionally, the SPCs may be redeemed in the event of a fundamental change or under an acquisition termination event, both as defined in the SPC.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

At June 30, 2016, the Tranche C Term Loan, under the Finance IV Credit Agreement, was secured by first-priority (1) liens on amounts in the applicable escrow account which was classified as long-term Restricted cash in our unaudited consolidated balance sheet. Upon the closing of the Delta Transaction, this debt obligation will become

Dynegy Inc.'s secured obligation. Please read Finance IV Credit Agreement below for further discussion. (2) Includes \$102 million and \$111 million of unamortized debt discounts and issuance costs as of June 30, 2016 and December 31, 2015, respectively, relating to the Genco unsecured obligations.

Credit Agreement and Finance IV Credit Agreement

As of June 30, 2016, we had a \$2.225 billion credit agreement, as amended, that consisted of (i) an \$800 million seven-year senior secured term loan facility (the "Tranche B-2 Term Loan") and (ii) \$1.425 billion in senior secured revolving credit facilities (the "Revolving Facility," and collectively with the Tranche B-2 Term Loan the "Credit Agreement"). Additionally as

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

of June 30, 2016, we had a \$2.0 billion, seven-year senior Tranche C Term Loan, under the Finance IV Credit Agreement, as defined below.

At June 30, 2016, there were no amounts drawn on the Revolving Facility; however, we had outstanding letters of credit ("LCs") of approximately \$332 million, which reduce the amount available under the Revolving Facility. The Credit Agreement contains customary events of default and affirmative and negative covenants, subject to certain specified exceptions, including a Senior Secured Leverage Ratio (as defined in the Credit Agreement) calculated on a rolling four quarters basis. Based on the calculation outlined in the Credit Agreement, we are in compliance as of June 30, 2016.

Finance IV Credit Agreement. On June 27, 2016 (the "Term Loan Closing Date"), Finance IV entered into a term loan credit agreement which provides for a \$2.0 billion, seven-year Tranche C Term Loan, and matures on June 27, 2023. The Tranche C Term Loan bears interest at either (i) 4 percent per annum plus LIBOR, subject to a floor of one percent with respect to any LIBOR Loan or (ii) 3 percent per annum plus the Base Rate with respect to any Base Rate Loan. Amounts available under the Tranche C Term Loan were fully drawn on the Term Loan Closing Date, and the net proceeds were placed into escrow (see "Escrow Agreement" described below) pending the consummation of the Delta Transaction. The Finance IV Credit Agreement contains limited events of default and affirmative covenants and one negative covenant, which restricts the activities of Finance IV to those primarily relating to the Delta Transaction and financing. The obligations of Finance IV under the Finance IV Credit Agreement are secured by the related amounts placed in escrow from time to time.

Escrow Agreement. On the Term Loan Closing Date, Finance IV borrowed the full amount of the Tranche C Term Loan and placed the net proceeds into an escrow account (the "Escrow Account"). Additionally, Dynegy contributed \$70 million into escrow so that the aggregate funds in the Escrow Account would be sufficient to repay the Tranche C Term Loan plus any interest that may accrue for a period of six months from the Term Loan Closing Date. Pursuant to the Escrow Agreement, interest payments on the Tranche C Term Loan will be paid from the amounts in the escrow account until the release of funds on the Escrow Release Date. As of June 30, 2016, we had \$2.0 billion classified as long-term Restricted cash and \$70 million classified as short-term Restricted cash in our unaudited consolidated balance sheet related to the Escrow Agreement. The \$70 million represents a payment to the escrow account of (i) \$50 million of pre-funded interest and (ii) \$20 million of pre-funded original issue discount which is contingent upon the closing of the Delta Transaction.

Upon the release of funds from escrow upon the satisfaction of the Delta Transaction Escrow Conditions, as defined in the Finance IV Credit Agreement (the "Escrow Release Date"), Finance IV will merge with and into Dynegy, with Dynegy as the surviving entity, and Dynegy will use the amounts released from escrow to fund a portion of the Delta Transaction. The Finance IV Credit Agreement provides that, upon the effectiveness of the Conversion and Deemed Issuance, as defined in the Finance IV Credit Agreement, the latter will (a) cease to be of force or effect and (b) be superseded by the provisions of the Credit Agreement, as amended by the Third Amendment. If the Delta Transaction Escrow Conditions are not satisfied on or prior to February 24, 2017 (the "Delta Transaction Deadline") or if the Delta Stock Purchase Agreement is terminated or Finance IV has determined that the Delta Transaction will not be consummated on or before the Delta Transaction Deadline, the escrow agent will, within one business day, liquidate all escrowed property held in escrow and release all amounts to the lenders under the Finance IV Credit Agreement. Credit Agreement Third Amendment. In order to facilitate the merger of Finance IV with and into Dynegy upon the closing of the Delta Transaction, on June 27, 2016, Dynegy entered into the Third Amendment of its Credit Agreement. The Third Amendment provides, upon the Escrow Release Date, for (i) a \$75 million Incremental Tranche B Revolver to the Revolving Facility, which has terms substantially the same as the terms of the Revolving Facility and will mature on April 2, 2020 and (ii) an incremental \$2.0 billion, seven-year senior secured Tranche C Term Loan which has terms substantially the same as the Finance IV Credit Agreement discussed above. In addition, as requested by the Seller in the Delta Transaction, on June 27, 2016, Dynegy, the guarantors, the lenders and other parties thereto entered into a waiver to the Credit Agreement (the "Waiver"), providing a waiver from the lenders party

thereto of the Incremental Ratio Tests (as defined in the Credit Agreement) and confirmation that notwithstanding the terms of the Credit Agreement or other related Credit Document (as defined in the Credit Agreement), Dynegy may incur the Tranche C Term Loan and the Incremental Tranche B Revolver without regard to the satisfaction of the Incremental Ratio Tests and no default or event of default will occur as a result of any breach of the Incremental Ratio Tests.

Upon the Escrow Release Date, the Credit Agreement will be comprised of (i) an \$800 million, seven-year Tranche B-2 Term Loan, (ii) a \$2.0 billion, seven-year Tranche C Term Loan, and (iii) a \$1.5 billion Revolving Facility consisting of three tranches of revolving commitments including: (a) a \$475 million tranche which will mature on April 23, 2018, (b) a \$350 million tranche which will mature April 1, 2020, and (c) a \$675 million tranche, which includes the Incremental Tranche B Revolver and will mature on April 2, 2020.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

Interest Rate Swaps. During 2013, we amended our interest rate swaps to more closely match the terms of our Tranche B-2 Term Loan. The swaps have an aggregate notional value of approximately \$773 million at an average fixed rate of 3.19 percent with a floor of one percent, and expire during the second quarter of 2020. In lieu of paying the breakage fees related to terminating the old swaps and issuing the new swaps, the costs were incorporated into the terms of the new swaps. As a result, any cash flows related to the settlement of the swaps are reflected as a financing activity in our unaudited consolidated statements of cash flows.

Letter of Credit Facilities

On January 29, 2014, Illinois Power Marketing Company ("IPM") entered into a fully cash collateralized LC and Reimbursement Agreement with an issuing bank, as amended on May 16, 2014 ("LC Agreement"), pursuant to which the issuing bank agreed to issue from time to time, one or more standby LCs in an aggregate stated amount not to exceed \$25 million at any one time to support performance obligations and other general corporate activities of IPM, provided that IPM deposits in an account controlled by the issuing bank an amount of cash sufficient to cover the face value of such requested LC plus an additional percentage. As of June 30, 2016, IPM had \$14 million deposited with the issuing bank and \$13 million in LCs outstanding.

On September 18, 2014, Dynegy entered into an LC Reimbursement Agreement with an issuing bank, and its affiliate (the "Lender"), for an LC in an amount not to exceed \$55 million. The facility expires in September 2016. At June 30, 2016, there was \$55 million outstanding under this LC.

On March 27, 2015, IPM entered into an LC facility with the Lender for up to \$25 million. The facility, which is collateralized by Illinois Power Resources Generating, LLC ("IPRG") receivables, has a two-year tenor and may be extended if agreed to by both parties for one additional year. Interest on the facility is LIBOR plus 500 basis points on issued LCs. At June 30, 2016, there was \$14 million outstanding under this LC facility.

On February 24, 2016, Dynegy entered into a bilateral letter of credit facility commitment letter with an issuing bank for \$50 million, which is contingent upon the closing of the Delta Transaction.

Forward Capacity Agreement

On March 18, 2016, we entered into a bilateral contract with a financial institution to sell a portion of our forward cleared PJM capacity auction volumes. In exchange, we received \$198 million in cash proceeds during the first quarter of 2016. The buyer in this transaction will receive capacity payments from PJM during the Planning Years 2017-2018 and 2018-2019 in the amounts of \$110 million and \$109 million, respectively. Dynegy will continue to be subject to the performance obligations as well as any associated performance penalties and bonus payments for those planning years. The transaction is accounted for as a debt issuance of \$219 million with an implied interest rate of 4.45 percent. As of June 30, 2016, there was \$201 million, in aggregate, outstanding under these agreements. Inventory Financing Agreements

Brayton Point Inventory Financing. In connection with the EquiPower Acquisition, we assumed an inventory financing agreement (the "Inventory Financing Agreement") for coal and fuel oil inventories at our Brayton Point facility, consisting of a debt obligation for existing and subsequent inventories, as well as a \$15 million line of credit. Balances in excess of the \$15 million line of credit are cash collateralized.

As the materials are purchased and delivered to our facilities, our debt obligation and line of credit increase based on the then market rate of the materials, transportation costs, and other expenses. The debt obligation increases for 85 percent of the total cost of the coal and for 90 percent of the total cost of the fuel oil. The line of credit increases for the remaining 15 percent and 10 percent for coal and oil costs, respectively. We repay the debt obligation and line of credit from revenues received, at the then market price, for the amount of the materials consumed, on a weekly basis. As of June 30, 2016, there was \$57 million outstanding under this agreement. Both the debt obligation related to coal and the base level of fuel oil, as well as the line of credit, bear interest at an annual interest rate of the 3-month LIBOR plus 5.6 percent. An availability fee is calculated on a per annum rate of 0.75 percent. Additionally, we had collateral postings of approximately \$8 million. The Inventory Financing Agreement terminates, and the remaining obligation, if any, becomes due and payable, on May 31, 2017.

Emissions Repurchase Agreements. On August 14, 2015, we entered into a repurchase transaction with a third party in which we sold approximately \$58 million of RGGI inventory and received cash. We are obligated to repurchase a portion of the inventory in February 2017 and the remaining inventory in February 2018 at a specified price with an annualized carry cost of approximately 3.56 percent. On August 20, 2015, we entered into an additional repurchase transaction with a third party in which

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

we sold \$20 million of RGGI inventory and received cash. We are obligated to repurchase the additional RGGI inventory in February 2017 at a specified price with an annualized carry cost of approximately 3.31 percent. As of June 30, 2016, there was \$78 million, in aggregate, outstanding under these agreements. Amortizing Notes

On June 21, 2016, in connection with the issuance of the TEUs, Dynegy issued the Amortizing Notes with a principal amount of approximately \$87 million. The Amortizing Notes mature on July 1, 2019. Each installment payment of \$1.75 (or, in the case of the installment payment due on October 1, 2016, \$1.94) per Amortizing Note will be paid in cash and will constitute a partial repayment of principal and a payment of interest, computed at an annual rate of 7 percent. Interest will be calculated on the basis of a 360 day year consisting of twelve 30 day months. Payments will be applied first to the interest due and payable and then to the reduction of the unpaid principal amount, allocated as set forth in the Indenture. Please read Note 12-Tangible Equity Units for further information on the TEUs. The Indenture limits, among other things, the ability of Dynegy to consolidate, merge, sell, or dispose all or substantially all of its assets. If a fundamental change occurs, or if Dynegy elects to settle the SPCs early or to redeem the SPCs in connection with a termination of the Delta Stock Purchase Agreement, then the holders of the Amortizing Notes will have the right to require Dynegy to repurchase the Amortizing Notes at a repurchase price equal to the principal amount of the Amortizing Notes as of the repurchase date (as described in the supplemental indenture) plus accrued and unpaid interest. The Indenture also contains customary events of default which would permit the holders of the Amortizing Notes to declare those Amortizing Notes to be immediately due and payable if not cured within applicable grace periods, including the failure to make timely installment payments on the Amortizing Notes or other material indebtedness, the failure to satisfy covenants, and specified events of bankruptcy and insolvency.

Dynegy Senior Notes

As of June 30, 2016, we had \$5.6 billion in senior notes that consisted of (i) \$2.1 billion, 6.75 percent senior notes, due 2019, (ii) \$1.75 billion, 7.375 percent senior notes, due 2022, (iii) \$500 million, 5.875 percent senior notes, due 2023, and (iv) \$1.25 billion, 7.625 percent senior notes, due 2024 (collectively, the "Senior Notes"). Equipment Financing Agreements

Under certain of our contractual service agreements in which we receive maintenance and capital improvements for our gas-fueled generation fleet, we have obtained parts and equipment intended to increase the output, efficiency, and availability of our generation units. We have financed these parts and equipment under agreements with maturities ranging from 2017 to 2025. The portion of future payments attributable to principal will be classified as cash outflows from financing activities, and the portion of future payments attributable to interest will be classified as cash outflows from operating activities in our unaudited consolidated statements of cash flows. As of June 30, 2016, there was \$88 million outstanding under these agreements. The related assets were recorded at the net present value of the payments of \$66 million. The \$22 million discount is currently amortized as interest expense over the life of the payments. Genco Senior Notes

Genco's approximately \$825 million in aggregate principal amount of unsecured senior notes (the "Genco Senior Notes") are an obligation of Genco, a subsidiary of IPH. IPH and its direct and indirect subsidiaries are organized into ring-fenced groups in order to maintain corporate separateness from Dynegy and its other subsidiaries. The Genco Senior Notes are non-recourse to Dynegy. Please read Note 1—Basis of Presentation and Organization for further discussion.

Genco's indenture includes provisions that require Genco to maintain certain interest coverage and debt-to-capital ratios in order for Genco to pay dividends, to make principal or interest payments on subordinated borrowings, to make loans to or investments in affiliates, or to incur additional external, third-party indebtedness. Genco's debt incurrence-related ratio restrictions under the indenture may be disregarded if both Moody's and S&P reaffirm the ratings in place at the time of the debt incurrence after considering the additional indebtedness.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

The following table summarizes these required ratios:

	Required Ratio
Restricted payment interest coverage ratio (1)	≥1.75
Additional indebtedness interest coverage ratio (2)	≥2.50
Additional indebtedness debt-to-capital ratio (2)	≤60%

As of the date of a restricted payment, as defined, the minimum ratio must have been achieved for the most (1)recently ended four fiscal quarters and projected by management to be achieved for each of the subsequent four six-month periods.

Ratios must be computed on a pro forma basis considering the additional indebtedness to be incurred and the (2)related interest expense. Other borrowings from external, third-party sources are included in the definition of indebtedness and are subject to these incurrence tests.

Based on June 30, 2016 calculations, Genco did not meet the ratios required for Genco to pay dividends and borrow additional funds from external, third-party sources.

As a result of continued weak energy prices, unsold capacity volumes, on-going required maintenance and environmental expenditures, upcoming interest payments, as well as consideration of a \$300 million debt maturity in 2018, Dynegy and Genco have each engaged their own advisors and have begun strategic reviews of IPH's Genco subsidiary. While Genco's projected future cash flow is sufficient to cover its obligations through December 31, 2016, it may not have sufficient future operating cash flow to satisfy its debt maturity in 2018, absent a debt refinancing or restructuring. Actions to resolve this situation could include one or more of the following: (i) restructuring the Genco debt to achieve a more sustainable business model; (ii) transitioning ownership of Genco's assets to its debt holders; (iii) deferring discretionary capital expenditures to the extent possible; (iv) continued shut down of uneconomic generation; and/or (v) seeking bankruptcy protection.

Note 14-Commitments and Contingencies

Legal Proceedings

Set forth below is a summary of our material ongoing legal proceedings. We record accruals for estimated losses from contingencies when available information indicates that a loss is probable and the amount of the loss, or range of loss, can be reasonably estimated. In addition, we disclose matters for which management believes a material loss is reasonably possible. In all instances, management has assessed the matters below based on current information and made judgments concerning their potential outcome, giving consideration to the nature of the claim, the amount, if any, the nature of damages sought, and the probability of success. Management regularly reviews all new information with respect to such contingencies and adjusts its assessments and estimates of such contingencies accordingly. Because litigation is subject to inherent uncertainties including unfavorable rulings or developments, it is possible that the ultimate resolution of our legal proceedings could involve amounts that are different from our currently recorded accruals, and that such differences could be material.

In addition to the matters discussed below, we are party to other routine proceedings arising in the ordinary course of business. Any accruals or estimated losses related to these matters are not material. In management's judgment, the ultimate resolution of these matters will not have a material effect on our financial condition, results of operations, or cash flows.

Gas Index Pricing Litigation. We, through our subsidiaries, and other energy companies are named as defendants in several lawsuits claiming damages resulting from alleged price manipulation and false reporting of natural gas prices to various index publications from 2000-2002. The cases allege that the defendants engaged in an antitrust conspiracy to inflate natural gas prices in three states (Kansas, Missouri, and Wisconsin) during the relevant time period. The cases are consolidated in a multi-district litigation proceeding pending in the United States District Court for Nevada. At this time we cannot reasonably estimate a potential loss.

Illinova Generating Company Arbitration. In May 2007, our subsidiary Illinova Generating Company ("IGC") received an adverse award in an arbitration brought by Ponderosa Pine Energy, LLC ("PPE"). The award required IGC to pay PPE \$17 million, which IGC paid in June 2007 under protest while simultaneously seeking to vacate the award. On May 23, 2014, the Texas Supreme Court vacated the arbitration award based upon the evident partiality of one of the arbitrators. On November 20, 2014, PPE initiated a new arbitration against IGC and its co-respondents, but the Dallas District Court enjoined the arbitration from proceeding against IGC while any dispute over IGC's \$17 million payment remains pending. On December 16, 2014, the Dallas District Court entered a judgment requiring the return of the \$17 million to IGC and an additional \$2.5 million payment to

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

IGC for interest. PPE paid the \$17 million principal to IGC (not the \$2.5 million in interest), but simultaneously appealed the judgment. On July 14, 2016, the Dallas Court of Appeals affirmed the judgment. The case remains subject to potential appeal to the Texas Supreme Court.

Other Contingencies

MISO 2015-2016 Planning Resource Auction. In May 2015, three complaints were filed at FERC regarding the Zone 4 results for the 2015-2016 Planning Resource Auction ("PRA") conducted by MISO. Dynegy is a named party in one of the complaints. The complainants, Public Citizen, Inc., the Illinois Attorney General, and Southwestern Electric Cooperative, Inc., have challenged the results of the PRA as unjust and unreasonable, requested rate relief/refunds, and requested changes to the MISO PRA structure going forward. Complainants have also alleged that Dynegy may have engaged in economic or physical withholding in Zone 4 constituting market manipulation in the 2015-2016 PRA. The Independent Market Monitor for MISO ("MISO IMM"), which was responsible for monitoring the MISO 2015-2016 PRA, determined that all offers were competitive and that no physical or economic withholding occurred. The MISO IMM also stated, in a filing responding to the complaints, that there is no basis for the proposed remedies. We filed our Answer to these complaints and believe that we complied fully with the terms of the MISO tariff in connection with the 2015-2016 PRA, disputed the allegations, and will defend our actions vigorously. In addition, the Illinois Industrial Energy Consumers filed a complaint at FERC against MISO on June 30, 2015 requesting prospective changes to the MISO tariff. Dynegy also responded to this complaint.

On October 1, 2015, FERC issued an order of non-public, formal investigation, stating that shortly after the conclusion of the 2015-2016 PRA, FERC's Office of Enforcement began a non-public informal investigation into whether market manipulation or other potential violations of FERC orders, rules, and regulations occurred before or during the PRA (the "Order"). The Order noted that the investigation is ongoing, and that the order converting the informal, non-public investigation to a formal, non-public investigation does not indicate that FERC has determined that any entity has engaged in market manipulation or otherwise violated any FERC order, rule, or regulation. Further, FERC held a Staff-led technical conference on October 20, 2015 to obtain further information concerning potential changes to the MISO PRA structure going forward, including proposals made by complainants. The technical conference did not address the ongoing Office of Enforcement investigation.

On December 31, 2015, FERC issued an order on the complaints requiring a number of prospective changes to the MISO tariff provisions associated with calculating Initial Reference Levels and Local Clearing Requirements, effective as of the 2016-2017 PRA. Under the order, FERC found that the existing tariff provision which bases Initial Reference Levels for capacity supply offers on the estimated opportunity cost of exporting capacity to a neighboring region (for example, PJM) are no longer just and reasonable. Accordingly, FERC required MISO to set the Initial Reference Level for capacity at \$0 per MW-day for the 2016-2017 PRA. Capacity suppliers may also request a facility-specific reference level from the MISO IMM. The order did not address the arguments of the complainants regarding the 2015-2016 PRA, and stated that those issues remain under consideration and will be addressed in a future order.

New Source Review and CAA Matters.

New Source Review. Since 1999, the EPA has been engaged in a nationwide enforcement initiative to determine whether coal-fired power plants failed to comply with the requirements of the New Source Review and New Source Performance Standard provisions under the CAA when the plants implemented modifications. The EPA's initiative focuses on whether projects performed at power plants triggered various permitting requirements, including the need to install pollution control equipment.

In August 2012, the EPA issued a Notice of Violation ("NOV") alleging that projects performed in 1997, 2006, and 2007 at the Newton facility violated Prevention of Significant Deterioration, Title V permitting, and other requirements. The NOV remains unresolved. We believe our defenses to the allegations described in the NOV are meritorious. A decision by the U.S. Court of Appeals for the Seventh Circuit in 2013 held that similar claims older than five years were barred by the statute of limitations. If not overturned, this decision may provide an additional

defense to the allegations in the Newton facility NOV.

Wood River CAA Section 114 Information Request. In 2014, we received an information request from the EPA concerning our Wood River facility's compliance with the Illinois State Implementation Plan ("SIP") and associated permits. We responded to the EPA's request and believe that there are no issues with Wood River's compliance, but we are unable to predict the EPA's response, if any. As of June 1, 2016, our Wood River facility has been retired. CAA Notices of Violation. In December 2014, the EPA issued an NOV alleging violation of opacity standards at the Zimmer facility, which we co-own and operate. The EPA previously had issued NOVs to Zimmer in 2008 and 2010 alleging violations of the CAA, the Ohio SIP, and the station's air permits involving standards applicable to opacity, sulfur dioxide, sulfuric

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

acid mist, and heat input. The NOVs remain unresolved. In December 2014, the EPA also issued NOVs alleging violations of opacity standards at the Stuart and Killen facilities, which we co-own but do not operate. Edwards CAA Citizen Suit. In April 2013, environmental groups filed a CAA citizen suit in the U.S. District Court for the Central District of Illinois alleging violations of opacity and particulate matter limits at our IPH segment's Edwards facility. The District Court has scheduled the trial date for February 2017. We dispute the allegations and will defend the case vigorously.

Ultimate resolution of any of these CAA matters could have a material adverse impact on our future financial condition, results of operations, and cash flows. A resolution could result in increased capital expenditures for the installation of pollution control equipment, increased operations and maintenance expenses, and penalties. At this time we are unable to make a reasonable estimate of the possible costs, or range of costs, that might be incurred to resolve these matters.

Stuart National Pollutant Discharge Elimination System ("NPDES") Permit Appeal. In January 2013, the Ohio EPA reissued the NPDES permit for the co-owned Stuart facility. The operator of Stuart, The Dayton Power and Light Company, appealed various aspects of the permit, including provisions regarding thermal discharge limitations, to the Ohio Environmental Review Appeals Commission. Depending on the outcome of the appeal, the effects on Stuart's operations could be material. At this time we are unable to make a reasonable estimate of the possible costs, or range of costs, that might be incurred to resolve this matter.

Coal Segment Groundwater. In 2012, the Illinois EPA issued violation notices alleging violations of groundwater standards onsite at our Baldwin and Vermilion facilities.

At Baldwin, with approval of the Illinois EPA, we performed a comprehensive evaluation of the Baldwin Coal Combustion Residuals ("CCR") surface impoundment system beginning in 2013. Based on the results of that evaluation, we recommended to the Illinois EPA in 2014 that the closure process for the inactive east CCR surface impoundment begin and that a geotechnical investigation of the existing soil cap on the inactive old east CCR surface impoundment be undertaken. We also submitted a supplemental groundwater modeling report that indicates no known offsite water supply wells will be impacted under the various Baldwin CCR surface impoundment closure scenarios modeled. In April 2016, we submitted closure and post-closure care plans to the Illinois EPA for the Baldwin old east, east, and west fly ash CCR surface impoundments. We await Illinois EPA action on our plans.

We initiated an investigation at Baldwin in 2011 at the request of the Illinois EPA to determine if the facility's CCR surface impoundment system impacts offsite groundwater. Results of the offsite groundwater quality investigation, as submitted to the Illinois EPA in 2012, indicate two localized areas where Class I groundwater standards were exceeded. Based on the data and groundwater flows, we do not believe that the exceedances are attributable to the Baldwin CCR surface impoundment system.

At our retired Vermilion facility, which is not subject to the CCR rule, we submitted proposed corrective action plans for two CCR surface impoundments (i.e., the old east and the north CCR surface impoundments) to the Illinois EPA in 2012. Our hydrogeologic investigation indicates that these two CCR surface impoundments impact groundwater quality onsite and that such groundwater migrates offsite to the north of the property and to the adjacent Middle Fork of the Vermilion River. The proposed corrective action plans recommend closure in place of both CCR surface impoundments and include an application to the Illinois EPA to establish a groundwater management zone while impacts from the facility are mitigated. In 2014, we submitted a revised corrective action plans for the old east CCR surface impoundment. We await Illinois EPA action on our proposed corrective action plans. In June 2015, we advised the Illinois EPA that the additional analyses requested by the Agency would be performed upon receipt of a riverbank stabilization permit from the U.S. Army Corps of Engineers. Our estimated cost of the recommended closure alternative for both the Vermilion old east and north CCR surface impoundments, including post-closure care, is approximately \$10 million.

If remediation measures concerning groundwater are necessary in the future at either Baldwin or Vermilion, we may incur significant costs that could have a material adverse effect on our financial condition, results of operations, and

cash flows. At this time we cannot reasonably estimate the costs, or range of costs, of remediation, if any, that ultimately may be required.

IPH Segment Groundwater. Groundwater monitoring results indicate that the CCR surface impoundments at each of the IPH segment facilities potentially impact onsite groundwater. In 2012, the Illinois EPA issued violation notices alleging violations of groundwater standards at the Newton and Coffeen facilities' CCR surface impoundments. In April 2015, we submitted an assessment monitoring report to the Illinois EPA concerning previously reported groundwater quality standard exceedances at the Newton facility's active CCR landfill. The report identifies the Newton facility's inactive unlined landfill as the likely source of the exceedances and recommends various measures to minimize the effects of that source on the groundwater monitoring results of the active landfill. We await Illinois EPA final action on the report.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

If remediation measures concerning groundwater are necessary at any of our IPH facilities, IPH may incur significant costs that could have a material adverse effect on its financial condition, results of operations, and cash flows. At this time we cannot reasonably estimate the costs, or range of costs, of remediation, if any, that ultimately may be required.

Dam Safety Assessment Reports. In response to the failure at the Tennessee Valley Authority's Kingston plant, the EPA initiated a nationwide investigation of the structural integrity of CCR surface impoundments in 2009. The EPA assessments found all of our surface impoundments to be in satisfactory or fair condition, with the exception of the surface impoundments at the Baldwin and Hennepin facilities.

In response to the Hennepin report, we made capital improvements to the Hennepin east CCR surface impoundment berms and notified the EPA of our intent to close the Hennepin west CCR surface impoundment. The preliminary estimated cost for closure of the west CCR surface impoundment, including post-closure monitoring, is approximately \$5 million, which is reflected in our AROs. We performed further studies needed to support closure of the west CCR surface impoundment, submitted those studies to the Illinois EPA in 2014, and await Illinois EPA action. In response to the Baldwin report, we notified the EPA in 2013 of our action plan, which included implementation of recommended operating practices and certain recommended studies. In 2014, we updated the EPA on the status of our Baldwin action plan, including the completion of certain studies and implementation of remedial measures and our ongoing evaluation of potential long-term measures in the context of our concurrent evaluation at Baldwin of groundwater corrective actions. At this time, to resolve the concerns raised in the EPA's assessment report and as a result of the CCR rule, we plan to initiate closure of the Baldwin west fly ash CCR surface impoundment in 2017, which is reflected in our AROs.

Other Commitments

In conducting our operations, we have routinely entered into long-term commodity purchase and sale commitments, as well as agreements that commit future cash flow to the lease or acquisition of assets used in our businesses. These commitments have been typically associated with commodity supply arrangements, capital projects, reservation charges associated with firm transmission, transportation, storage and leases for office space, equipment, design and construction, plant sites, and power generation assets.

Indemnifications and Guarantees

In the ordinary course of business, we routinely enter into contractual agreements that contain various representations, warranties, indemnifications, and guarantees. Examples of such agreements include, but are not limited to, service agreements, equipment purchase agreements, engineering and technical service agreements, asset sales agreements, and procurement and construction contracts. Some agreements contain indemnities that cover the other party's negligence or limit the other party's liability with respect to third party claims, in which event we will effectively be indemnifying the other party. Virtually all such agreements contain representations or warranties that are covered by indemnifications against the losses incurred by the other parties in the event such representations and warranties are false. While there is always the possibility of a loss related to such representations, warranties, indemnifications, and guarantees in our contractual agreements, and such loss could be significant, in most cases management considers the probability of loss to be remote. We have accrued no amounts with respect to the indemnifications as of June 30, 2016 because none were probable of occurring, nor could they be reasonably estimated.

Delta Transaction Guarantee. In connection with the Delta Stock Purchase Agreement executed on June 27, 2016, Dynegy entered into a guarantee agreement under which Dynegy has agreed to guarantee 100 percent of the Purchaser's obligation to pay the reverse termination fee of \$132 million if such fee becomes payable under the terms and conditions of the Delta Stock Purchase Agreement.

Note 15—Income Taxes

We compute our quarterly taxes under the effective tax rate method based on applying an anticipated annual effective rate to our year-to-date income or loss, except for significant, unusual, or extraordinary transactions. Income taxes for significant, unusual, or extraordinary transactions are computed and recorded in the period that the specific transaction

occurs.

For the three and six months ended June 30, 2016, we recorded a tax benefit of \$3 million for the additional release of our valuation allowance as a result of increased net deferred tax liabilities related to the final purchase price allocation for the EquiPower Acquisition. In addition, we recorded a tax benefit of \$4 million and \$4 million for the application of our effective state tax rates for jurisdictions for which we do not record a valuation allowance and a \$2 million state tax benefit and a \$14 million state tax expense as a result of a change to our corporate tax structure for the three and six months ended June 30, 2016, respectively.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

For the three and six months ended June 30, 2015, we released \$480 million of our valuation allowance as a result of increased net deferred tax liabilities related to the EquiPower Acquisition. In addition, we recorded a tax benefit of \$21 million for discreet items, including a state law change in Connecticut and the application of our effective state tax rates for jurisdictions for which we do not record a valuation allowance.

As of June 30, 2016, we continued to maintain a valuation allowance against our net deferred tax assets in each jurisdiction as they arise as there was not sufficient evidence to overcome our historical cumulative losses to conclude that it is more-likely-than-not our net deferred tax assets can be realized in the future.

Note 16-Pension and Other Post-Employment Benefit Plans

We sponsor and administer defined benefit plans and defined contribution plans for the benefit of our employees and also provide other post-employment benefits to retirees who meet age and service requirements, which are further described in Note 18—Employee Compensation, Savings, Pension and Other Post-Employment Benefit Plans in our Form 10-K.

In the second quarter of 2015, upon the close of the Duke Midwest Acquisition, we assumed certain benefit plan obligations and the associated plan assets were transferred to us. As a result, we increased our net liability by approximately \$13 million. These benefit plan obligations and related plan assets were merged into our pension and other post-employment benefit plans. The Duke employees began participating in our plans upon acquisition, which as a result triggered a re-measurement of our plans. As a result of the re-measurements, we recorded a loss through other comprehensive income and increased our net liability by approximately \$5 million during the second quarter of 2015. Components of Net Periodic Benefit Cost (Gain). The components of net periodic benefit cost (gain) were as follows:

	Pension	Other
	Benefits	Benefits
	Three Mor	nths Ended
	June 30,	
(amounts in millions)	20162015	2016 2015
Service cost benefits earned during period	\$4 \$4	\$ \$
Interest cost on projected benefit obligation	5 5	1 1
Expected return on plan assets	(6)(6)	(1)(1)
Amortization of prior service credit	— (1)	(1) —
Net periodic benefit cost (gain)	\$3 \$2	\$(1) \$ —
	Pension	Other
	Benefits	Benefits
	Six Month	s Ended
	June 30,	
(amounts in millions)	20162015	2016 2015
Service cost benefits earned during period	\$8 \$7	\$ \$
Interest cost on projected benefit obligation	10 9	2 2
Expected return on plan assets	(12) (11)	(2)(2)
Amortization of prior service credit	— (1)	(2)(1)
Net periodic benefit cost (gain)	\$6 \$4	\$(2) \$(1)
Note 17—Capital Stock		

Dividends

We pay quarterly dividends on our Mandatory Convertible Preferred Stock on February 1, May 1, August 1, and November 1 of each year, if declared by our Board of Directors. For the three months ended June 30, 2016 and 2015, we paid \$5 million in dividends on May 2, 2016 and May 1, 2015, respectively. For the six months ended June 30, 2016 and 2015, we paid an aggregate of \$11 million and \$12 million in dividends, respectively.

On July 1, 2016, our Board of Directors declared a dividend on our Mandatory Convertible Preferred Stock of \$1.34 per share, or approximately \$5 million in the aggregate. The dividend is for the dividend period beginning on May 1, 2016 and ending on July 31, 2016. Such dividends were paid on August 1, 2016 to stockholders of record as of July 15, 2016.

DYNEGY INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) For the Interim Periods Ended June 30, 2016 and 2015

TEUs

On June 21, 2016, pursuant to a registered public offering, we issued 4.6 million, 7 percent TEUs at \$100 per unit. Each TEU is comprised of a prepaid stock purchase contract and an amortizing note which are accounted for as separate instruments. Please read Note 12—Tangible Equity Units for further discussion.

Note 18-Earnings (Loss) Per Share

Basic earnings (loss) per share is based on the weighted average number of common shares outstanding during the period. Diluted earnings (loss) is based on the weighted average number of common shares used for the basic earnings (loss) per share computation, adjusted for the incremental issuance of shares of common stock assuming (i) our stock options and warrants are exercised, (ii) our restricted stock units and performance stock units are fully vested under the treasury stock method, and (iii) our mandatory convertible preferred stock and the SPCs are converted into common stock under the if-converted method. Please read Note 17—Capital Stock in our Form 10-K and Note 12—Tangible Equity Units for further discussion.

The basic and diluted earnings (loss) per share from continuing operations attributable to our common stockholders during the three and six months ended June 30, 2016 and 2015 is shown in the following table:

	Three	Months	Six Mo	nths
	Ended	June	Ended.	June
	30,		30,	
(in millions, except per share amounts)	2016	2015	2016	2015
Income (loss) from continuing operations	\$(803)	\$386	\$(813)	\$205
Less: Net loss attributable to noncontrolling interest	(2) (2)	(2)	(3)
Income (loss) from continuing operations attributable to Dynegy Inc.	(801) 388	(811)	208
Less: Dividends on preferred stock	6	6	11	11
Income (loss) from continuing operations attributable to Dynegy Inc. common stockholders for basic earnings (loss) per share	(807) 382	(822)	197
Add: Dividends on preferred stock (1)		6		11
Adjusted income (loss) from continuing operations attributable to Dynegy Inc. common stockholders for diluted earnings (loss) per share	\$(807) \$388	\$(822)	\$208
Basic weighted-average shares (2) Effect of dilutive securities (3)	120	128 14	118	126
