Notes to Consolidated Financial Statements (Unaudited)

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation - The consolidated financial statements include the accounts of Capitol Federal® Financial, Inc. (the "Company") and its wholly-owned subsidiary, Capitol Federal Savings Bank (the "Bank"). The Bank has a wholly-owned subsidiary, Capitol Funds, Inc. Capitol Funds, Inc. has a wholly-owned subsidiary, Capitol Federal Mortgage Reinsurance Company. All intercompany accounts and transactions have been eliminated in consolidation. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015, filed with the Securities and Exchange Commission ("SEC"). Interim results are not necessarily indicative of results for a full year.

Recent Accounting Pronouncements - In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, Revenue from Contracts with Customers. The ASU, as amended, clarifies principles for recognizing revenue and provides a common revenue standard for GAAP and International Financial Reporting Standards. Additionally, the ASU provides implementation guidance on several topics and requires entities to disclose both quantitative and qualitative information regarding contracts with customers. ASU 2014-09 is effective for fiscal years beginning after December 15, 2017, including interim reporting periods within that reporting period, which is October 1, 2018 for the Company. Early adoption is permitted only as of annual reporting periods beginning after December 15, 2016. The Company has not yet completed its evaluation of ASU 2014-09.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments, Recognition and Measurement of Financial Assets and Liabilities. The ASU supersedes certain accounting guidance related to equity securities with readily determinable fair values and the related impairment assessment. An entity's equity investments that are accounted for under the equity method of accounting or result in consolidation of an investee are not included within the scope of this ASU. The ASU requires public business entities to utilize the exit price notation in determining fair value for financial instruments measured at amortized cost on the balance sheet. The ASU requires additional reporting in other comprehensive income for financial liabilities measured at fair value in accordance with the fair value option. The ASU also requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balances or in the notes to the financial statements. ASU 2016-01 is effective for fiscal years beginning after December 15, 2017, including interim periods with those fiscal years, which is October 1, 2018 for the Company. Early adoption is not permitted except in certain circumstances. The Company has not yet completed its evaluation of ASU 2016-01.

In February 2016, the FASB issued ASU 2016-02, Leases. The ASU amends lease accounting guidance by requiring that lessees recognize the assets and liabilities arising from leases on the balance sheet. Additionally, the ASU requires entities to disclose both quantitative and qualitative information regarding their leasing activities. ASU 2016-02 is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years, which is October 1, 2019 for the Company. Early adoption is permitted. The Company has not yet completed its evaluation of ASU 2016-02.

In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation: Improvements to Employee Share-Based Payment Accounting. The ASU simplifies several aspects of the accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, along with simplifying the classification in the statement of cash flows. The ASU is effective for annual
reporting periods beginning after December 15, 2016, including interim periods within those annual reporting periods, which is October 1, 2017 for the Company. The Company has not yet completed its evaluation of ASU 2016-09.

9

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments. The ASU replaces the incurred loss impairment methodology in current GAAP, which requires credit losses to be recognized when it is probable that a loss has incurred, with a new impairment methodology. The new impairment methodology requires an entity to measure, at each reporting date, the expected credit losses of financial assets not measured at fair value, such as loans, HTM debt securities, and loan commitments, over their contractual lives. Under the new impairment methodology, expected credit losses will be measured at each reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Additionally, the ASU amends the current credit loss measurements for AFS debt securities. Credit losses related to AFS debt securities will be recorded through the ACL rather than as a direct write-down as per current GAAP. The ASU also requires enhanced disclosures related to credit quality and significant estimates and judgments used by management when estimating credit losses. The ASU is effective for annual reporting periods beginning after December 15, 2019, including interim periods within those annual reporting periods, which is October 1, 2020 for the Company. Early adoption is permitted for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company has not yet completed its evaluation of ASU 2016-13.

## 2. EARNINGS PER SHARE

Shares acquired by the ESOP are not considered in the basic average shares outstanding until the shares are committed for allocation or vested to an employee's individual account. Unvested shares awarded pursuant to the Company's restricted stock benefit plans are treated as participating securities in the computation of EPS pursuant to the two-class method as they contain nonforfeitable rights to dividends. The two-class method is an earnings allocation that determines EPS for each class of common stock and participating security.

The unrealized losses at June 30, 2016 and September 30, 2015 were primarily a result of an increase in market yields from the time the securities were purchased. In general, as market yields rise, the fair value of securities will decrease; as market yields fall, the fair value of securities will increase. Management generally views changes in fair value caused by changes in interest rates as temporary; therefore, these securities have not been classified as other-than-temporarily impaired. The impairment is also considered temporary because scheduled coupon payments have been made, it is anticipated that the entire principal balance will be collected as scheduled, and management neither intends to sell the securities, nor is it more likely than not that the Company will be required to sell the securities before the recovery of the remaining amortized cost amount, which could be at maturity. As a result of the analysis, management has concluded that no other-than-temporary impairments existed at June 30, 2016 or September 30, 2015.

The amortized cost and estimated fair value of debt securities as of June 30, 2016, by contractual maturity, are shown below. Actual principal repayments may differ from contractual maturities due to prepayment or early call privileges by the issuer. In the case of MBS, borrowers on the underlying loans generally have the right to prepay their loans without prepayment penalty. For this reason, MBS are not included in the maturity categories.

Lending Practices and Underwriting Standards - Originating and purchasing one- to four-family loans is the Bank's primary lending business, resulting in a loan concentration in residential first mortgage loans. The Bank purchases one- to four-family loans, on a loan-by-loan basis, from a select group of correspondent lenders. As a result of our one- to four-family lending activities, the Bank has a concentration of loans secured by real property located in Kansas and Missouri. The Bank also originates consumer loans and commercial real estate loans and participates in commercial real estate loans.

One- to four-family loans - Full documentation to support an applicant's credit and income, and sufficient funds to cover all applicable fees and reserves at closing, are required on all loans. Loans are underwritten according to the "ability to repay" and "qualified mortgage" standards, as issued by the Consumer Financial Protection Bureau ("CFPB"). Properties securing one- to four-family loans are appraised by either staff appraisers or fee appraisers, both of which are independent of the loan origination function and approved by our Board of Directors.

The underwriting standards for loans purchased from correspondent and nationwide lenders are generally similar to the Bank's internal underwriting standards. The underwriting of loans purchased from correspondent lenders on a loan-by-loan basis is performed by the Bank's underwriters. For the tables within this Note, correspondent loans purchased on a loan-by-loan basis are included with originated loans and loans purchased in loan packages ("bulk
loans") are reported as purchased loans.
The Bank also originates construction-to-permanent loans secured by one- to four-family residential real estate. Construction loans are obtained by homeowners who will occupy the property when construction is complete. Construction loans to builders for

14
speculative purposes are not permitted. All construction loans are manually underwritten using the Bank's internal underwriting standards. Construction draw requests and the supporting documentation are reviewed and approved by designated personnel. The Bank also performs regular documented inspections of the construction project to ensure the funds are being used for the intended purpose and the project is being completed according to the plans and specifications provided.

Commercial real estate loans - The Bank's commercial real estate loans are originated by the Bank or are in participation with a lead bank. These loans are underwritten based on the income producing potential of the property, the collateral value, and the financial strength of the borrower. Additionally, the Bank generally requires personal guarantees. At the time of origination, loan-to-value ("LTV") ratios on commercial real estate loans generally do not exceed $80 \%$ of the appraised value of the property securing the loans and the minimum debt service coverage ratio is generally 1.25 . Appraisals on properties securing these loans are performed by independent state certified fee appraisers.

Consumer loans - The Bank offers a variety of secured consumer loans, including home equity loans and lines of credit, home improvement loans, auto loans, and loans secured by savings deposits. The Bank also originates a very limited amount of unsecured loans. The Bank does not originate any consumer loans on an indirect basis, such as contracts purchased from retailers of goods or services which have extended credit to their customers. The majority of the consumer loan portfolio is comprised of home equity lines of credit for which the Bank also has the first mortgage or the home equity line of credit is in the first lien position.

The underwriting standards for consumer loans include a determination of an applicant's payment history on other debts and an assessment of an applicant's ability to meet existing obligations and payments on the proposed loan. Although creditworthiness of an applicant is a primary consideration, the underwriting process also includes a comparison of the value of the security in relation to the proposed loan amount.

Credit Quality Indicators - Based on the Bank's lending emphasis and underwriting standards, management has segmented the loan portfolio into three segments: (1) one- to four-family; (2) consumer; and (3) commercial real estate. The one- to four-family and consumer loan portfolios are further segmented into classes for purposes of providing disaggregated information about the credit quality of the loan portfolio. The classes are: one- to four-family - originated, one- to four-family - purchased, consumer - home equity, and consumer - other.

The Bank's primary credit quality indicators for the one- to four-family and consumer - home equity loan portfolios are delinquency status, asset classifications, LTV ratios, and borrower credit scores. The Bank's primary credit quality indicators for the commercial real estate and consumer - other loan portfolios are delinquency status and asset classifications.

The following tables present the recorded investment, by class, in loans 30 to 89 days delinquent, loans 90 or more days delinquent or in foreclosure, total delinquent loans, current loans, and total recorded investment at the dates presented. The recorded investment in loans is defined as the unpaid principal balance of a loan (net of unadvanced funds related to loans in process), less charge-offs and inclusive of unearned loan fees and deferred costs. At June 30, 2016 and September 30, 2015, all loans 90 or more days delinquent were on nonaccrual status.

The recorded investment of mortgage loans secured by residential real estate properties for which formal foreclosure proceedings were in process as of June 30,2016 was $\$ 5.9$ million, which is included in loans 90 or more days delinquent or in foreclosure in the table above. The carrying value of residential OREO held as a result of obtaining physical possession upon completion of a foreclosure or through completion of a deed in lieu of foreclosure was $\$ 3.1$ million at June 30, 2016.

The following table presents the recorded investment, by class, in loans classified as nonaccrual at the dates presented.

One- to four-family - originated $\$ 18,957 \$ 16,093$
One- to four-family - purchased $8,078 \quad 9,038$
Commercial real estate
Consumer - home equity 699792
Consumer - other 24

In accordance with the Bank's asset classification policy, management regularly reviews the problem loans in the Bank's portfolio to determine whether any loans require classification. Loan classifications are defined as follows:

Special mention - These loans are performing loans on which known information about the collateral pledged or the possible credit problems of the borrower(s) have caused management to have doubts as to the ability of the borrower(s) to comply with present loan repayment terms and which may result in the future inclusion of such loans in the non-performing loan categories.
Substandard - A loan is considered substandard if it is inadequately protected by the current net worth and paying eapacity of the obligor or of the collateral pledged, if any. Substandard loans include those characterized by the distinct possibility the Bank will sustain some loss if the deficiencies are not corrected.
Doubtful - Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses present make collection or liquidation in full on the basis of currently existing facts and conditions and values highly questionable and improbable.
Loss - Loans classified as loss are considered uncollectible and of such little value that their continuance as assets on the books is not warranted.

The following table sets forth the recorded investment in loans classified as special mention or substandard, by class, at the dates presented. Special mention and substandard loans are included in the ACL formula analysis model if the loans are not individually evaluated for loss. Loans classified as doubtful or loss are individually evaluated for loss. At the dates presented, there were no loans classified as doubtful, and all loans classified as loss were fully charged-off.

| $-\$ 12,617$ | $\$ 44,091$ | $\$ 17,676$ | $\$ 43,837$ |

The following table shows the weighted average credit score and weighted average LTV for originated and purchased one- to four-family loans and originated consumer home equity loans at the dates presented. Borrower credit scores are intended to provide an indication as to the likelihood that a borrower will repay their debts. Credit scores are updated at least semiannually, with the last update in March 2016, from a nationally recognized consumer rating agency. The LTV ratios provide an estimate of the extent to which the Bank may incur a loss on any given loan that may go into foreclosure. The consumer - home equity LTV does not take into account the first lien position, if applicable. The LTV ratios were based on the current loan balance and either the lesser of the purchase price or original appraisal, or the most recent Bank appraisal, if available. In most cases, the most recent appraisal was obtained at the time of origination.

June 30, 2016

Troubled Debt Restructurings ("TDRs") - The following tables present the recorded investment prior to restructuring and immediately after restructuring in all loans restructured during the periods presented. These tables do not reflect the recorded investment at the end of the periods indicated. Any increase in the recorded investment at the time of the restructuring was generally due to the capitalization of delinquent interest and/or escrow balances.

## 5. LOW INCOME HOUSING PARTNERSHIPS

The Bank's investment in low income housing partnerships, which is included in other assets in the consolidated balance sheets, was $\$ 49.0$ million and $\$ 41.8$ million at June 30, 2016 and September 30, 2015, respectively. The Bank's obligations related to unfunded commitments, which are included in accounts payable and accrued expenses in the consolidated balance sheets, were $\$ 19.7$ million and $\$ 14.6$ million at June 30, 2016 and September 30, 2015, respectively. The majority of the commitments are projected to be funded through the end of calendar year 2018.

Expenses associated with the Bank's investment in the low income housing partnerships are included in low income housing partnerships in the consolidated statements of income. The low income housing partnership expenses resulted in other tax benefits of $\$ 286$ thousand and $\$ 859$ thousand for the three and nine months ended June 30, 2016, respectively, which are a component of income tax expense in the consolidated statements of income. Affordable housing tax credits are recognized as a component of income tax expense in the consolidated statements of income and totaled $\$ 1.2$ million and $\$ 3.6$ million for the three and nine months ended June 30, 2016, respectively. There were no impairment losses during the three and nine months ended June 30, 2016 resulting from the forfeiture or ineligibility of tax credits or other circumstances.

## 6. REPURCHASE AGREEMENTS

At both June 30, 2016 and September 30, 2015, the Company had repurchase agreements outstanding in the amount of $\$ 200.0$ million with a weighted average contractual rate of $2.94 \%$. All of the Company's repurchase agreements at June 30, 2016 and September 30, 2015 were fixed-rate. See Note 3 for information regarding the amount of securities pledged as collateral in conjunction with repurchase agreements. Securities are delivered to the party with whom each transaction is executed and the party agrees to resell the same securities to the Bank at the maturity of the agreement. The Bank retains the right to substitute similar or like securities throughout the terms of the agreements. The repurchase agreements and collateral are subject to valuation at current market levels and the Bank may ask for the return of excess collateral or be required to post additional collateral due to changes in the market values of these items. The Bank may also be required to post additional collateral as a result of principal payments received on the securities pledged.

The following table presents the scheduled maturity of repurchase agreements by fiscal year as of June 30, 2016:

## 7. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair Value Measurements - The Company uses fair value measurements to record fair value adjustments to certain assets and to determine fair value disclosures in accordance with Accounting Standards Codification ("ASC") 820 and ASC 825. The Company did not have any liabilities that were measured at fair value at June 30, 2016 or September 30, 2015. The Company's AFS securities are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets or liabilities on a non-recurring basis, such as OREO and loans individually evaluated for impairment. These non-recurring fair value adjustments involve the application of lower of cost or fair value accounting or write-downs of individual assets.

The Company groups its assets at fair value in three levels based on the markets in which the assets are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 - Valuation is based upon quoted prices for identical instruments traded in active markets.
Level 2 - Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.
Level 3 - Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of option pricing models, discounted cash flow models, and similar techniques. The results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability.

The Company bases its fair values on the price that would be received from the sale of an asset in an orderly transaction between market participants at the measurement date. The Company maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value.

The following is a description of valuation methodologies used for assets measured at fair value on a recurring basis.
AFS Securities - The Company's AFS securities portfolio is carried at estimated fair value, with any unrealized gains and losses, net of taxes, reported as AOCI in stockholders' equity. The majority of the securities within the AFS portfolio were issued by GSEs. The Company primarily uses prices obtained from third party pricing services to determine the fair value of its securities. On a quarterly basis, management corroborates a sample of prices obtained from the third party pricing service for Level 2 securities by comparing them to an independent source. If the price provided by the independent source varies by more than a predetermined percentage from the price received from the third party pricing service, then the variance is researched by management. The Company did not have to adjust prices obtained from the third party pricing service when determining the fair value of its securities during the nine months ended June 30, 2016 or during fiscal year 2015. The Company's major security types, based on the nature and risks of the securities, are:

GSE Debentures - Estimated fair values are based on a discounted cash flow method. Cash flows are determined by \&aking any embedded options into consideration and are discounted using current market yields for similar securities. (Level 2)
MBS - Estimated fair values are based on a discounted cash flow method. Cash flows are determined based on prepayment projections of the underlying mortgages and are discounted using current market yields for benchmark securities. (Level 2)
Municipal Bonds - Estimated fair values are based on a discounted cash flow method. Cash flows are determined by \&aking any embedded options into consideration and are discounted using current market yields for securities with similar credit profiles. (Level 2)
Trust Preferred Securities - Estimated fair values are based on a discounted cash flow method. Cash flows are determined by taking prepayment and underlying credit considerations into account. The discount rates are derived
from secondary trades and bid/offer prices. (Level 3)

24

The following tables provide the level of valuation assumption used to determine the carrying value of the Company's assets measured at fair value on a recurring basis at the dates presented.

The Company's Level 3 AFS securities had no activity during the three and nine months ended June 30, 2016, except for principal repayments of $\$ 13$ thousand and $\$ 44$ thousand, respectively, and increases in net unrealized losses included in other comprehensive income of $\$ 19$ thousand and $\$ 87$ thousand, respectively. The Company's Level 3 AFS securities had no activity during the three months ended June 30, 2015, except for increases in net unrealized losses included in other comprehensive income of $\$ 1$ thousand. The Company's Level 3 AFS securities had no activity during the nine months ended June 30, 2015, except for principal repayments of $\$ 193$ thousand, and increases in net unrealized losses included in other comprehensive income of $\$ 55$ thousand.

The following is a description of valuation methodologies used for significant assets measured at fair value on a non-recurring basis.

Loans Receivable - The balance of loans individually evaluated for impairment at June 30, 2016 and September 30, 2015 was $\$ 23.6$ million and $\$ 22.8$ million, respectively. Substantially all of these loans were secured by residential real estate and were individually evaluated to determine if the carrying value of the loan was in excess of the fair value
of the collateral, less estimated selling costs of $10 \%$. When no impairment is indicated, the carrying amount is considered to approximate fair value. Fair values were estimated through current appraisals or current Federal Housing Finance Agency ("FHFA") housing price indices, which is a broad based measure of the movement of single-family house prices and is a weighted, repeat-sales index. Management does not adjust or apply a discount to the appraised value or FHFA housing price indices, except for the estimated sales costs noted above. The primary significant unobservable input for impaired loans with fair values estimated using appraisals was the appraisal. Fair values of impaired loans cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the loan and, as such, are classified as Level 3. Based on this evaluation, the Bank charged-off any loss amounts as of June 30, 2016 and September 30, 2015; therefore, there was no ACL related to these loans.

OREO - OREO primarily represents real estate acquired as a result of foreclosure or by deed in lieu of foreclosure and is carried at lower of cost or fair value. Fair value is estimated through current appraisals or listing prices, less estimated selling costs of $10 \%$. Management does not adjust or apply a discount to the appraised value or listing prices, except for the estimated sales costs noted above. The primary significant unobservable input for OREO was the appraisal or listing price. Fair values of foreclosed property

25
cannot be determined with precision and may not be realized in an actual sale of the property and, as such, are classified as Level 3. The fair value of OREO at June 30, 2016 and September 30, 2015 was $\$ 4.3$ million.

The following tables provide the level of valuation assumptions used to determine the carrying value of the Company's assets measured at fair value on a non-recurring basis at the dates presented.

Fair Value Disclosures - The Company determined estimated fair value amounts using available market information and from a variety of valuation methodologies. However, considerable judgment is required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented are not necessarily indicative of the amount the Company could realize in a current market exchange. The use of different market assumptions and estimation methodologies may have a material impact on the estimated fair value amounts. The fair value estimates presented herein were based on pertinent information available to management as of the dates presented.

The carrying amounts and estimated fair values of the Company's financial instruments, at the dates presented, were as follows:

| June 30, 2016 | September 30, 2015 |  |  |

$200,000 \quad 209,278 \quad 200,000 \quad 209,807$

The following methods and assumptions were used to estimate the fair value of the financial instruments:
Cash and Cash Equivalents - The carrying amounts of cash and cash equivalents are considered to approximate their fair value due to the nature of the financial assets. (Level 1)

HTM Securities - Estimated fair values of securities are based on one of three methods: (1) quoted market prices where available; (2) quoted market prices for similar instruments if quoted market prices are not available; (3) unobservable data that represents the Bank's assumptions about items that market participants would consider in determining fair value where no market data is available. HTM securities are carried at amortized cost. (Level 2)

Loans Receivable - The fair value of one- to four-family loans and home equity loans are generally estimated using the present value of expected future cash flows, assuming future prepayments and using discount factors determined by prices obtained from securitization markets, less a discount for the cost of servicing and lack of liquidity. The estimated fair value of the Bank's commercial and consumer loans are based on the expected future cash flows assuming future prepayments and discount factors based on current offering rates. (Level 3)

FHLB stock - The carrying value and estimated fair value of FHLB stock equals cost, which is based on redemption at par value. (Level 1)

Deposits - The estimated fair value of demand deposits, savings, and money market accounts is the amount payable on demand at the reporting date. The estimated fair value of these deposits at June 30, 2016 and September 30, 2015 was $\$ 2.32$ billion and $\$ 2.20$ billion, respectively. (Level 1) The fair value of certificates of deposit is estimated by discounting future cash flows using current London Interbank Offered Rates ("LIBOR"). The estimated fair value of certificates of deposit at June 30, 2016 and September 30, 2015 was $\$ 2.82$ billion and $\$ 2.67$ billion, respectively. (Level 2)

FHLB borrowings and Repurchase Agreements - The fair value of fixed-maturity borrowed funds is estimated by discounting estimated future cash flows using current offer rates. (Level 2) The carrying value of FHLB line of credit is considered to approximate its fair value due to the nature of the financial liability. (Level 1)

27

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
The Company and its wholly-owned subsidiary may, from time to time, make written or oral "forward-looking statements," including statements contained in documents filed or furnished by the Company with the SEC. These forward-looking statements may be included in this Quarterly Report on Form 10-Q, in the Company's reports to stockholders, in the Company's press releases, and in other communications by the Company, which are made in good faith by us pursuant to the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995.

These forward-looking statements include statements about our beliefs, plans, objectives, goals, expectations, anticipations, estimates and intentions, which are subject to significant risks and uncertainties, and are subject to change based on various factors, some of which are beyond our control. The words "may," "could," "should," "would," "believe," "anticipate," "estimate," "expect," "intend," "plan" and other similar expressions are intended to identify forward-looking statements. The following factors, among others, could cause our future results to differ materially from the plans, objectives, goals, expectations, anticipations, estimates and intentions expressed in the forward-looking statements:
our ability to maintain overhead costs at reasonable levels;
our ability to originate and purchase a sufficient volume of one- to four-family loans in order to maintain the balance of that portfolio at a level desired by management;
our ability to invest funds in wholesale or secondary markets at favorable yields compared to the related funding source;
our ability to access cost-effective funding;
the future earnings and capital levels of the Bank and the continued non-objection by our primary federal banking regulators, to the extent required, to distribute capital from the Bank to the Company, which could affect the ability of the Company to pay dividends in accordance with its dividend policy;
fluctuations in deposit flows, loan demand, and/or real estate values, as well as unemployment levels, which may adversely affect our business;
the credit risks of lending and investing activities, including changes in the level and direction of loan delinquencies and charge-offs, changes in home values, and changes in estimates of the adequacy of the ACL;
results of examinations of the Bank and the Company by their respective primary federal banking regulators,
including the possibility that the regulators may, among other things, require us to increase our ACL;
changes in accounting principles, policies, or guidelines;
the strength of the U.S. economy in general and the strength of the local economies in which we conduct operations, including areas where we have purchased large amounts of correspondent loans and loan participations;
the effects of, and changes in, trade, fiscal policies and laws, and monetary and interest rate policies of the Board of Governors of the Federal Reserve System ("FRB");
the effects of, and changes in, foreign and military policies of the United States government;
inflation, interest rate, market, monetary, and currency fluctuations;
the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users, including the features, pricing, and quality compared to competitors' products and services;
the willingness of users to substitute competitors' products and services for our products and services; our success in gaining regulatory approval of our products and services and branching locations, when required; the impact of changes in financial services laws and regulations, including laws concerning taxes, banking, securities, consumer protection and insurance and the impact of other governmental initiatives affecting the financial services industry;
implementing business initiatives may be more difficult or expensive than anticipated;
significant litigation;
technological changes;
acquisitions and dispositions;
ehanges in consumer spending and saving habits; and
our success at managing the risks involved in our business.
This list of important factors is not all inclusive. We do not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by or on behalf of the Company or the Bank.

As used in this Form 10-Q, unless the context indicates otherwise, "the Company," "we," "us," and "our" refer to Capitol Federal Financial, Inc. a Maryland corporation, and its consolidated subsidiaries. "Capitol Federal Savings," and "the Bank," refer to Capitol Federal Savings Bank, a federal savings bank and the wholly-owned subsidiary of Capitol Federal Financial, Inc.

The following discussion and analysis is intended to assist in understanding the financial condition, results of operations, liquidity, and capital resources of the Company. The Bank comprises almost all of the consolidated assets and liabilities of the Company and the Company is dependent primarily upon the performance of the Bank for the results of its operations. Because of this relationship, references to management actions, strategies and results of actions apply to both the Bank and the Company. This discussion and

28
analysis should be read in conjunction with Management's Discussion and Analysis included in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015, filed with the SEC.

## Executive Summary

The following summary should be read in conjunction with the Management's Discussion and Analysis of Financial Condition and Results of Operations section in its entirety.

We have been, and intend to continue to be, a community-oriented financial institution offering a variety of financial services to meet the needs of the communities we serve. We attract retail deposits from the general public and invest those funds primarily in permanent loans secured by first mortgages on owner-occupied, one- to four-family residences. We also originate consumer loans primarily secured by mortgages on one- to four-family residences and originate and participate in commercial real estate loans. We also invest in certain investment securities and MBS using funding from deposits, FHLB borrowings, and repurchase agreements.

The Company's results of operations are primarily dependent on net interest income, which is the difference between the interest earned on loans, MBS, investment securities, and cash, and the interest paid on deposits and borrowings. On a weekly basis, management reviews deposit flows, loan demand, cash levels, and changes in several market rates to assess all pricing strategies. The Bank's pricing strategy for first mortgage loan products includes setting interest rates based on secondary market prices and local competitor pricing for our local lending markets, and secondary market prices and national competitor pricing for our correspondent lending markets. Generally, deposit pricing is based upon a survey of competitors in the Bank's market areas, and the need to attract funding and retain maturing deposits. The majority of our loans are fixed-rate products with maturities up to 30 years, while the majority of our retail deposits have maturity or repricing dates of less than two years.

The Company is significantly affected by prevailing economic conditions, including federal monetary and fiscal policies and federal regulation of financial institutions. Retail deposit balances are influenced by a number of factors, including interest rates paid on competing investment products, the level of personal income, and the personal rate of savings within our market areas. Lending activities are influenced by the demand for housing and other loans, our loan underwriting guidelines compared to those of our competitors, as well as interest rate pricing competition from other lending institutions.

Economic conditions in the Bank's local market areas have a significant impact on the ability of borrowers to repay loans and the value of the collateral securing these loans. The industries in our market areas are diversified, especially in the Kansas City metropolitan statistical area, which comprises the largest segment of our loan portfolio and deposit base. As of June 2016, the unemployment rate was $3.8 \%$ for Kansas and $4.5 \%$ for Missouri, compared to the national average of $4.9 \%$, based on information from the Bureau of Labor Statistics. The Kansas City market area has an average household income of approximately $\$ 75$ thousand per annum, based on 2015 estimates from the American Community Survey, which is a statistical survey by the U.S. Census Bureau. The average household income in our combined market areas is approximately $\$ 70$ thousand per annum, with $90 \%$ of the population at or above the poverty level, also based on the 2015 estimates from the American Community Survey. The FHFA price index for Kansas and Missouri has not experienced significant fluctuations during the past 10 years, unlike other market areas of the United States, which indicates relative stability in property values in our local market areas.

For the quarter ended June 30, 2016, the Company recognized net income of $\$ 20.6$ million, or $\$ 0.15$ per share, compared to net income of $\$ 19.6$ million, or $\$ 0.14$ per share, for the quarter ended June 30, 2015. The $\$ 949$ thousand, or $4.8 \%$, increase in net income was due primarily to a $\$ 917$ thousand increase in net interest income. Net income attributable to the daily leverage strategy was $\$ 532$ thousand during the current quarter, compared to $\$ 699$ thousand for the prior year quarter.

The net interest margin increased two basis points, from $1.71 \%$ for the prior year quarter to $1.73 \%$ for the current year quarter. Excluding the effects of the daily leverage strategy, the net interest margin would have increased four basis points, from $2.05 \%$ for the prior year quarter to $2.09 \%$ for the current year quarter. The increase in the net interest margin was due mainly to a decrease in interest expense on term borrowings, partially offset by an increase in interest expense on deposits.

For the nine month period ended June 30, 2016, the Company recognized net income of $\$ 62.8$ million, or $\$ 0.47$ per share, compared to net income of $\$ 59.3$ million, or $\$ 0.43$ per share, for the nine month period ended June 30, 2015. The $\$ 3.5$ million, or $5.9 \%$, increase in net income was due primarily to a $\$ 2.6$ million increase in net interest income and a $\$ 1.9$ million increase in non-interest income, partially offset by a $\$ 1.2$ million increase in non-interest expense. Net income attributable to the daily leverage strategy was $\$ 1.7$ million during the current year nine month period, compared to $\$ 2.2$ million for the prior year nine month period. The decrease in the net income attributable to the daily leverage strategy was due to an increase in the FHLB line of credit borrowings rate, which was larger than the increase in the yield earned on the cash at the Federal Reserve Bank.

The net interest margin increased three basis points, from $1.72 \%$ for the prior year nine month period, to $1.75 \%$ for the current year nine month period. Excluding the effects of the daily leverage strategy, the net interest margin would have increased four basis points,
from $2.07 \%$ for the prior year nine month period to $2.11 \%$ for the current year nine month period. The increase in the net interest margin was due mainly to a decrease in interest expense on term borrowings, partially offset by an increase in interest expense on deposits.

Total assets were $\$ 9.24$ billion at June 30, 2016 compared to $\$ 9.84$ billion at September 30, 2015. The $\$ 602.4$ million decrease was due primarily to decreases in cash and cash equivalents and FHLB stock, both due to the removal of the entire daily leverage strategy at June 30, 2016 compared to $\$ 700.0$ million of the daily leverage strategy remaining in place at September 30, 2015.

The loans receivable portfolio, net, increased $\$ 214.1$ million, to $\$ 6.84$ billion at June 30, 2016, from $\$ 6.63$ billion at September 30, 2015. This growth was primarily funded with cash flows from the securities portfolio and growth in the deposit portfolio. During the current year nine month period, the Bank originated and refinanced $\$ 547.8$ million of loans with a weighted average rate of $3.63 \%$, purchased $\$ 460.9$ million of loans from correspondent lenders with a weighted average rate of $3.50 \%$, and purchased participations of $\$ 146.4$ million in commercial real estate loans with a weighted average rate of $3.94 \%$.

As previously indicated in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015, we have continued to expand our commercial real estate portfolio through loan participations with our correspondent lenders and other lead banks. These types of loans tend to be larger than and in different geographic regions from most of our existing loan portfolio and are generally considered to have different and greater risks than one- to four-family residential real estate loans. The net amount of commercial real estates loans as of June 30, 2016 was $\$ 132.1$ million and the combined total of undisbursed loan amounts and commitments as of June 30, 2016 was $\$ 217.8$ million, resulting in a total commercial real estate loan concentration of $\$ 349.9$ million at June 30, 2016. For more information regarding these participations and their potential risks, see "Part I, Item 1. Business - Multi-Family and Commercial Lending" and "Part I, Item 1A - Risk Factors" in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015.

Total liabilities were $\$ 7.86$ billion at June 30, 2016 compared to $\$ 8.43$ billion at September 30, 2015. The $\$ 567.0$ million decrease was due primarily to a $\$ 798.5$ million decrease in FHLB borrowings largely as a result of the removal of the entire daily leverage strategy at June 30, 2016, along with a $\$ 100.0$ million decrease in FHLB advances, partially offset by a $\$ 252.6$ million increase in the deposit portfolio. Management intends to continue to remove the entire daily leverage strategy at each quarter end during fiscal year 2016, and reinstate the strategy at the beginning of the following quarter. The growth in deposits during the current year nine month period was primarily in the retail certificate of deposit, checking, and wholesale certificate of deposit portfolios, which increased \$79.3 million, $\$ 60.3$ million, and $\$ 55.9$ million, respectively.

Stockholders' equity was $\$ 1.38$ billion at June 30, 2016 compared to $\$ 1.42$ billion at September 30, 2015. The $\$ 35.4$ million decrease between dates was due primarily to the payment of $\$ 100.4$ million in cash dividends, partially offset by net income of $\$ 62.8$ million.

## Available Information

Financial and other Company information, including press releases, Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and all amendments to those reports can be obtained free of charge from our investor relations website, http://ir.capfed.com. SEC filings are available on our website immediately after they are electronically filed with or furnished to the SEC, and are also available on the SEC's website at www.sec.gov.

## Critical Accounting Policies

Our most critical accounting policies are the methodologies used to determine the ACL and fair value measurements. These policies are important to the presentation of our financial condition and results of operations, involve a high degree of complexity, and require management to make difficult and subjective judgments that may require
assumptions or estimates about highly uncertain matters. The use of different judgments, assumptions, and estimates could cause reported results to differ materially. These critical accounting policies and their application are reviewed at least annually by the audit committee of our Board of Directors. For a full discussion of our critical accounting policies, see Item 7 - "Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies" in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015.

Financial Condition

| Equity to total assets at end of period | 14.9 | $\%$ | 15.1 | $\%$ |  |  |

Assets. Total assets were $\$ 9.24$ billion at June 30, 2016 compared to $\$ 9.84$ billion at September 30, 2015. The $\$ 602.4$ million decrease was due primarily to a $\$ 619.8$ million decrease in cash and cash equivalents and a $\$ 36.1$ million decrease in FHLB stock, both due to the removal of the entire daily leverage strategy at June 30, 2016 compared to $\$ 700.0$ million of the daily leverage strategy remaining in place at September 30, 2015. The entire $\$ 2.10$ billion daily leverage strategy was reinstated on July 1, 2016. Additionally, loans receivable, net, increased $\$ 214.1$ million which was partially offset by a $\$ 174.1$ million decrease in the securities portfolio.

Loans Receivable. Loans receivable, net, increased to $\$ 6.84$ billion at June 30, 2016 from $\$ 6.63$ billion at September 30, 2015. The growth in the loan portfolio during the current year nine month period was primarily in the correspondent one- to four-family purchased loan portfolio and was largely funded with cash flows from the securities portfolio and deposit growth.

The following table presents the balance and weighted average rate of our loan portfolio as of the dates indicated. Within the one- to four-family loan portfolio at June $30,2016,61 \%$ of the loans had a balance at origination of less than $\$ 417$ thousand.

Loan Activity - The following table summarizes activity in the loan portfolio, along with weighted average rates where applicable, for the periods indicated, excluding changes in undisbursed loan funds, ACL, discounts/unearned loan fees, and premiums/deferred costs. Loans that were paid-off as a result of refinances are included in repayments. Loan endorsements are not included in the activity in the following table because a new loan is not generated at the time of the endorsement. The endorsed balance and rate are included in the ending loan portfolio balance and rate. During the three and nine months ended June 30, 2016, the Bank endorsed $\$ 36.4$ million and $\$ 80.5$ million of one- to four-family loans, respectively, reducing the average rate on those loans by 95 and 89 basis points, respectively.

The following tables present loan origination, refinance, and purchase activity for the periods indicated, excluding endorsement activity, along with associated weighted average rates and percent of total. Loan originations, purchases, and refinances are reported together. The fixed-rate one- to four-family loans less than or equal to 15 years have an original maturity at origination of less than or equal to 15 years, while fixed-rate one- to four-family loans greater than 15 years have an original maturity at origination of greater than 15 years. The adjustable-rate one- to four-family loans less than or equal to 36 months have a term to first reset of less than or equal to 36 months at origination and adjustable-rate one- to four-family loans greater than 36 months have a term to first reset of greater than 36 months at origination.

One- to Four-Family Loans - The following table presents, for our portfolio of one- to four-family loans, the balance, percentage of total, weighted average credit score, weighted average LTV ratio, and the average balance per loan as of the dates presented. Credit scores are updated at least semiannually, with the latest update in March 2016, from a nationally recognized consumer rating agency. The LTV ratios were based on the current loan balance and either the lesser of the purchase price or original appraisal, or the most recent Bank appraisal, if available. In most cases, the most recent appraisal was obtained at the time of origination.

The following table presents originated, refinanced, and correspondent purchased activity in our one- to four-family loan portfolio, excluding endorsement activity, along with associated weighted average LTVs and weighted average credit scores for the periods indicated. Of the loans originated and refinanced during the current year nine month period, $76 \%$ had loan values of $\$ 417$ thousand or less. Of the correspondent loans purchased during the current year nine month period, $21 \%$ had loan values of $\$ 417$ thousand or less.

One- to Four-Family Loan Commitments - The following table summarizes our one- to four-family loan origination and refinance commitments and one- to four-family correspondent purchase commitments as of June 30, 2016, along with associated weighted average rates. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a rate lock fee. A percentage of the commitments are expected to expire unfunded, so the amounts reflected in the table below are not necessarily indicative of future cash requirements.

Commercial Real Estate Loans - Commercial real estate loans are originated or participated in based on the income producing potential of the property, the collateral value, and the financial strength of the borrower. Additionally, the Bank generally requires personal guarantees. The Bank generally requires a minimum debt service coverage ratio of 1.25 and limits LTV ratios to $80 \%$ for commercial real estate loans depending on the property type.

During the current quarter, the Bank continued to grow its commercial real estate loan portfolio by purchasing a $\$ 34.5$ million participation in a commercial real estate construction loan. At June 30, 2016, the Bank had $\$ 51.6$ million of outstanding commercial real estate loan commitments. The Bank intends to continue to grow its commercial real estate loan portfolio through participations with correspondent lenders and other lead banks with which the Bank already has commercial real estate lending relationships.

The following table presents the Bank's commercial real estate loans and commitments by industry classification, as defined by the North American Industry Classification System, as of June 30, 2016. Based on the terms of the construction loans as of June 30, 2016, the undisbursed amounts in the table are projected to be disbursed by March, 2018. It is possible that not all of the funds will be disbursed due to the nature of the funding of construction projects.

Asset Quality. The Bank's traditional underwriting guidelines have provided the Bank with generally low delinquencies and low levels of non-performing assets compared to national levels. Of particular importance is the complete and full documentation required for each loan the Bank originates, participates in or purchases. One- to four-family owner occupied loans are underwritten according to the "ability to repay" and "qualified mortgage" standards, as issued by the CFPB, with total debt-to-income ratios not exceeding $43 \%$ of the borrower's verified income. This allows the Bank to make an informed credit decision based upon a thorough assessment of the borrower's ability to repay the loan. See additional discussion regarding underwriting standards in "Part I, Item 1. Business - Lending Practices and Underwriting Standards" in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015. In the following asset quality discussion, unless otherwise noted, correspondent purchased loans are included with originated loans and bulk purchased loans are reported as purchased loans.

Delinquent and non-performing loans and OREO - The following table presents the Company's 30 to 89 day delinquent loans at the dates indicated. Of the loans 30 to 89 days delinquent at June 30, 2016, approximately $76 \%$ were 59 days or less delinquent.

The table below presents the Company's non-performing loans and OREO as of the dates indicated. Non-performing loans are loans that are 90 or more days delinquent or in foreclosure and nonaccrual loans less than 90 days delinquent but required to be reported as nonaccrual pursuant to regulatory reporting requirements, even if the loans are current. At all dates presented, there were no loans 90 or more days delinquent that were still accruing interest. Non-performing assets include non-performing loans and OREO. OREO primarily includes assets acquired in settlement of loans. Over the past 12 months, OREO properties were owned by the Bank, on average, for approximately five months before the properties were sold.

Represents loans required to be reported as nonaccrual pursuant to regulatory reporting requirements even if the loans are current. At June 30, 2016, March 31, 2016, December 31, 2015, September 30, 2015, and June 30, 2015, (1) this amount was comprised of $\$ 2.8$ million, $\$ 1.8$ million, $\$ 2.2$ million, $\$ 2.2$ million, and $\$ 3.4$ million, respectively, of loans that were 30 to 89 days delinquent and are reported as such, and $\$ 7.3$ million, $\$ 6.9$ million, $\$ 5.8$ million, $\$ 7.2$ million, and $\$ 7.4$ million, respectively, of loans that were current.
Excluding loans required to be reported as nonaccrual pursuant to regulatory reporting requirements even if the loans are current, non-performing loans as a percentage of total loans were $0.26 \%, 0.25 \%, 0.27 \%, 0.25 \%$, and
(2) $0.22 \%$, at June 30, 2016, March 31, 2016, December 31, 2015, September 30, 2015, and June 30, 2015, respectively.
Real estate-related consumer loans where we also hold the first mortgage are included in the one- to four-family
(3) category as the underlying collateral is one- to four-family property.
(4)Represents a single property the Bank purchased for a potential branch site but now intends to sell.

Once a one- to four-family loan is generally 180 days delinquent, a new collateral value is obtained through an appraisal, less estimated selling costs and anticipated private mortgage insurance ("PMI") receipts. Any loss amounts identified as a result of this review are charged-off. At June 30, 2016, $\$ 11.5$ million, or $67 \%$, of the one- to four-family loans 90 or more days delinquent or in foreclosure had been individually evaluated for loss and any related losses have been charged-off.

The following table presents the states where the properties securing one percent or more of the total amount of our one- to four-family loans are located and the corresponding balance of loans 30 to 89 days delinquent, 90 or more days delinquent or in foreclosure, and weighted average LTV ratios for loans 90 or more days delinquent or in foreclosure at June 30, 2016. The LTV ratios were based on the current loan balance and either the lesser of the purchase price or original appraisal, or the most recent Bank appraisal, if available. At June 30, 2016, potential losses, after taking into consideration anticipated PMI proceeds and estimated selling costs, have been charged-off.

TDRs - The following table presents the Company's TDRs, based on accrual status, at the dates indicated. At June 30, 2016, $\$ 24.6$ million of TDRs were included in the ACL formula analysis model and $\$ 113$ thousand of the ACL was related to these loans. The remaining $\$ 13.6$ million of TDRs at June 30, 2016 were individually evaluated for loss and any potential losses have been charged-off.

Allowance for credit losses and Provision for credit losses - Management maintains an ACL to absorb inherent losses in the loan portfolio based on ongoing quarterly assessments of the loan portfolio. The ACL is maintained through provisions for credit losses which are either charged to or credited to income. Our ACL methodology considers a number of factors including the trend and composition of delinquent loans, results of foreclosed property and short sale transactions, charge-off activity and trends, the current status and trends of local and national economies (particularly levels of unemployment), trends and current conditions in the real estate and housing markets, loan portfolio growth and concentrations, and certain ACL ratios such as ACL to loans receivable, net and annualized historical losses to ACL. We continually monitor the level of risk in our commercial real estate loan portfolio, including concentrations in such factors as geographic locations, property types, tenant brand name, borrowing relationships, and lending relationships in the case of participations loans, among other factors. For additional information on the ACL, see "Part II, Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies" in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015.

The Bank did not record a provision for credit losses during the current nine month period due to the continued low level of net loan charge-offs and delinquent loan balances. Net loan charge-offs were $\$ 131$ thousand for the current year nine month period. The improvement in collateral values has assisted in lowering our net charge-off amounts compared to prior years. At June 30, 2016, loans 30 to 89 days delinquent were $0.30 \%$ of total loans and loans 90 or more days delinquent or in foreclosure were $0.26 \%$ of total loans.

The distribution of our ACL at the dates indicated is summarized below. The loan amount in the table below represents outstanding loan balances net of undisbursed loan funds. Included in bulk purchased loans are $\$ 248.5$ million loans, or $56 \%$ of the total bulk purchased loan portfolio, at June 30, 2016, for which the seller of the loans has guaranteed, and has the ability, to repurchase or replace any delinquent loans. The Bank has not experienced any loan losses with this group of loans since the loan package was purchased in fiscal year 2012. For the $\$ 191.4$ million of bulk purchased loans at June 30, 2016 that do not have the above noted guarantee, the Bank has continued to experience a reduction in loan losses due to an improvement in collateral values. A large portion of these loans were originally interest-only loans with interest-only terms up to 10 years. All of the interest-only loans are now fully amortizing loans. Our correspondent purchased loans are purchased on a loan-by-loan basis from a select group of correspondent lenders and are underwritten by the Bank's underwriters based on underwriting standards that are generally the same as for our originated loans.

Securities. The following table presents the distribution of our MBS and investment securities portfolios, at amortized cost, at the dates indicated. Overall, fixed-rate securities comprised $77 \%$ of these portfolios at June 30, 2016. The weighted average life ("WAL") is the estimated remaining maturity (in years) after three-month historical prepayment speeds and projected call option assumptions have been applied. Weighted average yields on tax-exempt securities are not calculated on a fully taxable equivalent basis.

Mortgage-Backed Securities - The balance of MBS, which primarily consists of securities of U.S. GSEs, decreased $\$ 118.1$ million, from $\$ 1.46$ billion at September 30, 2015, to $\$ 1.34$ billion at June 30, 2016. The following tables summarize the activity in our portfolio of MBS for the periods presented. The weighted average yields and WALs for purchases are presented as recorded at the time of purchase. The weighted average yields for the beginning balances are as of the last day of the period previous to the period presented and the weighted average yield for the ending balances are as of the last day of the period presented and are generally derived from recent prepayment activity on the securities in the portfolio as of the dates presented. The beginning and ending WAL is the estimated remaining principal repayment term (in years) after three-month historical prepayment speeds have been applied.

Liabilities. Total liabilities were $\$ 7.86$ billion at June 30, 2016 compared to $\$ 8.43$ billion at September 30, 2015. The $\$ 567.0$ million decrease was due primarily to a $\$ 798.5$ million decrease in FHLB borrowings, largely as a result of the removal of the entire daily leverage strategy at June 30, 2016, along with a $\$ 100.0$ million decrease in term FHLB advances, partially offset by a $\$ 252.6$ million increase in the deposit portfolio.

Deposits - Deposits were $\$ 5.09$ billion at June 30, 2016 compared to $\$ 4.83$ billion at September 30, 2015. The $\$ 252.6$ million increase was due primarily to a $\$ 79.3$ million increase in the retail certificate of deposit portfolio, a $\$ 60.3$ million increase in the checking portfolio, and a $\$ 55.9$ million increase in the wholesale certificate of deposit portfolio. We continue to be competitive on deposit rates and, in some cases, our offer rates for certificates of deposit have been higher than peers. Increasing rates offered on longer-term certificates of deposit has been an on-going balance sheet strategy by management in anticipation of higher interest rates. If short-term interest rates continue to rise, our customers may move funds from their checking, savings and money market accounts to higher yielding deposit products within the Bank or withdraw their funds from these accounts, including certificates of deposit, to invest in higher yielding investments outside of the Bank.

The following table presents the amount, weighted average rate and percentage of total for the components of our deposit portfolio at the dates presented.

The following tables set forth scheduled maturity information for our certificates of deposit, along with associated weighted average rates, at June 30, 2016.

Borrowings - The following tables present term borrowing activity for the periods shown, which includes FHLB advances, at par, and repurchase agreements. Line of credit activity is excluded from the following tables. The weighted average effective rate includes the impact of the amortization of deferred prepayment penalties resulting from FHLB advances previously prepaid. Rates on new borrowings are fixed-rate. The weighted average maturity ("WAM") is the remaining weighted average contractual term in years. The beginning and ending WAMs represent the remaining maturity at each date presented. For new borrowings, the WAMs presented are as of the date of issue.

Maturities - The following table presents the maturity of term borrowings (including FHLB advances, at par, and repurchase agreements), along with associated weighted average contractual and effective rates as of June 30, 2016. Subsequent to June 30 , 2016, a $\$ 100.0$ million FHLB advance with an effective rate of $0.83 \%$ matured. The advance was not renewed or replaced.

FHLB Repurchase

| Maturity by <br> Fiscal year | Advances <br> Amount <br> (Dollars in thousands) | Agreements <br> Amount | Total <br> Amount | Contractual <br> Rate | Effective <br> Rate $^{(1)}$ |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 2016 | $\$ 100,000$ | $\$-$ | $\$ 100,000$ | 0.83 | $\%$ | 0.83 |

(1) The effective rate includes the impact of the amortization of deferred prepayment penalties resulting from FHLB ${ }^{1}$ advances previously prepaid.

The following table presents the maturity and weighted average repricing rate, which is also the weighted average effective rate, of certificates of deposit, split between retail and public unit amounts, and term borrowings for the next four quarters as of June 30, 2016.

Stockholders' Equity. Stockholders' equity was $\$ 1.38$ billion at June 30, 2016 compared to $\$ 1.42$ billion at September 30, 2015. The $\$ 35.4$ million decrease between periods was due primarily to the payment of $\$ 100.4$ million in cash dividends, partially offset by net income of $\$ 62.8$ million. The cash dividends paid during the current year nine month period consisted of a $\$ 0.25$ per share cash true-up dividend related to fiscal year 2015 earnings per the Company's dividend policy, a $\$ 0.25$ per share True Blue ${ }^{\circledR}$ Capitol dividend, and three regular quarterly cash dividends totaling $\$ 0.255$ per share. On July 21, 2016, the Company declared a regular quarterly cash dividend of $\$ 0.085$ per share, or approximately $\$ 11.3$ million, payable on August 19,2016 to stockholders of record as of the close of business on August 5, 2016.

In October 2015, the Company announced a stock repurchase plan for up to $\$ 70.0$ million of common stock. It is anticipated that shares will be purchased from time to time based upon market conditions and available liquidity. There is no expiration for this repurchase plan. The Company did not repurchase any shares during the nine month period ended June 30, 2016.

At June 30, 2016, Capitol Federal Financial, Inc., at the holding company level, had $\$ 93.6$ million on deposit at the Bank. For fiscal year 2016, it is the intent of the Board of Directors and management to continue with the payout of $100 \%$ of the Company's earnings to its stockholders, in addition to the True Blue Capitol dividend paid in June 2016 which was funded with a $\$ 36.0$ million capital contribution from the Bank. Dividend payments depend upon a number of factors including the Company's financial condition and results of operations, regulatory capital requirements, regulatory limitations on the Bank's ability to make capital distributions to the Company, and the amount of cash at the holding company.

The following table presents regular quarterly dividends and special dividends paid in calendar years 2016, 2015, and 2014. The amounts represent cash dividends paid during each period. For the quarter ending September 30, 2016, the amount presented represents the dividend payable on August 19, 2016 to stockholders of record as of August 5, 2016.

Comparison of Operating Results for the Nine Months Ended June 30, 2016 and 2015
For the nine month period ended June 30, 2016, the Company recognized net income of $\$ 62.8$ million, or $\$ 0.47$ per share, compared to net income of $\$ 59.3$ million, or $\$ 0.43$ per share, for the nine month period ended June 30, 2015. The $\$ 3.5$ million, or $5.9 \%$, increase in net income was due primarily to a $\$ 2.6$ million increase in net interest income and a $\$ 1.9$ million increase in non-interest income, partially offset by a $\$ 1.2$ million increase in non-interest expense. The $\$ 2.6$ million, or $1.9 \%$, increase in net interest income from the prior year nine month period was due primarily to a $\$ 6.4$ million decrease in interest expense on term borrowings, partially offset by a $\$ 3.0$ million increase in interest expense on deposits.

Net income attributable to the daily leverage strategy was $\$ 1.7$ million during the current year nine month period, compared to $\$ 2.2$ million for the prior year nine month period. The decrease in net income attributable to the daily leverage strategy was due to an increase in the average FHLB line of credit borrowings rate, which was a larger increase than the increase in the average yield earned on the cash balances held at the Federal Reserve Bank.

The net interest margin increased three basis points, from $1.72 \%$ for the prior year nine month period to $1.75 \%$ for the current year nine month period. Excluding the effects of the daily leverage strategy, the net interest margin would have increased four basis points, from $2.07 \%$ for the prior year nine month period, to $2.11 \%$ for the current year nine month period. The increase in the net interest margin was due mainly to a decrease in interest expense on term borrowings, partially offset by an increase in interest expense on deposits. The Company's efficiency ratio was $43.40 \%$ for the current year nine month period compared to $43.88 \%$ for the prior year nine month period.

## Interest and Dividend Income

The weighted average yield on total interest-earning assets increased three basis points, from $2.71 \%$ for the prior year nine month period to $2.74 \%$ for the current year nine month period, and the average balance of interest-earning assets increased $\$ 19.9$ million from the prior year nine month period. Absent the impact of the daily leverage strategy, the weighted average yield on total interest-earning assets would have decreased one basis point, from $3.22 \%$ for the prior year nine month period to $3.21 \%$ for the current year nine month period, while the average balance would have increased $\$ 38.0$ million. The following table presents the components of interest and dividend income for the time periods presented along with the change measured in dollars and percent.

| :--- | :--- | :--- | :--- |
| 4,524 | 5,262 | $(738$ | $)$ |
| $(14.0)$ |  |  |  |

\$225,518 \$222,951 \$2,567 1.2
The increase in interest income on loans receivable was due to a $\$ 391.4$ million increase in the average balance of the portfolio, partially offset by a nine basis point decrease in the weighted average yield on the portfolio, to $3.61 \%$ for the current year nine month period. Loan growth was funded through cash flows from the securities portfolio along with deposit growth. The decrease in the weighted average yield was due primarily to loans repricing to lower market rates and the origination and purchase of loans between periods at rates less than the existing portfolio rate, along with an increase in the amortization of premiums paid for correspondent loans as a result of prepayment activity.

The decrease in interest income on the MBS portfolio was due primarily to a $\$ 282.8$ million decrease in the average balance of the portfolio as cash flows not reinvested were used to fund loan growth. Additionally, the weighted average yield on the MBS portfolio decreased six basis points, from $2.26 \%$ during the prior year nine month period to $2.20 \%$ for the current year nine month period. The decrease in the weighted average yield was due to an increase in the impact of net premium amortization, as well as the purchase of MBS with yields lower than the weighted average yield on the existing portfolio. Net premium amortization of $\$ 3.7$ million during the current year nine month period decreased the weighted average yield on the portfolio by 35 basis points. During the prior year nine month period, $\$ 4.0$ million of net premiums were amortized, which decreased the weighted average yield on the portfolio by 32 basis points. As of June 30, 2016, the remaining net balance of premiums on our portfolio of MBS was $\$ 14.4$ million.

The increase in interest income on cash and cash equivalents was due primarily to a 17 basis point increase in the weighted average yield resulting from an increase in the yield earned on balances held at the Federal Reserve Bank.

The decrease in interest income on investment securities was due primarily to a $\$ 95.5$ million decrease in the average balance, partially offset by a three basis point increase in the weighted average yield on the portfolio. Cash flows not reinvested in the portfolio were used to fund loan growth.

## Interest Expense

The weighted average rate paid on total interest-bearing liabilities decreased two basis points, from $1.13 \%$ for the prior year nine month period to $1.11 \%$ for the current year nine month period, while the average balance of interest-bearing liabilities increased $\$ 142.7$ million from the prior year nine month period. Absent the impact of the daily leverage strategy, the weighted average rate paid on total interest-bearing liabilities would have decreased nine basis points from the prior year nine month period, to $1.28 \%$ for the current year nine month period, due primarily to a decrease in the cost of term borrowings, while the average balance of interest-bearing liabilities would have increased $\$ 160.8$ million due primarily to growth in deposits. The following table presents the components of interest expense for the time periods presented, along with the change measured in dollars and percent.

> For the Nine
> Months Ended

| June 30, | Change Expressed |  |
| :--- | :--- | :--- |
| in: |  |  |
| $2016 \quad 2015$ | Dollars | Percent |
| (Dollars in thousands) |  |  |

## INTEREST EXPENSE:

| FHLB advances | $\$ 41,569$ | $\$ 47,300$ | $\$(5,731)$ | $(12.1) \%$ |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| FHLB line of credit | 7,260 | 3,958 | 3,302 | 83.4 |  |
| Deposits | 27,761 | 24,729 | 3,032 | 12.3 |  |
| Repurchase agreements | 4,478 | 5,136 | $(658$ | $)$ | $(12.8)$ |
| Total interest expense | $\$ 81,068$ | $\$ 81,123$ | $\$(55$ | $)$ | $(0.1)$ |

The decrease in interest expense on FHLB advances was due primarily to a 23 basis point decrease in the weighted average rate paid on the portfolio, to $2.23 \%$ for the current year nine month period, mainly resulting from the prepayment of a $\$ 175.0$ million advance between periods with an effective rate of $5.08 \%$, which was replaced with a $\$ 175.0$ million advance with an effective rate of $2.18 \%$. The increase in interest expense on FHLB line of credit borrowings was due primarily to a 21 basis point increase in the weighted average rate paid on the borrowings.

The increase in interest expense on deposits was due to growth in the portfolio, and a four basis point increase in the weighted average rate, to $0.74 \%$ for the current year nine month period. The average balance of the deposit portfolio increased $\$ 258.3$ million for the current year nine month period, with the majority of the increase in the retail deposit portfolio, specifically the certificates of deposit and checking portfolios.

The decrease in interest expense on repurchase agreements was due to the maturity between periods of a $\$ 20.0$ million repurchase agreement at a rate of $4.45 \%$ that was not replaced.

## Provision for Credit Losses

The Bank did not record a provision for credit losses during the current year nine month period, compared to a provision for credit losses during the prior year nine month period of $\$ 771$ thousand, due to the continued low level of net loan charge-offs and delinquent loan balances. Net loan charge-offs were $\$ 131$ thousand for the current year nine month period compared to $\$ 397$ thousand for the prior year nine month period. The improvement in collateral values has assisted in lowering our net charge-off amounts compared to prior years. At June 30, 2016, loans 30 to 89 days delinquent were $0.30 \%$ of total loans and loans 90 or more days delinquent or in foreclosure were $0.26 \%$ of total
loans.

54

Non-Interest Income
The following table presents the components of non-interest income for the time periods presented, along with the change measured in dollars and percent.
For the Nine
Months Ended

June 30, Change
20162015 Dollars Percent
(Dollars in thousands)
NON-INTEREST INCOME:

| Retail fees and charges | $\$ 11,097$ | $\$ 11,052$ | $\$ 45$ | 0.4 | $\%$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Income from BOLI | 2,810 | 819 | 1,991 | 243.1 |  |
| Insurance commissions | 2,093 | 2,059 | 34 | 1.7 |  |
| Loan fees | 1,004 | 1,071 | $(67$ | $)(6.3$ |  |
| Other non-interest income | 617 | 678 | $(61$ | $(9.0$ | $)$ |
| Total non-interest income | $\$ 17,621$ | $\$ 15,679$ | $\$ 1,942$ | 12.4 |  |

The increase in income from BOLI was due mainly to the purchase of a new BOLI investment between periods, as well as to the receipt of death benefits in the current year period with no such proceeds in the prior year period.

Non-Interest Expense
The following table presents the components of non-interest expense for the time periods presented, along with the change measured in dollars and percent.

NON-INTEREST EXPENSE:
$\begin{array}{lllll}\text { Salaries and employee benefits } & \$ 31,604 & \$ 31,927 & \$(323 & ) \\ \text { Occupancy, net } & 7,894 & 7,437 & 457 & 6.1 \\ \text { Information technology and communications } & 7,883 & 7,726 & 157 & 2.0 \\ \text { Federal insurance premium } & 4,158 & 4,092 & 66 & 1.6 \\ \text { Deposit and loan transaction costs } & 4,119 & 4,065 & 54 & 1.3 \\ \text { Regulatory and outside services } & 4,000 & 3,867 & 133 & 3.4 \\ \text { Advertising and promotional } & 3,190 & 2,707 & 483 & 17.8 \\ \text { Low income housing partnerships } & 2,815 & 3,404 & (589 & )(17.3) \\ \text { Office supplies and related expense } & 2,016 & 1,560 & 456 & 29.2 \\ \text { Other non-interest expense } & 2,664 & 2,322 & 342 & 14.7 \\ \text { Total non-interest expense } & \$ 70,343 & \$ 69,107 & \$ 1,236 & 1.8\end{array}$
The increase in occupancy, net expense was due mainly to non-capitalizable costs and depreciation associated with the remodel of the Bank's Kansas City market area operations center. The increase in advertising and promotional expense was due primarily to the timing of media campaigns and sponsorships. The decrease in low income housing partnerships expense was due primarily to impairments of $\$ 611$ thousand in the prior year period, compared to $\$ 85$ thousand in the current year period. The increase in office supplies and related expense was due primarily to the purchase of cards enabled with chip card technology. The increase in other non-interest expense was due largely to higher deposit account charge-offs related to debit card fraud in the current year, along with an increase in expenses related to OREO operations due to an increase in properties with deferred maintenance and damage issues.

Management anticipates that salaries and employee benefits will decrease approximately $\$ 500$ thousand from fiscal year 2015, a change from our estimate in the previous quarter of a $\$ 500$ thousand increase from fiscal year 2015. The change in our projection was due mainly to lower than anticipated employee benefit expenses.

The Bank invests in low income housing partnerships that make equity investments in affordable housing properties and is a limited partner in these partnerships. Currently the Bank accounts for these partnerships using the equity method of accounting as two of the Bank's officers are involved in the operational management of the low income housing partnership investment group. It is anticipated that, effective September 30, 2016, those two Bank officers will discontinue their involvement in the operational management of the investment group. This will allow the Bank to report the results of the investments utilizing the proportional method of accounting, beginning October 1, 2016, which will better reflect the economics of our investment in the partnerships. In fiscal year 2017, the Bank will no longer report low income housing partnership expenses in non-interest expense. Rather, the pretax operating losses and related tax benefits of the investments will be reported as a component of income tax expense. If this change would have occurred during fiscal year 2016, the effective income tax rate would have been approximately 250 basis points higher and the efficiency ratio would have been approximately 175 basis points lower.

Income Tax Expense
Income tax expense was $\$ 28.9$ million for the current year nine month period compared to $\$ 28.3$ million for the prior year nine month period. The effective tax rate for the current year nine month period was $31.5 \%$ compared to $32.3 \%$ for the prior year nine month period. The decrease in the effective tax rate was due primarily to an increase in nontaxable income related to BOLI and higher low income housing tax credits in the current fiscal year. Management anticipates the effective tax rate for fiscal year 2016 will be approximately $32 \%$, based on fiscal year 2016 estimates as of June 30, 2016.

Average Balance Sheet
The following table presents the average balances of our assets, liabilities, and stockholders' equity, and the related annualized weighted average yields and rates on our interest-earning assets and interest-bearing liabilities for the periods indicated and the weighted average yield/rate on our interest-earning assets and interest-bearing liabilities at June 30, 2016. As previously discussed, the daily leverage strategy was not in place at June 30, 2016, so the end of period yields/rates presented at June 30, 2016 in the table below do not reflect the effects of this strategy. Weighted average yields are derived by dividing annualized income by the average balance of the related assets, and weighted average rates are derived by dividing annualized expense by the average balance of the related liabilities, for the periods shown. Average outstanding balances are derived from average daily balances. The weighted average yields and rates include amortization of fees, costs, premiums and discounts, which are considered adjustments to yields/rates. Weighted average yields on tax-exempt securities are not calculated on a fully taxable equivalent basis.

(Concluded)
(1) Calculated net of unearned loan fees, deferred costs, and undisbursed loan funds. Loans that are 90 or more days ${ }^{(1)}$ delinquent are included in the loans receivable average balance with a yield of zero percent.
(2) MBS and investment securities classified as AFS are stated at amortized cost, adjusted for unamortized purchase
${ }^{(2)}$ premiums or discounts.
The average balance of investment securities includes an average balance of nontaxable securities of \$37.6 million and $\$ 36.6$ million for the nine months ended June 30, 2016 and 2015, respectively.
(4)The balance and rate of FHLB advances are stated net of deferred gains and deferred prepayment penalties. Net interest income represents the difference between interest income earned on interest-earning assets and interest
(5)paid on interest-bearing liabilities. Net interest income depends on the balance of interest-earning assets and interest-bearing liabilities, and the interest rates earned or paid on them.
(6) Net interest rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities.
(7) Net interest margin represents annualized net interest income as a percentage of average interest-earning assets.
(8) The operating expense ratio represents annualized non-interest expense as a percentage of average assets.
(9) The efficiency ratio represents non-interest expense as a percentage of the sum of net interest income
${ }^{(9)}$ (pre-provision for credit losses) and non-interest income.
(10) The pre-tax yield on the daily leverage strategy represents annualized pre-tax income resulting from the transaction as a percentage of the average interest-earning assets associated with the transaction. The table below presents certain financial ratios showing the financial results of the daily leverage strategy, along with financial ratios without the effects of the daily leverage strategy. Since the daily leverage strategy only involves assets and liabilities, there is no direct equity impact of the daily leverage strategy, outside of generating additional earnings. Therefore, the return on average equity of the daily leverage strategy is not applicable (N/A). Management believes it is important for comparability purposes to provide the financial ratios without the daily leverage strategy because of the unique nature of the daily leverage strategy.

## Rate/Volume Analysis

The table below presents the dollar amount of changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities, comparing the nine months ended June 30, 2016 to the nine months ended June 30, 2015. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (1) changes in volume, which are changes in the average balance multiplied by the previous year's average rate and (2) changes in rate, which are changes in the average rate multiplied by the average balance from the previous year period. The net changes attributable to the combined impact of both rate and volume have been allocated proportionately to the changes due to volume and the changes due to rate.

Comparison of Operating Results for the Three Months Ended June 30, 2016 and 2015
For the quarter ended June 30, 2016, the Company recognized net income of $\$ 20.6$ million, or $\$ 0.15$ per share, compared to net income of $\$ 19.6$ million, or $\$ 0.14$ per share, for the quarter ended June 30, 2015. The $\$ 949$ thousand, or $4.8 \%$, increase in net income was due primarily to a $\$ 917$ thousand increase in net interest income resulting from a decrease in interest expense on term borrowings, partially offset by an increase in interest expense on deposits.

Net income attributable to the daily leverage strategy was $\$ 532$ thousand during the current year quarter, compared to $\$ 699$ thousand for the prior year quarter. The decrease in the net income attributable to the daily leverage strategy was due to an increase in the FHLB line of credit borrowings rate, which was larger than the increase in the yield earned on the cash at the Federal Reserve Bank.

The net interest margin increased two basis points, from $1.71 \%$ for the prior year quarter to $1.73 \%$ for the current year quarter. Excluding the effects of the daily leverage strategy, the net interest margin would have increased four basis points, from $2.05 \%$ for the prior year quarter to $2.09 \%$ for the current year quarter. The increase in the net interest margin was due mainly to a decrease in interest expense on term borrowings, partially offset by an increase in interest
expense on deposits.

59

Interest and Dividend Income
The weighted average yield on total interest-earning assets increased four basis points, from $2.69 \%$ for the prior year quarter to $2.73 \%$ for the current year quarter, and the average balance of interest-earning assets increased $\$ 38.3$ million from the prior year quarter. Absent the impact of the daily leverage strategy, the weighted average yield on total interest-earning assets would have decreased one basis point, from $3.20 \%$ for the prior year quarter to $3.19 \%$ for the current year quarter. The following table presents the components of interest and dividend income for the time periods presented along with the change measured in dollars and percent.

$1,506 \quad 1,914$ (408 ) (21.3) \$75,527 \$74,174 \$1,353 1.8

The increase in interest income on loans receivable was due to a $\$ 375.4$ million increase in the average balance of the portfolio, partially offset by a nine basis point decrease in the weighted average yield on the portfolio, to $3.58 \%$ for the current year quarter. Loan growth was funded through cash flows from the securities portfolio along with deposit growth. The decrease in the weighted average yield was due primarily to loans repricing to lower market rates and the origination and purchase of loans between periods at rates less than the existing portfolio rate, along with an increase in the amortization of premiums paid for correspondent loans as a result of prepayment activity.

The decrease in interest income on the MBS portfolio was due primarily to a $\$ 215.6$ million decrease in the average balance of the portfolio as cash flows not reinvested were used to fund loan growth. Additionally, the weighted average yield on the MBS portfolio decreased seven basis points, from $2.21 \%$ during the prior year quarter to $2.14 \%$ for the current year quarter. The decrease in the weighted average yield was due mainly to an increase in the impact of net premium amortization. During the current year quarter, $\$ 1.4$ million of net premiums on MBS were amortized, which decreased the weighted average yield on the portfolio by 40 basis points. During the prior year quarter, $\$ 1.4$ million of net premiums were amortized, which decreased the weighted average yield on the portfolio by 35 basis points.

The increase in interest income on cash and cash equivalents was due primarily to a 25 basis point increase in the weighted average yield resulting from an increase in yield earned on balances held at the Federal Reserve Bank. The decrease in interest income on investment securities was due primarily to a $\$ 134.6$ million decrease in the average balance of the portfolio as cash flows not reinvested were used to fund loan growth.

## Interest Expense

The weighted average rate paid on total interest-bearing liabilities increased one basis point, from $1.12 \%$ for the prior year quarter to $1.13 \%$ for the current year quarter, and the average balance of interest-bearing liabilities increased $\$ 148.3$ million from the prior year quarter due to deposit growth. Absent the impact of the daily leverage strategy, the weighted average rate paid on total interest-bearing liabilities would have decreased seven basis points from the prior year quarter to $1.29 \%$, due primarily to a decrease in the cost of term borrowings. The following table presents the components of interest expense for the periods presented, along with the change measured in dollars and percent.

For the Three
Months Ended
June 30,
Change Expressed
in:
20162015 Dollars Percent
(Dollars in thousands)
INTEREST EXPENSE:

| FHLB advances | $\$ 13,515$ | $\$ 15,718$ | $\$(2,203)$ | $(14.0) \%$ |
| :--- | :--- | :--- | :--- | :--- |
| FHLB line of credit | 2,846 | 1,354 | 1,492 | 110.2 |
| Deposits | 9,749 | 8,377 | 1,372 | 16.4 |
| Repurchase agreements | 1,487 | 1,712 | $(225$ | $)$ |
| Total interest expense | $\$ 27,597$ | $\$ 27,161$ | $\$ 436$ | 1.6 |

The decrease in interest expense on FHLB advances was due primarily to a 24 basis point decrease in the weighted average rate paid on the portfolio to $2.21 \%$ for the current year quarter, mainly as a result of the prepayment of a $\$ 175.0$ million advance between periods with an effective rate of $5.08 \%$, which was replaced with a $\$ 175.0$ million advance with an effective rate of $2.18 \%$. The increase in interest expense on FHLB line of credit borrowings was due primarily to a 28 basis point increase in the weighted average rate paid on the borrowings.

The increase in interest expense on deposits was due primarily to a seven basis point increase in the weighted average rate to $0.77 \%$ for the current year quarter, along with growth in deposits. The average balance of the deposit portfolio increased $\$ 268.8$ million compared to the prior year quarter, with the majority of the increase in the higher costing retail certificate of deposit portfolio.

## Provision for Credit Losses

The Bank did not record a provision for credit losses during the current year quarter, compared to a provision for credit losses during the prior year quarter of $\$ 323$ thousand, due to the continued low level of net loan charge-offs and delinquent loan balances. The Bank recognized a net recovery of $\$ 119$ thousand for the current year quarter, compared to net charge-offs of $\$ 128$ thousand for the prior year quarter. At June 30, 2016, loans 30 to 89 days delinquent were $0.30 \%$ of total loans and loans 90 or more days delinquent or in foreclosure were $0.26 \%$ of total loans.

Non-Interest Income
The following table presents the components of non-interest income for the time periods presented, along with the change measured in dollars and percent.

For the Three

| Income from BOLI | 648 | 251 | 397 | 158.2 |  |
| Insurance commissions | 517 | 537 | $(20$ | $)(3.7)$ |  |
| Loan fees | 326 | 340 | $(14$ | $)(4.1)$ |  |
| Other non-interest income | 213 | 219 | $(6)$ | $)(2.7)$ |  |
| Total non-interest income | $\$ 5,429$ | $\$ 5,145$ | $\$ 284$ | 5.5 |  |

The increase in income from BOLI was due mainly to the purchase of a new BOLI investment between periods.
61

Non-Interest Expense
The following table presents the components of non-interest expense for the time periods presented, along with the change measured in dollars and percent.

|  | For the Three Months Ended |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | June 30, <br> 2016 <br> (Dollars | 2015 <br> in thousa | Chang <br> Expre <br> Dollar <br> nds) | ge essed in: rs Percent |
| NON-INTEREST EXPENSE: |  |  |  |  |
| Salaries and employee benefits | \$10,829 | \$11,038 | \$(209 | ) (1.9 )\% |
| Occupancy, net | 2,606 | 2,557 | 49 | 1.9 |
| Information technology and communications | 2,716 | 2,573 | 143 | 5.6 |
| Federal insurance premium | 1,377 | 1,342 | 35 | 2.6 |
| Deposit and loan transaction costs | 1,449 | 1,435 | 14 | 1.0 |
| Regulatory and outside services | 1,370 | 1,365 | 5 | 0.4 |
| Advertising and promotional | 1,053 | 1,069 | (16 | ) (1.5 ) |
| Low income housing partnerships | 721 | 492 | 229 | 46.5 |
| Office supplies and related expense | 545 | 499 | 46 | 9.2 |
| Other non-interest expense | 661 | 736 | (75 | ) (10.2) |
| Total non-interest expense | \$23,327 | \$23,106 | \$221 | 1.0 |

The increase in low income housing partnerships expense was due primarily to an increase in amortization expense.
The Company's efficiency ratio was $43.72 \%$ for the current year quarter compared to $44.30 \%$ for the prior year quarter. The change in the efficiency ratio was due primarily to an increase in net interest income.

Income Tax Expense
Income tax expense was $\$ 9.5$ million for the current year quarter compared to $\$ 9.1$ million for the prior year quarter. The $\$ 354$ thousand increase was due to an increase in pre-tax income. The effective tax rate for the current year quarter was $31.6 \%$ compared to $31.8 \%$ for the prior year quarter.

Average Balance Sheet
Average yields are derived by dividing annualized income by the average balance of the related assets and average rates are derived by dividing annualized expense by the average balance of the related liabilities, for the periods shown. Average outstanding balances are derived from average daily balances. The yields and rates include amortization of fees, costs, premiums and discounts which are considered adjustments to yields/rates. Yields on tax-exempt securities were not calculated on a fully taxable equivalent basis.

(Concluded)
(1) Calculated net of unearned loan fees, deferred costs, and undisbursed loan funds. Loans that are 90 or more days (1) delinquent are included in the loans receivable average balance with a yield of zero percent.
(2) MBS and investment securities classified as AFS are stated at amortized cost, adjusted for unamortized purchase
2) premiums or discounts.
(3)

The average balance of investment securities includes an average balance of nontaxable securities of $\$ 36.6$ million and $\$ 37.9$ million for the three months ended June 30, 2016 and June 30, 2015, respectively.
(4) The balance and rate of FHLB advances are stated net of deferred gains and deferred prepayment penalties. Net interest income represents the difference between interest income earned on interest-earning assets and interest
(5) paid on interest-bearing liabilities. Net interest income depends on the balance of interest-earning assets and interest-bearing liabilities, and the interest rates earned or paid on them.
(6) Net interest rate spread represents the difference between the average yield on interest-earning assets and the
6) average cost of interest-bearing liabilities.
(7)Net interest margin represents net interest income as a percentage of average interest-earning assets.
(8)The operating expense ratio represents annualized non-interest expense as a percentage of average assets.
(9) The efficiency ratio represents non-interest expense as a percentage of the sum of net interest income
(9) (pre-provision for credit losses) and non-interest income.

## (10)

 The pre-tax yield on the daily leverage strategy represents annualized pre-tax income resulting from the transaction as a percentage of the average interest-earning assets associated with the transaction. The table below presents certain financial ratios showing the financial results of the daily leverage strategy, along with financial ratios without the effects of the daily leverage strategy. Since the daily leverage strategy only
## (11)

 involves assets and liabilities, there is no direct equity impact of the daily leverage strategy, outside of generating additional earnings. Therefore, the return on average equity of the daily leverage strategy is not applicable (N/A). Management believes it is important for comparability purposes to provide the financial ratios without the daily leverage strategy because of the unique nature of the daily leverage strategy.For the Three Months Ended

## Rate/Volume Analysis

The table below presents the dollar amount of changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities, comparing the three months ended June 30, 2016 to the three months ended June 30, 2015. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (1) changes in volume, which are changes in the average balance multiplied by the previous year's average rate and (2) changes in rate, which are changes in the average rate multiplied by the average balance from the previous year period. The net changes attributable to the combined impact of both rate and volume have been allocated proportionately to the changes due to volume and the changes due to rate.

Comparison of Operating Results for the Three Months Ended June 30, 2016 and March 31, 2016
Net income decreased $\$ 976$ thousand, or $4.5 \%$, from the quarter ended March 31, 2016 to $\$ 20.6$ million, or $\$ 0.15$ per share, for the quarter ended June 30, 2016, due primarily to a decrease in non-interest income. Net income attributable to the daily leverage strategy was $\$ 532$ thousand during the current quarter compared to $\$ 561$ thousand for the prior quarter.

Net interest income decreased $\$ 608$ thousand, or $1.3 \%$, from the prior quarter to $\$ 47.9$ million for the current quarter. The decrease was due primarily to an increase in interest expense on deposits, specifically an increase in the cost of our certificate of deposit portfolio. The net interest margin decreased five basis points from $1.78 \%$ for the prior quarter to $1.73 \%$ for the current quarter. Excluding the effects of the daily leverage strategy, the net interest margin would have been $2.09 \%$ for the current quarter compared to $2.13 \%$ for the prior quarter. The four basis point decrease was due mainly to a decrease in yield on loans receivable and the MBS portfolio, along with an increase in the cost of retail certificates of deposit, partially offset by a shift in the mix of interest-earning assets.

Interest and Dividend Income
The weighted average yield on total interest-earning assets for the current quarter decreased four basis points from the prior quarter, to $2.73 \%$, while the average balance of interest-earning assets increased $\$ 125.8$ million between the two periods. Absent the impact of the daily leverage strategy, the weighted average yield on total interest-earning assets would have decreased three basis points from the prior quarter, to $3.19 \%$, while the average balance would have increased $\$ 56.6$ million. The following table presents the components of interest and dividend income for the time periods presented, along with the change measured in dollars and percent.

INTEREST AND DIVIDEND INCOME:
Loans receivable $\quad \$ 60,840 \quad \$ 60,732 \$ 108 \quad 0.2 \%$
MBS
FHLB stock
Cash and cash equivalents
Investment securities
Total interest and dividend income
The increase in interest income on loans receivable was due to a $\$ 80.4$ million increase in the average balance of the portfolio, partially offset by a four basis point decrease in the weighted average yield on the portfolio, to $3.58 \%$ for the current quarter. The loan growth was largely funded with cash flows from the securities portfolio during the current quarter. The decrease in yield was due primarily to an increase in the amortization of premiums paid for correspondent loans as a result of increased prepayment activity, mainly related to fixed-rate loans in this portfolio.

The decrease in interest income on MBS was due to a 10 basis point decrease in the weighted average yield on the portfolio, to $2.14 \%$ for the current quarter. The decrease in the weighted average yield was due mainly to an increase in net premium amortization. During the current quarter, $\$ 1.4$ million of net premiums on MBS were amortized, which decreased the weighted average yield on the portfolio by 40 basis points. During the prior quarter, $\$ 1.1$ million of net premiums were amortized, which decreased the weighted average yield on the portfolio by 32 basis points.

## Interest Expense

The weighted average rate paid on total interest-bearing liabilities increased one basis point from the prior quarter, to $1.13 \%$, and the average balance of interest-bearing liabilities increased $\$ 111.3$ million between the two periods. Absent the impact of the daily leverage strategy, the weighted average rate paid on total interest-bearing liabilities would have increased two basis points from the prior quarter, to $1.29 \%$, and the average balance would have increased $\$ 42.0$ million. The following table presents the components of interest expense for the time periods presented, along with the change measured in dollars and percent.

For the Three
Months Ended

$\begin{array}{lllll}\text { FHLB line of credit } & 2,846 & 2,665 & 181 & 6.8\end{array}$
$\begin{array}{lllll}\text { Deposits } & 9,749 & 9,213 & 536 & 5.8\end{array}$

Repurchase agreements 1,487 1,487 - -
Total interest expense $\$ 27,597 \$ 27,094 \$ 5031.9$
The decrease in interest expense on FHLB advances was due primarily to a two basis point decrease in the average rate paid on the portfolio, to $2.21 \%$ for the current quarter. During the current quarter, a $\$ 100.0$ million advance with an effective rate of $3.17 \%$ matured and was replaced with a $\$ 100.0$ million advance with a rate of $1.82 \%$. The increase in interest expense on FHLB line of credit borrowings was due mainly to a $\$ 76.9$ million increase in the average balance, as well as a one basis point increase in the average rate paid on the borrowings, to $0.54 \%$ for the current quarter.

66

The increase in interest expense on deposits was due primarily to a three basis point increase in the weighted average rate paid on the deposit portfolio, to $0.77 \%$ for the current quarter, due mainly to an increase in the weighted average rate paid on the certificate of deposit portfolio, as well as a $\$ 41.6$ million increase in the average balance of the deposit portfolio. The weighted average rate of the retail certificate of deposit portfolio increased six basis points during the current quarter, to $1.39 \%$, due primarily to a full quarter impact of a promotional campaign on Presidents' Day during the prior quarter.

## Non-Interest Income

The following table presents the components of non-interest income for the time periods presented, along with the change measured in dollars and percent.
For the Three
Months Ended
June
30,

3arch Change $\quad 31, \quad$ Expressed in: $\quad$| 2016 | 2016 | Dollars |

$\begin{array}{lllll}\text { Income from BOLI } & 648 & 1,459 & \text { (811 ) (55.6) }\end{array}$
Insurance commissions 517 1,060 (543 ) (51.2)
Loan fees 326336 (10 ) (3.0)
Other non-interest income $213 \quad 213$ - -
Total non-interest income $\quad \$ 5,429 \$ 6,626 \$(1,197)(18.1)$
The increase in retail fees and charges was due primarily to an increase in debit card income, due in part to seasonality, and an increase in service charges earned. The decrease in income from BOLI was due primarily to the receipt of death benefits during the prior quarter and no such proceeds in the current quarter. The decrease in insurance commissions was due largely to the receipt of annual commissions from certain insurance providers during the prior quarter and no such commissions in the current quarter.

Non-Interest Expense
The following table presents the components of non-interest expense for the time periods presented, along with the change measured in dollars and percent.

## NON-INTEREST EXPENSE:

Total non-interest expense
\$23,327 \$23,426 \$(99) (0.4 )
The increase in salaries and employee benefits expense was due primarily to compensation expense on unallocated ESOP shares related to the $\$ 0.25$ per share True Blue Capitol dividend paid in June 2016. During the current quarter, $\$ 407$ thousand of ESOP compensation expense was recognized related to the True Blue Capitol dividend. Similar to the current quarter, this dividend will result in $\$ 407$ thousand of ESOP compensation expense in the fourth quarter of fiscal year 2016. The increase in regulatory and outside services was due primarily to the timing of external audit fees. The decrease in low income housing partnerships expense was
due primarily to a decrease in amortization expense. The decrease in other non-interest expenses was due mainly to a decrease in expenses related to OREO operations, as well as a decrease in deposit account charge-offs related to debit card fraud.

The Company's efficiency ratio was $43.72 \%$ for the current quarter compared to $42.46 \%$ for the prior quarter. The change in the efficiency ratio was due primarily to a decrease in non-interest income and net interest income. The efficiency ratio is a measure of a financial institution's total non-interest expense as a percentage of the sum of net interest income (pre-provision for credit losses) and non-interest income. A lower value indicates that the financial institution is generating revenue with a lower level of expense.

## Income Tax Expense

Income tax expense was $\$ 9.5$ million for the current quarter compared to $\$ 10.2$ million for the prior quarter. The decrease between periods was due primarily to a decrease in pre-tax income, as well as to a decrease in the effective income tax rate, from $32.2 \%$ for the prior quarter, to $31.6 \%$ for the current quarter. The decrease in the effective income tax rate between quarters was primarily a result of higher deductible expenses associated with dividends paid on allocated ESOP shares due to the True Blue Capitol dividend paid in June 2016.

## Average Balance Sheet

As previously mentioned, average yields are derived by dividing annualized income by the average balance of the related assets and average rates are derived by dividing annualized expense by the average balance of the related liabilities, for the periods shown. Average outstanding balances are derived from average daily balances. The yields and rates include amortization of fees, costs, premiums and discounts which are considered adjustments to yields/rates. Yields on tax-exempt securities were not calculated on a fully taxable equivalent basis.

(Concluded)
(1) Calculated net of unearned loan fees, deferred costs, and undisbursed loan funds. Loans that are 90 or more days delinquent are included in the loans receivable average balance with a yield of zero percent.
(2) MBS and investment securities classified as AFS are stated at amortized cost, adjusted for unamortized purchase
(2) premiums or discounts.
(3) The average balance of investment securities includes an average balance of nontaxable securities of $\$ 36.6$ million (3) and $\$ 37.9$ million for the three months ended June 30, 2016 and March 31, 2016, respectively.
(4) The balance and rate of FHLB advances are stated net of deferred gains and deferred prepayment penalties. Net interest income represents the difference between interest income earned on interest-earning assets and interest
(5) paid on interest-bearing liabilities. Net interest income depends on the balance of interest-earning assets and interest-bearing liabilities, and the interest rates earned or paid on them.
(6) Net interest rate spread represents the difference between the average yield on interest-earning assets and the
6) average cost of interest-bearing liabilities.
(7)Net interest margin represents net interest income as a percentage of average interest-earning assets.
(8)The operating expense ratio represents annualized non-interest expense as a percentage of average assets.
(9) The efficiency ratio represents non-interest expense as a percentage of the sum of net interest income
${ }^{(9)}$ (pre-provision for credit losses) and non-interest income.

## (10)

 The pre-tax yield on the daily leverage strategy represents annualized pre-tax income resulting from the transaction as a percentage of the average interest-earning assets associated with the transaction. The table below presents certain financial ratios showing the financial results of the daily leverage strategy, along with financial ratios without the effects of the daily leverage strategy. Since the daily leverage strategy only
## (11)

 involves assets and liabilities, there is no direct equity impact of the daily leverage strategy, outside of generating additional earnings. Therefore, the return on average equity of the daily leverage strategy is not applicable (N/A). Management believes it is important for comparability purposes to provide the financial ratios without the daily leverage strategy because of the unique nature of the daily leverage strategy.For the Three Months Ended

## Rate/Volume Analysis

The table below presents the dollar amount of changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities, comparing the three months ended June 30, 2016 to the three months ended March 31, 2016. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (1) changes in volume, which are changes in the average balance multiplied by the previous quarter's average rate and (2) changes in rate, which are changes in the average rate multiplied by the average balance from the previous quarter. The net changes attributable to the combined impact of both rate and volume have been allocated proportionately to the changes due to volume and the changes due to rate.

## Liquidity and Capital Resources

Liquidity refers to our ability to generate sufficient cash to fund ongoing operations, to repay maturing certificates of deposit and other deposit withdrawals, to repay maturing borrowings, and to fund loan commitments. Liquidity management is both a daily and long-term function of our business management. The Company's most available liquid assets are represented by cash and cash equivalents, AFS securities, and short-term investment securities. The Bank's primary sources of funds are deposits, FHLB borrowings, repurchase agreements, repayments and maturities of outstanding loans and MBS and other short-term investments, and funds provided by operations. The Bank's term borrowings primarily have been used to invest in debentures and MBS in an effort to manage the Bank's interest rate risk with the intent to improve the earnings of the Bank while maintaining capital ratios in excess of regulatory standards for well-capitalized financial institutions. In addition, the Bank's focus on managing risk has provided additional liquidity capacity by maintaining a balance of MBS and investment securities available as collateral for borrowings.

We generally intend to manage cash reserves sufficient to meet short-term liquidity needs, which are routinely forecasted for 10,30 , and 365 days. Additionally, on a monthly basis, we perform a liquidity stress test in accordance with the Interagency Policy Statement on Funding and Liquidity Risk Management. The liquidity stress test incorporates both short-term and long-term liquidity scenarios in order to identify and to quantify liquidity risk. Management also continuously monitors key liquidity statistics related to items such as wholesale funding gaps, borrowings capacity, and available unpledged collateral, as well as various liquidity ratios.

In the event short-term liquidity needs exceed available cash, the Bank has access to a line of credit at FHLB and the Federal Reserve Bank discount window. When the daily leverage strategy is in place, the Bank maintains the resulting excess cash reserves from the borrowings on the FHLB line of credit at the Federal Reserve Bank, which can be used to meet any short-term liquidity needs. Per FHLB's lending guidelines, total FHLB borrowings cannot exceed $40 \%$ of regulatory total assets without the pre-approval of FHLB senior management. In June 2016, the president of FHLB approved an increase, through July 2017, in the Bank's borrowing limit to 55\% of Bank Call Report total assets. The amount that can be borrowed from the Federal Reserve Bank discount window is based upon the fair value of securities pledged as collateral and certain other characteristics of those securities, and is used only when other sources of short-term liquidity are unavailable. Management tests the Bank's access to the Federal Reserve Bank discount window annually with a nominal, overnight borrowing.

If management observes a trend in the amount and frequency of line of credit utilization that is not in conjunction with a planned strategy, such as the daily leverage strategy, the Bank will likely utilize long-term wholesale borrowing sources such as FHLB advances and/or repurchase agreements to provide permanent fixed-rate funding. The maturities of these borrowings are generally staggered in order to mitigate the risk of a highly negative cash flow position at maturity.

The Bank's internal policy limits total borrowings to $55 \%$ of total assets. At June 30, 2016, the Bank had term borrowings, at par, of $\$ 2.68$ billion, or approximately $29 \%$ of total assets.

The amount of FHLB advances outstanding at June 30, 2016 was $\$ 2.48$ billion, of which $\$ 500.0$ million was scheduled to mature in the next 12 months. All FHLB borrowings are secured by certain qualifying loans pursuant to a blanket collateral agreement with FHLB. At June 30, 2016, the Bank's ratio of the par value of FHLB borrowings to Call Report total assets was $27 \%$. When the full daily leverage strategy is in place, FHLB borrowings are in excess of $40 \%$ of the Bank's Call Report total assets, and are expected to be in excess of $40 \%$ as long as the Bank continues its daily leverage strategy and FHLB senior management continues to approve the Bank's borrowing limit being in excess of $40 \%$ of Call Report total assets. All or a portion of the borrowings against the FHLB line of credit in conjunction with the daily leverage strategy could be repaid at any point in time while the strategy is in effect, if necessary. Additionally, the Bank could utilize the repayment and maturity of outstanding loans, MBS, and other investments for liquidity needs rather than reinvesting such funds into the related portfolios. At June 30, 2016, the Bank had \$1.12

## Edgar Filing: Capitol Federal Financial Inc - Form 10-Q

billion of securities that were eligible but unused as collateral for borrowing or other liquidity needs.
At June 30, 2016, the Bank had repurchase agreements of $\$ 200.0$ million, or approximately $2 \%$ of total assets, none of which was scheduled to mature in the next 12 months. The Bank may enter into additional repurchase agreements as management deems appropriate, not to exceed $15 \%$ of total assets, and subject to a total borrowings limit of $55 \%$ discussed above. The Bank has pledged securities with an estimated fair value of $\$ 214.2$ million as collateral for repurchase agreements as of June 30, 2016. The securities pledged for the repurchase agreements will be delivered back to the Bank when the repurchase agreements mature.

The Bank has access to other sources of funds for liquidity purposes, such as brokered and public unit deposits. As of June 30, 2016, the Bank's policy allowed for combined brokered and public unit deposits up to $15 \%$ of total deposits. At June 30, 2016, the Bank had public unit deposits totaling $\$ 368.3$ million, which had an average remaining term to maturity of eight months, or approximately $7 \%$ of total deposits, and no brokered deposits. Management continuously monitors the wholesale deposit market for opportunities to obtain funds at attractive rates. The Bank had pledged securities with an estimated fair value of $\$ 399.0$ million as collateral for public unit deposits at June 30, 2016. The securities pledged as collateral for public unit deposits are held under joint custody by FHLB and generally will be released upon deposit maturity.

At June 30, 2016, $\$ 1.09$ billion of the Bank's $\$ 2.77$ billion of certificates of deposit was scheduled to mature within one year. Included in the $\$ 1.09$ billion was $\$ 293.7$ million of public unit deposits. Based on our deposit retention experience and our current pricing strategy, we anticipate the majority of the maturing retail certificates of deposit will renew or transfer to other deposit products at the prevailing rate, although no assurance can be given in this regard. We also anticipate the majority of the $\$ 293.7$ million of maturing public unit deposits will be replaced with similar wholesale funding products.

While scheduled payments from the amortization of loans and MBS and payments on short-term investments are relatively predictable sources of funds, deposit flows, prepayments on loans and MBS, and calls of investment securities are greatly influenced by general interest rates, economic conditions, and competition, and are less predictable sources of funds. To the extent possible, the Bank manages the cash flows of its loan and deposit portfolios by the rates it offers customers.

At June 30, 2016, cash and cash equivalents totaled $\$ 152.8$ million, compared to $\$ 105.6$ million at September 30, 2015, excluding cash related to the daily leverage strategy. The increase in operating cash between periods was due primarily to the redemption of FHLB stock in conjunction with the removal of the entire daily leverage strategy at June 30, 2016. A majority of the cash received from the redemption of the FHLB stock was used to reacquire FHLB stock when the full daily leverage strategy was reinstated on July 1, 2016.

73

The following table presents the contractual maturities of our loan, MBS, and investment securities portfolios at June 30, 2016, along with associated weighted average yields. Loans and securities which have adjustable interest rates are shown as maturing in the period during which the contract is due. The table does not reflect the effects of possible prepayments or enforcement of due on sale clauses. As of June 30, 2016, the amortized cost of investment securities in our portfolio which are callable or have pre-refunding dates within one year was $\$ 326.7$ million.

Demand loans, loans having no stated maturity, and overdraft loans are included in the amounts due within one (1) year. Construction loans are presented based on the term to complete construction. The maturity date for home equity loans assumes the customer always makes the required minimum payment.

Limitations on Dividends and Other Capital Distributions
Office of the Comptroller of the Currency ("OCC") regulations impose restrictions on savings institutions with respect to their ability to make distributions of capital, which include dividends, stock redemptions or repurchases, cash-out mergers and other transactions charged to the capital account. Under FRB and OCC safe harbor regulations, savings institutions generally may make capital distributions during any calendar year equal to earnings of the previous two calendar years and current year-to-date earnings. Savings institutions must also maintain an applicable capital conservation buffer above minimum risk-based capital requirements in order to avoid restrictions on capital distributions, including dividends. A savings institution that is a subsidiary of a savings and loan holding company, such as the Company, that proposes to make a capital distribution must submit written notice to the OCC and FRB 30 days prior to such distribution. The OCC and FRB may object to the distribution during that 30-day period based on safety and soundness or other concerns. Savings institutions that desire to make a larger capital distribution, are under special restrictions, or are not, or would not be, sufficiently capitalized following a proposed capital distribution must obtain regulatory non-objection prior to making such a distribution.

The long-term ability of the Company to pay dividends to its stockholders is based primarily upon the ability of the Bank to make capital distributions to the Company. So long as the Bank remains "well-capitalized" after each capital distribution, operates in a safe and sound manner, and maintains an applicable capital conservation buffer above its minimum risk-based capital requirements, it is management's belief that the OCC and FRB will continue to allow the Bank to distribute its earnings to the Company, although no assurance can be given in this regard.

## Off-Balance Sheet Arrangements, Commitments and Contractual Obligations

The Company, in the normal course of business, makes commitments to buy or sell assets or to incur or fund liabilities. There have been no material changes in commitments, contractual obligations or off-balance sheet arrangements from September 30, 2015. For additional information, see "Part II, Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations - Off-Balance Sheet Arrangements, Commitments and Contractual Obligations" in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015. We anticipate that we will continue to have sufficient funds, through repayments and maturities of loans and securities, deposits and borrowings, to meet our current commitments.

The maximum balance of short-term FHLB borrowings outstanding at any month-end during the nine months ended June 30, 2016 was $\$ 2.60$ billion, and the average balance of short-term FHLB borrowings outstanding during this period was $\$ 2.41$ billion at a weighted average contractual rate of $0.63 \%$. The majority of the short-term FHLB borrowings amount related to borrowings on the FHLB line of credit in conjunction with the daily leverage strategy. This compares to a balance of short-term FHLB borrowings outstanding at June 30, 2016 of $\$ 500.0$ million at a weighted average contractual rate of $2.24 \%$.

## Contingencies

In the normal course of business, the Company and its subsidiary are named defendants in various lawsuits and counter claims. In the opinion of management, after consultation with legal counsel, none of the currently pending suits are expected to have a materially adverse effect on the Company's consolidated financial statements for the quarter ended June 30, 2016, or future periods.

## Capital

Consistent with our goal to operate a sound and profitable financial organization, we actively seek to maintain a "well-capitalized" status for the Bank and Company in accordance with regulatory standards. As of June 30, 2016, the Bank and Company exceeded all regulatory capital requirements. The following table presents the regulatory capital
ratios of the Bank and the Company at June 30, 2016.

|  | Bank | Company | Minimum <br> Regulatory <br> Requirement | Regulatory |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Requirement For |
|  |  |  |  | "Well-Capitalized" |
|  | Ratios | Ratios |  | Status of Bank |
| Tier 1 leverage ratio | 10.9\% | 12.1 \% | 4.0 \% | 5.0 \% |
| Common equity tier 1 capital ratio | 28.8 | 32.0 | 4.5 | 6.5 |
| Tier 1 capital ratio | 28.8 | 32.0 | 6.0 | 8.0 |
| Total capital ratio | 29.0 | 32.3 | 8.0 | 10.0 |

75

The following table presents a reconciliation of equity under GAAP to regulatory capital amounts, as of June 30, 2016, for the Bank and the Company (dollars in thousands):

|  | Bank | Company |
| :--- | :--- | :--- |
|  |  |  |
| Total equity as reported under GAAP | $\$ 1,240,932$ | $\$ 1,380,815$ |
| Unrealized gains on AFS securities | $(6,820$ | $)$ |
| Total tier 1 capital | $1,234,112$ | $1,373,995$ |
| ACL | 9,312 | 9,312 |
| Total capital | $\$ 1,243,424$ | $\$ 1,383,307$ |

Item 3. Quantitative and Qualitative Disclosure about Market Risk
Asset and Liability Management and Market Risk
For a complete discussion of the Bank's asset and liability management policies, as well as the potential impact of interest rate changes upon the market value of the Bank's portfolios, see "Part II, Item 7A. Quantitative and Qualitative Disclosures about Market Risk" in the Company's Annual Report on Form 10-K for the year ended September 30, 2015. The analysis presented in the tables below reflects the level of market risk at the Bank, including the cash the holding company has on deposit at the Bank.

The rates of interest the Bank earns on its assets and pays on its liabilities are generally established contractually for a period of time. Fluctuations in interest rates have a significant impact not only upon our net income, but also upon the cash flows and market values of our assets and liabilities. Our results of operations, like those of other financial institutions, are impacted by changes in interest rates and the interest rate sensitivity of our interest-earning assets and interest-bearing liabilities. Risk associated with changes in interest rates on the earnings of the Bank and the market value of its financial assets and liabilities is known as interest rate risk. Interest rate risk is our most significant market risk, and our ability to adapt to changes in interest rates is known as interest rate risk management.

The general objective of our interest rate risk management program is to determine and manage an appropriate level of interest rate risk while maximizing net interest income in a manner consistent with our policy to manage, to the extent practicable, the exposure of net interest income to changes in market interest rates. The Board of Directors and Asset and Liability Management Committee ("ALCO") regularly review the Bank's interest rate risk exposure by forecasting the impact of hypothetical, alternative interest rate environments on net interest income and the market value of portfolio equity ("MVPE") at various dates. The MVPE is defined as the net of the present value of cash flows from existing assets, liabilities, and off-balance sheet instruments. The present values are determined based upon market conditions as of the date of the analysis, as well as in alternative interest rate environments providing potential changes in the MVPE under those alternative interest rate environments. Net interest income is projected in the same alternative interest rate environments with both a static balance sheet and management strategies considered. The MVPE and net interest income analysis are also conducted to estimate our sensitivity to rates for future time horizons based upon market conditions as of the date of the analysis. In addition to the interest rate environments presented below, management also reviews the impact of non-parallel rate shock scenarios on a quarterly basis. These scenarios consist of flattening and steepening the yield curve by changing short-term and long-term interest rates independent of each other, and simulating cash flows and determining valuations as a result of these hypothetical changes in interest rates to identify rate environments that pose the greatest risk to the Bank. This analysis helps management quantify the Bank's exposure to changes in the shape of the yield curve.

For each date presented in the following table, the estimated change in the Bank's net interest income is based on the indicated instantaneous, parallel and permanent change in interest rates presented. The change in each interest rate environment represents the difference between estimated net interest income in the 0 basis point interest rate environment ("base case," assumes the forward market and product interest rates implied by the yield curve are realized) and the estimated net interest income in each alternative interest rate environment (assumes market and product interest rates have a parallel shift in rates across all maturities by the indicated change in rates). At all dates presented, the three-month Treasury bill yield was less than one percent, so the -100 basis points scenario was not
applicable. Estimations of net interest income used in preparing the table below were based upon the assumptions that the total composition of interest-earning assets and interest-bearing liabilities does not change materially and that any repricing of assets or liabilities occurs at anticipated product and market rates for the alternative rate environments as of the dates presented. The estimation of net interest income does not include any projected gains or losses related to the sale of loans or securities, or income derived from non-interest income sources, but does include the use of different prepayment assumptions in the alternative interest rate environments. It is important to consider that estimated changes in net interest income are for a cumulative four-quarter period. These do not reflect the earnings expectations of management.

| Change <br> (in Basis Points) | Net Inter June 30, | st Incon 2016 | At | September 30, 2015 |  |  |

| +200 bp | 192,522 | 3,366 | 1.78 | 186,443 | $(4,33) 3$ | (2.27) |
| +300 bp | 191,116 | 1,960 | 1.04 | 181,652 | $(9,12) 4$ | (4.78) |

Assumes an instantaneous, parallel, and permanent change in interest rates at all maturities.

During the quarter ending June 30, 2016, management began using the results of a new deposit study that analyzed historical behavior of the Bank's non-maturity deposits, and also analyzed historical correlation of the Bank's deposit rates to market interest rates. This information is used in the Bank's interest rate risk model to predict the future balances of non-maturity deposit accounts, as well as future offering rates on certificates of deposit. The change in net interest income projections at June 30, 2016 compared to September 30, 2015 was due primarily to the utilization of the new deposit study in the Bank's interest rate risk model, specifically related to certificates of deposit. The new deposit study indicated a reduction in the correlation of interest rates offered by the Bank on certificates of deposit to market interest rates, compared to the previous methodology. As a result, the Bank's projected offering rates on certificates of deposit do not respond as quickly to changes in market interest rates so interest expense on certificates of deposit in the rising interest rate scenarios over the 12-month horizon was significantly lower at June 30, 2016 compared to September 30, 2015, which increased net interest income projections.

The following table sets forth the estimated change in the MVPE for each date presented based on the indicated instantaneous, parallel, and permanent change in interest rates. The change in each interest rate environment represents the difference between the MVPE in the base case (assumes the forward market interest rates implied by the yield curve are realized) and the MVPE in each alternative interest rate environment (assumes market interest rates have a parallel shift in rates). At all dates presented, the three-month Treasury bill yield was less than one percent, so the -100 basis points scenario was not applicable. The estimations of the MVPE used in preparing the table below were based upon the assumptions that the total composition of interest-earning assets and interest-bearing liabilities does not change, that any repricing of assets or liabilities occurs at current product or market rates for the alternative rate environments as of the dates presented, and that different prepayment rates were used in each alternative interest rate environment. The estimated MVPE results from the valuation of cash flows from financial assets and liabilities over the anticipated lives of each for each interest rate environment. The table below presents the effects of the changes in interest rates on our assets and liabilities as they mature, repay, or reprice, as shown by the change in the MVPE for alternative interest rates.
Change Market Value of Portfolio Equity At

Assumes an instantaneous, parallel, and permanent change in interest rates at all maturities.

As interest rates rise, the market value of the Bank's assets decreases at a faster pace than the market value of the Bank's liabilities, which results in a decrease to the Bank's MVPE. As interest rates decrease, the opposite is true. Lower interest rates at June 30, 2016, as compared to September 30, 2015, decreased the Bank's risk to higher interest rates. The new deposit study discussed above did not have a material impact on the MVPE at June 30, 2016.

77

The following gap table summarizes the anticipated maturities or repricing periods of the Bank's interest-earning assets and interest-bearing liabilities based on the information and assumptions set forth in the notes below. Cash flow projections for mortgage-related assets are calculated based on current interest rates. Prepayment projections are subjective in nature, involve uncertainties and assumptions and, therefore, cannot be determined with a high degree of accuracy. Although certain assets and liabilities may have similar maturities or periods to repricing, they may react differently to changes in market interest rates. Assumptions may not reflect how actual yields and costs respond to market interest rate changes. The interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types of assets and liabilities may lag behind changes in market interest rates. Certain assets, such as adjustable-rate mortgage ("ARM") loans, have features that restrict changes in interest rates on a short-term basis and over the life of the asset. In the event of a change in interest rates, prepayment and early withdrawal levels would likely deviate significantly from those assumed in calculating the gap table below. For additional information regarding the impact of changes in interest rates, see the preceding Percentage Change in Net Interest Income and Percentage Change in MVPE discussions and tables.

June 30, $2016 \quad 2.11$
September 30, $2015 \quad 0.26$
(1) ARM loans are included in the period in which the rate is next scheduled to adjust or in the period in which repayments are expected to occur, or prepayments are expected to be received, prior to their next rate adjustment, rather than in the period in which the loans are due. Fixed-rate loans are included in the periods in which they are
scheduled to be repaid, based on scheduled amortization and prepayment assumptions. Balances are net of deferred fees and exclude loans 90 or more days delinquent or in foreclosure.
MBS reflect projected prepayments at amortized cost. Investment securities are presented based on contractual maturities, term to call dates or pre-refunding dates as of June 30, 2016, at amortized cost.
Although the Bank's checking, savings, and money market accounts are subject to immediate withdrawal, management considers a substantial amount of these accounts to be core deposits having significantly longer effective maturities. The decay rates (the assumed rates at which the balances of existing accounts decline) used on these accounts is based on assumptions developed from our actual experiences with these accounts. If all of the
${ }^{3}$ Bank's checking, savings, and money market accounts had been assumed to be subject to repricing within one year, interest-bearing liabilities which were estimated to mature or reprice within one year would have exceeded interest-earning assets with comparable characteristics by $\$ 911.3$ million, for a cumulative one-year gap of $-9.9 \%$ of total assets.
(4)Borrowings exclude deferred prepayment penalty costs.

78

The increase in the one-year gap at June 30, 2016 compared to September 30, 2015 was largely a result of lower interest rates at June 30, 2016 than at September 30, 2015. In addition, the utilization of the new deposit study discussed above increased the expected average lives of non-maturity deposits which reduced the amount of deposits repricing over the 12-month horizon and increased the one-year gap at June 30, 2016 compared to September 30, 2015.

The following table presents the weighted average yields/rates and WALs (in years), after applying prepayment, call assumptions, and decay rates for our interest-earning assets and interest-bearing liabilities as of the date presented. Yields presented for interest-earning assets include the amortization of fees, costs, premiums and discounts which are considered adjustments to the yield. The interest rate presented for term borrowings is the effective rate, which includes the net impact of the amortization of deferred prepayment penalties resulting from FHLB advances previously prepaid. The maturity and repricing terms presented for one- to four-family loans represent the contractual terms of the loan.

Item 4. Controls and Procedures
Evaluation of Disclosure Controls and Procedures
Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, the "Act") as of June 30, 2016. Based upon this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that, as of June 30, 2016, such disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports it files or
submits under the Act is accumulated and communicated to the Company's management (including the Chief Executive Officer and Chief Financial Officer) to allow timely decisions regarding required disclosure, and is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

## Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Act) that occurred during the Company's quarter ended June 30, 2016 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

## PART II - OTHER INFORMATION

Item 1. Legal Proceedings
The Company and the Bank are involved as plaintiff or defendant in various legal actions arising in the normal course of business. In our opinion, after consultation with legal counsel, we believe it unlikely that such pending legal actions will have a material adverse effect on our financial condition, results of operations or liquidity.
Item 1A. Risk Factors
There have been no material changes to our risk factors disclosed in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
See "Liquidity and Capital Resources - Capital" in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" regarding OCC restrictions on dividends from the Bank to the Company.

The following table summarizes our share repurchase activity during the three months ended June 30, 2016 and additional information regarding our share repurchase program. In October 2015, the Company announced a stock repurchase plan for up to $\$ 70.0$ million of common stock. It is anticipated that shares will be purchased from time to time in the open-market based upon market conditions and available liquidity. There is no expiration for this repurchase plan.
