UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended March 31, 2016

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from to

Commission File Number: 001-09463

RLI Corp.

(Exact name of registrant as specified in its charter)

Edgar Filing: RLI CORP - Form 10-Q

ILLINOIS (State or other jurisdiction of incorporation or organization)	37-0889946 (I.R.S. Employer Identification Number)
9025 North Lindbergh Drive, Peoria, IL (Address of principal executive offices)	61615 (Zip Code)

(309) 692-1000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company)	Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS:

As of April 13, 2016, the number of shares outstanding of the registrant's Common Stock was 43,671,676.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. BASIS OF PRESENTATION

The unaudited condensed consolidated interim financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP) for interim financial reporting and with the instructions to Form 10-Q and Regulation S-X. Accordingly, they do not include all of the disclosures required by GAAP for complete financial statements. As such, these unaudited condensed consolidated interim financial statements should be read in conjunction with our 2015 Annual Report on Form 10-K. Management believes that the disclosures are adequate to make the information presented not misleading, and all normal and recurring adjustments necessary to present fairly the financial position at March 31, 2016 and the results of operations of RLI Corp. and subsidiaries for all periods presented have been made. The results of operations for any interim period are not necessarily indicative of the operating results for a full year.

The preparation of the unaudited condensed consolidated interim financial statements requires management to make estimates and assumptions relating to the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the unaudited condensed consolidated interim financial statements and the reported amounts of revenue and expenses during the period. These estimates are inherently subject to change and actual results could differ significantly from these estimates.

B. ADOPTED ACCOUNTING STANDARDS

ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs

This ASU was issued to simplify the presentation of debt issuance costs by requiring them to be presented in the balance sheet as a direct deduction from the carrying amount of the related recognized debt liability, consistent with debt discounts. We adopted ASU 2015-03 on January 1, 2016 on a retrospective basis. Our adoption of the new standard resulted in a \$1.1 million decrease to long-term debt and other assets at December 31, 2015.

C. PROSPECTIVE ACCOUNTING STANDARDS

ASU 2015-09, Financial Services-Insurance (Topic 944): Disclosures about Short-Duration Contracts

This ASU was issued to enhance disclosures about an entity's insurance liabilities, including the nature, amount, timing and uncertainty of cash flows related to those liabilities. The new guidance requires the following information related to unpaid claims and claim adjustment expenses be disclosed using an appropriate level of disaggregation so as not to obscure useful information:

- a. Net incurred and paid claims development information by accident year for the number of years for which claims incurred typically remain outstanding, but need not exceed 10 years;
- b. A reconciliation of incurred and paid claims development information to the aggregate carrying amount of the liability for unpaid claims and claim adjustment expenses, with separate disclosure of reinsurance recoverable on unpaid claims for each period presented in the statement of financial position;
- c. For each accident year presented, the total of incurred-but-not-reported liabilities plus expected development on reported claims included in the liability for unpaid claims and claim adjustment expenses;
- d. For each accident year presented, quantitative information about claim frequency accompanied by a qualitative description of methodologies used for determining claim frequency information; and
- e. For all claims, the average annual percentage payout of incurred claims by age.

This ASU is effective for annual reporting periods beginning after December 15, 2015 and for interim periods beginning after December 15, 2016. Early adoption is permitted. We have not early-adopted this ASU and while disclosures will be increased, we do not believe adoption will have a material effect on our financial statements.

Table of Contents

ASU 2016-01, Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities

This ASU was issued to improve the recognition and measurement of financial instruments. The new guidance makes targeted improvements to GAAP as follows:

- a. Requires equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income;
- b. Simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment;
- c. Eliminates the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet;
- d. Requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes;
- e. Requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments;
- f. Requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or the accompanying notes to the financial statements; and
- g. Clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets.

This ASU is effective for interim and annual reporting periods beginning after December 15, 2017. Early adoption is only permitted for provision (e) above. Upon adoption, a cumulative-effect adjustment to the balance sheet will be made as of the beginning of the fiscal year of adoption. We have not yet completed the analysis of how adopting this ASU will affect our financial statements.

ASU 2016-02, Leases (Topic 842)

ASU 2016-02 was issued to improve the financial reporting of leasing transactions. Under current guidance for lessees, leases are only included on the balance sheet if certain criteria, classifying the agreement as a capital lease, are met. This update will require the recognition of a right-of-use asset and a corresponding lease liability, discounted to the present value, for all leases that extend beyond 12 months. For operating leases, the asset and liability will be expensed over the lease term on a straight-line basis, with all cash flows included in the operating section of the statement of cash flows. For finance leases, interest on the lease liability will be recognized separately from the amortization of the right-of-use asset in the statement of comprehensive income and the repayment of the principal portion of the lease liability will be classified as a financing activity while the interest component will be included in the operating section of the statement of cash flows.

This ASU is effective for annual and interim reporting periods beginning after December 15, 2018. Early adoption is permitted. Upon adoption, leases will be recognized and measured at the beginning of the earliest period presented

using a modified retrospective approach. We have not yet completed the analysis of how adopting this ASU will affect our financial statements.

ASU 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting

ASU 2016-09 was issued to simplify the accounting for share-based payment awards. The guidance requires that, prospectively, all tax effects related to share-based payments be made through the income statement at the time of settlement as opposed to excess tax benefits being recognized in additional paid-in-capital under the current guidance. The ASU also removes the requirement to delay recognition of a tax benefit until it reduces current taxes payable. This change is required to be applied on a modified retrospective basis, with a cumulative-effect adjustment to opening retained earnings. Additionally, all tax related cash flows resulting from share-based payments are to be reported as operating activities on the statement of cash flows, a change from the current requirement to present tax benefits as an inflow from financing activities and an outflow from operating activities. Finally, entities will be allowed to withhold an amount up to the employees' maximum individual tax rate (as opposed to the minimum statutory tax rate) in the relevant jurisdiction without resulting in liability classification of the award. The change in withholding requirements will be applied on a modified retrospective approach.

Table of Contents

This ASU is effective for annual and interim reporting periods beginning after December 15, 2016. Early adoption is permitted with any adjustments reflected as of the beginning of the fiscal year of adoption. We have not yet completed the analysis of how adopting this ASU will affect our financial statements.

D. INTANGIBLE ASSETS

In accordance with GAAP guidelines, the amortization of goodwill and indefinite-lived intangible assets is not permitted. Goodwill and indefinite-lived intangible assets remain on the balance sheet and are tested for impairment on an annual basis, or earlier if there is reason to suspect that their values may have been diminished or impaired. Goodwill and intangible assets totaled \$72.2 million and \$71.3 million at March 31, 2016 and December 31, 2015, respectively, as detailed in the following table.

Goodwill and Intangible Assets (in thousands)	March 31, 2016	December 31, 2015
Reporting Unit		
Goodwill		
Energy surety	\$ 25,706	\$ 25,706
Miscellaneous and contract surety	15,110	15,110
P&C package business	5,246	5,246
Medical professional liability	12,434	12,434
Total goodwill	\$ 58,496	\$ 58,496
Intangibles		
State insurance licenses	\$ 7,500	\$ 7,500
Definite-lived intangibles, net of accumulated amortization of \$4,911 at 3/31/16 and \$4,678 at 12/31/15	6,236	5,298
Total intangibles	\$ 13,736	\$ 12,798
Total goodwill and intangibles	\$ 72,232	\$ 71,294

All definite-lived intangible assets are amortized against future operating results based on their estimated useful lives. Amortization of intangible assets was \$0.2 million for the first quarters of 2016 and 2015. Definite-lived intangibles increased during the first quarter of 2016 as a result of the acquisition of assets from an insurance agency. Separately identifiable assets of the agency totaled \$1.2 million and related primarily to acquired software, trade name and agency relationships.

Annual impairment testing was performed on each of our existing goodwill and indefinite-lived intangible assets during 2015. Based upon these reviews, none of the assets were impaired. In addition, as of March 31, 2016, there were no triggering events that occurred that would suggest an updated review was necessary.

E. EARNINGS PER SHARE

Basic earnings per share (EPS) excludes dilution and is computed by dividing income available to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the dilution that could occur if securities or other contracts to issue common stock or common stock equivalents were exercised or converted into common stock. When inclusion of common stock equivalents increases the earnings per share or reduces the loss per share, the effect on earnings is anti-dilutive. Under these circumstances, the diluted net earnings or net loss per share is computed excluding the common stock equivalents.

Table of Contents

The following represents a reconciliation of the numerator and denominator of the basic and diluted EPS computations contained in the unaudited condensed consolidated interim financial statements.

(in thousands, except per share data)	For the Three-Month Period Ended March 31, 2016			For the Three-Month Period Ended March 31, 2015		
	Income	Shares	Per Share	Income	Shares	Per Share
	(Numerator)	(Denominator)	Amount	(Numerator)	(Denominator)	Amount
Basic EPS						
Income available to common shareholders	\$ 31,393	43,597	\$ 0.72	\$ 30,598	43,141	\$ 0.71
Effect of Dilutive Securities Stock options	-	764		-	851	
Diluted EPS						
Income available to common shareholders	\$ 31,393	44,361	\$ 0.71	\$ 30,598	43,992	\$ 0.70

F. COMPREHENSIVE EARNINGS

Our comprehensive earnings include net earnings plus unrealized gains/losses on our available-for-sale investment securities, net of tax. In reporting comprehensive earnings on a net basis in the statement of earnings, we used the federal statutory tax rate of 35 percent.

Unrealized gains, net of tax, for the first three months of 2016 were \$21.8 million, compared to unrealized losses, net of tax, of \$7.6 million during the same period last year. Unrealized gains in the first quarter of 2016 were primarily due to a decline in interest rates, increasing the value of the fixed income portfolio, and was aided by positive pricing movements for equity securities. In 2015, unrealized losses were the result of declines in the equity portfolio.

The following table illustrates the changes in the balance of each component of accumulated other comprehensive earnings for each period presented in the unaudited condensed consolidated interim financial statements.

(in thousands)	For the Three-Month Periods Ended March 31,	
Unrealized Gains/Losses on Available-for-Sale Securities	2016	2015

Edgar Filing: RLI CORP - Form 10-Q

Beginning balance	\$ 123,774	\$ 171,383
Other comprehensive earnings before reclassifications	29,171	996
Amounts reclassified from accumulated other comprehensive earnings	(7,408)	(8,591)
Net current-period other comprehensive earnings (loss)	\$ 21,763	\$ (7,595)
Ending balance	\$ 145,537	\$ 163,788

The sale or other-than-temporary impairment of an available-for-sale security results in amounts being reclassified from accumulated other comprehensive earnings to current period net earnings. The effects of reclassifications out of accumulated other comprehensive earnings by the respective line items of net earnings are presented in the following table.

(in thousands)	Amount Reclassified from Accumulated Other Comprehensive Earnings For the Three-Month Periods Ended March 31,		Affected line item in the Statement of Earnings
	2016	2015	
Component of Accumulated Other Comprehensive Earnings			
Unrealized gains and losses on available-for-sale securities	\$ 11,397	\$ 13,217	Net realized investment gains
	-	-	Other-than-temporary impairment (OTTI)
	\$ 11,397	\$ 13,217	losses on investments
	(3,989)	(4,626)	Earnings before income taxes
	\$ 7,408	\$ 8,591	Income tax expense
			Net earnings

Table of Contents

2. INVESTMENTS

Our investments include fixed income debt securities and common stock equity securities. As disclosed in our 2015 Annual Report on Form 10-K, we present all of our investments as available-for-sale, which are carried at fair value. When available, we obtain quoted market prices to determine fair value for our investments. If a quoted market price is not available, fair value is estimated using a secondary pricing source or using quoted market prices of similar securities. We have no investment securities for which fair value is determined using Level 3 inputs as defined in note 3 to the unaudited condensed consolidated interim financial statements, "Fair Value Measurements."

Available-for-Sale Securities

The amortized cost and fair value of available-for-sale securities at March 31, 2016 and December 31, 2015 were as follows:

Available-for-sale (in thousands)				
	3/31/2016			
Asset Class	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Unrealized Losses

We conduct and document periodic reviews of all securities with unrealized losses to evaluate whether the impairment is other-than-temporary. The following tables are used as part of our impairment analysis and illustrate the total value of securities that were in an unrealized loss position as of March 31, 2016 and December 31, 2015. The tables segregate the securities based on type, noting the fair value, cost (or amortized cost) and unrealized loss on each category of investment as well as in total. The tables further classify the securities based on the length of time they have been in an unrealized loss position. As of March 31, 2016 unrealized losses, as shown in the following tables, were 0.6 percent of total invested assets. Unrealized losses decreased in 2016, due largely to interest rates declines during the first quarter.

Table of Contents

The following table shows the composition of the fixed income securities in unrealized loss positions at March 31, 2016 by the National Association of Insurance Commissioners (NAIC) rating and the generally equivalent Standard & Poor's (S&P) and Moody's ratings. The vast majority of the securities are rated by S&P and/or Moody's.

NAIC Rating	Equivalent S&P Rating	Equivalent Moody's Rating	(dollars in thousands)		Unrealized Loss	Percent to Total	
			Amortized Cost	Fair Value			
1	AAA/AA/A	Aaa/Aa/A	\$ 102,457	\$ 101,196	\$ (1,261)	11.2	%

Evaluating Investments for OTTI

The fixed income portfolio contained 279 securities in an unrealized loss position as of March 31, 2016. The \$11.3 million in associated unrealized losses for these 279 securities represents 0.7 percent of the fixed income portfolio's cost basis. Of these 279 securities, 70 have been in an unrealized loss position for 12 consecutive months or longer. All fixed income securities in the investment portfolio continue to pay the expected coupon payments under the contractual terms of the securities. Any credit-related impairment related to fixed income securities we do not plan to sell and for which we are not more likely than not to be required to sell is recognized in net earnings, with the non-credit related impairment recognized in comprehensive earnings. Based on our analysis, our fixed income portfolio is of high credit quality and we believe we will recover the amortized cost basis of our fixed income securities. We continually monitor the credit quality of our fixed income investments to assess if it is probable that we will receive our contractual or estimated cash flows in the form of principal and interest. There were no other-than-temporary impairment (OTTI) losses recognized in net earnings or other comprehensive earnings in the periods presented on the fixed income portfolio.

As of March 31, 2016, we held four common stock securities that were in an unrealized loss position. The unrealized loss on these securities was \$0.8 million. Based on our analysis, we believe each security will recover in a reasonable period of time and we have the intent and ability to hold them until recovery. No equity securities have been in an unrealized loss position for 12 consecutive months or longer. There were no OTTI losses recognized in the periods presented on the equity portfolio.

Other Invested Assets

Other invested assets include investments in three low income housing tax credit partnerships (LIHTC), carried at amortized cost, membership in the Federal Home Loan Bank of Chicago (FHLBC), carried at cost, and an investment in a real estate fund, carried at cost. Due to the nature of other invested assets, their carrying amounts approximate fair value. Our LIHTC interests had a balance of \$18.6 million at March 31, 2016, compared to \$14.0 million at December 31, 2015 and recognized a total tax benefit of \$0.4 million during the first quarter of 2016 compared to \$0.3 million during the first quarter of 2015. Our investment in FHLBC stock totaled \$1.6 million at March 31, 2016 and December 31, 2015. Our investment in the real estate fund totaled \$5.0 million, the same amount as December 31, 2015.

Cash and Short-term Investments

Cash consists of uninvested balances in bank accounts. We had a cash balance of \$14.6 million at the end of the first quarter of 2016, compared to \$11.1 million at the end of 2015. Short-term investments are carried at cost, which approximates fair value. The balance at March 31, 2016 was \$19.4 million, compared to \$6.3 million at December 31, 2015.

3. FAIR VALUE MEASUREMENTS

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

Fair value is defined as the price in the principal market that would be received for an asset to facilitate an orderly transaction between market participants on the measurement date.

Table of Contents

We determined the fair value of certain financial instruments based on their underlying characteristics and relevant transactions in the marketplace. GAAP guidance requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The guidance also describes three levels of inputs that may be used to measure fair value.

Financial assets are classified based upon the lowest level of significant input that is used to determine fair value. The following are the levels of the fair value hierarchy and a brief description of the type of valuation inputs that are used to establish each level:

Pricing Level 1 is applied to valuations based on readily available, unadjusted quoted prices in active markets for identical assets.

Pricing Level 2 is applied to valuations based upon quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets; or valuations based on models where the significant inputs are observable (e.g. interest rates, yield curves, prepayment speeds, default rates, loss severities) or can be corroborated by observable market data.

Pricing Level 3 is applied to valuations that are derived from techniques in which one or more of the significant inputs are unobservable.

As a part of management's process to determine fair value, we utilize widely recognized, third-party pricing sources to determine our fair values. We have obtained an understanding of the third-party pricing sources' valuation methodologies and inputs. The following is a description of the valuation techniques used for financial assets that are measured at fair value, including the general classification of such assets pursuant to the fair value hierarchy.

Corporate, Agencies, Government and Municipal Bonds: The pricing vendor employs a multi-dimensional model which uses standard inputs including (listed in approximate order of priority for use) benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, market bids/offers and other reference data. The pricing vendor also monitors market indicators, as well as industry and economic events. All bonds valued using these techniques are classified as Level 2. All corporate, agency, government and municipal securities were deemed Level 2.

Mortgage-backed Securities (MBS)/Commercial Mortgage-backed Securities (CMBS) and Asset-backed Securities (ABS): The pricing vendor evaluation methodology includes principally interest rate movements and new issue data. Evaluation of the tranches (non-volatile, volatile or credit sensitivity) is based on the pricing vendors' interpretation of

accepted modeling and pricing conventions. This information is then used to determine the cash flows for each tranche, benchmark yields, prepayment assumptions and to incorporate collateral performance. To evaluate MBS and CMBS volatility, an option adjusted spread model is used in combination with models that simulate interest rate paths to determine market price information. This process allows the pricing vendor to obtain evaluations of a broad universe of securities in a way that reflects changes in yield curve, index rates, implied volatility, mortgage rates and recent trade activity. MBS/CMBS and ABS with corroborated, observable inputs are classified as Level 2. All of our MBS/CMBS and ABS are deemed Level 2.

Common Stock: Exchange traded equities have readily observable price levels and are classified as Level 1 (fair value based on quoted market prices). All of our common stock holdings are deemed Level 1.

For the Level 2 securities, as described above, we periodically conduct a review to assess the reasonableness of the fair values provided by our pricing services. Our review consists of a two pronged approach. First, we compare prices provided by our pricing services to those provided by an additional source. Second, we obtain prices from securities brokers and compare them to the prices provided by our pricing services. In both comparisons, when discrepancies are found, we compare our prices to actual reported trade data for like securities. Based on this assessment, we determined that the fair values of our Level 2 securities provided by our pricing services are reasonable.

For common stock, we receive prices from a nationally recognized pricing service. Prices are based on observable inputs in an active market and are therefore disclosed as Level 1. Based on this assessment, we determined that the fair values of our Level 1 securities provided by our pricing service are reasonable.

Due to the relatively short-term nature of cash, short-term investments, accounts receivable and accounts payable, their carrying amounts are reasonable estimates of fair value.

Table of Contents

Assets measured at fair value in the accompanying unaudited condensed consolidated interim financial statements on a recurring basis are summarized below:

	As of March 31, 2016			
	Fair Value Measurements Using			
	Quoted Prices Active Market Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	
(in thousands)	(Level 1)	(Level 2)	(Level 3)	Total

Municipal	—	610,400	—	610,400
Equity	375,424	—	—	375,424
Total available-for-sale securities	\$ 375,424	\$ 1,538,110	\$ —	\$ 1,913,534

* Non-agency asset-backed and commercial mortgage-backed

As noted in the above table, we did not have any assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the period. Additionally, there were no securities transferred in or out of levels 1 or 2 during the three-month period ended March 31, 2016.

4. INCOME TAXES

Our effective tax rate for the three-month period ended March 31, 2016 was 31.1 percent, compared to 31.3 percent for the same period in 2015. Effective rates are dependent upon components of pretax earnings and the related tax effects. The effective rate was slightly lower for the three month period ended March 31, 2016 due to an increase in tax-favored investment income.

Income tax expense attributable to income from operations for the three-month period ended March 31, 2016 and 2015 differed from the amounts computed by applying the U.S. federal tax rate of 35 percent to pretax income as a result of the following:

Table of Contents

(in thousands)	For the Three-Month Periods Ended March 31,			
	2016		2015	
	Amount	%	Amount	%
Provision for income taxes at the statutory rate of 35%	\$ 15,958	35.0 %	\$ 15,580	35.0 %

ESOP dividends paid deduction	(232)	(0.5) %	(220)	(0.5) %
Other items, net	139	0.2 %	94	0.3 %
Total tax expense	\$ 14,200	31.1 %	\$ 13,915	31.3 %

5. STOCK BASED COMPENSATION

Our RLI Corp. Omnibus Stock Plan (omnibus plan) was in place from 2005 to 2010. The omnibus plan provided for equity-based compensation, including stock options, up to a maximum of 3,000,000 shares of common stock (subject to adjustment for changes in our capitalization and other events). Between 2005 and 2010, we granted 2,458,059 stock options under this plan, including incentive stock options (ISOs), which were adjusted as part of the special dividends paid in 2014 and prior years. The omnibus plan was replaced in 2010.

In 2010, our shareholders approved the RLI Corp. Long-Term Incentive Plan (2010 LTIP), which provides for equity-based compensation and replaced the omnibus plan. In conjunction with the adoption of the 2010 LTIP, effective May 6, 2010, options were no longer granted under the omnibus plan. The 2010 LTIP provided for equity-based compensation, including stock options, up to a maximum of 4,000,000 shares of common stock (subject to adjustment for changes in our capitalization and other events). Between 2010 and 2015, we granted 2,878,000 stock options under the 2010 LTIP. The 2010 LTIP was replaced in the second quarter of 2015.

During the second quarter of 2015, our shareholders approved the 2015 RLI Corp. Long-Term Incentive Plan (2015 LTIP), which provides for equity-based compensation and replaced the 2010 LTIP. In conjunction with the adoption of the 2015 LTIP, effective May 7, 2015, options were no longer granted under the 2010 LTIP. Awards under the 2015 LTIP may be in the form of restricted stock, stock options (non-qualified only), stock appreciation rights, performance units as well as other stock-based awards. Eligibility under the 2015 LTIP is limited to employees and directors of the company or any affiliate. The granting of awards under the 2015 LTIP is solely at the discretion of the board of directors. The maximum number of shares of common stock available for distribution under the 2015 LTIP is 4,000,000 shares (subject to adjustment for changes in our capitalization and other events). Since 2015, we have granted 546,500 stock options under the 2015 LTIP, including 36,500 thus far in 2016.

Under the 2015 LTIP, as under the 2010 LTIP and omnibus plan, we grant stock options for shares with an exercise price equal to the fair market value of the shares at the date of grant (subject to adjustments for changes in our capitalization, special dividends and other events as set forth in such plans). Options generally vest and become exercisable ratably over a five-year period and expire eight years after grant.

For most participants, the requisite service period and vesting period will be the same. For participants who are retirement eligible, defined by the plan as those individuals whose age and years of service equals 75, the requisite service period is deemed to be met and options are immediately expensed on the date of grant. For participants who will become retirement eligible during the vesting period, the requisite service period over which expense is recognized is the period between the grant date and the attainment of retirement eligibility. Shares issued upon option exercise are newly issued shares.

Table of Contents

The following tables summarize option activity for the periods ended March 31, 2016 and 2015:

	Number of Options Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value (in 000's)
Outstanding options at January 1, 2016	2,582,220	\$ 32.42		
Options granted	36,500	\$ 61.27		
Options exercised	(168,480)	\$ 19.00		\$ 7,619
Options canceled/forfeited	(5,440)	\$ 33.69		
Outstanding options at March 31, 2016	2,444,800	\$ 33.78	4.99	\$ 80,880
Exercisable options at March 31, 2016	966,100	\$ 27.24	3.62	\$ 38,280

	Number of Options Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value (in 000's)
Outstanding options at January 1, 2015	2,892,717	\$ 26.65		
Options granted	53,500	\$ 48.82		
Options exercised	(148,952)	\$ 16.66		\$ 4,908
Options canceled/forfeited	(3,760)	\$ 30.09		
Outstanding options at March 31, 2015	2,793,505	\$ 27.60	5.11	\$ 69,299
Exercisable options at March 31, 2015	1,141,065	\$ 20.84	3.90	\$ 36,022

The majority of our stock options are granted annually at our regular board meeting in May. In addition, options are approved at the May meeting for quarterly grants to certain retirement eligible employees. Since stock option grants to retirement eligible employees are fully expensed when issued, the approach allows for a more even expense distribution throughout the year.

Thus far in 2016, 36,500 stock options were granted with a weighted average exercise price of \$61.27 and a weighted average fair value of \$11.32. We recognized \$0.9 million of expense in the first quarter of 2016 related to options vesting. Since options granted under our 2010 LTIP and 2015 LTIP are non-qualified, we recorded a tax benefit of \$0.3 million in the first quarter of 2016 related to this compensation expense. Total unrecognized compensation expense relating to outstanding and unvested options was \$5.2 million, which will be recognized over the remainder of the vesting period. Comparatively, we recognized \$0.9 million of expense in the first quarter of 2015. We recorded a tax benefit of \$0.3 million in the first quarter of 2015 related to this compensation expense.

Edgar Filing: RLI CORP - Form 10-Q

The fair value of options was estimated using a Black-Scholes based option pricing model with the following weighted average grant-date assumptions and weighted average fair values as of March 31:

	2016	2015
Weighted-average fair value of grants	\$ 11.32	\$ 8.97
Risk-free interest rates	1.38 %	1.19 %
Dividend yield	1.60 %	1.80 %
Expected volatility	23.11 %	22.98 %
Expected option life	5.31 years	5.43 years

The risk-free rate was determined based on U.S. treasury yields that most closely approximated the option's expected life. The dividend yield was calculated based on the average annualized ordinary dividends paid during the most recent five-year period. It excluded the special dividends paid in the fourth quarters of 2015 and prior years. The expected volatility was calculated based on the median of the rolling volatilities for the expected life of the options. The expected option life was determined based on historical exercise behavior and the assumption that all outstanding options will be exercised at the midpoint of the current date and remaining contractual term, adjusted for the demographics of the current year's grant.

Table of Contents

6. OPERATING SEGMENT INFORMATION

Selected information by operating segment is presented in the table below. Additionally, the table reconciles segment totals to total earnings and total revenues.

REVENUES (in thousands)	For the Three-Month Periods Ended March 31,

7. ACQUISITION

On February 29, 2016, we acquired the assets of Associations Liability Insurance Agency, Inc. for \$1.2 million, which includes \$0.9 million of cash paid at acquisition and \$0.3 million associated with the present value of a contingent earn-out agreement. The earn-out is subject to the achievement of certain targets and may be adjusted in future periods

based on actual performance achieved. Separately identifiable assets of the agency totaling \$1.2 million and relating to acquired software, trade name and agency relationships was recognized.

On March 4, 2015 we invested an additional \$1.7 million in Prime Holdings Insurance Services, Inc. (Prime), increasing our total equity ownership to 27 percent. Prime writes business through two Illinois domiciled insurance carriers, Prime Insurance Company, an excess and surplus lines company, and Prime Property and Casualty Insurance Inc., an admitted insurance company. The investment in Prime is reflected on our balance sheet as an investment in unconsolidated investee. Under the equity method of accounting we recognize our proportionate share of Prime's income as equity in earnings of unconsolidated investees. Our share of Prime's earnings amounted to \$0.5 million in the first three months of 2016 and 2015.

ITEM 2.MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

“SAFE HARBOR” STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995: This discussion and analysis may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are not historical facts, and involve risks and uncertainties that could cause actual results to differ materially from those expected and projected. Various risk factors that could affect future results are listed in our filings with the Securities and Exchange Commission, including the Annual Report on Form 10-K for the year ended December 31, 2015.

OVERVIEW

RLI Corp. is an Illinois corporation that was organized in 1965. We underwrite selected property and casualty insurance through major subsidiaries collectively known as RLI Insurance Group (the Group). We conduct operations principally through three insurance companies. These companies are organized in a vertical structure beneath RLI Corp. with RLI Insurance Company (RLI Ins.) as the first-level, or principal, insurance subsidiary. RLI Ins. writes multiple lines of insurance on an admitted basis in all 50 states, the District of Columbia, Puerto Rico, the Virgin Islands and Guam. Mt. Hawley Insurance Company (Mt. Hawley), a subsidiary of RLI Ins., writes excess and surplus lines insurance on a non-admitted basis in all 50 states, the District of Columbia, Puerto Rico, the Virgin Islands and Guam. Contractors Bonding and Insurance Company (CBIC), a subsidiary of RLI Ins., writes multiple lines of insurance on an admitted basis in all 50 states and the District of Columbia. Each of our insurance companies is domiciled in Illinois.

As a specialty company with a niche focus, we offer insurance coverages in both the specialty admitted and excess and surplus markets. Coverages in the specialty admitted market, such as our energy surety bonds, are for risks that are unique or hard-to-place in the standard market, but must remain with an admitted insurance company for regulatory or marketing reasons. In addition, our coverages in the specialty admitted market may be designed to meet specific insurance needs of targeted insured groups, such as our professional liability and package coverages for design professionals and our stand-alone personal umbrella policy. The specialty admitted market is subject to more state regulation than the excess and surplus market, particularly with regard to rate and form filing requirements, restrictions on the ability to exit lines of business, premium tax payments and membership in various state associations, such as state guaranty funds and assigned risk plans. We also underwrite coverages in the excess and surplus market. The excess and surplus market, unlike the standard admitted market, is less regulated and more flexible in terms of policy forms and premium rates. This market provides an alternative for customers with risks or loss exposures that generally cannot be written in the standard admitted market. This typically results in coverages that are more restrictive and more expensive than coverages in the standard admitted market. When we underwrite within the excess and surplus market, we are selective in the lines of business and type of risks we choose to write. Using our non-admitted status in this market allows us to tailor terms and conditions to manage these exposures effectively. Often, the development of these coverages is generated through proposals brought to us by an agent or

broker seeking coverage for a specific group of clients or loss exposures. Once a proposal is submitted, our underwriters determine whether it would be a viable product based on our business objectives.

The foundation of our overall business strategy is to underwrite for profit in all market conditions and we have achieved this for 20 consecutive years, averaging an 87.3 combined ratio over that period of time. This foundation drives our ability to provide shareholder returns in three different ways: the underwriting income itself, net investment income from our investment portfolio and long-term appreciation in our equity portfolio. Our investment strategy is based on preservation of capital as the first priority, with a secondary focus on generating total return. The fixed income portfolio consists primarily of highly-rated, diversified, liquid, investment-grade securities. Consistent underwriting income allows a portion of our shareholders' equity to be invested in equity securities. Our equity portfolio consists of a core stock portfolio weighted toward dividend-paying stocks, as well as exchange traded funds (ETFs). Our minority equity ownership interests in Maui Jim, Inc. (Maui Jim), a manufacturer of high-quality sunglasses, and Prime Holdings Insurance Services, Inc. (Prime), a specialty excess and surplus insurance company, has also enhanced overall returns. We have a diversified investment portfolio and closely monitor our investment risks. Despite periodic fluctuations in market value, our equity portfolio is part of a long-term asset allocation strategy and has contributed significantly to our historic growth in book value.

We measure the results of our insurance operations by monitoring certain measures of growth and profitability across three distinct business segments: casualty, property and surety. Growth is measured in terms of gross premiums written and profitability is analyzed through combined ratios, which are further subdivided into their respective loss and expense components.

Table of Contents

The property and casualty insurance business is cyclical and influenced by many factors, including price competition, economic conditions, natural or man-made disasters (for example, earthquakes, hurricanes and terrorism), interest rates, state regulations, court decisions and changes in the law.

One of the unique and challenging features of the property and casualty insurance business is that coverages must be priced before costs have fully developed, because premiums are charged before claims are incurred. This requires that liabilities be estimated and recorded in recognition of future loss and settlement obligations. Due to the inherent uncertainty in estimating these liabilities, there can be no assurance that actual liabilities will not be more or less than recorded amounts; if actual liabilities differ from recorded amounts, there will be an adverse or favorable effect on net earnings. In evaluating the objective performance measures previously mentioned, it is important to consider the following individual characteristics of each major insurance segment.

The casualty portion of our business consists largely of general liability, personal umbrella, transportation, executive products and commercial umbrella coverages, as well as package business and other specialty coverages, such as professional liability and workers compensation for office-based professionals. We offer fidelity and crime coverage for commercial insureds and select financial institutions and recently expanded our casualty offerings to include medical and healthcare professional liability coverage in the excess and surplus market. We also assume select casualty business for excess and surplus accounts through our quota share reinsurance agreement with Prime. The casualty business is subject to the risk of estimating losses and related loss reserves because the ultimate settlement of a casualty claim may take several years to fully develop. The casualty segment is also subject to inflation risk and may be affected by evolving legislation and court decisions that define the extent of coverage and the amount of compensation due for injuries or losses.

Our property segment is comprised primarily of commercial fire, earthquake, difference in conditions, marine and facultative and treaty reinsurance including crop. We also offer select personal lines policies, such as recreational vehicle, jewelry and Hawaii homeowners coverages. While our marine and facultative reinsurance coverages are predominantly domestic risks, these portfolios do contain a relatively small portion of foreign risks. Property insurance and reinsurance results are subject to the variability introduced by perils such as earthquakes, fires and hurricanes. Our major catastrophe exposure is to losses caused by earthquakes, primarily on the West Coast. Our second largest catastrophe exposure is to losses caused by wind storms to commercial properties throughout the Gulf and East Coast, as well as to homes we insure in Hawaii. We limit our net aggregate exposure to a catastrophic event by minimizing the total policy limits written in a particular region, purchasing reinsurance and maintaining policy terms and conditions throughout market cycles. We also use computer-assisted modeling techniques to provide estimates that help us carefully manage the concentration of risks exposed to catastrophic events. Our assumed multi-peril crop and hail treaty reinsurance business covers revenue shortfalls or production losses due to natural causes such as drought, excessive moisture, hail, wind, frost, insects and disease. Significant aggregation of these losses is mitigated by the U.S. Federal Government reinsurance program that provides stop loss protection inuring to our benefit. As noted in previous filings, our assumed crop reinsurance business was reduced for 2015 and expired at the end of the 2015 crop year due to the acquisition of the cedant, which terminated the program. Additionally, we discontinued offering facultative reinsurance at the end of the third quarter of 2015 as a result of challenging market conditions.

The surety segment specializes in writing small-to-large commercial and contract surety coverages, as well as those for the energy, petrochemical and refining industries. We offer miscellaneous bonds including license and permit, notary and court bonds. Often, our surety coverages involve a statutory requirement for bonds. While these bonds typically maintain a relatively low loss ratio, losses may fluctuate due to adverse economic conditions affecting the financial viability of our insureds. The contract surety product guarantees the construction work of a commercial contractor for a specific project. Generally, losses occur due to the deterioration of a contractor's financial condition. This line has historically produced marginally higher loss ratios than other surety lines during economic downturns.

The insurance marketplace remains intensely competitive across all of our segments. New entrants, alternative capital and lower catastrophe activity in recent periods has had a significant impact on the industry. Despite these challenges in today's marketplace, we believe that our business model is built to create underwriting income by focusing on sound risk selection and discipline. Our primary focus will continue to be on underwriting profitability, with a secondary focus on premium growth where we believe underwriting profit exists, as opposed to general premium growth or market share measurements.

GAAP and non-GAAP Financial Performance Metrics

Throughout this quarterly report, we present our operations in the way we believe will be most meaningful, useful and transparent to anyone using this financial information to evaluate our performance. In addition to the GAAP presentation of net

Table of Contents

income, we show certain statutory reporting information and other non-GAAP financial measures that we believe are valuable in managing our business and drawing comparisons to our peers. These measures are underwriting income, combined ratios and net unpaid loss and settlement expenses.

Following is a list of non-GAAP measures found throughout this report with their definitions, relationships to GAAP measures and explanations of their importance to our operations.

Underwriting Income

Underwriting income or profit represents one measure of the pretax profitability of our insurance operations and is derived by subtracting losses and settlement expenses, policy acquisition costs and insurance operating expenses from net premiums earned. Each of these captions is presented in the statements of earnings, but not subtotaed. However, this information is available in total and by segment in note 11 to the consolidated financial statements in our 2015 Annual Report on Form 10-K, regarding operating segment information. The nearest comparable GAAP measure is earnings before income taxes which, in addition to underwriting income, includes net investment income, net realized gains/losses on investments, general corporate expenses, debt costs and earnings from unconsolidated investees.

Combined Ratio

This ratio is a common industry measure of profitability for any underwriting operation and is calculated in two components. First, the loss ratio is losses and settlement expenses divided by net premiums earned. The second component, the expense ratio, reflects the sum of policy acquisition costs and insurance operating expenses, divided by net premiums earned. All items included in these components of the combined ratio are presented in our GAAP financial statements. The sum of the loss and expense ratios is the combined ratio. The difference between the combined ratio and 100 reflects the per-dollar rate of underwriting income or loss. For example, a combined ratio of 85 implies that for every \$100 of premium we earn, we record \$15 of underwriting income.

Net Unpaid Loss and Settlement Expenses

Unpaid losses and settlement expenses, as shown in the liabilities section of our balance sheets, represents the total obligations to claimants for both estimates of known claims and estimates for incurred but not reported (IBNR) claims. The related asset item, reinsurance balances recoverable on unpaid losses and settlement expense, is the estimate of known claims and estimates of IBNR that we expect to recover from reinsurers. The net of these two items is generally referred to as net unpaid loss and settlement expenses and is commonly used in our disclosures regarding the process of establishing these various estimated amounts.

Critical Accounting Policies

In preparing the unaudited condensed consolidated interim financial statements, we are required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent assets and liabilities as of the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses for the reporting period. Actual results could differ significantly from those estimates.

The most critical accounting policies involve significant estimates and include those used in determining the liability for unpaid losses and settlement expenses, investment valuation and OTTI, recoverability of reinsurance balances, deferred policy acquisition costs and deferred taxes. For a detailed discussion of each of these policies, refer to our 2015 Annual Report on Form 10-K. There have been no significant changes to any of these policies during the current year.

Table of Contents

THREE MONTHS ENDED MARCH 31, 2016 COMPARED TO THREE MONTHS ENDED MARCH 31, 2015

Consolidated revenues, as displayed in the table that follows, totaled \$201.7 million for the first quarter of 2016, compared to \$195.8 million for the same period in 2015.

	For the Three-Month Periods Ended March 31,	
	2016	2015
Consolidated revenues (in thousands)		
Net premiums earned	\$ 176,918	\$ 169,003
Net investment income	13,370	13,495
Net realized investment gains	11,400	13,286
Total consolidated revenue	\$ 201,688	\$ 195,784

Consolidated revenue for the first quarter of 2016 increased \$5.9 million, or 3 percent, from the same period in 2015. Net premiums earned for the Group increased 5 percent for the quarter, driven by growth from our casualty and surety segments, while investment income declined slightly, down 1 percent.

Net after-tax earnings for the first quarter of 2016 totaled \$31.4 million, \$0.71 per diluted share, compared to \$30.6 million, \$0.70 per diluted share, for the same period last year. Results for both periods reflected positive underwriting results for the current accident year and benefited from favorable development on prior years' loss reserves. Both periods also benefited from light catastrophe activity, as storm losses had a negligible effect on results for each period. In the first quarter of 2016, favorable development on prior years' loss reserves resulted in additional pretax earnings of \$12.5 million. Comparatively, in the first quarter of 2015 favorable development on prior years' loss reserves resulted in additional pretax earnings of \$8.0 million. Bonus and profit sharing-related expenses associated with the above mentioned prior year reserve development totaled \$1.6 million in 2016, compared to \$1.0 million in 2015.

During the first quarter of 2016, equity in earnings of unconsolidated investees totaled \$3.8 million. This amount includes \$3.3 million from Maui Jim and \$0.5 million from Prime. Comparatively, the first quarter of 2015 reflected \$4.2 million of earnings, including \$3.7 million from Maui Jim and \$0.5 million from Prime. The slight decline in Maui Jim earnings for 2016 was due to increased marketing efforts and unfavorable foreign exchange results.

Comprehensive earnings, which include net earnings plus other comprehensive earnings (primarily the change in unrealized gains/losses net of tax), totaled \$53.2 million, \$1.20 per diluted share, for the first quarter of 2016, compared to \$23.0 million, \$0.52 per diluted share, for the first quarter of 2015. Unrealized gains, net of tax, for the first quarter of 2016 were \$21.8 million, compared to unrealized losses of \$7.6 million for the same period in 2015. Unrealized gains in the first quarter of 2016 were attributable to both the fixed income and equity portfolios. The

unrealized gains in the fixed income portfolio were driven by a decline in interest rates during the quarter.

RLI INSURANCE GROUP

As reflected in the table below, gross premiums written for the Group increased 3 percent to \$196.2 million for the first quarter of 2016. Growth was achieved by our casualty and surety segments, which improved 9 percent and 7 percent, respectively, and served to offset a decline from our property segment. The combined impact of our recent exit from crop and facultative reinsurance businesses, coupled with ever-softening rates for excess and surplus property coverages, resulted in the decline in gross premiums written from property this quarter. The trend of falling rates for catastrophe exposed coverages continued in the first part of 2016, down 15 percent, while rate changes experienced for most other coverages were in the low to mid-single digit range. On a net premiums earned basis, premiums increased \$7.9 million, or 5 percent. This growth was attributable to our casualty and surety segments, where net premiums earned were up 10 percent and 5 percent, respectively, from the prior year, and offset an 8 percent decline from the property segment. Underwriting income for the Group totaled \$21.3 million for the first quarter of 2016, compared to \$17.6 million in 2015. Both periods reflect positive underwriting results for the current accident year and favorable reserve development on prior accident years. Favorable development on prior years' loss reserves improved net underwriting results by \$10.9 million in 2016, compared to \$7.0 million in 2015. The GAAP combined ratio totaled 88.0 in 2016, compared to 89.5 in 2015. The loss ratio decreased to 45.9 from 47.8, while the Group's expense ratio increased slightly to 42.1 from 41.7.

Table of Contents

	For the Three-Month Periods Ended March 31,	
	2016	2015
Gross premiums written (in thousands)		
Casualty	\$ 124,051	\$ 113,907
Property	41,645	48,096
Surety	30,553	28,564
Total	\$ 196,249	\$ 190,567
Underwriting income (in thousands)		
Casualty	\$ 9,106	\$ 5,272
Property	6,198	8,176
Surety	6,000	4,190
Total	\$ 21,304	\$ 17,638
Combined ratio		
Casualty	91.6	94.7
Property	84.0	80.6
Surety	79.8	85.1
Total	88.0	89.5

Casualty

Gross premiums written for the casualty segment increased 9 percent to \$124.1 million for the first quarter of 2016, compared to \$113.9 million for the first quarter of 2015. Most products within the segment posted an increase in gross premiums written, as expansion efforts and newer product initiatives contributed to the improved top line. Growth continued for our transportation unit, which posted a 15 percent increase in the quarter, its fourth consecutive quarter of double digit premium growth. Favorable pricing also benefited this business in early 2016, continuing the trend seen in recent periods. Our medical professional liability business contributed significantly to growth in the first quarter of 2016, posting \$8.9 million of gross premiums written, which doubled production from the prior year. The increase in 2016 related to liability coverage offerings for healthcare facilities. Premium growth in the quarter was also noteworthy from our P&C package business, up \$1.2 million (10 percent) and umbrella coverages, which increased \$2.0 million (7 percent). Growth from these products more than offset declines from our executive products and general liability businesses, which decreased 2 percent and 1 percent, respectively, due to increased competition and declining rates for these coverages.

The casualty segment recorded underwriting income of \$9.1 million in the first quarter of 2016, compared to \$5.3 million for the same period last year. Results for both periods benefited from favorable development on prior years' loss reserves. As a result of our reserve study, during the first quarter of 2016 we released reserves which improved the segment's net underwriting results by \$11.0 million. Products with favorable development included general liability, umbrella, professional services, executive products and P&C package, while transportation was unfavorable. From an accident year standpoint, the majority of the favorable development occurred on more recent accident years. Comparatively, 2015 results included favorable development on prior accident years' loss reserves, primarily for

general liability, umbrella, transportation and P&C package, slightly offset by unfavorable development from our executive products business. In total, favorable development improved the segment's net underwriting results in the first quarter of 2015 by \$7.6 million.

Overall, the combined ratio for the casualty segment was 91.6 for 2016, compared to 94.7 in 2015. The segment's loss ratio was 55.9 in 2016, compared to 59.4 in 2015. The loss ratio improvement in 2016 was due primarily to higher levels of favorable development on prior years' reserves. The current accident year loss ratio also improved slightly in 2016. The expense ratio for the casualty segment was 35.7 for the first quarter of 2016, compared to 35.3 for the same period in 2015.

Property

Gross premiums written for the Group's property segment totaled \$41.6 million for the first quarter of 2016, a \$6.5 million (13 percent) decrease from the same period last year. Of this decline, \$3.5 million related to our previously announced exits from crop and facultative reinsurance businesses. The remaining premium decrease was driven largely by ongoing competitive pressures and price declines for excess and surplus commercial property coverages and reunderwriting efforts in our recreational vehicles book of business. Commercial property business, which includes our difference in conditions and fire products, posted premium declines of \$0.7 million (8 percent) and \$1.5 million (10 percent), respectively. Our recreational

Table of Contents

vehicles line declined as well, down 25 percent to \$2.6 million, as efforts to rehabilitate this specialty personal business in order to attain profitability continued. Top line production also decreased modestly for marine, which was down \$0.6 million (5 percent) in the quarter. Partially offsetting these decreases, gross premiums written from our specialty personal coverages for Hawaii homeowners increased 8 percent.

Underwriting income for the segment was \$6.2 million for the first quarter of 2016, compared to \$8.2 million for the same period last year. Results for both periods reflect positive underwriting income for the current accident year and an absence of significant catastrophe activity. Catastrophe losses reduced net underwriting results for 2016 by \$0.2 million, and did not impact 2015 underwriting results. From a prior accident year standpoint, both periods were minimally impacted by development on prior years' loss and catastrophe reserves

Underwriting results for the first quarter of 2016 translated into a combined ratio of 84.0, compared to 80.6 for the same period last year. The segment's loss ratio increased slightly to 39.3 in 2016 from 38.1 in 2015, as the current accident year loss ratio was 2 points better in 2015. From an expense standpoint, the segment's expense ratio for the first quarter was 44.7 for 2016, compared to 42.5 in 2015. The increased expense ratio relates primarily to the overall decline in premium.

Surety

The surety segment recorded gross premiums written of \$30.6 million for the first quarter of 2016, an increase of \$2.0 million, or 7 percent, from the same period last year. Growth within the segment was driven by miscellaneous and commercial surety, up 12 percent and 9 percent, respectively, while contract surety posted a flat top line. Premiums from energy surety were down slightly, as lower oil prices continued to impact this business.

The surety segment recorded underwriting income of \$6.0 million, compared to \$4.2 million for the same period last year. Underwriting performance for each period reflects positive results for the current accident year. Results for 2016 included favorable development on prior accident years' reserves, largely from contract surety, which improved the segments net underwriting results by \$0.3 million. Comparatively, 2015 results included unfavorable development on prior accident years' loss reserves which impacted the segment's net underwriting results by \$0.3 million. The unfavorable development in 2015 was also due largely to contract surety business.

The combined ratio for the surety segment totaled 79.8 for the first quarter of 2016, compared to 85.1 for the same period in 2015. The segment's loss ratio was 17.6 for 2016, compared to 22.1 for 2015. The loss ratio decrease was due to a combination of improved current accident year loss ratio performance and the benefit from favorable development on prior years' reserves in 2016. The expense ratio improved slightly to 62.2 for the first quarter of 2016, from 63.0 in the first quarter of 2015, as premium growth allowed for improved leveraging of our expense base.

INVESTMENT INCOME AND REALIZED CAPITAL GAINS

Our investment portfolio generated net investment income of \$13.4 million during the first quarter of 2016, a decrease of 0.9 percent from that reported for the same period in 2015. The decrease in investment income was due to the current lower yield environment as well as a higher allocation to municipal securities, which exhibit lower yields on a pretax basis. On an after-tax basis, investment income increased by 0.6 percent.

	3/31/2016			12/31/2015	
	Financial			Financial	
(in thousands)	Stmt Value	%		Stmt Value	%
Fixed income	\$ 1,556,968	77.6 %		\$ 1,538,110	78.8 %
Equity securities	389,551	19.4 %		375,424	19.2 %
Other invested assets	25,279	1.3 %		20,666	1.1 %
Cash and short-term investments	33,974	1.7 %		17,343	0.9 %
Total	\$ 2,005,772	100.0 %		\$ 1,951,543	100.0 %

We believe our overall asset allocation best meets our strategy to preserve capital for policyholders, provide sufficient income to support insurance operations, and to effectively grow book value over a long-term investment horizon.

Table of Contents

Yields on our fixed income investments for the first quarter of 2016 and 2015 were as follows:

	1Q 2016		1Q 2015	
Pretax Yield				
Taxable	3.34	%	3.45	%
Tax-Exempt	2.73	%	2.85	%
After-Tax Yield				
Taxable	2.17	%	2.24	%
Tax-Exempt	2.59	%	2.70	%

The fixed income portfolio increased by \$18.9 million in the first three months of 2016. The increase is primarily due to lower interest rates, resulting in higher valuations for fixed income securities. This portfolio had a tax-adjusted total return on a mark-to-market basis of 2.6 percent. Average fixed income duration was 5.0 years at March 31, 2016, reflecting our current liability structure and sound capital position.

The equity portfolio increased by \$14.1 million during the first three months of 2016, to \$389.6 million, and had a total return of 5.7 percent through March 31, 2016.

We recognized \$11.4 million in realized gains in the first quarter of 2016, compared to realized gains of \$13.3 million in the same period of 2015. Realized gains were primarily taken from the equity portfolio. We did not record any realized losses associated with OTTI of securities during the first quarter of 2016.

The following table is used as part of our impairment analysis and illustrates certain industry-level measurements relative to our equity portfolio as of March 31, 2016, including fair value, cost basis and unrealized gains and losses.

(in thousands)	3/31/2016		Unrealized		Net
	Cost Basis	Fair Value	Gains	Losses	
Consumer discretionary	\$ 8,335	\$ 21,714	\$ 13,379	\$ —	\$ 13,379
Consumer staples	12,792	30,544	17,806	(54)	17,752
Energy	14,411	24,324	10,374	(461)	9,913
Financials	31,512	48,056	16,800	(256)	16,544
Healthcare	3,445	17,056	13,611	—	13,611
Industrials	13,185	28,504	15,319	—	15,319
Information technology	14,740	29,120	14,380	—	14,380

Edgar Filing: RLI CORP - Form 10-Q

Materials	2,220	6,669	4,449	—	4,449
Telecommunications	3,192	10,696	7,504	—	7,504
Utilities	27,606	52,714	25,108	—	25,108
ETF	75,864	120,154	44,290	—	44,290
	\$ 207,302	\$ 389,551	\$ 183,020	\$ (771)	\$ 182,249

INCOME TAXES

Our effective tax rate for the first quarter of 2016 was 31.1 percent, compared to 31.3 percent for the same period in 2015. Effective rates are dependent upon components of pretax earnings and the related tax effects. The effective rate for the first quarter of 2016 was slightly lower due to an increase in tax-favored investment income.

LIQUIDITY AND CAPITAL RESOURCES

We have three primary types of cash flows: (1) cash flows from operating activities, which consist mainly of cash generated by our underwriting operations and income earned on our investment portfolio, (2) cash flows from investing activities related to the purchase, sale and maturity of investments, and (3) cash flows from financing activities that impact our capital structure, such as shareholder dividend payments and changes in debt and shares outstanding.

Table of Contents

The following table summarizes cash flows provided by (used in) our activities for the three-month periods ended March 31, 2016 and 2015:

	2016	2015
	(in thousands)	
Operating cash flows	\$ 21,266	\$ 23,407
Investing cash flows	\$ (13,347)	\$ (16,443)
Financing cash flows	\$ (4,431)	\$ (6,070)
Total	\$ 3,488	\$ 894

Operating activities generated positive cash flows of \$21.3 million in the first three months of 2016, compared to \$23.4 million in the same period last year. The decrease in operating cash flows was due largely to an increase in paid losses compared to that reported for the same period in 2015.

We have \$148.6 million in debt outstanding. On October 2, 2013, we completed a public debt offering, issuing \$150.0 million in senior notes maturing September 15, 2023 (a 10-year maturity), and paying interest semi-annually at the rate of 4.875 percent per annum. The notes were issued at a discount resulting in proceeds, net of discount and commission, of \$148.6 million. The estimated fair value for the senior note at March 31, 2015 was \$161.0 million. The fair value of our debt is estimated based on the limited observable prices that reflect thinly traded securities.

As of March 31, 2016, we had cash, short-term investments and other investments maturing within one year of approximately \$56.9 million and an additional \$307.7 million maturing between one to five years. As of March 31, 2016, our short-term investments were held primarily in government/agency funds. All funds are NAIC-rated, AAA-rated and maintain average weighted maturities of less than 60 days. Holdings within each of these funds comply with regulatory limitations.

Whereas our strategy is to be fully invested at all times, short-term investments in excess of demand deposit balances are considered a component of investment activities, and thus are classified as investments in our consolidated balance sheets.

We also maintain a revolving line of credit with JP Morgan Chase Bank N.A., which permits us to borrow up to an aggregate principal amount of \$40.0 million. This facility was entered into during the second quarter of 2014 and replaced the previous \$25.0 million facility which expired on May 31, 2014. Under certain conditions, the line may be increased up to an aggregate principal amount of \$65.0 million. The facility has a four-year term that expires on May 28, 2018. As of and during the three-month period ended March 31, 2016, no amounts were outstanding on this facility.

Additionally, two of our insurance companies, RLI Ins. and Mt. Hawley, are members of the Federal Home Loan Bank of Chicago (FHLBC). Membership in the Federal Home Loan Bank System provides both companies access to an additional source of liquidity via a secured lending facility. Our membership allows each insurance subsidiary to determine tenor and structure at the time of borrowing. As of and during the three-month period ended March 31, 2015, there were no outstanding borrowing amounts with FHLBC.

We believe that cash generated by operations and investments will provide sufficient sources of liquidity to meet our anticipated needs over the next 12 to 24 months. In the event they are not sufficient, we believe cash available from financing activities and other sources will provide sufficient additional liquidity.

We have not had any liquidity issues affecting our operations as we have sufficient cash flow to support operations. In addition to our bank credit facility and FHLBC membership, our highly liquid investment portfolio provides an additional source of liquidity.

We maintain a diversified investment portfolio representing policyholder funds that have not yet been paid out as claims, as well as the capital we hold for our shareholders. As of March 31, 2016, our investment portfolio had a balance sheet value of \$2.0 billion. Invested assets at March 31, 2016, have increased \$54.2 million from December 31, 2015.

Table of Contents

As of March 31, 2016, our investment portfolio had the following asset allocation breakdown:

Portfolio Allocation
(in thousands)

Asset class	Cost or Amortized Cost	Fair Value	Unrealized Gain/(Loss)	% of Total Fair Value	Quality*
U.S. government	\$ 86,872	\$ 88,205	\$ 1,333	4.4	% AAA
U.S. agency	15,482	16,242	760	0.8	% AA+
Non-U.S. govt. & agency	7,009	6,779	(230)	0.3	% BBB+
Agency MBS	242,377	250,815	8,438	12.5	% AAA
ABS/CMBS**	89,522	91,298	1,776	4.6	% AAA
Corporate	554,865	559,989	5,124	27.9	% BBB+
Municipal	516,679	543,640	26,961	27.1	% AA
Total Fixed Income	\$ 1,512,806	\$ 1,556,968	\$ 44,162	77.6	% AA-
Equity	\$ 207,302	\$ 389,551	\$ 182,249	19.4	%
Other Invested Assets	\$ 25,279	\$ 25,279	\$ —	1.3	%
Cash and Short-Term Investments	\$ 33,974	\$ 33,974	\$ —	1.7	%
Total Portfolio	\$ 1,779,361	\$ 2,005,772	\$ 226,411	100.0	%

*Quality ratings provided by Moody's and S&P

**Asset-backed and commercial mortgage-backed securities

Our investment portfolio does not have any exposure to derivatives.

As of March 31, 2016, our fixed income portfolio had the following rating distribution:

AAA	34.9	%
AA	28.1	%
A	18.5	%
BBB	11.9	%
BB	3.2	%
B	2.7	%
CCC	0.2	%
NR	0.5	%

Total 100.0%

As of March 31, 2016, the duration of the fixed income portfolio was 5.0 years. Our fixed income portfolio remained well diversified, with 1,049 individual issues as of March 31, 2016.

Our investment portfolio has limited exposure to structured asset-backed securities (ABS). As of March 31, 2016, we had \$47.9 million in ABS which are pools of assets collateralized by cash flows from several types of loans, including home equity, credit cards, autos and similar obligations.

As of March 31, 2016, we had \$43.4 million in commercial mortgage backed securities (CMBS) and \$250.8 million in residential mortgage backed securities backed by government sponsored enterprises (GSEs - Freddie Mac, Fannie Mae and Ginnie Mae). Excluding the GSE backed MBS, our exposure to ABS and CMBS was 4.6 percent of our investment portfolio at quarter end.

We had \$560.0 million in corporate fixed income securities as of March 31, 2016. As of March 31, 2016, we had \$66.0 million invested in a high yield credit strategy. This portfolio consists of floating rate bank loans and bonds that are below investment grade in credit quality and offer incremental yield over our core fixed income portfolio.

Table of Contents

We also maintain an allocation to municipal fixed income securities. As of March 31, 2016, we had \$543.6 million in municipal securities. As of March 31, 2016, approximately 91 percent of our municipal bond portfolio maintains an 'AA' or better rating, while 99 percent of the municipal bond portfolio is rated 'A' or better.

At March 31, 2016, our equity portfolio had a fair value of \$389.6 million and is also a source of liquidity. The securities within the equity portfolio remain primarily invested in large-cap issues with strong dividend performance. In the equity portfolio, the strategy remains one of value investing, with security selection taking precedence over market timing. We use a buy-and-hold strategy, minimizing both transactional costs and taxes.

As of March 31, 2016, our equity portfolio had a dividend yield of 2.8 percent, compared to 2.2 percent for the S&P 500 index. Because of the corporate dividend-received-deduction applicable to our dividend income, we pay an effective tax rate of 14.2 percent on dividends, compared to 35.0 percent on taxable interest and 5.3 percent on municipal bond interest income. The equity portfolio is managed in a diversified and granular manner, with 81 individual names and no single stock exposure greater than 2 percent of the equity portfolio.

Other invested assets include three investments in low income housing tax credit partnerships (LIHTC), carried at amortized cost, membership in the Federal Home Loan Bank of Chicago (FHLBC), carried at cost, and an investment in a real estate fund, carried at cost. Our LIHTC interests had a balance of \$18.6 million at March 31, 2016, compared to \$14.0 million at December 31, 2015 and recognized a total tax benefit of \$0.4 million during the first quarter of 2016 compared to \$0.3 million during the first quarter of 2015. Our investment in FHLBC stock totaled \$1.6 million at March 31, 2016 and December 31, 2015. Our investment in the real estate fund totaled \$5.0 million, the same amount as December 31, 2015.

Our capital structure is comprised of equity and debt outstanding. As of March 31, 2016, our capital structure consisted of \$148.6 million in 10-year maturity senior notes maturing in 2023 (debt) and \$872.2 million of shareholders' equity. Debt outstanding comprised 14.6 percent of total capital as of March 31, 2016. Interest and fees on debt obligations totaled \$1.9 million during the first three months of 2016, the same amount as the previous year. We have incurred interest expense on debt at an average interest rate of 4.91 percent for the three-month periods ended March 31, 2016 and 2015.

We paid a quarterly cash dividend of \$0.19 per share on March 18, 2016, the same amount as the prior quarter. We have paid dividends for 159 consecutive quarters and increased dividends in each of the last 40 years.

Our insurance subsidiaries are organized in a vertical structure with RLI Ins. as the first-level, or principal, insurance subsidiary of RLI Corp. At the holding company (RLI Corp.) level, we rely largely on dividends from our insurance company subsidiaries to meet our obligations for paying principal and interest on outstanding debt, corporate expenses and dividends to RLI Corp. shareholders. As discussed further below, dividend payments to RLI Corp. from our

principal insurance subsidiary are restricted by state insurance laws as to the amount that may be paid without prior approval of the insurance regulatory authorities of Illinois. As a result, we may not be able to receive dividends from such subsidiary at times and in amounts necessary to pay desired dividends to RLI Corp. shareholders. On a GAAP basis, as of March 31, 2016, our holding company had \$872.2 million in equity. This includes amounts related to the equity of our insurance subsidiaries, which is subject to regulatory restrictions under state insurance laws. The unrestricted portion of holding company net assets is comprised primarily of investments and cash, including \$48.2 million in liquid assets, which approximates annual holding company expenditures. Unrestricted funds at the holding company are available to fund debt interest, general corporate obligations and dividend payments to our shareholders. If necessary, the holding company also has other potential sources of liquidity that could provide for additional funding to meet corporate obligations or pay shareholder dividends, which include a revolving line of credit, as well as issuances of common stock and debt.

Ordinary dividends, which may be paid by our principal insurance subsidiary without prior regulatory approval, are subject to certain limitations based upon statutory income, surplus and earned surplus. The maximum ordinary dividend distribution from our principal insurance subsidiary in a rolling 12-month period is limited by Illinois law to the greater of 10 percent of RLI Ins. policyholder surplus, as of December 31 of the preceding year, or the net income of RLI Ins. for the 12-month period ending December 31 of the preceding year. Ordinary dividends are further restricted by the requirement that they be paid from earned surplus. Any dividend distribution in excess of the ordinary dividend limits is deemed extraordinary and requires prior approval from the Illinois Department of Insurance. In the first three months of 2016, RLI Ins. paid a total of \$13.2 million in ordinary dividends to RLI Corp. In 2015, our principal insurance subsidiary paid ordinary dividends totaling \$125.0 million to RLI Corp. No extraordinary dividends were paid during 2015 or 2014. As of March 31, 2016, \$65.0 million of the net assets of our principal insurance subsidiary are not restricted and could be distributed to RLI Corp. as ordinary dividends. Because the limitations are based upon a rolling 12-month period, the presence, amount and impact of these restrictions vary over time.

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of economic losses due to adverse changes in the estimated fair value of a financial instrument as the result of changes in equity prices, interest rates, foreign currency exchange rates and commodity prices. Historically, our primary market risks have been equity price risk associated with investments in equity securities and interest rate risk associated with investments in fixed maturities. We have limited exposure to both foreign currency risk and commodity risk.

Credit risk is the potential loss resulting from adverse changes in an issuer's ability to repay its debt obligations. We monitor our portfolio to ensure that credit risk does not exceed prudent levels. We have consistently invested in high credit quality, investment grade securities. Our fixed maturity portfolio has an average rating of "AA-," with 81 percent rated "A" or better by at least two nationally recognized rating organizations.

On an overall basis, our exposure to market risk has not significantly changed from that reported in our December 31, 2015 Annual Report on Form 10-K.

ITEM 4. Controls and Procedures

We maintain a system of controls and procedures designed to provide reasonable assurance as to the reliability of the financial statements and other disclosures included in this report, as well as to safeguard assets from unauthorized use or disposition. An evaluation of the effectiveness of the design and operation of our disclosure controls and procedures was performed, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, as of the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these disclosure controls and procedures are effective, as of the end of the period covered by this report.

In designing and evaluating our disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurances of achieving the desired control objective, and management necessarily is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. We believe that our disclosure controls and procedures provide such reasonable assurance.

No changes were made to our internal control over financial reporting during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings – There were no material changes to report.

Item 1A. Risk Factors - There were no material changes to report.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds -

Items 2(a) and (b) are not applicable.

In 2010, our Board of Directors implemented a \$100 million share repurchase program. We did not repurchase any shares during 2016. We have \$87.5 million of remaining capacity from the repurchase program. The repurchase program may be suspended or discontinued at any time without prior notice.

Item 3. Defaults Upon Senior Securities - Not Applicable.

Item 4. Mine Safety Disclosures - Not Applicable.

Item 5. Other Information - Not Applicable.
