QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2016

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number: 1-31987

Hilltop Holdings Inc.

(Exact name of registrant as specified in its charter)

Maryland
(State or other jurisdiction of incorporation or organization)

84-1477939
(I.R.S. Employer Identification No.)

200 Crescent Court, Suite 1330

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

Dallas, TX
(Address of principal executive offices)

75201
(Zip Code)

(214) 855-2177

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The number of shares of the registrant's common stock outstanding at April 28, 2016 was 98,498,077.

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements

(Unaudited)

1. Summary of Significant Accounting and Reporting Policies

Nature of Operations

Hilltop Holdings Inc. (“Hilltop” and, collectively with its subsidiaries, the “Company”) is a financial holding company registered under the Bank Holding Company Act of 1956. The Company’s primary line of business is to provide business and consumer banking services from offices located throughout Texas through PlainsCapital Bank (the “Bank”). In addition, the Company provides an array of financial products and services through its broker-dealer, mortgage origination and insurance subsidiaries.

The Company provides its products and services through three primary operating subsidiaries, PlainsCapital Corporation (“PlainsCapital”), Hilltop Securities Holdings LLC (“Securities Holdings”) and National Lloyds Corporation (“NLC”). PlainsCapital is a financial holding company, headquartered in Dallas, Texas, that provides, through its subsidiaries, traditional banking, wealth and investment management and treasury management services primarily in Texas and residential mortgage lending throughout the United States. Securities Holdings is a holding company, headquartered in Dallas, Texas, that provides, through its subsidiaries, investment banking and other related financial services, including municipal advisory, sales, trading and underwriting of taxable and tax-exempt fixed income securities, equity trading, clearing, securities lending, structured finance and retail brokerage services throughout the United States. NLC is a property and casualty insurance holding company, headquartered in Waco, Texas, that provides, through its subsidiaries, fire and homeowners insurance to low value dwellings and manufactured homes primarily in Texas and other areas of the southern United States.

On January 1, 2015, Hilltop completed its acquisition of SWS Group, Inc. (“SWS”) in a stock and cash transaction (the “SWS Merger”), whereby SWS’s broker-dealer subsidiaries, Southwest Securities, Inc. and SWS Financial Services, Inc., became subsidiaries of Securities Holdings, and SWS’s banking subsidiary, Southwest Securities, FSB (“SWS FSB”), was merged into the Bank. On October 5, 2015, Southwest Securities, Inc. and SWS Financial Services, Inc. were renamed “Hilltop Securities Inc.” (“Hilltop Securities”) and “Hilltop Securities Independent Network Inc.” (“HTS Independent Network”), respectively.

On October 22, 2015, the Financial Industry Regulatory Authority (“FINRA”) granted approval to combine First Southwest Company, LLC (“FSC”) and Hilltop Securities, subject to customary conditions. FSC, Hilltop Securities and

HTS Independent Network operated as separate broker-dealers, under coordinated leadership from the date of the SWS Merger until January 22, 2016, when FSC was merged into Hilltop Securities to form a combined firm operating under the “Hilltop Securities” name. We use the term “Hilltop Broker-Dealers” to refer to FSC, Hilltop Securities and HTS Independent Network prior to January 22, 2016 and Hilltop Securities and HTS Independent Network after such date.

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States (“GAAP”), and in conformity with the rules and regulations of the Securities and Exchange Commission (the “SEC”). In the opinion of management, these financial statements contain all adjustments necessary for a fair statement of the results of the interim periods presented. Accordingly, the financial statements do not include all of the information and footnotes required by GAAP for complete financial statements and should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015 (“2015 Form 10-K”). Results for interim periods are not necessarily indicative of results to be expected for a full year or any future period.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Estimates regarding the allowance for loan losses, the fair values of financial instruments, the amounts receivable from the Federal Deposit Insurance Corporation (the “FDIC”) under loss-share agreements (the “FDIC Indemnification Asset”), reserves for losses and loss adjustment expenses (“LAE”), the

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

mortgage loan indemnification liability, and the potential impairment of assets are particularly subject to change. The Company has applied its critical accounting policies and estimation methods consistently in all periods presented in these consolidated financial statements.

Hilltop owns 100% of the outstanding stock of PlainsCapital. PlainsCapital owns 100% of the outstanding stock of the Bank and 100% of the membership interest in PlainsCapital Equity, LLC. The Bank owns 100% of the outstanding stock of PrimeLending, a PlainsCapital Company (“PrimeLending”) and has a 100% membership interest in PlainsCapital Securities, LLC.

PrimeLending owns a 100% membership interest in PrimeLending Ventures Management, LLC, the controlling and sole managing member of PrimeLending Ventures, LLC (“Ventures”).

PlainsCapital also owns 100% of the outstanding common securities of PCC Statutory Trusts I, II, III and IV (the “Trusts”), which are not included in the consolidated financial statements under the requirements of the Variable Interest Entities Subsections of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”), because the primary beneficiaries of the Trusts are not within the consolidated group.

Hilltop has a 100% membership interest in Securities Holdings, which operates through its wholly-owned subsidiaries, Hilltop Securities, HTS Independent Network and First Southwest Holdings, LLC (“First Southwest”). Hilltop Securities is a broker-dealer registered with the SEC and the Financial Industry Regulatory Authority (“FINRA”) and a member of the New York Stock Exchange (“NYSE”), HTS Independent Network is an introducing broker-dealer that is also registered with the SEC and FINRA, and First Southwest Asset Management, LLC, a wholly-owned subsidiary of First Southwest, is a registered investment advisor under the Investment Advisors Act of 1940. As discussed above, prior to January 22, 2016, Securities Holdings’ subsidiaries also included FSC, First Southwest’s principal subsidiary and formerly a broker-dealer registered with the SEC and FINRA and a member of the NYSE.

Hilltop also owns 100% of NLC, which operates through its wholly owned subsidiaries, National Lloyds Insurance Company (“NLIC”) and American Summit Insurance Company (“ASIC”).

The consolidated financial statements include the accounts of the above-named entities. Intercompany transactions and balances have been eliminated. Noncontrolling interests have been recorded for minority ownership in entities that are not wholly owned and are presented in compliance with the provisions of Noncontrolling Interest in Subsidiary Subsections of the ASC.

The operations acquired in the SWS Merger were included in the Company's operating results beginning January 1, 2015 and such operations included a preliminary bargain purchase gain of \$82.8 million as disclosed in the Company's Quarterly Report on Form 10-Q filed with the SEC on May 6, 2015. During 2015, certain adjustments were recorded that resulted in an aggregate decrease in the preliminary bargain purchase gain associated with the SWS Merger to \$81.3 million, which also decreased net income for the three months ended March 31, 2015 by \$1.5 million as compared with amounts previously reported in the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2015. Accordingly, our results for the quarter ended March 31, 2015 and related disclosures have been revised to reflect these adjustments.

Certain reclassifications have been made to the prior period consolidated financial statements to conform with the current period presentation. Additionally, during the preparation of the condensed consolidated financial statements for the period ended September 30, 2015, the Company determined that its previously reported unaudited consolidated statements of cash flows contained in the previously filed Quarterly Reports on Form 10-Q filed with SEC on May 6, 2015 and July 29, 2015 contained a classification error related to how certain acquired balances related to its acquisition of SWS were reflected. Management has evaluated the quantitative and qualitative impact of the classification error to previously issued unaudited consolidated statements of cash flows and concluded that the previously issued condensed consolidated financial statements were not materially misstated. However, in order to correctly present the cash flow statements, management has elected to revise the unaudited consolidated statements of cash flows for each of the three

2. Acquisition

SWS Merger

On January 1, 2015, Hilltop completed its acquisition of SWS in a stock and cash transaction, whereby each outstanding share of SWS common stock was converted into the right to receive 0.2496 shares of Hilltop common stock and \$1.94 in cash, equating to \$6.92 per share based on Hilltop's closing price on December 31, 2014 and resulting in an aggregate purchase price of \$349.1 million, consisting of 10.1 million shares of common stock, \$78.2 million in cash and \$70.3 million associated with Hilltop's existing investment in SWS common stock. The operations of SWS are included in the Company's operating results beginning January 1, 2015. Such operating results include a bargain purchase gain of \$81.3 million and are not necessarily indicative of future operating results. SWS's results of operations prior to the acquisition date are not included in the Company's consolidated operating results.

The SWS Merger was accounted for using the acquisition method of accounting, and accordingly, purchased assets, including identifiable intangible assets, and assumed liabilities were recorded at their respective acquisition date fair values. The components of the consideration paid are shown in the following table (in thousands).

Fair value of consideration paid:	
Common stock issued	\$ 200,626
Cash	78,217
Fair value of Hilltop's existing investment in SWS	70,282
Total consideration paid	\$ 349,125

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

The resulting fair values of the identifiable assets acquired, and liabilities assumed, acquired in the SWS Merger at January 1, 2015 are summarized in the following table (in thousands).

Cash and due from banks	\$ 119,314
Federal funds sold and securities purchased under agreements to resell	44,741
Assets segregated for regulatory purposes	181,610
Securities	707,476
Non-covered loans, net	863,819
Broker-dealer and clearing organization receivables	1,221,793
Other assets	159,906
Total identifiable assets acquired	3,298,659
Deposits	(1,287,509)
Broker-dealer and clearing organization payables	(1,109,978)
Short-term borrowings	(164,240)
Securities sold, not yet purchased, at fair value	(140,409)
Notes payable	(76,643)
Other liabilities	(89,466)
Total liabilities assumed	(2,868,245)
Bargain purchase gain	(81,289)
	349,125
Less Hilltop existing investment in SWS	(70,282)
Net identifiable assets acquired	\$ 278,843

The bargain purchase gain represents the excess of the estimated fair value of the underlying net tangible assets and intangible assets over the merger consideration. The SWS Merger was a tax-free reorganization under Section 368(a) of the Internal Revenue Code, therefore no income taxes were recorded in connection with the bargain purchase gain. The Company used significant estimates and assumptions to value certain identifiable assets acquired and liabilities assumed. The bargain purchase gain was primarily driven by the Company's ability to realize acquired deferred tax assets through its consolidated core earnings and the decline in the price of the Company's common stock between the date the fixed conversion ratio was agreed upon and the closing date.

Included within the fair value of other assets in the table above are identifiable intangible assets recorded in connection with the SWS Merger. The allocation to intangible assets is as follows (in thousands).

	Estimated Useful Life (Years)	Gross Intangible Assets
Customer relationships	14	\$ 7,300
Core deposits	4	160
		\$ 7,460

In connection with the SWS Merger, Hilltop acquired loans both with and without evidence of credit quality deterioration since origination. The acquired loans were initially recorded at fair value with no carryover of any allowance for loan losses. Acquired loans were segregated between those considered to be purchased credit impaired (“PCI”) loans and those without credit impairment at acquisition.

3. Fair Value Measurements

Fair Value Measurements and Disclosures

The Company determines fair values in compliance with The Fair Value Measurements and Disclosures Topic of the ASC (the “Fair Value Topic”). The Fair Value Topic defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. The Fair Value Topic defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The Fair Value Topic assumes that transactions upon which fair value measurements are based occur in the principal market for the asset or liability being measured. Further, fair value measurements made under the Fair Value Topic exclude transaction costs and are not the result of forced transactions.

The Fair Value Topic creates a fair value hierarchy that classifies fair value measurements based upon the inputs used in valuing the assets or liabilities that are the subject of fair value measurements. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs, as indicated below.

- Level 1 Inputs: Unadjusted quoted prices in active markets for identical assets or liabilities that the Company can access at the measurement date.
- Level 2 Inputs: Observable inputs other than Level 1 prices. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, yield curves, prepayment speeds, default rates, credit risks and loss severities), and inputs that are derived from or corroborated by market data, among others.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

- Level 3 Inputs: Unobservable inputs that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities. Level 3 inputs include pricing models and discounted cash flow techniques, among others.

Fair Value Option

The Company has elected to measure substantially all of PrimeLending's mortgage loans held for sale and retained mortgage servicing rights ("MSR") asset at fair value, under the provisions of the Fair Value Option. The Company elected to apply the provisions of the Fair Value Option to these items so that it would have the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. At March 31, 2016 and December 31, 2015, the aggregate fair value of PrimeLending's mortgage loans held for sale accounted for under the Fair Value Option was \$1.29 billion and \$1.46 billion, respectively, and the unpaid principal balance of those loans was \$1.23 billion and \$1.41 billion, respectively. The interest component of fair value is reported as interest income on loans in the accompanying consolidated statements of operations.

The Company holds a number of financial instruments that are measured at fair value on a recurring basis, either by the application of the Fair Value Option or other authoritative pronouncements. The fair values of those instruments are determined primarily using Level 2 inputs. Those inputs include quotes from mortgage loan investors and derivatives dealers and data from independent pricing services.

The following tables present information regarding financial assets and liabilities measured at fair value on a recurring basis (in thousands).

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
March 31, 2016

Total	\$ 45,172	\$ 21,127	\$ (271)	\$ (8,953)	\$ —	\$ 57,075

All net realized and unrealized gains (losses) in the table above are reflected in the accompanying consolidated financial statements. The unrealized gains (losses) relate to financial instruments still held at March 31, 2016.

For Level 3 financial instruments measured at fair value on a recurring basis at March 31, 2016, the significant unobservable inputs used in the fair value measurements were as follows.

Range

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

Financial instrument	Valuation Technique	Unobservable Input	(Weighted-Average)
Trading securities	Discounted cash flow	Discount rate	8 - 17 % (10 %)
Loans held for sale	Discounted cash flow / Market comparable	Projected price	88 - 96 % (96 %)
MSR asset	Discounted cash flow	Constant prepayment rate	16.92 %
		Discount rate	10.79 %

Trading securities include corporate debt securities that are valued using a discounted cash flow model with observable market data; however, due to the distressed nature of these bonds, the Company has determined that these securities should be valued as a Level 3 financial instrument.

The fair value of certain loans held for sale that cannot be sold through normal sale channels or are non-performing is measured using Level 3, or unobservable, inputs. The fair value of such loans is generally based upon estimates of expected cash flows using unobservable inputs, including listing prices of comparable assets, uncorroborated expert opinions, and/or management's knowledge of underlying collateral.

The MSR asset, which is included in other assets within the Company's consolidated balance sheets, is valued by projecting net servicing cash flows, which are then discounted to estimate the fair value. The fair value of the MSR asset is impacted by a variety of factors. Prepayment rates and discount rates, the most significant unobservable inputs, are discussed further in Note 7 to the consolidated financial statements.

The Company had no transfers between Levels 1 and 2 during the periods presented.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

The following table presents the changes in fair value for instruments that are reported at fair value under the Fair Value Option (in thousands).

	Three Months Ended March 31, 2016			Three Months Ended March 31, 2015		
	Net Gains (Losses)	Other Noninterest Income	Total Changes in Fair Value	Net Gains (Losses)	Other Noninterest Income	Total Changes in Fair Value
Loans held for sale	\$ 447	\$ —	\$ 447	\$ (6,695)	\$ —	\$ (6,695)
MSR asset	(14,061)	—	(14,061)	(7,197)	—	(7,197)

The Company also determines the fair value of certain assets and liabilities on a non-recurring basis. In particular, the fair value of all of the assets acquired and liabilities assumed in the SWS Merger was determined at the acquisition date. In addition, facts and circumstances may dictate a fair value measurement when there is evidence of impairment. Assets and liabilities measured on a non-recurring basis include the items discussed below.

Impaired Loans — The Company reports impaired loans based on the underlying fair value of the collateral through specific allowances within the allowance for loan losses. PCI loans with a fair value of \$172.9 million, \$822.8 million and \$73.5 million were acquired by the Company upon completion of the merger with PlainsCapital (the “PlainsCapital Merger”), the FDIC-assisted transaction (the “FNB Transaction”) whereby the Bank acquired certain assets and assumed certain liabilities of First National Bank (“FNB”) and the SWS Merger, respectively (collectively, the “Bank Transactions”). Substantially all PCI loans acquired in the FNB Transaction are covered by FDIC loss-share agreements. The fair value of PCI loans was determined using Level 3 inputs, including estimates of expected cash flows that incorporated significant unobservable inputs regarding default rates, loss severity rates assuming default, prepayment speeds on acquired loans accounted for in pools (“Pooled Loans”), and estimated collateral values.

At March 31, 2016, estimates for these significant unobservable inputs were as follows.

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

	PCI Loans					
	PlainsCapital Merger		FNB Transaction		SWS Merger	
Weighted average default rate	60	%	55	%	51	%
Weighted average loss severity rate	51	%	34	%	30	%
Weighted average prepayment speed	0	%	6	%	0	%

At March 31, 2016, the resulting weighted average expected loss on PCI loans associated with the PlainsCapital Merger, FNB Transaction and SWS Merger was 31%, 19% and 15%, respectively.

The Company obtains updated appraisals of the fair value of collateral securing impaired collateral dependent loans at least annually, in accordance with regulatory guidelines. The Company also reviews the fair value of such collateral on a quarterly basis. If the quarterly review indicates that the fair value of the collateral may have deteriorated, the Company orders an updated appraisal of the fair value of the collateral. Because the Company obtains updated appraisals when evidence of a decline in the fair value of collateral exists, it typically does not adjust appraised values.

Other Real Estate Owned — The Company determines fair value primarily using independent appraisals of other real estate owned (“OREO”) properties. The resulting fair value measurements are classified as Level 2 or Level 3 inputs, depending upon the extent to which unobservable inputs determine the fair value measurement. The Company considers a number of factors in determining the extent to which specific fair value measurements utilize unobservable inputs, including, but not limited to, the inherent subjectivity in appraisals, the length of time elapsed since the receipt of independent market price or appraised value, and current market conditions. At March 31, 2016, the most significant unobservable input used in the determination of fair value of OREO was a discount to independent appraisals for estimated holding periods of OREO properties. Level 3 inputs were used to determine the initial fair value at acquisition of a large group of smaller balance properties that were acquired in the FNB Transaction. In the FNB Transaction, the Bank acquired OREO of \$135.2 million, all of which is covered by FDIC loss-share agreements. At March 31, 2016 and December 31, 2015, the estimated fair value of covered OREO was \$78.9 million and \$99.1 million, respectively, and

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

the underlying fair value measurements utilize Level 2 and Level 3 inputs. The fair value of non-covered OREO at March 31, 2016 and December 31, 2015 was \$0.5 million and \$0.4 million, respectively, and is included in other assets within the consolidated balance sheets. During the reported periods, all fair value measurements for non-covered OREO subsequent to initial recognition utilized Level 2 inputs.

The following table presents information regarding certain assets and liabilities measured at fair value on a non-recurring basis for which a change in fair value has been recorded during reporting periods subsequent to initial recognition (in thousands).

	Level 1	Level 2	Level 3	Total	Total Gains (Losses) for the Three Months Ended	
March 31, 2016	Inputs	Inputs	Inputs	Fair Value	March 31, 2016	2015
Non-covered impaired loans	\$ —	\$ —	\$ 39,722	\$ 39,722	\$ (33)	\$ 349
Covered impaired loans	—	—	45,025	45,025	332	3,218
Non-covered other real estate owned	—	—	—	—	—	(28)
Covered other real estate owned	—	11,322	—	11,322	(9,765)	(950)

The Fair Value of Financial Instruments Subsection of the ASC requires disclosure of the fair value of financial assets and liabilities, including the financial assets and liabilities previously discussed. The methods for determining estimated fair value for financial assets and liabilities is described in detail in Note 3 to the consolidated financial statements included in the Company's 2015 Form 10-K.

The following tables present the carrying values and estimated fair values of financial instruments not measured at fair value on either a recurring or non-recurring basis (in thousands).

The Hilltop Broker-Dealers enter into transactions that represent commitments to purchase and deliver securities at prevailing future market prices to facilitate customer transactions and satisfy such commitments. Accordingly, the Hilltop Broker-Dealers' ultimate obligation may exceed the amount recognized in the financial statements. These securities, which are carried at fair value and reported as securities sold, not yet purchased in the consolidated balance sheet, had a value of \$165.7 million and \$130.0 million at March 31, 2016 and December 31, 2015, respectively.

During the three months ended March 31, 2016 and 2015, the Company did not record any other-than-temporary impairments (“OTTI”). Factors considered in the Company’s analysis include the reasons for the unrealized loss position, the severity and duration of the unrealized loss position, credit worthiness, and forecasted performance of the investee. While some of the securities held in the investment portfolio have decreased in value since the date of acquisition, the severity of loss and the duration of the loss position are not believed to be significant enough to warrant OTTI of the securities. The Company does not intend, nor does the Company believe that it is likely that the Company will be required, to sell these securities before the recovery of the cost basis.

Expected maturities may differ from contractual maturities because certain borrowers may have the right to call or prepay obligations with or without penalties. The amortized cost and fair value of securities, excluding trading and available for sale equity securities, at March 31, 2016 are shown by contractual maturity below (in thousands).

	Available for Sale		Held to Maturity	
	Amortized		Amortized	
	Cost	Fair Value	Cost	Fair Value
Due in one year or less	\$ 105,633	\$ 105,938	\$ 26,360	\$ 26,364

Notes to Consolidated Financial Statements (continued)

(Unaudited)

Securities with a carrying amount of \$753.5 million and \$789.9 million (with a fair value of \$761.3 million and \$790.2 million, respectively) at March 31, 2016 and December 31, 2015, respectively, were pledged to secure public and trust deposits, federal funds purchased and securities sold under agreements to repurchase, and for other purposes as required or permitted by law. Substantially all of these pledged securities were included in our available for sale and held to maturity securities portfolios at March 31, 2016 and December 31, 2015.

Mortgage-backed securities and collateralized mortgage obligations consist principally of Government National Mortgage Association (“GNMA”), Federal National Mortgage Association (“FNMA”) and Federal Home Loan Mortgage Corporation (“FHLMC”) pass-through and participation certificates. GNMA securities are guaranteed by the full faith and credit of the United States, while FNMA and FHLMC securities are fully guaranteed by those respective United States government-sponsored agencies, and conditionally guaranteed by the full faith and credit of the United States.

At March 31, 2016 and December 31, 2015, NLC had investments on deposit in custody for various state insurance departments with carrying values of \$9.7 million and \$9.2 million, respectively.

5. Non-Covered Loans and Allowance for Non-Covered Loan Losses

Non-covered loans refer to loans not covered by the FDIC loss-share agreements. Covered loans are discussed in Note 6 to the consolidated financial statements. Non-covered loans summarized by portfolio segment are as follows (in thousands).

	March 31, 2016	December 31, 2015
Commercial and industrial	\$ 1,619,567	\$ 1,552,805
Real estate	2,536,302	2,313,239
Construction and land development	701,358	705,356
Consumer	44,851	45,672

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

Broker-dealer (1)	463,987	602,968
	5,366,065	5,220,040
Allowance for non-covered loan losses	(48,450)	(45,415)
Total non-covered loans, net of allowance	\$ 5,317,615	\$ 5,174,625

(1) Represents margin loans to customers and correspondents associated with our broker-dealer segment operations.

In connection with the Bank Transactions, the Company acquired non-covered loans both with and without evidence of credit quality deterioration since origination. The following table presents the carrying values and the outstanding balances of the non-covered PCI loans (in thousands).

	March 31, 2016	December 31, 2015
Carrying amount	\$ 68,053	\$ 72,054
Outstanding balance	87,345	92,682

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

Changes in the accretable yield for the non-covered PCI loans were as follows (in thousands).

	Three Months Ended	
	March 31,	
	2016	2015
Balance, beginning of period	\$ 17,744	\$ 12,814
Additions	—	14,579
Reclassifications from (to) nonaccretable difference, net(1)	2,343	281
Disposals of loans	—	(448)
Accretion	(3,919)	(2,749)
Balance, end of period	\$ 16,168	\$ 24,477

(1) Reclassifications from nonaccretable difference are primarily due to net increases in expected cash flows in the quarterly recasts. Reclassifications to nonaccretable difference occur when accruing loans are moved to nonaccrual and expected cash flows are no longer predictable and the accretable yield is eliminated.

The remaining nonaccretable difference for non-covered PCI loans was \$28.0 million and \$28.5 million at March 31, 2016 and December 31, 2015, respectively.

Impaired loans exhibit a clear indication that the borrower's cash flow may not be sufficient to meet principal and interest payments, which is generally when a loan is 90 days past due unless the asset is both well secured and in the process of collection. Non-covered impaired loans include non-accrual loans, troubled debt restructurings ("TDRs"), PCI loans and partially charged-off loans.

The amounts shown in following tables include loans accounted for on an individual basis, as well as acquired Pooled Loans. For Pooled Loans, the recorded investment with allowance and the related allowance consider impairment measured at the pool level. Non-covered impaired loans, segregated between those considered to be PCI loans and those without credit impairment at acquisition, are summarized by class in the following tables (in thousands).

Commercial construction loans and land development	102	114
Consumer	1	7
Broker-dealer	—	—
	\$ 24,965	\$ 23,481

At March 31, 2016 and December 31, 2015, non-covered non-accrual loans included non-covered PCI loans of \$10.3 million and \$9.3 million, respectively, for which discount accretion has been suspended because the extent and timing of cash flows from these non-covered PCI loans can no longer be reasonably estimated. In addition to the non-covered non-accrual loans in the table above, \$2.1 million and \$1.6 million of real estate loans secured by residential properties and classified as held for sale were in non-accrual status at March 31, 2016 and December 31, 2015, respectively.

Interest income, including recoveries and cash payments, recorded on non-covered impaired loans was \$0.1 million and \$0.6 million during the three months ended March 31, 2016 and 2015, respectively. Except as noted above, non-covered PCI loans are considered to be performing due to the application of the accretion method.

The Bank classifies loan modifications as TDRs when it concludes that it has both granted a concession to a debtor and that the debtor is experiencing financial difficulties. Loan modifications are typically structured to create affordable payments for the debtor and can be achieved in a variety of ways. The Bank modifies loans by reducing

interest rates and/or lengthening loan amortization schedules. The Bank also reconfigures a single loan into two or more loans (“A/B Note”). The typical A/B Note restructure results in a “bad” loan which is charged off and a “good” loan or loans the terms of which comply with the Bank’s customary underwriting policies. The debt charged off on the “bad” loan is not forgiven to the debtor.

Notes to Consolidated Financial Statements (continued)

(Unaudited)

The outstanding balance of TDRs granted in the three months ended March 31, 2016 and 2015, respectively, is shown in the following tables (in thousands). The TDR granted during the three months ended March 31, 2015 was paid off as of June 30, 2015. At March 31, 2016 and December 31, 2015, the Bank had nominal unadvanced commitments to borrowers whose loans have been restructured in TDRs.

In addition to the non-covered loans shown in the table above, \$50.7 million and \$50.8 million of loans included in loans held for sale (with an unpaid principal balance of \$51.2 million and \$51.1 million, respectively) were 90 days past due and accruing interest at March 31, 2016 and December 31, 2015, respectively. These loans are guaranteed by U.S. government agencies and include loans that are subject to repurchase, or have been repurchased, by PrimeLending.

Management tracks credit quality trends on a quarterly basis related to: (i) past due levels, (ii) non-performing asset levels, (iii) classified loan levels, (iv) net charge-offs, and (v) general economic conditions in the state and local markets.

The Bank utilizes a risk grading matrix to assign a risk grade to each of the loans in its portfolio. A risk rating is assigned based on an assessment of the borrower's management, collateral position, financial capacity, and economic factors. The general characteristics of the various risk grades are described below.

Pass – "Pass" loans present a range of acceptable risks to the Bank. Loans that would be considered virtually risk-free are rated Pass – low risk. Loans that exhibit sound standards based on the grading factors above and present a reasonable

risk to the Bank are rated Pass – normal risk. Loans that exhibit a minor weakness in one or more of the grading criteria but still present an acceptable risk to the Bank are rated Pass – high risk.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

Special Mention – “Special Mention” loans have potential weaknesses that deserve management’s close attention. If left uncorrected, these potential weaknesses may result in a deterioration of the repayment prospects for the loans and weaken the Bank’s credit position at some future date. Special Mention loans are not adversely classified and do not expose the Bank to sufficient risk to require adverse classification.

Substandard – “Substandard” loans are inadequately protected by the current sound worth and paying capacity of the obligor or the collateral pledged, if any. Loans so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Many substandard loans are considered impaired.

PCI – “PCI” loans exhibited evidence of credit deterioration at acquisition that made it probable that all contractually required principal payments would not be collected.

The following tables present the internal risk grades of non-covered loans, as previously described, in the portfolio by class (in thousands).

March 31, 2016	Pass	Special Mention	Substandard	PCI	Total
Commercial and industrial:

Allowance for Loan Losses

The allowance for both originated and acquired loans is subject to regulatory examinations and determinations as to appropriateness, which may take into account such factors as the methodology used to calculate the allowance and the size of the allowance. The Company's analysis of the level of the allowance for loan losses to ensure that it is appropriate for the estimated credit losses in the portfolio consistent with the Interagency Policy Statement on the

Notes to Consolidated Financial Statements (continued)

(Unaudited)

6. Covered Assets and Indemnification Asset

As discussed in Note 2 to the consolidated financial statements, the Bank assumed substantially all of the liabilities, including all of the deposits, and acquired substantially all of the assets of FNB in an FDIC-assisted transaction on September 13, 2013 (the “Bank Closing Date”). As part of the Purchase and Assumption Agreement by and among the FDIC (as receiver of FNB), the Bank and the FDIC (the “P&A Agreement”), the Bank and the FDIC entered into loss-share agreements covering future losses incurred on certain acquired loans and OREO. The Company refers to acquired commercial and single family residential loan portfolios and OREO that are subject to the loss-share agreements as “covered loans” and “covered OREO”, respectively, and these assets are presented as separate line items in the Company’s consolidated balance sheets. Collectively, covered loans and covered OREO are referred to as “covered assets”. Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of net losses on the first \$240.4 million of net losses incurred; (ii) 0% of net losses in excess of \$240.4 million up to and including \$365.7 million of net losses incurred; and (iii) 80% of net losses in excess of \$365.7 million of net losses incurred. Net losses are defined as book value losses plus certain defined expenses incurred in the resolution of assets, less subsequent recoveries. Under the loss-share agreement for commercial assets, the amount of subsequent recoveries that are reimbursable to the FDIC for a particular asset is limited to book value losses and expenses actually billed plus any book value charge-offs incurred prior to the Bank Closing Date. There is no limit on the amount of subsequent recoveries reimbursable to the FDIC under the loss-share agreement for single family residential assets. The loss-share agreements for commercial and single family residential assets are in effect for 5 years and 10 years, respectively, from the Bank Closing Date, and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. The asset arising from the loss-share agreements, referred to as the “FDIC Indemnification Asset,” is measured separately from the covered loan portfolio because the agreements are not contractually embedded in the covered loans and are not transferable should the Bank choose to dispose of the covered loans.

In accordance with the loss-share agreements, the Bank may be required to make a “true-up” payment to the FDIC approximately ten years following the Bank Closing Date if its actual net realized losses over the life of the loss-share agreements are less than the FDIC’s initial estimate of losses on covered assets. The “true-up” payment is calculated using a defined formula set forth in the P&A Agreement. At March 31, 2016, the Bank recorded a related “true-up” payment accrual of \$7.5 million based on the current estimate of aggregate realized losses on covered assets over the life of the loss-share agreements.

Covered Loans and Allowance for Covered Loan Losses

Loans acquired in the FNB Transaction that are subject to a loss-share agreement are referred to as “covered loans” and reported separately in the consolidated balance sheets. Covered loans are reported exclusive of the cash flow reimbursements that may be received from the FDIC.

The Bank’s portfolio of acquired covered loans had a fair value of \$1.1 billion as of the Bank Closing Date, with no carryover of any allowance for loan losses. Acquired covered loans were segregated between those considered to be PCI loans and those without credit impairment at acquisition.

In connection with the FNB Transaction, the Bank acquired loans both with and without evidence of credit quality deterioration since origination. The Company’s accounting policies for acquired covered loans, including covered PCI loans, are consistent with those of acquired non-covered loans, as described in Note 5 to the consolidated financial statements. The Company has established under its PCI accounting policy a framework to aggregate certain acquired covered loans into various loan pools based on a minimum of two layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

The following table presents the carrying value of the covered loans summarized by portfolio segment (in thousands).

	March 31, 2016	December 31, 2015
Commercial and industrial	\$ 9,070	\$ 8,801
Real estate	318,921	341,048
Construction and land development	19,395	30,445
	347,386	380,294
Allowance for covered loans	(1,217)	(1,532)
Total covered loans, net of allowance	\$ 346,169	\$ 378,762

The following table presents the carrying value and the outstanding contractual balance of the covered PCI loans (in thousands).

	March 31, 2016	December 31, 2015
Carrying amount	\$ 197,865	\$ 221,974
Outstanding balance	371,802	408,221

Changes in the accretable yield for the covered PCI loans were as follows (in thousands).

	Three Months Ended March 31,	
	2016	2015
Balance, beginning of period	\$ 176,719	\$ 193,493
Reclassifications from (to) nonaccretable difference, net(1)	9,633	16,263
Transfer of loans to covered OREO(2)	(109)	1,172
Accretion	(17,110)	(16,931)

Balance, end of period

\$ 169,133 \$ 193,997

- (1) Reclassifications from nonaccretable difference are primarily due to net increases in expected cash flows in the quarterly recasts, but may also include the reclassification and immediate income recognition of nonaccretable difference due to the favorable resolution of loans accounted for individually. Reclassifications to nonaccretable difference occur when accruing loans are moved to nonaccrual and expected cash flows are no longer predictable and the accretable yield is eliminated.
- (2) Transfer of loans to covered OREO is the difference between the value removed from the pool and the expected cash flows for the loan.

The remaining nonaccretable difference for covered PCI loans was \$150.6 million and \$172.2 million at March 31, 2016 and December 31, 2015, respectively. During the three months ended March 31, 2016 and 2015, a combination of factors affecting the inputs to the Bank's quarterly recast process led to the reclassifications from nonaccretable difference to accretable yield. These transfers resulted from revised cash flows that reflect better-than-expected performance of the covered PCI loan portfolio as a result of the Bank's strategic decision to dedicate resources to the liquidation of covered loans during the noted periods.

Covered impaired loans include non-accrual loans, TDRs, PCI loans and partially charged-off loans. The amounts shown in following tables include Pooled Loans, as well as loans accounted for on an individual basis. For Pooled Loans, the recorded investment with allowance and the related allowance consider impairment measured at the pool level. Covered impaired loans, segregated between those considered to be PCI loans and those without credit impairment at acquisition, are summarized by class in the following tables (in thousands).

Construction and land development:		
Residential construction loans	520	541
Commercial construction loans and land development	13	5,411

\$ 3,576 \$ 8,978

At March 31, 2016, there were no covered PCI loans included within non-accrual loans for which discount accretion has been suspended. At December 31, 2015, covered non-accrual loans included covered PCI loans of \$5.3 million for which discount accretion has been suspended because the extent and timing of cash flows from these covered PCI loans can no longer be reasonably estimated.

Interest income, including recoveries and cash payments, recorded on covered impaired loans during the three months ended March 31, 2016 and 2015 was nominal. Except as noted above, covered PCI loans are considered to be performing due to the application of the accretion method.

The Bank classifies loan modifications of covered loans as TDRs in a manner consistent with that of non-covered loans as discussed in Note 5 to the consolidated financial statements. There were no TDRs granted during the three months ended March 31, 2016. The outstanding balance of TDRs granted during three months ended March 31, 2015 is shown in the following table (in thousands). Pooled Loans are not in the scope of the disclosure requirements for TDRs. At March 31, 2016 and December 31, 2015, the Bank had nominal unadvanced commitments to borrowers whose loans have been restructured in TDRs.

Covered Other Real Estate Owned

A summary of the activity in covered OREO is as follows (in thousands).

	Three Months Ended March 31,	
	2016	2015
Balance, beginning of period	\$ 99,090	\$ 136,945
Additions to covered OREO	4,542	24,042
Dispositions of covered OREO	(14,977)	(22,334)
Valuation adjustments in the period	(9,765)	(950)
Balance, end of period	\$ 78,890	\$ 137,703

During the three months ended March 31, 2016 and 2015, the Bank wrote down certain covered OREO assets to fair value to reflect new appraisals on certain OREO acquired in the FNB Transaction and OREO acquired from the foreclosure on certain FNB loans acquired in the FNB Transaction. Although the Bank recorded a fair value discount on the acquired assets upon acquisition, in some cases additional downward valuations were required.

These additional downward valuation adjustments reflect changes to the assumptions regarding the fair value of the OREO, including in some cases the intended use of the OREO due to the availability of more information, as well as

the passage of time. The process of determining fair value is subjective in nature and requires the use of significant estimates and assumptions. Although the Bank makes market-based assumptions when valuing acquired assets, new information may come to light that causes estimates to increase or decrease. When the Bank determines, based on subsequent information, that its estimates require adjustment, the Bank records the adjustment. The accounting for such adjustments requires that the decreases to fair value be recorded at the time such new information is received, while increases to fair value are recorded when the asset is subsequently sold.

FDIC Indemnification Asset

A summary of the activity in the FDIC Indemnification Asset is as follows (in thousands).

	Three Months Ended March 31,	
	2016	2015
Balance, beginning of period	\$ 91,648	\$ 130,437
FDIC Indemnification Asset accretion (amortization)	87	506
Transfers to due from FDIC and other	(11,213)	(23,376)
Balance, end of period	\$ 80,522	\$ 107,567

As of March 31, 2016, the Bank had billed and collected \$111.5 million from the FDIC, which represented reimbursable covered losses and expenses through December 31, 2015.

7. Mortgage Servicing Rights

The following tables present the changes in fair value of the Company's MSR, as included in other assets within the consolidated balance sheets, and other information related to the serviced portfolio (dollars in thousands).

	Three Months Ended March	
	31, 2016	2015
Balance, beginning of period	\$ 52,285	\$ 36,155
Additions	1,639	2,690
Changes in fair value:		
Due to changes in model inputs or assumptions (1)	(12,842)	(5,044)
Due to customer payoffs	(1,219)	(2,153)
Balance, end of period	\$ 39,863	\$ 31,648

	March 31,		December	
	2016		31,	2015
Mortgage loans serviced for others	\$ 5,004,100		\$ 5,051,884	
MSR asset as a percentage of serviced mortgage loans	0.80	%	1.03	%

(1) Primarily represents normal customer payments, changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates and the refinement of other MSR model assumptions.

The key assumptions used in measuring the fair value of the Company's MSR were as follows.

	March 31,		December 31,	
	2016		2015	
Weighted average constant prepayment rate	16.92	%	11.51	%
Weighted average discount rate	10.79	%	10.92	%
Weighted average life (in years)	4.8		6.5	

A sensitivity analysis of the fair value of the Company's MSR to certain key assumptions is presented in the following table (in thousands).

	March 31, 2016	December 31, 2015
Constant prepayment rate:		
Impact of 10% adverse change	\$ (1,831)	\$ (2,177)
Impact of 20% adverse change	(3,494)	(4,195)
Discount rate:		
Impact of 10% adverse change	(1,073)	(2,073)
Impact of 20% adverse change	(2,076)	(3,989)

This sensitivity analysis presents the effect of hypothetical changes in key assumptions on the fair value of the MSR. The effect of such hypothetical change in assumptions generally cannot be extrapolated because the relationship of the change in one key assumption to the change in the fair value of the MSR is not linear. In addition, in the analysis, the impact of an adverse change in one key assumption is calculated independent of any impact on other assumptions. In reality, changes in one assumption may change another assumption.

Contractually specified servicing fees, late fees and ancillary fees earned of \$5.9 million and \$4.2 million during the three months ended March 31, 2016 and 2015, respectively, were included in other noninterest income within the consolidated statements of operations.

8. Deposits

Deposits are summarized as follows (in thousands).

	March 31, 2016	December 31, 2015
Noninterest-bearing demand	\$ 2,233,608	\$ 2,235,436
Interest-bearing:		
NOW accounts	1,171,481	1,077,576
Money market	1,447,155	1,500,780
Brokered - money market	97,472	133,380
Demand	343,083	380,214
Savings	330,307	273,390
Time	1,361,069	1,325,342
Brokered - time	—	26,565
	\$ 6,984,175	\$ 6,952,683

9. Short-term Borrowings

Short-term borrowings are summarized as follows (in thousands).

	March 31, 2016	December 31, 2015
Federal funds purchased	\$ 62,900	\$ 58,925

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

Securities sold under agreements to repurchase	320,021	217,748
Federal Home Loan Bank	300,000	600,000
Short-term bank loans	150,000	70,700
	\$ 832,921	\$ 947,373

Federal funds purchased and securities sold under agreements to repurchase generally mature daily, on demand, or on some other short-term basis. The Bank and the Hilltop Broker-Dealers execute transactions to sell securities under agreements to repurchase with both customers and broker-dealers. Securities involved in these transactions are held by the Bank, the Hilltop Broker-Dealers or a third-party dealer.

Information concerning federal funds purchased and securities sold under agreements to repurchase is shown in the following tables (dollars in thousands).

	Three Months Ended	
	March 31,	
	2016	2015
Average balance during the period	\$ 329,392	\$ 361,600
Average interest rate during the period	0.49 %	0.25 %

	March 31,		December	
	2016		31,	
	2016		2015	
Average interest rate at end of period	0.41 %		0.26 %	
Securities underlying the agreements at end of period:				
Carrying value	\$ 333,973		\$ 250,981	
Estimated fair value	\$ 337,695		\$ 250,045

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

Federal Home Loan Bank (“FHLB”) short-term borrowings mature over terms not exceeding 365 days and are collateralized by FHLB Dallas stock, nonspecified real estate loans and certain specific commercial real estate loans. Other information regarding FHLB short-term borrowings is shown in the following tables (dollars in thousands).

	Three Months Ended	
	March 31,	
	2016	2015
Average balance during the period	\$ 234,341	\$ 235,111
Average interest rate during the period	0.44 %	0.22 %

	March 31,		December 31,	
	2016		2015	
Average interest rate at end of period	0.47	%	0.35	%

The Hilltop Broker-Dealers use short-term bank loans periodically to finance securities owned, margin loans to customers and correspondents, and underwriting activities. Interest on the borrowings varies with the federal funds rate. The weighted average interest rate on the borrowings at both March 31, 2016 and December 31, 2015 was 1.26%.

10. Notes Payable

	March 31,	December
	2016	31,
		2015
NLIC note payable due May 2033	\$ 10,000	\$ 10,000
NLIC note payable due September 2033	10,000	10,000
ASIC note payable due April 2034	7,500	7,500
Insurance company note payable due March 2035	20,000	20,000

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

Federal Home Loan Bank notes, maturities ranging from May 2016 to June 2030	32,524	36,042
Insurance company line of credit due December 31, 2016	1,500	7,000
Ventures line of credit due August 2016	2,459	—
Senior Notes due April 2025, net	148,207	148,174
	\$ 232,190	\$ 238,716

11. Income Taxes

The Company applies an estimated annual effective rate to interim period pre-tax income to calculate the income tax provision for the quarter in accordance with the principal method prescribed by the accounting guidance established for computing income taxes in interim periods. The Company's effective tax rate was 33.8% and 11.9% during the three months ended March 31, 2016 and 2015, respectively. The effective tax rate during the three months ended March 31, 2016 was lower than the statutory rate primarily due to recognition of excess tax benefits on share-based payment awards as a result of the Company's adoption of the provisions of Accounting Standards Update ("ASU") 2016-09 as of January 1, 2016 as discussed in Note 23 to the consolidated financial statements. The lower effective tax rate during the three months ended March 31, 2015 was primarily due to no income taxes being recorded during 2015 in connection with the bargain purchase gain of \$81.3 million associated with the SWS Merger because the acquisition was a tax-free reorganization under Section 368(a) of the Internal Revenue Code. In addition, the Company recorded an income tax benefit during 2015 of \$2.1 million as a result of the SWS Merger to reverse the deferred tax liability for the difference between book and tax basis on Hilltop's investment in SWS common stock.

12. Commitments and Contingencies

Legal Matters

The Company is subject to loss contingencies related to litigation, claims, investigations and legal and administrative cases and proceedings arising in the ordinary course of business. The Company evaluates these contingencies based on information currently available, including advice of counsel. The Company establishes accruals for those matters when a loss contingency is considered probable and the related amount is reasonably estimable. Any accruals are periodically reviewed and may be adjusted as circumstances change. A portion of the Company's exposure with respect to loss contingencies may be offset by applicable insurance coverage. In determining the amounts of any accruals or estimates of possible loss contingencies, the Company does not take into account the availability of insurance coverage, other than that provided by reinsurers in the insurance segment. When it is practicable, the Company estimates loss contingencies for possible litigation and claims, whether or not there is an accrued probable loss. When the Company is able to estimate such possible losses, and when it estimates that it is reasonably possible it could incur losses, in excess of amounts accrued, the Company is required to make a disclosure of the aggregate estimation. As available information changes, however, the matters for which the Company is able to estimate, as well as the estimates themselves will be adjusted, accordingly.

Assessments of litigation and claims exposures are difficult due to many factors that involve inherent unpredictability. Those factors include the following: the varying stages of the proceedings, particularly in the early stages; unspecified, unsupported, or uncertain damages; damages other than compensatory, such as punitive damages; a matter presenting meaningful legal uncertainties, including novel issues of law; multiple defendants and jurisdictions; whether discovery has begun or not or discovery is not complete; meaningful settlement discussions have not commenced; and whether the claim involves a class action and if so, how the class is defined. As a result of some of these factors, the Company may be unable to estimate reasonably possible losses with respect to some or all of the pending and threatened litigation and claims asserted against the Company.

Following completion of Hilltop's acquisition of SWS, several purported holders of shares of SWS common stock filed petitions in the Court of Chancery of the State of Delaware seeking appraisal for their shares pursuant to Section 262 of the Delaware General Corporation Law. These petitions were consolidated as *In re SWS Group, Inc., C.A. No. 10554-VCG*. The consolidated matter represents a total of approximately 5.2 million shares of SWS common stock. The Company intends to vigorously defend this matter.

On or about November 2, 2012, FSC, along with thirteen other defendants, was named in a lawsuit pending in the state of Rhode Island Superior Court styled Rhode Island Economic Development Corporation v. Wells Fargo Securities, LLC, et al. FSC is included in connection with its role as financial advisor to the State of Rhode Island, specifically in connection with the Rhode Island Economic Development Corporation's issuance of \$75 million in bonds to finance a loan to 38 Studios, LLC. 38 Studios, LLC ultimately failed to repay the loan and the Rhode Island Economic Development Corporation is seeking recovery to repay the bonds it issued to make such loan. FSC intends to defend itself vigorously in this action.

The Company is involved in information-gathering requests and investigations (both formal and informal), as well as reviews, examinations and proceedings (collectively, "Inquiries") by various governmental regulatory agencies, law enforcement authorities and self-regulatory bodies regarding certain of its businesses, business practices and policies, as well as the conduct of persons with whom it does business. Additional Inquiries will arise from time to time. In connection with those Inquiries, the Company receives document requests, subpoenas and other requests for information. The Inquiries, including the Inquiry described below, could develop into administrative, civil or criminal proceedings or enforcement actions that could result in consequences that have a material effect on the Company's consolidated financial position, results of operations or cash flows as a whole. Such consequences could include adverse judgments, findings, settlements, penalties, fines, orders, injunctions, restitution, or alterations in the Company's business practices, and could result in additional expenses and collateral costs, including reputational damage.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

As a part of an industry-wide Inquiry, PrimeLending received a subpoena from the Office of Inspector General of the U.S. Department of Housing and Urban Development regarding mortgage-related practices, including those relating to origination practices for loans insured by the Federal Housing Administration (the “FHA”). On August 20, 2014, PrimeLending received a Civil Investigative Demand from the United States Department of Justice (the “DOJ”) related to this Inquiry. According to the Civil Investigative Demand, the DOJ is conducting an investigation to determine whether PrimeLending has violated the False Claims Act in connection with originating and underwriting single-family residential mortgage loans insured by the FHA. No claims or demands have been asserted against PrimeLending. PrimeLending cannot predict the ultimate outcome of this investigation, and cannot make a reasonable estimate of potential liability, if any, at this time. PrimeLending continues to cooperate with the investigation.

While the final outcome of litigation and claims exposures or of any Inquiries is inherently unpredictable, management is currently of the opinion that the outcome of pending and threatened litigation and Inquiries will not have a material effect on the Company’s business, consolidated financial position, results of operations or cash flows as a whole. However, in the event of unexpected future developments, it is reasonably possible that an adverse outcome in any of the matters discussed above could be material to the Company’s business, consolidated financial position, results of operations or cash flows for any particular reporting period of occurrence.

Other Contingencies

The mortgage origination segment may be responsible for errors or omissions relating to its representations and warranties that each loan sold meets certain requirements, including representations as to underwriting standards and the validity of certain borrower representations in connection with the loan. If determined to be at fault, the mortgage origination segment either repurchases the affected loan from the investor or reimburses the investor’s losses. The mortgage origination segment has established an indemnification liability reserve for such probable losses.

Generally, the mortgage origination segment first becomes aware that an investor believes a loss has been incurred on a sold loan when it receives a written request from the investor to repurchase the loan or reimburse the investor’s losses. Upon completing its review of the investor’s request, the mortgage origination segment establishes a specific claims reserve for the loan if it concludes its obligation to the investor is both probable and reasonably estimable.

An additional reserve has been established for probable investor losses that may have been incurred, but not yet reported to the mortgage origination segment based upon a reasonable estimate of such losses. Factors considered in the calculation of this reserve include, but are not limited to, the total volume of loans sold exclusive of specific investor requests, actual investor claim settlements and the severity of estimated losses resulting from future claims, and the mortgage origination segment's history of successfully curing defects identified in investor claim requests. While the mortgage origination segment's sales contracts typically include borrower early payment default repurchase provisions, these provisions have not been a primary driver of investor claims to date, and therefore, are not a primary factor considered in the calculation of this reserve.

At March 31, 2016 and December 31, 2015, the mortgage origination segment's indemnification liability reserve totaled \$17.1 million and \$16.6 million, respectively. The provision for indemnification losses was \$0.9 million and \$0.8 million during the three months ended March 31, 2016 and 2015, respectively.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

The following tables provide for a rollforward of claims activity for loans put-back to the mortgage origination segment based upon an alleged breach of a representation or warranty with respect to a loan sold and related indemnification liability reserve activity (in thousands).

	Representation and Warranty Specific Claims Activity - Origination Loan Balance Three Months Ended March 31,	
	2016	2015
Balance, beginning of period	\$ 57,298	\$ 53,906
Claims made	4,548	37,323
Claims resolved with no payment	(6,115)	(11,687)
Repurchases	(1,157)	(5,239)
Indemnification payments	(372)	(203)
Balance, end of period	\$ 54,202	\$ 74,100

	Indemnification Liability Reserve Activity Three Months Ended March 31,	
	2016	2015
Balance, beginning of period	\$ 16,640	\$ 17,619
Additions for new sales	878	844
Repurchases	(112)	(498)
Early payment defaults	(90)	(10)
Indemnification payments	(169)	(162)
Change in estimate	—	(451)
Balance, end of period	\$ 17,147	\$ 17,342

	March 31, 2016	December 31, 2015
Reserve for Indemnification Liability:		
Specific claims	\$ 4,754	\$ 5,210
Incurred but not reported claims	12,393	11,430
Total	\$ 17,147	\$ 16,640

Although management considers the total indemnification liability reserve to be appropriate, there may be changes in the reserve over time to address incurred losses, due to unanticipated adverse changes in the economy and historical loss patterns, discrete events adversely affecting specific borrowers or industries, and/or actions taken by institutions or investors. The impact of such matters is considered in the reserving process when probable and estimable.

In connection with the FNB Transaction, the Bank entered into two loss-share agreements with the FDIC that collectively cover \$1.2 billion of loans and OREO acquired in the FNB Transaction. Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of net losses on the first \$240.4 million of net losses incurred; (ii) 0% of net losses in excess of \$240.4 million up to and including \$365.7 million of net losses incurred; and (iii) 80% of net losses in excess of \$365.7 million of net losses incurred. Net losses are defined as book value losses plus certain defined expenses incurred in the resolution of assets, less subsequent recoveries. Under the loss-share agreement for commercial assets, the amount of subsequent recoveries that are reimbursable to the FDIC for a particular asset is limited to book value losses and expenses actually billed plus any book value charge-offs incurred prior to the Bank Closing Date. There is no limit on the amount of subsequent recoveries reimbursable to the FDIC under the loss-share agreement for single family residential assets. The loss-share agreements for commercial and single family residential assets are in effect for 5 years and 10 years, respectively, from the Bank Closing Date and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a “true-up” payment to the FDIC approximately ten years following the Bank Closing Date if its actual net realized losses over the life of the loss-share agreements are less than the FDIC’s initial estimate of losses on covered assets. The “true-up” payment is calculated using a defined formula set forth in the P&A Agreement. As of March 31,

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

2016, the Bank estimated that the sum of covered losses and reimbursable expenses subject to the loss-share agreements will exceed \$240.4 million, but will not exceed \$365.7 million. Unless actual plus projected covered losses and reimbursable expenses exceed \$365.7 million, the Bank will not record additional amounts to the FDIC Indemnification Asset. As of March 31, 2016, the Bank had billed \$139.4 million of covered net losses to the FDIC, of which 80%, or \$111.5 million, were reimbursable under the loss-share agreements. As of March 31, 2016, the Bank had received aggregate reimbursements of \$111.5 million from the FDIC, which represented reimbursable covered losses and expenses through December 31, 2015.

13. Financial Instruments with Off-Balance Sheet Risk

The Bank is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit that involve varying degrees of credit and interest rate risk in excess of the amount recognized in the consolidated financial statements. Such financial instruments are recorded in the consolidated financial statements when they are funded or related fees are incurred or received. The contract amounts of those instruments reflect the extent of involvement (and therefore the exposure to credit loss) the Bank has in particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and may require payment of fees. Because some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These letters of credit are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan commitments to customers.

In the aggregate, the Bank had outstanding unused commitments to extend credit of \$1.6 billion at March 31, 2016 and outstanding financial and performance standby letters of credit of \$38.4 million at March 31, 2016.

The Bank uses the same credit policies in making commitments and standby letters of credit as it does for on-balance sheet instruments. The amount of collateral obtained, if deemed necessary, in these transactions is based on

management's credit evaluation of the borrower. Collateral held varies but may include real estate, accounts receivable, marketable securities, interest-bearing deposit accounts, inventory, and property, plant and equipment.

In the normal course of business, the Hilltop Broker-Dealers execute, settle, and finance various securities transactions that may expose the Hilltop Broker-Dealers to off-balance sheet risk in the event that a customer or counterparty does not fulfill its contractual obligations. Examples of such transactions include the sale of securities not yet purchased by customers or for the accounts of the Hilltop Broker-Dealers, use of derivatives to support certain non-profit housing organization clients, clearing agreements between the Hilltop Broker-Dealers and various clearinghouses and broker-dealers, secured financing arrangements that involve pledged securities, and when-issued underwriting and purchase commitments.

14. Stock-Based Compensation

Pursuant to the Hilltop Holdings Inc. 2012 Equity Incentive Plan (the "2012 Plan"), the Company may grant nonqualified stock options, stock appreciation rights, restricted stock, restricted stock units ("RSUs"), performance awards, dividend equivalent rights and other awards to employees of the Company, its subsidiaries and outside directors of the Company. Upon the approval by stockholders and effectiveness of the 2012 Plan in September 2012, no additional awards were permissible under the 2003 Equity Incentive Plan (the "2003 Plan"). In the aggregate, 4,000,000 shares of common stock may be delivered pursuant to awards granted under the 2012 Plan. At March 31, 2016, 2,293,228 shares of common stock remained available for issuance pursuant to the 2012 Plan, including shares that may be delivered pursuant to outstanding awards. Compensation expense related to the 2012 Plan and the 2003 Plan was \$2.3 million and \$1.9 million during the three months ended March 31, 2016 and 2015, respectively.

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

During the three months ended March 31, 2016 and 2015, Hilltop granted 5,516 and 2,545 shares of common stock, respectively, to certain non-employee members of the Company's Board of Directors for services rendered to the Company pursuant to the 2012 Plan.

Restricted Stock Awards and RSUs

The following table summarizes information about nonvested Restricted Stock Award and RSU activity for the three months ended March 31, 2016 (shares in thousands).

	Restricted Stock Awards		RSUs	
	Outstanding	Weighted Average Grant Date Fair Value	Outstanding	Weighted Average Grant Date Fair Value
Balance, December 31, 2015	453	\$ 13.50	875	\$ 21.22
Granted	-	\$ -	277	\$ 16.04
Vested/Released	(3)	\$ 13.25	(5)	\$ 22.24
Forfeited	(2)	\$ 19.72	(2)	\$ 21.41
Balance, March 31, 2016	448	\$ 13.47	1,145	\$ 20.00

Vested/Released Restricted Stock Awards and RSUs include an aggregate of 2,128 shares withheld to satisfy employee statutory tax obligations during the three months ended March 31, 2016. Pursuant to certain RSU award agreements, an aggregate of 8,247 vested RSUs at March 31, 2016 require deferral of the settlement in shares and statutory tax obligations to a future date.

At March 31, 2016, unrecognized compensation expense related to outstanding Restricted Stock Awards of \$0.1 million is expected to be recognized over a weighted average period of 1.05 years.

During the three months ended March 31, 2016, the Compensation Committee of the Board of Directors of the Company awarded certain executives and key employees an aggregate of 276,551 RSUs pursuant to the 2012 Plan. These awards include 158,028 RSUs subject to time-based vesting conditions and generally cliff vest on the third anniversary of the grant date, and 118,523 RSUs that cliff vest based upon the achievement of certain performance goals over a three-year period. Total compensation expense related to these RSUs is expected to be \$4.4 million, which will be amortized through February 2019.

At March 31, 2016, 860,321 of the outstanding RSUs are subject to time-based vesting conditions and generally cliff vest on the third anniversary of the grant date, and 284,398 outstanding RSUs cliff vest based upon the achievement of certain performance goals over a three-year period. At March 31, 2016, unrecognized compensation expense related to outstanding RSUs of \$14.4 million is expected to be recognized over a weighted average period of 1.92 years.

Stock Options

Stock options granted on November 2, 2011 to two senior executives pursuant to the 2003 Plan to purchase an aggregate of 600,000 shares of the Company's common stock (the "Stock Option Awards") at an exercise price of \$7.70 per share were fully vested and exercisable at November 2, 2015. As of March 31, 2016, an aggregate of 100,000 Stock Option Awards remain outstanding and will expire on November 2, 2016 if unexercised.

15. Regulatory Matters

Banking and Hilltop

The Bank and Hilltop are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory — and possibly additional discretionary — actions by regulators that, if undertaken, could have a direct, material effect on the consolidated financial statements. The regulations require the Bank and Hilltop to meet specific capital adequacy guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The capital classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Quantitative measures established by regulation to ensure capital adequacy require the companies to maintain minimum amounts and ratios (set forth in the following table) of Tier 1 capital (as defined in the regulations) to total average assets (as defined), and minimum ratios of common equity Tier 1, Tier 1 and total capital (as defined) to risk-weighted assets (as defined).

The following table shows the Bank's and Hilltop's consolidated actual capital amounts and ratios compared to the regulatory minimum capital requirements and the Bank's regulatory minimum capital requirements needed to qualify as a "well-capitalized" institution in accordance with Basel III as measured at March 31, 2016 and December 31, 2015, respectively (dollars in thousands).

	Actual		Minimum Capital Requirements			To Be Well Capitalized Minimum Capital Requirements		
	Amount	Ratio	Amount	Ratio	%	Amount	Ratio	%
March 31, 2016								
Tier 1 capital (to average assets):								
Bank	\$ 1,035,022	12.70 %	\$ 326,044	4.0	%	\$ 407,555	5.0	%
Hilltop	1,532,458	13.35 %	459,069	4.0	%	N/A	N/A	
Common equity Tier 1 capital (to risk-weighted assets):								
Bank	1,033,659	15.10 %	308,020	4.5	%	444,918	6.5	%
Hilltop	1,481,394	17.56 %	379,562	4.5	%	N/A	N/A	
Tier 1 capital (to risk-weighted assets):

Table of Contents

Hilltop Holdings Inc. and Subsidiaries

Notes to Consolidated Financial Statements (continued)

(Unaudited)

To be considered “adequately capitalized” (as defined) under regulatory requirements, the Bank must maintain minimum Tier 1 capital to total average assets of 4%, common equity Tier 1 capital to risk-weighted assets of 4.5%, Tier 1 capital to risk-weighted assets ratios of 6%, and a total capital to risk-weighted assets ratio of 8%. Based on the actual capital amounts and ratios shown in the previous table, the Bank’s ratios place it in the “well capitalized” (as defined) capital category under regulatory requirements.

In order to avoid limitations on capital distributions, including dividend payments, stock repurchases and certain discretionary bonus payments to executive officers, Basel III also implemented a capital conservation buffer, which requires a banking organization to hold a buffer above its minimum risk-based capital requirements. This buffer will help to ensure that banking organizations conserve capital when it is most needed, allowing them to better weather periods of economic stress. The buffer is measured relative to risk-weighted assets. The phase-in of the capital conservation buffer requirements began on January 1, 2016 for Hilltop and the Bank. Based on the actual ratios as shown in the table above, Hilltop and the Bank exceed each of the capital conservation buffer requirements in effect as of March 31, 2016, as well as the fully phased-in requirements through 2019.

Broker-Dealer

Pursuant to the net capital requirements of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), Hilltop Securities has elected to determine its net capital requirements using the alternative method. Accordingly, Hilltop Securities is required to maintain minimum net capital, as defined in Rule 15c3-1 promulgated under the Exchange Act, equal to the greater of \$250,000 and \$1,000,000, respectively, or 2% of aggregate debit balances, as defined in Rule 15c3-3 promulgated under the Exchange Act. Additionally, the net capital rule of the NYSE provides that equity capital may not be withdrawn or cash dividends paid if resulting net capital would be less than 5% of the aggregate debit items. HTS Independent Network follows the primary (aggregate indebtedness) method, as defined in Rule 15c3-1 promulgated under the Exchange Act, which requires the maintenance of the larger of minimum net capital of \$250,000 or 1/15 of aggregate indebtedness.

At March 31, 2016, the net capital position of each of the Hilltop Broker-Dealers was as follows (in thousands).

HTS

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

	Hilltop Securities	Independent Network
Net capital	\$ 132,718	\$ 1,195
Less required net capital	9,484	250
Excess net capital	\$ 123,234	\$ 945
Net capital as a percentage of aggregate debit items	28.0	%
Net capital in excess of 5% aggregate debit items	\$ 109,007	

Under certain conditions, Hilltop Securities may be required to segregate cash and securities in a special reserve account for the benefit of customers under Rule 15c3-3 promulgated under the Exchange Act. Assets segregated under the provisions of the Exchange Act are not available for general corporate purposes. At March 31, 2016, Hilltop Securities held cash of \$120.7 million segregated in special reserve bank accounts for the benefit of customers. Hilltop Securities was not required to segregate cash and securities in special reserve accounts for the benefit of proprietary accounts of introducing broker-dealers at March 31, 2016. The fair values of these segregated assets included in special reserve accounts were determined using Level 1 inputs.

(Unaudited)

Mortgage Origination

As a mortgage originator, PrimeLending is subject to minimum net worth requirements established by the U.S. Department of Housing and Urban Development (“HUD”) and the GNMA. On an annual basis, PrimeLending submits audited financial statements to HUD and GNMA documenting PrimeLending’s compliance with its minimum net worth requirements. In addition, PrimeLending monitors compliance on an ongoing basis and, as of March 31, 2016, PrimeLending’s net worth exceeded the amounts required by both HUD and GNMA.

Insurance

The statutory financial statements of the Company's insurance subsidiaries, which are domiciled in the State of Texas, are presented on the basis of accounting practices prescribed or permitted by the Texas Department of Insurance. Texas has adopted the statutory accounting practices of the National Association of Insurance Commissioners (“NAIC”) as the basis of its statutory accounting practices with certain differences that are not significant to the insurance company subsidiaries’ statutory equity.

A summary of statutory capital and surplus and statutory net income of each insurance subsidiary is as follows (in thousands).

	March 31, 2016	December 31, 2015
Capital and surplus:		
National Lloyds Insurance Company	\$ 119,836	\$ 121,750
American Summit Insurance Company	28,980	30,592

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

	Three Months Ended March 31,	
	2016	2015
Statutory net income:		
National Lloyds Insurance Company	\$ 3,557	\$ 4,759
American Summit Insurance Company	852	909

Regulations of the Texas Department of Insurance require insurance companies to maintain minimum levels of statutory surplus to ensure their ability to meet their obligations to policyholders. At March 31, 2016, the Company's insurance subsidiaries had statutory surplus in excess of the minimum required.

The NAIC has adopted a risk based capital (“RBC”) formula for insurance companies that establishes minimum capital requirements indicating various levels of available regulatory action on an annual basis relating to insurance risk, asset credit risk, interest rate risk and business risk. The RBC formula is used by the NAIC and certain state insurance regulators as an early warning tool to identify companies that require additional scrutiny or regulatory action. At March 31, 2016, the Company's insurance subsidiaries' RBC ratio exceeded the level at which regulatory action would be required.

Notes to Consolidated Financial Statements (continued)

(Unaudited)

16. Derivative Financial Instruments

The Company uses various derivative financial instruments to mitigate interest rate risk. The Bank's interest rate risk management strategy involves effectively managing the re-pricing characteristics of certain assets and liabilities to mitigate potential adverse impacts from changes in interest rates on the net interest margin. PrimeLending has interest rate risk relative to interest rate lock commitments ("IRLCs") and its inventory of mortgage loans held for sale. PrimeLending is exposed to such interest rate risk from the time an IRLC is made to an applicant to the time the related mortgage loan is sold. To mitigate interest rate risk, PrimeLending executes forward commitments to sell mortgage-backed securities ("MBSs"). Additionally, PrimeLending has interest rate risk relative to its MSR asset and uses derivative instruments, including interest rate swaps and swaptions, to hedge this risk. The Hilltop Broker-Dealers use forward commitments to both purchase and sell MBSs to facilitate customer transactions and as a means to hedge related exposure to interest rate risk in certain inventory positions.

Non-Hedging Derivative Instruments and the Fair Value Option

As discussed in Note 3 to the consolidated financial statements, the Company has elected to measure substantially all mortgage loans held for sale at fair value under the provisions of the Fair Value Option. The election provides the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without applying complex hedge accounting provisions. The fair values of PrimeLending's IRLCs, forward commitments, and interest rate swaps and swaptions are recorded in other assets or other liabilities, as appropriate, and changes in the fair values of these derivative instruments are recorded as a component of net gains from sale of loans and other mortgage production income. The fair value of PrimeLending's derivative instruments increased \$12.5 million during the three months ended March 31, 2016, compared with an increase of \$18.9 million during the same period in 2015. Changes in fair value are attributable to changes in the volume of IRLCs, mortgage loans held for sale, commitments to purchase and sell MBSs and MSR assets, and changes in market interest rates. Changes in market interest rates also conversely affect the value of PrimeLending's mortgage loans held for sale and its MSR asset, which are measured at fair value under the Fair Value Option. The effect of the change in market interest rates on PrimeLending's loans held for sale and MSR asset is discussed in Note 3 to the consolidated financial statements. The fair values of the Hilltop Broker-Dealers' derivative instruments are recorded in other assets or other liabilities, as appropriate, and the fair values of the Hilltop Broker-Dealers' derivatives increased \$6.9 million and \$8.6 million during the three months ended March 31, 2016 and 2015, respectively. The changes in fair value were recorded as a component of other noninterest income.

Derivative positions are presented in the following table (in thousands).

	March 31, 2016		December 31, 2015	
	Notional Amount	Estimated Fair Value	Notional Amount	Estimated Fair Value
Derivative instruments:				
IRLCs	\$ 1,505,457	\$ 44,915	\$ 944,942	\$ 23,762
Commitments to purchase MBSs	3,761,758	23,811	3,151,862	8,350
Commitments to sell MBSs	6,194,817	(23,294)	5,038,565	(2,352)
Interest rate swaps and swaptions	587,418	1,604	409,982	490

PrimeLending had cash collateral advances totaling \$7.3 million and \$0.8 million to offset net liability derivative positions on its commitments to sell MBSs at March 31, 2016 and December 31, 2015, respectively. In addition, PrimeLending advanced cash collateral totaling \$8.7 million and \$6.4 million in initial margin on its interest rate swaps and swaptions at March 31, 2016 and December 31, 2015, respectively. These amounts are included in other assets within the consolidated balance sheets.

Secured Borrowing Arrangements

Secured Borrowings (Repurchase Agreements) — The Company participates in transactions involving securities sold under repurchase agreements, which are secured borrowings and generally mature within one to thirty days from the transaction date. Securities sold under repurchase agreements are reflected at the amount of cash received in connection with the transactions. The Company may be required to provide additional collateral based on the fair value of the underlying securities, which is monitored on a daily basis.

Securities Lending Activities — The Company's securities lending activities includes lending securities for other broker-dealers, lending institutions and its own clearing and retail operations. These activities involve lending securities to other broker-dealers to cover short sales, to complete transactions in which there has been a failure to deliver securities by the required settlement date and as a conduit for financing activities.

When lending securities, the Company receives cash or similar collateral and generally pays interest (based on the amount of cash deposited) to the other party to the transaction. Securities lending transactions are executed pursuant to written agreements with counterparties that generally require securities loaned to be marked-to-market on a daily basis. The Company receives collateral in the form of cash in an amount generally in excess of the fair value of securities loaned. The Company monitors the fair value of securities loaned on a daily basis, with additional collateral obtained or refunded, as necessary. Collateral adjustments are made on a daily basis through the facilities of various clearinghouses. The Company is a principal in these securities lending transactions and is liable for losses in the event of a failure of any other party to honor its contractual obligation. Management sets credit limits with each counterparty and reviews these limits regularly to monitor the risk level with each counterparty. The Company is subject to credit risk through its securities lending activities if securities prices decline rapidly because the value of the Company's collateral could fall below the amount of the indebtedness it secures. In rapidly appreciating markets, credit risk increases due to short positions. The Company's securities lending business subjects the Company to credit risk if a counterparty fails to perform or if collateral securing its obligations is insufficient. In securities transactions, the Company is subject to credit risk during the period between the execution of a trade and the settlement by the customer.

The following tables present the remaining contractual maturities of repurchase agreement and securities lending transactions accounted for as secured borrowings (in thousands). The Company had no repurchase-to-maturity transactions outstanding at both March 31, 2016 and December 31, 2015.

Plus reinsurance recoverables	8,831	8,451
Balance, end of period	\$ 42,978	\$ 37,444

The increase in NLC's reserves at March 31, 2016 as compared with March 31, 2015 of \$5.5 million is primarily due to increased reserves attributable to an increase in frequency and severity of severe weather events in our geographic coverage area.

20. Reinsurance Activity

NLC limits the maximum net loss that can arise from large risks or risks in concentrated areas of exposure by reinsuring (ceding) certain levels of risk. Substantial amounts of business are ceded, and these reinsurance contracts do not relieve NLC from its obligations to policyholders. Such reinsurance includes quota share, excess of loss, catastrophe, and other forms of reinsurance on essentially all property and casualty lines of insurance. Net insurance premiums earned, losses and LAE and policy acquisition and other underwriting expenses are reported net of the amounts related to reinsurance ceded to other companies. Amounts recoverable from reinsurers related to the portions of the liability for losses and LAE and unearned insurance premiums ceded to them are reported as assets. Failure of reinsurers to honor their obligations could result in losses to NLC; consequently, allowances are established for amounts deemed uncollectible as NLC evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities, or economic characteristics of the reinsurers to minimize its exposure to significant losses from reinsurer insolvencies. At March 31, 2016, reinsurance receivables had a carrying value of \$13.1 million, which is included in other assets within the consolidated balance sheet. There was no allowance for uncollectible accounts at March 31, 2016, based on NLC's quality requirements.

The effects of reinsurance on premiums written and earned are summarized as follows (in thousands).

	Three Months Ended March 31,			
	2016		2015	
	Written	Earned	Written	Earned
Premiums from direct business	\$ 39,079	\$ 40,886	\$ 42,749	\$ 42,089
Reinsurance assumed	2,679	2,669	2,516	2,443
Reinsurance ceded	(3,498)	(3,822)	(4,705)	(4,965)
Net premiums	\$ 38,260	\$ 39,733	\$ 40,560	\$ 39,567

The effects of reinsurance on incurred losses are as follows (in thousands).

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

	2016	2015
Loss and LAE incurred	\$ 23,489	\$ 23,331
Reinsurance recoverables	(1,530)	(4,471)
Net loss and LAE incurred	\$ 21,959	\$ 18,860

Catastrophic coverage

At March 31, 2016, NLC had catastrophic excess of loss reinsurance coverage of losses per event in excess of \$8.0 million retention by NLIC and \$1.5 million retention by ASIC. ASIC maintained an underlying layer of coverage, providing \$6.5 million in excess of its \$1.5 million retention to bridge to the primary program. The reinsurance in excess of \$8.0 million is comprised of four layers of protection: \$17 million in excess of \$8 million retention; \$25 million in excess of \$25 million loss; \$25 million in excess of \$50 million loss and \$50 million in excess of \$75 million loss. NLIC and ASIC retain no participation in any of the layers, beyond the first \$8 million and \$1.5 million, respectively. At March 31, 2016, total retention for any one catastrophe that affects both NLIC and ASIC was limited to \$8 million in the aggregate.

Effective January 1, 2016, NLC did not renew its multi-line excess of loss coverage that previously limited each risk with respect to property and liability. NLC renewed its underlying excess of loss contract that provides \$10.0 million aggregate coverage in excess of NLC's per event retention and aggregate retention for sub-catastrophic events. NLC retains no participation beyond the first \$1 million, down from 9% participation in this coverage during 2015.

21. Segment and Related Information

The Company currently has four reportable business segments that are organized primarily by the core products offered to the segments' respective customers. These segments reflect the manner in which operations are managed and the criteria used by the Company's chief operating decision maker function to evaluate segment performance, develop strategy and allocate resources. The chief operating decision maker function consists of the President and Chief Executive Officer of the Company and the Chief Executive Officer of PlainsCapital. For the third quarter of 2015, the Company began presenting the bargain purchase gain associated with the SWS Merger, previously allocated to the banking and broker-dealer reportable business segments, within corporate to better reflect segment performance. This change is reflected in the segment operating results within noninterest income for the three months ended March 31, 2015. Additionally, related amounts previously reported in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2015 will be revised in future filings. This change had no impact on the Company's consolidated results of operations.

The banking segment includes the operations of the Bank. The broker-dealer segment includes the operations of the Hilltop Broker-Dealers, while the mortgage origination segment is composed of PrimeLending, and the insurance segment is composed of NLC.

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance and acquisition costs.

Balance sheet amounts not discussed previously and the elimination of intercompany transactions are included in "All Other and Eliminations." The following tables present certain information about reportable business segment revenues, operating results, goodwill and assets (in thousands).

(Unaudited)

22. Earnings per Common Share

Nonvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and are included in the computation of earnings per share pursuant to the two-class method prescribed by the Earnings Per Share Topic of the ASC. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. Restricted Stock Awards are the only instruments issued by Hilltop which qualify as participating securities.

Net earnings, less any preferred dividends accumulated for the period (whether or not declared), is allocated between the common stock and participating securities pursuant to the two-class method. Basic earnings per common share is computed by dividing net earnings available to common stockholders by the weighted average number of common shares outstanding during the period, excluding participating nonvested restricted shares.

Diluted earnings per common share is computed in a similar manner, except that first the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares, excluding the participating securities, were issued using the treasury stock method. During the three months ended March 31, 2016 and 2015, stock options and RSUs are the only potentially dilutive non-participating instruments issued by Hilltop. Next, the Company determines and includes in the diluted earnings per common share calculation the more dilutive effect of the participating securities using the treasury stock method or the two-class method. Undistributed losses are not allocated to the nonvested share-based payment awards (the participating securities) under the two-class method as the holders are not contractually obligated to share in the losses of the Company.

The following table presents the computation of basic and diluted earnings per common share (in thousands, except per share data).

Three Months Ended	
March 31,	
2016	2015

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

Notes to Consolidated Financial Statements (continued)

(Unaudited)

23. Recently Issued Accounting Standards

In March 2016, FASB issued ASU 2016-09 as part of its simplification initiative and affects all entities that issue share-based payment awards to their employees. The amendments in this update cover such areas as the recognition of excess tax benefits and deficiencies, the classification of those excess tax benefits on the statement of cash flows, an accounting policy election for forfeitures, the amount an employer can withhold to cover income taxes and still qualify for equity classification and the classification of those taxes paid on the statement of cash flows. The amendments are effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2016 using either prospective, retrospective or modified retrospective transition method, depending on the area covered in this update. As permitted within the amendment, the Company elected to early adopt and prospectively apply the provisions of this amendment as of January 1, 2016.

In February 2016, FASB issued ASU 2016-02 related to leases. The new standard is intended to increase transparency and comparability among organizations and require lessees to record a right-to-use asset and liability representing the obligation to make lease payments for long-term leases. Accounting by lessors will remain largely unchanged. The amendments are effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2018. Early adoption is permitted. Adoption will require a modified retrospective transition where the lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented. The Company is currently evaluating the provisions of the amendment and the impact on its future consolidated financial statements.

In January 2016, FASB issued ASU 2016-01 related to financial instruments. This pronouncement requires that most equity investments be measured at fair value, with subsequent changes in fair value recognized in net income. The pronouncement also impacts financial liabilities under the Fair Value Option and the presentation and disclosure requirements for financial instruments. The amendment is effective for annual periods, and interim periods within those fiscal periods, beginning after December 15, 2017. The Company is currently evaluating the provisions of the amendment and the impact on its future consolidated financial statements.

In May 2015, the FASB issued ASU 2015-09 requiring enhanced disclosures for insurers relating to short-duration insurance contract claims and the unpaid claims liability rollforward for long and short-duration contracts. The amendment is effective for annual periods beginning after December 15, 2015 and interim reporting periods thereafter. The Company adopted the amendment as of January 1, 2016 and will include the enhanced disclosures beginning with its Annual Report on Form 10-K for the year ended December 31, 2016.

In May 2014, the FASB issued ASU 2014-09 which clarifies the principles for recognizing revenue from contracts with customers. The amendment outlines a single comprehensive model for entities to depict the transfer of goods or services to customers in amounts that reflect the payment to which a company expects to be entitled in exchange for those goods or services. The amendment also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. The amendment was initially scheduled to be effective for the Company no earlier than the first quarter of 2017, however, in July 2015, the FASB issued ASU 2015-14 which deferred the effective date by one year. Therefore, the amendment is effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2017 and may be adopted using either a full retrospective transition method or a modified retrospective transition method. Early adoption is permitted no earlier than the first quarter of 2017. The Company is currently evaluating the provisions of the amendment and the impact on its future consolidated financial statements.

24. Subsequent Event

On April 1, 2016, the Company awarded certain key employees a total of 268,906 RSUs pursuant to the 2012 Plan at a grant date fair value of \$18.68 per share. These RSUs generally cliff vest on the third anniversary of the grant date and are subject to service conditions set forth in the award agreements. Total compensation expense related to these RSUs is expected to be \$5.0 million, which will be amortized through March 2019.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion should be read in conjunction with the consolidated historical financial statements and notes appearing elsewhere in this Quarterly Report on Form 10-Q (this “Quarterly Report”) and the financial information set forth in the tables herein.

Unless the context otherwise indicates, all references in this Management’s Discussion and Analysis of Financial Condition and Results of Operations, or MD&A, to the “Company,” “we,” “us,” “our” or “ours” or similar words are to Hilltop Holdings Inc. and its direct and indirect wholly owned subsidiaries, references to “Hilltop” refer solely to Hilltop Holdings Inc., references to “PlainsCapital” refer to PlainsCapital Corporation (a wholly owned subsidiary of Hilltop), references to “Securities Holdings” refer to Hilltop Securities Holdings LLC (a wholly owned subsidiary of Hilltop), references to “Hilltop Securities” refer to Hilltop Securities Inc. (a wholly owned subsidiary of Securities Holdings that was formerly known as Southwest Securities, Inc.), references to “HTS Independent Network” refer to Hilltop Securities Independent Network Inc. (a wholly owned subsidiary of Securities Holdings that was formerly known as SWS Financial Services, Inc.), references to the “Bank” refer to PlainsCapital Bank (a wholly owned subsidiary of PlainsCapital), references to “FNB” refer to First National Bank, references to “SWS” refer to the former SWS Group, Inc., references to “First Southwest” refer to First Southwest Holdings, LLC (a wholly owned subsidiary of Securities Holdings) and its subsidiaries as a whole, references to “FSC” refer to First Southwest Company, LLC (a former wholly owned subsidiary of First Southwest), references to “PrimeLending” refer to PrimeLending, a PlainsCapital Company (a wholly owned subsidiary of the Bank) and its subsidiaries as a whole, references to “NLC” refer to National Lloyds Corporation (a wholly owned subsidiary of Hilltop) and its subsidiaries as a whole, references to “NLIC” refer to National Lloyds Insurance Company (a wholly owned subsidiary of NLC) and references to “ASIC” refer to American Summit Insurance Company (a wholly owned subsidiary of NLC).

FORWARD-LOOKING STATEMENTS

This Quarterly Report includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934 (the “Exchange Act”), as amended by the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included in this Quarterly Report that address results or developments that we expect or anticipate will or may occur in the future, and statements that are preceded by, followed by or include, words such as “anticipates,” “believes,” “could,” “estimates,” “expects,” “forecasts,” “goal,” “intends,” “may,” “might,” “plan,” “probable,” “projects,” “seeks,” “should,” “would” or the negative of these words and phrases or similar words or phrases, including such things as our business strategy, our financial condition, our efforts to make strategic acquisitions, the integration of the operations acquired in the SWS Merger (as defined below), our revenue, our liquidity and sources of funding, market trends, operations and business, expectations concerning mortgage loan origination volume, expected losses on covered loans and related reimbursements from the Federal Deposit Insurance Corporation (“FDIC”), expected levels of refinancing as a

percentage of total loan origination volume, projected losses on mortgage loans originated, anticipated changes in our revenues or earnings, the effects of government regulation applicable to our operations, the appropriateness of our allowance for loan losses and provision for loan losses, and the collectability of loans and litigation are forward-looking statements.

These forward-looking statements are based on our beliefs, assumptions and expectations of our future performance taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us. If an event occurs, our business, business plan, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Certain factors that could cause actual results to differ include, among others:

- risks associated with merger and acquisition integration, including our ability to promptly and effectively integrate our businesses with those acquired in the SWS Merger and achieve the anticipated synergies and cost savings in connection therewith, as well as the diversion of management time on acquisition- and integration-related issues; our ability to estimate loan losses;

Table of Contents

- changes in the default rate of our loans;
- changes in general economic, market and business conditions in areas or markets where we compete, including changes in the price of crude oil;
- risks associated with concentration in real estate related loans;
- severe catastrophic events in Texas and other areas of the southern United States;
- changes in the interest rate environment;
- cost and availability of capital;
- effectiveness of our data security controls in the face of cyber attacks;
- changes in state and federal laws, regulations or policies affecting one or more of our business segments, including changes in regulatory fees, deposit insurance premiums, capital requirements and the Dodd-Frank Wall Street Reform and Consumer Protection Act;
- approval of new, or changes in, accounting policies and practices;
- changes in key management;
- competition in our banking, broker-dealer, mortgage origination and insurance segments from other banks and financial institutions as well as investment banking and financial advisory firms, mortgage bankers, asset-based non-bank lenders, government agencies and insurance companies;
- our ability to obtain reimbursements for losses on acquired loans under loss-share agreements with the FDIC to the extent the FDIC determines that we did not adequately manage the covered loan portfolio;
- failure of our insurance segment reinsurers to pay obligations under reinsurance contracts; and
- our ability to use excess cash in an effective manner, including the execution of successful acquisitions.

For a more detailed discussion of these and other factors that may affect our business and that could cause the actual results to differ materially from those anticipated in these forward-looking statements, see “Risk Factors” in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2015 (“2015 Form 10-K”), which was filed with the Securities and Exchange Commission (the “SEC”) on February 24, 2016, this Item 2, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” Part II, Item 1A, “Risk Factors” herein and other filings we have made with the SEC. We caution that the foregoing list of factors is not exhaustive, and new factors may emerge, or changes to the foregoing factors may occur, that could impact our business. All subsequent written and oral forward-looking statements concerning our business attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements above. We do not undertake any obligation to update any forward-looking statement, whether written or oral, relating to the matters discussed in this Quarterly Report except to the extent required by federal securities laws.

OVERVIEW

We are a financial holding company registered under the Bank Holding Company Act of 1956. Our primary line of business is to provide business and consumer banking services from offices located throughout Texas through the Bank. We also provide an array of financial products and services through our broker-dealer, mortgage origination and insurance segments. The following includes additional details regarding the financial products and services provided by each of our primary operating business units.

PlainsCapital. PlainsCapital is a financial holding company headquartered in Dallas, Texas that provides, through its subsidiaries, traditional banking and wealth, investment management and treasury management services primarily in Texas and residential mortgage loans throughout the United States.

Securities Holdings. Securities Holdings is a holding company headquartered in Dallas, Texas that provides, through its subsidiaries, investment banking and other related financial services, including municipal advisory, sales, trading and underwriting of taxable and tax-exempt fixed income securities, equity trading, clearing, securities lending, structured finance and retail brokerage services throughout the United States.

Table of Contents

NLC. NLC is a property and casualty insurance holding company headquartered in Waco, Texas that provides, through its subsidiaries, fire and homeowners insurance to low value dwellings and manufactured homes primarily in Texas and other areas of the southern United States.

During the three months ended March 31, 2016, our net income to common stockholders was \$27.6 million, or \$0.28 per diluted share.

We reported \$42.6 million of consolidated income before income taxes during the three months ended March 31, 2016, including the following contributions from our four reportable operating segments.

- The banking segment contributed \$31.2 million of income before income taxes during the three months ended March 31, 2016;
- The broker-dealer segment contributed \$3.8 million of income before income taxes during the three months ended March 31, 2016;
- The mortgage origination segment contributed \$9.1 million of income before income taxes during the three months ended March 31, 2016; and
- The insurance segment contributed \$6.2 million of income before income taxes during the three months ended March 31, 2016.

At March 31, 2016, on a consolidated basis, we had total assets of \$11.7 billion, total deposits of \$7.0 billion, total loans, including loans held for sale, of \$7.0 billion and stockholders' equity of \$1.8 billion.

On January 1, 2015, we completed our acquisition of SWS in a stock and cash transaction (the "SWS Merger"), whereby SWS's broker-dealer subsidiaries, Southwest Securities, Inc. and SWS Financial Services, Inc., became subsidiaries of Securities Holdings and SWS's banking subsidiary, Southwest Securities, FSB ("SWS FSB"), was merged into the Bank, an indirect wholly owned subsidiary of Hilltop. On October 5, 2015, Southwest Securities, Inc. and SWS Financial Services, Inc. were renamed "Hilltop Securities Inc." and "Hilltop Securities Independent Network Inc.", respectively. The operations acquired in the SWS Merger were included in our operating results beginning January 1, 2015 and such operations included a preliminary bargain purchase gain of \$82.8 million as disclosed in our Quarterly Report on Form 10-Q filed with the SEC on May 6, 2015. During 2015, certain adjustments were recorded that resulted in an aggregate decrease in the preliminary bargain purchase gain associated with the SWS Merger to \$81.3 million, which also decreased net income for the three months ended March 31, 2015 by \$1.5 million as compared with amounts previously reported in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2015. Accordingly, our results for the quarter ended March 31, 2015 and related disclosures have been revised to reflect these adjustments.

On October 22, 2015, the Financial Industry Regulatory Authority (“FINRA”) granted approval to combine FSC and Hilltop Securities, subject to customary conditions. Following this approval, we integrated the back-office systems of FSC and Hilltop Securities and, on January 22, 2016, merged FSC and Hilltop Securities into a combined firm operating under the “Hilltop Securities” name. We use the term “Hilltop Broker-Dealers” to refer to FSC, Hilltop Securities and HTS Independent Network prior to such date and Hilltop Securities and HTS Independent Network after such date.

Segment Information

We have three primary operating business units, PlainsCapital (banking and mortgage origination), Securities Holdings (broker-dealer) and NLC (insurance). Under accounting principles generally accepted in the United States (“GAAP”), our business units are comprised of four reportable business segments organized primarily by the core products offered to the segments’ respective customers: banking, broker-dealer, mortgage origination and insurance. For the third quarter of 2015, we began presenting the bargain purchase gain associated with the SWS Merger, previously allocated to the banking and broker-dealer reportable business segments, within corporate to better reflect segment performance. This change is reflected in the segment operating results within noninterest income, and MD&A, for the three months ended March 31, 2015. Additionally, related amounts previously reported in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2015, within the MD&A, will be revised in future filings. This change had no impact on our consolidated results of operations. Consistent with our historical segment operating results, we anticipate that future revenues will be driven primarily from the banking segment, with the remainder being generated by our broker-dealer, mortgage

Table of Contents

origination and insurance segments. Operating results for the mortgage origination segment have historically been more volatile than operating results for the banking, broker-dealer and insurance segments.

The banking segment includes the operations of the Bank, which primarily provides business and consumer banking services from offices located throughout Texas and generates revenue from its portfolio of earning assets. The Bank's results of operations are primarily dependent on net interest income, while also deriving revenue from other sources, including service charges on customer deposit accounts and trust fees.

The broker-dealer segment includes the operations of Hilltop Securities and HTS Independent Network. From the date of the SWS Merger until January 22, 2016, when we merged FSC into Hilltop Securities to form a combined firm operating under the "Hilltop Securities" name, our broker-dealer segment was operated through FSC, Hilltop Securities and HTS Independent Network as separate broker-dealers under coordinated leadership. The broker-dealer segment generates a majority of its revenues from fees and commissions earned from investment advisory and securities brokerage services. Hilltop Securities is a broker-dealer registered with the SEC and the Financial Industry Regulatory Authority ("FINRA") and a member of the New York Stock Exchange ("NYSE"), HTS Independent Network is an introducing broker-dealer that is also registered with the SEC and FINRA, and First Southwest Asset Management, LLC is a registered investment advisor under the Investment Advisors Act of 1940.

The mortgage origination segment includes the operations of PrimeLending, which offers a variety of loan products and generates revenue predominantly from fees charged on the origination of loans and from selling these loans in the secondary market.

The insurance segment includes the operations of NLC, which operates through its wholly owned subsidiaries, NLIC and ASIC. Insurance segment income is primarily generated from revenue earned on net insurance premiums less loss and loss adjustment expenses ("LAE") and policy acquisition and other underwriting expenses in Texas and other areas of the southern United States.

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance, and acquisition costs.

The elimination of intercompany transactions are included in "All Other and Eliminations." Additional information concerning our reportable segments is presented in Note 21, Segment and Related Information, in the notes to our consolidated financial statements. The following tables present certain information about the operating results of our reportable segments (in thousands).

Three Months Ended March 31, 2016	Mortgage					All Other and	Hilltop

Table of Contents

How We Generate Revenue

We generate revenue from net interest income and from noninterest income. Net interest income represents the difference between the income earned on our assets, including our loans and investment securities, and our cost of funds, including the interest paid on the deposits and borrowings that are used to support our assets. Net interest income is a significant contributor to our operating results. Fluctuations in interest rates, as well as the amounts and types of interest-earning assets and interest-bearing liabilities we hold, affect net interest income. We generated \$93.5 million in net interest income during the three months ended March 31, 2016, compared with net interest income of \$93.4 million during the same period in 2015. The year-over-year change in net interest income primarily included an increase within our banking segment, offset by interest expense incurred on our \$150.0 million aggregate principle amount of 5% senior notes due 2025 (“Senior Notes”) that were not issued until the second quarter of 2015 and a decrease in net interest income within our broker-dealer segment.

The other component of our revenue is noninterest income, which is primarily comprised of the following:

- (i) Income from broker-dealer operations. Through the Hilltop Broker-Dealers, we provide investment banking and other related financial services. We generated \$62.6 million and \$67.8 million in securities brokerage commissions and fees and investment advisory fees and commissions and \$17.7 million and \$11.6 million in gains from derivative and trading portfolio activities (included within other noninterest income) during the three months ended March 31, 2016 and 2015, respectively.
- (ii) Income from mortgage operations. Through PrimeLending, we generate noninterest income by originating and selling mortgage loans. During the three months ended March 31, 2016 and 2015, we generated \$146.1 million and \$135.1 million, respectively, in net gains from the sale of loans, other mortgage production income (including income associated with retained mortgage servicing rights), and mortgage loan origination fees.
- (iii) Income from insurance operations. Through NLC, we provide fire and limited homeowners insurance for low value dwellings and manufactured homes. We generated \$39.7 million and \$39.6 million in net insurance premiums earned during the three months ended March 31, 2016 and 2015, respectively.

In the aggregate, we generated \$277.7 million and \$352.8 million in noninterest income during the three months ended March 31, 2016 and 2015, respectively. Excluding the bargain purchase gain of \$81.3 million related to the SWS Merger, our noninterest income during the three months ended March 31, 2015 was \$271.6 million. We are presenting this financial measure because certain investors may use it to evaluate our business and financial results. This year-over-year increase in noninterest income, other than bargain purchase gain, is predominantly attributable to increases in noninterest income in our mortgage origination and broker-dealer segments, offset by a decline in noninterest income in our banking segment.

We also incur noninterest expenses in the operation of our businesses. Our businesses engage in labor intensive activities and, consequently, employees’ compensation and benefits represent the majority of our noninterest expenses.

Consolidated Operating Results

Net income applicable to common stockholders during the three months ended March 31, 2016 was \$27.6 million, or \$0.28 per diluted share, compared with net income applicable to common stockholders of \$111.9 million, or \$1.11 per diluted share, during the three months ended March 31, 2015. The consolidated operating results during the three months ended March 31, 2015 include the recognition of a bargain purchase gain related to the SWS Merger of \$81.3 million, or \$0.81 per diluted share. Included in the bargain purchase gain is a reversal of a \$33.4 million valuation allowance against SWS deferred tax assets. This amount is based on our expected ability to realize these acquired deferred tax assets through our consolidated core earnings, the implementation of certain tax planning strategies and reversal of timing differences. SWS's net operating loss carryforwards are subject to an annual limitation on their usage because of the ownership change effected in connection with the SWS Merger. In addition, the bargain purchase gain reflects our acquisition date fair value allocation to identifiable intangible assets of \$7.5 million.

Our consolidated operating results during the three months ended March 31, 2016 and 2015 also include transaction costs primarily related to the execution and closing of the SWS Merger, and integration-related costs associated with employee expenses (such as severance and retention), professional fees (such as consulting and legal) and contractual

Table of Contents

costs (such as vendor contract termination and lease), incurred as a result of the plan to integrate the operations and systems acquired in the SWS Merger. During the three months ended March 31, 2016, we incurred \$0.8 million in pre-tax transaction costs related to the SWS Merger, while pre-tax integration-related costs associated with employee, professional fee and contractual expenses during this same period were \$1.7 million, \$2.2 million and \$0.1 million, respectively. During the three months ended March 31, 2015, we incurred \$5.6 million in pre-tax transaction costs related to the SWS Merger, while pre-tax integration-related costs associated with employee expenses and professional fees during this same period were \$4.0 million and \$0.4 million, respectively. On October 22, 2015, FINRA granted approval to combine FSC and Hilltop Securities, subject to customary conditions. Since this approval, we have integrated the back-office systems of FSC and Hilltop Securities and, effective as of the close of business on January 22, 2016, we merged FSC and Hilltop Securities into a combined firm operating under the “Hilltop Securities” name. As a result, we began realizing cost savings in 2016, although these cost savings have been partially offset by additional integration costs that we anticipate incurring through the first six months of 2016.

Certain items included in net income for 2016 and 2015 resulted from purchase accounting associated with the merger of PlainsCapital Corporation with and into a wholly owned subsidiary of Hilltop on November 30, 2012 (the “PlainsCapital Merger”), the FDIC-assisted transaction (the “FNB Transaction”) whereby the Bank acquired certain assets and assumed certain liabilities of FNB, and the SWS Merger (collectively, the “Bank Transactions”). Income before taxes during the three months ended March 31, 2016 included net accretion of \$3.3 million, \$11.4 million and \$1.2 million on earning assets and liabilities acquired in the PlainsCapital Merger, FNB Transaction and SWS Merger, respectively, offset by amortization of identifiable intangibles of \$2.0 million, \$0.2 million and \$0.2 million, respectively. During the three months ended March 31, 2015, income before taxes included net accretion of \$4.0 million, \$9.8 million and \$2.3 million on earning assets and liabilities acquired in the PlainsCapital Merger, FNB Transaction and SWS Merger, respectively, offset by amortization of identifiable intangibles of \$2.2 million, \$0.2 million and \$0.4 million, respectively.

We consider the ratios shown in the table below to be key indicators of our performance.

	Three Months Ended March 31,	
	2016	2015
Performance Ratios:		
Return on average stockholder's equity	6.32 %	26.76 %
Return on average assets	0.96 %	3.64 %
Net interest margin (taxable equivalent) (1) (2)	3.70 %	3.53 %

(1) Taxable equivalent net interest income divided by average interest-earning assets.

(2) During the three months ended March 31, 2016 and 2015, taxable equivalent net interest margin was 54 basis points and 70 basis points, respectively, lower due to the impact related to the securities financing operations within our broker-dealer segment.

During the three months ended March 31, 2016, the consolidated taxable equivalent net interest margin of 3.70% was 74 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$4.1 million, \$11.4 million and \$1.1 million associated with the PlainsCapital Merger, FNB Transaction and SWS Merger, respectively, and PlainsCapital Merger-related amortization of premium on acquired securities of \$0.8 million. The consolidated taxable equivalent net interest margin during the three months ended March 31, 2015 of 3.53% was 69 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$5.0 million, \$9.7 million and \$2.3 million associated with PlainsCapital Merger, FNB Transaction and SWS Merger, respectively, and PlainsCapital Merger-related amortization of premium on acquired securities of \$0.9 million.

The FNB Transaction-related accretion of discount on loans of \$11.4 million and \$9.7 million during the three months ended March 31, 2016 and 2015, respectively, included accretion of approximately \$3 million and \$1 million, respectively, due to better-than-expected resolution of covered purchased credit impaired (“PCI”) loans during the respective periods. The better-than-expected performance of the covered PCI loan portfolio since 2014 has led to higher yields calculated as a result of the Bank’s quarterly cash flow recast process. The recast process performed during the three months ended March 31, 2016 and 2015 resulted in the reclassification of \$9.6 million and \$16.3 million, respectively, from nonaccretable difference to accretable yield.

Table of Contents

The table below provides additional details regarding our consolidated net interest income (dollars in thousands).

	Three Months Ended March 31, 2016				2015

Net interest spread					
(2)		3.43	%	3.34	%
Net interest margin					
(2)		3.70	%	3.53	%

(1) Average balance includes non-accrual loans.

(2) Annualized taxable equivalent adjustments are based on a 35% tax rate. The adjustment to interest income was \$0.7 million and \$0.8 million for the three months ended March 31, 2016 and 2015, respectively.

The banking segment's net interest margin exceeds our consolidated net interest margin shown above. Our consolidated net interest margin includes certain items that are not reflected in the calculation of our net interest margin within our banking segment and reduce our consolidated net interest margin, such as the borrowing costs of Hilltop and the yields and costs associated with certain items within interest-earning assets and interest-bearing liabilities in the broker-dealer segment, including items related to securities financing operations that particularly decrease net interest margin. In addition, yields and costs on certain interest-earning assets, such as warehouse lines of credit extended to subsidiaries by the banking segment, are eliminated from the consolidated financial statements.

On a consolidated basis, net interest income increased \$0.1 million during the three months ended March 31, 2016 compared with the same period in 2015. This increase included the net effect of increases in the volume of the loan portfolio, partially offset by lower yields on the loan portfolio within our banking segment. This increase in net interest income was offset by interest expense at corporate on our outstanding Senior Notes, the offering of which was completed during the second quarter of 2015 and reduction in interest earned on securities lending activities in our broker-dealer segment.

The provision for loan losses is determined by management as the amount to be added to the allowance for loan losses after net charge-offs have been deducted to bring the allowance to a level which, in management's best estimate, is necessary to absorb probable losses within the existing loan portfolio. The consolidated provision for loan losses, substantially all of which relates to the banking segment, was \$3.4 million and \$2.7 million during the three months ended March 31, 2016 and 2015, respectively. During the three months ended March 31, 2016, the provision for loan losses was entirely comprised of charges relating to newly originated loans and acquired loans without credit

impairment at acquisition of \$3.4 million, compared to charges during the three months ended March 31, 2015 relating to newly originated loans and acquired loans without credit impairment at acquisition of \$3.4 million, partially offset by the recapture of charges on PCI loans of \$0.7 million.

Table of Contents

Consolidated noninterest income decreased \$75.2 million during the three months ended March 31, 2016, compared with the same period in 2015. This year-over-year change included the recognition of a bargain purchase gain related to the SWS Merger of \$81.3 million during the three months ended March 31, 2015. The resulting year-over-year increase in noninterest income, other than bargain purchase gain, during the three months ended March 31, 2016, compared with the same period in 2015, of \$6.1 million was primarily driven by an increase in noninterest income within our mortgage origination segment of \$11.0 million, offset by decreases in securities commissions and fees (net of intercompany eliminations) and investment banking and advisory fees within our broker-dealer segment of \$5.3 million.

Consolidated noninterest expense during the three months ended March 31, 2016 increased \$10.7 million, compared with the same period in 2015. This year-over-year increase included increases in noninterest expenses within our banking, mortgage origination and insurance segments, offset by decreases in our broker-dealer segment and corporate partially attributable to decreases in pre-tax transaction and integration-related costs associated with the SWS Merger. During the three months ended March 31, 2016 we incurred pre-tax transaction costs related to the SWS Merger of \$0.8 million and pre-tax integration-related costs associated with employee expenses, professional fees and contractual expenses of \$1.7 million, \$2.2 million and \$0.1 million, respectively, compared with pre-tax transaction costs of \$5.6 million and integration-related costs associated with employee expenses and professional fees of \$4.0 million and \$0.4 million, respectively, during the same period in 2015. Changes between the three months ended March 31, 2016 and the same period in 2015 within the major components of noninterest expense included increases of \$3.1 million in loss and loss adjustment expenses within our insurance segment and \$9.3 million in other expenses primarily attributable to a downward valuation adjustment associated with an OREO property within our banking segment, slightly offset by a decrease in occupancy and equipment expenses of \$1.4 million.

Consolidated income tax expense during the three months ended March 31, 2016 and 2015 was \$14.4 million and \$15.4 million, respectively, reflecting effective tax rates of 33.8% and 11.9%, respectively. The effective tax rate during the three months ended March 31, 2016 was lower than the statutory rate primarily due to recognition of excess tax benefits on share-based payment awards as a result of our adoption of the provisions of Accounting Standards Update 2016-09 as of January 1, 2016. The lower effective tax rate during the three months ended March 31, 2015 was primarily due to no income taxes being recorded in connection with the bargain purchase gain of \$81.3 million associated with the SWS Merger because the acquisition was a tax-free reorganization under Section 368(a) of the Internal Revenue Code. In addition, during the quarter ended March 31, 2015, we recorded an income tax benefit of \$2.1 million as a result of the SWS Merger to reverse the deferred tax liability for the difference between book and tax basis on Hilltop's investment in SWS common stock. Therefore, the effective income tax rate during the three months ended March 31, 2015 is not necessarily indicative of anticipated future effective tax rates.

Segment Results

Banking Segment

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

Income before income taxes in our banking segment during the three months ended March 31, 2016 and 2015 was \$31.2 million and \$41.7 million, respectively. The decrease in income before income taxes during the three months ended March 31, 2016, compared with the same period in 2015, was primarily due to an increase in noninterest expense primarily due to a downward valuation adjustment on a covered OREO property and a decrease in noninterest income associated with the prior year recognition of gains on securities acquired in the SWS Merger and subsequently sold, partially offset by an increase in net interest income.

We consider the ratios shown in the table below to be key indicators of the performance of our banking segment.

	Three Months Ended March 31,	
	2016	2015
Performance Ratios:		
Efficiency ratio (1)	64.97 %	56.96 %
Return on average assets	0.98 %	1.28 %
Net interest margin (taxable equivalent) (2)	4.73 %	4.59 %

-
- (1) Noninterest expenses divided by the sum of total noninterest income and net interest income for the period.
(2) Taxable equivalent net interest income divided by average interest-earning assets.

Table of Contents

During the three months ended March 31, 2016, the banking segment's taxable equivalent net interest margin of 4.73% was 103 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$4.1 million, \$11.4 million and \$1.1 million associated with the PlainsCapital Merger, FNB Transaction, and SWS Merger, respectively, and PlainsCapital Merger-related amortization of premium on acquired securities of \$0.8 million. The banking segment's taxable equivalent net interest margin during the three months ended March 31, 2015 of 4.59% was 109 basis points greater due to the impact of purchase accounting and primarily related to accretion of discount on loans of \$5.0 million, \$9.7 million and \$2.3 million associated with PlainsCapital Merger, FNB Transaction and SWS Merger, respectively, and PlainsCapital Merger-related amortization of premium on acquired securities of \$0.9 million.

The FNB Transaction-related accretion of discount on loans of \$11.4 million and \$9.7 million during the three months ended March 31, 2016 and 2015, respectively, included accretion of approximately \$3 million and \$1 million, respectively, due to better-than-expected resolution of covered PCI loans during the respective periods. The better-than-expected performance of the covered PCI loan portfolio since 2014 has led to higher yields calculated as a result of the Bank's quarterly cash flow recast process. The recast process performed during the three months ended March 31, 2016 and 2015 resulted in the reclassification of \$9.6 million and \$16.3 million, respectively, from nonaccretable difference to accretable yield.

The table below provides additional details regarding our banking segment's net interest income (dollars in thousands).

			4.73	%			4.59	%

(1) Average balance includes non-accrual loans.

(2) Annualized taxable equivalent adjustments are based on a 35% tax rate. The adjustment to interest income was \$0.4 million and \$0.5 million for the three months ended March 31, 2016 and 2015, respectively.

(3) Excludes the allocation of interest expense on PlainsCapital debt of \$0.4 million and \$0.3 million for the three months ended March 31, 2016 and 2015, respectively.

The banking segment's net interest margin exceeds our consolidated net interest margin. Our consolidated net interest margin includes certain items that are not reflected in the calculation of our net interest margin within our banking segment and reduce our consolidated net interest margin, such as the borrowing costs of Hilltop and the yields and costs associated with certain items within interest-earning assets and interest-bearing liabilities in the broker-dealer segment, including items related to securities financing operations that particularly decrease net interest margin. In

addition, the banking segment's interest-earning assets include warehouse lines of credit extended to other subsidiaries, which are eliminated from the consolidated financial statements.

Table of Contents

The following table summarizes the changes in the banking segment's net interest income for the periods indicated below, including the component changes in the volume of average interest-earning assets and interest-bearing liabilities and changes in the rates earned or paid on those items (in thousands).

	Three Months Ended March 31, 2016 vs. 2015		
	Change Due To (1)		
	Volume	Yield/Rate	Change
Interest income

Net interest income (2)	\$ 5,961	\$ (3,329)	\$ 2,632

(1) Changes attributable to both volume and yield/rate are included in yield/rate column.

(2) Annualized taxable equivalent.

Taxable equivalent net interest income increased \$2.6 million during the three months ended March 31, 2016, compared with the same period in 2015. Increases in the volume of interest-earning assets, primarily on the loan portfolio and additional amounts drawn on the subsidiary warehouse lines of credit, increased taxable equivalent net interest income by \$5.7 million during the three months ended March 31, 2016, compared with the same period in 2015. Changes in the yields earned on interest-earning assets decreased taxable equivalent net interest income by \$2.5 million during the three months ended March 31, 2016, compared to the same period in 2015, primarily due to the net effects of lower yields on the loan and investment portfolios, partially offset by the favorable change in yields on subsidiary warehouse lines of credit during the current quarter. Changes in rates paid on interest-bearing liabilities decreased taxable equivalent net interest income by \$0.8 million during the three months ended March 31, 2016, compared with the same period in 2015. Market interest rates increased during the three months ended March 31, 2016, compared with the same period in 2015, however, such changes did not have a significant effect on either the yields on interest-earning assets or the rates paid on interest-bearing liabilities.

The banking segment's noninterest income was \$13.0 million and \$19.3 million during the three months ended March 31, 2016 and 2015, respectively. The decrease in noninterest income during the three months ended March 31, 2016, compared to the same period in 2015, was primarily due to \$4.4 million of realized gains on securities acquired in the SWS Merger and subsequently sold during the three months ended March 31, 2015, that did not recur during the same period in 2016, as well as year-over-year decreases in trust account and OREO income.

The banking segment's noninterest expenses were \$64.4 million and \$58.5 million during the three months ended March 31, 2016 and 2015, respectively. Noninterest expenses were primarily comprised of employees' compensation and benefits, and occupancy expenses. The increase in noninterest expenses during the three months ended March 31, 2016, compared to the same period in 2015, was primarily due to a downward valuation adjustment associated with a significant covered OREO property of \$7.9 million offset by a reduction of \$1.8 million in pre-tax integration-related costs directly attributable to the integration of the former SWS FSB related to employee expenses.

Table of Contents

Broker-Dealer Segment

Income before income taxes in our broker-dealer segment during the three months ended March 31, 2016 was \$3.8 million, compared with a loss before income taxes of \$3.5 million during the same period in 2015. The change in income (loss) before income taxes during the three months ended March 31, 2016, compared with the same period in 2015, was primarily the result of an increase in gains from derivative and trading portfolio activities, as well as a decrease in compensation and benefits expenses due to the integration and merger of FSC and Hilltop Securities, offset by decreases in both securities commissions and fees and investment banking and advisory fees.

The following table provides additional details regarding our broker-dealer operating results (in thousands).

	Three Months Ended March 31,		Variance 2016 vs 2015
	2016	2015	
Net interest income:			
Securities lending	\$ 1,602	\$ 2,512	\$ (910)

- (1) Securities commissions and fees includes income of \$0.6 million during the three months ended March 31, 2016 that is eliminated in consolidation. There were no such fees eliminated in consolidation during the three months ended March 31, 2015.

The broker-dealer segment had net interest income of \$7.1 million and \$8.0 million during the three months ended March 31, 2016 and 2015, respectively. In the broker-dealer segment, interest is earned from securities lending activities, interest charged on customer margin loan balances and interest earned on investment securities used to support sales, underwriting and other customer activities. The year-over-year decrease between the three months ended March 31, 2016 and the same period in 2015 was primarily due to a two basis point reduction in the spread earned in its stock lending business and a decrease in its average stock borrow/loan program balances.

Noninterest income was \$80.9 million and \$79.5 million during the three months ended March 31, 2016 and 2015, respectively. The increase in noninterest income of \$1.4 million during the three months ended March 31, 2016, compared with the same period in 2015, was primarily due to a \$6.1 million increase in the income earned from its derivative and trading portfolio activities, offset by decreases of \$3.6 million in securities commissions and fees and \$1.1 million in investment banking and advisory fees. The broker-dealer segment participates in programs in which it issues forward purchase commitments of mortgage-backed securities to certain non-profit housing clients and sells U.S. Agency to-be-announced (“TBA”) securities. Additionally, TBA purchase and sales agreements are entered into to assist small to mid-size mortgage loan originators in hedging the interest rate risk associated with their client-owned mortgages. The fair values of these derivative instruments increased \$6.9 million and \$8.6 million during the three months ended March 31, 2016 and 2015, respectively, a year-over-year decline of \$1.7 million. The Hilltop Broker-Dealers also hold trading securities to support sales, underwriting and other customer activities. The fair values of securities within this trading portfolio increased \$10.8 million and \$3.0 million during the three months ended March 31, 2016 and 2015, respectively. This year-over-year improvement of \$7.8 million was primarily the result of \$5.5 million associated with net gains earned in the trading of mortgage-backed securities.

Table of Contents

The \$3.6 million decrease in securities commissions and fees during the three months ended March 31, 2016, compared with the same period in 2015, was primarily due to decreases in the commissions earned on municipal bond transactions, while the \$1.1 million year-over-year decrease in investment banking and advisory fees was primarily due to the decrease in the number of public finance issuances.

Noninterest expenses, including provision for loan losses, were \$84.2 million and \$91.0 million during the three months ended March 31, 2016 and 2015, respectively. The decrease in noninterest expenses, including provision for loan losses, of \$6.8 million during the three months ended March 31, 2016, compared to the same period in 2015, was primarily due to a decrease of \$6.5 million in compensation and benefits expenses, which was in part a product of the integration and merger of FSC and Hilltop Securities. During the three months ended March 31, 2016, the broker-dealer segment incurred pre-tax integration-related costs resulting from employee expenses, professional fees and contractual expenses directly attributable to the integration of SWS were \$1.7 million, \$2.2 million and \$0.1 million, respectively, compared with pre-tax transaction costs of \$0.8 million, and \$2.2 million and \$0.2 million related to employee expenses and professional fees, respectively, during the three months ended March 31, 2015.

On October 22, 2015, FINRA granted approval to combine FSC and Hilltop Securities, subject to customary conditions. Since this approval, we have integrated the back-office systems of FSC and Hilltop Securities and, effective as of January 22, 2016, we merged FSC and Hilltop Securities into a combined firm operating under the "Hilltop Securities" name. As a result, we began realizing cost savings in 2016, although these cost savings have been partially offset by integration costs that we anticipate incurring through the first six months of 2016.

Table of Contents

Mortgage Origination Segment

Income before income taxes in our mortgage origination segment during the three months ended March 31, 2016 and 2015 was \$9.1 million and \$10.0 million, respectively. The decrease in income before income taxes during the three months ended March 31, 2016 compared to the same period in 2015 was primarily due to an increase in segment operating costs, and to a lesser extent, compensation that varies with the volume of mortgage loan originations (“variable compensation”), partially offset by an increase in other noninterest income. Net interest expense of \$2.6 million and \$3.0 million during the three months ended March 31, 2016 and 2015, respectively, resulted from interest incurred on a warehouse line of credit held with the Bank as well as related intercompany financing costs, partially offset by interest income earned on loans held for sale.

The mortgage origination segment originates all of its mortgage loans through a retail channel. The following table provides certain details regarding our mortgage loan originations and selected information for the periods indicated below (dollars in thousands).

	Three Months Ended March 31,			
	2016	% of Total	2015	% of Total
Mortgage Loan Originations - units	12,944		12,363

Mortgage Loan Sales - volume	\$ 3,117,605		\$ 2,905,266	

The mortgage lending business is subject to variables that can impact loan origination volume, including seasonal and interest rate fluctuations. Historically, the mortgage origination segment has typically experienced increased loan origination volume from purchases of homes during the spring and summer, when more people tend to move and buy or sell homes. An increase in mortgage interest rates tends to result in decreased loan origination volume from refinancings, while a decrease in mortgage interest rates tends to result in increased loan origination volume from refinancings. Changes in interest rates have historically had a lesser impact on home purchases volume than on refinancing volume. On October 3, 2015, lender compliance changes associated with TILA-RESPA Integrated Disclosures (“TRID”) became effective and significantly modified required disclosure documents and settlement procedures associated with home mortgage loans. PrimeLending has not experienced significant delays in loan closings due to the implementation of TRID. The long-term impact of TRID-related costs are yet unknown.

Refinancing volume decreased to \$878.3 billion during the three months ended March 31, 2016 (representing 30.0% of total loan origination volume), from \$1.1 billion during the three months ended March 31, 2015 (representing 40.0% of total loan origination volume). Home purchases volume increased 21.5% to \$2.1 billion from \$1.7 billion during the three months ended March 31, 2016 compared to the same period in 2015.

Table of Contents

The mortgage origination segment's total loan origination volume during the three months ended March 31, 2016 increased 4.1%, compared to the same period in 2015, while income before income taxes during the three months ended March 31, 2016 decreased 8.8% compared to the same period in 2015. The decrease in income before taxes was primarily due to noninterest expense increasing by 10.1%, while noninterest income increased at a lesser rate of 8.2%.

Noninterest income was \$146.3 million and \$135.3 million during the three months ended March 31, 2016 and 2015, respectively, and was comprised of the following (in thousands).

	Three Months Ended		Variance 2016 vs 2015
	March 31, 2016	2015	
Net gains from sale of loans	\$ 115,234	\$ 108,630	\$ 6,604
Mortgage loan origination fees	18,813	14,589	4,224
Other mortgage production income:			
Change in net fair value and related derivative activity:			
Interest rate lock commitments and loans held for sale	8,858	13,173	(4,315)
Mortgage servicing rights asset	(2,487)	(5,288)	2,801
Servicing fees	5,920	4,188	1,732
	\$ 146,338	\$ 135,292	\$ 11,046

Net gains on sale of loans increased 6.1% and mortgage loan origination fees increased 29.0% during the three months ended March 31, 2016, respectively, compared with the same period in 2015. The increase in net gains on sale of loans during the three months ended March 31, 2016 was primarily a result of a 7.3% increase in total loan sales volume, partially offset by a slight decrease in average loan sales margin, compared with the same period in 2015. The increase in mortgage loan origination fees was primarily a result of an increase in average loan origination fees during the three months ended March 31, 2016, compared with the same period in 2015. Also contributing to the increase in mortgage loan origination fees during the three months ended March 31, 2016 was a 4.1% increase in total loan origination volume.

During the three months ended March 31, 2016 and 2015, noninterest income included increases of \$8.9 million and \$13.2 million, respectively, in net fair value of the mortgage origination segment's interest rate lock commitments ("IRLCs") and loans held for sale and the related activity associated with forward commitments used by the mortgage origination segment to mitigate interest rate risk associated with its IRLCs and mortgage loans held for sale. These increases were primarily a result of increases in the volume of IRLCs and mortgage loans held during these periods, partially offset by decreases in the average value of individual IRLCs and mortgage loans.

The mortgage origination segment sells substantially all mortgage loans it originates to various investors in the secondary market, the majority servicing released. During the three months ended March 31, 2015, the mortgage origination segment retained servicing on approximately 9% of loans sold, but decreased to approximately 6% during the three months ended March 31, 2016. The mortgage origination segment's determination of whether to retain or release servicing on mortgage loans it sells is impacted by, among other things, changes in mortgage interest rates, and refinancing and market activity. The related mortgage servicing rights ("MSR") asset was valued at \$41.0 million on \$5.1 billion of serviced loan volume at March 31, 2016, compared with a value of \$53.5 million on \$5.2 billion of serviced loan volume at December 31, 2015. The mortgage origination segment may, from time to time, manage its MSR asset through different strategies, including varying the percentage of mortgage loans sold servicing released and opportunistically selling MSR assets. The mortgage origination segment has also retained servicing on certain loans sold to the banking segment. Gains and losses associated with such sales to the banking segment and the related MSR asset are eliminated in consolidation. The mortgage origination segment uses derivative financial instruments, including interest rate swaps, swaptions and forward commitments to sell mortgage-backed securities, as a means to mitigate market risk associated with its MSR asset. Changes in the net fair value of the MSR asset and the related derivatives resulted in net losses of \$2.5 million and \$5.3 million during the three months ended March 31, 2016 and 2015, respectively, associated with normal customer payments, changes in discount rates, prepayment speed assumptions and customer payoffs. These net losses were offset by net servicing income of \$2.4 million and \$2.1 million during the three months ended March 31, 2016 and 2015, respectively.

Table of Contents

Noninterest expenses were \$134.7 million and \$122.3 million during the three months ended March 31, 2016 and 2015, respectively, and were comprised of the following (in thousands).

	Three Months Ended		Variance 2016 vs 2015
	March 31,		
	2016	2015	
Variable compensation	\$ 51,689	\$ 48,130	\$ 3,559
Segment operating costs	71,990	61,780	10,210
Lender paid closing costs	7,499	10,317	(2,818)
Servicing expense	3,493	2,075	1,418
	\$ 134,671	\$ 122,302	\$ 12,369

Employees' compensation and benefits accounted for the majority of the noninterest expenses incurred during all periods presented. Variable compensation increased \$3.6 million during the three months ended March 31, 2016, compared with the same period in 2015, and comprised 57.0% and 59.8% of the total employees' compensation and benefits expenses during the three months ended March 31, 2016 and 2015, respectively. Variable compensation tends to fluctuate to a greater degree than loan origination volumes because mortgage loan originator and fulfillment staff incentive compensation plans are structured to pay at increasing rates as higher monthly volume tiers are achieved.

While total loan origination volumes increased 4.1% for the three months ended March 31, 2016, compared to the same period in 2015, the mortgage origination segment's operating costs increased 16.5%. The largest increase in segment operating costs during the three months ended March 31, 2016, compared to the same period in 2015, was an increase in salaries and benefits totaling \$6.8 million. This increase was primarily the result of increases in headcount related to loan processing, loan fulfillment and technology functions. The increases in loan processing and fulfillment headcount levels were initiated during 2015 primarily to address growth in loan origination volumes that began in 2014. The remaining increases in segment operating costs during the three months ended March 31, 2016, compared to the same period in 2015, were primarily associated with a slight increase in mortgage branch locations and technology initiatives. Historically, segment operating costs tend to fluctuate with, but at a lesser magnitude than, loan origination volume, as these costs are comprised of salaries, benefits, occupancy and administrative costs, which are not normally highly sensitive to changes in loan origination volume.

In exchange for a higher interest rate, a customer may opt to have PrimeLending pay certain costs associated with the origination of the mortgage loan ("lender paid closing costs"). Fluctuations in lender paid closing costs are not always aligned with fluctuations in loan origination volumes. Other loan pricing conditions, including the mortgage loan interest rate, loan origination fees paid by the customer and a customer's willingness to pay closing costs, may also influence fluctuations in lender paid closing costs.

Between January 1, 2007, and March 31, 2016, the mortgage origination segment sold mortgage loans totaling \$76.6 billion. These loans were sold under sales contracts that generally include provisions that hold the mortgage origination segment responsible for errors or omissions relating to its representations and warranties that loans sold meet certain requirements, including representations as to underwriting standards and the validity of certain borrower representations in connection with the loan. In addition, the sales contracts typically require the refund of purchased servicing rights plus certain investor servicing costs if a loan experiences an early payment default. While the mortgage origination segment sold loans prior to 2007, it does not anticipate experiencing significant losses in the future on loans originated prior to 2007 as a result of investor claims under these provisions of its sales contracts.

When an investor claim for indemnification of a loan sold is made, the mortgage origination segment evaluates the claim and determines if the claim can be satisfied through additional documentation or other deliverables. If the claim cannot be satisfied in that manner, the mortgage origination segment negotiates with the investor to reach a settlement of the claim. Settlements typically result in either the repurchase of a loan or reimbursement to the investor for losses incurred on the loan.

Table of Contents

Following is a summary of the mortgage origination segment's claims resolution activity relating to loans sold between January 1, 2007 and March 31, 2016 (dollars in thousands).

	Original Loan Balance	Loss Recognized		
	Amount	% of	Amount	% of
		Loans		Loans
	Sold		Sold	
Claims resolved with no payment	\$ 201,310	0.26%	\$ —	0.00%
Claims resolved as a result of a loan repurchase or payment to an investor for losses incurred (1)	235,774	0.31%	23,552	0.03%
	\$ 437,084	0.57%	\$ 23,552	0.03%

(1) Losses incurred include refunded purchased servicing rights.

At March 31, 2016 and December 31, 2015, the mortgage origination segment's indemnification liability reserve totaled \$17.1 million and \$16.6 million, respectively. The related provision for indemnification losses was \$0.9 million and \$0.8 million during the three months ended March 31, 2016 and 2015, respectively.

Insurance Segment

Income before income taxes in our insurance segment was \$6.2 million and \$9.1 million during the three months ended March 31, 2016 and 2015, respectively. While the insurance segment had positive earnings during the three months ended March 31, 2016 and 2015, the changes experienced in operating results between periods were primarily a result of changes in claims loss experience associated with the frequency and severity of severe weather-related events. During three months ended March 31, 2016, compared with the same period in 2015, net insurance premiums earned were relatively flat, while claims loss experience worsened.

The insurance segment is subject to claims arising out of severe weather, the incidence and severity of which are inherently unpredictable. Generally, the insurance segment's insured risks exhibit higher losses in the second and third calendar quarters due to a seasonal concentration of weather-related events in its primary geographic markets. Although weather-related losses (including hail, high winds, tornadoes and hurricanes) can occur in any calendar quarter, the second calendar quarter, historically, has experienced the highest frequency of losses associated with these events. Hurricanes, however, are more likely to occur in the third calendar quarter of the year.

The insurance segment periodically reviews the pricing of its primary products in each state of operation utilizing a consulting actuarial firm to supplement normal review processes resulting in filings to increase rates as deemed

necessary. The benefit of these rate actions are not fully realized until all customers renew their policies under the new rates, typically one year from the date of rate change implementation. Concurrently, business concentrations are reviewed and actions initiated, including cancellation of agents, non-renewal of policies and cessation of new business writing on certain products in problematic geographic areas. Rate actions have historically reduced the rate of premium growth for targeted areas when compared with the patterns exhibited in prior quarters and years and reduced the insurance segment's exposure to volatile weather in these areas, but competition and customer response to rate increases has negatively impacted customer retention and new business. The insurance segment aims to manage and diversify its business concentrations and products to minimize the effects of future weather-related events.

The insurance segment's operations resulted in combined ratios of 88.5% and 81.8% during the three months ended March 31, 2016 and 2015, respectively. The increase in the combined ratio during the three months ended March 31, 2016, compared with the same period in 2015, was primarily driven by the effects of an increase in frequency and severity of severe weather events in our geographic coverage area and net insurance premiums earned being relatively flat. The combined ratio is a measure of overall insurance underwriting profitability, and represents the sum of loss and LAE and underwriting expenses divided by net insurance premiums earned.

Noninterest income of \$41.8 million during each of the three months ended March 31, 2016 and 2015 included net insurance premiums earned of \$39.7 million and \$39.6 million, respectively. The slight increase in net insurance premiums earned was primarily due to the effect of the decrease in cost of reinsurance.

Table of Contents

Direct insurance premiums written by major product line are presented in the table below (in thousands).

	Three Months Ended		Variance 2016 vs 2015
	March 31,		
	2016	2015	
Direct Insurance Premiums Written:			
Homeowners	\$ 15,995	\$ 18,095	\$ (2,100)
Fire	11,906	13,446	(1,540)
Mobile Home	10,295	10,227	68
Commercial	844	953	(109)
Other	39	28	11
	\$ 39,079	\$ 42,749	\$ (3,670)

The total direct insurance premiums written for our three largest insurance product lines decreased by \$3.6 million during the three months ended March 31, 2016, compared with the same period in 2015, due to the continued effects of efforts to reduce concentrations both geographically and within specific product lines, agent management initiatives and competitive pressure.

Net insurance premiums earned by major product line are presented in the table below (in thousands).

	Three Months Ended		Variance 2016 vs 2015
	March 31,		
	2016	2015	
Net Insurance Premiums Earned:			
Homeowners	\$ 16,263	\$ 16,748	\$ (485)
Fire	12,105	12,446	(341)
Mobile Home	10,467	9,465	1,002
Commercial	858	882	(24)
Other	40	26	14
	\$ 39,733	\$ 39,567	\$ 166

Net insurance premiums earned during the three months ended March 31, 2016 slightly increased compared to the same period in 2015, primarily due to the decrease in the cost of reinsurance, offset by the decrease in net premiums written during 2016. The slight increase in net insurance premiums earned, when compared with the patterns exhibited in prior quarters and years, reflects the effects of both the benefit of the current reinsurance structure and the insurance

segment's previously discussed efforts to manage and diversify its business concentrations and products to minimize the effects of future weather-related events.

Noninterest expenses of \$36.4 million and \$33.5 million during the three months ended March 31, 2016 and 2015, respectively, include both loss and LAE expenses and policy acquisition and other underwriting expenses, as well as other noninterest expenses. Loss and LAE are recognized based on formula and case basis estimates for losses reported with respect to direct business, estimates of unreported losses based on past experience and deduction of amounts for reinsurance placed with reinsurers. Loss and LAE during the three months ended March 31, 2016 was \$22.0 million, compared with \$18.9 million during the same period in 2015, resulting in loss and LAE ratios of 55.3% and 47.7%, respectively. The year-over-year increase in the loss and LAE ratio during the three months ended March 31, 2016, compared with the same period in 2015, was primarily due to an increase in frequency and severity of severe weather events in our geographic coverage area and net insurance premiums earned being relatively flat.

Policy acquisition and other underwriting expenses encompass all expenses incurred relative to NLC operations, and include elements of multiple categories of expense otherwise reported as noninterest expense in the consolidated statements of operations.

Table of Contents

The following table details the calculation of the underwriting expense ratio for the periods presented (dollars in thousands).

	Three Months Ended		Variance 2016 vs 2015
	March 31,		
	2016	2015	
Amortization of deferred policy acquisition costs	\$ 10,193	\$ 10,041	\$ 152
Other underwriting expenses	3,780	4,166	(386)
Total	13,973	14,207	(234)
Agency expenses	(794)	(705)	(89)
Total less agency expenses	\$ 13,179	\$ 13,502	\$ (323)
Net insurance premiums earned	\$ 39,733	\$ 39,567	\$ 166
Expense ratio	33.2 %	34.1 %	(1.0) %

Corporate

Corporate includes certain activities not allocated to specific business segments. These activities include holding company financing and investing activities, and management and administrative services to support the overall operations of the Company including, but not limited to, certain executive management, corporate relations, legal, finance, and acquisition costs.

As a holding company, Hilltop's primary investment objectives are to preserve capital and have cash resources available to make acquisitions. Investment and interest income earned was \$0.2 million and \$0.1 million during the three months ended March 31, 2016 and 2015, respectively. Investment and interest income during the three months ended March 31, 2016 primarily consisted of intercompany interest earned on note receivables held with Securities Holdings and First Southwest that were paid off in January 2016 and March 2016, respectively.

During the three months ended June 30, 2015, Hilltop completed its issuance of Senior Notes and used the net proceeds of the offering to redeem all of its outstanding Non-Cumulative Perpetual Preferred Stock, Series B at an aggregate liquidation value of \$114.1 million, plus accrued but unpaid dividends of \$0.4 million, and utilized the remainder for general corporate purposes. Consequently, recurring quarterly interest expense of \$1.9 million was incurred during the three months ended March 31, 2016.

Noninterest income of \$81.3 million during the three months ended March 31, 2015 represents the recognition of a bargain purchase gain related to the SWS Merger. Included in the bargain purchase gain was a reversal of a \$33.4 million valuation allowance against SWS deferred tax assets. This amount was based on our expected ability to realize these acquired deferred tax assets through our consolidated core earnings, the implementation of certain tax planning strategies and reversal of timing differences. SWS's net operating loss carryforwards are subject to an annual Section 382 limitation on their usage because of the ownership change.

Noninterest expenses of \$5.8 million and \$9.6 million during the three months ended March 31, 2016 and 2015, respectively, were primarily comprised of employees' compensation and benefits and professional fees, including corporate governance, legal and transaction costs. During the three months ended March 31, 2016, compared with the same period in 2015, noninterest expenses included a year-over-year decrease of \$4.3 million in transaction and integration-related costs directly attributable to the SWS Merger. Specifically, during the three months ended March 31, 2016, Hilltop incurred pre-tax transaction costs related to the SWS Merger of \$0.8 million, compared with \$4.8 million in pre-tax transaction costs and \$0.2 million in pre-tax integration-related costs associated with professional fees during the three months ended March 31, 2015.

Table of Contents

Financial Condition

The following discussion contains a more detailed analysis of our financial condition at March 31, 2016 as compared with December 31, 2015.

Securities Portfolio

At March 31, 2016, investment securities consisted of securities of the U.S. Treasury, U.S. government and its agencies, obligations of municipalities and other political subdivisions, primarily in the State of Texas, mortgage-backed, corporate debt, and equity securities. We may categorize investments as trading, available for sale, and held to maturity.

Trading securities are bought and held principally for the purpose of selling them in the near term and are carried at fair value, marked to market through operations and held at the Bank and the Hilltop Broker-Dealers. Securities that may be sold in response to changes in market interest rates, changes in securities' prepayment risk, increases in loan demand, general liquidity needs and other similar factors are classified as available for sale and are carried at estimated fair value, with unrealized gains and losses recorded in accumulated other comprehensive income (loss). Securities are classified as held to maturity based on the intent and ability of our management, at the time of purchase, to hold such securities to maturity. These securities are carried at amortized cost.

The table below summarizes our securities portfolio (in thousands).

	March 31, 2016	December 31, 2015
Trading securities, at fair value		
U.S. Treasury securities	\$ 11,436	\$ 20,481

States and political subdivisions	25,846	27,563
	310,478	332,022
Total securities portfolio	\$ 1,345,231	\$ 1,219,874

Table of Contents

We had net unrealized gains of \$10.3 million and \$3.7 million at March 31, 2016 and December 31, 2015, respectively, related to the available for sale investment portfolio, and a net unrealized gain associated with the securities held to maturity portfolio of \$3.1 million at March 31, 2016, compared with a net unrealized loss of \$0.6 million at December 31, 2015.

Banking Segment

The banking segment's securities portfolio plays a role in the management of our interest rate sensitivity and generates additional interest income. In addition, the securities portfolio is used to meet collateral requirements for public and trust deposits, securities sold under agreements to repurchase and other purposes. The available for sale securities portfolio serves as a source of liquidity. Historically, the Bank's policy has been to invest primarily in securities of the U.S. government and its agencies, obligations of municipalities in the State of Texas and other high grade fixed income securities to minimize credit risk. At March 31, 2016, the banking segment's securities portfolio of \$855.9 million was comprised of trading securities of \$20.2 million, available for sale securities of \$525.2 million and held to maturity securities of \$310.5 million.

Broker-Dealer Segment

Our broker-dealer segment holds securities to support sales, underwriting and other customer activities. The Hilltop Broker-Dealers are required to carry their securities at fair value and record changes in the fair value of the portfolio in operations. Accordingly, the securities portfolio of the Hilltop Broker-Dealers included trading securities of \$348.3 million at March 31, 2016. In addition, the Hilltop Broker-Dealers enter into transactions that represent commitments to purchase and deliver securities at prevailing future market prices to facilitate customer transactions and satisfy such commitments. Accordingly, the Hilltop Broker-Dealers' ultimate obligation may exceed the amount recognized in the financial statements. These securities, which are carried at fair value and reported as securities sold, not yet purchased in the consolidated balance sheet, had a value of \$165.7 million at March 31, 2016.

Insurance Segment

Our insurance segment's primary investment objective is to preserve capital and manage for a total rate of return. NLC's strategy is to purchase securities in sectors that represent the most attractive relative value. Our insurance segment invests the premiums it receives from policyholders until they are needed to pay policyholder claims or other expenses. At March 31, 2016, the insurance segment's securities portfolio was comprised of \$141.0 million in available for sale securities and \$6.1 million of other investments included in other assets within the consolidated balance sheet.

Non-Covered Loan Portfolio

Consolidated non-covered loans held for investment are detailed in the table below, classified by portfolio segment and segregated between those considered to be PCI loans and all other originated or acquired loans (in thousands). PCI loans showed evidence of credit deterioration on the date of acquisition that made it probable that all contractually required principal and interest payments would not be collected.

	Loans, excluding PCI Loans	PCI Loans	Total Loans
March 31, 2016			
Commercial and industrial	\$ 1,606,450	\$ 13,117	\$ 1,619,567
Real estate	2,485,992	50,310	2,536,302

Consumer	44,323	528	44,851
Broker-dealer	463,987	—	463,987
Non-covered loans, gross	5,298,012	68,053	5,366,065
Allowance for loan losses	(43,895)	(4,555)	(48,450)
Non-covered loans, net of allowance	\$ 5,254,117	\$ 63,498	\$ 5,317,615

Table of Contents

December 31, 2015	Loans, excluding PCI Loans	PCI Loans	Total Loans
Commercial and industrial	\$ 1,539,455	\$ 13,350	\$ 1,552,805
Real estate	2,260,464	52,775	2,313,239
Construction and land development	700,206	5,150	705,356
Consumer	44,893	779	45,672
Broker-dealer	602,968	—	602,968
Non-covered loans, gross	5,147,986	72,054	5,220,040
Allowance for loan losses	(40,929)	(4,486)	(45,415)
Non-covered loans, net of allowance	\$ 5,107,057	\$ 67,568	\$ 5,174,625

Banking Segment

The loan portfolio constitutes the major earning asset of the banking segment and typically offers the best alternative for obtaining the maximum interest spread above the banking segment's cost of funds. The overall economic strength of the banking segment generally parallels the quality and yield of its loan portfolio. The banking segment's loan portfolio consists of the non-covered loan portfolio and the covered loan portfolio. The covered loan portfolio consists of loans acquired in the FNB Transaction that are subject to loss-share agreements with the FDIC and is discussed below. The non-covered loan portfolio includes all other loans held by the Bank and is discussed herein.

The banking segment's total non-covered loans, net of the allowance for non-covered loan losses, were \$6.1 billion and \$5.9 billion at March 31, 2016 and December 31, 2015, respectively. The banking segment's non-covered loan portfolio includes a \$1.5 billion warehouse line of credit extended to PrimeLending, of which \$1.2 billion and \$1.4 billion was drawn at March 31, 2016 and December 31, 2015, respectively. Amounts advanced against the warehouse line of credit are eliminated from net loans on our consolidated balance sheets. The banking segment does not generally participate in syndicated loan transactions and has no foreign loans in its portfolio.

At March 31, 2016, the banking segment had non-covered loan concentrations (loans to borrowers engaged in similar activities) that exceeded 10% of total non-covered loans in its real estate portfolio. The areas of concentration within our non-covered real estate portfolio were non-construction commercial real estate loans, non-construction residential real estate loans, and construction and land development loans, which represented 32.2%, 15.1% and 13.1%, respectively, of the banking segment's total non-covered loans at March 31, 2016. The banking segment's non-covered loan concentrations were within regulatory guidelines at March 31, 2016.

Broker-Dealer Segment

The loan portfolio of the broker-dealer segment consists primarily of margin loans to customers and correspondents. These loans are collateralized by the securities purchased or by other securities owned by the clients and, because of collateral coverage ratios, are believed to present minimal collectability exposure. Additionally, these loans are subject to a number of regulatory requirements as well as the Hilltop Broker-Dealers' internal policies. The broker-dealer segment's total non-covered loans, net of the allowance for non-covered loan losses, were \$463.9 million and \$602.8 million at March 31, 2016 and December 31, 2015, respectively. This decrease was primarily attributable to decreases of \$62.5 million in customer borrowings in margin accounts and \$93.4 million in receivables from correspondents.

Table of Contents

Mortgage Origination Segment

The loan portfolio of the mortgage origination segment consists of loans held for sale, primarily single-family residential mortgages funded through PrimeLending, and IRLCs with customers pursuant to which we agree to originate a mortgage loan on a future date at an agreed-upon interest rate. The components of the mortgage origination segment's loans held for sale and IRLCs are as follows (in thousands).

	March 31, 2016	December 31, 2015
Loans held for sale:		
Unpaid principal balance	\$ 1,234,507	\$ 1,410,445
Fair value adjustment	50,837	50,390
	\$ 1,285,344	\$ 1,460,835
IRLCs:		
Unpaid principal balance	\$ 1,505,457	\$ 944,942
Fair value adjustment	44,915	23,762
	\$ 1,550,372	\$ 968,704

The mortgage origination segment uses forward commitments to mitigate interest rate risk associated with its loans held for sale and IRLCs. The notional amounts of these forward commitments at March 31, 2016 and December 31, 2015 were \$2.5 billion and \$2.0 billion, respectively, while the related estimated fair values were (\$11.4) million and (\$1.2) million, respectively.

Covered Loan Portfolio

Banking Segment

Loans acquired in the FNB Transaction that are subject to loss-share agreements with the FDIC are referred to as "covered loans" and reported separately in our consolidated balance sheets. Under the terms of the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets (including covered loans): (i) 80% of net losses on the first \$240.4 million of net losses incurred; (ii) 0% of net losses in excess of \$240.4 million up to and including \$365.7 million of net losses incurred; and (iii) 80% of net losses in excess of \$365.7 million of net losses incurred. Net losses are defined as book value losses plus certain defined expenses incurred in the resolution of assets, less subsequent recoveries. Under the loss-share agreement for commercial assets, the amount of subsequent recoveries that are reimbursable to the FDIC for a particular asset is

limited to book value losses and expenses actually billed plus any book value charge-offs incurred prior to September 13, 2013 (the “Bank Closing Date”). There is no limit on the amount of subsequent recoveries reimbursable to the FDIC under the loss-share agreement for single family residential assets. The loss-share agreements for commercial and single family residential assets are in effect for 5 years and 10 years, respectively, and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a “true-up” payment to the FDIC approximately ten years following the Bank Closing Date if our actual net realized losses over the life of the loss-share agreements are less than the FDIC’s initial estimate of losses on covered assets. The “true-up” payment is calculated using a defined formula set forth in the Purchase and Assumption Agreement by and among the FDIC (as receiver of FNB), the Bank and the FDIC (the “P&A Agreement”). As of March 31, 2016, the Bank estimated that the sum of covered losses and reimbursable expenses subject to the loss-share agreements will exceed \$240.4 million, but will not exceed \$365.7 million. Unless actual plus projected covered losses and reimbursable expenses exceed \$365.7 million, the Bank will not record additional amounts to the FDIC Indemnification Asset. As of March 31, 2016, the Bank had billed \$139.4 million of covered net losses to the FDIC, of which 80%, or \$111.5 million, were reimbursable under the loss-share agreements. As of March 31, 2016, the Bank had received aggregate reimbursements of \$111.5 million from the FDIC, which represented reimbursable covered losses and expenses through December 31, 2015. While the ultimate amount of any “true-up” payment is unknown at this time and will vary based upon the amount of future losses or recoveries within our covered loan portfolio, the Bank has recorded a related “true-up” payment accrual of \$7.5 million at March 31, 2016 based on the current estimate of aggregate realized losses on covered assets over the life of the loss-share agreements. Additionally, as estimates of realized losses on covered assets change, the value of the FDIC Indemnification Asset will be adjusted and therefore may not be realized. If the Bank continues to experience favorable resolutions within its covered assets portfolio and

Table of Contents

covered losses are lower than currently estimated, the Bank may be required to increase its “true-up” payment accrual and recognize negative accretion (amortization) on the FDIC Indemnification Asset. These changes will be partially offset by increased discount accretion on the covered loan portfolio.

In connection with the FNB Transaction, the Bank acquired loans both with and without evidence of credit quality deterioration since origination. Based on purchase date valuations, the banking segment’s portfolio of acquired covered loans had a fair value of \$1.1 billion as of the Bank Closing Date, with no carryover of any allowance for loan losses. Unless the banking segment acquires additional loans subject to loss-share agreements with the FDIC, the covered portfolio will continue to decrease as covered loans are liquidated.

Covered loans held for investment are detailed in the table below and classified by portfolio segment (in thousands).

	Loans, excluding PCI Loans	PCI Loans	Total Loans
March 31, 2016			
Commercial and industrial	\$ 2,117	\$ 6,953	\$ 9,070
Real estate	141,980	176,941	318,921
Construction and land development	5,424	13,971	19,395
Covered loans, gross	149,521	197,865	347,386
Allowance for loan losses	(49)	(1,168)	(1,217)
Covered loans, net of allowance	\$ 149,472	\$ 196,697	\$ 346,169

	Loans, excluding PCI Loans	PCI Loans	Total Loans
December 31, 2015			
Commercial and industrial	\$ 1,294	\$ 7,507	\$ 8,801
Real estate	147,502	193,546	341,048
Construction and land development	9,524	20,921	30,445
Covered loans, gross	158,320	221,974	380,294
Allowance for loan losses	(32)	(1,500)	(1,532)
Covered loans, net of allowance	\$ 158,288	\$ 220,474	\$ 378,762

At March 31, 2016, the banking segment had covered loan concentrations (loans to borrowers engaged in similar activities) that exceeded 10% of total covered loans in its real estate portfolio. The areas of concentration within our covered real estate portfolio were non-construction residential real estate loans and non-construction commercial real estate loans, which represented 58.7% and 33.2%, respectively, of the banking segment’s total covered loans at March 31, 2016. The banking segment’s covered loan concentrations were within regulatory guidelines at March 31, 2016.

Allowance for Loan Losses

The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management's best estimate of probable losses inherent in our existing non-covered and covered loan portfolios. Management has responsibility for determining the level of the allowance for loan losses, subject to review by the Loan Review Committee of the Bank's board of directors.

It is management's responsibility at the end of each quarter, or more frequently as deemed necessary, to analyze the level of the allowance for loan losses to ensure that it is appropriate for the estimated credit losses in the portfolio. Estimated credit losses are the probable current amount of loans that we will be unable to collect given facts and circumstances as of the evaluation date. When management determines that a loan, or portion thereof, is uncollectible, the loan, or portion thereof, is charged-off against the allowance for loan losses, or for acquired loans accounted for in pools, charged against the pool discount. Recoveries on charge-offs of loans acquired in the Bank Transactions that occurred prior to their acquisition represent contractual cash flows not expected to be collected and are recorded as accretion income. Recoveries on acquired loans charged-off subsequent to their acquisition are credited to the allowance for loan loss, except for recoveries on loans accounted for in pools, which are credited to the pool discount.

In connection with the Bank Transactions, we acquired loans both with and without evidence of credit quality deterioration since origination. PCI loans acquired in the PlainsCapital Merger are accounted for on an individual loan basis, while PCI loans acquired in each of the FNB Transaction and the SWS Merger are accounted for in pools as well as on an individual loan basis. We have established under our PCI accounting policy a framework to aggregate certain

Table of Contents

acquired loans into various loan pools based on a minimum of two layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing. The common risk characteristics used for the pooling of the FNB and SWS PCI loans are risk grade and loan collateral type. The loans acquired in the Bank Transactions were initially recorded at fair value with no carryover of any allowance for loan losses.

Provisions for loan losses are charged to operations to record the total allowance for loan losses at a level deemed appropriate by the banking segment's management based on such factors as the volume and type of lending it conducted, the amount of non-performing loans and related collateral security, the present level of the allowance for loan losses, the results of recent regulatory examinations, generally accepted accounting principles, general economic conditions and other factors related to the ability to collect loans in its portfolio. The provision for loan losses, primarily in the banking segment, was \$3.4 million and \$2.7 million during the three months ended March 31, 2016 and 2015, respectively.

The allowance for loan losses is subject to regulatory examination and determination as to adequacy, which may take into account such factors as the methodology used to calculate the allowance and the size of the allowance. While we believe we have an appropriate allowance for our existing non-covered and covered portfolios at March 31, 2016, additional provisions for losses on existing loans may be necessary in the future.

The following tables present the activity in our allowance for loan losses within our non-covered and covered loan portfolios for the periods presented (in thousands). Substantially all of the activity shown below occurred within the banking segment.

	Three Months Ended March 31,

Potential Problem Loans

Potential problem loans consist of loans that are performing in accordance with contractual terms but for which management has concerns about the ability of an obligor to continue to comply with repayment terms because of the obligor's potential operating or financial difficulties. Management monitors these loans and reviews their performance on a regular basis. Potential problem loans contain potential weaknesses that could improve, persist or further deteriorate. If such potential weaknesses persist without improving, the loan is subject to downgrade, typically to substandard, in three to six months. Potential problem loans are assigned a grade of special mention within our risk grading matrix. Potential problem loans do not include PCI loans because PCI loans exhibited evidence of credit deterioration at acquisition that made it probable that all contractually required principal payments would not be collected. Within our non-covered loan portfolio, we had one credit relationship totaling \$2.6 million of potential problem loans at March 31, 2016, compared with two credit relationships totaling \$1.6 million of non-covered potential problem loans at December 31, 2015. Within our covered loan portfolio, we had two credit relationships totaling \$0.5 million of potential problem loans at March 31, 2016, compared with one credit relationship totaling \$0.5 million of potential problem loans at December 31, 2015.

	\$ 27,084		\$ 25,045	
Non-covered non-performing loans as a percentage of total non-covered loans	0.40	%	0.37	%
Non-covered other real estate owned	\$ 543		\$ 394	
Other repossessed assets	\$ 30		\$ —	
Non-covered non-performing assets	\$ 27,657		\$ 25,439	
Non-covered non-performing assets as a percentage of total assets	0.24	%	0.21	%
Non-covered loans past due 90 days or more and still accruing	\$ 51,943		\$ 50,776	
Troubled debt restructurings included in accruing non-covered loans	\$ 1,409		\$ 1,418	

At March 31, 2016, total non-covered non-performing assets increased \$2.2 million to \$27.7 million, compared with \$25.4 million at December 31, 2015. Non-covered non-performing loans totaled \$27.1 million at March 31, 2016 and \$25.0 million at December 31, 2015. At March 31, 2016, non-covered non-accrual loans included 20 commercial and industrial relationships with loans of \$18.8 million secured by accounts receivable, life insurance, oil and gas, livestock, and equipment. Non-covered non-accrual loans at March 31, 2016 also included \$7.8 million characterized as real estate loans, including five commercial real estate loan relationships of \$4.8 million and loans secured by residential real estate of \$0.9 million, \$2.1 million of which were classified as loans held for sale, as well as construction and land development loans of \$0.1 million. At December 31, 2015, non-covered non-accrual loans included 20 commercial and industrial relationships with loans of \$17.4 million secured by accounts receivable, inventory, life insurance, livestock, and oil and gas, and a total of \$0.3 million in lease financing receivables. Non-covered non-accrual loans at December 31, 2015 also included \$7.2 million of real estate loans, including four commercial real estate loan relationships of \$4.6 million and loans secured by residential real estate of \$2.6 million, \$1.6 million of which were classified as loans held for sale, as well as construction and land development loans of \$0.1 million.

Non-covered OREO increased \$0.1 million to \$0.5 million at March 31, 2016, compared with \$0.4 million at December 31, 2015. Changes in non-covered OREO included the addition of one property totaling \$0.2 million. At March 31, 2016, non-covered OREO included commercial properties of \$0.5 million, while at December 31, 2015, non-covered OREO included commercial properties of \$0.4 million.

Non-covered non-PCI loans past due 90 days or more and still accruing were \$51.9 million and \$50.8 million at March 31, 2016 and December 31, 2015, respectively, all of which were loans held for sale and guaranteed by U.S. Government agencies, that are subject to repurchase, or have been repurchased, by PrimeLending.

At March 31, 2016, troubled debt restructurings (“TDRs”) on non-covered loans totaled \$9.9 million. These TDRs were comprised of \$1.4 million of non-covered loans that are considered to be performing and non-covered non-performing loans of \$8.5 million reported in non-accrual loans. At December 31, 2015, TDRs on non-covered loans totaled \$9.3 million, of which \$1.4 million relate to non-covered loans that are considered to be performing and non-covered non-performing loans of \$7.9 million reported in non-accrual loans.

Table of Contents

The following table presents components of our covered non-performing assets (dollars in thousands).

	March 31, 2016	December 31, 2015		
Covered loans accounted for on a non-accrual basis:				
Commercial and industrial	\$ 60	\$ 68		
Real estate	2,983	2,958		
Construction and land development	533	5,952		
	\$ 3,576	\$ 8,978		
Covered non-performing loans as a percentage of total covered loans	1.03	2.36	%	%
Covered other real estate owned:				
Real estate - residential	\$ 12,364	\$ 17,718		
Real estate - commercial	20,360	33,425		
Construction and land development - residential	9,476	9,190		
Construction and land development - commercial	36,690	38,757		
	\$ 78,890	\$ 99,090		
Other repossessed assets	\$ —	\$ —		
Covered non-performing assets	\$ 82,466	\$ 108,068		
Covered non-performing assets as a percentage of total assets	0.70	0.91	%	%
Covered loans past due 90 days or more and still accruing	\$ 102	\$ —		
Troubled debt restructurings included in accruing covered loans	\$ 512	\$ 515		

At March 31, 2016, covered non-performing assets decreased by \$25.6 million to \$82.5 million, compared with \$108.1 million at December 31, 2015, due to decreases in covered non-accrual loans of \$5.4 million and covered other real estate owned of \$20.2 million. Covered non-performing loans totaled \$3.6 million at March 31, 2016 and \$9.0 million at December 31, 2015. At March 31, 2016, covered non-performing loans included three commercial and industrial relationships with loans of \$0.4 million, two commercial real estate loan relationships of \$0.4 million, 27 residential real estate loan relationships of \$2.6 million, as well as construction and land development loans of \$0.5 million. At December 31, 2015, covered non-performing loans included four commercial and industrial relationships with loans of \$0.1 million secured by accounts receivable and inventory, two commercial real estate loan relationships of \$0.4 million, 25 residential real estate loan relationships of \$2.5 million, as well as construction and land development loans of \$6.0 million.

OREO acquired in the FNB Transaction that is subject to the FDIC loss-share agreements is referred to as “covered OREO” and reported separately in our consolidated balance sheets. Covered OREO decreased \$20.2 million to \$78.9

million at March 31, 2016, compared with \$99.1 million at December 31, 2015. The decrease was primarily due to the disposal of 55 properties totaling \$15.0 million and fair value valuation decreases of \$9.7 million, partially offset by the addition of 44 properties totaling \$4.5 million.

Covered non-PCI loans past due 90 days or more and still accruing totaled \$0.1 million at March 31, 2016 and included two commercial and industrial relationships. There were no covered non-PCI loans past due 90 days or more and still accruing at December 31, 2015.

At March 31, 2016, TDRs on covered loans totaled \$1.5 million, of which \$0.5 million relate to covered loans that are considered to be performing and covered non-performing loans of \$1.0 million included in non-accrual loans. At December 31, 2015, TDRs on covered loans totaled \$1.5 million, of which \$0.5 million relate to covered loans that are considered to be performing and covered non-performing loans of \$1.0 million included in non-accrual loans.

Table of Contents

Insurance Losses and Loss Adjustment Expenses

At March 31, 2016 and December 31, 2015, our gross reserves for unpaid losses and LAE were \$43.0 million and \$44.4 million, respectively, including estimated recoveries from reinsurance of \$8.8 million and \$13.5 million, respectively. The decrease in the gross reserve for unpaid losses and LAE was primarily due to the payment of outstanding losses and the corresponding reduction in outstanding reinsurance recoverables. The liability for insurance losses and LAE represents estimates of the ultimate unpaid cost of all losses incurred, including losses for claims that have not yet been reported, less a reduction for reinsurance recoverables related to those liabilities. Separately for each of NLIC and ASIC and each line of business, our actuaries estimate the liability for unpaid losses and LAE by first estimating ultimate losses and LAE amounts for each year, prior to recognizing the impact of reinsurance. The amount of liabilities for reported claims is based primarily on a claim-by-claim evaluation of coverage, liability, injury severity or scope of property damage, and any other information considered relevant to estimating exposure presented by the claim.

NLC's liabilities for unpaid losses represent the best estimate at a given point in time of what it expects to pay claimants, based on facts, circumstances and historical trends then known. During the loss settlement period, additional facts regarding individual claims may become known and, consequently, it often becomes necessary to refine and adjust the estimates of liability. This process is commonly referred to as loss development. To project ultimate losses and LAE, our actuaries examine the paid and reported losses and LAE for each accident year and multiply these values by a loss development factor. The selected loss development factors are based upon a review of the loss development patterns indicated in the companies' historical loss triangles (which utilize historical trends, adjusted for changes in loss costs, underwriting standards, policy provisions, product mix and other factors) and applicable insurance industry loss development factors. Estimating the liability for unpaid losses and LAE is inherently judgmental and is influenced by factors that are subject to significant variation. Liabilities for LAE are intended to cover the ultimate cost of settling claims, including investigation and defense of lawsuits resulting from such claims.

The reserve analysis performed by our actuaries provides preliminary central estimates of the unpaid losses and LAE. At each quarter-end, the results of the reserve analysis are summarized and discussed with our senior management. The senior management group considers many factors in determining the amount of reserves to record for financial statement purposes. These factors include the extent and timing of any recent catastrophic events, historical pattern and volatility of the actuarial indications, the sensitivity of the actuarial indications to changes in paid and reported loss patterns, the consistency of claims handling processes, the consistency of case reserving practices, changes in our pricing and underwriting, and overall pricing and underwriting trends in the insurance market.

Deposits

The banking segment's major source of funds and liquidity is its deposit base. Deposits provide funding for its investments in loans and securities. Interest paid for deposits must be managed carefully to control the level of interest

expense and overall net interest margin. The composition of the deposit base (time deposits versus interest-bearing demand deposits and savings), as discussed in more detail within the section entitled “Liquidity and Capital Resources — Banking Segment” below, is constantly changing due to the banking segment’s needs and market conditions. Average deposits totaled \$6.9 billion during the three months ended March 31, 2016, a decrease from average deposits of \$7.3 billion during the three months ended March 31, 2015 and \$7.0 billion during the year ended December 31, 2015. The decrease in average deposits during the three months ended March 31, 2016, compared with the same period in 2015 and the year ended December 31, 2015, was primarily related to the decline in time deposit accounts due to factors including both seasonality of deposit levels and lower renewal rates. For the periods presented in the table below, the average rates paid associated with time deposits include the effects of amortization of the deposit premiums booked as a part of the Bank Transactions.

Table of Contents

The table below presents the average balance of, and rate paid on, consolidated deposits (dollars in thousands).

	Three Months Ended March 31, 2016			2015			Year Ended December 31, 2015		
	Average Balance	Average Rate Paid		Average Balance	Average Rate Paid		Average Balance	Average Rate Paid	
Noninterest-bearing demand deposits	\$ 2,153,901	0.00	%	\$ 2,152,610	0.00	%	\$ 2,187,336	0.00	%
Interest-bearing demand deposits	3,125,580	0.18	%	3,130,424	0.14	%	3,011,647	0.13	%
Savings deposits	302,744	0.15	%	327,802	0.16	%	297,857	0.15	%
Time deposits	1,355,680	0.76	%	1,646,318	0.76	%	1,494,573	0.74	%
	\$ 6,937,905	0.24	%	\$ 7,257,154	0.24	%	\$ 6,991,413	0.22	%

Borrowings

Our borrowings are shown in the table below (dollars in thousands).

	March 31, 2016			December 31, 2015		
	Balance	Average Rate Paid		Balance	Average Rate Paid	
Short-term borrowings	\$ 832,921	0.65	%	\$ 947,373	0.56	%
Notes payable	232,190	4.35	%	238,716	3.93	%
Junior subordinated debentures	67,012	3.86	%	67,012	3.58	%
	\$ 1,132,123	1.75	%	\$ 1,253,101	1.38	%

Short-term borrowings consisted of federal funds purchased, securities sold under agreements to repurchase, borrowings at the Federal Home Loan Bank ("FHLB") and short-term bank loans. The \$114.5 million decrease in short-term borrowings at March 31, 2016 compared with December 31, 2015 was primarily due to a decrease in

borrowings of \$288.7 million in our banking segment primarily associated with the decrease in borrowings under the mortgage origination segment's warehouse line of credit with the Bank, offset by an increase of \$174.2 million in short-term bank loans and securities sold under agreements to repurchase used by the Hilltop Broker-Dealers to finance their activities. Notes payable at March 31, 2016 of \$232.2 million was comprised of \$148.2 million related to Senior Notes, net of loan origination fees, insurance segment term notes of \$49.0 million, FHLB borrowings with an original maturity greater than one year held by the former SWS FSB within the banking segment of \$32.5 million and mortgage origination segment borrowings of \$2.5 million. The average rate paid associated with notes payable includes the effect of amortization of the premiums on FHLB borrowings booked as a part of the SWS Merger.

Liquidity and Capital Resources

Hilltop is a financial holding company whose assets primarily consist of the stock of its subsidiaries and invested assets. Hilltop's primary investment objectives, as a holding company, are to preserve capital and have cash resources available to make acquisitions. At March 31, 2016, Hilltop had \$68.2 million in freely available cash and cash equivalents, an increase of \$12.7 million from \$55.5 million at December 31, 2015. This increase in available cash was primarily due to the net effects of Hilltop's receipt of a \$50.0 million dividend from PlainsCapital, a \$20.0 million contribution of capital to Hilltop Securities, and payment of transaction-related costs associated with the SWS Merger and other general corporate expenses. If necessary or appropriate, we may also finance acquisitions with the proceeds from equity or debt issuances. Subject to regulatory restrictions, Hilltop has received, and may also continue to receive, dividends from its subsidiaries. The current short-term liquidity needs of Hilltop include operating expenses and interest on debt obligations.

Senior Notes due 2025

Our Senior Notes bear interest at a fixed rate of 5% per year, payable semi-annually in arrears in cash on April 15 and October 15 of each year, commencing on October 15, 2015. The Senior Notes will mature on April 15, 2025, unless we redeem the Senior Notes, in whole at any time or in part from time to time, on or after January 15, 2025 (three months prior to the maturity date of the Senior Notes) at our election at a redemption price equal to 100% of the principal amount of the Senior Notes to be redeemed plus accrued and unpaid interest to, but excluding, the redemption date. At March 31, 2016, \$150.0 million of our Senior Notes was outstanding. During the three months ended March 31, 2016, we accrued interest expense of \$1.9 million on the Senior Notes.

Table of Contents

Loss-Share Agreements

In connection with the FNB Transaction, the Bank entered into two loss-share agreements with the FDIC that collectively cover \$1.2 billion of loans and OREO acquired in the FNB Transaction, which we refer to as “covered assets”. Pursuant to the loss-share agreements, the FDIC has agreed to reimburse the Bank the following amounts with respect to the covered assets: (i) 80% of net losses on the first \$240.4 million of net losses incurred; (ii) 0% of net losses in excess of \$240.4 million up to and including \$365.7 million of net losses incurred; and (iii) 80% of net losses in excess of \$365.7 million of net losses incurred. Net losses are defined as book value losses plus certain defined expenses incurred in the resolution of assets, less subsequent recoveries. Under the loss-share agreement for commercial assets, the amount of subsequent recoveries that are reimbursable to the FDIC for a particular asset is limited to book value losses and expenses actually billed plus any book value charge-offs incurred prior to the Bank Closing Date. There is no limit on the amount of subsequent recoveries reimbursable to the FDIC under the loss-share agreement for single family assets. The loss-share agreements for commercial and single family residential loans are in effect for 5 years and 10 years, respectively, from the Bank Closing Date and the loss recovery provisions to the FDIC are in effect for 8 years and 10 years, respectively, from the Bank Closing Date. In accordance with the loss-share agreements, the Bank may be required to make a “true-up” payment to the FDIC approximately ten years following the Bank Closing Date if our actual net realized losses over the life of the loss-share agreements are less than the FDIC’s initial estimate of losses on covered assets. The “true-up” payment is calculated using a defined formula set forth in the P&A Agreement. While the ultimate amount of any “true-up” payment is unknown at this time and will vary based upon the amount of future losses or recoveries within our covered loan portfolio, the Bank has recorded a related “true-up” payment accrual of \$7.5 million at March 31, 2016 based on the current estimate of aggregate realized losses on covered assets over the life of the loss-share agreements.

Regulatory Capital

We are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements may prompt certain actions by regulators that, if undertaken, could have a direct material adverse effect on our financial condition and results of operations. Under capital adequacy and regulatory requirements, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

In addition, under the final rules, bank holding companies with less than \$15 billion in assets as of December 31, 2009 are allowed to continue to include junior subordinated debentures in Tier 1 capital, subject to certain restrictions. However, if an institution grows to above \$15 billion in assets as a result of an acquisition, or organically grows to above \$15 billion in assets and then makes an acquisition, the combined trust preferred issuances must be phased out of Tier 1 and into Tier 2 capital. All of the debentures issued to the PCC Statutory Trusts I, II, III and IV (the “Trusts”), less the common stock of the Trusts, qualified as Tier 1 capital as of March 31, 2016, under guidance issued by the Board of Governors of the Federal Reserve System.

At March 31, 2016, Hilltop exceeded all regulatory capital requirements in accordance with Basel III with a total capital to risk weighted assets ratio of 18.60%, Tier 1 capital to risk weighted assets ratio of 18.17%, common equity Tier 1 capital to risk weighted assets ratio of 17.56% and a Tier 1 capital to average assets, or leverage, ratio of 13.35%. The Bank's consolidated actual capital amounts and ratios at March 31, 2016 resulted in it being considered "well-capitalized" under regulatory requirements in accordance with Basel III, and included a total capital to risk weighted assets ratio of 15.87%, Tier 1 capital to risk weighted assets ratio of 15.12%, common equity Tier 1 capital to risk weighted assets ratio of 15.10% and a Tier 1 capital to average assets, or leverage, ratio of 12.70%.

In order to avoid limitations on capital distributions, including dividend payments, stock repurchases and certain discretionary bonus payments to executive officers, Basel III also implemented a capital conservation buffer, which requires a banking organization to hold a buffer above its minimum risk-based capital requirements. This buffer will help to ensure that banking organizations conserve capital when it is most needed, allowing them to better weather periods of economic stress. The buffer is measured relative to risk-weighted assets. The phase-in of the capital conservation buffer requirements began on January 1, 2016 for Hilltop and the Bank. Based on the actual ratios as noted above, Hilltop and the Bank exceed each of the capital conservation buffer requirements in effect as of March 31, 2016, as well as the fully phased-in requirements through 2019.

Table of Contents

We discuss regulatory capital requirements in more detail in Note 15 to our consolidated financial statements, as well as under the caption “Government Supervision and Regulation — Corporate — Capital Adequacy Requirements and BASEL III” set forth in Part I, Item I. of our 2015 Form 10-K.

Banking Segment

Within our banking segment, our primary uses of cash are for customer withdrawals and extensions of credit as well as our borrowing costs and other operating expenses. Our asset and liability group is responsible for continuously monitoring our liquidity position to ensure that our assets and liabilities are managed in a manner that will meet our short-term and long-term cash requirements. Our goal is to manage our liquidity position in a manner such that we can meet our customers’ short-term and long-term deposit withdrawals and anticipated and unanticipated increases in loan demand without penalizing earnings. Funds invested in short-term marketable instruments, the continuous maturing of other interest-earning assets, cash flows from self-liquidating investments such as mortgage-backed securities and collateralized mortgage obligations, the possible sale of available for sale securities, and the ability to securitize certain types of loans provide sources of liquidity from an asset perspective. The liability base provides sources of liquidity through deposits and the maturity structure of short-term borrowed funds. For short-term liquidity needs, we utilize federal fund lines of credit with correspondent banks, securities sold under agreements to repurchase, borrowings from the Federal Reserve and borrowings under lines of credit with other financial institutions. For intermediate liquidity needs, we utilize advances from the FHLB. To supply liquidity over the longer term, we have access to brokered time deposits, term loans at the FHLB and borrowings under lines of credit with other financial institutions.

We had deposits of \$7.0 billion at both March 31, 2016 and December 31, 2015. Deposit flows are affected by the level of market interest rates, the interest rates and products offered by competitors, the volatility of equity markets and other factors. At March 31, 2016, money market deposits, including brokered deposits, were \$1.5 billion; time deposits, including brokered deposits, were \$1.4 billion; and noninterest bearing demand deposits were \$2.2 billion. Money market deposits, including brokered deposits, decreased by \$89.5 million from \$1.6 million and time deposits, including brokered deposits, decreased \$9.2 million from December 31, 2015.

The Bank’s 15 largest depositors, excluding Hilltop and Hilltop Securities, accounted for 10.75% of the Bank’s total deposits, and the Bank’s five largest depositors, excluding Hilltop and Hilltop Securities, accounted for 5.65% of the Bank’s total deposits at March 31, 2016. The loss of one or more of our largest Bank customers, or a significant decline in our deposit balances due to ordinary course fluctuations related to these customers’ businesses, could adversely affect our liquidity and might require us to raise deposit rates to attract new deposits, purchase federal funds or borrow funds on a short-term basis to replace such deposits.

Broker-Dealer Segment

The Hilltop Broker-Dealers rely on their equity capital, short-term bank borrowings, interest-bearing and non-interest-bearing client credit balances, correspondent deposits, securities lending arrangements, repurchase agreement financings and other payables to finance their assets and operations, subject to their respective compliance with broker-dealer net capital and customer protection rules. At March 31, 2016, Hilltop Securities had credit arrangements with five unaffiliated banks of up to \$678.0 million. These credit arrangements are used to finance securities owned, securities held for correspondent accounts, receivables in customer margin accounts and underwriting activities. These credit arrangements are provided on an “as offered” basis and are not committed lines of credit. In addition, Hilltop Securities has a committed revolving credit facility with an unaffiliated bank of up to \$45.0 million. At March 31, 2016, Hilltop Securities had borrowed \$150.0 million under its credit arrangements and had no borrowings under its credit facility.

Mortgage Origination Segment

PrimeLending funds the mortgage loans it originates through a warehouse line of credit of up to \$1.5 billion maintained with the Bank. At March 31, 2016, PrimeLending had outstanding borrowings of \$1.2 billion against the warehouse line of credit. PrimeLending sells substantially all mortgage loans it originates to various investors in the secondary market, the majority with servicing released. As these mortgage loans are sold in the secondary market, PrimeLending pays down its warehouse line of credit with the Bank. In addition, PrimeLending has an available line of credit with JPMorgan Chase Bank, NA (“JPMorgan Chase”) of up to \$1.0 million, and PrimeLending Ventures, LLC (“Ventures”) has an available line of credit with Wells Fargo Bank, N.A. (“Wells Fargo”) of up to \$20.0 million. At March 31, 2016,

Table of Contents

PrimeLending had no borrowings under the JPMorgan Chase line of credit, while Ventures had \$2.5 million in borrowings under the Wells Fargo line of credit.

Insurance Segment

Our insurance operating subsidiary's primary investment objectives are to preserve capital and manage for a total rate of return. NLC's strategy is to purchase securities in sectors that represent the most attractive relative value. Bonds, cash and short-term investments of \$223.2 million, or 90.3%, equity investments of \$17.9 million and other investments of \$6.1 million comprised NLC's \$247.2 million in total cash and investments at March 31, 2016. NLC does not currently have any significant concentration in both direct and indirect guarantor exposure or any investments in subprime mortgages. NLC has custodial agreements with Wells Fargo and an investment management agreement with DTF Holdings, LLC.

Impact of Inflation and Changing Prices

Our consolidated financial statements included herein have been prepared in accordance with GAAP, which presently require us to measure financial position and operating results primarily in terms of historic dollars. Changes in the relative value of money due to inflation or recession are generally not considered. The primary effect of inflation on our operations is reflected in increased operating costs. In management's opinion, changes in interest rates affect the financial condition of a financial institution to a far greater degree than changes in the inflation rate. While interest rates are greatly influenced by changes in the inflation rate, they do not necessarily change at the same rate or in the same magnitude as the inflation rate. Interest rates are highly sensitive to many factors that are beyond our control, including changes in the expected rate of inflation, the influence of general and local economic conditions and the monetary and fiscal policies of the U.S. government, its agencies and various other governmental regulatory authorities.

Off-Balance Sheet Arrangements; Commitments; Guarantees

In the normal course of business, we enter into various transactions, which, in accordance with GAAP, are not included in our consolidated balance sheets. We enter into these transactions to meet the financing needs of our customers. These transactions include commitments to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in our consolidated balance sheets.

We enter into contractual loan commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Substantially all of our commitments to extend credit are contingent upon customers maintaining specific credit standards until the time of loan funding. We minimize our exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures. We assess the credit risk associated with certain commitments to extend credit and have recorded a liability related to such credit risk in our consolidated financial statements.

Standby letters of credit are written conditional commitments issued by us to guarantee the performance of a customer to a third party. In the event the customer does not perform in accordance with the terms of the agreement with the third party, we would be required to fund the commitment. The maximum potential amount of future payments we could be required to make is represented by the contractual amount of the commitment. If the commitment is funded, we would be entitled to seek recovery from the customer. Our policies generally require that standby letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements.

In the aggregate, the Bank had outstanding unused commitments to extend credit of \$1.6 billion at March 31, 2016 and outstanding financial and performance standby letters of credit of \$38.4 million at March 31, 2016.

In the normal course of business, the Hilltop Broker-Dealers execute, settle and finance various securities transactions that may expose the Hilltop Broker-Dealers to off-balance sheet risk in the event that a customer or counterparty does not fulfill its contractual obligations. Examples of such transactions include the sale of securities not yet purchased by customers or for the account of the Hilltop Broker-Dealers, use of derivatives to support certain non-profit housing organization clients, clearing agreements between the Hilltop Broker-Dealers and various clearinghouses and broker-dealers, secured financing arrangements that involve pledged securities, and when-issued underwriting and purchase commitments.

Table of Contents

Critical Accounting Policies and Estimates

Our accounting policies are fundamental to understanding our management's discussion and analysis of our results of operations and financial condition. We have identified certain significant accounting policies which involve a higher degree of judgment and complexity in making certain estimates and assumptions that affect amounts reported in our consolidated financial statements. The significant accounting policies which we believe to be the most critical in preparing our consolidated financial statements relate to allowance for loan losses, FDIC Indemnification Asset, reserve for losses and LAE, goodwill and identifiable intangible assets, mortgage loan indemnification liability, mortgage servicing rights asset and acquisition accounting. Since December 31, 2015, there have been no changes in critical accounting policies as further described under "Critical Accounting Policies and Estimates" and Note 1 to the Consolidated Financial Statements in our 2015 Form 10-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Our assessment of market risk as of March 31, 2016 indicates there are no material changes in the quantitative and qualitative disclosures from those previously reported in our 2015 Form 10-K, except as discussed below.

The primary objective of the following information is to provide forward-looking quantitative and qualitative information about our potential exposure to market risks. Market risk represents the risk of loss that may result from changes in value of a financial instrument as a result of changes in interest rates, market prices and the credit perception of an issuer. The disclosure is not meant to be a precise indicator of expected future losses, but rather an indicator of reasonably possible losses, and therefore our actual results may differ from any of the following projections. This forward-looking information provides an indicator of how we view and manage our ongoing market risk exposures.

Banking Segment

The banking segment is engaged primarily in the business of investing funds obtained from deposits and borrowings in interest-earning loans and investments, and our primary component of market risk is sensitivity to changes in interest rates. Consequently, our earnings depend to a significant extent on our net interest income, which is the difference between interest income on loans and investments and our interest expense on deposits and borrowings. To the extent that our interest-bearing liabilities do not reprice or mature at the same time as our interest-bearing assets, we are subject to interest rate risk and corresponding fluctuations in net interest income.

There are several common sources of interest rate risk that must be effectively managed if there is to be minimal impact on our earnings and capital. Repricing risk arises largely from timing differences in the pricing of assets and liabilities. Reinvestment risk refers to the reinvestment of cash flows from interest payments and maturing assets at lower or higher rates. Basis risk exists when different yield curves or pricing indices do not change at precisely the same time or in the same magnitude such that assets and liabilities with the same maturity are not all affected equally. Yield curve risk refers to unequal movements in interest rates across a full range of maturities.

We have employed asset/liability management policies that attempt to manage our interest-earning assets and interest-bearing liabilities, thereby attempting to control the volatility of net interest income, without having to incur unacceptable levels of risk. We employ procedures which include interest rate shock analysis, repricing gap analysis and balance sheet decomposition techniques to help mitigate interest rate risk in the ordinary course of business. In addition, the asset/liability management policies permit the use of various derivative instruments to manage interest rate risk or hedge specified assets and liabilities.

An interest rate sensitive asset or liability is one that, within a defined time period, either matures or experiences an interest rate change in line with general market interest rates. The management of interest rate risk is performed by analyzing the maturity and repricing relationships between interest-earning assets and interest-bearing liabilities at specific points in time ("GAP") and by analyzing the effects of interest rate changes on net interest income over specific periods of time by projecting the performance of the mix of assets and liabilities in varied interest rate environments. Interest rate sensitivity reflects the potential effect on net interest income resulting from a movement in interest rates. A company is considered to be asset sensitive, or have a positive GAP, when the amount of its interest-earning assets maturing or repricing within a given period exceeds the amount of its interest-bearing liabilities also maturing or repricing within that time period. Conversely, a company is considered to be liability sensitive, or have a negative GAP, when the amount of its interest-bearing liabilities maturing or repricing within a given period exceeds the amount of its

Table of Contents

interest-earning assets also maturing or repricing within that time period. During a period of rising interest rates, a negative GAP would tend to affect net interest income adversely, while a positive GAP would tend to result in an increase in net interest income. During a period of falling interest rates, a negative GAP would tend to result in an increase in net interest income, while a positive GAP would tend to affect net interest income adversely. However, it is our intent to remain relatively balanced so that changes in rates do not have a significant impact on earnings.

As illustrated in the table below, the banking segment is asset sensitive overall. Loans that adjust daily or monthly to the Wall Street Journal Prime rate comprise a large percentage of interest sensitive assets and are the primary cause of the banking segment's asset sensitivity. To help neutralize interest rate sensitivity, the banking segment has kept the terms of most of its borrowings under one year as shown in the following table (dollars in thousands).

	March 31, 2016					
	3 Months or Less	> 3 Months to 1 Year	> 1 Year to 3 Years	> 3 Years to 5 Years	> 5 Years	Total
Interest sensitive assets:						
Loans	\$ 3,545,272	\$ 685,972	\$ 918,536	\$ 347,789	\$ 901,139	\$ 6,398,708
Securities	314,167	181,070	139,782	58,373	214,801	908,193
Federal funds sold and securities purchased under agreements to resell	15,406	—	—	—	—	15,406
Other interest sensitive assets	257,107	—	—	—	—	257,107
Total interest sensitive assets	4,131,952	867,042	1,058,318	406,162	1,115,940	7,579,414
Interest sensitive liabilities:						
Interest bearing checking	\$ 2,790,054	\$ —	\$ —	\$ —	\$ —	\$ 2,790,054
Savings	330,307	—	—	—	—	330,307
Time deposits	352,628	483,654	432,947	79,072	12,768	1,361,069
Notes payable and	444,846	75,445	24,429	1,445	11,996	558,161

other borrowings										
Total interest sensitive liabilities	3,917,835	559,099	457,376	80,517	24,764	5,039,591				
Interest sensitivity gap	\$ 214,117	\$ 307,943	\$ 600,942	\$ 325,645	\$ 1,091,176	\$ 2,539,823				
Cumulative interest sensitivity gap	\$ 214,117	\$ 522,060	\$ 1,123,002	\$ 1,448,647	\$ 2,539,823					
Percentage of cumulative gap to total interest sensitive assets	2.82	%	6.89	%	14.82	%	19.11	%	33.51	%

The positive GAP in the interest rate analysis indicates that banking segment net interest income would generally rise if rates increase. Because of inherent limitations in interest rate GAP analysis, the banking segment uses multiple interest rate risk measurement techniques. Simulation analysis is used to subject the current repricing conditions to rising and falling interest rates in increments and decrements of 1%, 2% and 3% to determine the effect on net interest income changes for the next twelve months. The banking segment also measures the effects of changes in interest rates on economic value of equity by discounting projected cash flows of deposits and loans. Economic value changes in the investment portfolio are estimated by discounting future cash flows and using duration analysis. Investment security prepayments are estimated using current market information. We believe the simulation analysis presents a more accurate picture than the GAP analysis. Simulation analysis recognizes that deposit products may not react to changes in interest rates as quickly or with the same magnitude as earning assets contractually tied to a market rate index. The sensitivity to changes in market rates varies across deposit products. Also, unlike GAP analysis, simulation analysis takes into account the effect of embedded options in the securities and loan portfolios as well as any off-balance-sheet derivatives.

The table below shows the estimated impact of increases of 1%, 2% and 3% and a decrease of 0.5% in interest rates on net interest income and on economic value of equity for the banking segment at March 31, 2016 (dollars in thousands).

Change in Interest Rates (basis points)	Changes in Net Interest Income			Changes in Economic Value of Equity		
	Amount	Percent		Amount	Percent	
+300	\$ 22,629	8.18	%	\$ 31,948	2.49	%
+200	\$ 9,527	3.44	%	\$ 24,252	1.89	%

Edgar Filing: Hilltop Holdings Inc. - Form 10-Q

+100	\$ (1,987)	(0.72)	%	\$ 12,303	0.96	%
-50	\$ 976	0.35	%	\$ (40,639)	(3.16)	%

The projected changes in net interest income and economic value of equity to changes in interest rates at March 31, 2016 were in compliance with established internal policy guidelines. These projected changes are based on numerous assumptions of growth and changes in the mix of assets or liabilities.

Table of Contents

The historically low level of interest rates, combined with the existence of rate floors that are in effect for a significant portion of the loan portfolio, are projected to cause yields on our earning assets to rise more slowly than increases in market interest rates. As a result, in a rising interest rate environment, our interest rate margins are projected to compress until the rise in market interest rates is sufficient to allow our loan portfolio to reprice above applicable rate floors.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the supervision and participation of our Principal Executive Officer and Principal Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report.

Based upon that evaluation, our Principal Executive Officer and Principal Financial Officer concluded that, as of the end of such period, our disclosure controls and procedures were effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports that we file or submit under the Exchange Act and are effective in ensuring that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to the Company's management, including our Principal Executive Officer and Principal Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the fiscal quarter covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

For a description of material pending legal proceedings, see the discussion set forth under the heading “Legal Matters” in Note 12 to our Consolidated Financial Statements, which is incorporated by reference herein.

Item 1A. Risk Factors.

There have been no material changes to the risk factors disclosed under “Item 1A. Risk Factors” of our 2015 Form 10-K. For additional information concerning our risk factors, please refer to “Item 1A. Risk Factors” of our 2015 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On January 28, 2016, we issued an aggregate of 5,516 shares of common stock under the Hilltop Holdings Inc. 2012 Equity Incentive Plan to certain non-employee directors as compensation for their service on our Board of Directors during the fourth quarter of 2015. The shares were issued pursuant to the exemption from registration under Section 4(a)(2) of the Securities Act.

The following table details our repurchases of shares of common stock during the three months ended March 31, 2016.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or

				Programs
January 1 – January 31, 2016	—	\$	—	—
February 1 – February 29, 2016	951	(1)	15.75	—
March 1 – March 31, 2016	—		—	—
Total	951	\$	15.75	—

(1) Represents shares of common stock repurchased by the Company to satisfy tax withholding obligations on restricted stock issued under the Hilltop Holdings Inc. 2012 Equity Incentive Plan.

Item 6. Exhibits

A list of exhibits filed herewith is contained in the Exhibit Index that immediately precedes such exhibits and is incorporated by reference herein.
