As the preferred foundry partner in China, we are positioned to benefit from the growth opportunities of the China IC market.

We are pleased to say that we have achieved significant progress on our 14nm FinFET development. The R&D of our first version of FinFET technology is now ready for business engagement. In addition to our 28nm PolySiON and HKC, our HKC+ technology development is now complete. Our 28nm HKC continues to ramp up, as its yield meets industry benchmark. Moreover, we will continue to expand and enhance both our mature and advanced technology platforms to provide comprehensive and competitive services."

About Non-Generally Accepted Accounting Principles (“non-GAAP”) Financial Measures

To supplement SMIC’s consolidated financial results presented in accordance with IFRS, SMIC uses in this press release non-GAAP measures of operating results that are adjusted to exclude finance cost, depreciation and amortization, income tax benefits and expenses, the effect of employee bonus accrual, government funding, impairment loss of machinery and equipment, gain or loss on the disposal of machinery and equipment and gain from the disposal of living quarters. This earnings release also includes third quarter 2018 guidance for non-GAAP operating expenses. The presentation of non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with IFRS. This earnings release includes EBITDA, EBITDA margin and non-GAAP operating expenses which consist of total operating expenses as adjusted to exclude the effect of employee bonus accrual, government funding, impairment loss of machinery and equipment, gain or loss on the disposal of machinery and equipment and gain from the disposal of living quarters. These non-GAAP financial measures are not calculated or presented in accordance with, and are not alternatives or substitutes for financial measures prepared in accordance with IFRS, and should be read only in conjunction with the Group’s financial measures prepared in accordance with IFRS. The Group’s non-GAAP financial measures may be different from similarly-titled non-GAAP financial measures used by other companies.

SMIC believes that use of these non-GAAP financial measures facilitates investors’ and management’s comparisons to SMIC’s historical performance. The Group’s management regularly uses these non-GAAP financial measures to understand, manage and evaluate the Group’s business and make financial and operational decisions.

The accompanying table has more information and reconciliations of each non-GAAP financial measure to its most directly comparable GAAP financial measure. A reconciliation of non-GAAP guidance measures to corresponding GAAP measures is not available on a forward-looking basis because the effect of these adjustment items excluded for the purpose of non-GAAP operating expenses guidance are subject to some unpredictable conditions that cannot be estimated with reasonable certainty.

Revenue increased by 7.2% QoQ from \$831.0 million in 1Q18 to \$890.7 million in 2Q18, including the recognition of the technology licensing revenue of \$52.8 million (the "Licensing Revenue"). Revenue increased by 15.8% QoQ from \$723.4 million in 1Q18 to \$837.9 million excluding the effect of the Licensing Revenue in 2Q18, mainly due to an increase in wafer shipment in 2Q18.

- 7 -

Cost of sales was \$672.9 million in 2Q18, an increase of 10.2% QoQ from \$610.9 million in 1Q18, mainly due to the increase in wafer shipment and product-mix change in 2Q18.

Gross profit was totally \$217.8 million in 2Q18, compared to \$220.2 million in 1Q18. Excluding the recognition of the Licensing Revenue, gross profit was \$165.0 million in 2Q18, compared to \$112.6 million in 1Q18.

Exchange differences on translating foreign operations were \$18.5 million loss in 2Q18 and \$18.4 million gain in 1Q18. The change was mainly due to the translation difference from the subsidiaries using RMB as the functional currency caused by the depreciation of RMB against USD.

Non-controlling interests were \$20.0 million losses in 2Q18, as compared to \$2.3 million losses in 1Q18, mainly due to product-mix change in the majority-owned subsidiaries in 2Q18.

Reconciliations of Non-GAAP Financial Measures to Comparable GAAP Measures

| | | |
|--|-----------|-----------|
| Non-GAAP operating expenses ⁽¹⁾ | (217,311) | (195,993) |
| EBITDA ⁽²⁾ | 312,264 | 325,079 |
| EBITDA margin ⁽²⁾ | 35.1% | 39.1% |

Note:

(1) Non-GAAP operating expenses are defined as operating expenses adjusted to exclude the effect of employee bonus accrual, government funding, impairment loss of machinery and equipment, gain or loss on the disposal of machinery and equipment and gain from the disposal of living quarters. SMIC reviews non-GAAP operating expenses together with operating expenses to understand, manage and evaluate its business and make financial and operational decisions. The Group also believes it is useful supplemental information for investors and analysts to assess its operating performance. However, the use of non-GAAP financial measures has material limitations as an analytical tool. One of the limitations of using non-GAAP financial measures is that they do not include all items that impact our net profit for the period. In addition, because non-GAAP financial measures are not calculated in the same manner by all companies, they may not be comparable to other similarly titled measures used by other companies. In light of the foregoing limitations, you should not consider the non-GAAP operating expenses in isolation from or as an alternative to operating expenses prepared in accordance with IFRS.

CONDENSED CONSOLIDATED STATEMENT OF PROFIT OR LOSS AND OTHER COMPREHENSIVE INCOME

(In US\$ thousands except share data)

The following table sets forth the reconciliation of the non-GAAP operating expenses to its most directly comparable financial measure presented in accordance with IFRS, for the periods indicated.

(2) EBITDA is defined as profit for the period excluding the impact of the finance cost, depreciation and amortization, and income tax benefit and expense. EBITDA margin is defined as EBITDA divided by revenue. SMIC uses EBITDA margin as a measure of operating performance; for planning purposes, including the preparation of the Group's annual operating budget; to allocate resources to enhance the financial performance of the Group's business; to evaluate the effectiveness of the Group's business strategies; and in communications with SMIC's board of directors concerning the Group's financial performance. Although EBITDA is widely used by investors to measure a company's operating performance without regard to items, such as net finance cost, income tax benefit and expense and depreciation and amortization that can vary substantially from company to company depending upon their respective financing structures and accounting policies, the book values of their assets, their capital structures and the methods by which their assets were acquired, EBITDA has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of the Group's results of operations as reported under IFRS. Some of these limitations are: it does not reflect the Group's capital expenditures or future requirements for capital expenditures or other contractual commitments; it does not reflect changes in, or cash requirements for, the Group's working capital needs; it does not reflect finance cost; it does not reflect cash requirements for income taxes; that, although depreciation and amortization are non-cash charges, the assets being depreciated or amortized will often have to be replaced in the future, and these measures do not reflect any cash requirements for these replacements; and that other companies in SMIC's industry may calculate these measures differently than SMIC does, limiting their usefulness as comparative measures.

The following table sets forth the reconciliation of EBITDA and EBITDA margin to their most directly comparable financial measures presented in accordance with IFRS, for the periods indicated.

(3) The new IFRS 9 standard, effective on January 1, 2018, addresses the classification, measurement and derecognition of financial assets and financial liabilities, introduces new rules for hedge accounting and a new impairment model for financial assets. As the adoption of IFRS 9, the Group recognized the changes in value of available-for-sale instruments (“AFS”) through profit or loss and reclassified the opening balance of fair value of AFS from its reserve to retained earnings in 1Q18.

(4) The new IFRS 15 standard, effective on January 1, 2018, establishes a single revenue recognition framework. The core principle of the framework is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The Group has performed a detailed assessment on the impact of the adoption of IFRS 15 and decided to adopt a modified retrospective approach. The changes of the accounting policies have no significant impact on the Group’s Consolidated Statement of Profit or Loss.
