Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

### Note 1 — Description of Business and Basis of Presentation

Description of business — The business of Murphy USA Inc. (“Murphy USA” or the “Company”) and its subsidiaries primarily consists of the U.S. retail marketing business that was separated from its former parent company, Murphy Oil Corporation (“Murphy Oil” or “Parent”), plus an ethanol production facility and other assets, liabilities and operating expenses of Murphy Oil that were associated with supporting the activities of the U.S. retail marketing operations. The separation was approved by the Murphy Oil board of directors on August 7, 2013, and was completed on August 30, 2013 through the distribution of 100% of the outstanding capital stock of Murphy USA to holders of Murphy Oil common stock on the record date of August 21, 2013. Murphy Oil stockholders of record received one share of Murphy USA common stock for every four shares of Murphy Oil common stock. The spin-off was completed in accordance with a separation and distribution agreement entered into between Murphy Oil and Murphy USA. Following the separation, Murphy USA is an independent, publicly traded company, and Murphy Oil retains no ownership interest in Murphy USA.

Murphy USA markets refined products through a network of retail gasoline stations and unbranded wholesale customers. Murphy USA’s owned retail stations are almost all located in close proximity to Walmart stores in 23 states and use the brand name Murphy USA®. Murphy USA also markets gasoline and other products at standalone stations under the Murphy Express brand. At September 30, 2014, Murphy USA had a total of 1,239 Company stations. In October 2009, Murphy USA acquired an ethanol production facility located in Hankinson, North Dakota, which was subsequently sold in December 2013 and is reflected as discontinued operations for all periods presented. The Company also acquired a partially constructed ethanol production facility in Hereford, Texas, in late 2010. The Hereford facility is designed to produce 105 million gallons of corn-based ethanol per year, and it began operations near the end of the first quarter of 2011.

The contributed assets of Murphy Oil included in the Company’s financial statements also include buildings, real estate, an airplane and computer equipment and software that are used to support the operating activities of Murphy USA.

Basis of Presentation — Murphy USA was incorporated in March 2013 and, in connection with its incorporation, Murphy USA issued 100 shares of common stock, par value \$0.01 per share, to Murphy Oil for \$1.00. Murphy USA was formed solely in contemplation of the separation and until the separation was completed on August 30, 2013, it had not commenced operations and had no material assets, liabilities, or commitments. Accordingly the accompanying consolidated and combined financial statements reflect the combined historical results of operations, financial position and cash flows of the Murphy Oil subsidiaries and certain assets, liabilities and operating expenses of Murphy Oil that comprise Murphy USA, as described above, as if such companies and accounts had been combined for all periods presented prior to August 30, 2013. All significant intercompany transactions and accounts within the combined financial statements have been eliminated.

The assets and liabilities in these consolidated and combined financial statements at September 30, 2014 have been reflected on a historical basis. Any periods presented that include dates prior to August 30, 2013 are periods when all of the assets and liabilities shown were 100 percent owned by Murphy Oil and represented operations of Murphy USA prior to the separation. For the period prior to separation, the consolidated and combined statements of income also include expense allocations for certain corporate functions historically performed by Murphy Oil, including allocations of general corporate expenses related to executive oversight, accounting, treasury, tax, legal, procurement and information technology. These allocations are based primarily on specific identification, headcount or computer utilization. Murphy USA's management believes the assumptions underlying the consolidated and combined financial statements, including the assumptions regarding the allocation of general corporate expenses from Murphy Oil, are reasonable. However, these consolidated and combined financial statements may not include all of the actual expenses that would have been incurred had the Company been a stand-alone company during the period prior to separation and may not reflect the combined results of operations, financial position and cash flows had the Company been a stand-alone company during the entirety of the periods presented.

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

Actual costs that would have been incurred if Murphy USA had been a stand-alone company for the period prior to separation would depend upon multiple factors, including organizational structure and strategic decisions made in various areas, including information technology and infrastructure.

In preparing the financial statements of Murphy USA in conformity with accounting principles generally accepted in the United States, management has made a number of estimates and assumptions related to the reporting of assets, liabilities, revenues, expenses and the disclosure of contingent assets and liabilities. Actual results may differ from these estimates.

**Interim Financial Information** — The interim period financial information presented in these consolidated and combined financial statements is unaudited and includes all known accruals and adjustments, in the opinion of management, necessary for a fair presentation of the consolidated and combined financial position of Murphy USA and its results of operations and cash flows for the periods presented. All such adjustments are of a normal and recurring nature.

These interim consolidated and combined financial statements should be read together with our audited financial statements for the years ended December 31, 2013, 2012 and 2011, included in our Annual Report on Form 10-K (File No. 001-35914), as filed with the Securities and Exchange Commission under the Securities Exchange Act of 1934 on February 28, 2014.

The accompanying financial statements for the period ended September 30, 2013 have been revised to correct an error in presentation related to cash and cash equivalents. At September 30, 2013, the amount shown as "Marketable securities" of \$198,152,000 should have been reflected as "Cash and cash equivalents". This resulted in a misclassification in the cash flow statement related to the same issue as "purchases of marketable securities" for \$198,152,000 was shown as a use of proceeds in the investing section. This amount should not have been shown in the September 30, 2013 cash flow statement. The balance of cash and cash equivalents that should have been reflected in the September 30, 2013 balance sheet and cash flow statement was \$262,499,000. This misclassification had no impact on the income statement or statement of changes in equity. The company does not believe the error was material to the previously issued September 30, 2013 financial statements.

**Recently Issued Accounting Standards**— In April 2014, the FASB issued ASU No. 2014-08, "Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity," which changes the requirements for reporting discontinued operations under Accounting Standards Codification Topic 205. Under ASU No. 2014-08, a disposal of a component of an entity or a group of components of an entity is required to be reported in discontinued operations if the disposal represents a strategic shift that has, or will have, a major effect on an entity's operations and financial results. The standard states that a strategic shift could include a disposal of (i) a major geographical area of operations, (ii) a major line of business, (iii) a major equity method investment or (iv) other major parts of an entity. ASU No. 2014-08 no longer precludes presentation as a discontinued operation if (i) there are operations and cash flows of the component that have not been eliminated from the reporting entity's ongoing operations or (ii) there is significant continuing involvement with a component after its disposal. Additional disclosures about discontinued operations will

also be required. The guidance is effective for annual periods beginning on or after December 15, 2014, and is to be applied prospectively to new disposals and new classifications of disposal groups as held for sale after the effective date. The Company expects to adopt ASU No. 2014-08 on a prospective basis beginning January 1, 2015.

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers," which supersedes the revenue recognition requirements in the Accounting Standards Codification ("Codification") Topic 605, Revenue Recognition, and most industry-specific guidance throughout the Industry Topics of the Codification. The core principle of the new ASU No. 2014-09 is for companies to recognize revenue from the transfer of goods or services to customers in amounts that reflect the consideration to which the company expects to be entitled in exchange for those goods or services. The new standard also will result in enhanced disclosures about revenue, provide guidance for transactions that were not previously addressed comprehensively (for example, service revenue and contract modifications) and improve guidance for multiple-element arrangements. The guidance is effective for

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

annual and interim periods beginning after December 15, 2016, with early adoption prohibited. The Company expects to adopt ASU No. 2014-09 beginning January 1, 2017 and is in the process of assessing the impact that the new guidance will have on the Company's results of operations, financial condition and disclosures.

In August 2014, the FASB issued ASU No. 2014-15, "Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern," which requires management to assess, at each interim and annual reporting period, whether substantial doubt exists about the Company's ability to continue as a going concern. The new standard substantially aligns the accounting requirements with current auditing requirements (except that the auditing standards require a one-year assessment from the balance sheet date rather than the financial statement issuance date). The new standard is effective for all entities for the first annual period ending after December 15, 2016, and interim periods thereafter, with early adoption permitted.

### Note 2 — Related Party Transactions

Related party transactions of the Company include the allocation of certain general and administrative costs from Murphy Oil to the Company and receipt of interest income from Murphy Oil for intercompany payables balances for the periods prior to separation from Murphy Oil.

General and administrative costs were charged by Murphy Oil to the Company based on management's determination of such costs attributable to the operations of the Company. However, such related-party transactions cannot be presumed to be carried out on an arm's length basis as the requisite conditions of competitive, free-market dealings may not exist.

Prior to the separation Murphy Oil provided cash management services to the Company. As a result, the Company generally remitted funds received to Murphy Oil, and Murphy Oil paid all operating and capital expenditures on behalf of the Company. Such cash transactions were reflected in the change in the Net Investment by Parent.

The Consolidated and Combined Statements of Income include expense allocations for certain functions provided to the Company by Murphy Oil prior to the separation. If possible, these allocations were made on a specific identification basis. Otherwise, the expenses related to services provided to the Company by Murphy Oil were allocated to Murphy USA based on relative percentages, as compared to Murphy Oil's other businesses, of headcount or other appropriate methods depending on the nature of each item of cost to be allocated.

Charges for functions historically provided to the Company by Murphy Oil were primarily attributable to Murphy Oil's performance of many shared services that the Company benefitted from, such as treasury, tax, accounting, risk management, legal, internal audit, procurement, human resources, investor relations and information technology. Murphy USA also participated in certain Murphy Oil insurance, benefit and incentive plans. The Consolidated and Combined Statements of Income reflect charges from Murphy Oil and its other subsidiaries for these services of \$0 and \$16,421,000 for the three months ended September 30, 2014 and 2013, respectively, and \$0 and \$53,161,000 for the nine months ended September 30, 2014 and 2013, respectively. Included in the charges above are amounts recognized for stock-based compensation expense (Note 8), as well as net periodic benefit expense associated with the Parent's retirement plans (Note 9).

Included in Interest income in the Consolidated and Combined Statements of Income for the three months ended September 30, 2014 and 2013 was interest income from affiliates of \$0 and \$353,000, respectively. For the nine months ended September 30, 2014 and 2013 interest income from affiliates was \$0 and \$1,080,000, respectively. These amounts were paid on balances that were previously intercompany prior to the separation from Murphy Oil and were settled in full at the separation date.

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

### Transition Services Agreement

In conjunction with the separation, we entered into a Transition Services Agreement with Murphy Oil on August 30, 2013. This Transition Services Agreement sets forth the terms on which Murphy Oil provides to us, and we provide to Murphy Oil, on a temporary basis, certain services or functions that the companies have historically shared. Transition services include administrative, payroll, human resources, information technology and network transition services, tax, treasury and other support and corporate services. The Transition Services Agreement provides for the provision of specified transition services generally for a period of up to eighteen months, with a possible extension of six months, on a cost basis. We record the fee Murphy Oil charges us for these services as a component of general and administrative expenses.

We believe that the operating expenses and general and administrative expenses allocated to us prior to the separation and included in the accompanying consolidated and combined statements of income were a reasonable approximation of the costs related to Murphy USA's operations. However, such related-party transactions cannot be presumed to be carried out on an arm's-length basis as the terms were negotiated while Murphy USA was still a subsidiary of Murphy Oil. At September 30, 2014, Murphy USA had a current receivable from Murphy Oil of \$102,000 and a payable to Murphy Oil of \$921,000 related to the Transition Services Agreement.

### Note 3 – Discontinued Operations

In November 2013, the Company announced that it had entered into negotiations to sell its Hankinson, North Dakota ethanol production facility as part of management's strategic plan to exit non-core businesses. On December 19, 2013, the Company sold its wholly-owned subsidiary Hankinson Renewable Energy, LLC which owned and operated an ethanol manufacturing facility in Hankinson, North Dakota, and its related assets for \$170,000,000 plus working capital adjustments of approximately \$3,118,000. During January 2014, the final adjustments to working capital were made and the Company received an additional \$1.1 million in sales proceeds which has been included in discontinued operations for the period. The Company has accounted for all operations related to Hankinson Renewable, LLC as discontinued operations for all periods presented. The after-tax gain from disposal of the subsidiary (including associated inventories) was \$52,542,000 in 2013 with an additional \$781,000 in 2014 related to the final working capital adjustment.

The results of operations associated with the Hankinson discontinued operations for the 2013 period are presented in the following table.

Edgar Filing: Murphy USA Inc. - Form 10-Q

	Three Months Ended September 30, 2013	Nine Months Ended September 30, 2013
(Thousands of dollars)		
Revenues	\$ 98,837	\$ 297,149
Income (loss) from operations before income taxes	8,774	22,317
Gain on sale before income taxes	—	—
Total income (loss) from discontinued operations before taxes	8,774	22,317
Provision for income taxes	3,026	7,766
Income (loss) from discontinued operations	\$ 5,748	\$ 14,551

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

## Note 4 — Inventories

Inventories consisted of the following:

	September 30, 2014	December 31, 2013
(Thousands of dollars)		
Finished products - FIFO basis	\$ 314,059	\$ 372,531
Less LIFO reserve - finished products	(284,267)	(307,706)
Finished products - LIFO basis	29,792	64,825
Store merchandise for resale	97,055	97,058
Corn based products	13,829	12,447
Materials and supplies	5,142	4,725
Total inventories	\$ 145,818	\$ 179,055

At September 30, 2014 and December 31, 2013, the replacement cost (market value) of last-in, first-out (LIFO) inventories exceeded the LIFO carrying value by \$284,267,000 and \$307,706,000, respectively. Corn based products consisted primarily of corn, dried distillers' grains with solubles (DDGS) and wet distillers' grains with solubles (WDGS), and were all valued on a first-in, first-out (FIFO) basis.

In the first quarter of 2014, the Company recognized a benefit of \$17,781,000 related to a LIFO decrement that existed at that date that is not expected to be restored at year-end.

## Note 5 — Long-Term Debt

Long-term debt consisted of the following:

	September 30, 2014	December 31, 2013
(Thousands of dollars)		
	\$ 492,227	\$ 491,578

## Edgar Filing: Murphy USA Inc. - Form 10-Q

6% senior notes due 2023 (net of unamortized discount of \$7,773 at September 2014 and \$8,422 at December 2013)

Term loan due 2016 (effective rate of 3.71% at December 31, 2013)	—	70,000
Less current maturities	—	(14,000)
Total long-term debt	\$ 492,227	\$ 547,578

### Senior Notes

On August 14, 2013, Murphy Oil USA, Inc., our primary operating subsidiary, issued 6.00% Senior Notes due 2023 (the “Senior Notes”) in an aggregate principal amount of \$500 million. The Senior Notes are fully and unconditionally guaranteed by Murphy USA, and are guaranteed by certain 100% owned subsidiaries that guarantee our credit facilities. The indenture governing the Senior Notes contains restrictive covenants that limit, among other things, the ability of Murphy USA, Murphy Oil USA, Inc. and the restricted subsidiaries to incur additional indebtedness or liens, dispose of assets, make certain restricted payments or investments, enter into transactions with affiliates or merge with or into other entities.

The Senior Notes and the guarantees rank equally with all of our and the guarantors’ existing and future senior unsecured indebtedness and effectively junior to our and the guarantors’ existing and future secured indebtedness (including indebtedness with respect to the credit facilities) to the extent of the value of the assets securing such indebtedness. The Senior Notes are structurally subordinated to all of the existing and future third-party liabilities, including trade payables, of our existing and future subsidiaries that do not guarantee the notes.

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

We used the net proceeds of the Senior Notes, together with borrowings under the credit facilities, to finance a cash dividend of \$650 million from Murphy Oil USA, Inc. to Murphy Oil paid in connection with the separation.

On June 17, 2014, we closed an exchange offer for our Senior Notes to make them eligible for public resale, as required by a registration rights agreement entered into in connection with the issuance of the Senior Notes. All of the Senior Notes were tendered for exchange.

### Credit Facilities

On August 30, 2013, we entered into a credit agreement in connection with the separation from Murphy Oil. The credit agreement provides for a committed \$450 million asset-based loan (ABL) facility (with availability subject to the borrowing base described below) and provided for a \$150 million term facility. It also provides for a \$200 million uncommitted incremental facility. On August 30, 2013, Murphy Oil USA, Inc. borrowed \$150 million under the term facility, the proceeds of which were used, together with the net proceeds of the offering of the Senior Notes, to finance a \$650 million cash dividend from Murphy Oil USA, Inc. to Murphy Oil. The term facility was repaid in full in May 2014. On September 2, 2014, we amended the credit agreement to extend the maturity date to September 2, 2019 and amend the terms of various covenants.

The borrowing base is expected, at any time of determination, to be an amount (net of reserves) equal to the sum of:

- 100% of eligible cash at such time, plus
- 90% of eligible credit card receivables at such time, plus
- 90% of eligible investment grade accounts, plus
- 85% of eligible other accounts, plus

- 80% of eligible product supply/wholesale refined products inventory at such time, plus
- 75% of eligible retail refined products inventory at such time, plus

the lesser of (i) 70% of the average cost of eligible retail merchandise inventory at such time and (ii) 85% of the net orderly liquidation value of eligible retail merchandise inventory at such time.

The ABL facility includes a \$75 million sublimit on swingline loans and a \$200 million sublimit for the issuance of letters of credit. Swingline loans and letters of credit issued under the ABL facility reduce availability under the ABL facility.

Interest payable on the credit facilities is based on either:

- the London interbank offered rate, adjusted for statutory reserve requirements (the “Adjusted LIBO Rate”); or
- the Alternate Base Rate, which is defined as the highest of (a) the prime rate, (b) the federal funds effective rate from time to time plus 0.50% per annum and (c) the one-month Adjusted LIBO Rate plus 1.00% per annum,

plus, (A) in the case of Adjusted LIBO Rate borrowings, (i) with respect to the ABL facility, spreads ranging from 1.50% to 2.00% per annum depending on the average availability under the ABL facility or (ii) with respect to the term facility, spreads ranging from 2.75% to 3.00% per annum depending on a secured debt to EBITDA ratio and (B) in the case of Alternate Base Rate borrowings, (i) with respect to

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

the ABL facility, spreads ranging from 0.50% to 1.00% per annum depending on the average availability under the ABL facility or (ii) with respect to the term facility, spreads ranging from 1.75% to 2.00% per annum depending on a secured debt to EBITDA ratio.

The interest rate period with respect to the Adjusted LIBO Rate interest rate option can be set at one, two, three, or six months as selected by us in accordance with the terms of the credit agreement.

We were obligated to make quarterly principal payments on the outstanding principal amount of the term facility beginning on the first anniversary of the effective date of the credit agreement in amounts equal to 10% of the term loans made on such effective date, with the remaining balance payable on the scheduled maturity date of the term facility. Borrowings under the credit facilities are prepayable at our option without premium or penalty. We were also required to prepay the term facility with the net cash proceeds of certain asset sales or casualty events, subject to certain exceptions. The credit agreement also includes certain customary mandatory prepayment provisions with respect to the ABL facility.

The credit agreement contains certain covenants that limit, among other things, the ability of us and our subsidiaries to incur additional indebtedness or liens, to make certain investments, to enter into sale-leaseback transactions, to make certain restricted payments, to enter into consolidations, mergers or sales of material assets and other fundamental changes, to transact with affiliates, to enter into agreements restricting the ability of subsidiaries to incur liens or pay dividends, or to make certain accounting changes. In addition, the credit agreement requires us to maintain a fixed charge coverage ratio of a minimum of 1.0 to 1.0 when availability for at least three consecutive business days is less than the greater of (a) 17.5% of the lesser of the aggregate ABL facility commitments and the borrowing base and (b) \$70,000,000 (including as of the most recent fiscal quarter end on the first date when availability is less than such amount). As of September 30, 2014, our fixed charge coverage ratio was 1.00. Prior to the repayment of the term loan, we were also subject to a maximum secured debt to EBITDA ratio of 4.5 to 1.0 at any time when term facility commitments or term loans thereunder were outstanding.

After giving effect to the applicable restrictions on certain payments, which could include dividends under the credit agreement (which restrictions are only applicable when availability under the credit agreement does not exceed the greater of 25% of the lesser of the revolving commitments and the borrowing base and \$100 million (and if availability under the credit agreement does not exceed the greater of 40% of the lesser of the revolving commitments and the borrowing base and \$150 million, then our fixed charge coverage ratio must be at least 1.0 to 1.0) and the indenture, and subject to compliance with applicable law. As of December 31, 2013, the Company had approximately \$26.7 million of its net income and retained earnings free of such restrictions.

All obligations under the credit agreement are guaranteed by Murphy USA and the subsidiary guarantors party thereto, and all obligations under the credit agreement, including the guarantees of those obligations, are secured by certain assets of Murphy USA, Murphy Oil USA, Inc. and the guarantors party thereto.

Note 6 — Asset Retirement Obligations (ARO)

The majority of the ARO recognized by the Company at September 30, 2014 and December 31, 2013 related to the estimated costs to dismantle and abandon certain of its retail gasoline stations. The Company has not recorded an ARO for certain of its marketing assets because sufficient information is presently not available to estimate a range of potential settlement dates for the obligation. These assets are consistently being upgraded and are expected to be operational into the foreseeable future. In these cases, the obligation will be initially recognized in the period in which sufficient information exists to estimate the obligation.

A reconciliation of the beginning and ending aggregate carrying amount of the ARO is shown in the following table.

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

	September 30, 2014	December 31, 2013
(Thousands of dollars)		
Balance at beginning of period	\$ 17,130	\$ 15,401
Accretion expense	897	1,096
Liabilities incurred	397	633
Balance at end of period	\$ 18,424	\$ 17,130

The estimation of future ARO is based on a number of assumptions requiring professional judgment. The Company cannot predict the type of revisions to these assumptions that may be required in future periods due to the lack of availability of additional information.

## Note 7— Income Taxes

The effective tax rate is calculated as the amount of income tax expense divided by income before income tax expense. For the three month and nine month periods ended September 30, 2014 and 2013, the Company's effective tax rates were as follows:

	2014	2013
Three months ended September 30	37.6%	38.8%
Nine months ended September 30	34.9%	39.2%

The effective tax rate for the three months ended September 30, 2014 and 2013 and the nine months ended September 30, 2013 exceeded the U.S. Federal tax rate of 35% primarily due to U.S. state tax expense. The effective tax rate for the nine month period ended September 30, 2014 was lower than the U.S. Federal statutory rate due to a tax benefit recorded in the period to lower the effective state tax rate. This adjustment to a lower state tax rate generated a benefit of \$6.8 million that was recorded during the second quarter of 2014.

The Company was included in Murphy Oil's tax returns for the periods prior to the separation in multiple jurisdictions that remain subject to audit by taxing authorities. These audits often take years to complete and settle. As of September 30, 2014, the earliest year remaining open for audit and/or settlement in the United States is 2011.

Although the Company believes that recorded liabilities for unsettled issues are adequate, additional gains or losses could occur in future periods from resolution of outstanding unsettled matters.

Under U.S. GAAP the financial statement recognition of the benefit for a tax position is dependent upon the benefit being more likely than not to be sustainable upon audit by the applicable taxing authority. If this threshold is met, the tax benefit is then measured and recognized at the largest amount that is greater than 50 percent likely of being realized upon ultimate settlement. The Company has not recorded any effect for unrecognized income tax benefits for the periods reported.

#### Note 8 — Incentive Plans

Prior to the separation and distribution, our employees participated in the Murphy Oil 2007 Long-Term Incentive Plan (the “2007 Plan”) and the Murphy Oil 2012 Long-Term Incentive Plan (the “2012 Plan”) and received Murphy Oil restricted stock awards and options to purchase shares of Murphy Oil common stock. While participating in these two plans, costs resulting from share-based payment transactions were allocated and recognized as an expense in the financial statements using a fair value-based measurement method over the periods that the awards vested. Certain employees of the Company have received annual grants in the form of Murphy Oil stock options, restricted stock units and other forms of share based payments prior to the separation and distribution. Accordingly, the Company has accounted for expense for these plans in accordance with SAB Topic 1-B for periods prior to the separation and distribution.

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

### 2013 Long-Term Incentive Plan

Effective August 30, 2013, certain of our employees participate in the Murphy USA 2013 Long-Term Incentive Plan which was subsequently amended and restated effective as of February 12, 2014 (the “MUSA 2013 Plan”). The MUSA 2013 Plan authorizes the Executive Compensation Committee of our Board of Directors (“the Committee”) to grant non-qualified or incentive stock options, stock appreciation rights, stock awards (including restricted stock and restricted stock unit awards), cash awards, and performance awards to our employees. No more than 5.5 million shares of MUSA common stock may be delivered under the MUSA 2013 Plan and no more than 1 million shares of common stock may be awarded to any one employee, subject to adjustment for changes in capitalization. The maximum cash amount payable pursuant to any “performance-based” award to any participant in any calendar year is \$5 million.

On February 11, 2014, the Committee granted nonqualified stock options for 127,400 shares at an exercise price of \$39.46 per share under the terms of the MUSA 2013 Plan. The Black-Scholes valuation for these awards is \$11.44 per option. The Committee also awarded time-based restricted stock units and performance-based restricted stock units (performance units) to certain employees on the same date. There were 39,250 time-based restricted units granted at a grant date fair value of \$39.46 along with 78,500 performance units. Half of the performance units vest based on a 3-year return on average capital employed (ROACE) calculation and the other half vest based on a 3-year total shareholder return (TSR) calculation that compares MUSA to a group of 17 peer companies. The portion of the awards that vest based on TSR qualify as a market condition and must be valued using a Monte Carlo valuation model. For the TSR portion of the awards, the fair value was determined to be \$43.41 per unit. For the ROACE portion of the awards, the valuation will be based on the grant date fair value of \$39.46 per unit and the number of awards will be periodically assessed to determine the probability of vesting.

On March 3, 2014, the Committee also granted 53,475 time-based restricted stock units granted to certain employees with a grant date fair value of \$40.00 per unit.

### 2013 Stock Plan for Non-employee Directors

Effective August 8, 2013, Murphy USA adopted the 2013 Murphy USA Stock Plan for Non-employee Directors (the “Directors Plan”). The directors for Murphy USA are compensated with a mixture of cash payments and equity-based awards. Awards under the Directors Plan may be in the form of restricted stock, restricted stock units, stock options, or a combination thereof. An aggregate of 500,000 shares of common stock shall be available for issuance of grants under the Directors Plan.

During the first quarter of 2014, the Company issued 22,437 restricted stock units to its non-employee directors at a weighted average grant date fair value of \$39.07 per share. These shares vest in three years from the grant date.

For the nine months ended September 30, 2014 and 2013, share based compensation was \$7.4 million and \$6.9 million, respectively. For the nine months ended September 30, 2014 and 2013, cash received from options exercised under all share-based payment arrangements was not material. The related income tax benefit realized for the tax deductions from options exercised for the nine months ended September 30, 2014 and 2013, was not material.

As of September 30, 2014, unrecognized compensation cost related to stock option awards was \$2.4 million, which is expected to be recognized over a weighted average period of 1.6 years. Unrecognized compensation cost related to restricted stock awards was \$13.6 million, which is expected to be recognized over a weighted average period of 2.8 years.

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

## Note 9 — Employee and Retiree Benefit Plans

**PENSION AND POSTRETIREMENT PLANS** — Murphy Oil has defined benefit pension plans that are principally noncontributory and cover most full-time employees. Upon separation from Murphy Oil, all amounts for these plans related to Murphy USA were frozen and retained by Murphy Oil. Therefore, the assets and liabilities related to Murphy USA employees in these plans are not included in these financial statements as Murphy USA is considered to be participating in multiple employer benefit plans due to co-mingling of various plan assets. However, the periodic benefit expense for each period includes the expense of the U.S. benefit plans. All U.S. tax qualified plans meet the funding requirements of federal laws and regulations. Murphy Oil also sponsors health care and life insurance benefit plans, which are not funded, that cover most retired U.S. employees. The health care benefits are contributory; the life insurance benefits are noncontributory. Murphy USA does not expect to have similar pension or post-retirement plans for its employees.

The table that follows provides the components of net periodic benefit expense associated with Company employees for the three months and nine months ended September 30, 2013 as there was no comparable expense for the three months and nine months ended September 30, 2014.

	Three Months Ended September 30,			
	Pension Benefits		Other Postretirement Benefits	
	2014	2013	2014	2013
(Thousands of dollars)

Recognized actuarial loss	—	2,108	—	363
Net periodic benefit expense	\$	—	\$	5,485
			\$	—
				2,786

U.S. Health Care Reform — In March 2010, the United States Congress enacted a health care reform law. Along with other provisions, the law (a) eliminated the tax free status of federal subsidies to companies with qualified retiree prescription drug plans that are actuarially equivalent to Medicare Part D plans beginning in 2013; (b) imposes a 40% excise tax on high-cost health plans as defined in the law beginning in 2018; (c) eliminated lifetime or annual coverage limits and required coverage for preventative health services beginning in September 2010; and (d) imposed a fee of \$2 (subsequently adjusted for inflation) for each person covered by a health insurance policy beginning in September 2010. The new law did not significantly affect the Company's consolidated and combined financial statements as of September 30, 2014 and December 31, 2013 and for the three month or nine month periods ended September 30, 2014 and 2013.

#### Note 10— Financial Instruments and Risk Management

DERIVATIVE INSTRUMENTS — The Company makes limited use of derivative instruments to manage certain risks related to commodity prices. The use of derivative instruments for risk management is

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

covered by operating policies and is closely monitored by the Company's senior management. The Company does not hold any derivatives for speculative purposes and it does not use derivatives with leveraged or complex features. Derivative instruments are traded primarily with creditworthy major financial institutions or over national exchanges such as the New York Mercantile Exchange ("NYMEX"). To qualify for hedge accounting, the changes in the market value of a derivative instrument must historically have been, and would be expected to continue to be, highly effective at offsetting changes in the prices of the hedged item. To the extent that the change in fair value of a derivative instrument has less than perfect correlation with the change in the fair value of the hedged item, a portion of the change in fair value of the derivative instrument is considered ineffective and would normally be recorded in earnings during the affected period.

The Company is subject to commodity price risk related to corn that it will purchase in the future for feedstock and WDGS that it will sell in the future at its remaining ethanol production facility. At September 30, 2014 and 2013, the Company had open physical delivery commitment contracts for purchase of approximately 8.0 million and 10.6 million bushels of corn, respectively, for processing at its ethanol plants. For the nine month period ended September 30, 2014 and 2013, the Company had open physical delivery commitment contracts for sale of approximately 0.6 million and 5.0 million equivalent bushels, respectively, of DDGS and WDGS. To manage the price risk associated with certain of these physical delivery commitments which have fixed prices, at September 30, 2014 and 2013, the Company had outstanding derivative contracts with a net short volume of 2.3 million and net long volume of 2.2 million bushels, respectively, that mature at future prices in effect on the expected date of delivery under the physical delivery commitment contracts. Additionally, at September 30, 2014 and 2013, the Company had outstanding derivative contracts with net short volumes of 2.8 million and 1.1 million bushels of corn, respectively, to buy back when certain corn inventories are expected to be processed. The impact of marking to market these commodity derivative contracts decreased income before taxes by \$0.6 million and increased income before taxes by \$0.1 million for the nine months ended September 30, 2014 and 2013, respectively.

At September 30, 2014 and December 31, 2013, the fair value of derivative instruments not designated as hedging instruments are presented in the following table.

	September 30, 2014				December 31, 2013			
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
(Thousands of dollars)								
Commodity derivative contracts	Accounts Receivable	\$ 1,132	Accounts Payable	\$ 1,722	Accounts Receivable	\$ 224	Accounts Payable	\$ 291

For the three month and nine month periods ended September 30, 2014 and 2013, the gains and losses recognized in the consolidated and combined Statements of Income for derivative instruments not designated as hedging instruments are presented in the following table.

(Thousands of dollars)	Statement of Income Type of Derivative Contract Location	Gain (Loss)			
		Three Months Ended September 30,		Nine Months Ended September 30,	
		2014	2013	2014	2013
Commodity	Fuel and ethanol costs of goods sold	\$ 2,438	\$ 2,550	\$ 3,057	\$ 2,104

The Company offsets certain assets and liabilities related to derivative contracts when the legal right of offset exists. Derivative assets and liabilities which have offsetting positions at September 30, 2014 and December 31, 2013 are presented in the following tables:

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Consolidated Balance Sheet	Net Amounts of Assets Presented in the Consolidated Balance Sheet
(Thousands of dollars)			
At September 30, 2014			
Commodity derivatives	\$ 1,174	\$ (42)	\$ 1,132
At December 31, 2013			
Commodity derivatives	\$ 233	\$ (9)	\$ 224

	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Consolidated Balance Sheet	Net Amounts of Liabilities Presented in the Consolidated Balance Sheet
At September 30, 2014			
Commodity derivatives	\$ 1,764	\$ (42)	\$ 1,722
At December 31, 2013			
Commodity derivatives	\$ 300	\$ (9)	\$ 291

All commodity derivatives above are corn-based contracts associated with the Company's Hereford plant as all positions related to Hankinson were assumed by the buyer in conjunction with the sale. Net derivative assets are included in Accounts Receivable presented in the table on the prior page and are included in Accounts Receivable on the Consolidated Balance Sheets; likewise, net derivative liabilities in the above table are included in Accounts Payable in the table above and are included in Accounts Payable and Accrued Liabilities on the Consolidated Balance Sheets. These contracts permit net settlement and the Company generally avails itself of this right to settle net. At September 30, 2014 and December 31, 2013, cash deposits of \$3.2 million and \$2.9 million related to commodity derivative contracts were reported in Prepaid Expenses in the Consolidated Balance Sheets, respectively. These cash deposits have not been used to reduce the reported net liabilities on the corn-based derivative contracts at September

30, 2014 or December 31, 2013.

#### Note 11 – Earnings Per Share

Basic earnings per common share is computed by dividing net income available to common stockholders by the weighted average of common shares outstanding during the period. Diluted earnings per common share adjusts basic earnings per common share for the effects of stock options and restricted stock in the periods where such items are dilutive.

On August 30, 2013, 46,743,316 shares of our common stock were distributed to the shareholders of Murphy Oil in connection with the separation and distribution. For comparative purposes, we have assumed this amount to be outstanding as of the beginning of each prior period prior to the separation and distribution presented in the calculation of weighted average shares outstanding.

During May 2014, the Company executed a share repurchase program that was approved by the Board of Directors for approximately \$50 million worth of common stock of the Company. At the completion of this plan, the Company had acquired 1,040,636 shares of common stock for an average price of \$48.07 per share including brokerage fees.

The following table provides a reconciliation of basic and diluted earnings per share computations for the three months and nine months ended September 30, 2014 and 2013 (in thousands, except per share amounts):

Murphy USA Inc.

Net decrease in noncash operating working capital	\$ 10,722	\$ 158,555

## Note 13 — Assets and Liabilities Measured at Fair Value

The Company carries certain assets and liabilities at fair value in its Consolidated Balance Sheets. The fair value hierarchy is based on the quality of inputs used to measure fair value, with Level 1 being the highest quality and Level 3 being the lowest quality. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs are observable inputs other than quoted prices included within Level 1. Level 3 inputs are unobservable inputs which reflect assumptions about pricing by market participants.

The Company carries certain assets and liabilities at fair value in its Consolidated Balance Sheets. The fair value measurements for these assets and liabilities at September 30, 2014 and December 31, 2013 are presented in the following table.

(Thousands of dollars)	Fair Value Measurements at Reporting Date Listing			
		Quoted Prices In Active Markets	Significant Other	Significant
	Fair Value	for Identical	Observable	Unobservable
	September 30,	Assets/(Liabilities)	Inputs	Inputs
	2014	(Level 1)	(Level 2)	(Level 3)

Edgar Filing: Murphy USA Inc. - Form 10-Q

Assets				
Commodity derivative contracts	\$ 1,132	—	\$ 1,132	—
Liabilities				
Commodity derivative contracts	\$ (1,722)	—	\$ (1,722)	—
Fair Value Measurements at Reporting Date Listing

Commodity derivative contracts	\$ (291)	—	\$ (291)	—

At the balance sheet date the fair value of commodity derivatives contracts for corn was determined based on market quotes for No. 2 yellow corn. The change in fair value of commodity derivatives is recorded in

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

Fuel and ethanol cost of goods sold. The carrying value of the Company's Cash and cash equivalents, Accounts receivable-trade and Trade accounts payable approximates fair value due to their short-term nature.

The following table presents the carrying amounts and estimated fair values of financial instruments held by the Company at September 30, 2014 and December 31, 2013. The fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties. The table excludes Cash and cash equivalents, Accounts receivable-trade, and Trade accounts payable and accrued liabilities, all of which had fair values approximating carrying amounts. The fair value of Current and Long-term debt was estimated based on rates offered to the Company at that time for debt of the same maturities. The Company has off-balance sheet exposures relating to certain financial guarantees and letters of credit. The fair value of these, which represents fees associated with obtaining the instruments, was nominal.

(Thousands of dollars)	At September 30, 2014		At December 31, 2013	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial liabilities				
Current and long-term debt	\$ (492,227)	\$ (510,633)	\$ (561,578)	\$ (559,411)

## Note 14 — Contingencies

The Company's operations and earnings have been and may be affected by various forms of governmental action. Examples of such governmental action include, but are by no means limited to: tax increases and retroactive tax claims; import and export controls; price controls; allocation of supplies of crude oil and petroleum products and other goods; laws and regulations intended for the promotion of safety and the protection and/or remediation of the environment; governmental support for other forms of energy; and laws and regulations affecting the Company's relationships with employees, suppliers, customers, stockholders and others. Because governmental actions are often motivated by political considerations, may be taken without full consideration of their consequences, and may be taken in response to actions of other governments, it is not practical to attempt to predict the likelihood of such actions, the form the actions may take or the effect such actions may have on the Company.

**ENVIRONMENTAL MATTERS AND LEGAL MATTERS** — Murphy USA is subject to numerous federal, state and local laws and regulations dealing with the environment. Violation of such environmental laws, regulations and permits can result in the imposition of significant civil and criminal penalties, injunctions and other sanctions. A discharge of hazardous substances into the environment could, to the extent such event is not insured, subject the Company to substantial expense, including both the cost to comply with applicable regulations and claims by neighboring landowners and other third parties for any personal injury, property damage and other losses that might result.

The Company currently owns or leases, and has in the past owned or leased, properties at which hazardous substances have been or are being handled. Although the Company believes it has used operating and disposal practices that were standard in the industry at the time, hazardous substances may have been disposed of or released on or under the properties owned or leased by the Company or on or under other locations where they have been taken for disposal. In addition, many of these properties have been operated by third parties whose management of hazardous substances was not under the Company's control. Under existing laws the Company could be required to remediate contaminated property (including contaminated groundwater) or to perform remedial actions to prevent future contamination. Certain of these contaminated properties are in various stages of negotiation, investigation, and/or cleanup, and the Company is investigating the extent of any related liability and the availability of applicable defenses. With the sale of the U.S. refineries in 2011, Murphy Oil retained certain liabilities related to environmental matters. Murphy Oil also obtained insurance covering certain levels of environmental exposures. The Company believes costs related to these sites will not have a material adverse effect on Murphy USA's net income, financial condition or liquidity in a future period.

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

Certain environmental expenditures are likely to be recovered by the Company from other sources, primarily environmental funds maintained by certain states. Since no assurance can be given that future recoveries from other sources will occur, the Company has not recorded a benefit for likely recoveries at September 30, 2014, however certain jurisdictions provide reimbursement for these expenses which have been considered in recording the net exposure.

The U.S. Environmental Protection Agency (EPA) currently considers the Company a Potentially Responsible Party (PRP) at one Superfund site. The potential total cost to all parties to perform necessary remedial work at this site may be substantial. However, based on current negotiations and available information, the Company believes that it is a de minimis party as to ultimate responsibility at the Superfund site. Accordingly, the Company has not recorded a liability for remedial costs at the Superfund site at September 30, 2014. The Company could be required to bear a pro rata share of costs attributable to nonparticipating PRPs or could be assigned additional responsibility for remediation at this site or other Superfund sites. The Company believes that its share of the ultimate costs to clean-up this site will be immaterial and will not have a material adverse effect on its net income, financial condition or liquidity in a future period.

Based on information currently available to the Company, the amount of future remediation costs to be incurred to address known contamination sites is not expected to have a material adverse effect on the Company's future net income, cash flows or liquidity. However, there is the possibility that additional environmental expenditures could be required to address contamination, including as a result of discovering additional contamination or the imposition of new or revised requirements applicable to known contamination.

In the case *Freeny v. Murphy Oil Corporation and Murphy Oil USA, Inc.* the plaintiffs allege that the Company has infringed on their electronic pricing system patent. The Company's claim is that our pricing system can be differentiated and in fact we have our own patent for our pricing system. Murphy Oil USA, Inc. has agreed to defend and indemnify Murphy Oil Corporation in this matter as required by the terms of the Separation Agreement. We are unable to estimate potential damages at this point and we are defending the claim vigorously. Trial is currently set for May 2015. At this time, management believes the probability of loss in this case is remote. However, it is possible that an unfavorable outcome of this lawsuit or other contingency could have a material impact on the liquidity, results of operations, or financial condition of the Company in future periods.

Other than as noted above, Murphy USA is engaged in a number of other legal proceedings, all of which the Company considers routine and incidental to its business. Based on information currently available to the Company, the ultimate resolution of those other legal matters is not expected to have a material adverse effect on the Company's net income, financial condition or liquidity in a future period.

INSURANCE — The Company maintains insurance coverage at levels that are customary and consistent with industry standards for companies of similar size. Murphy USA maintains statutory workers compensation insurance with a deductible of \$0.5 million per occurrence and other insurance programs for general and auto liability. As of September 30, 2014, there were a number of outstanding claims that are of a routine nature. The estimated incurred but unpaid liabilities relating to these claims are included in Trade account payables and accrued liabilities on the Consolidated Balance Sheets. While the ultimate outcome of these claims cannot presently be determined, management believes that the accrued liability of \$4.0 million will be sufficient to cover the related liability for all insurance claims and that the ultimate disposition of these claims will have no material effect on the Company's financial position and results of operations.

The Company was insured under Murphy Oil's insurance policies for occurrences prior to the completion of the separation. The specifications and insured limits under those policies, however, were at a level consistent with Murphy Oil as a whole. Following the separation, the Company has obtained insurance coverage as appropriate for the business in which it is engaged, but may incur losses that are not covered by insurance or reserves, in whole or in part, and such losses could adversely affect our results of operations and financial position.

Murphy USA Inc.

## NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

**TAX MATTERS** — Murphy USA is subject to extensive tax liabilities imposed by multiple jurisdictions, including income taxes, indirect taxes (excise/duty, sales/use and gross receipts taxes), payroll taxes, franchise taxes, withholding taxes and ad valorem taxes. New tax laws and regulations and changes in existing tax laws and regulations are continuously being enacted or proposed that could result in increased expenditures for tax liabilities in the future. Many of these liabilities are subject to periodic audits by the respective taxing authority. Subsequent changes to our tax liabilities because of these audits may subject us to interest and penalties.

**OTHER MATTERS** — In the normal course of its business, the Company is required under certain contracts with various governmental authorities and others to provide financial guarantees or letters of credit that may be drawn upon if the Company fails to perform under those contracts. At September 30, 2014, the Company had contingent liabilities of \$16.2 million on outstanding letters of credit. The Company has not accrued a liability in its balance sheet related to these financial guarantees and letters of credit because it is believed that the likelihood of having these drawn is remote.

## Note 15 — Business Segments

During the fourth quarter of 2013, the Company sold its Hankinson, North Dakota ethanol plant. This was the largest of the two ethanol plants that were owned by the Company. Because of this sale, the Company was required to reevaluate its operating segments for reporting purposes. After reviewing the quantitative and qualitative aspects of the Company's segments, it was determined that the remaining ethanol assets did not warrant separate segment presentation. Therefore, the segments for the Company were restated for all prior periods to reflect one remaining operating segment, Marketing. The remaining ethanol assets were recast into the category with the prior Corporate assets and renamed "Corporate and other assets". In addition, due to the sale of the Hankinson entity, the Company also shows discontinued operations for all periods presented for the prior Hankinson activity. Segment information is as follows:

	Total Assets at September 30,	Three Months Ended September 30, 2014		September 30, 2013

Murphy USA Inc.

NOTES TO CONSOLIDATED AND COMBINED FINANCIAL STATEMENTS

Note 16 – Subsequent Events

On October 22, 2014, the Company announced that its Board of Directors has authorized a share repurchase program of up to \$250 million of the Company's common stock. The timing and number of shares repurchased under the program will be determined by management at its discretion, and will depend on a number of factors, including compliance with the terms of our outstanding indebtedness, general market and business conditions and applicable legal requirements. The share repurchase program is expected to be completed by December 31, 2015.

Note 17 – Guarantor Subsidiaries

Certain of the Company's 100% owned, domestic subsidiaries (the "Guarantor Subsidiaries") fully and unconditionally guarantee, on a joint and several basis, certain of the outstanding indebtedness of the Company, including the 6.00% senior notes due 2023. The following consolidating and combining schedules present financial information on a consolidated and combined basis in conformity with the SEC's Regulation S-X Rule 3-10(d):

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis of Financial Condition and Results of Operations ("Management's Discussion and Analysis") is the Company's analysis of its financial performance and of significant trends that may affect future performance. It should be read in conjunction with the consolidated and combined financial statements and notes included in this Quarterly Report on Form 10-Q. It contains forward-looking statements including, without limitation, statements relating to the Company's plans, strategies, objectives, expectations and intentions. The words "anticipate," "estimate," "believe," "budget," "continue," "could," "intend," "may," "plan," "potential," "predict," "seek," "should," "will," "objective," "projection," "forecast," "goal," "guidance," "outlook," "effort," "target" and similar expressions identify forward statements. The Company does not undertake to update, revise or correct any of the forward-looking information unless required to do so under the federal securities laws. Readers are cautioned that such forward-looking statements should be read in conjunction with the Company's disclosures under "Forward-Looking Statements" and "Risk Factors" included elsewhere in this Quarterly Report on Form 10-Q.

For purposes of this Management's Discussion and Analysis, references to "Murphy USA", the "Company", "we", "us" and "our" refer to Murphy USA Inc. and its subsidiaries on a consolidated basis. For periods prior to completion of the separation from Murphy Oil Corporation ("Murphy Oil"), these terms refer to Murphy Oil's U.S. retail marketing business and other assets and liabilities that were contributed to Murphy USA in connection with the separation, including an allocable portion of Murphy Oil's corporate costs, on a combined basis.

Management's Discussion and Analysis is organized as follows:

- **Executive Overview**—This section provides an overview of our business and the results of operations and financial condition for the periods presented. It includes information on the basis of presentation with respect to the amounts presented in the Management's Discussion and Analysis and a discussion of the trends affecting our business.
- **Results of Operations**—This section provides an analysis of our results of operations, including the results of our operating segment for the three months and nine months ended September 30, 2014 and 2013.
- **Capital Resources and Liquidity**—This section provides a discussion of our financial condition and cash flows as of and for the nine months ended September 30, 2014 and 2013. It also includes a discussion of our capital structure and available sources of liquidity.

- Critical Accounting Policies—This section describes the accounting policies and estimates that we consider most important for our business and that require significant judgment.

## Executive Overview

### Our Business and Separation from Murphy Oil

Our business primarily consists of the U.S. retail marketing business that was separated from Murphy Oil, our former parent company, plus our remaining ethanol production facility in Hereford, Texas, and other assets, liabilities and operating expenses of Murphy Oil that are associated with supporting the activities of the U.S. retail marketing operations. The separation was completed on August 30, 2013 through the distribution of 100% of the outstanding capital stock of Murphy USA to holders of Murphy Oil common stock on the record date of August 21, 2013. Murphy Oil stockholders of record received one share of Murphy USA common stock for every four shares of Murphy Oil common stock. The spin-off was completed in accordance with a separation and distribution agreement entered into between Murphy Oil and Murphy USA. Following the separation, Murphy USA is an independent, publicly traded company, and Murphy Oil retains no ownership interest in Murphy USA.

We market refined products through a network of retail gasoline stations and unbranded wholesale customers. Our owned retail stations are almost all located in close proximity to Walmart stores and use the brand name Murphy USA®. We also market gasoline and other products at standalone stations under the Murphy Express brand. At September 30, 2014, we had a total of 1,239 Company stations in 23 states, principally in the Southeast, Southwest and Midwest United States.

#### Basis of Presentation

Murphy USA was incorporated in March 2013 in contemplation of the separation, and until the separation was completed on August 30, 2013, it had not commenced operations and had no material assets, liabilities or commitments. Accordingly, the financial information presented in this Management's Discussion and Analysis and the accompanying consolidated and combined financial statements reflect the combined historical results of operations, financial position and cash flows of the Murphy Oil subsidiaries and certain assets, liabilities, and operating expenses of Murphy Oil that comprise Murphy USA, as described above, as if such companies and accounts had been combined for all periods presented prior to August 30, 2013.

The assets and liabilities in these consolidated and combined financial statements at September 30, 2014 have been reflected on a historical basis. Any periods presented that include dates prior to August 30, 2013 are periods when all of the assets and liabilities shown were 100 percent owned by Murphy Oil and represented operations of Murphy USA prior to the separation. For the period prior to separation, the consolidated and combined statements of income also include expense allocations for certain corporate functions historically performed by Murphy Oil, including allocations of general corporate expenses related to executive oversight, accounting, treasury, tax, legal, procurement and information technology. These allocations are based primarily on specific identification, headcount or computer utilization. Murphy USA's management believes the assumptions underlying the consolidated and combined financial statements, including the assumptions regarding allocating general corporate expenses from Murphy Oil, are reasonable. However, these consolidated and combined financial statements may not include all of the actual expenses that would have been incurred had the Company been a stand-alone company during the period prior to separation and may not reflect the combined results of operations, financial position and cash flows had the Company been a stand-alone company during the entirety of the periods presented.

Actual costs that would have been incurred if Murphy USA had been a stand-alone company would depend upon multiple factors, including organizational structure and strategic decisions made in operational areas, including information technology and infrastructure.

Subsequent to the separation, Murphy Oil continues to perform certain of these corporate functions on our behalf, for which we are charged a fee in accordance with the Transition Services Agreement entered into between Murphy Oil and Murphy USA on August 30, 2013 (the "Transition Services Agreement"). There are also some services that are performed by Murphy USA on behalf of Murphy Oil and these are also being handled in accordance with the Transition Services Agreement.

The consolidated financial statements reflect our financial results as an independent company for all periods subsequent to the separation while the combined financial statements reflect the combined financial results of Murphy Oil's U.S. retail marketing business for all periods prior to the separation.

#### Trends Affecting Our Business

Our operations are significantly impacted by the gross margins we receive on our fuel sales. These gross margins are commodity-based, change daily and are volatile. While we expect our total fuel sales volumes to grow, as discussed further below, our ability to achieve high volumes and improved gross margins is dependent on certain external factors. These factors include, but are not limited to, the price of refined products, interruptions in supply caused by severe weather, severe refinery mechanical failures for an extended period of time, and competition in the local markets in which we operate. In addition, our ethanol production operations are impacted by the price of corn and may be affected by future droughts or other

weather related events and by ethanol demand levels in the United States which can be impacted by foreign imports and Federal and state regulations.

The cost of our main sales products, gasoline and diesel, is greatly impacted by the cost of crude oil in the United States. Generally, rising prices for crude oil increase the Company's cost for wholesale fuel products purchased. When wholesale fuel costs rise, the Company is not always able to immediately pass these price increases on to its retail customers at the pump, which in turn squeezes the Company's sales margin. Also, rising prices tend to cause our customers to reduce discretionary fuel consumption, which tends to reduce our fuel sales volumes. As of late 2014, global crude oil prices have come under pressure and significant declines in U.S. crude oil prices have occurred. We expect this volatility to continue into 2015. Margins for U.S. retail marketing have improved in the third quarter of 2014 versus the averages achieved in the second quarter of 2014 and are higher than margins from the third quarter of 2013. These fuel gross margins can change rapidly due to many factors. In early fourth quarter 2014, crude oil prices fell rapidly which led to higher than usual margins compared to recent years. Ethanol margins, however, have fallen off during the third quarter of 2014 following reported ethanol inventory builds and demand increases during the quarter. We expect that trend to level out into the end of 2014 after recent inventory draws and increased exports reported early in the fourth quarter.

In addition, our revenues are impacted by our ability to leverage our diverse supply infrastructure in pursuit of obtaining the lowest cost fuel supply available; for example, activities such as blending bulk fuel with ethanol and bio-diesel to capture and subsequently sell Renewable Identification Numbers ("RINs"). Under the Energy Policy Act of 2005, the Environmental Protection Agency ("EPA") is authorized to set annual quotas establishing the percentage of motor fuels consumed in the United States that must be attributable to renewable fuels. Companies that blend fuels are required to demonstrate that they have met any applicable quotas by submitting a certain amount of RINs to the EPA. RINs in excess of the set quota (as well as RINs generated by companies such as ours that are not subject to quotas) can then be sold in a market for RINs at then-prevailing prices. The market price for RINs fluctuates based on a variety of factors, including but not limited to governmental and regulatory action. In recent historical periods, we have benefited from our ability to attain RINs and sell them at favorable prices in the market. The increase in RIN values and ensuing changes to our supply mix resulted in higher RIN revenues in 2013 versus 2012. However, beginning in the latter part of the third quarter of 2013 and through 2014, we have observed declining or steady RIN prices compared to early 2013 levels. Our business model does not depend on our ability to generate revenues from RINs. Revenue from the sales of RINs is included in "Ethanol sales and other" in the Consolidated and Combined Statements of Income.

In August 2013, in connection with the separation from Murphy Oil, we incurred \$650 million of new debt from the issuance of senior notes and borrowings under the credit facilities, which we used to finance a cash dividend to Murphy Oil immediately prior to the separation. We believe that we will continue to generate sufficient cash from operations to fund our ongoing operating requirements. We expect to use the credit facilities to provide us with available financing intended to meet any ongoing cash needs in excess of internally generated cash flows. To the extent necessary, we will borrow under these facilities to fund our ongoing operating requirements. At September 30, 2014, we have additional available capacity under the committed \$450 million credit facilities (subject to the borrowing base), together with capacity under a \$200 million incremental uncommitted facility. There can be no assurances, however, that we will generate sufficient cash from operations or be able to draw on the credit facilities, obtain commitments for our incremental facility and/or obtain and draw upon other credit facilities.

On December 21, 2012, we signed an agreement with Walmart providing for the potential purchase of land to develop approximately 200 new Company stations located adjacent to existing Walmart stores in Walmart's core market area covering the Southeast, Southwest and Midwest United States. The construction program is expected to be completed over the next few years. In connection with this agreement, we expect to incur additional station operating and depreciation expenses due to the addition of new stores. However, we can provide no assurance that we will develop all or any of the sites as contemplated under the agreement. To date, the agreement has been terminated with respect to some of the 200 sites due to various local conditions which would affect development including zoning and permitting restrictions. We continue to work with Walmart to determine if these terminated sites will be

replaced with other sites at a future date. See “Risk Factors—Risks Relating to Our Business—Our ability to continue to generate revenue and operating income depends on our continued relationship with Walmart” in our Annual Report on Form 10-K. The Company currently anticipates total capital expenditures (including purchases of Walmart properties and other land for future developments) for the full year 2014 to be approximately \$130 million to \$150 million. We intend to fund our capital program in 2014 primarily using operating cash flow or existing cash balances.

We believe that our business will continue to grow in the future as we expect to build additional locations in close proximity to Walmart stores and other locations. The pace of this growth is continually monitored by our management, and these plans can be altered based on operating cash flows generated and the availability of debt facilities.

Despite a lower income tax rate in the current quarter and the nine months ended September 30, 2014 due to a discrete state income tax benefit, we currently estimate our ongoing effective tax rate to be approximately 38.2% for the remainder of the year.

#### Seasonality

Our business has inherent seasonality due to the concentration of our retail sites in certain geographic areas, as well as customer activity behaviors during different seasons. In general, sales volumes and operating incomes are highest in the second and third quarters during the summer activity months and lowest during the winter months. As a result, operating results for the three months and nine months ended September 30, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014.

#### Business Segments

Our business is organized into one operating segment: Marketing. The Marketing segment includes our retail marketing sites and product supply and wholesale assets. Prior to December 2013, we also had an Ethanol segment which consisted of our ethanol production facilities located in Hankinson, North Dakota and in Hereford, Texas. After the Hankinson facility was sold in December 2013, we reassessed our segments and due to its small size, we have included the remainder of the former Ethanol segment in the prior “Corporate” section which has been renamed “Corporate and other assets”. Therefore, we have restated our segments for all prior periods to reflect one remaining reporting segment, Marketing. The Hereford facility began operations in early 2011 and we wrote down the carrying value at this facility at year end 2012 due to expectations at that time of continued weak margins in the future.

We are currently considering strategic alternatives for the remaining Hereford ethanol facility. As part of this effort, we are evaluating various factors including the appropriate timing and market conditions to maximize value in any potential sale; however, a final decision has not yet been determined and this remaining ethanol asset does not meet the criteria for “held for sale” presentation at this time. Therefore, historical financial results for the Hereford plant are included in continuing operations for all periods presented.

For additional operating segment information, see Note 20 “Business Segments” in the audited combined financial statements for the three year period ended December 31, 2013 included with our Annual Report on Form 10-K and Note 15 “Business Segments” in the accompanying unaudited consolidated and combined financial statements for the three months and nine months ended September 30, 2014.

## Results of Operations

### Consolidated and Combined Results

For the three month period ended September 30, 2014, the Company reported net income of \$62.7 million or \$1.36 per diluted share on revenue of \$4.68 billion. Net income was \$41.7 million for the comparable period in 2013 or \$0.89 per diluted share on \$4.69 billion in revenue.

For the nine month period ended September 30, 2014, the Company reported net income of \$145.5 million or \$3.13 per diluted share on revenue of \$13.60 billion. Net income was \$141.4 million for the comparable period in 2013 or \$3.02 per diluted share on \$13.89 billion in revenue.

Three Months Ended September 30, 2014 versus Three Months Ended September 30, 2013

Revenues for the three months ended September 30, 2014 decreased \$8.1 million, or 0.2%, compared to the same period of 2013. The lower revenues were caused by lower wholesale fuel prices and lower ethanol sales revenues in the period. Partially offsetting these lower revenues was an increase in retail fuel revenues caused by an increase in total retail fuel volumes sold of 7.0%.

Total cost of sales decreased \$55.9 million, or 1.3%, compared to the same period of 2013. This decline is primarily due to lower wholesale prices along with higher margins on most merchandise categories in the 2014 quarter. Partially offsetting this decline was an increase in cost of sales for the increased store count in the current period compared to the prior year.

Operating expenses for the quarter increased \$9.1 million or 7.4% from the 2013 period. This increase was driven by higher credit card payment fees and higher maintenance costs in the current period. The higher payment fees were due to a benefit received in the prior year quarter for a settlement related to overcharges and higher fuel sales volumes in the current quarter.

Selling, general and administrative expenses for the current quarter decreased \$14.6 million, or 32.7%, from the 2013 period. The 2013 quarter included \$14.3 million of spin-related and one-time, nonrecurring costs. Without the nonrecurring costs, selling, general and administrative expense was lower by 1.0% in the current quarter.

Interest expense was higher in the third quarter of 2014 compared to 2013 due to the issuance in mid-August 2013 of the \$500 million principal amount of Senior Notes and the funding of a \$150 million term loan under our credit facilities. There was no interest expense on the term loan in the current period as it was paid off in May 2014. As these borrowings did not exist for the full prior period, there was a large increase in interest expense for the current quarter.

Income tax expense for the third quarter of 2014 was higher than the 2013 period due to higher pre-tax income levels. The effective tax rate was 37.6% for the current quarter and 38.8% for the 2013 quarter. The lower effective rate in the current quarter was primarily due to lower state tax rates.

Nine Months Ended September 30, 2014 versus Nine Months Ended September 30, 2013

Revenues for the nine months ended September 30, 2014 decreased \$287.3 million, or 2.1%, compared to the same period of 2013. Significant items impacting these results included lower wholesale fuel volumes sold combined with lower wholesale prices and lower ethanol sales revenue in the period. This was partially offset by an overall increase in retail fuel revenues comprised of an increase in total retail fuel volumes sold of 3.8% and a decrease in the price of retail fuel of \$0.06 per gallon.

Total cost of sales decreased \$336.1 million, or 2.6%, compared to the same period of 2013. This decline is primarily due to a decrease in the price of motor fuel paid to acquire fuel for both the retail and wholesale locations and lower costs on certain merchandise categories in the 2014 quarter. Partially offsetting this decline was an increase in cost of sales for the increased store count in the current period compared to the prior year.

Operating expenses for the nine months ended September 30, 2014 increased \$19.2 million, or 5.2% from the 2013 period. This increase was driven by higher labor and benefits costs, credit card payment fees, and maintenance costs partially offset by lower environmental costs.

Selling, general and administrative expenses for the current period have declined \$17.5 million, or 16.6%. The 2013 period included \$14.3 million in spin-related and one-time, nonrecurring costs. Without the nonrecurring costs, the 2014 period is lower by 3.5%. The primary reason for the decrease was that the 2013 period contained higher employee-related costs allocated from Murphy Oil that did not repeat in the current period.

Interest expense was higher in the 2014 period compared to the corresponding period in 2013 due to the issuance in mid-August 2013 of the \$500 million principal amount of Senior Notes and the funding of a \$150 million term loan under our credit facilities. During the second quarter of 2014, the Company paid off the remainder of the term loan of \$55 million. Because of the payoff, the Company also expensed \$1.9 million of deferred debt costs associated with that term loan. As these borrowings did not exist in the prior period, there was a large increase in interest expense resulting from these transactions.

Income tax expense decreased in the period primarily due to a tax benefit of \$6.8 million that was recognized in the 2014 period related to lower state tax rates. The effective tax rate was 34.9% for the current period and 39.2% for the 2013 period.

A summary of the Company's earnings by business segment follows:

(Thousands of dollars)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Marketing	\$ 62,589	\$ 40,922	\$ 148,010	\$ 130,862
Corporate and other assets	62	(4,941)	(3,275)	(4,009)
Discontinued operations	—	5,748	781	14,551
Net income	\$ 62,651	\$ 41,729	\$ 145,516	\$ 141,404

Three Months Ended September 30, 2014 versus Three Months Ended September 30, 2013

Net income for the three months ended September 30, 2014 increased compared to the same period in 2013 primarily due to:

- Higher retail fuel margin per gallon
- Increased retail fuel volumes
- Higher merchandise gross margin dollars
- Improved income from Hereford due to higher yields and improved crush spread
- Lower selling, general and administrative expense

The items below helped to partially offset the improvement in earnings in the current period:

- Increased operating expenses at the retail sites due to more sites in operation
- Higher income tax expense due to higher pre-tax earnings
- Lower RIN sales revenue

Nine Months Ended September 30, 2014 versus Nine Months Ended September 30, 2013

Net income for the nine months ended September 30, 2014 increased compared to the same period in 2013 primarily due to:

- Improvement from ethanol operations at Hereford
- Higher merchandise margin gross dollars for the current year to date due to increased non-tobacco sales at higher margins than the prior year
- Lower selling, general and administrative expense

The items below partially offset the increase in earnings in the current year:

- Lower retail fuel margin
- Increased operating expenses
- Higher interest expense due to spin-related debt

(Thousands of dollars, except volume per store month and margins) Marketing Segment	Three Months Ended September 30,		Nine Months Ended September 30,

---

Three Months Ended September 30, 2014 versus Three Months Ended September 30, 2013

Net income in the Marketing segment for the third quarter of 2014 increased \$21.7 million over the same period in 2013. The primary reason for this increase was an increase in retail fuel margins and volumes combined with increased merchandise margins. Total chain wide retail fuel sales volumes were 1.04 billion gallons for the quarter ended September 30, 2014 compared to 0.97 billion gallons for the quarter ended September 30, 2013, an increase of 7.0%.

Merchandise margins in the third quarter of 2014 were higher than the 2013 period. The increase in gross margin dollars of 5.1% in the current period was due primarily to higher margins on tobacco merchandise, increased sales of higher margin e-cigarette and vapor products, and additional sales of non-tobacco merchandise which were attributable to a continuation of enhanced promotions.

Also impacting net income in the three months ended September 30, 2014 was the sale of RINs of \$25.2 million compared to \$31.8 million in the 2013 period. During the current period, 52 million RINs were sold at an average selling price of \$0.48 per RIN.

Total revenues for the Marketing segment were approximately \$4.6 billion for both the 2014 and 2013 periods. Revenues included excise taxes collected and remitted to government authorities of \$502 million in the current three month period and \$484 million in the comparable period of 2013.

Total fuel sales volumes per station averaged 281,185 gallons per store month in the 2014 period, up 2.7% from 273,741 gallons per store month in the prior year same period. Higher volumes were due to more days in the quarter for the Walmart 15 cent/10 cent discount program. The discount program was in effect for the majority of the quarter in 2014 compared to one week in the 2013 period. Fuel margin increased 18% in the 2014 period to 17.5 cpg, compared to 14.8 cpg in the comparable prior year period. Margins and volume were impacted during the current period by a declining wholesale price environment compared to periods of higher volatility and price decreases in the prior year quarter along with more days in the current quarter of the discount program.

Merchandise sales increased to \$561.0 million in the current period, up 0.7% from comparable 2013 levels because of an increase in non-tobacco sales of 9.6%, partially offset by a decline in tobacco products revenue of 1.5%. Merchandise unit margins increased 0.5%, from 13.2% in the 2013 period to 13.7% in the current year period. This improvement in margins was caused by continued improvement in non-tobacco merchandise margins due to enhanced promotions and improved pricing on cigarettes in the current period compared to the 2013 quarter when prices were lower.

Total product supply and wholesale margin dollars excluding RINs were a negative \$13.3 million in the 2014 period compared to a negative \$14.5 million in the same period of 2013. The negative margins were due to unfavorable market conditions.

Station and other operating expenses increased \$8.6 million in the current period compared to 2013 levels. On an average per store month (APSM) basis expenses applicable to retail increased 3.1%. This increase on an APSM basis was caused by higher credit card processing fees due to a benefit received in the prior year quarter for a settlement related to overcharges and higher fuel sales volumes in the current quarter, combined with higher maintenance expense in the 2014 period due to refurbishments and repairs.

Depreciation expense increased \$1.3 million in the 2014 period, an increase of 7.5% over the prior period. This increase was caused by more stores operating in the 2014 period compared to the prior year period.

Selling, general and administrative (SG&A) expenses decreased \$13.3 million, or 31.0%, in the current quarter over the prior period. The prior year quarter contained \$14.3 million of spin-related and other one-time, nonrecurring costs. Without the prior year nonrecurring costs, SG&A expense for the current quarter is 3.3% higher. This increase was primarily due to higher employee labor and benefit costs. Included in the station and other operating expense and SG&A expense totals above are \$4.9 million and

\$5.3 million of combined operating expense and SG&A costs for the three months ended September 30, 2014 and 2013, respectively for product supply and wholesale operations.

Nine Months Ended September 30, 2014 versus Nine Months Ended September 30, 2013

Net income in the Marketing segment for the 2014 year-to-date period increased \$17.1 million over the same period in 2013. The primary reason for this increase was an increase in total fuel volumes sold at a lower retail fuel margin in the current period. Total chain wide retail fuel sales volumes were 2.94 billion gallons for the nine months ended September 30, 2014 compared to 2.83 billion gallons for the nine months ended September 30, 2013, an increase of 3.8% due to new sites added.

Merchandise margins in 2014 were higher than the 2013 period combined with a decrease in merchandise sales revenue per store month of 4.4%, which was mostly driven by an increased number of stores in the current period and overall lower sales dollars for cigarettes. The increase in margins in the current period was due primarily to higher margins on tobacco merchandise, increased sales of higher margin e-cigarette and vapor products, and additional sales of non-tobacco merchandise which were attributable to a continuation of enhanced promotions.

Also impacting net income in the first nine months of 2014 was the sale of RINs of \$66.1 million compared to \$74.8 million in the 2013 period. During the current period, 141 million RINs were sold at an average selling price of \$0.47 per RIN.

Total revenues for the Marketing segment were approximately \$13.4 billion in the 2014 period compared to approximately \$13.7 billion in the 2013 period, a decrease of \$242 million. Revenues included excise taxes collected and remitted to government authorities of \$1.43 billion in the nine months ended September 30, 2014 and \$1.42 billion in the comparable period of 2013.

Total fuel sales volumes per station averaged 268,092 gallons per store month in the 2014 period compared to 267,928 gallons per store month in the prior year same period. Fuel margin decreased 9% in the 2014 period to 12.7 cpg, compared to 13.9 cpg in the comparable prior year period. Margins and volumes were impacted during the year to date period by fewer months of wholesale price volatility as the first six months were relatively flat followed by declining wholesale prices in the third quarter.

Merchandise sales decreased to \$1.61 billion in the current period, down 0.8% from comparable 2013 levels because of a decline in tobacco products revenue of 3.3%, which was partially offset by revenue growth of 9.2% in non-tobacco products. Merchandise unit margins increased 0.8%, from 13.0% in the 2013 period to 13.8% in the current year period. This improvement in margins was caused by improved pricing on cigarettes in the current period compared to the 2013 period when prices were lowered more aggressively as well as continued improvement in non-tobacco merchandise margins due to enhanced promotions.

Total product supply and wholesale margin dollars excluding RINs were \$67.0 million in the 2014 period compared to \$26.3 million in the same period of 2013. The 2014 amount includes a benefit of \$17.8 million related to a LIFO decrement in the first quarter due to a liquidation of inventories that is not expected to be restored by year-end. The current period has also benefitted from increased margins due to supply constraints and higher wholesale margins on certain products such as diesel.

Station and other operating expenses increased \$16.9 million in the current period compared to 2013 levels. On an average per store month (APSM) basis the expenses applicable to retail increased 1.1%. This increase on an APSM basis was due to higher credit card processing fees in the current year and higher maintenance costs, partially offset by improvements in environmental expense in the 2014 period.

Depreciation expense increased \$3.0 million in the 2014 period, an increase of 5.7% over the 2013 period. This increase was caused by more stores operating in the 2014 period compared to the prior year period.

Selling, general and administrative (SG&A) expenses decreased \$15.7 million in the nine months ended September 30, 2014 over the 2013 period. The 2013 period contained \$14.3 million in spin-related and other one-time, nonrecurring costs. Other than the nonrecurring costs, the decrease was primarily due to no repeat of certain employee benefit related charges from the former parent that occurred in the first quarter of 2013. Included in the station and other operating expense and SG&A expense totals above are \$14.0 million and \$14.8 million of combined operating expense and SG&A costs for the nine months ended September 30, 2014 and 2013, respectively for product supply and wholesale operations.

#### Corporate and Other Assets

##### Three Months Ended September 30, 2014 versus Three Months Ended September 30, 2013

After-tax results for Corporate and other assets improved in the recently completed quarter to income of \$0.1 million compared to a loss of \$4.9 million in the third quarter of 2013. This increase was due primarily to improvement in ethanol earnings from the Hereford, Texas facility. In the third quarter of 2014, operating income from Hereford was \$6.0 million compared to a loss of \$0.9 million in the same quarter of 2013. The improvement in the current quarter was due to a nearly 2.0% increase in annual throughput rates and significantly higher yields following planned maintenance activities in the first quarter of 2014. Partially offsetting the improved Hereford earnings was interest expense accrued since the August 2013 issuance of \$500 million principal amount of Senior Notes and term debt outstanding under our credit facilities during the quarter.

##### Nine Months Ended September 30, 2014 versus Nine Months Ended September 30, 2013

After-tax results for Corporate and other assets improved in the nine months ended September 30, 2014 to a loss of \$3.3 million compared to a loss of \$4.0 million in the comparable period in 2013. This increase was due primarily to improvement in ethanol earnings from the Hereford, Texas facility. In the 2014 period, operating income from Hereford was \$16.1 million compared to income of \$0.1 million in the first nine months of 2013. The improvement in the current period was due to higher crush spreads and improved yield following planned maintenance in the first quarter of 2014. Mainly offsetting the Hereford results was interest expense accrued since the August 2013 issuance of \$500 million principal amount of Senior Notes and term debt outstanding under our credit facilities.

#### Balance Sheet Information

As of September 30, 2014, the Hereford ethanol subsidiary had total assets of \$31 million, or 1.6% of our total assets, which were comprised primarily of accounts receivable and related inventories to operate the facility. Also at September 30, 2014, the ethanol subsidiary had total current liabilities of \$5 million, or 0.4% of our total liabilities.

#### Non-GAAP Measures

The following table sets forth the Company's Adjusted EBITDA for the three months and nine months ending September 30, 2014 and 2013. EBITDA means net income (loss) plus net interest expense, plus income tax expense,

depreciation and amortization, and Adjusted EBITDA adds back (i) other non-cash items (e.g., impairment of properties and accretion of asset retirement obligations) and (ii) other items that management does not consider to be meaningful in assessing our operating performance (e.g., (income) from discontinued operations, gain (loss) on sale of assets and other non-operating expense (income)). EBITDA and Adjusted EBITDA are not measures that are prepared in accordance with U.S. generally accepted accounting principles (GAAP).

We use EBITDA and Adjusted EBITDA in our operational and financial decision-making, believing that such measures are useful to eliminate certain items in order to focus on what we deem to be a more reliable indicator of ongoing operating performance and our ability to generate cash flow from operations. Adjusted EBITDA is also used by many of our investors, research analysts, investment bankers, and lenders to assess our operating performance. However, non-GAAP financial measures are not a substitute for GAAP disclosures, and Adjusted EBITDA may be prepared differently by us than by other

companies using similarly titled non-GAAP measures.

The reconciliation of net income to EBITDA and Adjusted EBITDA follows:

(Thousands of dollars)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Net income	\$ 62,651	\$ 41,729	\$ 145,516	\$ 141,404
Income taxes	37,681	22,765	77,662	81,873
Interest expense, net of interest income	8,599	4,344	28,193	3,752
Depreciation and amortization	19,629	18,128	58,975	54,734
EBITDA	128,560	86,966	310,346	281,763
(Income) loss from discontinued operations, net of tax	—	(5,748)	(781)	(14,551)
Accretion of asset retirement obligations	300	274	897	821
Gain on sale of assets	—	(5,972)	(170)	(5,980)
Other nonoperating income	(115)	(50)	(1,121)	(74)
Adjusted EBITDA	\$ 128,745	\$ 75,470	\$ 309,171	\$ 261,979

The Company also considers free cash flow in the operation of its business. Free cash flow is defined as net cash provided by operating activities in a period minus payments for property and equipment made in that period. Free cash flow is also considered a non-GAAP financial measure. Management believes, however, that free cash flow, which measures our ability to generate additional cash from our business operations, is an important financial measure for us in evaluating the Company's performance. Free cash flow should be considered in addition to, rather than as a substitute for, consolidated net income as a measure of our performance and net cash provided by operating activities as a measure of our liquidity.

Numerous methods may exist to calculate a company's free cash flow. As a result, the method used by our management to calculate our free cash flow may differ from the methods other companies use to calculate their free cash flow. The following table provides a reconciliation of free cash flow, a non-GAAP financial measure, to net cash provided by operating activities, which we believe to be the GAAP financial measure most directly comparable to free cash flow:

Edgar Filing: Murphy USA Inc. - Form 10-Q

(Thousands of dollars)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Net cash provided by operating activities	\$ 77,887	\$ 155,976	\$ 216,316	\$ 333,923
Payments for property and equipment	(31,633)	(26,486)	(84,687)	(121,595)
Free cash flow	\$ 46,254	\$ 129,490	\$ 131,629	\$ 212,328

## Capital Resources and Liquidity

### Significant Sources of Capital

In connection with the separation, we obtained borrowing capacity under a committed \$450 million asset based loan facility (the “ABL facility”) (subject to the borrowing base) and a \$150 million term facility, as well as a \$200 million incremental uncommitted facility. As described below, concurrent with the separation, we borrowed \$150 million under the term facility, the proceeds of which were used, together with the net proceeds of the issuance of senior unsecured notes, to finance a \$650 million cash dividend from Murphy Oil USA, Inc. to Murphy Oil. At September 30, 2014 we had \$450 million of borrowing capacity that we could utilize for working capital and other general corporate purposes, including to support our operating model as described herein. Our borrowing base following the third quarter is approximately \$355 million based on September 30, 2014 balance sheet information. See “Debt – Credit Facilities” for the calculation of our borrowing base.

Because of the opportunities available to us following the separation, including internally generated cash flow and access to capital markets, we believe our short-term and long-term liquidity will be adequate to fund not only our operations, but also our anticipated near-term and long-term funding requirements, including capital spending programs, potential dividend payments, repayment of debt maturities and other amounts that may ultimately be paid in connection with contingencies.

### Operating Activities

Net cash provided by operating activities was \$216 million for the nine months ended September 30, 2014 and \$370 million for the comparable period in 2013, lower primarily because of less cash generated by adjustments to working capital positions in the 2014 period. Net income increased \$4 million in the first nine months of 2014 compared to the corresponding period in 2013 and the amount of cash generated from adjustments of working capital in the 2014 period declined by \$148 million.

### Investing Activities

For the nine months ended September 30, 2014, cash required by investing activities was \$95 million compared to \$117 million in the nine months ended September 30, 2013. The lower investing cash use of \$22 million was primarily due to a partial payment in January 2013 for land purchased for stations acquired from Walmart in the December 2012 land acquisition agreement partially offset by the acquisition of intangible assets in the third quarter of 2014.

## Financing Activities

Financing activities in the nine months ended September 30, 2014 used cash of \$122 million compared to use of \$48 million in the nine months ended September 30, 2013. This increased use of cash was due to an early principal repayment on the outstanding term loan in 2014 and completion of the \$50 million stock repurchase plan in the current year.

### Share Repurchase Authorization

On October 22, 2014, the Company announced that its Board of Directors authorized a share repurchase program of up to \$250 million of the Company's common stock. The timing and number of shares repurchased under the program will be determined by management at its discretion, and will depend on a number of factors, including compliance with the terms of our outstanding indebtedness, general market and business conditions and applicable legal requirements. The share repurchase program is expected to be completed by December 31, 2015. We expect to use existing cash balances to fund the repurchase program.

## Debt

In connection with the separation, we incurred an aggregate of \$650 million in long term debt, the proceeds of which we used to finance a cash dividend to Murphy Oil that was paid on the separation date. Our long-term debt at September 30, 2014 and December 31, 2013 are as set forth below:

	September 30, 2014	December 31, 2013
(Thousands of dollars)		
6% senior notes due 2023 (net of unamortized discount of \$7,773 at September 2014 and \$8,422 at December 2013)	\$ 492,227	\$ 491,578
Term loan due 2016 (effective rate of 3.71% at December 31, 2013)	—	70,000
Less current maturities	—	(14,000)
Total long-term debt	\$ 492,227	\$ 547,578

(1) In May 2014, we voluntarily paid off the remaining \$55 million of the term loan.

## Senior Notes

On August 14, 2013, Murphy Oil USA, Inc., our primary operating subsidiary, issued 6.00% Senior Notes due 2023 (the “Senior Notes”) in an aggregate principal amount of \$500 million. The Senior Notes are fully and unconditionally guaranteed by Murphy USA, and are guaranteed by certain subsidiaries that guarantee our credit facilities. The indenture governing the Senior Notes contains restrictive covenants that limit, among other things, the ability of Murphy USA, Murphy Oil USA, Inc. and the restricted subsidiaries to incur additional indebtedness or liens, dispose of assets, make certain restricted payments or investments, enter into transactions with affiliates or merge with or into other entities.

The Senior Notes and the guarantees rank equally with all of our and the guarantors’ existing and future senior unsecured indebtedness and effectively junior to our and the guarantors’ existing and future secured indebtedness (including indebtedness with respect to the credit facilities) to the extent of the value of the assets securing such indebtedness. The Senior Notes are structurally subordinated to all of the existing and future third-party liabilities, including trade payables, of our existing and future subsidiaries that do not guarantee the notes.

We used the net proceeds of the Senior Notes, together with borrowings under the credit facilities, to finance a cash dividend of \$650 million from Murphy Oil USA, Inc. to Murphy Oil paid in connection with the separation.

On June 17, 2014, we closed an exchange offer for our Senior Notes to make them eligible for public resale, as required by a registration rights agreement entered into in connection with the issuance of the Senior Notes. All of the Senior Notes were tendered for exchange.

## Credit Facilities

On August 30, 2013, we entered into a credit agreement in connection with the separation from Murphy Oil. The credit agreement provides for a committed \$450 million asset-based loan (ABL) facility (with availability subject to the borrowing base described below) and provided for a \$150 million term facility. It also provides for a \$200 million uncommitted incremental facility. On August 30, 2013, Murphy Oil USA, Inc. borrowed \$150 million under the term facility, the proceeds of which were used, together with the net proceeds of the offering of the Senior Notes, to finance a \$650 million cash dividend from Murphy Oil USA, Inc. to Murphy Oil. The term facility was repaid in full in May 2014. On September 2, 2014, we amended the credit agreement to extend the maturity date to September 2, 2019 and amend the terms of various covenants.

The borrowing base is expected, at any time of determination, to be an amount (net of reserves) equal to the sum of:

- 100% of eligible cash at such time, plus
- 90% of eligible credit card receivables at such time, plus
- 90% of eligible investment grade accounts, plus
- 85% of eligible other accounts, plus
- 80% of eligible product supply/wholesale refined products inventory at such time, plus
- 75% of eligible retail refined products inventory at such time, plus

the lesser of (i) 70% of the average cost of eligible retail merchandise inventory at such time and (ii) 85% of the net orderly liquidation value of eligible retail merchandise inventory at such time.

The ABL facility includes a \$75 million sublimit on swingline loans and a \$200 million sublimit for the issuance of letters of credit. Swingline loans and letters of credit issued under the ABL facility reduce availability under the ABL facility.

Interest payable on the credit facilities is based on either:

- the London interbank offered rate, adjusted for statutory reserve requirements (the “Adjusted LIBO Rate”); or
- the Alternate Base Rate, which is defined as the highest of (a) the prime rate, (b) the federal funds effective rate from time to time plus 0.50% per annum and (c) the one-month Adjusted LIBO Rate plus 1.00% per annum,

plus, (A) in the case of Adjusted LIBO Rate borrowings, (i) with respect to the ABL facility, spreads ranging from 1.50% to 2.00% per annum depending on the average availability under the ABL facility or (ii) with respect to the term facility, spreads ranging from 2.75% to 3.00% per annum depending on a secured debt to EBITDA ratio and (B) in the case of Alternate Base Rate borrowings, (i) with respect to the ABL facility, spreads ranging from 0.50% to 1.00% per annum depending on the average availability under the ABL facility or (ii) with respect to the term facility, spreads ranging from 1.75% to 2.00% per annum depending on a secured debt to EBITDA ratio.

The interest rate period with respect to the Adjusted LIBO Rate interest rate option can be set at one, two, three, or six months as selected by us in accordance with the terms of the credit agreement.

We were obligated to make quarterly principal payments on the outstanding principal amount of the term facility beginning on the first anniversary of the effective date of the credit agreement in amounts equal to 10% of the term loans made on such effective date, with the remaining balance payable on the scheduled maturity date of the term facility. Borrowings under the credit facilities are prepayable at our option without premium or penalty. We were also required to prepay the term facility with the net cash proceeds of certain asset sales or casualty events, subject to certain exceptions. The credit agreement also includes certain customary mandatory prepayment provisions with respect to the ABL facility.

The credit agreement contains certain covenants that limit, among other things, the ability of us and our subsidiaries to incur additional indebtedness or liens, to make certain investments, to enter into sale-leaseback transactions, to make certain restricted payments, to enter into consolidations, mergers or sales of material assets and other fundamental changes, to transact with affiliates, to enter into agreements restricting the ability of subsidiaries to incur liens or pay dividends, or to make certain accounting changes. In addition, the credit agreement requires us to maintain a fixed charge coverage ratio of a minimum of 1.0 to 1.0 when availability for at least three consecutive business days is less than the greater of (a) 17.5% of the lesser of the aggregate ABL facility commitments and the borrowing base and (b) \$70,000,000 (including as of the most recent fiscal quarter end on the first date when availability is less than such amount). As of September 30, 2014, our fixed charge coverage ratio was 1.00. Prior to

the repayment of the term loan, we were also subject to a maximum secured debt to EBITDA ratio of 4.5 to 1.0 at any time when term facility commitments or term loans thereunder were outstanding.

After giving effect to the applicable restrictions on certain payments which could include dividends under the credit agreement (which restrictions are only applicable when availability under the credit agreement does not exceed the greater of 25% of the lesser of the revolving commitments and the borrowing base and \$100 million (and if availability under the credit agreement does not exceed the greater of 40% of the lesser of the revolving commitments and the borrowing base and \$150 million, then our fixed charge coverage ratio must be at least 1.0 to 1.0) and the indenture, and subject to compliance with applicable law. As of December 31, 2013, the Company had approximately \$26.7 million of its net income and retained earnings free of such restrictions.

All obligations under the credit agreement are guaranteed by Murphy USA and the subsidiary guarantors party thereto, and all obligations under the credit agreement, including the guarantees of those obligations, are secured by certain assets of Murphy USA, Murphy Oil USA, Inc. and the guarantors party thereto.

Following the repayment of the remaining \$55 million on our term loan, our contractual debt obligations for the periods “less than one year” and “1-3 years” are each reduced to zero.

### Capital Spending

Capital spending and investments in our Marketing segment relate primarily to the acquisition of land and the construction of new Company stations. Our Marketing capital is also deployed to improve our existing sites, which we refer to as sustaining capital. Beginning in 2013, we began investing in our Corporate segment which is primarily spin-related infrastructure costs that benefit the entire company. We also use sustaining capital in this business as needed to ensure reliability and continued performance of our assets. The following table outlines our capital spending and investments by segment for the three month periods ended September 30, 2014 and 2013:

(Thousands of dollars)	Three Months Ended		Nine Months Ended	
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013
Marketing:				
Company stores	\$ 27,564	\$ 26,052	\$ 72,435	\$ 103,071
Terminals	224	289	655	1,524
Sustaining capital	2,781	5,396	8,665	15,462
Corporate and other assets	1,063	1,666	2,932	8,455
Discontinued operations	—	275	—	476

Total	\$ 31,632	\$ 33,678	\$ 84,687	\$ 128,988
-------	-----------	-----------	-----------	------------

We currently expect capital expenditures for the full year 2014 to be approximately \$130 million to \$150 million, including \$114 million to \$134 million for the retail marketing business, \$7 million for the remaining ethanol facility, \$4 million for product supply and wholesale operations and \$5 million for Corporate and other assets needs. See Note 17 “Commitments” in the audited consolidated financial statements for the year ended December 31, 2013 included in our Annual Report on Form 10-K. Within our retail marketing spending, we anticipate approximately \$20 million to \$25 million will be sustaining capital with the remainder invested in construction of new Company stations. We expect to finance these capital expenditures from cash from operations.

#### Critical Accounting Policies

There has been no material update to our critical accounting policies since our Annual Report on Form 10-K for the year ended December 31, 2013. For more information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations-Critical Accounting Policies” in the Form 10-K.

## FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These statements express management’s current views concerning future events or results, including without limitation our anticipated growth strategy, particularly with respect to our Walmart relationship and plans to build additional sites, and our ability to generate revenues, including the sale of RINs, which are subject to inherent risks and uncertainties. Factors that could cause one or more of these forecasted events not to occur include, but are not limited to, a deterioration in the business or prospects of the U.S. retail marketing business, adverse developments in the U.S. retail marketing business’s markets or adverse developments in the U.S. or global capital markets, credit markets or economies generally, the volatility and level of crude oil, corn and other commodity prices, the volatility and level of gasoline prices, customer demand for our products, disruptions in our relationship with Walmart, political and regulatory developments that may be adverse to us, and uncontrollable natural hazards or any of the other factors set forth under the caption “Risk Factors” in this Quarterly Report and in our Form 10-K. As a result you should not place undue reliance on forward-looking statements. If any of the forecasted events does not occur for any reason, our business, results of operation, cash flows and/or financial condition may be materially adversely affected.

## ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

### Commodity Price Risk

We are exposed to market risks related to the volatility in the price of crude oil, refined products (primarily gasoline and diesel) and grain (primarily corn) used in our operations. These fluctuations can affect our revenues and purchases, as well as the cost of operating, investing and financing activities. We make limited use of derivative instruments to manage certain risks related to commodity prices. The use of derivative instruments for risk management is covered by operating policies and is closely monitored by the Company’s senior management.

As described in Note 10 “Financial Instruments and Risk Management” in the accompanying unaudited consolidated and combined financial statements, there were short-term commodity derivative contracts in place at September 30, 2014 to hedge the purchase price of corn and the sales prices of wet and dried distillers grain at the Company’s remaining ethanol production facility in Hereford, Texas. A 10% increase in the respective benchmark price of the commodities underlying these derivative contracts would have increased the recorded net liability associated with these derivative contracts by approximately \$0.1 million, while a 10% decrease would have increased the recorded net liability by a similar amount. Changes in the fair value of these derivative contracts generally offset the changes in the value for an equivalent volume of these feedstocks.

For additional information about our use of derivative instruments, see Note 13 “Financial Instruments and Risk Management” in our audited combined financial statements for the three year period ended December 31, 2013 included in the Form 10-K and Note 10 “Financial Instruments and Risk Management” in the accompanying unaudited consolidated and combined financial statements for the three months and nine months ended September 30, 2014.

## ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures.

Our management has evaluated, with the participation of our principal executive and financial officers, the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15 under the Securities Exchange Act of 1934) as of the end of the period covered by this report, and has concluded that our disclosure controls and procedures were effective as of September 30, 2014.

## Internal Control over Financial Reporting

The SEC, as required by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules that generally require every company that files reports with the SEC to evaluate its effectiveness of internal controls over financial reporting. Our management is not required to evaluate the effectiveness of our internal controls over financial reporting until the filing of our 2014 Annual Report on Form 10-K based on a transition period established by the SEC rules applicable to new public companies. As a result, this Quarterly Report on Form 10-Q does not address whether there have been any changes in internal control over financial reporting. We intend to include an evaluation of our internal controls over financial reporting in our 2014 Annual Report on Form 10-K.

## PART II – OTHER INFORMATION

### ITEM 1. LEGAL PROCEEDINGS

As of September 30, 2014, the Company was engaged in a number of legal proceedings, all of which the Company considers routine and incidental to its business. See Note 14—Contingencies in the accompanying consolidated and combined financial statements. Based on information currently available to the Company, the ultimate resolution of environmental and legal matters referred to in this Item is not expected to have a material adverse effect on the Company's net income, financial condition or liquidity in a future period.

In the case *Freeny v. Murphy Oil Corporation and Murphy Oil USA, Inc.* the plaintiffs allege that the Company has infringed on their electronic pricing system patent. The Company's claim is that our pricing system can be differentiated and in fact we have our own patent for our pricing system. Murphy Oil USA, Inc. has agreed to defend and indemnify Murphy Oil Corporation in this matter as required by the terms of the Separation Agreement. We are unable to estimate potential damages at this point and we are defending the claim vigorously. Trial is currently set for May 2015. At this time, management believes the probability of loss in this case is remote. However, it is possible that an unfavorable outcome of this lawsuit or other contingency could have a material impact on the liquidity, results of operations, or financial condition of the Company in future periods.

### ITEM 1A. RISK FACTORS

Our business, results of operations, cash flows and financial condition involve various risks and uncertainties. These risk factors are discussed under the caption "Risk Factors" in our Annual Report on Form 10-K. We have not identified any additional risk factors not previously disclosed in the Form 10-K.

ITEM 6. EXHIBITS

The Exhibit Index on page 52 of this Form 10-Q report lists the exhibits that are filed herewith or incorporated herein by reference.
