DANAHER CORPORATION

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

(unaudited)

NOTE 1. GENERAL

The consolidated condensed financial statements included herein have been prepared by Danaher Corporation (the “Company”) without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations; however, the Company believes that the disclosures are adequate to make the information presented not misleading. The condensed financial statements included herein should be read in conjunction with the financial statements as of and for the year ended December 31, 2011 and the Notes thereto included in the Company’s 2011 Annual Report on Form 10-K.

In the opinion of the registrant, the accompanying financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the financial position of the Company as of September 28, 2012 and December 31, 2011, and its results of operations for the three and nine months ended September 28, 2012 and September 30, 2011 and its cash flows for the nine months then ended. Refer to Note 3 for a discussion of the impact on the financial statement presentation resulting from the Company’s sale of its Pacific Scientific Aerospace (“PSA”), Accu-Sort (“ASI”) and Kollmorgen Electro-Optical (“KEO”) businesses.

Other Comprehensive Income - The components of other comprehensive income presented on a pre-tax basis and the associated income tax impact for the three and nine month periods ended September 28, 2012 and September 30, 2011 are summarized below (\$ in millions). Foreign currency translation adjustments are generally not adjusted for income taxes as they relate to indefinite investments in non-U.S. subsidiaries.

Table of Contents

NOTE 2. ACQUISITIONS

The Company continually evaluates potential acquisitions that either strategically fit with the Company's existing portfolio or expand the Company's portfolio into a new and attractive business area. The Company has completed a number of acquisitions that have been accounted for as purchases and have resulted in the recognition of goodwill in the Company's financial statements. This goodwill arises because the purchase prices for these businesses reflect a number of factors including the future earnings and cash flow potential of these businesses; the multiple to earnings, cash flow and other factors at which similar businesses have been purchased by other acquirers; the competitive nature of the process by which the Company acquired the business; and the complementary strategic fit and resulting synergies these businesses bring to existing operations.

The Company makes an initial allocation of the purchase price at the date of acquisition based upon its understanding of the fair value of the acquired assets and assumed liabilities. The Company obtains this information during due diligence and through other sources. In the months after closing, as the Company obtains additional information about these assets and liabilities, including through tangible and intangible asset appraisals, and learns more about the newly acquired business, it is able to refine the estimates of fair value and more accurately allocate the purchase price. Only items identified as of the acquisition date are considered for subsequent adjustment. The Company is continuing to evaluate certain pre-acquisition contingencies associated with certain of its 2012 and 2011 acquisitions and is also in the process of obtaining valuations of acquired intangible assets and certain acquisition related liabilities in connection with these acquisitions. The Company will make appropriate adjustments to the purchase price allocation prior to completion of the measurement period, as required. The Company evaluated whether any adjustments to the prior periods' purchase price allocations were material and concluded no retrospective adjustment to prior financial statements was required.

The following briefly describes the Company's acquisition activity for the nine months ended September 28, 2012. For a description of the Company's acquisition activity for the year ended December 31, 2011, reference is made to Note 2 of the financial statements as of and for the year ended December 31, 2011 and the Notes thereto included in the Company's 2011 Annual Report on Form 10-K.

During the first nine months of 2012, the Company acquired ten businesses for total consideration of \$973 million in cash, net of cash acquired. The businesses acquired manufacture and distribute products and/or provide services that complement existing units of the Industrial Technologies, Life Sciences & Diagnostics, Environmental, Dental and Test & Measurement segments. The aggregate annual sales of the ten businesses acquired at the time of their respective acquisitions, in each case based on the acquired company's revenues for its last completed fiscal year prior to the acquisition, was \$405 million. The Company preliminarily recorded an aggregate of \$566 million of goodwill related to these acquisitions.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition for all acquisitions consummated during the nine months ended September 28, 2012 (\$ in millions):

	Total
Accounts receivable	\$63.5
Inventories	36.2
Property, plant and equipment	11.8
Goodwill	566.0
Other intangible assets, primarily trade names, customer relationships and patents	446.3
In-process research and development	58.1
Accounts payable	(28.8)
Other assets and liabilities, net	(180.3)
Net cash consideration	\$972.8

Table of Contents

Pro Forma Financial Information

The unaudited pro forma information for the periods set forth below gives effect to the 2012 and 2011 acquisitions as if they had occurred as of January 1, 2011. The pro forma information is presented for informational purposes only and is not necessarily indicative of the results of operations that actually would have been achieved had the acquisitions been consummated as of that time (\$ in millions, except per share amounts):

	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
Sales	\$4,416.0	\$ 4,565.8	\$13,440.1	\$ 13,567.1
Net earnings from continuing operations	547.8	588.8	1,672.8	1,453.3
Diluted earnings per share from continuing operations	\$0.77	\$ 0.83	\$2.35	\$ 2.06

NOTE 3. DISCONTINUED OPERATIONS

In January 2012, the Company completed the sale of its ASI business for a sale price of \$132 million in cash. In addition, in February 2012, the Company completed the sale of its KEO business for a sale price of \$205 million in cash. These businesses were part of the Industrial Technologies segment. ASI supplies bar code scanning and dimensional measurement systems and KEO designs, develops, manufactures and integrates highly engineered, stabilized electro-optical/ISR systems that integrate into submarines, surface ships, and combat and ground vehicles. The businesses had combined annual revenues of \$275 million in 2011. The Company recorded an aggregate after-tax gain on the sale of these businesses of \$94 million or \$0.13 per diluted share in its first quarter 2012 results in connection with the closing of these transactions.

In April 2011, the Company completed the divestiture of its PSA business for a sale price of \$680 million in cash. This business, which was also part of the Industrial Technologies segment and supplies safety, security and electric power components to commercial and military aerospace markets globally, had annual revenues of \$377 million in 2010. The Company recorded an after-tax gain on the sale of PSA of \$202 million or \$0.29 per diluted share in its second quarter 2011 results in connection with the closing of the transaction.

The Company has reported the PSA, ASI and KEO businesses as discontinued operations in its consolidated financial statements. Accordingly, the results of operations for all periods presented reflect these businesses as discontinued operations and the assets and liabilities of these businesses have been classified as held for sale for all periods presented. The Company allocated a portion of the consolidated interest expense to discontinued operations based on the ratio of the discontinued businesses' net assets to the Company's consolidated net assets.

The key components of income from discontinued operations were as follows (\$ in millions):

	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
Net sales	\$—	\$ 72.3	\$9.9	\$ 312.2
Operating expenses	—	(59.3)	(11.2)	(266.3)
Allocated interest expense	—	(0.4)	—	(1.6)
Earnings (loss) before income taxes	—	12.6	(1.3)	44.3
Income tax (expense) benefit	—	(4.6)	0.5	(16.2)
Earnings (loss) from discontinued operations	—	8.0	(0.8)	28.1
Gain on sale, net of \$55 million and \$126 million of related income taxes for the nine month periods ended September 28, 2012 and September 30, 2011, respectively	—	—	93.7	201.7
Earnings from discontinued operations, net of income taxes	\$—	\$ 8.0	\$92.9	\$ 229.8

Table of Contents

As of December 31, 2011, the aggregate components of assets and liabilities classified as held-for-sale and included in other current assets and other current liabilities consisted of the following (\$ in millions):

Accounts receivable, net	\$82.7
Inventories	10.5
Prepaid expenses and other	9.3
Property, plant and equipment, net	31.5
Goodwill and other intangibles, net	104.0
Total assets	\$238.0
Accounts payable	\$32.7
Accrued expenses and other	47.8
Total liabilities	\$80.5

NOTE 4. GOODWILL

The following table shows the rollforward of goodwill reflected in the financial statements resulting from the Company's activities during the nine months ended September 28, 2012 (\$ in millions):

Balance, December 31, 2011	\$14,474.3
Attributable to 2012 acquisitions	566.0
Foreign currency translation & other	16.3
Balance, September 28, 2012	15,056.6

The carrying value of goodwill by segment as of September 28, 2012 and December 31, 2011 is summarized as follows (\$ in millions):

Segment	September 28, 2012	December 31, 2011
Test & Measurement	\$3,220.7	\$3,038.0
Environmental	1,476.0	1,449.2
Life Sciences & Diagnostics	5,859.5	5,842.0
Dental	2,134.6	2,122.1
Industrial Technologies	2,365.8	2,023.0
	\$15,056.6	\$14,474.3

Goodwill arises from the purchase price for acquired businesses exceeding the fair value of tangible and intangible assets acquired less assumed liabilities and non-controlling interests. Management assesses the goodwill of each of its reporting units for impairment at least annually at the beginning of the fourth quarter and as "triggering" events occur that indicate that it is more likely than not that an impairment exists. The Company's most recent annual impairment test was performed as of the first day of the Company's fiscal fourth quarter of 2011 and no impairment was identified. Reporting units resulting from recent acquisitions generally present the highest risk of impairment. Management believes the impairment risk associated with these reporting units typically decreases as such businesses are integrated into the Company and positioned for improved future earnings growth. In measuring the fair value of its reporting units, management relies on a number of factors including operating results, business plans, economic projections, anticipated future cash flows and transactions and market place data. The factors used by management in its impairment analysis are inherently subject to uncertainty. While the Company believes it has made reasonable estimates and assumptions to calculate the fair value of its reporting units, if actual results are not consistent with management's estimates and assumptions, goodwill may be overstated and a charge would need to be taken against net earnings.

Table of Contents

NOTE 5. FAIR VALUE MEASUREMENTS

Accounting standards define fair value based on an exit price model, establish a framework for measuring fair value where the Company's assets and liabilities are required to be carried at fair value and provide for certain disclosures related to the valuation methods used within a valuation hierarchy as established within the accounting standards. This hierarchy prioritizes the inputs into three broad levels as follows. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets in markets that are not active, or other observable characteristics for the asset or liability, including interest rates, yield curves and credit risks, or inputs that are derived principally from or corroborated by observable market data through correlation. Level 3 inputs are unobservable inputs based on the Company's assumptions. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

A summary of financial assets and liabilities that are measured at fair value on a recurring basis as of September 28, 2012 and December 31, 2011 were as follows (\$ in millions):

	Quoted Prices in Active Market (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
September 28, 2012:				
Assets:				
Available-for-sale securities	\$402.9	—	—	\$402.9
Liabilities:				
Deferred compensation plans	—	\$ 63.4	—	63.4
Currency swap agreement	—	42.4	—	42.4
December 31, 2011:				
Assets:				
Available-for-sale securities	287.0	—	—	287.0
Liabilities:				
Deferred compensation plans	—	58.2	—	58.2
Currency swap agreement	—	53.9	—	53.9

Available-for-sale securities are measured at fair value using quoted market prices in an active market and included in other long-term assets in the accompanying Consolidated Condensed Balance Sheets.

The Company has established nonqualified deferred compensation programs that permit officers, directors and certain management employees to defer a portion of their compensation, on a pre-tax basis, until their termination of employment (or board service, as applicable). All amounts deferred under this plan are unfunded, unsecured obligations of the Company and are presented as a component of the Company's compensation and benefits accrual included in accrued expenses in the accompanying Consolidated Condensed Balance Sheets. Participants may choose among alternative earning rates for the amounts they defer, which are primarily based on investment options within the Company's 401(k) program (except that the earnings rates for amounts deferred by the Company's directors and amounts contributed unilaterally by the Company are entirely based on changes in the value of the Company's common stock). Changes in the deferred compensation liability under these programs are recognized based on changes in the fair value of the participants' accounts, which are based on the applicable earnings rates.

In connection with the acquisition of Beckman Coulter in June 2011, the Company acquired an existing currency swap agreement. The agreement requires the Company to purchase approximately 184 million Japanese Yen (JPY/¥) at a rate of \$1/¥102.25 on a monthly basis through June 1, 2018. As of September 28, 2012, the aggregate Japanese Yen purchase commitment was approximately ¥12.5 billion (approximately \$160 million based on exchange rates as of September 28, 2012). The currency swap does not qualify for hedge accounting, and as a result changes in the fair

value of the currency swap are reflected in selling, general and administrative expenses in the accompanying Consolidated Condensed Statements of Earnings each reporting period. During the three and nine months ended September 28, 2012, the Company recorded a pre-tax charge of approximately \$2 million and pre-tax income of approximately \$6 million, respectively, related to changes in the fair value of this currency swap. During the three and nine months ended September 30, 2011, the Company recorded a pre-tax charge of approximately \$7 million related to changes in the fair value of this currency swap. The fair value of the currency swap is

Table of Contents

included in other long-term liabilities in the accompanying Consolidated Condensed Balance Sheets. Since there is not an active market for the currency swap, the Company obtains a market quote based on observable inputs, including foreign currency exchange market data, from the swap counterparties to adjust the currency swap to fair value each quarter.

Fair Value of Financial Instruments

In addition to the fair value disclosure requirements related to financial instruments carried at fair value, accounting standards require interim disclosures regarding the fair value of all of the Company's financial instruments. The methods and significant assumptions used to estimate the fair value of financial instruments and any changes in methods or significant assumptions from prior periods are also required to be disclosed.

The fair values and carrying amounts of financial instruments as of September 28, 2012 and December 31, 2011 were as follows (\$ in millions):

	September 28, 2012		December 31, 2011	
	Carrying Amount	Fair Value (1)	Carrying Amount	Fair Value
Assets:				
Available-for-sale securities	\$402.9	\$402.9	\$287.0	\$287.0
Liabilities:				
Short-term borrowings	55.1	55.1	98.4	98.4
Long-term borrowings	4,659.1	5,320.9	5,206.8	5,790.1
Currency swap agreement	42.4	42.4	53.9	53.9

Effective January 1, 2012, the Company is required to disclose, on a prospective basis, the level within the fair value hierarchy at which the fair values of the financial instruments are categorized. As of September 28, 2012, (1) available-for-sale securities and short and long-term borrowings were categorized as level 1, while the currency swap agreement was categorized as level 2.

The fair values of available-for-sale securities and long-term borrowings were computed based on quoted market prices. The differences between the fair value and the carrying amounts of long-term borrowings (other than the Company's Liquid Yield Option Notes due 2021 (the "LYONs")) are attributable to changes in interest rates and/or the Company's credit ratings subsequent to the incurrence of the borrowing. In the case of the LYONs, differences in the fair value from the carrying value are attributable to changes in the price of the Company's common stock due to the LYONs' conversion features. The available-for-sale securities represent the Company's investment in marketable securities that are accounted for at fair value. The currency swap agreement is accounted for at fair value based on a market quote obtained from the swap counterparties on a quarterly basis. The fair values of short-term borrowings, as well as, cash and cash equivalents, trade accounts receivable, net, and trade accounts payable approximate the carrying amounts due to the short-term maturities of these instruments.

Table of Contents

NOTE 6. FINANCING TRANSACTIONS

As of September 28, 2012, the Company was in compliance with all of its debt covenants. The components of the Company's debt as of September 28, 2012 and December 31, 2011 were as follows (\$ in millions):

	September 28, 2012	December 31, 2011
U.S. dollar-denominated commercial paper	\$537.5	\$977.3
4.5% guaranteed Eurobond notes due 2013 (€500 million)	642.4	647.3
Floating rate senior notes due 2013	300.0	300.0
1.3% senior notes due 2014	400.0	400.0
2.3% senior notes due 2016	500.0	500.0
5.625% senior notes due 2018	500.0	500.0
5.4% senior notes due 2019	750.0	750.0
3.9% senior notes due 2021	600.0	600.0
Zero-coupon LYONs due 2021	292.7	379.6
Other	191.6	251.0
Subtotal	4,714.2	5,305.2
Less – currently payable	55.1	98.4
Long-term debt	\$4,659.1	\$5,206.8

For a full description of the Company's debt financing, reference is made to Note 10 of the Company's financial statements as of and for the year ended December 31, 2011 included in the Company's 2011 Annual Report on Form 10-K.

During the nine months ended September 28, 2012, holders of certain of the Company's LYONs converted such LYONs into an aggregate of approximately 3.3 million shares of the Company's common stock, par value \$0.01 per share. The Company's deferred tax liability associated with the book and tax basis difference in the converted LYONs of approximately \$28 million was transferred to additional paid-in capital as a result of the conversions.

The Company primarily satisfies any short-term liquidity needs that are not met through operating cash flow and available cash through issuances of commercial paper under its U.S. and Euro commercial paper programs. As of September 28, 2012, borrowings outstanding under the Company's U.S. commercial paper program had a weighted average interest rate of 0.2% and a weighted average maturity of approximately twenty days. There was no commercial paper outstanding under the Euro commercial paper program as of September 28, 2012. The Company classified its borrowings outstanding under the commercial paper programs as of September 28, 2012, as well as its floating rate senior notes due in June 2013 and its Eurobond notes due in July 2013, as long-term debt in the accompanying Consolidated Condensed Balance Sheet as the Company had the intent and ability, as supported by availability under the Credit Facility referenced below, to refinance these borrowings for at least one year from the balance sheet date.

Credit support for the commercial paper program is provided by a \$2.5 billion unsecured multi-year revolving credit facility with a syndicate of banks that expires on July 15, 2016 (the "Credit Facility"). The Credit Facility can also be used for working capital and other general corporate purposes. As of September 28, 2012, no borrowings were outstanding under the Credit Facility and the Company was in compliance with all covenants under the facility. In addition to the Credit Facility, the Company has entered into reimbursement agreements with various commercial banks to support the issuance of letters of credit.

NOTE 7. DEFINED BENEFIT PLANS

The following sets forth the components of the Company's net periodic benefit cost of the non-contributory defined benefit plans (\$ in millions):

U.S. Pension Benefits

	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
Service cost	\$1.3	\$5.7	\$4.3	\$8.9
Interest cost	26.0	28.1	75.8	62.7
Expected return on plan assets	(32.8)) (34.9) (97.2) (79.7
Amortization of actuarial loss	12.7	7.3	31.7	21.9
Net periodic cost	\$7.2	\$6.2	\$14.6	\$13.8

Non-U.S. Pension Benefits

	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
Service cost	\$5.9	\$5.5	\$17.5	\$11.9
Interest cost	10.7	11.7	32.2	28.1
Expected return on plan assets	(8.1)) (8.5) (24.4) (18.9
Amortization of actuarial loss	1.1	0.8	3.4	2.4
Amortization of prior service costs	(0.1)) (0.1) (0.3) (0.2
Settlement losses (gains) recognized	—	—	0.9	(0.3
Net periodic cost	\$9.5	\$9.4	\$29.3	\$23.0

The following sets forth the components of the Company's net periodic benefit cost of the other post-retirement employee benefit plans (\$ in millions):

	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
Service cost	\$0.3	\$0.5	\$1.3	\$1.1
Interest cost	2.4	3.1	7.8	6.1
Amortization of prior service credits	(1.4)) (1.6) (4.2) (4.4
Amortization of actuarial loss	0.4	1.1	2.4	2.9
Net periodic cost	\$1.7	\$3.1	\$7.3	\$5.7

Employer Contributions

During 2012, the Company's cash contribution requirements for its U.S. defined benefit pension plan are not expected to be significant. The Company's cash contribution requirements for its non-U.S. defined benefit pension plans are expected to be approximately \$50 million, although the ultimate amounts to be contributed to the U.S. and non-U.S. plans depend upon, among other things, legal requirements, underlying asset returns, the plan's funded status, the anticipated tax deductibility of the contribution, local practices, market conditions, interest rates and other factors.

Table of Contents**NOTE 8. STOCK TRANSACTIONS AND STOCK-BASED COMPENSATION**

In May 2012, the Company's shareholders approved an amendment to the Company's Restated Certificate of Incorporation to increase the number of authorized shares of common stock of the Company from 1 billion shares to 2 billion shares, \$0.01 par value per share, which was filed and became effective on May 10, 2012.

On May 11, 2010, the Company's Board of Directors (the "Board") authorized the repurchase of up to 20 million shares of the Company's common stock from time to time on the open market or in privately negotiated transactions. There is no expiration date for the Company's repurchase program. The timing and amount of any shares repurchased will be determined by the Company's management based on its evaluation of market conditions and other factors. The repurchase program may be suspended or discontinued at any time. Any repurchased shares will be available for use in connection with the Company's equity compensation plans (or any successor plan) and for other corporate purposes.

Pursuant to the stock repurchase program, during the three months ended September 28, 2012, the Company repurchased approximately 5 million shares of Company common stock in open market transactions at a cost of \$258 million. At September 28, 2012, the Company had approximately 15 million shares remaining for stock repurchases under the existing Board authorization.

The Company accounts for stock-based compensation by measuring the cost of employee services received in exchange for all equity awards granted, including stock options, restricted stock units ("RSUs") and restricted shares, based on the fair value of the award as of the grant date. The Company recognizes the compensation expense over the requisite service period, which is generally the vesting period. The fair value for RSU and restricted stock awards is calculated using the closing price of the Company's common stock on the date of grant. The fair value of the options granted is calculated using a Black-Scholes Merton option pricing model ("Black-Scholes").

For a full description of the Company's stock-based compensation, reference is made to Note 17 of the Company's financial statements as of and for the year ended December 31, 2011 included in the Company's 2011 Annual Report on Form 10-K. As of September 28, 2012, approximately 16 million shares of the Company's common stock were reserved for issuance under the 2007 Stock Incentive Plan.

The following summarizes the assumptions used in the Black-Scholes model to value options granted during the nine months ended September 28, 2012:

Risk-free interest rate	0.7 – 1.7%
Weighted average volatility	30.4%
Dividend yield	0.2%
Expected years until exercise	6.0 to 8.5

The Black-Scholes model incorporates assumptions to value stock-based awards. The risk-free rate of interest for periods within the contractual life of the option is based on a zero-coupon U.S. government instrument whose maturity period equals or approximates the option's expected term. Expected volatility is based on implied volatility from traded options on the Company's stock and historical volatility of the Company's stock. The dividend yield is calculated by dividing the Company's annual dividend, based on the most recent quarterly dividend rate, by the closing stock price on the grant date. To estimate the option exercise timing to be used in the valuation model, in addition to considering the vesting period and contractual term of the option, the Company analyzes and considers actual historical exercise data for previously granted options. The Company stratifies its employee population into multiple groups for option valuation and attribution purposes based upon distinctive patterns of forfeiture rates and option holding periods. The amount of stock-based compensation expense recognized during a period is also based on the portion of the awards that are ultimately expected to vest. The Company estimates pre-vesting forfeitures at the time of grant by analyzing historical data and revises those estimates in subsequent periods if actual forfeitures differ from those estimates. Ultimately, the total expense recognized over the vesting period will equal the fair value of awards as of the grant date that actually vest.

Table of Contents

The following table summarizes the components of the Company's stock-based compensation program recorded as expense (\$ in millions):

	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
RSUs and restricted shares:				
Pre-tax compensation expense	\$ 16.0	\$ 13.6	\$ 43.2	\$ 34.0
Income tax benefit	(4.9)) (5.1)) (14.1)) (12.7)
RSU and restricted share expense, net of income taxes	\$ 11.1	\$ 8.5	\$ 29.1	\$ 21.3
Stock options:				
Pre-tax compensation expense	\$ 13.0	\$ 12.1	\$ 36.2	\$ 37.6
Income tax benefit	(4.0)) (3.6)) (11.0)) (10.9)
Stock option expense, net of income taxes	\$ 9.0	\$ 8.5	\$ 25.2	\$ 26.7
Total stock-based compensation expense:				
Pre-tax compensation expense	\$ 29.0	\$ 25.7	\$ 79.4	\$ 71.6
Income tax benefit	(8.9)) (8.7)) (25.1)) (23.6)
Total stock-based compensation expense, net of income taxes	\$ 20.1	\$ 17.0	\$ 54.3	\$ 48.0

Stock-based compensation has been recognized as a component of selling, general and administrative expenses in the accompanying Consolidated Condensed Statements of Earnings. As of September 28, 2012, \$145 million of total unrecognized compensation cost related to RSUs and restricted shares is expected to be recognized over a weighted average period of approximately two years. As of September 28, 2012, \$141 million of total unrecognized compensation cost related to stock options is expected to be recognized over a weighted average period of approximately two years. Both amounts will be adjusted for any future changes in estimated forfeitures.

Option activity under the Company's stock plans during the nine months ended September 28, 2012 was as follows (in thousands; except exercise price and number of years):

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in Years)	Aggregate Intrinsic Value
Outstanding as of December 31, 2011	32,454	\$32.98		
Granted	3,939	\$52.20		
Exercised	(5,903)) \$25.32		
Cancelled / forfeited	(979)) \$39.86		
Outstanding as of September 28, 2012	29,511	\$36.85	6	\$540,044
Vested and Expected to Vest as of September 28, 2012 (1)	28,656	\$36.56	6	\$532,836
Exercisable as of September 28, 2012	16,745	\$31.81	4	\$390,864

(1) The "Expected to Vest" options are the net unvested options that remain after applying the pre-vesting forfeiture rate assumption to total unvested options.

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the Company's closing stock price on the last trading day of the third quarter of 2012 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on September 28, 2012. The amount of aggregate intrinsic value will change based on the price

of the Company's common stock.

15

Table of Contents

The aggregate intrinsic value of options exercised during the nine months ended September 28, 2012 and September 30, 2011 was \$161 million and \$73 million, respectively. Exercise of options during the first nine months of 2012 and 2011 resulted in cash receipts of \$146 million and \$76 million, respectively. The Company realized a tax benefit of approximately \$10 million and \$54 million in the three and nine months ended September 28, 2012, respectively, related to the exercise of employee stock options. The net income tax benefit in excess of the expense recorded for financial reporting purposes (the “excess tax benefit”) has been recorded as an increase to additional paid-in capital. Excess tax benefits related to all equity awards are reflected as financing cash inflows in the accompanying Consolidated Condensed Statements of Cash Flows.

The following table summarizes information on unvested RSUs and restricted shares activity during the nine months ended September 28, 2012:

	Number of RSUs / Restricted Shares (in thousands)	Weighted-Average Grant-Date Fair Value
Unvested as of December 31, 2011	5,979	\$ 37.72
Granted	1,639	\$ 52.15
Vested	(1,553)	\$ 33.26
Forfeited	(393)	\$ 39.45
Unvested as of September 28, 2012	5,672	\$ 42.99

The Company realized a tax benefit of approximately \$6 million and \$28 million in the three and nine months ended September 28, 2012, respectively, related to the vesting of RSUs. The excess tax benefits attributable to RSUs and restricted stock have been recorded as an increase to additional paid-in capital.

In connection with the exercise of certain stock options and the vesting of RSUs and restricted shares previously issued by the Company, a number of shares sufficient to fund minimum tax withholding requirements has been withheld from the total shares issued or released to the award holder (though under the terms of the applicable plan, the shares are considered to have been issued and are not added back to the pool of shares available for grant). During the first nine months of 2012, approximately 1 million shares with an aggregate value of approximately \$62 million were withheld to satisfy the requirement. The withholding is treated as a reduction in additional paid-in capital in the accompanying Consolidated Condensed Statement of Stockholders’ Equity.

NOTE 9. RESTRUCTURING AND OTHER RELATED CHARGES

During 2011, the Company recorded pre-tax restructuring and other related charges totaling \$179 million. These costs were incurred to position the Company to provide superior products and services to its customers in a cost efficient manner, and in light of the uncertain macro-economic environment. For a full description of the Company’s restructuring activities, reference is made to Note 18 of the Company’s financial statements as of and for the year ended December 31, 2011 included in the Company’s 2011 Annual Report on Form 10-K.

Substantially all restructuring activities initiated in 2011 were completed by December 31, 2011. The Company expects substantially all cash payments associated with remaining termination benefits will be paid during 2012. The table below summarizes the accrual balance and utilization by type of restructuring cost associated with the 2011 actions (\$ in millions):

	Balance as of December 31, 2011	Paid/ Settled	Balance as of September 28, 2012
Restructuring Charges:			
Employee severance and related	\$116.7	\$(96.0)	\$20.7
Facility exit and related	7.5	(5.8)	1.7
	\$124.2	\$(101.8)	\$22.4

NOTE 10. CONTINGENCIES

For a description of the Company's litigation and contingencies, reference is made to Note 14 of the Company's financial statements as of and for the year ended December 31, 2011 included in the Company's 2011 Annual Report on Form 10-K.

The Company generally accrues estimated warranty costs at the time of sale. In general, manufactured products are warranted

Table of Contents

against defects in material and workmanship when properly used for their intended purpose, installed correctly and appropriately maintained. Warranty period terms depend on the nature of the product and range from ninety days up to the life of the product. The amount of the accrued warranty liability is determined based on historical information such as past experience, product failure rates or number of units repaired, estimated cost of material and labor, and in certain instances estimated property damage. The accrued warranty liability is reviewed on a quarterly basis and may be adjusted as additional information regarding expected warranty costs becomes known.

In certain cases, the Company will sell extended warranty or maintenance agreements. The proceeds from these agreements is deferred and recognized as revenue over the term of the agreement.

The following is a rollforward of the Company's accrued warranty liability for the nine months ended September 28, 2012 (\$ in millions):

Balance, December 31, 2011	\$ 136.9
Accruals for warranties issued during the period	93.3
Settlements made	(98.3)
Additions due to acquisitions	2.2
Effect of foreign currency translation	0.1
Balance, September 28, 2012	\$ 134.2

NOTE 11. NET EARNINGS PER SHARE FROM CONTINUING OPERATIONS

Basic net earnings per share ("EPS") from continuing operations is calculated by dividing net earnings from continuing operations by the weighted-average number of common shares outstanding for the applicable period. Diluted net EPS from continuing operations is computed based on the weighted average number of common shares outstanding increased by the number of additional shares that would have been outstanding had the potentially dilutive common shares been issued and reduced by the number of shares the Company could have repurchased with the proceeds from the issuance of the potentially dilutive shares. For the three and nine months ended September 28, 2012, approximately 2 million options to purchase shares were not included in the diluted earnings per share calculation as the impact of their inclusion would have been anti-dilutive. For the three and nine months ended September 30, 2011, approximately 3 million and 2 million options to purchase shares, respectively, were not included in the diluted earnings per share calculation as the impact of their inclusion would have been anti-dilutive.

Information related to the calculation of net earnings from continuing operations per share of common stock is summarized as follows (\$ and shares in millions, except per share amounts):

	Net Earnings From Continuing Operations (Numerator)	Shares (Denominator)	Per Share Amount
For the Three Months Ended September 28, 2012:			
Basic EPS	\$ 548.7	695.2	\$0.79
Adjustment for interest on convertible debentures	1.4	—	
Incremental shares from assumed exercise of dilutive options and vesting of dilutive RSUs	—	8.4	
Incremental shares from assumed conversion of the convertible debentures	—	10.3	
Diluted EPS	\$ 550.1	713.9	\$0.77
For the Three Months Ended September 30, 2011:			
Basic EPS	\$ 515.4	687.3	\$0.75
Adjustment for interest on convertible debentures	1.6	—	
	—	9.4	

Incremental shares from assumed exercise of dilutive options and
vesting of dilutive RSUs

Incremental shares from assumed conversion of the convertible
debentures

	—	13.7	
Diluted EPS	\$ 517.0	710.4	\$0.73

17

Table of Contents

	Net Earnings From Continuing Operations (Numerator)	Shares (Denominator)	Per Share Amount
For the Nine Months Ended September 28, 2012:			
Basic EPS	\$ 1,668.9	694.1	\$2.40
Adjustment for interest on convertible debentures	4.4	—	
Incremental shares from assumed exercise of dilutive options and vesting of dilutive RSUs	—	9.9	
Incremental shares from assumed conversion of the convertible debentures	—	10.3	
Diluted EPS	\$ 1,673.3	714.3	\$2.34
For the Nine Months Ended September 30, 2011:			
Basic EPS	\$ 1,371.7	672.0	\$2.04
Adjustment for interest on convertible debentures	5.4	—	
Incremental shares from assumed exercise of dilutive options and vesting of dilutive RSUs	—	12.1	
Incremental shares from assumed conversion of the convertible debentures	—	13.7	
Diluted EPS	\$ 1,377.1	697.8	\$1.97

NOTE 12. SEGMENT INFORMATION

The Company operates and reports its results in five separate business segments consisting of the Test & Measurement, Environmental, Life Sciences & Diagnostics, Dental and Industrial Technologies segments. The Company's equity in earnings of the Apex joint venture is shown separately in the Company's segment disclosures. There has been no material change in total assets or liabilities by segment since December 31, 2011, except for the sale of the ASI and KEO businesses from the Industrial Technologies segment in January and February 2012, respectively.

Segment results are shown below (\$ in millions):

Sales

NOTE 13. SUBSEQUENT EVENT

In 2010, the Company entered into a joint venture with Cooper Industries, plc (“Cooper”), combining certain of the Company's hand tool businesses with Cooper's Tools business to form a new entity called Apex Tool Group, LLC (“Apex”). Each of Cooper and the Company owns a 50% interest in Apex. In October 2012, the Company and Cooper signed a definitive agreement to sell Apex for approximately \$1.6 billion. The Company expects to realize after-tax net proceeds of approximately \$650 million from the sale. The closing of the sale is subject to customary conditions, including regulatory approvals. The parties currently expect that the transaction will close in the first half of 2013.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is designed to provide a reader of Danaher Corporation's ("Danaher", the "Company", "we", "us" or "our") financial statements with a narrative from the perspective of Company management. The Company's MD&A is divided into four main sections:

Information Relating to Forward-Looking Statements

Overview

Results of Operations

Liquidity and Capital Resources

You should read this discussion along with the Company's MD&A and audited financial statements as of and for the year ended December 31, 2011 and Notes thereto, included in the Company's 2011 Annual Report on Form 10-K, and the Company's Consolidated Condensed Financial Statements and related Notes included in the Company's Quarterly Report on Form 10-Q for the quarter ended September 28, 2012.

INFORMATION RELATING TO FORWARD-LOOKING STATEMENTS

Certain information included or incorporated by reference in this quarterly report, in other documents filed with or furnished by us to the Securities and Exchange Commission ("SEC"), in our press releases or in our other communications may be deemed to be "forward-looking statements" within the meaning of the federal securities laws. All statements other than historical factual information are forward-looking statements, including without limitation statements regarding: projections of revenue, expenses, profit, profit margins, tax rates, tax provisions, cash flows, pension and benefit obligations and funding requirements, our liquidity position or other financial measures; management's plans and strategies for future operations, including statements relating to anticipated operating performance, cost reductions, restructuring activities, new product and service developments, competitive strengths or market position, acquisitions and related synergies, divestitures, securities offerings, stock repurchases and executive compensation; growth, declines and other trends in markets we sell into; the anticipated impact of adopting new accounting pronouncements; the anticipated outcome of outstanding claims, legal proceedings, tax audits and other contingent liabilities; foreign currency exchange rates and fluctuations in those rates; general economic conditions; assumptions underlying any of the foregoing; and any other statements that address events or developments that Danaher intends or believes will or may occur in the future. Terminology such as "believe," "anticipate," "should," "could," "intend," "plan," "expects," "estimates," "projects," "may," "possible," "potential," "forecast" and "positioned" and similar references to future periods are intended to identify forward-looking statements, although not all forward-looking statements are accompanied by such words.

Forward-looking statements are based on assumptions and assessments made by our management in light of their experience and perceptions of historical trends, current conditions, expected future developments and other factors they believe to be appropriate. Forward-looking statements are not guarantees of future performance and actual results may differ materially from those envisaged by such forward-looking statements. Accordingly, you should not place undue reliance on any such forward-looking statements. Important factors that could cause actual results to differ materially from those envisaged in the forward-looking statements include the following:

- Deterioration of, or instability in, the global economy and financial markets, including in Europe, may adversely affect our business and financial statements.

- The restructuring actions that we have taken to reduce costs could have long-term adverse effects on our business. Our growth could suffer if the markets into which we sell our products decline, do not grow as anticipated or experience cyclical.

- We face intense competition and if we are unable to compete effectively, we may experience decreased demand and market share and price reductions for our products.

- Our growth depends in part on the timely development and commercialization, and customer acceptance, of new products and product enhancements based on technological innovation.

- Our reputation, ability to do business and financial statements may be impaired by improper conduct by any of our employees, agents or business partners.

Any inability to consummate acquisitions at our historical rate and at appropriate prices could negatively impact our growth rate and stock price.

Our acquisition of businesses, including our continuing integration of Beckman Coulter, Inc. (“Beckman Coulter”) which we acquired in June 2011, could negatively impact our financial statements.

The indemnification provisions of acquisition agreements by which we have acquired companies may not fully protect us and may result in unexpected liabilities.

Divestitures could negatively impact our business and contingent liabilities from businesses that we have sold could adversely affect our financial statements.

Certain of our businesses are subject to extensive regulation by the U.S. Food and Drug Administration (“FDA”) and

Table of Contents

by comparable agencies of other countries, as well as laws regulating fraud and abuse in the healthcare industry and the privacy and security of health information. Failure to comply with those regulations or laws could adversely affect our reputation and financial statements.

The healthcare industry and related industries that we serve have undergone, and are in the process of undergoing, significant changes in an effort to reduce costs, which could adversely affect our financial statements.

Our operations, products and services expose us to the risk of environmental, health and safety liabilities, costs and violations that could adversely affect our financial statements and reputation.

Our businesses are subject to extensive regulation; failure to comply with those regulations could adversely affect our financial statements and reputation.

We may be required to recognize impairment charges for our goodwill and other intangible assets.

Foreign currency exchange rates may adversely affect our financial statements.

Changes in our tax rates or exposure to additional tax liabilities could affect our profitability. In addition, audits by tax authorities could result in additional tax payments for prior periods.

We are subject to a variety of litigation and similar proceedings in the course of our business that could adversely affect our financial statements.

If we do not or cannot adequately protect our intellectual property, or if third parties infringe our intellectual property rights, we may suffer competitive injury or expend significant resources enforcing our rights.

Third parties may claim that we are infringing or misappropriating their intellectual property rights and we could suffer significant litigation expenses, losses or licensing expenses or be prevented from selling products or services.

Product defects and unanticipated use or inadequate disclosure with respect to our products could adversely affect our business, reputation and financial statements.

Our indebtedness may limit our operations and our use of our cash flow, and any failure to comply with the covenants that apply to our indebtedness could adversely affect our liquidity and financial condition.

Adverse changes in our relationships with, or the financial condition, performance or purchasing patterns of, key distributors and other channel partners could adversely affect our financial statements.

We may incur higher costs to produce our products if commodity prices rise.

If we cannot adjust the purchases required for our manufacturing activities to reflect changing market conditions or customer demand, our profitability may suffer. In addition, our reliance upon sole sources of supply for certain materials and components could cause production interruptions, delays and inefficiencies.

If we cannot adjust our manufacturing capacity to reflect the demand for our products, our profitability may suffer.

Changes in governmental regulations may reduce demand for our products or increase our expenses.

Work stoppages, union and works council campaigns, labor disputes and other matters associated with our labor force could adversely impact our productivity and results of operations.

International economic, political, legal and business factors could negatively affect our financial statements.

If we suffer loss to our facilities, distribution systems or information technology systems due to catastrophe, attacks or other events our operations could be seriously harmed.

Our defined benefit pension plans are subject to financial market risks that could adversely affect our financial statements.

We own a 50% interest in but do not control the Apex Tool Group joint venture, and as a result we may not be able to direct management of the joint venture in a manner that we believe is in Danaher's best interests.

See Part I – Item 1A of the Company's 2011 Annual Report on Form 10-K for a further discussion regarding reasons that actual results may differ materially from the results, developments and business decisions contemplated by our forward-looking statements. Forward-looking statements speak only as of the date of the report, document, press release or other communication in which they are made. We do not assume any obligation to update or revise any forward-looking statement, whether as a result of new information, future events and developments or otherwise.

Table of Contents

OVERVIEW

General

As a result of the Company's geographic and industry diversity, the Company faces a variety of opportunities and challenges, including rapid technological development in most of the Company's served markets, the expansion of opportunities in emerging markets, trends toward increased utilization of the global labor force and consolidation of the Company's competitors. The Company operates in a highly competitive business environment in most markets, and the Company's long-term growth and profitability will depend in particular on its ability to expand its business in high-growth geographies and high-growth product segments, identify, consummate and integrate appropriate acquisitions, develop innovative new products and services with higher gross profit margins, expand and improve the effectiveness of the Company's sales force and continue to reduce costs and improve operating efficiency and quality. The Company is making significant investments, organically and through acquisitions, to address the rapid pace of technological change in its served markets and to globalize its manufacturing, research and development and customer-facing resources (particularly in emerging markets such as China, India, Brazil and the Middle East) in order to be responsive to the Company's customers throughout the world and improve the efficiency of the Company's operations.

Business Performance and Outlook

While differences exist among the Company's businesses, on an overall basis, demand for the Company's products and services resulted in aggregate year-over-year sales growth from existing businesses during the third quarter of 2012 driven by the Company's previous and continuing investments in sales growth initiatives and the other business-specific factors discussed below. The overall year-over-year decline in reported sales is largely due to the impact of currency translation. Geographically, year-over-year sales growth rates during the third quarter of 2012 were led primarily by the emerging markets, primarily China, Latin America and the Middle East. Sales in the United States were down slightly and sales in Western Europe contracted at a mid-single digit rate during the quarter. In light of the uncertainties in the macro-economic environment and consistent with the Company's approach of positioning itself to provide superior products and services to its customers in a cost efficient manner, on July 18, 2012, Danaher's Board of Directors committed to a plan to implement cost reductions in the Company's businesses. The plan, which is expected to be substantially completed by December 31, 2012, is expected to result in pre-tax charges of approximately \$120 million, the majority of which are expected to be incurred in the fourth quarter of 2012. The charges, all of which are expected to result in cash expenditure, are expected to include both employee-related costs as well as other termination and exit costs.

The acquisition of Beckman Coulter in June 2011 provides additional sales and earnings growth opportunities for the Company's Life Sciences & Diagnostics segment by expanding the businesses' geographic and product line breadth, including new and complementary product and service offerings in the areas of clinical diagnostics and life sciences research, and through the potential acquisition of complementary businesses. As Beckman Coulter continues to be integrated into the Company, the Company is also realizing significant cost synergies through the application of the Danaher Business System and the combined purchasing power of the Company and Beckman Coulter. For a discussion of the acquisition's impact on the Company and segment results, refer to the "Results of Operations" section of this MD&A.

Acquisitions and Divestitures

During the first nine months of 2012, the Company acquired ten businesses for total consideration of \$973 million in cash, net of cash acquired. The businesses acquired manufacture and distribute products and/or provide services that complement existing units of the Industrial Technologies, Life Sciences & Diagnostics, Environmental, Dental and Test & Measurement segments. The aggregate annual sales of the ten businesses acquired at the time of their respective acquisitions, in each case based on the acquired company's revenues for its last completed fiscal year prior to the acquisition, were \$405 million.

In January 2012, the Company completed the sale of its integrated scanning system business (the Accu-Sort ("ASI") business) for a sale price of \$132 million in cash. In addition, in February 2012, the Company completed the sale of its Kollmorgen Electro-Optical ("KEO") business for a sale price of \$205 million in cash. These businesses were part of the Industrial Technologies segment. ASI supplies bar code scanning and dimensional measurement systems and KEO

designs, develops, manufactures and integrates highly engineered, stabilized electro-optical/ISR systems that integrate into submarines, surface ships, and combat and ground vehicles. The businesses had combined annual revenues of \$275 million in 2011. The Company recorded an aggregate after-tax gain on the sale of these businesses of \$94 million or \$0.13 per diluted share in its first quarter 2012 results in connection with the closing of these transactions. The Company has reported the ASI and KEO businesses, along with the Pacific Scientific Aerospace ("PSA") business which was sold in April 2011, as discontinued operations in its consolidated financial statements. Accordingly, the results of operations for all periods presented have been reclassified to reflect these businesses as discontinued operations and the assets

Table of Contents

and liabilities of these businesses have been reclassified as held for sale for all periods presented.

Pending Sale of Investment in Joint Venture

In 2010, the Company entered into a joint venture with Cooper Industries, plc (“Cooper”), combining certain of the Company's hand tool businesses with Cooper's Tools business to form a new entity called Apex Tool Group, LLC (“Apex”). Each of Cooper and the Company owns a 50% interest in Apex. In October 2012, the Company and Cooper signed a definitive agreement to sell Apex for approximately \$1.6 billion. The Company expects to realize after-tax net proceeds of approximately \$650 million from the sale. The closing of the sale is subject to customary conditions, including regulatory approvals. The parties currently expect that the transaction will close in the first half of 2013.

Currency Exchange Rates

On average, the U.S. dollar was stronger against other major currencies during the three and nine month periods ended September 28, 2012 as compared to the comparable periods of 2011. As a result, currency exchange rates negatively impacted reported sales for the three and nine month periods by approximately 3.0% and 2.5%, respectively, as compared to the comparable periods of 2011. If the currency exchange rates in effect as of September 28, 2012 were to prevail throughout the remainder of 2012, currency exchange rates would result in the reduction of the Company's estimated 2012 revenues by approximately 2.0% on a year-over-year basis. Further strengthening of the U.S. dollar against other major currencies would further adversely impact the Company's sales for the remainder of the year. Weakening of the U.S. dollar against other major currencies would positively impact the Company's sales on an overall basis.

RESULTS OF OPERATIONS

Consolidated sales for the three months ended September 28, 2012 declined 0.5% compared to the three months ended September 30, 2011. Sales from existing businesses contributed 1.0% growth and sales from acquired businesses contributed 1.5% growth on a year-over-year basis. Currency translation reduced reported sales by 3.0% on a year-over-year basis.

Consolidated sales for the nine months ended September 28, 2012 increased 17.0% compared to the nine months ended September 30, 2011. Sales from existing businesses contributed 2.0% growth and sales from acquired businesses contributed 17.5% growth on a year-over-year basis. Currency translation reduced reported sales by 2.5% on a year-over-year basis.

In this report, references to sales from existing businesses refers to sales calculated according to generally accepted accounting principles in the United States (“GAAP”) but excluding (1) sales from acquired businesses and (2) the impact of currency translation. References to sales or operating profit attributable to acquisitions or acquired businesses refer to GAAP sales or operating profit, as applicable, from acquired businesses recorded prior to the first anniversary of the acquisition less the impact from the divestiture of a product line, the sales from which (prior to the divestiture) were included in sales from acquired businesses. The portion of revenue attributable to currency translation is calculated as the difference between (a) the period-to-period change in revenue (excluding sales from acquired businesses) and (b) the period-to-period change in revenue (excluding sales from acquired businesses) after applying current period foreign exchange rates to the prior year period. Sales from existing businesses should be considered in addition to, and not as a replacement for or superior to, sales, and may not be comparable to similarly titled measures reported by other companies. Management believes that reporting the non-GAAP financial measure of sales from existing businesses provides useful information to investors by helping identify underlying growth trends in our business and facilitating comparisons of our revenue performance with prior and future periods and to our peers. The Company excludes the effect of currency translation from sales from existing businesses because currency translation is not under management's control, is subject to volatility and can obscure underlying business trends, and excludes the effect of acquisitions and related items because the nature, size and number of acquisitions can vary dramatically from period to period and between the Company and its peers and can also obscure underlying business trends and make comparisons of long-term performance difficult.

Operating profit margins were 17.1% for the three months ended September 28, 2012 compared to 14.5% in the comparable period of 2011. Year-over-year operating profit margin comparisons benefited 100 basis points from the favorable impact of incremental year-over-year cost savings associated with continuing productivity improvement

initiatives including the restructuring actions taken in the fourth quarter of 2011, net of incremental year-over-year costs associated with various sales, marketing and product development growth investments. In addition, acquisition related charges recorded in 2011 associated with the Beckman Coulter acquisition, including transaction costs, change in control charges and fair value adjustments to inventory and deferred revenue balances favorably impacted year-over-year operating profit margin comparisons by 210 basis points. The dilutive effect of acquisitions adversely impacted operating profit margin comparisons by 50 basis points and partially offset these positive factors.

Table of Contents

Operating profit margins were 17.3% for the nine months ended September 28, 2012 compared to 16.2% in the comparable period of 2011. Year-over-year operating profit margin comparisons benefited 90 basis points from the favorable impact of higher sales volumes and incremental year-over-year cost savings associated with continuing productivity improvement initiatives including the restructuring actions taken in the fourth quarter of 2011, net of incremental year-over-year costs associated with various sales, marketing and product development growth investments. In addition, acquisition related charges recorded in 2011 associated with the Beckman Coulter acquisition, including transaction costs, change in control charges and fair value adjustments to acquisition related inventory and deferred revenue balances favorably impacted year-over-year operating profit margin comparisons by 125 basis points. During the nine months ended September 28, 2012, the Company also recognized a gain relating to the resolution of contingencies with respect to a prior disposition of assets which favorably impacted operating profit margin comparisons by 10 basis points. The dilutive effect of acquisitions adversely impacted operating profit margin comparisons by 115 basis points and partially offset these positive factors.

Business Segments

The following table summarizes sales by business segment for each of the periods indicated (\$ in millions):

	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
Test & Measurement	\$814.5	\$856.7	\$2,517.3	\$2,535.4
Environmental	754.4	734.6	2,212.9	2,133.2
Life Sciences & Diagnostics	1,518.1	1,567.4	4,647.4	2,898.8
Dental	488.9	492.6	1,452.4	1,460.8
Industrial Technologies	839.6	794.5	2,455.2	2,345.7
Total	\$4,415.5	\$4,445.8	\$13,285.2	\$11,373.9

TEST & MEASUREMENT

The Company's Test & Measurement segment is a leading global provider of electronic measurement instruments and monitoring, management and optimization tools for communications and enterprise networks and related services. The segment's products are used in the design, development, manufacture, installation, deployment and operation of electronics equipment and communications networks and services. Customers for these products and services include manufacturers of electronic instruments; service, installation and maintenance professionals; manufacturers who design, develop, manufacture and install network equipment; and service providers who implement, maintain and manage communications networks and services. Also included in the Test & Measurement segment are the Company's mobile tool and wheel service businesses.

Test & Measurement Selected Financial Data (\$ in millions):

	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
Sales	\$814.5	\$856.7	\$2,517.3	\$2,535.4
Operating profit	163.6	205.2	539.4	567.6
Depreciation and amortization	33.9	31.8	97.3	94.9
Operating profit as a % of sales	20.1	% 24.0	% 21.4	% 22.4
Depreciation and amortization as a % of sales	4.2	% 3.7	% 3.9	% 3.7

Table of Contents

Components of Sales Change	% Change		% Change	
	Three Months Ended September 28, 2012 vs. Comparable 2011 Period		Nine Months Ended September 28, 2012 vs. Comparable 2011 Period	
Existing businesses	(6.5)%	(1.0)%
Acquisitions	3.0	%	2.0	%
Currency exchange rates	(1.5)%	(1.5)%
Total	(5.0)%	(0.5)%

Year-over-year price increases in the segment had a negligible impact on sales during the three and nine month periods ended September 28, 2012.

Sales in the segment's instrument businesses declined at a low-double digit rate during the three months ended September 28, 2012 and declined at a high-single digit rate during the nine month period, in each case as compared to the comparable period of 2011, as lower demand for most product categories more than offset modest sales increases of service solutions. Instrument demand was weak in all major geographies.

Sales in the segment's communications businesses grew at a mid-single digit rate during the three month period and grew at a low-double digit rate during the nine month period, in each case on a year-over-year basis, primarily in North America and due largely to strong demand for network management solutions and, to a lesser extent, core network enterprise solutions. Robust global demand for network security and analysis solutions during the nine month period also contributed to sales growth. Sales of existing communications business' products and services are expected to decline on a year-over-year basis for the fourth quarter of 2012 in large part due to a difficult prior year comparison. Operating profit margins declined 390 basis points during the three months ended September 28, 2012 as compared to the comparable period of 2011. Year-over-year operating profit margin comparisons were adversely impacted by 320 basis points as lower instrument sales volumes more than offset the favorable impacts of increased sales volumes of higher operating profit margin communication business products and incremental year-over-year cost savings associated with continuing productivity improvement initiatives, including the restructuring actions taken in the fourth quarter of 2011. Incremental year-over-year costs associated with various sales, marketing and product development growth investments also adversely impacted year-over-year operating profit margin comparisons. The dilutive effect of acquired businesses adversely impacted year-over-year operating profit margin comparisons by 70 basis points. Operating profit margins declined 100 basis points during the nine months ended September 28, 2012 as compared to the comparable period of 2011. Year-over-year operating profit margin comparisons were adversely impacted by 80 basis points as lower instrument sales volumes more than offset the favorable impacts of increased sales volumes of higher operating profit margin communication business products and incremental year-over-year cost savings associated with continuing productivity improvement initiatives, including the restructuring actions taken in the fourth quarter of 2011. Incremental year-over-year costs associated with various sales, marketing and product development growth investments also adversely impacted year-over-year operating profit margin comparisons. The dilutive effect of acquired businesses adversely impacted year-over-year operating profit margin comparisons by 20 basis points.

ENVIRONMENTAL

The Company's Environmental segment provides products that help protect water supply and air quality and serves two primary markets: water quality and retail/commercial petroleum. The Company's water quality business is a global leader in water quality analysis and treatment, providing instrumentation and disinfection systems to help analyze and manage the quality of ultra pure, potable and waste water in residential, commercial, industrial and natural resource applications. The Company's retail/commercial petroleum business is a leading worldwide provider of products and services for the retail/commercial petroleum market.

Table of Contents

Environmental Selected Financial Data (\$ in millions):

	Three Months Ended		Nine Months Ended		
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011	
Sales	\$754.4	\$734.6	\$2,212.9	\$2,133.2	
Operating profit	162.4	158.5	456.6	445.8	
Depreciation and amortization	12.4	11.5	35.7	34.2	
Operating profit as a % of sales	21.5	% 21.6	% 20.6	% 20.9	%
Depreciation and amortization as a % of sales	1.6	% 1.6	% 1.6	% 1.6	%
Components of Sales Change	% Change		% Change		
	Three Months Ended September 28, 2012 vs. Comparable 2011 Period		Nine Months Ended September 28, 2012 vs. Comparable 2011 Period		
Existing businesses	3.5	%	4.0	%	
Acquisitions	2.5	%	2.0	%	
Currency exchange rates	(3.5)%	(2.5)%	
Total	2.5	%	3.5	%	

Price increases in the segment contributed 1.5% to sales growth on a year-over-year basis during both the three and nine month periods and are reflected as a component of the change in sales from existing businesses.

Sales from existing businesses in the segment's water quality businesses grew at a low-single digit rate during the three months ended September 28, 2012 and grew at a mid-single digit rate during the nine month period, in each case as compared to the comparable period of 2011. Sales growth in both periods was driven by increased demand for the businesses' laboratory and process instruments and consumables in European municipal markets as well as North American industrial markets. Increased demand in China also contributed to sales growth during the three month period. Sales in the business' chemical treatment solutions product line also grew on a year-over-year basis for both the three and nine month periods primarily due to the addition of new customers in the U.S. market, and to a lesser extent, continued international expansion. Sales in the business' ultraviolet water disinfection product line declined during both the three and nine month periods on a year-over-year basis, due primarily to lower 2012 demand from municipal end markets.

Sales from existing businesses in the segment's retail petroleum equipment businesses grew at a low-single digit rate during the three months ended September 28, 2012 and grew at a mid-single digit rate during the nine month period, in each case as compared to the comparable period of 2011. Increased demand for the business' dispensing equipment and associated services primarily drove the year-over-year sales growth during both periods. Demand for most major product categories was strong in emerging markets. Sales growth during the third quarter of 2012 was adversely impacted by lower year-over-year sales of environmental monitoring solutions in large part due to a difficult prior year comparison.

Operating profit margins declined 10 basis points during the three months ended September 28, 2012 as compared to the comparable period of 2011. The dilutive effect of acquisitions adversely impacted year-over-year operating margin comparisons by 80 basis points. Year-over-year operating profit margin comparisons benefited 70 basis points from the favorable impact of higher sales volumes and incremental year-over-year cost savings associated with continuing productivity improvement initiatives, including the restructuring actions taken in the fourth quarter of 2011.

Incremental year-over-year costs associated with various sales, marketing and product development growth investments partially offset these favorable impacts.

Operating profit margins declined 30 basis points during the nine months ended September 28, 2012 as compared to the comparable period of 2011. The dilutive effect of acquisitions adversely impacted year-over-year operating profit

margin comparisons by 70 basis points. Year-over-year operating profit margin comparisons benefited 40 basis points from the favorable impact of higher sales volumes and incremental year-over-year cost savings associated with continuing productivity improvement initiatives, including the restructuring actions taken in the fourth quarter of 2011. Incremental year-over-year costs associated with various sales, marketing and product development growth investments partially offset these favorable impacts.

Table of Contents

LIFE SCIENCES & DIAGNOSTICS

The Company's diagnostics businesses offer a broad range of analytical instruments, reagents, consumables, software and services that hospitals, reference laboratories, physician's offices and other critical care settings use to diagnose disease and make treatment decisions. The Company's life sciences businesses offer a broad range of research and clinical tools that scientists use to study cells and cell components to gain a better understanding of complex biological processes. Pharmaceutical and biotechnology companies, universities, medical schools and research institutions use these tools to study the causes of disease, identify new therapies and test new drugs and vaccines.

	Three Months Ended September 28, 2012 vs. Comparable 2011 Period		Nine Months Ended September 28, 2012 vs. Comparable 2011 Period		
Existing businesses	2.5	%	3.0	%	%
Acquisitions/divestitures	(2.5)%	60.0)%	%
Currency exchange rates	(3.0)%	(2.5)%)%
Total	(3.0)%	60.5)%	%

Year-over-year price increases in the segment had a negligible impact on sales during both the three and nine months ended September 28, 2012.

The significant growth related to acquisitions for the nine month period ended September 28, 2012 was primarily attributable to the acquisition of Beckman Coulter in June 2011. The decrease in sales associated with acquisitions for the three month period is a result of the divestiture of certain Beckman Coulter product lines, the sales from which (prior to the divestiture) were included in sales from acquired businesses. Given the insignificance of these product line sales to the segment's results of operations, prior year information was not restated to reflect these divestitures as discontinued operations.

Sales from existing businesses in the segment's diagnostics business grew at a mid-single digit rate during both the three and nine months ended September 28, 2012 as compared to the comparable periods of 2011 due to increased demand in the clinical, acute care and pathology diagnostic businesses. Strong sales of consumables and automation hardware in the clinical diagnostic business in both the emerging markets and developed Asian economies more than offset weaker sales performance in North America and Europe. In the acute care diagnostic business, sales grew due to continued strong global consumable sales related to the business' installed base of instrumentation as well as robust demand for compact blood gas analyzers. Increased demand for the business' cardiac care instruments, particularly in China, also contributed to year-over-year sales growth in both periods. Increased demand, primarily in North America and emerging markets, for advanced staining consumables, and to a lesser extent histology systems, drove the majority of year-over-year sales growth in the pathology diagnostics business.

Sales from existing businesses in the segment's life sciences businesses declined at a low-single digit rate during the three months ended September 28, 2012 and were essentially flat during the nine month period, in each case as compared to the comparable periods of 2011. The sales decline during the three month period was largely the result of

lower year-over-year microscopy product sales due to soft demand in the industrial and medical end markets, primarily in North America and Europe. Sales of the business' broad range of mass spectrometers grew on a year-over-year basis during both periods as sales growth in the applied and clinical research markets was partially offset by sales declines in the pharmaceutical and academic research markets. Sales growth in the mass spectrometry business was strong in China and other emerging markets during both periods.

Table of Contents

Operating profit margins increased 890 basis points during the three months ended September 28, 2012 as compared to the comparable period of 2011. Acquisition related charges associated with the second quarter 2011 Beckman Coulter acquisition, including transaction costs, change in control charges and fair value adjustments to inventory and deferred revenue balances favorably impacted year-over-year operating profit margin comparisons by 590 basis points. Year-over-year operating profit margin comparisons benefited 320 basis points from the favorable impact of incremental year-over-year cost savings associated with continuing productivity improvement initiatives, including the restructuring actions taken in the fourth quarter of 2011, net of the impact of the incremental year-over-year costs associated with various sales, marketing and product development growth investments. The dilutive effect of acquisitions adversely impacted segment operating profit margins by 20 basis points. The Company expects to continue to realize significant cost synergies through the application of the Danaher Business System to Beckman Coulter and combining the purchasing power of the Company and Beckman Coulter.

Operating profit margins increased 680 basis points during the nine months ended September 28, 2012 as compared to the comparable period of 2011. Acquisition related charges associated with the second quarter 2011 Beckman Coulter acquisition, including transaction costs, change in control charges and fair value adjustments to inventory and deferred revenue balances favorably impacted year-over-year operating profit margin comparisons by 510 basis points. Higher sales volumes and incremental year-over-year cost savings associated with continuing productivity improvement initiatives, including the restructuring actions taken in the fourth quarter of 2011, net of the impact of incremental year-over-year costs associated with various sales, marketing and product development growth investments, favorably impacted year-over-year comparisons by 220 basis points. The dilutive effect of acquisitions adversely impacted segment operating profit margins by 50 basis points.

Depreciation and amortization as a percentage of sales increased during the nine month period primarily as a result of the inclusion of Beckman Coulter for nine months in the current year as compared to three months in the prior year comparable period. Depreciation and amortization expense in the segment in future periods is expected to continue to be higher than the segment's historical depreciation and amortization expense levels for these same reasons.

DENTAL

The Company's Dental segment is a leading worldwide provider of a broad range of equipment, consumables and services for the dental market, focused on driving technological innovations that help dental professionals improve clinical outcomes and enhance productivity.

Dental Selected Financial Data (\$ in millions):

	Three Months Ended		Nine Months Ended		
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011

Year-over-year price increases in the segment had a negligible impact on sales during both the three and nine months ended September 28, 2012.

Table of Contents

Sales from existing businesses in the segment's dental consumables businesses grew at a low-single digit rate during both the three and nine months ended September 28, 2012 as compared to the comparable periods of 2011, primarily as a result of increased sales of general dentistry consumables and orthodontic products. Dental consumables sales grew in all major geographies during both periods, with particularly strong orthodontic product sales in Europe during the three month period. Sales from existing businesses in the segment's dental equipment business grew at a low-single digit rate on a year-over-year basis in both periods. During the third quarter of 2012, sales grew as a result of increased demand for treatment units and associated equipment as well as higher year-over-year sales of instruments. The sales increases of treatment units and associated equipment were primarily driven by demand in emerging markets, while the lower sales of imaging products primarily occurred in Europe. During the nine month period, sales increased in all major product categories on a year-over-year basis as increased demand in North America and emerging markets more than offset lower demand in Europe.

Operating profit margins increased 100 basis points during the three months ended September 28, 2012 as compared to the comparable period of 2011. Higher operating profit margins from additional sales volume in addition to incremental year-over-year cost savings associated with continuing productivity improvement initiatives including the restructuring actions taken in the fourth quarter of 2011, net of incremental year-over-year costs associated with various sales, marketing and product development growth investments, increased operating profit margins by 90 basis points on a year-over-year basis. In addition, net higher overall operating profit margins of acquired businesses favorably impacted year-over-year comparisons by 10 basis points.

Operating profit margins increased 220 basis points during the nine months ended September 28, 2012 as compared to the comparable period of 2011. Higher operating profit margins from additional sales volume in addition to incremental year-over-year cost savings associated with continuing productivity improvement initiatives including the restructuring actions taken in the fourth quarter of 2011, net of incremental year-over-year costs associated with various sales, marketing and product development growth investments, increased operating profit margins by 210 basis points on a year-over-year basis. In addition, net higher overall operating profit margins of acquired businesses favorably impacted year-over-year comparisons by 10 basis points.

INDUSTRIAL TECHNOLOGIES

The Company's Industrial Technologies segment designs and manufactures components and systems that are typically incorporated by original equipment manufacturers and system integrators for sale into a diverse set of applications and end-markets. The businesses in this segment also provide service and support, including helping customers with integration and installation and providing services to ensure performance and up-time. The Industrial Technologies segment consists of two strategic lines of business, product identification and motion, as well as the sensors and controls, defense and engine retarder businesses. The Company sold its ASI business in January 2012, its KEO business in February 2012 and its PSA business in April 2011. These businesses were previously reported as part of the Industrial Technologies segment. The results of these discontinued operations are excluded from all periods presented in the financial information provided in the tables below.

Industrial Technologies Selected Financial Data (\$ in millions):

	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
Sales	\$839.6	\$794.5	\$2,455.2	\$2,345.7

Table of Contents

Price increases in the segment contributed 1.5% to sales growth on a year-over-year basis during both the three and nine months ended September 28, 2012 and are reflected as a component of the change in sales from existing businesses.

Sales from existing businesses in the segment's product identification businesses grew at a low-double digit rate during the three months ended September 28, 2012 and grew at a mid-single digit rate during the nine month period, in each case as compared to the comparable period of 2011, due primarily to continued demand for marking and coding equipment and related consumables. Increased year-over-year demand for the business' integrated packaging solutions product lines also contributed to the existing business' sales growth in the three and nine month periods ended September 28, 2012. Sales grew in most major geographies with particular strength in North America. The Company's acquisition of X-Rite, Incorporated, a global leader in color measurement technology, in the second quarter of 2012 expands the product identification business into a new, adjacent market and has broadened the sales and earnings growth opportunities for the business by expanding the business' product line diversity as well as through the potential acquisition of complementary businesses.

Sales from existing businesses in the segment's motion businesses declined at a high-single digit rate during both the three and nine months ended September 28, 2012 as compared to the comparable periods of 2011 due to continued soft demand in the majority of end markets served, particularly technology-related end markets. Year-over-year sales declines in industrial automation and engineered solutions during both periods were partially offset by modest sales increases in defense end-markets.

Sales from existing businesses in the segment's other businesses collectively declined at a low-single digit rate during the three months ended September 28, 2012 and grew at a low-single digit rate during the nine month period, in each case as compared to the comparable period of 2011. Sales declined in the three month period primarily as a result of lower demand in the segment's engine retarder business. Sales in the segment's sensors and controls businesses were essentially flat in both periods.

Operating profit margins declined 10 basis points during the three months ended September 28, 2012 as compared to the comparable period of 2011. The net dilutive effect of acquired businesses adversely impacted year-over-year operating profit margin comparisons by 130 basis points. Slightly higher sales volumes and incremental year-over-year cost savings associated with continuing productivity improvement initiatives, including the restructuring actions taken in the fourth quarter of 2011, net of incremental year-over-year costs associated with various sales, marketing and product development growth investments, increased operating profit margins by 120 basis points on a year-over-year basis.

Operating profit margins declined 20 basis points during the nine months ended September 28, 2012 as compared to the comparable period of 2011. The net dilutive effect of acquired businesses adversely impacted year-over-year operating profit margin comparisons by 100 basis points. Slightly higher sales volumes and incremental year-over-year cost savings associated with continuing productivity improvement initiatives, including the restructuring actions taken in the fourth quarter of 2011, net of incremental year-over-year costs associated with various sales, marketing and product development growth investments, increased operating profit margins by 80 basis points on a year-over-year basis.

COST OF SALES AND GROSS PROFIT

(\$ in millions)	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
Sales	\$4,415.5	\$4,445.8	\$13,285.2	\$11,373.9
Cost of sales	(2,137.5)	(2,262.7)	(6,416.2)	(5,524.4)
Gross profit	2,278.0	2,183.1	6,869.0	5,849.5
Gross profit margin	51.6 %	49.1 %	51.7 %	51.4 %

Gross profit margins increased 250 basis points and 30 basis points on a year-over-year basis for the three and nine month periods ended September 28, 2012, respectively. Year-over-year gross profit margin comparisons for the three month period were favorably impacted by 215 basis points as a result of acquisition related charges recorded in the 2011 comparable period associated with fair value adjustments to acquired inventory and deferred revenue balances in connection with the acquisition of Beckman Coulter in June 2011. In addition, the gross profit margin for the three month period reflects the benefit of incremental year-over-year cost savings associated with fourth quarter 2011 restructuring activities and continued productivity improvements. The favorable impacts to gross operating profit margin comparisons during the three month period were partially offset by slightly lower year-over-year reported sales. Year-over-year gross profit margin comparisons for the nine month period were favorably impacted by higher year-over-year sales volumes, incremental year-over-year cost savings

Table of Contents

associated with fourth quarter 2011 restructuring activities, continued productivity improvements as well as the acquisition related charges referenced above. The favorable impacts to gross operating profit margin comparisons during the nine month period were partially offset by the acquisition of Beckman Coulter which has lower gross profit margins than the Company's other businesses and impact the entire 2012 period compared to only the period subsequent to acquisition in 2011.

OPERATING EXPENSES

(\$ in millions)	Three Months Ended		Nine Months Ended	
	September 28, 2012	September 30, 2011	September 28, 2012	September 30, 2011
Sales	\$4,415.5	\$4,445.8	\$13,285.2	\$11,373.9
Selling, general and administrative expenses	1,251.2	1,268.4	3,774.7	3,320.0
Research and development expenses	289.5	287.5	843.2	736.4
SG&A as a % of sales	28.3	% 28.5	% 28.4	% 29.2
R&D as a % of sales	6.6	% 6.5	% 6.3	% 6.5

Selling, general and administrative expenses as a percentage of sales decreased 20 basis points and 80 basis points on a year-over-year basis for the three and nine months ended September 28, 2012, respectively. The decrease in selling, general and administrative expenses as a percentage of sales in the three month period reflects the benefit of incremental year-over-year cost savings associated with fourth quarter 2011 restructuring activities and continued productivity improvements. Slightly lower year-over-year reported sales and incremental year-over-year investments in the Company's sales and marketing growth investments partially offset these benefits in the three month period. During the nine month period, increased leverage of the Company's cost base resulting from higher sales and incremental year-over-year cost savings associated with fourth quarter 2011 restructuring activities were partially offset by incremental year-over-year investments in the Company's sales and marketing growth investments. In addition, change in control payments to Beckman Coulter employees in connection with the closing of the Beckman Coulter acquisition in June 2011, as well as associated restructuring and integration charges, favorably impacted the year-over-year comparisons in both the three and nine month periods.

Research and development expenses (consisting principally of internal and contract engineering personnel costs) increased approximately \$2 million and \$107 million on a year-over-year basis for the three and nine months ended September 28, 2012, respectively. The increase in expense is primarily attributable to research and development expenditures associated with acquired businesses, primarily Beckman Coulter, as well as incremental year-over-year investment in the Company's new product development initiatives.

INTEREST COSTS AND FINANCING TRANSACTIONS

For a discussion of the Company's outstanding indebtedness, refer to Note 6 of the Consolidated Condensed Financial Statements.

Interest expense of \$39 million for the three months ended September 28, 2012 was approximately \$3 million lower than in the comparable period of 2011. Interest expense of \$117 million for the nine months ended September 28, 2012 was approximately \$12 million higher than in the comparable period of 2011. The increase in interest expense for the nine month period results primarily from the additional debt incurred during the second quarter of 2011 in connection with the Beckman Coulter acquisition. The decrease in interest expense for the three month period is primarily due to the Company retiring substantially all of Beckman Coulter's notes during the third quarter of 2011.

INCOME TAXES

The Company's effective tax rate from continuing operations for the three and nine months ended September 28, 2012 was 23.5% and 23.7%, respectively, as compared to 9.3% and 19.6% for the three and nine months ended

September 30, 2011, respectively. The effective tax rates in 2012 and 2011 are lower than the U.S. federal statutory rate of 35% due principally to the Company's earnings outside the United States that are indefinitely reinvested and taxed at rates lower than the U.S. federal statutory rate. The effective tax rates in 2011 were also lower than the U.S. federal statutory rate due to recognition of tax benefits associated with favorable resolutions of certain international and domestic tax positions and the lapse of statutes of limitations.

The effective tax rate from continuing operations for the last quarter of 2012 is forecasted to be approximately 24% based on the projected mix of earnings before tax by jurisdiction, excluding the impact of any matters that would be treated as "discrete."

Table of Contents

The projection of mix of earnings by jurisdiction could fluctuate during the fourth quarter of 2012. In addition, the tax effects of significant unusual items, including accruals related to tax contingencies, the resolution of worldwide tax matters, tax audit settlements, statute expirations and changes in tax regulations, are reflected in the period in which they occur. As a result, it is reasonably possible that the actual effective tax rate used for financial reporting purposes may change in future periods.

INFLATION

The effect of inflation on the Company's operations was not significant in the three months ended September 28, 2012.

LIQUIDITY AND CAPITAL RESOURCES

Management assesses the Company's liquidity in terms of its ability to generate cash to fund its operating, investing and financing activities. Following is an overview of the Company's cash flows and liquidity as of and for the nine months ended September 28, 2012:

Overview of Cash Flows and Liquidity

(\$ in millions)	Nine Months Ended	
	September 28, 2012	September 30, 2011
Total operating cash flows from continuing operations	\$2,671.3	\$1,915.8
Payments for additions to property, plant and equipment	(333.4)	(214.8)
Cash paid for acquisitions	(972.8)	(6,087.1)
Proceeds from the sale of discontinued operations	337.5	680.1
Other sources, net	23.2	18.0
Net cash used in investing activities	(945.5)	(5,603.8)
Proceeds from the issuance of common stock	143.2	1,060.3
Purchase of treasury stock	(258.5)	—
Net (repayments of) proceeds from borrowings (maturities of 90 days or less)	(495.0)	1,416.0
Proceeds of borrowings (maturities longer than 90 days)	—	1,785.8
Repayments of borrowings (maturities longer than 90 days)	(3.4)	(1,594.6)
Payment of dividends	(52.0)	(44.1)
Net cash (used in) provided by financing activities	(665.7)	2,623.4

Operating cash flows from continuing operations, a key source of the Company's liquidity, increased \$755 million, or 39%, during the first nine months of 2012 as compared to the first nine months of 2011.

Cash paid for acquisitions constituted the most significant use of cash during the first nine months of 2012. The Company acquired ten businesses during the first nine months of 2012 for total consideration (net of cash acquired) of \$973 million.

In January 2012, the Company completed the sale of its ASI business and, in February 2012, the Company completed the sale of its KEO business. Aggregate cash proceeds in the first nine months of 2012 in connection with the completed sales were \$337 million.

The Company repurchased approximately 5 million shares of Company common stock in open market transactions at a cost of \$258 million.

The Company repaid \$495 million of borrowings in the nine month period primarily related to commercial paper borrowings.

The Company's 2011 restructuring activities used \$102 million in cash during the first nine months of 2012.

As of September 28, 2012, the Company held \$1.5 billion of cash and cash equivalents.

Table of Contents

Operating Activities

The Company continues to generate substantial cash from operating activities and believes that its operating cash flow and other sources of liquidity will be sufficient to allow it to continue investing in existing businesses, consummating strategic acquisitions and managing its capital structure on a short and long-term basis. Cash flows from operating activities can fluctuate significantly from period to period as working capital needs and the timing of payments for items such as income taxes, restructuring activities, pension funding and other items impact reported cash flows.

Operating cash flows from continuing operations were \$2.7 billion for the first nine months of 2012, an increase of \$755 million, or 39% as compared to the comparable period of 2011. The year-over-year change in operating cash flows was primarily attributable to the following factors:

Earnings from continuing operations increased by \$297 million in the first nine months of 2012 as compared to the first nine months of 2011.

Earnings for the first nine months of 2012 reflected an increase of \$189 million of depreciation and amortization expense as compared to the comparable period of 2011. The increase in amortization expense primarily relates to the amortization of intangible assets acquired in connection with the Beckman Coulter acquisition. The increase in depreciation expense results from the fact that a majority of the Beckman Coulter customers enter into operating-type lease arrangements for the use of the business' instrumentation and each new operating-type lease arrangement entered into increases the Company's depreciable assets. The increased depreciation and amortization expense decreases earnings without a corresponding impact to operating cash flow.

The aggregate of trade accounts receivable, inventory and trade accounts payable provided \$119 million in operating cash flows during the first nine months of 2012, compared to the comparable period of 2011 during which these items provided \$42 million in operating cash flows. The amount of cash flow generated from or used by the aggregate of trade accounts receivable, inventory and trade accounts payable depends upon how effectively the Company manages the cash conversion cycle, which effectively represents the number of days that elapse from the day it pays for the purchase of raw materials to the collection of cash from its customers.

Cash income tax payments from continuing operations was approximately \$100 million lower during the first nine months of 2012 as compared to the first nine months of 2011.

In addition, in connection with the Company's restructuring activities, the Company records appropriate accruals for the costs of closing facilities, severing personnel and, in connection with acquisitions, integrating the acquired businesses into existing Company operations. Cash flows from operating activities are reduced by the amounts expended against the various accruals established in connection with these activities. During the first nine months of 2012, the Company paid \$102 million related to these restructuring activities.

Investing Activities

Cash flows relating to investing activities consist primarily of cash used for acquisitions and capital expenditures and cash proceeds from divestitures of businesses or assets.

Net cash used in investing activities was approximately \$946 million during the first nine months of 2012 compared to approximately \$5.6 billion of net cash used in the first nine months of 2011. For a discussion of the Company's acquisitions during the first nine months of 2012 and the divestiture of the ASI and KEO businesses, refer to "—Overview – Acquisitions and Divestitures."

The year-over-year increase in capital expenditures for property, plant and equipment in 2012 is primarily due to the acquisition of Beckman Coulter in the second quarter of 2011 and the associated capitalization of instruments subject to operating-type leases through customer arrangements entered into in the first nine months of 2012. In 2012, the Company expects capital spending to approximate \$500 million, though actual expenditures will ultimately depend on business conditions.

Financing Activities and Indebtedness

Cash flows from financing activities consist primarily of proceeds from the issuance of commercial paper, common stock and debt, excess tax benefits from stock-based compensation, payments of principal on indebtedness, repurchases of the Company's common stock and payments of dividends to shareholders. Financing activities used cash of \$666 million during the first nine months of 2012 compared to approximately \$2.6 billion provided during the first nine months of 2011. The cash used during the first nine months of 2012 was due primarily to repurchases of the

Company's common stock and the net repayment of commercial paper borrowings. The cash provided during the first nine months of 2011 was primarily related to net proceeds received by the Company to partially finance the acquisition of Beckman Coulter and consisted of (1) \$966 million received from the underwritten public offering of the Company's common stock on June 21, 2011, (2) approximately \$1.8 billion received from the underwritten public offering of senior unsecured notes on June 23, 2011, and (3) proceeds received from the

Table of Contents

sale of additional commercial paper under the Company's U.S. commercial paper program.

For a description of the Company's outstanding debt as of September 28, 2012, refer to Note 6 of the Consolidated Condensed Financial Statements. As of September 28, 2012, the Company was in compliance with all of its debt covenants.

The Company primarily satisfies any short-term liquidity needs that are not met through operating cash flow and available cash through issuances of commercial paper under its U.S. and Euro commercial paper programs. As of September 28, 2012, borrowings outstanding under the Company's U.S. commercial paper program had a weighted average annual interest rate of 0.2% and a weighted average maturity of approximately 20 days. As commercial paper obligations mature, the Company anticipates issuing additional short-term commercial paper obligations to refinance all or part of these borrowings. There was no commercial paper outstanding under the Euro commercial paper program as of September 28, 2012.

Credit support for the commercial paper program is provided by a \$2.5 billion unsecured multi-currency revolving credit facility with a syndicate of banks that expires on July 15, 2016 (the "Credit Facility"). The Credit Facility can also be used for working capital and other general corporate purposes. As of September 28, 2012, no borrowings were outstanding under the Credit Facility and the Company was in compliance with all covenants under the facility. In addition to the Credit Facility, the Company has entered into reimbursement agreements with various commercial banks to support the issuance of letters of credit.

In May 2012, the Company filed a "well-known seasoned issuer" shelf registration statement on Form S-3 to register an indeterminate amount of debt securities, common stock, preferred stock, warrants, depositary shares, purchase contracts and units for future issuance. The Company expects to use the net proceeds from future securities sales off this shelf for general corporate purposes. These purposes may include, but are not limited to, reduction or refinancing of debt or other corporate obligations, acquisitions, capital expenditures, share repurchases and dividends, and working capital. The May 2012 shelf registration statement replaced the shelf registration statement that was filed in May 2009 and expired in May 2012.

On May 11, 2010, the Company's Board of Directors (the "Board") authorized the repurchase of up to 20 million shares of the Company's common stock from time to time on the open market or in privately negotiated transactions. For additional details regarding this stock repurchase authorization, please see "Unregistered Sales of Equity Securities and Use of Proceeds" in Part II - Item 1A of this Quarterly Report on Form 10-Q.

Pursuant to the stock repurchase program, during the three months ended September 28, 2012, the Company repurchased approximately 5 million shares of Company common stock in open market transactions at a cost of \$258 million. At September 28, 2012, the Company had approximately 15 million shares remaining for stock repurchases under the existing Board authorization. The Company expects to fund any further repurchases using the Company's available cash balance or proceeds from the issuance of commercial paper.

Aggregate cash payments for dividends during the first nine months of 2012 were \$52 million. In addition, the Company declared a regular quarterly dividend of \$0.025 per share payable on October 26, 2012 to holders of record on September 28, 2012.

Cash and Cash Requirements

As of September 28, 2012, the Company held approximately \$1.5 billion of cash and cash equivalents that were invested in highly liquid investment grade debt instruments with an original maturity of 90 days or less with an approximate weighted average annual interest rate of 0.2%. Of this amount, \$574 million was held within the United States and \$967 million was held outside of the United States. The Company will continue to have cash requirements to support working capital needs, capital expenditures and acquisitions, to pay interest and service debt, pay taxes, fund its restructuring activities and pension plans as required, repurchase shares of the Company's common stock, pay dividends to shareholders and support other business needs. The Company generally intends to use available cash and internally generated funds to meet these cash requirements, but in the event that additional liquidity is required, particularly in connection with acquisitions, the Company may also borrow under its commercial paper program or the

Credit Facility, enter into new credit facilities and either borrow directly thereunder or use such credit facilities to backstop additional borrowing capacity under its commercial paper program and/or access the capital markets as needed. The Company may also from time to time access the capital markets to take advantage of favorable interest rate environments or other market conditions.

While repatriation of some cash held outside the United States may be restricted by local laws, most of the Company's foreign cash balances could be repatriated to the United States but, under current law, could be subject to United States federal income taxes, less applicable foreign tax credits. For most of its foreign subsidiaries, the Company makes an election regarding the amount of earnings intended for indefinite reinvestment, with the balance available to be repatriated to the United States. A deferred tax liability has been accrued for the funds that are available to be repatriated to the United States. No provisions for

Table of Contents

United States income taxes have been made with respect to earnings that are planned to be reinvested indefinitely outside the United States, and the amount of United States income taxes that may be applicable to such earnings is not readily determinable given the various tax planning alternatives the Company could employ if it repatriated these earnings. The cash that our foreign subsidiaries hold for indefinite reinvestment is generally used to finance foreign operations and investments, including acquisitions. As of September 28, 2012, management believes that it has sufficient liquidity to satisfy its cash needs, including its cash needs in the United States.

During 2012, the Company's cash contribution requirements for its U.S. defined benefit pension plan are not expected to be significant. The Company's cash contribution requirements for its non-U.S. defined benefit pension plans are expected to be \$50 million for 2012, although the ultimate amounts to be contributed to the U.S. and non-U.S. plans depend upon, among other things, legal requirements, underlying asset returns, the plan's funded status, the anticipated tax deductibility of the contribution, local practices, market conditions, interest rates and other factors.

CRITICAL ACCOUNTING POLICIES

There were no material changes during the quarter ended September 28, 2012 to the items that the Company disclosed as its critical accounting policies and estimates in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's 2011 Annual Report on Form 10-K.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Quantitative and qualitative disclosures about market risk appear in “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Financial Instruments and Risk Management,” in the Company’s 2011 Annual Report on Form 10-K. There were no material changes during the quarter ended September 28, 2012 to this information reported in the Company’s 2011 Annual Report on Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

The Company’s management, with the participation of the Company’s President and Chief Executive Officer, and Executive Vice President and Chief Financial Officer, has evaluated the effectiveness of the Company’s disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this report. Based on such evaluation, the Company’s President and Chief Executive Officer, and Executive Vice President and Chief Financial Officer, have concluded that, as of the end of such period, the Company’s disclosure controls and procedures were effective.

There have been no changes in the Company’s internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the Company’s most recent completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

ITEM 5. OTHER INFORMATION

On October 17, 2012, the Company and H. Lawrence Culp, Jr., the Company's President and Chief Executive Officer, executed an amendment to Mr. Culp's employment agreement to eliminate Mr. Culp's right to receive tax gross-up payments upon a change of control of the Company. A copy of the employment agreement as so amended is attached as Exhibit 10.1 to this Quarterly Report on Form 10-Q.

PART II - OTHER INFORMATION**ITEM 1A. RISK FACTORS**

Information regarding risk factors appears in “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Information Related to Forward-Looking Statements,” in Part I — Item 1A of Danaher’s 2011 Annual Report on Form 10-K. There were no material changes during the quarter ended September 28, 2012 to the aforementioned risk factors.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The Company's repurchases of its equity securities during the third quarter of 2012 are listed in the following table:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Number of Shares that May Yet Be Purchased Under The Plans or Programs (1)
June 30, 2012 - July 29, 2012	1,982,827	\$50.74	1,982,827	18,017,173
July 30, 2012 - August 29, 2012	2,062,182	\$52.54	2,062,182	15,954,991
August 30, 2012 - September 28, 2012	932,301	\$53.13	932,301	15,022,690
Total	4,977,310	\$51.93	4,977,310	

(1)

On May 1, 2010, the Company's Board of Directors authorized the repurchase of up to 20 million shares of the Company's common stock from time to time on the open market or in privately negotiated transactions. There is no expiration date for the Company's repurchase program. The timing and amount of any shares repurchased will be determined by the Company's management based on its evaluation of market conditions and other factors. The repurchase program may be suspended or discontinued at any time. Any repurchased shares will be available for use in connection with the Company's equity compensation plans (or any successor plan) and for other corporate purposes.

Table of Contents

During the third quarter of 2012, holders of certain of the Company's Liquid Yield Option Notes ("LYONs") converted such LYONs into an aggregate of 496,834 shares of Danaher common stock, par value \$0.01 per share. In each case, the shares of common stock were issued solely to existing security holders upon conversion of the LYONs pursuant to the exemption from registration provided under Section 3(a)(9) of the Securities Act of 1933, as amended. The conversion of LYONs to common stock does not impact the Company's diluted earnings per share as the LYONs are considered a dilutive security in all periods presented.
