Table of Contents

1ST SOURCE CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1. Basis of Presentation

1st Source Corporation is a bank holding company headquartered in South Bend, Indiana that provides, through its subsidiaries (collectively referred to as "1st Source" or "the Company"), a broad array of financial products and services. The accompanying unaudited consolidated financial statements reflect all adjustments (all of which are normal and recurring in nature) which are, in the opinion of management, necessary for a fair presentation of the consolidated financial position, the results of operations, changes in comprehensive income, changes in shareholders' equity, and cash flows for the periods presented. These unaudited consolidated financial statements have been prepared according to the rules and regulations of the Securities and Exchange Commission (SEC) and, therefore, certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been omitted.

The Notes to the Consolidated Financial Statements appearing in 1st Source Corporation's Annual Report on Form 10-K (2013 Annual Report), which include descriptions of significant accounting policies, should be read in conjunction with these interim financial statements. The Consolidated Statement of Financial Condition at December 31, 2013 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements. Certain amounts in the prior period consolidated financial statements have been reclassified to conform to the current year presentation.

Note 2. Recent Accounting Pronouncements

Troubled Debt Restructurings by Creditors: In August 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-14 "Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40) - Classification of Certain Government Guaranteed Mortgage Loans upon Foreclosure." ASU 2014-14 requires that a mortgage loan be derecognized and a separate other receivable be recognized upon foreclosure if certain conditions are met. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. ASU 2014-14 is effective for annual periods and interim periods within those annual periods, beginning after December 15, 2014. The amendments can be applied using either a prospective transition method or a modified retrospective transition method. Early adoption is permitted. The Company has determined that ASU 2014-14 will not have an impact on its accounting and disclosures.

Share Based Payments: In June 2014, the FASB issued ASU No. 2014-12 "Compensation - Stock Compensation (Topic 718) - Accounting for Share Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period." ASU 2014-12 requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. ASU 2014-12 is effective for interim and annual periods beginning after December 15, 2015. The amendments can be applied prospectively to all awards granted or modified after the effective date or retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented and to all new or modified awards thereafter. Early adoption is permitted. The Company has determined that ASU 2014-12 will not have an impact on its accounting and disclosures.

Repurchase to Maturity Transactions, Repurchase Financings and Disclosures: In June 2014, the FASB issued ASU No. 2014-11 "Transfers and Servicing (Topic 860) - Repurchase to Maturity Transactions, Repurchase Financings, and Disclosures." ASU 2014-11 aligns the accounting for repurchase to maturity transactions and repurchase

agreements executed as a repurchase financing with the accounting for other typical repurchase agreements. Going forward, these transactions would all be accounted for as secured borrowings. ASU 2014-11 is effective for the first interim or annual period beginning after December 15, 2014. In addition the disclosure of certain transactions accounted for as a sale is effective for the first interim or annual period beginning on or after December 15, 2014, and the disclosure for transactions accounted for as secured borrowings is required for annual periods beginning after December 15, 2014, and interim periods beginning after March 15, 2015. Early adoption is prohibited. The Company is assessing the impact of ASU 2014-11 on its accounting and disclosures.

Revenue from Contracts with Customers: In May 2014, the FASB issued ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)." The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The amendments can be applied retrospectively to each prior reporting period or retrospectively with the cumulative effect of initially applying this Update recognized at the date of initial application. Early application is not permitted. The Company is assessing the impact of ASU 2014-09 on its accounting and disclosures.

Table of Contents

Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure: In January 2014, the FASB issued ASU No. 2014-04 "Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40) - Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure." ASU 2014-04 clarifies when an in substance repossession or foreclosure occurs and requires interim and annual disclosures of the amount of foreclosed residential real estate property and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. ASU 2014-04 is effective either on a modified retrospective transition method or a prospective transition method for interim and annual periods beginning after December 15, 2014. Early adoption is permitted. The Company is assessing the impact of ASU 2014-04 on its disclosures.

Accounting for Investments in Qualified Affordable Housing Projects: In January 2014, the FASB issued ASU No. 2014-01 "Investments - Equity method and Joint Ventures (Topic 323) - Accounting for Investments in Qualified Affordable Housing Projects." ASU 2014-01 allows investors to use the proportional amortization method to account for investments in limited liability entities that manage or invest in affordable housing projects that qualify for low-income housing tax credits if certain conditions are met. ASU 2014-01 is effective retrospectively for interim and annual periods in fiscal years that begin after December 15, 2014. Early adoption is permitted. The Company is assessing the impact of ASU 2014-01 on its accounting for affordable housing projects.

Investment Companies: In June 2013, the FASB issued ASU No. 2013-08 "Financial Services-Investment Companies (Topic 946) — Amendments to the Scope, Measurement and Disclosure Requirements." ASU 2013-08 changes the approach to the investment company assessment in Topic 946, clarifies the characteristics of an investment company and provides comprehensive guidance for assessing whether an entity is an investment company. ASU 2013-08 is effective for interim and annual reporting periods in fiscal years that begin after December 15, 2013. Early application is prohibited. The Company determined that 1st Source Capital Corporation, a wholly-owned subsidiary of 1st Source Bank, is considered an investment company and is applying the guidance in Topic 946 in accordance with ASU 2013-08.

Note 3. Investment Securities

At September 30, 2014 and December 31, 2013, the residential mortgage-backed securities held by the Company consisted primarily of GNMA, FNMA and FHLMC pass-through certificates which are guaranteed by those respective agencies of the United States government (Government Sponsored Enterprise, GSEs).

Table of Contents

The following table shows the contractual maturities of investments in securities available-for-sale at September 30, 2014. Expected maturities will differ from contractual maturities, because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(Dollars in thousands)	Amortized Cost	Fair Value
Due in one year or less	\$ 34,526	\$ 34,874
Due after one year through five years	416,243	421,493
Due after five years through ten years	95,275	95,054
Due after ten years	2,215	2,280
Mortgage-backed securities	249,710	253,461
Total debt securities available-for-sale	\$ 797,969	\$ 807,162

The following table shows the gross realized gains and losses on sale of securities from the securities available-for-sale portfolio, including marketable equity securities. Realized gains and losses on the sales of all securities are computed using the specific identification cost basis. The gross gains for the nine months ended September 30, 2014 reflect the sale of marketable equity securities during the first quarter. The gross gains and losses for the three and nine months ended September 30, 2013 primarily reflect the sale of federal agency securities. The trades were done for the purpose of balance sheet realignment and managing reinvestment risk by adjusting the timing of future cash flows.

(Dollars in thousands)	Three Months Ended September 30,		Nine Months Ended September 30,

Table of Contents

The initial indication of other-than-temporary-impairment (OTTI) for both debt and equity securities is a decline in fair value below amortized cost. Quarterly, the impaired securities are analyzed on a qualitative and quantitative basis in determining OTTI. Declines in the fair value of available-for-sale debt securities below their cost that are deemed to be other-than-temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of impairment related to other factors is recognized in other comprehensive income. In estimating OTTI impairment losses, the Company considers among other things, (i) the length of time and the extent to which fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, and (iii) whether it is more likely than not that the Company will not have to sell any such securities before a recovery of cost.

There were no OTTI write-downs in 2014 or 2013.

At September 30, 2014, the Company does not have the intent to sell any of the available-for-sale securities in the table above and believes that it is more likely than not, that it will not have to sell any such securities before an anticipated recovery of cost. Primarily the unrealized losses on debt securities are due to increases in market rates over the yields available at the time the underlying securities were purchased. The fair value is expected to recover on all debt securities as they approach their maturity date or re-pricing date or if market yields for such investments decline. The Company does not believe any of the securities are impaired due to reasons of credit quality.

At September 30, 2014 and December 31, 2013, investment securities with carrying values of \$210.52 million and \$237.42 million, respectively, were pledged as collateral for security repurchase agreements and for other purposes.

Note 4. Loan and Lease Financings

The Company evaluates loans and leases for credit quality at least annually but more frequently if certain circumstances occur (such as material new information which becomes available and indicates a potential change in credit risk). The Company uses two methods to assess credit risk: loan or lease credit quality grades and credit risk classifications. The purpose of the loan or lease credit quality grade is to document the degree of risk associated with individual credits as well as inform management of the degree of risk in the portfolio taken as a whole. Credit risk classifications are used to categorize loans by degree of risk and to designate individual or committee approval authorities for higher risk credits at the time of origination. Credit risk classifications include categories for: Acceptable, Marginal, Special Attention, Special Risk, Restricted by Policy, Regulated and Prohibited by Law.

All loans and leases, except residential real estate loans and consumer loans, are assigned credit quality grades on a scale from 1 to 12 with grade 1 representing superior credit quality. The criteria used to assign grades to extensions of credit that exhibit potential problems or well-defined weaknesses are primarily based upon the degree of risk and the likelihood of orderly repayment, and their effect on the Company's safety and soundness. Loans or leases graded 7 or weaker are considered "special attention" credits and, as such, relationships in excess of \$100,000 are reviewed quarterly as part of management's evaluation of the appropriateness of the reserve for loan and lease losses. Grade 7 credits are defined as "watch" and contain greater than average credit risk and are monitored to limit the exposure to increased risk; grade 8 credits are "special mention" and, following regulatory guidelines, are defined as having potential weaknesses that deserve management's close attention. Credits that exhibit well-defined weaknesses and a distinct possibility of loss are considered "classified" and are graded 9 through 12 corresponding to the regulatory definitions of "substandard" (grades 9 and 10) and the more severe "doubtful" (grade 11) and "loss" (grade 12).

Table of Contents

The following table shows the credit quality grades of the recorded investment in loans and leases, segregated by class.

(Dollars in thousands)	Credit Quality Grades		Total
	1-6	7-12	
September 30, 2014

The following table shows the number of loans and leases classified as troubled debt restructuring (TDR) during the three and nine months ended September 30, 2014 and 2013, segregated by class, as well as the recorded investment as of September 30. The classification between nonperforming and performing is shown at the time of modification. During 2014 and 2013, modification programs focused on extending maturity dates or modifying payment patterns with most TDRs experiencing a combination of concessions. The modifications did not result in the contractual forgiveness of principal or interest. There were three modifications during 2014 and two during 2013 that resulted in an interest rate reduction below market rate. Consequently, the financial impact of the modifications is immaterial.

(Dollars in thousands)	Three Months Ended September 30, 2014		September 30, 2013		Nine Months Ended September 30, 2014		September 30, 2013

Total TDR modifications	8	\$ 11,059	1	\$ 4,201	9	\$ 11,059	3	\$ 5,250

Table of Contents

There were no TDRs which had payment defaults within the twelve months following modification during the three and nine months ended September 30, 2014. There was one commercial real estate TDR which had payment defaults within twelve months following modification during the nine months ended September 30, 2013. This loan was transferred into Other Real Estate during the three months ended June 30, 2013. Default occurs when a loan or lease is 90 days or more past due under the modified terms or transferred to nonaccrual.

The following table shows the recorded investment of loans and leases classified as troubled debt restructurings as of September 30, 2014 and December 31, 2013.

(Dollars in thousands)	September 30, 2014	December 31, 2013
Performing TDRs	\$9,290	\$8,786
Nonperforming TDRs	17,001	11,824
Total TDRs	\$26,291	\$20,610

Note 5. Reserve for Loan and Lease Losses

The reserve for loan and lease loss methodology has been consistently applied for several years, with enhancements instituted periodically. Reserve ratios are reviewed quarterly and revised periodically to reflect recent loss history and to incorporate current risks and trends which may not be recognized in historical data. As the historical charge-off analysis is updated, the Company reviews the look-back periods for each business loan portfolio. Furthermore, a thorough analysis of charge-offs, non-performing asset levels, special attention outstandings and delinquency is performed in order to review portfolio trends and other factors, including specific industry risks and economic conditions, which may have an impact on the reserves and reserve ratios applied to various portfolios. The Company adjusts the calculated historical based ratio as a result of the analysis of environmental factors, principally economic risk and concentration risk. Key economic factors affecting the portfolios are growth in gross domestic product, unemployment rates, housing market trends, commodity prices, inflation and global economic and political issues. Concentration risk is impacted primarily by geographic concentration in Northern Indiana and Southwestern Lower Michigan in the business banking and commercial real estate portfolios and by collateral concentration in the specialty finance portfolios and exposure to foreign markets by geographic risk.

The reserve for loan and lease losses is maintained at a level believed to be appropriate by the Company to absorb probable losses inherent in the loan and lease portfolio. The determination of the reserve requires significant judgment reflecting the Company's best estimate of probable loan and lease losses related to specifically identified impaired loans and leases as well as probable losses in the remainder of the various loan and lease portfolios. For purposes of determining the reserve, the Company has segmented loans and leases into classes based on the associated risk within these segments. The Company has determined that eight classes exist within the loan and lease portfolio. The methodology for assessing the appropriateness of the reserve consists of several key elements, which include: specific reserves for impaired loans, formula reserves for each business lending division portfolio including percentage allocations for special attention loans and leases not deemed impaired, and reserves for pooled homogeneous loans and leases. The Company's evaluation is based upon a continuing review of these portfolios, estimates of customer performance, collateral values and dispositions, and assessments of economic and geopolitical events, all of which are subject to judgment and will change.

Table of Contents

The following table shows the changes in the reserve for loan and lease losses, segregated by class, for the three months ended September 30, 2014 and 2013.

Note 6. Mortgage Servicing Rights

The Company recognizes the rights to service residential mortgage loans for others as separate assets, whether the servicing rights are acquired through a separate purchase or through the sale of originated loans with servicing rights retained. The Company allocates a portion of the total proceeds of a mortgage loan to servicing rights based on the relative fair value. The unpaid principal balance of residential mortgage loans serviced for third parties was \$831.20 million and \$839.26 million at September 30, 2014 and December 31, 2013, respectively.

Mortgage servicing rights (MSRs) are evaluated for impairment at each reporting date. For purposes of impairment measurement, MSRs are stratified based on the predominant risk characteristics of the underlying servicing, principally by loan type. If temporary impairment exists within a tranche, a valuation allowance is established through a charge to income equal to the amount by which the carrying value exceeds the fair value. If it is later determined all or a portion of the temporary impairment no longer exists for a particular tranche, the valuation allowance is reduced through a recovery of income.

Table of Contents

The following table shows changes in the carrying value of MSR's and the associated valuation allowance.

(Dollars in thousands)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Mortgage servicing rights:				
Balance at beginning of period	\$4,695	\$4,634	\$4,844	\$4,645
Additions	443	572	890	1,498
Amortization	(334)	(328)	(930)	(1,265)
Sales	—	—	—	—
Carrying value before valuation allowance at end of period	4,804	4,878	4,804	4,878
Valuation allowance:				
Balance at beginning of period	—	—	—	—
Impairment (charges) recoveries	—	—	—	—
Balance at end of period	\$—	\$—	\$—	\$—
Net carrying value of mortgage servicing rights at end of period	\$4,804	\$4,878	\$4,804	\$4,878
Fair value of mortgage servicing rights at end of period	\$7,791	\$7,656	\$7,791	\$7,656

At September 30, 2014 and 2013, the fair value of MSR's exceeded the carrying value reported in the Statements of Financial Condition by \$2.99 million and \$2.78 million, respectively. This difference represents increases in the fair value of certain MSR's that could not be recorded above cost basis.

Mortgage loan contractual servicing fees, including late fees and ancillary income, were \$0.74 million and \$0.79 million for the three months ended September 30, 2014 and 2013, respectively. Mortgage loan contractual servicing fees, including late fees and ancillary income, were \$2.28 million and \$2.43 million for the nine months ended September 30, 2014 and 2013, respectively. Mortgage loan contractual servicing fees are included in Mortgage Banking Income on the Statements of Income.

Note 7. Commitments and Financial Instruments with Off-Balance-Sheet Risk

1st Source and its subsidiaries are parties to financial instruments with off-balance-sheet risk in the normal course of business. These off-balance-sheet financial instruments include commitments to originate and sell loans and standby letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Statements of Financial Condition. The exposure to credit loss in the event of nonperformance by the other party to the financial instruments for loan commitments and standby letters of credit is represented by the dollar amount of those instruments. The Company uses the same credit policies and collateral requirements in making commitments and conditional obligations as it does for on-balance-sheet instruments.

1st Source Bank (Bank), a subsidiary of 1st Source Corporation, grants mortgage loan commitments to borrowers, subject to normal loan underwriting standards. The interest rate risk associated with these loan commitments is managed by entering into contracts for future deliveries of loans. Loan commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

The Bank issues standby letters of credit which are conditional commitments that guarantee the performance of a client to a third party. The credit risk involved in and collateral obtained when issuing standby letters of credit is essentially the same as that involved in extending loan commitments to clients. Standby letters of credit totaled \$21.57 million and \$19.27 million at September 30, 2014 and December 31, 2013, respectively. Standby letters of credit

generally have terms ranging from six months to one year.

Note 8. Derivative Financial Instruments

Commitments to originate residential mortgage loans held for sale and forward commitments to sell residential mortgage loans are considered derivative instruments. See Note 7 for further information.

Table of Contents

The Company has certain interest rate derivative positions that are not designated as hedging instruments. Derivative assets and liabilities are recorded at fair value on the balance sheet and do take into account the effects of master netting agreements. Master netting agreements allow the Company to settle all derivative contracts held with a single counterparty on a net basis, and to offset net derivative positions with related collateral, where applicable. These derivative positions relate to transactions in which the Company enters into an interest rate swap with a client while at the same time entering into an offsetting interest rate swap with another financial institution. In connection with each transaction, the Company agrees to pay interest to the client on a notional amount at a variable interest rate and receive interest from the client on the same notional amount at a fixed interest rate. At the same time, the Company agrees to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows the client to effectively convert a variable rate loan to a fixed rate. Because the terms of the swaps with the customers and the other financial institutions offset each other, with the only difference being counterparty credit risk, changes in the fair value of the underlying derivative contracts are not materially different and do not significantly impact the Company's results of operations.

The following table shows the amounts of non-hedging derivative financial instruments.

(Dollars in thousands)	Notional or contractual amount	Asset derivatives	Fair value	Liability derivatives	Fair value
		Statement of Financial Condition classification		Statement of Financial Condition classification	
September 30, 2014					
Interest rate swap contracts	\$460,409	Other assets	\$8,548	Other liabilities	\$8,713
Loan commitments	13,409	N/A	—	Mortgages held for sale	3

Forward contracts - foreign exchange	Other income	82	—	78	—
Total		\$294	\$(847) \$125	\$394

Table of Contents

The following table shows the offsetting of financial assets and derivative assets.

(Dollars in thousands)	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statement of Financial Condition	Net Amounts of Assets Presented in the Statement of Financial Condition	Gross Amounts Not Offset in the Statement of Financial Condition		
				Financial Instruments	Cash Collateral Received	Net Amount
September 30, 2014						
Interest rate swaps	\$ 8,930	\$ 382	\$ 8,548	\$—	\$—	\$ 8,548
December 31, 2013						
Interest rate swaps	\$ 10,511	\$ 617	\$ 9,894	\$—	\$—	\$ 9,894

The following table shows the offsetting of financial liabilities and derivative liabilities.

(Dollars in thousands)	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Statement of Financial Condition	Net Amounts of Liabilities Presented in the Statement of Financial Condition	Gross Amounts Not Offset in the Statement of Financial Condition		
				Financial Instruments	Cash Collateral Pledged	Net Amount
September 30, 2014						
Interest rate swaps	\$ 9,095	\$ 382	\$8,713	\$—	\$8,097	\$ 616
Repurchase agreements	106,769	—	106,769	106,769	—	—
Total	\$ 115,864	\$ 382	\$ 115,482	\$ 106,769	\$8,097	\$ 616
December 31, 2013						
Interest rate swaps	\$ 10,704	\$ 617	\$ 10,087	\$—	\$8,409	\$ 1,678
Repurchase agreements	117,620	—	117,620	117,620	—	—
Total	\$ 128,324	\$ 617	\$ 127,707	\$ 117,620	\$8,409	\$ 1,678

If a default in performance of any obligation of a repurchase agreement occurs, each party will set-off property held in respect of transactions against obligations owing in respect of any other transactions.

Note 9. Earnings Per Share

Earnings per common share is computed using the two-class method. Basic earnings per common share is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding during the applicable period, excluding outstanding participating securities. Participating securities include non-vested restricted stock awards. Non-vested restricted stock awards are considered participating securities to the extent the holders of these securities receive non-forfeitable dividends at the same rate as holders of common stock. Diluted earnings per common share is computed using the weighted-average number of shares determined for the basic earnings per common share computation plus the dilutive effect of stock compensation using the treasury stock method. Stock options, where the exercise price was greater than the average market price of the common

shares, were excluded from the computation of diluted earnings per common share because the result would have been antidilutive. There were no stock options outstanding as of September 30, 2014 and 2013.

Table of Contents

The following table presents a reconciliation of the number of shares used in the calculation of basic and diluted earnings per common share.

	Three Months Ended September 30,		Nine Months Ended September 30,	
(Dollars in thousands - except per share amounts)	2014	2013	2014	2013
Distributed earnings allocated to common stock	\$4,299	\$4,146	\$12,796	\$12,429
Undistributed earnings allocated to common stock	10,466	10,552	29,733	28,271
Net earnings allocated to common stock	14,765	14,698	42,529	40,700
Net earnings allocated to participating securities	182	198	544	542
Net income allocated to common stock and participating securities	\$ 14,947	\$ 14,896	\$ 43,073	\$ 41,242
Weighted average shares outstanding for basic earnings per common share	23,875,331	24,366,220	24,088,636	24,352,073
Dilutive effect of stock compensation	—	889	—	781
Weighted average shares outstanding for diluted earnings per common share	23,875,331	24,367,109	24,088,636	24,352,854
Basic earnings per common share	\$0.62	\$0.60	\$1.77	\$1.67
Diluted earnings per common share	\$0.62	\$0.60	\$1.77	\$1.67

Note 10. Stock Based Compensation

As of September 30, 2014, the Company had four active stock-based employee compensation plans, which are more fully described in Note 16 of the Consolidated Financial Statements in 1st Source's Annual Report on Form 10-K for the year ended December 31, 2013. These plans include three executive stock award plans, the Executive Incentive Plan, the Restricted Stock Award Plan, the 1998 Performance Compensation Plan; and the Employee Stock Purchase Plan. The 2011 Stock Option Plan was approved by the shareholders on April 21, 2011 but the Company had not made any grants through September 30, 2014.

Stock-based compensation expense for all stock-based compensation awards granted is based on the grant-date fair value. For all awards except stock option awards, the grant date fair value is either the fair market value per share or book value per share (corresponding to the type of stock awarded) as of the grant date. For stock option awards, the grant date fair value is estimated using the Black-Scholes option pricing model. For all awards the Company recognizes these compensation costs only for those shares expected to vest on a straight-line basis over the requisite service period of the award, for which the Company uses the related vesting term. The Company estimates forfeiture rates based on historical employee option exercise and employee termination experience. The Company has identified separate groups of award recipients that exhibit similar option exercise behavior and employee termination experience and have considered them as separate groups in the valuation models and expense estimates.

The stock-based compensation expense recognized in the Statements of Income for the three and nine months ended September 30, 2014 and 2013 was based on awards ultimately expected to vest, and accordingly has been adjusted by the amount of estimated forfeitures. GAAP requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures were estimated based partially on historical experience.

Total fair value of options vested and expensed was zero for the nine months ended September 30, 2014 and 2013. As of September 30, 2014 and 2013 there were no outstanding stock options. There were 7,500 stock options exercised at a weighted average price of \$12.04 during the nine months ended September 30, 2013. All shares issued in connection

with stock option exercises are issued from available treasury stock.

As of September 30, 2014, there was \$6.94 million of total unrecognized compensation cost related to non-vested share-based compensation arrangements. That cost is expected to be recognized over a weighted-average period of 3.22 years.

Table of Contents

Note 11. Accumulated Other Comprehensive Income

The following table presents reclassifications out of accumulated other comprehensive income related to unrealized gains and losses on available-for-sale securities:

(Dollars in thousands)	Three Months Ended		Nine Months Ended		Affected Line Item in the Statements of Income
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013	
Realized gains (losses) included in net income	\$—	\$(28)) \$963	\$(28)) Gains (losses) on investment securities available-for-sale
	—	(28)) 963	(28)) Income before income taxes
Tax effect	—	11	(361)) 11	Income tax expense
Net of tax	\$—	\$(17)) \$602	\$(17)) Net income

Note 12. Income Taxes

The total amount of unrecognized tax benefits that would affect the effective tax rate if recognized was \$2.37 million at September 30, 2014 and \$2.62 million at December 31, 2013. Interest and penalties were recognized through the income tax provision. For the nine months ended September 30, 2014 and 2013, the Company recognized approximately \$(0.13) million and \$0.11 million in interest, net of tax effect, and penalties, respectively. Interest and penalties of approximately \$0.56 million and \$0.69 million were accrued at September 30, 2014 and December 31, 2013, respectively.

Effective January 1, 2014, the Indiana Financial Institutions Tax (FIT) rate decreased from 8.5% to 8.0% and will continue to decrease by 0.5% each of the next three years. As a result of the rate change, the Company decreased the carrying value of certain state deferred tax assets. The impact of this change was not material and was recorded in the financial statements during the second quarter of 2013. Additionally, on March 26, 2014, FIT tax rate decreases from 6.5% in 2018 to 4.9% in 2023 were enacted. These further decreases did not have an impact on the Company's deferred taxes and as a result, no amount was recorded in the Company's financial statements for this rate change.

Tax years that remain open and subject to audit include the federal 2011-2013 years and the Indiana 2009-2013 years. The Company does not anticipate a significant change in the amount of uncertain tax positions within the next 12 months.

Note 13. Fair Value Measurements

The Company records certain assets and liabilities at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are also utilized to determine the initial value of certain assets and liabilities, to perform impairment assessments, and for disclosure purposes. The Company uses quoted market prices and observable inputs to the maximum extent possible when measuring fair value. In the absence of quoted market prices, various valuation techniques are utilized to measure fair value. When possible, observable market data for identical or similar financial instruments is used in the valuation. When market data is not available, fair value is determined using valuation models that incorporate management's estimates of the assumptions a market participant would use in pricing the asset or liability.

Fair value measurements are classified within one of three levels based on the observability of the inputs used to determine fair value, as follows:

•Level 1 — The valuation is based on quoted prices in active markets for identical instruments.

Level 2 — The valuation is based on observable inputs such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 — The valuation is based on unobservable inputs that are supported by minimal or no market activity and that are significant to the fair value of the instrument. Level 3 valuations are typically performed using pricing models, discounted cash flow methodologies, or similar techniques that incorporate management's own estimates of assumptions that market participants would use in pricing the instrument, or valuations that require significant management judgment or estimation.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

Table of Contents

The Company elected fair value accounting for mortgages held for sale. The Company believes the election for mortgages held for sale (which are economically hedged with free standing derivatives) will reduce certain timing differences and better match changes in the value of these assets with changes in the value of derivatives used as economic hedges for these assets. At September 30, 2014 and December 31, 2013, all mortgages held for sale were carried at fair value.

The following table shows the differences between the fair value carrying amount of mortgages held for sale measured at fair value and the aggregate unpaid principal amount the Company is contractually entitled to receive at maturity.

(Dollars in thousands)	Fair value carrying amount	Aggregate unpaid principal	Excess of fair value carrying amount over (under) unpaid principal
September 30, 2014			
Mortgages held for sale reported at fair value	\$ 13,070	\$ 13,126	\$ (56) (1)
December 31, 2013			
Mortgages held for sale reported at fair value	\$ 6,079	\$ 5,974	\$ 105 (1)

The excess of fair value carrying amount over (under) unpaid principal is included in mortgage banking income (1) and includes changes in fair value at and subsequent to funding and gains and losses on the related loan commitment prior to funding.

Financial Instruments on Recurring Basis:

The following is a description of the valuation methodologies used for financial instruments measured at fair value on a recurring basis:

Investment securities available for sale are valued primarily by a third party pricing agent. Prices supplied by the independent pricing agent, as well as their pricing methodologies and assumptions, are reviewed by the Company for reasonableness and to ensure such prices are aligned with market levels. In general, the Company's investment securities do not possess a complex structure that could introduce greater valuation risk. The portfolio mainly consists of traditional investments including U.S. Treasury and Federal agencies securities, federal agency mortgage pass-through securities, and general obligation and revenue municipal bonds. Pricing for such instruments is fairly generic and is easily obtained. On a quarterly basis, prices supplied by the pricing agent are validated by comparison to prices obtained from other third party sources for a material portion of the portfolio.

The valuation policy and procedures for Level 3 fair value measurements of available for sale debt securities are decided through collaboration between management of the Corporate Accounting and Funds Management departments. The changes in fair value measurement for Level 3 securities are analyzed on a periodic basis under a collaborative framework with the aforementioned departments. The methodology and variables used for input are derived from the combination of observable and unobservable inputs. The unobservable inputs are determined through internal assumptions that may vary from period to period due to external factors, such as market movement and credit rating adjustments.

Both the market and income valuation approaches are implemented using the following types of inputs:

U.S. treasuries are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.

Government-sponsored agency debt securities and corporate bonds are primarily priced using available market information through processes such as benchmark curves, market valuations of like securities, sector groupings and matrix pricing.

Other government-sponsored agency securities, mortgage-backed securities and some of the actively traded REMICs and CMOs, are primarily priced using available market information including benchmark yields, prepayment speeds, spreads and volatility of similar securities.

Other inactive government-sponsored agency securities are primarily priced using consensus pricing and dealer quotes.

State and political subdivisions are largely grouped by characteristics, i.e., geographical data and source of revenue in trade dissemination systems. Since some securities are not traded daily and due to other grouping limitations, active market quotes are often obtained using benchmarking for like securities. Local direct placement municipal securities, with very little market activity, are priced using an appropriate market yield curve.

Table of Contents

Marketable equity (common) securities are primarily priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.

Trading account securities are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.

Mortgages held for sale and the related loan commitments and forward contracts (hedges) are valued using a market value approach and utilizing an appropriate current market yield and a loan commitment closing rate based on historical analysis.

Interest rate swap positions, both assets and liabilities, are valued by a third party pricing agent using an income approach and utilizing models that use as their basis readily observable market parameters. This valuation process considers various factors including interest rate yield curves, time value and volatility factors. Validation of third party agent valuations is accomplished by comparing those values to the Company's swap counterparty valuations. Management believes an adjustment is required to "mid-market" valuations for derivatives tied to its performing loan portfolio to recognize the imprecision and related exposure inherent in the process of estimating expected credit losses as well as velocity of deterioration evident with systemic risks embedded in these portfolios.

Table of Contents

Table of Contents

The following table shows changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the quarter ended September 30, 2014 and 2013.

(Dollars in thousands)	U.S. States and political subdivisions securities	Foreign government and other securities	Investment securities available-for-sale
Beginning balance July 1, 2014	\$ 4,699	\$905	\$ 5,604
Total gains or losses (realized/unrealized):			
Included in earnings	—	—	—
Included in other comprehensive income	(14) 3	(11)
Purchases	—	—	—
Issuances	—	—	—
Sales	—	—	—
Settlements	—	—	—
Maturities	(763) (100) (863)
Transfers into Level 3	—	—	—
Transfers out of Level 3	—	—	—
Ending balance September 30, 2014	\$ 3,922	\$808	\$ 4,730
Beginning balance July 1, 2013	\$ 5,452	\$—	\$ 5,452
Total gains or losses (realized/unrealized):			
Included in earnings	—	—	—
Included in other comprehensive income	56	—	56
Purchases	1,500	—	1,500
Issuances	—	—	—
Sales	—	—	—
Settlements	—	—	—
Maturities	(491) —	(491)
Transfers into Level 3	—	—	—
Transfers out of Level 3	—	—	—
Ending balance September 30, 2013	\$ 6,517	\$—	\$ 6,517

There were no gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to assets and liabilities still held at September 30, 2014 or 2013. No transfers between levels occurred during the three months ended September 30, 2014 or 2013.

The following table shows the valuation methodology and unobservable inputs for Level 3 assets and liabilities measured at fair value on a recurring basis.

(Dollars in thousands)	Fair Value	Valuation Methodology	Unobservable Inputs	Range of Inputs
September 30, 2014				
Investment securities available-for sale				
Direct placement municipal securities	\$3,922	Discounted cash flows	Credit spread assumption	0.69% - 1.29%
Foreign government	\$808	Discounted cash flows	Market yield assumption	0.42% - 1.57%

December 31, 2013

Investment securities available-for sale

Direct placement municipal securities	\$5,498	Discounted cash flows	Credit spread assumption	0.90% - 1.52%
---------------------------------------	---------	-----------------------	--------------------------	---------------

The sensitivity to changes in the unobservable inputs and their impact on the fair value measurement can be significant. The significant unobservable input for direct placement municipal securities are the credit spread assumptions used to determine the fair value measure. An increase (decrease) in the estimated spread assumption of the market will decrease (increase) the fair value measure of the securities. The significant unobservable input for foreign government securities are the market yield assumptions. The market yield assumption is negatively correlated to the fair value measure. An increase (decrease) in the determined market yield assumption will decrease (increase) the fair value measurement.

Table of Contents

Financial Instruments on Non-recurring Basis:

The Company may be required, from time to time, to measure certain other financial assets at fair value on a non-recurring basis in accordance with GAAP. These adjustments to fair value usually result from application of lower of cost or market accounting or impairment charges of individual assets.

The Credit Policy Committee (CPC), a management committee, is responsible for overseeing the valuation processes and procedures for Level 3 measurements of impaired loans, other real estate and repossessions. The CPC reviews these assets on a quarterly basis to determine the accuracy of the observable inputs, generally third party appraisals, auction values, values derived from trade publications and data submitted by the borrower, and the appropriateness of the unobservable inputs, generally discounts due to current market conditions and collection issues. The CPC establishes discounts based on asset type and valuation source; deviations from the standard are documented. The discounts are reviewed periodically, annually at a minimum, to determine they remain appropriate. Consideration is given to current trends in market values for the asset categories and gains and losses on sales of similar assets. The Loan and Funds Management Committee of the Board of Directors is responsible for overseeing the CPC.

Discounts vary depending on the nature of the assets and the source of value. Aircraft are generally valued using quarterly trade publications adjusted for engine time, condition, maintenance programs, discounted by 10%. Likewise, autos are valued using current auction values, discounted by 10%; medium and heavy duty trucks are valued using trade publications and auction values, discounted by 15%. Construction equipment and environmental equipment is generally valued using trade publications and auction values, discounted by 20%. Real estate is valued based on appraisals or evaluations, discounted by 20% at a minimum with higher discounts for property in poor condition or property with characteristics which may make it more difficult to market. Commercial loans subject to borrowing base certificates are generally discounted by 20% for receivables and 40% - 75% for inventory with higher discounts when monthly borrowing base certificates are not required or received.

Impaired loans and related write-downs are based on the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are reviewed quarterly and estimated using customized discounting criteria, appraisals and dealer and trade magazine quotes which are used in a market valuation approach. In accordance with fair value measurements, only impaired loans for which a reserve for loan loss has been established based on the fair value of collateral require classification in the fair value hierarchy. As a result, only a portion of the Company's impaired loans are classified in the fair value hierarchy.

Partnership investments and the adjustments to fair value primarily result from application of lower of cost or fair value accounting. The partnership investments are priced using financial statements provided by the partnerships. Quantitative unobservable inputs are not reasonably available for reporting purposes.

The Company has established MSR valuation policies and procedures based on industry standards and to ensure valuation methodologies are consistent and verifiable. MSRs and related adjustments to fair value result from application of lower of cost or fair value accounting. For purposes of impairment, MSRs are stratified based on the predominant risk characteristics of the underlying servicing, principally by loan type. The fair value of each tranche of the servicing portfolio is estimated by calculating the present value of estimated future net servicing cash flows, taking into consideration actual and expected mortgage loan prepayment rates, discount rates, servicing costs, and other economic factors. Prepayment rates and discount rates are derived through a third party pricing agent. Changes in the most significant inputs, including prepayment rates and discount rates, are compared to the changes in the fair value measurements and appropriate resolution is made. A fair value analysis is also obtained from an independent third party agent and compared to the internal valuation for reasonableness. MSRs do not trade in an active, open market with readily observable prices and though sales of MSRs do occur, precise terms and conditions typically are not readily available and the characteristics of the Company's servicing portfolio may differ from those of any servicing

portfolios that do trade.

Other real estate is based on the lower of cost or fair value of the underlying collateral less expected selling costs. Collateral values are estimated primarily using appraisals and reflect a market value approach. Fair values are reviewed quarterly and new appraisals are obtained annually. Repossessions are similarly valued.

For assets measured at fair value on a nonrecurring basis the following represents impairment charges (recoveries) recognized on these assets during the quarter ended September 30, 2014: impaired loans \$3.00 million; partnership investments - \$0.03 million; mortgage servicing rights \$0.00 million; repossessions \$0.00 million, and other real estate - \$0.11 million.

Table of Contents

The following table shows the carrying value of assets measured at fair value on a non-recurring basis.

(Dollars in thousands)	Level 1	Level 2	Level 3	Total
September 30, 2014

* Represents estimated cash outflows required to currently settle the obligations at current market rates.

The methodologies for estimating fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. The estimated fair value approximates carrying value for cash and due from banks, federal funds sold and interest bearing deposits with other banks, other investments, and cash surrender value of life insurance policies. The methodologies for other financial assets and financial liabilities are discussed below:

Loans and Leases — For variable rate loans and leases that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair values of other loans and leases are estimated using discounted cash flow analyses which use interest rates currently being offered for loans and leases with similar terms to borrowers of similar credit quality.

Deposits — The fair values for all deposits other than time deposits are equal to the amounts payable on demand (the carrying value). Fair values of variable rate time deposits are equal to their carrying values. Fair values for fixed rate time deposits are estimated using discounted cash flow analyses using interest rates currently being offered for deposits with similar remaining maturities.

Table of Contents

Short-Term Borrowings — The carrying values of Federal funds purchased, securities sold under repurchase agreements, and other short-term borrowings, including the liability related to mortgage loans available for repurchase under GNMA optional repurchase programs, approximate their fair values.

Long-Term Debt and Mandatorily Redeemable Securities — The fair values of long-term debt are estimated using discounted cash flow analyses, based on the current estimated incremental borrowing rates for similar types of borrowing arrangements. The carrying values of mandatorily redeemable securities are based on the current estimated cost of redeeming these securities which approximate their fair values.

Subordinated Notes — Fair values are estimated based on calculated market prices of comparable securities.

Off-Balance-Sheet Instruments — Contract and fair values for certain off-balance-sheet financial instruments (guarantees) are estimated based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

Limitations — Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instruments. Because no market exists for a significant portion of the financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other such factors.

These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. These estimates are subjective in nature and require considerable judgment to interpret market data. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange, nor are they intended to represent the fair value of the Company as a whole. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. The fair value estimates presented herein are based on pertinent information available to management as of the respective balance sheet date. Although the Company is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued since the presentation dates, and therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein.

Other significant assets, such as premises and equipment, other assets, and liabilities not defined as financial instruments, are not included in the above disclosures. Also, the fair value estimates for deposits do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market.

ITEM 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following management's discussion and analysis is presented to provide information concerning 1st Source Corporation and its subsidiaries' (collectively referred to as "the Company", "we", and "our") financial condition as of September 30, 2014, as compared to December 31, 2013, and the results of operations for the three and nine months ended September 30, 2014 and 2013. This discussion and analysis should be read in conjunction with our consolidated financial statements and the financial and statistical data appearing elsewhere in this report and our 2013 Annual Report.

Except for historical information contained herein, the matters discussed in this document express "forward-looking statements." Generally, the words "believe," "contemplate," "seek," "plan," "possible," "assume," "expect," "intend," "targeted," "remain," "estimate," "anticipate," "project," "will," "should," "indicate," "would," "may" and other similar expressions are used to identify forward-looking statements but are not the exclusive means of identifying such statements. Those statements, including statements, projections, estimates or assumptions concerning future events or performance, and other statements that are other than statements of historical fact, are subject to material risks and uncertainties. We caution readers not to place undue reliance on any forward-looking statements, which speak only as of the date made. We may make other written or oral forward-looking statements from time to time. Readers are advised that various important factors could cause our actual results or circumstances for future periods to differ materially from those anticipated or projected in such forward-looking statements. Such factors include, but are not limited to, changes in law, regulations or GAAP; our competitive position within the markets we serve; increasing consolidation within the banking industry; unforeseen changes in interest rates; unforeseen changes in loan prepayment assumptions; unforeseen downturns in or major events affecting the local, regional or national economies or the industries in which we have credit concentrations; and other matters discussed in our filings with the SEC, including our Annual Report on Form 10-K for 2013, which filings are available from the SEC. We undertake no obligation to publicly update or revise any forward-looking statements.

FINANCIAL CONDITION

Our total assets at September 30, 2014 were \$4.82 billion, an increase of \$97.97 million or 2.07% from December 31, 2013. Total loans and leases were \$3.65 billion, an increase of \$105.10 million or 2.96% from December 31, 2013. Total investment securities, available for sale were \$813.70 million which represented a decrease of \$19.00 million or 2.28% and total deposits were \$3.84 billion, an increase of \$182.32 million or 4.99% over the comparable figures at the end of 2013. Short-term borrowings were \$216.72 million, a decrease of \$97.41 million or 31.01% from December 31, 2013.

Nonperforming assets at September 30, 2014 were \$34.94 million, a decrease of \$11.81 million or 25.26% from the \$46.75 million reported at December 31, 2013. At September 30, 2014 and December 31, 2013, nonperforming assets were 0.94% and 1.29%, respectively of net loans and leases.

The following table shows accrued income and other assets.

(Dollars in thousands)	September 30, 2014	December 31, 2013
Accrued income and other assets:		
Bank owned life insurance cash surrender value	\$60,048	\$58,558

CAPITAL

As of September 30, 2014, total shareholders' equity was \$603.03 million, up \$17.66 million or 3.02% from the \$585.38 million at December 31, 2013. In addition to net income of \$43.07 million, other significant changes in shareholders' equity during the first nine months of 2014 included \$16.34 million of common stock acquired for treasury and \$12.89 million of dividends paid. The accumulated other comprehensive income/(loss) component of shareholders' equity totaled \$8.65 million at September 30, 2014, compared to \$6.58 million at December 31, 2013. The increase in accumulated other comprehensive income/(loss) during 2014 was the result of changes in unrealized gain/(loss) on securities in the available-for-sale portfolio. Our equity-to-assets ratio was 12.51% as of September 30, 2014, compared to 12.39% at December 31, 2013. Book value per common share rose to \$25.27 at September 30, 2014, from \$24.07 at December 31, 2013.

We declared and paid dividends per common share of \$0.18 during the third quarter of 2014. The trailing four quarters dividend payout ratio, representing dividends per common share divided by diluted earnings per common share, was 30.70%. The dividend payout is continually reviewed by management and the Board of Directors subject to the Company's capital and dividend policy.

The banking regulators have established guidelines for leverage capital requirements, expressed in terms of Tier 1 or core capital as a percentage of average assets, to measure the soundness of a financial institution. In addition, banking regulators have established risk-based capital guidelines for U.S. banking organizations. The actual capital amounts and ratios of 1st Source Corporation and 1st Source Bank as of September 30, 2014, are presented in the table below:

(Dollars in thousands)	Actual		Minimum Capital Adequacy		To Be Well Capitalized Under Prompt Corrective Action Provisions		
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
Total Capital (to Risk-Weighted Assets):							
1st Source Corporation	\$617,226	15.80	% \$312,473	8.00	% \$390,591	10.00	%

LIQUIDITY AND INTEREST RATE SENSITIVITY

Effective liquidity management ensures that the cash flow requirements of depositors and borrowers, as well as our operating cash needs are met. Funds are available from a number of sources, including the securities portfolio, the core deposit base, Federal Home Loan Bank (FHLB) borrowings, Federal Reserve Bank (FRB) borrowings, and the capability to package loans for sale.

We have borrowing sources available to supplement deposits and meet our funding needs. 1st Source Bank has established relationships with several banks to provide short term borrowings in the form of federal funds purchased. At September 30, 2014, we had no outstandings and could borrow approximately \$265.00 million for a short time

from these banks on a collective basis. As of September 30, 2014, we had \$102.71 million outstanding in FHLB advances and could borrow an additional \$128.74 million. We also had \$366.70 million available to borrow from the FRB with no amounts outstanding as of September 30, 2014.

Our loan to asset ratio was 75.81% at September 30, 2014 compared to 75.15% at December 31, 2013 and 74.58% at September 30, 2013. Cash and cash equivalents totaled \$81.71 million at September 30, 2014 compared to \$80.05 million at December 31, 2013 and \$91.77 million at September 30, 2013. At September 30, 2014, the Statement of Financial Condition was rate sensitive by \$342.60 million more assets than liabilities scheduled to reprice within one year, or approximately 1.17%. Management believes that the present funding sources provide adequate liquidity to meet our cash flow needs.

Under Indiana law governing the collateralization of public fund deposits, the Indiana Board of Depositories determines which financial institutions are required to pledge collateral based on the strength of their financial ratings. We have been informed that no collateral is required for our public fund deposits. However, the Board of Depositories could alter this requirement in the future and adversely impact our liquidity. Our potential liquidity exposure if we must pledge collateral is approximately \$554 million.

Table of Contents

RESULTS OF OPERATIONS

Net income for the three and nine month periods ended September 30, 2014 was \$14.95 million and \$43.07 million, compared to \$14.90 million and \$41.24 million for the same periods in 2013. Diluted net income per common share was \$0.62 and \$1.77 for the three and nine month periods ended September 30, 2014, compared to \$0.60 and \$1.67 for the same periods in 2013. Return on average common shareholders' equity was 9.62% for the nine months ended September 30, 2014, compared to 9.65% in 2013. The return on total average assets was 1.20% for the nine months ended September 30, 2014 and 2013.

The increase in net income for the nine months ended September 30, 2014, over the first nine months of 2013, was primarily the result of an increase in net interest income and a decrease in noninterest expense and income tax expense. Details of the changes in the various components of net income are discussed further below.

NET INTEREST INCOME

The taxable equivalent net interest income for the three months ended September 30, 2014 was \$41.17 million, a decrease of 1.03% over the same period in 2013. The net interest margin on a fully taxable equivalent basis was 3.58% for the three months ended September 30, 2014, compared to 3.79% for the three months ended September 30, 2013. The taxable equivalent net interest income for the nine months ended September 30, 2014 was \$120.88 million, an increase of 1.46% over 2013, resulting in a net interest margin of 3.59% compared to a net interest margin of 3.69% for the same period in 2013.

During the three and nine month periods ended September 30, 2014, average earning assets increased \$211.14 million or 4.85% and \$192.20 million or 4.46% respectively, over the comparable periods in 2013. Average interest-bearing liabilities increased \$132.80 million or 4.03% and \$118.94 million or 3.62% respectively, for the three and nine month periods ended September 30, 2014 over the comparable periods one year ago. The yield on average earning assets decreased 35 basis points to 3.97% for the third quarter of 2014 from 4.32% for the third quarter of 2013. The yield on average earning assets for the nine month period ended September 30, 2014 decreased 24 basis points to 4.00% from 4.24% for the nine month period ended September 30, 2013. The rate earned on assets decreased due to the reduction in loan and investment yields in the current interest rate environment. Total cost of average interest-bearing liabilities decreased 19 basis points to 0.51% for the third quarter 2014 from 0.70% for the third quarter 2013. Total cost of average interest-bearing liabilities decreased 18 basis points to 0.54% for the nine months ended September 30, 2014, from 0.72% for the nine months ended September 30, 2013. The result to the net interest margin, or the ratio of net interest income to average earning assets, was a decrease of 21 basis points and 10 basis points respectively, for the three and nine month periods ended September 30, 2014 from September 30, 2013.

The largest contributor to the decrease in the yield on average earning assets for the nine months ended September 30, 2014, compared to the nine months ended September 30, 2013, was a reduction in yields on net loans and leases of 34 basis points. Average net loans and leases increased \$216.77 million or 6.22% for the third quarter of 2014 from the third quarter of 2013 and \$220.19 million or 6.45% for the nine months ended September 30, 2014 compared to the same period in 2013. Total average investment securities decreased \$16.89 million or 2.05% for the third quarter and decreased \$16.79 million or 1.99% for the nine month period over one year ago. Average mortgages held for sale increased \$5.65 million or 70.75% and \$2.68 million or 32.18% respectively, for the three and nine month periods ended September 30, 2014, over the comparable periods a year ago. Average other investments, which include federal funds sold, time deposits with other banks, Federal Reserve Bank excess balances, Federal Reserve Bank and Federal Home Loan Bank stock and commercial paper, increased \$5.61 million or 16.41% and decreased \$13.88 million or 29.13% respectively, for the three and nine month periods ended September 30, 2014, over the comparable periods a year ago.

Average interest-bearing deposits increased \$59.90 million or 2.00% and decreased \$4.25 million or 0.14% respectively, for the third quarter of 2014 and the first nine months of 2014 over the same periods in 2013. The effective rate paid on average interest-bearing deposits decreased 18 basis points to 0.36% for the third quarter 2014 compared to 0.54% for the third quarter 2013. The effective rate paid on average interest-bearing deposits decreased 19 basis points to 0.39% for the first nine months of 2014 compared to 0.58% for the first nine months of 2013. The decline in the average cost of interest-bearing deposits during the third quarter of 2014 and the first nine months of 2014 as compared to the third quarter and first nine months of 2013 was primarily the result of interest rate re-pricing on maturing certificates of deposit and the continued change in deposit mix.

Table of Contents

Average short-term borrowings increased \$74.35 million or 39.96% and increased \$129.18 million or 86.92% respectively, for the third quarter of 2014 and the first nine months of 2014 compared to the same periods in 2013 in order to fund loan growth. Interest paid on short-term borrowings increased 5 basis points for the third quarter and increased 8 basis points for the first nine months of 2014. Average long-term debt decreased \$1.45 million or 2.49% during the third quarter of 2014 as compared to the third quarter of 2013 and decreased \$5.99 million or 9.31% during the first nine months of 2014 as compared to the first nine months of 2013. The decrease in long-term borrowings during the third quarter and first nine months of 2014 as compared to the third quarter and first nine months of 2013 was the result of decreased borrowings with the Federal Home Loan Bank (FHLB). Interest paid on long-term borrowings decreased 62 basis points for the third quarter compared to the third quarter of 2013 due to lower rates on mandatorily redeemable securities and lower effective rates on FHLB borrowings. Interest paid on long-term borrowings increased 78 basis points for the first nine months of 2014 compared to the first nine months of 2013 due to higher rates on mandatorily redeemable securities, offset by lower effective rates on FHLB borrowings.

The following table provides an analysis of net interest income and illustrates the interest income earned and interest expense charged for each major component of interest earning assets and interest bearing liabilities. Yields/rates are computed on a tax-equivalent basis, using a 35% rate. Nonaccrual loans and leases are included in the average loan and lease balance outstanding.

Table of Contents

PROVISION AND RESERVE FOR LOAN AND LEASE LOSSES

The provision for loan and lease losses for the three and nine month periods ended September 30, 2014 was \$1.21 million and \$4.55 million respectively, compared to a provision for loan and lease losses in the three and nine month periods ended September 30, 2013 of \$(0.42) million and \$1.63 million respectively. Net charge-offs of \$2.58 million were recorded for the third quarter 2014, compared to net charge-offs of \$0.76 million for the same quarter a year ago. Year-to-date net charge-offs of \$0.66 million have been recorded in 2014, compared to net charge-offs of \$0.44 million through September 30, 2013.

On September 30, 2014, 30 day and over loan and lease delinquencies were 0.36% compared to 0.26% on September 30, 2013. The increase in delinquencies occurred primarily in the aircraft portfolio. The reserve for loan and lease losses as a percentage of loans and leases outstanding at the end of the period was 2.39% as compared to 2.44% one year ago. A summary of loan and lease loss experience during the three and nine months ended September 30, 2014 and 2013 is located in Note 5 of the Consolidated Financial Statements.

A loan or lease is considered impaired, based on current information and events, if it is probable that we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan or lease agreement. We evaluate loans and leases exceeding \$100,000 for impairment and establish a specific reserve as a component of the reserve for loan and lease losses when it is probable all amounts due will not be collected pursuant to the contractual terms of the loan or lease and the recorded investment in the loan or lease exceeds its fair value. A summary of impaired loans as of September 30, 2014 and December 31, 2013 is reflected in Note 4 of the Consolidated Financial Statements.

NONPERFORMING ASSETS

The following table shows nonperforming assets.

(Dollars in thousands)	September 30, 2014	December 31, 2013	September 30, 2013
Loans and leases past due 90 days or more	\$750	\$287	\$245
Nonaccrual loans and leases	26,524	36,707	31,325
Other real estate	1,433	4,539	5,002
Former bank premises held for sale	801	951	951
Repossessions	5,421	4,262	2,811
Equipment owned under operating leases	15	—	—
Total nonperforming assets	\$34,944	\$46,746	\$40,334

Nonperforming assets as a percentage of total loans and leases were 0.94% at September 30, 2014, 1.29% at December 31, 2013, and 1.14% at September 30, 2013. Nonperforming assets totaled \$34.94 million at September 30, 2014, a decrease of 25.25% from the \$46.75 million reported at December 31, 2013, and a 13.36% decrease from the \$40.33 million reported at September 30, 2013. The decrease in nonperforming assets during the first nine months of 2014 was primarily related to a decrease in nonaccrual loans and leases and the sale of other real estate as the economy slowly improves. The decrease in nonperforming assets at September 30, 2014 from September 30, 2013 occurred primarily in nonaccrual loans and leases and the sale of other real estate offset by increased repossessions. On a rolling quarter basis, nonperforming assets decreased \$6.15 million or 14.90% during the third quarter of 2014 from the \$41.09 million reported at June 30, 2014, largely due to one paydown and one charge-off in the commercial and agricultural portfolio.

The decrease in nonaccrual loans and leases at September 30, 2014 from December 31, 2013 and September 30, 2013 occurred primarily in the aircraft, auto and light truck and commercial real estate portfolios offset by an increase in commercial and agricultural loans. A summary of nonaccrual loans and leases and past due aging for the period ended September 30, 2014 and December 31, 2013 is located in Note 4 of the Consolidated Financial Statements.

Other real estate is the result of foreclosing on real estate in the local market for which we have a current appraisal and are well secured. Other real estate decreased over the past year due to current sales of existing properties outpacing current foreclosures.

Repossessions consisted mainly of aircraft financing at September 30, 2014 and December 31, 2013. At the time of repossession, the recorded amount of the loan or lease is written down to the fair value of the equipment or vehicle by a charge to the reserve for loan and lease losses or other income, if a positive adjustment, unless the equipment is in the process of immediate sale. Any subsequent fair value write-downs or write-ups, to the extent of previous write-downs, are included in noninterest expense.

Table of Contents

The following table shows a summary of other real estate and repossessions.

(Dollars in thousands)	September 30, 2014	December 31, 2013	September 30, 2013
Commercial and agricultural loans	\$—	\$23	\$—
Auto and light truck	77	145	96
Medium and heavy duty truck	66	—	66
Aircraft financing	5,260	4,082	2,632
Construction equipment financing	88	—	—
Commercial real estate	537	3,101	3,589
Residential real estate	546	959	1,060
Consumer loans	280	491	370
Total	\$6,854	\$8,801	\$7,813

For financial statement purposes, nonaccrual loans and leases are included in loan and lease outstandings, whereas repossessions and other real estate are included in other assets.

Foreign Outstandings — Our foreign loan and lease outstandings, all denominated in U.S. dollars except for one loan denominated in Euros, which was not significant, were \$213.98 million and \$270.30 million as of September 30, 2014 and December 31, 2013, respectively. Foreign loans and leases are in aircraft financing. Loan and lease outstandings to borrowers in Brazil and Mexico were \$108.59 million and \$83.31 million as of September 30, 2014, respectively, compared to \$142.79 million and \$77.96 million as of December 31, 2013, respectively. As of September 30, 2014 and December 31, 2013 there was not a significant concentration in any other country.

NONINTEREST INCOME

Noninterest income for the three month period ended September 30, 2014 and 2013 was \$19.39 million and \$20.16 million, respectively. Noninterest income for the nine month period ended September 30, 2014 and 2013 was \$58.01 million and \$59.23 million, respectively. The following table shows the details of noninterest income.

(Dollars in thousands)	Three Months Ended September 30,		Nine Months Ended September 30,		
	2014	2013	2014	2013	
Noninterest income:					
Trust fees	\$4,499	\$5,260	\$13,930	\$13,800	
Service charges on deposit accounts	2,225	2,364	6,498	6,928	
Debit card income	2,382	2,343	7,077	6,752	
Mortgage banking income	1,446	1,103	3,961	4,667	
Insurance commissions	1,317	1,292	4,168	4,131	
Equipment rental income	4,361	4,000	12,541	12,098	
Gains (losses) on investment securities available-for-sale	—	(28) 963	(28)
Other income	3,162	3,824	8,873	10,879	
Total noninterest income	\$19,392	\$20,158	\$58,011	\$59,227	

Noninterest income decreased \$0.77 million or 3.80% for the three months ended September 30, 2014 as compared to the same period in 2013. Noninterest income decreased \$1.22 million or 2.05% for the nine months ended September 30, 2014 as compared to the same period one year ago. Insurance commissions increased slightly during the third quarter of 2014 and during the first nine months of 2014 compared to the same periods in 2013.

Trust fees decreased \$0.76 million or 14.47% during the third quarter of 2014 and increased slightly during the first nine months of 2014 compared to the same periods in 2013. The decrease in trust fees during the third quarter was primarily the result of a reduction in fixed income investments held in the trust accounts of clients. Trust fees are largely based on the size of client relationships and the market value of assets under management. The market value of trust assets under management at September 30, 2014 and December 31, 2013 was \$3.86 billion and \$3.80 billion, respectively.

Service charges on deposit accounts decreased \$0.14 million or 5.88% and \$0.43 million or 6.21% for the three and nine months ended September 30, 2014, respectively over the comparable periods one year ago. The decrease in service charges on deposit accounts reflects a lower volume of nonsufficient fund transactions.

Table of Contents

Debit card income increased slightly during the third quarter of 2014 and increased \$0.33 million or 4.81% during the first nine months of 2014 compared to the same periods in 2013. The increase in debit card income was the result of an increased volume of debit card transactions in 2014 and a higher fee structure that went into effect at the end of the first quarter of 2013.

Mortgage banking income increased \$0.34 million or 31.10% in the third quarter of 2014 as compared to the third quarter of 2013. This variance was primarily caused by increased gains on loan sales due to higher production volumes and increased profit margins. Mortgage banking income decreased \$0.71 million or 15.13% during the first nine months of 2014 versus the first nine months of 2013. This variance was primarily caused by decreased gains on loan sales due to reduced profit margins offset by lower mortgage servicing rights amortization expense in 2014.

Equipment rental income increased \$0.36 million or 9.03% and \$0.44 million or 3.66% for the three and nine months ended September 30, 2014, respectively over the comparable periods one year ago. The increase in equipment rental income was the result of improving market conditions for equipment finance.

There were no gains on investment securities available-for-sale during the third quarter of 2014 and losses of \$0.28 million during the third quarter 2013 related to the sale of federal agency securities. Gains on investment securities available-for-sale increased \$0.99 million during the first nine months of 2014 versus the first nine months of 2013 due to the partial sale of a marketable equity security.

Other income decreased \$0.66 million or 17.31% and \$2.01 million or 18.44% for the three and nine months ended September 30, 2014, respectively over the same periods a year ago. The decrease was the result of losses on partnership investments in 2014, lower dividend income, monogram fund income and customer swap fee income offset by higher mutual fund income.

NONINTEREST EXPENSE

Noninterest expense for the three month period ended September 30, 2014 and 2013 was \$37.65 million and \$38.43 million, respectively. Noninterest expense for the nine month period ended September 30, 2014 and 2013 was \$108.05 million and \$110.72 million, respectively. The following table shows the details of noninterest expense.

(Dollars in thousands)	Three Months Ended		Nine Months Ended	
	September 30, 2014	2013	September 30, 2014	2013
Noninterest expense:				
Salaries and employee benefits	\$20,790	\$20,441	\$59,099	\$59,553
Net occupancy expense	2,252	2,126	6,924	6,480
Furniture and equipment expense	4,415	4,477	13,065	12,285
Depreciation - leased equipment	3,571	3,246	10,110	9,745
Professional fees	1,158	1,178	3,348	3,843
Supplies and communication	1,424	1,330	4,153	4,365
FDIC and other insurance	856	874	2,570	2,679
Business development and marketing expense	1,218	1,306	3,801	3,011
Loan and lease collection and repossession expense	652	1,530	140	3,382
Other expense	1,317	1,922	4,839	5,381
Total noninterest expense	\$37,653	\$38,430	\$108,049	\$110,724

Noninterest expense decreased \$0.78 million or 2.02% for the third quarter and \$2.68 million or 2.42% for year-to-date 2014 as compared to the same periods in 2013. Supplies and communication expense increased slightly during the third quarter of 2014 compared to the same period a year ago. Supplies and communication expense and FDIC and other insurance expense decreased slightly in the nine months ended September 30, 2014 over the same period in 2013.

Salaries and employee benefits increased \$0.35 million or 1.71% for the three months ended September 30, 2014 compared to the same period in 2013 and decreased \$0.45 million or 0.76% in the nine month period ended September 30, 2014 compared to the same period a year ago. The increase for the third quarter 2014 was due to higher base salary and group insurance costs offset by lower executive incentives. The year-to-date decrease was a result of lower group insurance costs, producer commissions and executive incentives.

Table of Contents

Net occupancy expense increased slightly during the third quarter of 2014 compared to the same period a year ago and increased \$0.44 million or 6.85% for year-to-date 2014 compared to the same period in 2013. The year-to-date increase was primarily a result of higher snow removal services that were incurred during the first quarter of 2014.

Furniture and equipment expense decreased slightly during the third quarter 2014 and increased \$0.78 million or 6.35% for year-to-date 2014 compared to the same periods in 2013. Furniture and equipment expense was higher year-to-date 2014 mainly due to increased computer processing charges, software maintenance costs and equipment repairs.

During the third quarter and first nine months of 2014 depreciation on leased equipment increased \$0.33 million or 10.01% and \$0.37 million or 3.75%, respectively in conjunction with the increase in equipment rental income as compared to the same periods one year ago.

Professional fees decreased slightly during the third quarter and decreased \$0.50 million or 12.88% for the first nine months of 2014, as compared to the same periods a year ago. The lower professional fees in 2014 was primarily the result of reduced utilization of consulting services.

Business development and marketing expense declined slightly for the three months ended September 30, 2014 versus the three months ended September 30, 2013 and increased \$0.79 million or 26.24% for the nine months ended September 30, 2014 versus the nine months ended September 30, 2013. The year-to-date increase was mainly due to higher charitable contributions.

Loan and lease collection and repossession expense decreased \$0.88 million or 57.39% for the three months ended September 30, 2014 compared to the same period in 2013 primarily due to lower repurchased mortgage loan losses and gains on the sale of other real estate owned offset by higher collection and repossession expenses. Loan and lease collection and repossession expense decreased \$3.24 million or 95.86% in the nine month period ended September 30, 2014 compared to the same period a year ago mainly due to gains on the sale of other real estate owned and repossessions and lower repurchased mortgage loan losses offset by higher collection and repossession expenses.

Other expenses decreased \$0.61 million or 31.48% and \$0.54 million or 10.07% in the three and nine month periods ended September 30, 2014, respectively, as compared to the same periods in 2013. The decrease during the third quarter primarily related to a lower provision on unfunded loan commitments. Other expenses year-to-date were lower due to decreased expenses related to a previously reported trustee matter.

INCOME TAXES

The provision for income taxes for the three and nine month periods ended September 30, 2014 was \$6.30 million and \$21.83 million, respectively compared to \$8.41 million and \$23.41 million for the same periods in 2013. The effective tax rates were 29.64% and 36.08% for the third quarter ended September 30, 2014 and 2013, respectively and 33.63% and 36.21% for the nine months ended September 30, 2014 and 2013, respectively. The provision for income taxes included a one-time benefit of \$1.18 million which resulted in a lower effective tax rate for the three and nine months ended September 30, 2014. This benefit was the result of a reduction in uncertain tax positions due to settlements with taxing authorities and the lapse of the applicable statute of limitations.

Effective January 1, 2014, the Indiana Financial Institutions Tax (FIT) rate decreased from 8.5% to 8.0% and will continue to decrease by 0.5% each of the next three years. As a result of the rate change, we decreased the carrying value of certain state deferred tax assets. The impact of this change was not material and was recorded in the financial statements during the second quarter of 2013. Additionally, on March 26, 2014, FIT tax rate decreases from 6.5% in 2018 to 4.9% in 2023 were enacted. These further decreases did not have an impact on our deferred taxes and as a

result, no amount was recorded in our financial statements for this rate change.

ITEM 3.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in market risks faced by 1st Source since December 31, 2013. For information regarding our market risk, refer to 1st Source's Annual Report on Form 10-K for the year ended December 31, 2013.

ITEM 4.

CONTROLS AND PROCEDURES

As of the end of the period covered by this report an evaluation was carried out, under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, at September 30, 2014, our disclosure controls and procedures were effective in ensuring that information required to be disclosed by 1st Source in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and are designed to ensure that information required to be disclosed in those reports is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

In addition, there were no changes in our internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during the third fiscal quarter of 2014 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings.

1st Source and its subsidiaries are involved in various legal proceedings incidental to the conduct of our businesses. Management does not expect that the outcome of any such proceedings will have a material adverse effect on our consolidated financial position or results of operations.

ITEM 1A. Risk Factors.

There have been no material changes in risks faced by 1st Source since December 31, 2013. For information regarding our risk factors, refer to 1st Source's Annual Report on Form 10-K for the year ended December 31, 2013.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs*	Maximum Number (or Approximate Dollar Value) of Shares that may yet be Purchased Under the Plans or Programs
July 01 - 31, 2014	—	\$—	—	2,000,000
August 01 - 31, 2014	600	29.10	600	1,999,400
September 01 - 30, 2014	17,948	29.40	17,948	1,981,452

* 1st Source maintains a stock repurchase plan that was authorized by the Board of Directors on July 24, 2014. This authorization shall supersede any prior repurchase authorizations. Under the terms of the plan, 1st Source may repurchase up to 2,000,000 shares of its common stock from time to time to mitigate the potential dilutive effects of stock-based incentive plans and other potential uses of common stock for corporate purposes. Since the inception of the plan, 1st Source has repurchased a total of 18,548 shares.
