QUESTAR NET INCOME GROWS 42% IN 2005**Company Adjusts 2006 Earnings Guidance to Reflect Lower Price Expectations**

SALT LAKE CITY Questar Corp. (NYSE:STR) a natural gas-focused energy company reported a 42% increase in net income in 2005 to \$325.7 million, or \$3.74 per diluted share, compared to \$229.3 million, or \$2.67 per diluted share, for the prior year. The increase was driven by higher production and higher realized prices for natural gas, oil and natural gas liquids (NGL), and increased gas-gathering and processing volumes and margins.

Fourth-quarter and full-year results were reduced by \$10.4 million, or \$0.12 per diluted share, for a non-cash after-tax charge for impairment of the California segment of the Southern Trails Pipeline, which is owned by a subsidiary, Questar Pipeline. Excluding the charge, Questar 2005 net income was \$336.1 million, or \$3.86 per diluted share.

For the fourth quarter of 2005, Questar earned \$104.0 million, or \$1.19 per diluted share including the effect of the \$10.4 million charge compared to \$73.7 million, or \$0.85 per diluted share, in the 2004 period.

Earnings per diluted share	\$3.74	\$2.67	40%

Like other natural gas producers, Questar E&P benefited from higher natural gas and oil prices, said Keith O. Rattie, Questar chairman, president and CEO. But the real story is the growth in our E&P and gathering and processing businesses. Against the backdrop of three straight years of declining U.S. natural gas production, we grew production 15% in the fourth quarter and 10% for the full year to 114.2 billion cubic feet of gas equivalent. We did it with the drill bit, not acquisitions and we did it despite seasonal drilling restrictions in the Rockies and an industrywide shortage of rigs.

Rattie said that the company now expects 2006 earnings to range from \$4.30 to \$4.60 per diluted share compared to earlier guidance of \$4.50 to \$5.00 per diluted share. The revised guidance reflects the recent sharp drop in natural gas prices and significantly wider basis differentials in both the Rockies and the Midcontinent, slightly offset by increased forecast production from Questar E&P. The company expects Rockies and Midcontinent basis differentials to be wider than previously assumed because existing pipelines are expected to operate at or near capacity in both regions for much of the year. New pipelines are needed to transport growing regional natural gas production, particularly in the Rockies.

2006 Guidance Update

	<u>Current</u>	<u>Previous</u>
Earnings per share	\$4.30-\$4.60	\$4.50-\$5.00
Avg. diluted shares (millions)	87.5	87.5
Questar E&P production - Bcfe	122-124	120 - 122
Pinedale wells completed	45-48	42
NYMEX gas price per MMBtu*	\$8.00-\$9.00	\$9.00-\$11.50
NYMEX/Rockies basis differential per MMBtu gas	\$2.25	\$1.50
NYMEX/Midcontinent basis differential per MMBtu gas	\$1.50	\$1.00
NYMEX crude oil price per barrel*	\$60-\$70	\$60-\$63

*Average on unhedged volumes

The company has hedged about 70% of its forecast 2006 natural gas and oil-equivalent production (see table at the end of this release). Accordingly, the company estimates that a \$1.00 per million Btu (MMBtu) change in the average NYMEX price of natural gas for the remainder of 2006 will result in about a \$0.14 change in earnings per diluted share. Similarly, a \$10.00 per-barrel change in the average NYMEX price of oil for the remainder of 2006 will result

in about a \$.03 per-share change in earnings per diluted share.

FULL-YEAR 2005 RESULTS

Highlights

- Questar Exploration and Production (Questar E&P) grew natural gas and oil production 10% to 114.2 billion cubic feet of gas equivalent (Bcfe). Natural gas comprised 88% of total production.
- Questar E&P realized prices for natural gas rose 24% while realized prices for crude oil and NGL rose 34%. Hedging reduced revenues by \$198.7 million.
- Wexpro invested \$57.8 million in the Rockies, boosting its investment base 13% to \$206.3 million at Dec. 31, 2005, versus \$182.8 million a year earlier. Wexpro produced 42.4 Bcfe on behalf of its affiliate, Questar Gas. Wexpro 2005 net income also benefited from 35% higher realized oil and NGL prices.
- Questar Gas Management gathering volumes rose 14%, while fee-based processing volumes rose 154% and NGL sales volumes grew 59%. Total margin from processing, both fee-based and keep-whole, increased 86%.
- Questar Pipeline revenues grew 6%, while net income before the impairment charge and a fuel-cost reimbursement settlement rose 9% on new transportation contracts, including contracts on its southern-system expansion, and higher NGL prices.
- Questar Gas benefited from the settlement with Utah regulators of a long-standing gas processing dispute. Temperature-adjusted average usage per customer declined 6% in the fourth quarter and 1% for the year as customers responded to the hurricane-related spike in natural gas prices. Higher revenues resulted from the addition of 30,300 customers a 3.8% annual growth rate.
- Questar ROA (Return on Assets, defined as earnings before interest and income taxes divided by average total assets) increased to 14.5% in 2005. Market Resources ROA was 19.2%, Questar Pipeline ROA was 10.0% excluding the impairment charge, and Questar Gas ROA was 7.4% in 2005.

Questar Market Resources Drives Net Income Growth

Questar Market Resources (Market Resources) which conducts natural gas and oil exploration, development and production, gas gathering and processing, wholesale gas and oil marketing and gas storage reported net income of \$258.2 million in 2005.

Questar Exploration and Production

Market Resources subsidiary Questar E&P reported net income of \$172.8 million in 2005. Questar E&P production grew 10% to 114.2 Bcfe compared to 103.5 Bcfe in 2004. On an energy-equivalent basis, natural gas comprised about 88% of Questar E&P 2005 production.

Questar E&P -- Production by Region

	12 Months Ended		3 Months Ended	
	December 31,		December 31,	
	2005	2004	2005	2004
	(Bcfe)		(Bcfe)	
Pinedale Anticline	33.2	23.5	10.4	7.5
Uinta Basin	25.6	24.8	6.4	6.0
Rockies Legacy	16.7	18.0	4.3	4.5
Rocky Mountains Total	75.5	66.3	21.1	18.0
Midcontinent	38.7	37.2	10.6	9.6
Questar E&P Total	114.2	103.5	31.7	27.6

Questar E&P production from the Pinedale Anticline in western Wyoming grew 41% in 2005 and comprised about 29% of Questar E&P total production for the year. Market Resources subsidiaries completed 40 new wells at Pinedale during 2005. The company operated and had an interest in 144 producing wells at year-end versus 104 wells a year earlier. On 10-acre density, Questar E&P has over 932 potential Lance Pool well locations at Pinedale. Of the 788 locations yet to be drilled, 203 were booked as proved undeveloped at year end, leaving over 585 locations unbooked. Questar E&P has an average Lance Pool working interest of 59.4% and an average net revenue interest of 47.5% in 873 of the 932 locations. Wexpro has an average Lance Pool working interest of 51.3% in 215 of the 932 locations - resulting in a combined average Lance Pool working interest for Questar E&P and Wexpro of 67.5% in the 932 locations.

In the Uinta Basin of eastern Utah, Questar E&P grew production 3% despite production constraints related to third-quarter construction and maintenance on an interstate pipeline that serves the area. Production from Questar E&P Rocky Mountain Legacy properties declined 7% in 2005 due to normal decline from older wells, seasonal access restrictions that delayed the drilling and completion of new wells and payout of a high-volume well that reduced the company's working interest. Legacy assets include all Questar E&P Rocky Mountain producing properties except the

Edgar Filing: QUESTAR CORP - Form 8-K

Pinedale Anticline and the Uinta Basin. In the Midcontinent, Questar E&P grew production 4% to 38.7 Bcfe, driven by ongoing development drilling in the Elm Grove field in northwest Louisiana.

Questar E&P average realized natural gas price increased 24% in 2005 to \$5.18 per thousand cubic feet (Mcf) compared to \$4.18 per Mcf for 2004. For 2005, Questar E&P average realized price for oil and NGL was \$41.54 per barrel compared with \$30.97 a year earlier, a 34% increase. Hedging reduced gas revenues \$173.9 million and oil revenues \$24.8 million during 2005.

Questar may hedge up to 100% of its forecast production from proved reserves to lock in acceptable returns on invested capital and to protect returns, cash flow and net income from a decline in commodity prices. During 2005, Questar E&P continued to take advantage of higher natural gas and oil prices to hedge additional production in 2006, 2007 and 2008.

Questar E&P controllable production costs (the sum of depreciation, depletion and amortization expense, lease operating expense, general and administrative expense, and allocated interest expense) per unit of production increased 9% in 2005.

Questar E&P Controllable Production Cost Structure

	12 Months Ended			3 Months Ended		
	December 31,			December 31,		
	2005	2004	% Chg.	2005	2004	% Chg.
	(Per Mcfe)			(Per Mcfe)		
Depreciation, depletion and amortization	\$1.18	\$1.04	13%	\$1.21	\$1.05	15%
Lease operating expense	0.54	0.50	8	0.52	0.49	6
General and administrative expense	0.30	0.30	-	0.26	0.30	-13
Allocated interest expense	0.21	0.21	-	0.20	0.20	-
Controllable costs (excludes taxes)	\$2.23	\$2.05	9%	\$2.19	\$2.04	7%

Depreciation, depletion and amortization increased due to higher costs for drilling, completion and related services, increased cost of steel casing, other tubulars and wellhead equipment, and the ongoing depletion of older, lower-cost reserves. Lease operating expense rose due to increased costs of materials and consumables and increased workover expense in the Legacy, Uinta Basin, and Midcontinent divisions.

Questar E&P year-end 2005 proved reserves increased 3% to 1,480 Bcfe versus 1,434 Bcfe a year earlier. The company replaced 141% of its production. The majority of the company's 2005 activity was focused on development drilling on previously-booked proved undeveloped locations at Pinedale and the Uinta Basin.

Wexpro

Wexpro, a Market Resources subsidiary that develops and produces cost-of-service reserves for Questar Gas, reported net income of \$43.7 million in 2005. Under a long-standing agreement with the states of Utah and Wyoming, Wexpro recovers its costs and earns an unlevered after-tax return of approximately 19% on its investment base—the investment in commercial wells and related facilities, adjusted for working capital and reduced for deferred income taxes and accumulated depreciation. Wexpro invested \$57.8 million in the Rockies, boosting its investment base 13% to \$206.3 million at Dec. 31, 2005, versus \$182.8 million a year earlier. Wexpro produced 42.4 Bcfe on behalf of its affiliate, Questar Gas. Wexpro 2005 net income also benefited from 35% higher realized oil and NGL prices.

Midstream Field Services – Gas Gathering and Processing

Questar Gas Management (Gas Management), Market Resources' gas-gathering and processing-services business, grew net income 70% to \$35.7 million in 2005. Gas Management's 2005 results benefited from favorable gas-processing margins and a 59% increase in NGL sales volumes related to the first-quarter 2005 acquisition of a gas-processing plant in the western Green River Basin. Gathering volumes were up 14% to 257.0 million MMBtu for 2005 compared to 2004 due primarily to growing Questar E&P and third-party Pinedale production and new gathering and processing projects serving third parties in the Uinta Basin.

Questar Energy Trading

Questar Energy Trading (Energy Trading), which sells Market Resources' equity gas and oil, provides risk-management services, and operates a natural gas-storage facility in the Rockies, reported net income of \$6.0 million in 2005 versus \$0.9 million in 2004. Energy Trading benefited from increased marketing volumes, increased storage activity and improved margins.

Interstate Natural Gas Transportation & Storage

Questar Pipeline, a subsidiary that provides interstate natural gas-transportation and storage services, reported net income of \$24.4 million in 2005 compared to \$27.6 million in 2004. Questar Pipeline recorded a \$10.4 million after-tax asset impairment for the western segment of the company's Southern Trails Pipeline in the fourth quarter of 2005, reducing book investment to approximately \$35 million.

Questar Pipeline 2004 net income was reduced \$3.0 million as a result of a Federal Energy Regulatory Commission (FERC) order in a fuel-charge proceeding. In July 2005 the FERC approved a settlement under which the company refunded half the disputed amount to its customers. Questar Pipeline retained the other half, resulting in a \$1.5 million increase in net income in 2005.

Excluding the effects of the 2005 asset impairment and the 2004 FERC order, Questar Pipeline 2005 net income was up 9% to \$33.3 million compared to \$30.6 million in 2004. Increased transportation-capacity commitments and higher NGL sales prices drove 6% revenue growth. In November 2005, Questar Pipeline placed in service a \$55 million, 102 MdtH-per-day expansion of its southern system, which is expected to add about \$9.6 million of revenues per year.

Retail Natural Gas Distribution

Questar Gas, the company's retail gas-distribution utility, reported net income of \$36.0 million in 2005. Higher revenues resulted from a record addition of 30,300 customers—a 3.8% annual growth rate. Questar Gas serves approximately 824,000 homes and businesses in Utah, southwestern Wyoming and southeastern Idaho. Higher revenues were partially offset by increased bad-debt expense and labor costs and a 1% decline in weather-normalized usage per customer.

Questar Gas fourth-quarter 2005 net income increased \$3.0 million with the Public Service Commission of Utah approval of a gas-processing settlement agreement. The settlement resolved a long-standing dispute over rate coverage for safety-related processing and provides ongoing rate coverage of about \$6 million a year through January 2008. Questar Gas 2004 net income was reduced \$4.3 million for processing expense that was not covered in rates.

Earnings per diluted share	\$1.19	\$0.85	40%
----------------------------	--------	--------	-----

Highlights

-

Questar E&P fourth-quarter production grew 15%. Realized natural gas prices increased 33% and realized crude oil and NGL prices were up 34% compared with the 2004 period.

-

Wexpro investment base for fourth-quarter 2005 averaged \$199.3 million versus \$174.7 million in the 2004 period.

-

Gas Management gathering volumes were up 31% compared to the 2004 quarter. Fee-based processing volumes were up 295% from the 2004 quarter. NGL sales volumes were up 73%. Total margin from processing, both fee-based and keep-whole, increased 77% in the fourth quarter of 2005 compared with the year-ago period.

-

Questar Pipeline signed a memorandum of understanding to build, own and operate the westernmost segment of the proposed Rockies Express Pipeline Project, extending from Opal to Wamsutter, Wyoming. If built, the Kinder Morgan and Sempra Energy-owned pipeline will transport Rocky Mountain gas to the U.S. Northeast later this decade.

-

Questar Gas fourth-quarter 2005 net income was reduced by a 6% decline in average customer usage (temperature adjusted), compared to the fourth quarter of 2004. Questar Gas customers cut usage in response to higher prices.

Fourth-Quarter 2005 Results

Questar E&P production for the 2005 quarter grew 15% to 31.7 Bcfe compared to 27.6 Bcfe for the 2004 quarter. Pinedale production comprised about 33% of total production for the 2005 period. The company's average realized natural gas price increased 33% in fourth-quarter 2005 to \$5.87 per Mcf compared to \$4.40 per Mcf for the comparable 2004 period. Questar E&P average realized price for oil and NGL was \$44.19 per barrel compared with \$33.08 a year earlier, a 34% increase. Hedging reduced revenues \$110.4 million in fourth-quarter 2005.

Questar Pipeline reported a net loss of \$0.8 million in the fourth quarter of 2005 due to the Southern Trails Pipeline impairment. Excluding the impairment and the 2004 FERC liquids-processing order, Questar Pipeline fourth-quarter 2005 net income was \$9.7 million, up 35% from \$7.2 million in the year-earlier quarter. Increased transportation revenues from the southern system expansion and higher NGL prices drove the improvement.

Questar Gas net income for fourth-quarter 2005 was \$20.6 million compared to \$18.9 million a year earlier. Of the 2005 \$3.0 million net-income benefit from the gas-processing settlement, \$0.8 million related to fourth-quarter operations. Increased revenues from customer growth were partially offset by higher bad-debt expense and a 6% decrease in weather-normalized usage per customer during the quarter. Questar Gas customers responded to the hurricane-related spike in natural gas prices and corresponding higher rates by cutting gas usage.

Questar management will discuss fourth-quarter and full-year 2005 results and its outlook for 2006 in a conference call with investors Wednesday, Feb. 15, beginning at 9:30 a.m. ET. The call can be accessed on the company Internet site at www.questar.com.
