As used in this Form 10-Q, the terms “Air Group,” the “Company,” “our,” “we” and “us,” refer to Alaska Air Group, Inc. and its subsidiaries, unless the context indicates otherwise. Alaska Airlines, Inc. and Horizon Air Industries, Inc. are referred to as “Alaska” and “Horizon,” respectively, and together as our “airlines.”

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Cautionary Note Regarding Forward-Looking Statements

In addition to historical information, this Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. Forward-looking statements are those that predict or describe future events or trends and that do not relate solely to historical matters. You can generally identify forward-looking statements as statements containing the words "believe," "expect," "will," "anticipate," "intend," "estimate," "project," "assume" or other similar expressions, although not all forward-looking statements contain these identifying words. Forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from historical experience or the Company's present expectations. Some of the things that could cause our actual results to differ from our expectations are:

- the competitive environment in our industry;
- changes in our operating costs, primarily fuel, which can be volatile;
- general economic conditions, including the impact of those conditions on customer travel behavior;
- our ability to meet our cost reduction goals;
- operational disruptions;
- an aircraft accident or incident;
- labor disputes and our ability to attract and retain qualified personnel;
- the concentration of our revenue from a few key markets;
- actual or threatened terrorist attacks, global instability and potential U.S. military actions or activities;
- our reliance on automated systems and the risks associated with changes made to those systems;
- changes in laws and regulations.

You should not place undue reliance on our forward-looking statements because the matters they describe are subject to known and unknown risks, uncertainties and other unpredictable factors, many of which are beyond our control. Our forward-looking statements are based on the information currently available to us and speak only as of the date on which this report was filed with the SEC. We expressly disclaim any obligation to issue any updates or revisions to our forward-looking statements, even if subsequent events cause our expectations to change regarding the matters discussed in those statements. Over time, our actual results, performance or achievements will likely differ from the anticipated results, performance or achievements that are expressed or implied by our forward-looking statements, and such differences might be significant and materially adverse to our shareholders. For a discussion of these and other risk factors, see Item 1A. "Risk Factors" of the Company's annual report on Form 10-K for the year ended December 31, 2014, and Item 1A. "Risk Factors" included herein. Please consider our forward-looking statements in light of those risks as you read this report.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

NOTE 1. GENERAL AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Basis of Presentation

The interim condensed consolidated financial statements include the accounts of Alaska Air Group, Inc. (Air Group or the Company) and its subsidiaries, Alaska Airlines, Inc. (Alaska) and Horizon Air Industries, Inc. (Horizon), through which the Company conducts substantially all of its operations. All intercompany balances and transactions have been eliminated. These financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information. Consistent with these requirements, this Form 10-Q does not include all the information required by GAAP for complete financial statements. As a result, this Form 10-Q should be read in conjunction with the Consolidated Financial Statements and accompanying Notes in the Form 10-K for the year ended December 31, 2014. In the opinion of management, all adjustments have been made that are necessary to present fairly the Company's financial position as of September 30, 2015, as well as the results of operations for the three and nine months ended September 30, 2015 and 2014. The adjustments made were of a normal recurring nature.

In preparing these statements, the Company is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities, as well as the reported amounts of revenues and expenses. Due to seasonal variations in the demand for air travel, the volatility of aircraft fuel prices, changes in global economic conditions, changes in the competitive environment, and other factors, operating results for the three and nine months ended September 30, 2015, are not necessarily indicative of operating results for the entire year.

Certain reclassifications, such as changes in our equity structure, have been made to prior year financial statements to conform with classifications used in the current year.

Recently Issued Accounting Pronouncements

In May 2014, the FASB issued Accounting Standard Update 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09), which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. In July 2015, the FASB agreed to defer the effective date one year, and now allows early adoption one year prior to the effective date. The standard would be effective for the Company on January 1, 2018, and early adoption is allowed on January 1, 2017. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined whether or not it will early adopt the standard.

NOTE 2. CASH, CASH EQUIVALENTS AND MARKETABLE SECURITIES

Components for cash, cash equivalents and marketable securities (in millions):

September 30, 2015	Cost Basis	Unrealized Gains	Unrealized Losses	Fair Value
Cash	\$3	\$—	\$—	\$3
Cash equivalents	85	—	—	85
Cash and cash equivalents	88	—	—	88
	188	1	—	189

Edgar Filing: ALASKA AIR GROUP, INC. - Form 10-Q

U.S. government and agency securities				
Foreign government bonds	31	—	—	31
Asset-backed securities	137	—	—	137
Mortgage-backed securities	107	—	—	107
Corporate notes and bonds	682	5	(3) 684
Municipal securities	22	—	—	22
Marketable securities	1,167	6	(3) 1,170
Total	\$1,255	\$6	\$(3) \$1,258

9

December 31, 2014	Cost Basis	Unrealized Gains	Unrealized Losses	Fair Value
Cash	\$4	\$—	\$—	\$4
Cash equivalents	103	—	—	103
Cash and cash equivalents	107	—	—	107
U.S. government and agency securities	166	—	—	166
Foreign government bonds	25	—	—	25
Asset-backed securities	130	—	—	130
Mortgage-backed securities	127	—	(1) 126
Corporate notes and bonds	644	3	(2) 645
Municipal securities	18	—	—	18
Marketable securities	1,110	3	(3) 1,110
Total	\$1,217	\$3	\$(3) \$1,217

Unrealized losses from fixed-income securities are primarily attributable to changes in interest rates. Management does not believe any remaining unrealized losses represent other-than-temporary impairments based on our evaluation of available evidence as of September 30, 2015.

Activity for marketable securities (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Proceeds from sales and maturities	\$142	\$341	\$818	\$739

Due in one year or less	\$171	\$171
Due after one year through five years	993	995
Due after five years through 10 years	3	4
Due after 10 years	—	—
Total	\$1,167	\$1,170

NOTE 3. DERIVATIVE INSTRUMENTS

Fuel Hedge Contracts

The Company's operations are inherently dependent upon the price and availability of aircraft fuel. To manage economic risks associated with fluctuations in aircraft fuel prices, the Company periodically enters into call options for crude oil.

As of September 30, 2015, the Company had outstanding fuel hedge contracts covering 259 million gallons of crude oil that will be settled from October 2015 to March 2017. Refer to the contractual obligations and commitments section of Item 2 for further information.

Interest Rate Swap Agreements

The Company has interest rate swap agreements with a third party designed to hedge the volatility of the underlying variable interest rate in the Company's aircraft lease agreements for six Boeing 737-800 aircraft. The agreements stipulate that the Company pay a fixed interest rate over the term of the contract and receive a floating interest rate. All significant terms of the swap agreement match the terms of the lease agreements, including interest-rate index, rate reset dates, termination dates and underlying notional values. The agreements expire from February 2020 through March 2021 to coincide with the lease termination dates.

Fair Values of Derivative Instruments

Fair values of derivative instruments on the consolidated balance sheet (in millions):

	September 30, 2015	December 31, 2014
Derivative Instruments Not Designated as Hedges		
Fuel hedge contracts		
Fuel hedge contracts, current assets	\$3	\$3
Fuel hedge contracts, noncurrent assets	2	4
Derivative Instruments Designated as Hedges		
Interest rate swaps		
Other accrued liabilities	(6) (6
Other liabilities	(16) (13
Losses in accumulated other comprehensive loss (AOCL)	(22) (19

The net cash received (paid) for new positions and settlements was (\$4) million and \$1 million during the three months ended September 30, 2015 and 2014, respectively. The net cash received (paid) for new positions and settlements was (\$12) million and (\$4) million during the nine months ended September 30, 2015 and 2014, respectively.

Pretax effect of derivative instruments on earnings (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Derivative Instruments Not Designated as Hedges				
Fuel hedge contracts:				
Gains (losses) recognized in aircraft fuel expense	\$(10) \$(11) \$(14) \$(17
Derivative Instruments Designated as Hedges				
Interest rate swaps:				
Losses recognized in aircraft rent	(2) (2) (5) (5
Gains (losses) recognized in other comprehensive income (OCI)	(5) —	(8) (5

The Company expects \$6 million to be reclassified from AOCL to aircraft rent within the next twelve months.

Credit Risk and Collateral

The Company maintains security agreements with a number of its counterparties which may require the Company to post collateral if the fair value of the selected derivative instruments fall below specified mark-to-market thresholds. The posted collateral does not offset the fair value of the derivative instruments and is included in "Prepaid expenses and other current assets" on the consolidated balance sheet. The Company posted collateral of \$5 million and \$3 million as of September 30, 2015 and December 31, 2014, respectively.

NOTE 4. FAIR VALUE MEASUREMENTS

Fair Value of Financial Instruments on a Recurring Basis

Fair values of financial instruments on the consolidated balance sheet (in millions):

September 30, 2015	Level 1	Level 2	Total
Assets			
Marketable securities			
U.S. government and agency securities	\$ 189	\$—	\$ 189
All other securities	—	981	981
Derivative instruments			
Fuel hedge call options	—	5	5
Liabilities			
Derivative instruments			
Interest rate swap agreements	—	(22) (22
December 31, 2014			
Assets			
Marketable securities			
U.S. government and agency securities	\$ 166	\$—	\$ 166
All other securities	—	944	944
Derivative instruments			
Fuel hedge call options	—	7	7
Liabilities			
Derivative instruments			
Interest rate swap agreements	—	(19) (19

The Company uses the market and income approach to determine the fair value of marketable securities. U.S. government securities are Level 1 as the fair value is based on quoted prices in active markets. All other securities (Foreign government bonds, asset-backed securities, mortgage-backed securities, corporate notes and bonds, and municipal securities) are Level 2 as the fair value is based on industry standard valuation models that are calculated based on observable inputs.

The Company uses the market approach and the income approach to determine the fair value of derivative instruments. Fuel hedge contracts are Level 2 as the fair value is primarily based on inputs which are readily available in active markets or can be derived from information available in active markets. The fair value considers the exposure to credit losses in the event of nonperformance by counterparties. Interest rate swap agreements are Level 2 as the fair value of these contracts is determined based on the difference between the fixed interest rate in the agreements and the observable LIBOR-based forward interest rates at period end, multiplied by the total notional value.

The Company has no financial assets that are measured at fair value on a nonrecurring basis at September 30, 2015.

Fair Value of Other Financial Instruments

The Company used the following methods and assumptions to determine the fair value of financial instruments that are not recognized at fair value as described below.

Cash and Cash Equivalents: Carried at amortized cost, which approximates fair value.

Debt: The carrying amount of the Company's variable-rate debt approximates fair values. For fixed-rate debt, the Company uses the income approach to determine the estimated fair value, through a discounted cash flow analysis using interest rates for

12

comparable debt over the weighted remaining life of the outstanding debt. The estimated fair value of the fixed-rate debt is Level 3 as certain inputs used are unobservable.

Fixed-rate debt that is not carried at fair value on the consolidated balance sheet and the estimated fair value of long-term fixed-rate debt (in millions):

	September 30, 2015	December 31, 2014
Carrying amount	\$540	\$614
Fair value	575	666

NOTE 5. MILEAGE PLAN

Alaska's Mileage Plan liabilities and deferrals on the consolidated balance sheets (in millions):

	September 30, 2015	December 31, 2014
Current Liabilities:		
Other accrued liabilities	\$368	\$343
Other Liabilities and Credits:		
Deferred revenue	410	367
Other liabilities	20	20
Total	\$798	\$730

Alaska's Mileage Plan revenue included in the consolidated statements of operations (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Passenger revenues	\$66	\$62	\$199	\$180
Other - net revenues	85	77	244	223
Total	\$151	\$139	\$443	\$403

NOTE 6. LONG-TERM DEBT

Long-term debt obligations on the consolidated balance sheet (in millions):

	September 30, 2015	December 31, 2014		
Fixed-rate notes payable due through 2024	\$540	\$614		
Variable-rate notes payable due through 2025	170	189		
Total debt	710	803		
Less current portion	117	117		
Long-term debt, less current portion	\$593	\$686		
Weighted-average fixed-interest rate	5.7	% 5.7		%
Weighted-average variable-interest rate	1.8	% 1.6		%

During the nine months ended September 30, 2015, the Company made debt payments of \$93 million.

At September 30, 2015, long-term debt principal payments for the next five years and thereafter are as follows (in millions):

	Total
Remainder of 2015	\$24
2016	115
2017	121
2018	151
2019	114
Thereafter	185
Total	\$710

Bank Lines of Credit

The Company has two \$100 million variable rate credit facilities, with interest rates based on LIBOR plus a specified margin. One of the \$100 million facilities, which expires in September 2017, is secured by aircraft. The other \$100 million facility, which expires in March 2017, is secured by certain accounts receivable, spare engines, spare parts and ground service equipment. The Company has no immediate plans to borrow using either of these facilities. These facilities have a requirement to maintain a minimum unrestricted cash and marketable securities balance of \$500 million. The Company is in compliance with this covenant at September 30, 2015.

On October 2, 2015, the Company entered into a \$52 million credit facility. The facility is secured with two aircraft in place of restricted cash.

NOTE 7. EMPLOYEE BENEFIT PLANS

Net periodic benefit costs recognized in the consolidated statements of operations (in millions):

NOTE 8. COMMITMENTS

Future minimum fixed payments for commitments (in millions):

	Aircraft Commitments	Capacity Purchase Agreements (CPA)	Aircraft Leases ^(a)	Facility Leases
September 30, 2015				
Remainder of 2015	\$51	\$16	\$13	\$25
2016	601	67	112	98
2017	544	58	103	93
2018	428	60	98	43
2019	372	64	90	41
Thereafter	650	623	548	209
Total	\$2,646	\$888	\$964	\$509

^(a) Includes embedded leases under the CPA with SkyWest.

Aircraft Commitments

As of September 30, 2015, the Company has purchase commitments for 71 B737 aircraft (34 737-900ER aircraft and 37 737 MAX aircraft) and two Q400 aircraft, with deliveries in 2015 through 2022. In addition, the Company has options to purchase 46 B737 aircraft and five Q400 aircraft.

Capacity Purchase Agreements (CPAs)

At September 30, 2015, Alaska had CPAs with three carriers, including the Company's wholly-owned subsidiary, Horizon. Horizon sells 100% of its capacity to Alaska under a CPA, for which all intercompany transactions are eliminated upon consolidation. In addition, Alaska has CPAs with SkyWest Airlines, Inc. (SkyWest) to fly certain routes and Peninsula Airways, Inc. (PenAir) to fly one route in the state of Alaska. Under these agreements, Alaska pays the third-party carriers an amount which is based on a determination of their cost of operating those flights and other factors. The costs paid by Alaska to Horizon are based on similar data and are intended to approximate market rates for those services. Future payments (excluding those due to Horizon) are based on contractually required minimum levels of flying by the third-party carriers, which could differ materially due to variable payments based on actual levels of flying and certain costs associated with operating flights, such as fuel.

During the second quarter Alaska signed an amendment to the CPA with SkyWest to remove the eight CRJ-700 aircraft out of regional operations and replace them with eight E175 aircraft. Six of these CRJ-700 aircraft are leased by the Company and two of the aircraft are owned by the Company. The E175 aircraft will be introduced into service throughout 2016, at which time the CRJ-700 aircraft will be removed from service. The CPA with SkyWest is a service contract that, in accordance with GAAP, includes embedded leases related to the aircraft operated under the agreement.

Lease Commitments

At September 30, 2015, the Company had lease contracts for 27 B737 aircraft, 15 Q400 aircraft, 6 CRJ-700 aircraft (operated by SkyWest), and 8 CRJ-700 aircraft that are subleased and operated by another carrier (i.e. not in the Company's fleet). In addition, the Company has 15 E175 aircraft under the CPA with SkyWest, 3 of which are included in the fleet as of September 30, 2015. All lease contracts have remaining noncancelable lease terms ranging from 2015 to 2028. The Company has the option to increase capacity flown by SkyWest with eight additional E175 aircraft with 2018 delivery dates.

In addition, the Company has also contracted for eight E175 regional aircraft that will enter service in 2017.

The majority of airport and terminal facilities are also leased. Rent expense for aircraft and facility leases was \$77 million and \$74 million for the three months ended September 30, 2015 and 2014, respectively. Rent expense for aircraft and facility leases was \$217 million and \$215 million for the nine months ended September 30, 2015 and 2014, respectively.

NOTE 9. SHAREHOLDERS' EQUITY

Dividends

During the three months ended September 30, 2015, the Company declared and paid cash dividends of \$0.20 per share, or \$26 million. During the nine months ended September 30, 2015, the Company declared and paid cash dividends of \$0.60 per share, or \$78 million.

Common Stock Repurchase

In September 2012, the Board of Directors authorized a \$250 million share repurchase program, which was completed in July 2014. In May 2014, the Board of Directors authorized a \$650 million share repurchase program, which was completed in October 2015. In August 2015, the Board of Directors authorized a \$1 billion share repurchase program, which began in October 2015.

Share repurchase activity (in millions, except share amounts):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2015		2014		2015		2014	
	Shares	Amount	Shares	Amount	Shares	Amount	Shares	Amount

Total	1,588,251	\$ 119	3,443,991	\$ 159	5,649,805	\$ 381	5,258,027	\$ 242

Accumulated Other Comprehensive Loss

Components of accumulated other comprehensive income (loss), net of tax (in millions):

	September 30, 2015	December 31, 2014
Marketable securities	\$ 1	\$—
Employee benefit plans	(291) (298
Interest rate derivatives	(13) (12
Total	\$(303) \$(310

Earnings Per Share (EPS)

Diluted EPS is calculated by dividing net income by the average number of common shares outstanding plus the number of additional common shares that would have been outstanding assuming the exercise of in-the-money stock options and restricted stock units, using the treasury-stock method. For the three and nine months ended September 30, 2015 and 2014, anti-dilutive shares excluded from the calculation of EPS were not material.

NOTE 10. OPERATING SEGMENT INFORMATION

Air Group has two operating airlines - Alaska Airlines and Horizon Air. Each is a regulated airline with separate management teams primarily in operational roles. Horizon sells 100% of its capacity to Alaska under a CPA, for which all intercompany transactions are eliminated upon consolidation. In addition, Alaska has CPAs with SkyWest to fly certain routes and PenAir to fly one route in the state of Alaska. The Company attributes revenue between Mainline and Regional based on the coupon fare in effect on the date of issuance relative to the origin and destination

of each flight segment. To manage the two operating airlines and the revenues and expenses associated with the CPAs, management views the business in three operating segments.

Alaska Mainline - Flying Boeing 737 jets and all associated revenues and costs.

Alaska Regional - Alaska's CPAs with Horizon, SkyWest and PenAir. In this segment, Alaska Regional records actual on-board passenger revenue, less costs such as fuel, distribution costs, and payments made to Horizon, SkyWest and PenAir under the respective CPAs. Additionally, Alaska Regional includes an allocation of corporate overhead such as IT, finance, and other administrative costs incurred by Alaska on behalf of the regional operations.

Horizon - Horizon operates turboprop Q400 aircraft. All of Horizon's capacity is sold to Alaska under a CPA. Expenses include those typically borne by regional airlines such as crew costs, ownership costs, and maintenance costs.

The following table reports "Air Group adjusted," which is not a measure determined in accordance with GAAP. The Company's chief operating decision-makers and others in management use this measure to evaluate operational performance and determine resource allocations. Adjustments are further explained below in reconciliation to consolidated GAAP results. Operating segment information is as follows (in millions):

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

The following Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to help the reader understand the Company, our segment operations and our present business environment. MD&A is provided as a supplement to – and should be read in conjunction with – our consolidated financial statements and the accompanying notes. All statements in the following discussion that are not statements of historical information or descriptions of current accounting policy are forward-looking statements. Please consider our forward-looking statements in light of the risks referred to in this report's introductory cautionary note and the risks mentioned in Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2014. This overview summarizes the MD&A, which includes the following sections:

Third Quarter Review—highlights from the third quarter of 2015 outlining some of the major events that happened during the period and how they affected our financial performance.

Results of Operations—an in-depth analysis of our revenues by segment and our expenses from a consolidated perspective for the three and nine months ended September 30, 2015. To the extent material to the understanding of segment profitability, we more fully describe the segment expenses per financial statement line item. Financial and statistical data is also included here. This section includes forward-looking statements regarding our view of the remainder of 2015.

Liquidity and Capital Resources—an overview of our financial position, analysis of cash flows, and relevant contractual obligations and commitments.

THIRD QUARTER REVIEW

Our record consolidated pretax income was \$437 million during the third quarter of 2015, compared to \$316 million in the third quarter of 2014. The increase of \$121 million was driven by lower aircraft fuel expense of \$149 million and increased revenues of \$50 million, partially offset by an increase in non-fuel operating expenses of \$82 million. The lower fuel cost was the result of a sharp decline in fuel prices over the past year. The increase in revenues was due to growth in our capacity of 8.2%, partially offset by lower unit revenues.

See "Results of Operations" below for further discussion of changes in revenues and operating expenses and our reconciliation of non-GAAP measures to the most directly comparable GAAP measure.

Operations Performance

During the third quarter, both Alaska and Horizon continued their strong operational performance, reporting that 86.0% and 80.0% of their flights arrived on time, respectively. For the twelve months ended August 2015, Alaska maintained its ranking as the top carrier among the eight largest U.S. airlines for on-time performance, according to the U.S. Department of Transportation.

New Markets

New routes announced during the third quarter of 2015 are as follows:

New Nonstop Routes Announced (Launch Dates)

Portland to Omaha (2/18/16)

Portland, Oregon, to Minneapolis/St. Paul, Minnesota
(2/18/16)

Portland to Kansas City, Missouri (2/18/16)

20

University of Washington Sponsorship Agreement

During the third quarter of 2015 we announced a ten-year sponsorship agreement with the University of Washington. We plan to contribute a total of \$41 million over a 10 year period. In return, the football field has been named Alaska Airlines Field at Husky Stadium and the football field bears the Alaska Airlines logo. The sponsorship also provides naming rights of Alaska Airlines Arena, certain main campus assets, status as the official airline of the university, category exclusivity and preferred airline status for university business air travel needs, and scholarships for student-athletes. The sponsorship further strengthens our long-standing relationship with the University of Washington, and our commitment to supporting our local community.

Shareholder Returns

During the third quarter of 2015, we paid cash dividends of \$26 million and we repurchased 1,588,251 shares of our common stock for \$119 million under the \$650 million repurchase program authorized by our Board of Directors in May 2014. In August 2015, the Board of Directors authorized a \$1 billion share repurchase program, which began in October. Since 2007, we have repurchased 54,739,056 shares of common stock under such programs for \$1.2 billion for an average price of \$22 per share. During the month of October, we repurchased 572,855 shares of our common stock for \$44 million, resulting in 126,128,614 shares outstanding at October 31, 2015. For 2015, we expect to deploy at least \$600 million to shareholders through a combination of dividends and share repurchases.

Outlook

As we enter the fourth quarter, we expect our capacity will increase approximately 12.5% compared to the fourth quarter of 2014. The increase is from the 11 new markets we will begin flying in the fourth quarter along with the new routes we have launched since the beginning of the year as we expand our network to offer even more utility to our loyal customers and introduce the award-winning Alaska service to new customers across the U.S., Mexico, Canada, and now, Costa Rica.

We continue to face a significant amount of competitive capacity in our markets which, combined with our own growth, does put pressure on our unit revenues. We expect competitive capacity to be up approximately 7%, 15%, and 8%, for the fourth quarter of 2015, and the first and second quarters of 2016, respectively.

Despite competitive pressures, we expect 2015 to be a record earnings year for the company. Our focus on cost control and significantly lower fuel prices have allowed us to maintain solid financial results. The results have allowed us to invest more in our company, our employees, and our customers, while providing industry-leading returns for our owners. Our low cost structure, fuel-efficient fleet and strong balance sheet allows us to offer low fares to our customers. These low fares offer our customers an outstanding value proposition when coupled with the improvements we've made in our in-flight experience named Alaska Beyond™, which includes upgraded food and beverage offerings, streaming in-flight entertainment, comfortable Recaro seats with power at every seat, and our award-winning customer service.

We expect our unit costs, excluding fuel, to decrease approximately 1% in the fourth quarter compared to 2014 and approximately 0.6% for the full year, continuing our trend of reducing unit costs annually.

Our current expectations for capacity and CASM excluding fuel and special items are summarized below:

	Forecast	Change	Forecast	Change
	Q4 2015	Y-O-Y	Full Year 2015	Y-O-Y

Consolidated:

Edgar Filing: ALASKA AIR GROUP, INC. - Form 10-Q

21

RESULTS OF OPERATIONS

COMPARISON OF THREE MONTHS ENDED SEPTEMBER 30, 2015 COMPARED TO THREE MONTHS ENDED SEPTEMBER 30, 2014

Our consolidated net income for the third quarter of 2015 was \$274 million, or \$2.14 per diluted share, compared to net income of \$198 million, or \$1.45 per diluted share, in the third quarter of 2014. Significant items impacting the comparability between the periods are as follows:

Both periods include adjustments to reflect the timing of net unrealized mark-to-market gains and losses related to our fuel hedge positions. For the third quarter of 2015, we recognized net mark-to-market losses of \$5 million (\$3 million after tax, or \$0.02 per diluted share) compared to losses of \$4 million (\$2 million after tax, or \$0.02 per diluted share) in the third quarter of 2014.

ADJUSTED (NON-GAAP) RESULTS AND PER-SHARE AMOUNTS

We believe disclosure of earnings excluding the impact of mark-to-market gains or losses or other individual revenues or expenses is useful information to investors because:

CASM excluding fuel and certain special items is one of the most important measures used by management and by the Air Group Board of Directors in assessing quarterly and annual cost performance;

By eliminating fuel expense and certain special items from our unit metrics, we believe that we have better visibility into the results of our non-fuel continuing operations. Our industry is highly competitive and is characterized by high fixed costs, so even a small reduction in non-fuel operating unit costs can result in a significant improvement in operating results. In addition, we believe that all domestic carriers are similarly impacted by changes in jet fuel costs over the long run, so it is important for management (and thus investors) to understand the impact of (and trends in) company-specific cost drivers such as labor rates and productivity, airport costs, maintenance costs, etc., which are more controllable by management;

Our results excluding fuel expense and certain special items serve as the basis for our various employee incentive plans, thus the information allows investors to better understand the changes in variable incentive pay expense in our consolidated statements of operations;

We believe it is the basis by which we are evaluated by industry analysts; and

It is useful to monitor performance without these items as it improves a reader's ability to compare our results to those of other airlines.

Although we are presenting these non-GAAP amounts for the reasons above, investors and other readers should not necessarily conclude these amounts are non-recurring, infrequent, or unusual in nature.

Excluding the impact of mark-to-market fuel hedge adjustments, our adjusted consolidated net income for the third quarter of 2015 was \$277 million, or \$2.16 per diluted share, compared to \$200 million, or \$1.47 per diluted share, in the third quarter of 2014.

- (a) Except for FTEs, data includes information related to third-party Regional CPA arrangements.
- (b) See reconciliation of this measure to the most directly related GAAP measure in the "Results of Operations" section.
- (c) Data presented includes information related to Regional CPAs.

OPERATING REVENUES

Total operating revenues increased \$50 million, or 3%, during the third quarter of 2015 compared to the same period in 2014. The changes are summarized in the following table:

(in millions)	Three Months Ended September 30,		
	2015	2014	% Change
Passenger			
Mainline	\$ 1,057	\$ 1,030	3
Regional	240	219	10
Total passenger revenue	1,297	1,249	4
Freight and mail	30	32	(6
Other - net	188	184	2
Total operating revenues	\$ 1,515	\$ 1,465	3

Passenger Revenue – Mainline

Mainline passenger revenue for the third quarter of 2015 increased by 3% due to a 7.8% increase in capacity, partially offset by a decrease of 4.8% in PRASM compared to the third quarter of 2014. The increase in capacity was driven by 0.9% higher utilization of our aircraft, adding larger aircraft to our fleet, and the growth in departures from new markets. The decrease in PRASM was driven by a 4.2% decline in ticket yield. The decrease in yield was primarily due to increased competitive capacity in our markets and, to a lesser extent, new markets that have not yet fully matured.

Passenger Revenue – Regional

Regional passenger revenue increased 10% compared to the third quarter of 2014, primarily due to an 11.8% increase in capacity. The increase in capacity was partially offset by a 2.2% decrease in PRASM. The increase in capacity was driven by additional frequencies, longer aircraft stage lengths, and new routes. The decrease in PRASM was due to a 2.4% decline in yield, partially offset by an increase in load factor of 0.1 points. The decrease in yield is due to an increase in competitive capacity in our regional markets, longer aircraft stage lengths and our own growth as we strengthen our network utility in the Pacific Northwest.

Other – Net

Other - net revenue increased \$4 million from the third quarter of 2014, due to increases in Mileage Plan revenues and a 20% increase in food and beverage revenue, partially offset by a decline in bag fee revenue. Mileage Plan revenues grew due to growth in the number of members in the program and an increase in miles sold to our credit card partner. The increase in food and beverage revenue is due to the 7.8% increase in passengers.

OPERATING EXPENSES

Total operating expenses decreased \$67 million, or 6%, compared to the third quarter of 2014. We believe it is useful to summarize operating expenses as follows, which is consistent with the way expenses are reported internally and evaluated by management:

(in millions)	Three Months Ended September 30,		
	2015	2014	% Change
Fuel expense	\$ 245	\$ 394	(38
Non-fuel expenses	837	755	11
Total Operating Expenses	\$ 1,082	\$ 1,149	(6

Significant operating expense variances from 2014 are more fully described below.

25

Wages and benefits

Wages and benefits increased during the third quarter of 2015 by \$33 million. The primary components of wages and benefits are shown in the following table:

(in millions)	Three Months Ended September 30,		
	2015	2014	% Change
Wages	\$236	\$214	10
Pension - Defined benefit plans	7	2	250
Defined contribution plans	15	14	7
Medical and other benefits	38	33	15
Payroll taxes	16	16	—
Total wages and benefits	\$312	\$279	12

Wages increased 10% with a 7.7% increase in FTEs. FTEs increased largely with our front-line work groups compared to the prior year due to the growth in departures.

Pension expense increased \$5 million compared to the same period in the prior year. The increase is due to revaluing the pension obligation at December 31, 2014 with higher mortality assumptions, and a lower discount rate that increased the pension obligation. The resulting unrealized loss is amortized over the expected service period.

Medical and other benefits increased 15% compared to the same period in the prior year, primarily due to the growth in FTEs.

Variable incentive pay

Variable incentive pay expense increased \$2 million, or 7% compared to the third quarter of 2014. The increase is primarily due to a 7.7% increase in FTEs.

Aircraft fuel

Aircraft fuel expense includes both raw fuel expense (as defined below) plus the effect of mark-to-market adjustments to our fuel hedge portfolio included in our consolidated statement of operations as the value of that portfolio increases and decreases. Our aircraft fuel expense is very volatile, even between quarters, because it includes these gains or losses in the value of the underlying instrument as crude oil prices and refining margins increase or decrease. Raw fuel expense is defined as the price that we generally pay at the airport, or the "into-plane" price, including taxes and fees. Raw fuel prices are impacted by world oil prices and refining costs, which can vary by region in the U.S. Raw fuel expense approximates cash paid to suppliers and does not reflect the effect of our fuel hedges.

Aircraft fuel expense decreased \$149 million, or 38% compared to 2014. The elements of the change are illustrated in the following table:

(in millions, except for per gallon amounts)	Three Months Ended September 30,			
	2015		2014	
	Dollars	Cost/Gal	Dollars	Cost/Gal
Raw or "into-plane" fuel cost	\$235	\$ 1.78	\$383	\$3.09
Losses on settled hedges	5	0.04	7	0.06
Consolidated economic fuel expense	240	1.82	390	3.15
Mark-to-market fuel hedge adjustments	5	0.03	4	0.03
GAAP fuel expense	\$245	\$ 1.85	\$394	\$3.18
Fuel gallons	132		124	

Fuel expense was lower than in the third quarter of 2014 as the raw fuel price per gallon decreased 42% on a 6% increase in fuel gallons consumed. West Coast jet fuel prices are impacted by both the price of crude oil, as well as refining margins associated with the conversion of crude oil to jet fuel. The decrease in raw fuel price per gallon during the third quarter of 2015 was due to lower crude oil prices of 52% and lower refining margins of 19%.

We also evaluate economic fuel expense, which we define as raw fuel expense adjusted for the cash we receive from, or pay to, hedge counterparties for hedges that settle during the period, and for the premium expense that we paid for those contracts. A key difference between aircraft fuel expense and economic fuel expense is the timing of gain or loss recognition on our hedge portfolio. When we refer to economic fuel expense, we include gains and losses only when they are realized for those contracts that were settled during the period based on their original contract terms. We believe this is the best measure of the effect that fuel prices are currently having on our business because it most closely approximates the net cash outflow associated with purchasing fuel for our operations. Accordingly, many industry analysts evaluate our results using this measure, and it is the basis for most internal management reporting and incentive pay plans.

We recognized losses of \$5 million for hedges that settled during the third quarter of 2015, compared to losses of \$7 million in the third quarter of 2014. These amounts represent the net cash paid including the premium expense recognized for those hedges.

Aircraft maintenance

Aircraft maintenance expense increased by \$9 million, or 16%, compared to the third quarter of 2014. The primary driver of the increase is a greater lease return provision when compared to the prior year as we have a number of leases set to expire between 2016 and 2017. Additionally, there have been increased costs from heavier airframe checks, and more scheduled events for the B737-400 fleet, and more engine maintenance events for the Q400 fleet.

Landing fees and other rentals

Landing fees and other rentals increased \$6 million, or 8%, compared to the third quarter of 2014. The increase is due to more square footage and gate space at our hub airports, new stations with our growth, and higher rates.

Contracted services

Contracted services expense increased \$8 million, or 12%, compared to the third quarter of 2014. The increase is primarily due to payments to our CPA partners increased approximately \$5 million compared to the same period in the prior year because of increased flying. Additionally, there was increased flying at stations where we use vendors to assist us with passenger and ramp handling.

Depreciation and amortization

Depreciation and amortization expense increased \$6 million, or 8%, compared to the third quarter of 2014. The increase is due to ten additional aircraft in the fleet, the completion of our cabin improvement project, and purchasing of non-aircraft assets, such as electronic ground service equipment and leasehold improvements.

Food and beverage service

Food and beverage service expense increased \$6 million, or 25%, compared to the third quarter of 2014. The increase is due to changes in the main cabin and first class menu offering higher quality food and beverage products, an increased number of passengers, and increased buy-on-board sales.

Other expense

Other operating expenses increased \$15 million, or 22%, compared to the third quarter of 2014. The increase is primarily due to higher hotel and per diem costs for our flight crews as we expand our network outside of the pacific northwest, and increased professional service costs.

Nonoperating Income

Net nonoperating income increased \$4 million, compared to the third quarter of 2014, primarily due to higher capitalized interest related to an increase in prepaid aircraft deposits.

Operating Expenses Compared to Capacity Growth

We are presenting our line-item expenses below both in absolute dollars and on an ASM basis to highlight areas in which costs have increased or decreased either more or less than capacity.

(in millions, except CASM)	Three Months Ended September 30,					
	2015 Amount	2014 Amount	2015 CASM	2014 CASM	Change CASM	
Wages and benefits	\$312	\$279	3.01	¢ 2.91	¢ 3.4	%
Variable incentive pay	32	30	0.31	0.31	—	%
Aircraft maintenance	67	58	0.65	0.61	6.6	%
Aircraft rent	26	27	0.25	0.28	(10.7))%
Landing fees and other rentals	80	74	0.77	0.77	—	%
Contracted services	74	66	0.71	0.69	2.9	%
Selling expenses	53	55	0.51	0.57	(10.5))%
Depreciation and amortization	81	75	0.78	0.78	—	%
Food and beverage service	30	24	0.29	0.25	16.0	%
Other	82	67	0.79	0.70	12.9	%
Non-fuel Expenses	\$837	\$755	8.07	¢ 7.87	¢ 2.6	%

Additional Segment Information

Refer to the Notes of the Condensed Consolidated Financial Statements for a detailed description of each segment. Below is a summary of each segment's profitability.

Alaska Mainline

Pretax profit for Alaska Mainline was \$386 million in the third quarter of 2015 compared to \$282 million in the third quarter of 2014. The \$27 million increase in Mainline passenger revenue is described above. Mainline operating expense excluding fuel increased by \$62 million to \$667 million in 2015 due to higher wages to support our growth, increased maintenance costs, higher ramp and passenger handling vendor costs associated with an increase in passengers, higher depreciation related to our fleet growth, and increased costs with higher quality food and beverage products. Economic fuel cost decreased due to lower raw fuel costs, partially offset by a 4.6% increase in consumption.

Alaska Regional

Pretax profit for Alaska Regional was \$45 million in the third quarter of 2015 compared to \$29 million in the third quarter of 2014. The \$21 million increase in Regional passenger revenue is described above. Regional operating expenses excluding fuel increased due to more departures and higher block hours. Fuel was also lower due to the 42.2% decline in economic fuel price per gallon.

Horizon

Pretax profit for Horizon was \$10 million in the third quarter of 2015 compared to \$11 million in the third quarter of 2014. CPA Revenues (100% of which are from Alaska and eliminated in consolidation) increased due to an increase in capacity and higher rates. The \$8 million increase in Horizon's non-fuel operating expenses was largely driven by warranty claims received in the prior year.

COMPARISON OF NINE MONTHS ENDED SEPTEMBER 30, 2015 COMPARED TO NINE MONTHS ENDED SEPTEMBER 30, 2014

Our consolidated net income for the first nine months of 2015 was \$657 million, or \$5.05 per diluted share, compared to net income of \$457 million, or \$3.31 per diluted share, in the first nine months of 2014. Significant items impacting the comparability between the periods are as follows:

Both periods include adjustments to reflect the timing of net unrealized mark-to-market gains and losses related to our fuel hedge positions. For the first nine months of 2015, we recognized net mark-to-market gains of \$1 million (\$1 million after tax, or \$0.01 per diluted share) compared to gains of \$17 million (\$11 million after tax, or \$0.08 per diluted share) in the first nine months of 2014.

Excluding the impact of mark-to-market fuel hedge adjustments, our adjusted consolidated net income for the first nine months of 2015 was \$656 million, or \$5.04 per diluted share, compared to an adjusted consolidated net income of \$446 million, or \$3.24 per share, in the first nine months of 2014.

(in millions, except per share amounts)	Nine Months Ended September 30,			
	2015		2014	
	Dollars	Diluted EPS	Dollars	Diluted EPS
Net income and diluted EPS as reported	\$657	\$5.05	\$457	\$3.31
Mark-to-market fuel hedge adjustments, net of tax	(1) (0.01) (11) (0.08
Non-GAAP adjusted income and per-share amounts	\$656	\$5.04	\$446	\$3.24

Our operating costs per ASM are summarized below:

(in cents)	Nine Months Ended September 30,		
	2015	2014	% Change
Consolidated:			
CASM	10.75	¢ 12.41	¢ (13.4
Less the following components:			
Aircraft fuel, including hedging gains and losses	2.51	4.13	(39.2
CASM excluding fuel	8.24	¢ 8.28	¢ (0.5
Mainline:			
CASM	9.74	¢ 11.35	¢ (14.2
Less the following components:			
Aircraft fuel, including hedging gains and losses	2.41	3.98	(39.4
CASM excluding fuel	7.33	¢ 7.37	¢ (0.5

OPERATING REVENUES

Total operating revenues increased \$159 million, or 4%, during the first nine months of 2015 compared to the same period in 2014. The changes are summarized in the following table:

(in millions)	Nine Months Ended September 30,		
	2015	2014	% Change
Passenger			
Mainline	\$2,977	\$2,858	4
Regional	638	605	5
Total passenger revenue	3,615	3,463	4
Freight and mail	83	88	(6

Edgar Filing: ALASKA AIR GROUP, INC. - Form 10-Q

Other - net	523	511	2
Total operating revenues	\$4,221	\$4,062	4

29

Passenger Revenue – Mainline

Mainline passenger revenue for the first nine months of 2015 increased by 4% on a 10% increase in capacity, partially offset by a 5.2% decrease in PRASM compared to the same period in 2014. The increase in capacity is driven by routes added in the last twelve months. The decrease in PRASM was driven by a 3.9% decrease in ticket yield, and a 1.2-point decrease in load factor compared to the prior-year period. Yields declined due to increased competitive capacity in the markets we serve, and our own growth.

Passenger Revenue – Regional

Regional passenger revenue increased by \$33 million, or 5%, compared to the first nine months of 2014, due to an 8.8% increase in capacity, partially offset by a 3.1% decrease in PRASM. The increase in capacity is due to an increase in departures, and average aircraft stage length. The decrease in PRASM was due to a decrease in ticket yield of 3.8%, partially offset by an increase in load factor of 0.6 points. The decrease in yield was due to an increase in competitive capacity in our regional markets and our own growth as we strengthen our network utility in the Pacific Northwest.

Other – Net

Other - net revenue increased \$12 million, or 2%, from the first nine months of 2014, due to increases in Mileage Plan revenue and food and beverage sales, partially offset by lower bag fee revenues. Mileage Plan revenue increased \$21 million, due to an increase in miles sold. Higher food and beverage sales was due to the 8.9% increase in passengers and selling more premium offerings such as Tom Douglas signature meals. Bag fee revenue was lower due to promotions launched earlier in the year to offer a free first checked bag to our Mileage Plan members in January and to all Alaska Airlines Signature Visa credit card holders beginning in February.

OPERATING EXPENSES

Total operating expenses decreased \$164 million, or 5%, compared to the first nine months of 2014, mostly as a result of lower fuel costs. We believe it is useful to summarize operating expenses as follows, which is consistent with the way expenses are reported internally and evaluated by management:

(in millions)	Nine Months Ended September 30,		
	2015	2014	% Change
Fuel expense	\$741	\$1,112	(33)
Non-fuel expenses	2,437	2,230	9
Total Operating Expenses	\$3,178	\$3,342	(5)

Significant operating expense variances from 2014 are more fully described below.

Wages and Benefits

Wages and benefits increased during the first nine months of 2015 by \$91 million, or 11%, compared to 2014. The primary components of wages and benefits are shown in the following table:

(in millions)	Nine Months Ended September 30,		
	2015	2014	% Change
Wages	\$697	\$635	10
Pension - Defined benefit plans	21	6	250

Edgar Filing: ALASKA AIR GROUP, INC. - Form 10-Q

Defined contribution plans	45	40	13
Medical and other benefits	111	104	7
Payroll taxes	49	47	4
Total wages and benefits	\$923	\$832	11

Wages increased 10% on an 8.4% increase in FTEs. The primary driver of the increase in wages was the annualization of new labor contracts that included higher rates. The increase in FTEs was to support our growth.

30

Pension expense increased \$15 million, compared to the same period in the prior year. The increase is due to revaluing the pension obligation at December 31, 2014 with higher mortality assumptions, and a lower discount rate that increased the pension obligation. The resulting unrealized loss is amortized over the expected service period.

Defined contribution plans increased 13%, due to increased contributions throughout all labor groups and an increased matched percentage as a part of recent labor contracts.

We expect wages and benefits to increase for the full year due to higher wages rates, more FTEs to support our growth, higher medical and other benefits, and higher pension expense.

Aircraft Fuel

Aircraft fuel expense decreased \$371 million, compared to 2014. The elements of the change are illustrated in the following table:

(in millions, except for per gallon amounts)	Nine Months Ended September 30,			
	2015		2014	
	Dollars	Cost/Gallon	Dollars	Cost/Gallon
Raw or "into-plane" fuel cost	\$727	\$ 1.93	\$1,095	\$3.12
(Gains) losses on settled hedges	15	0.04	34	0.10
Consolidated economic fuel expense	742	1.97	1,129	3.22
Mark-to-market fuel hedge adjustments	(1) —	(17) (0.05
GAAP fuel expense	\$741	\$ 1.97	\$1,112	\$3.17
Fuel gallons	377		351	

The raw fuel price per gallon decreased 38% as a result of lower West Coast jet fuel prices. West Coast jet fuel prices are impacted by both the price of crude oil, as well as refining margins associated with the conversion of crude oil to jet fuel. The decrease in raw fuel price per gallon during the first nine months of 2015 was due to a decline in crude oil prices of 49% and a slight decrease in refining margins of 4%.

Losses recognized for hedges that settled during the year were \$15 million in 2015, compared to \$34 million in 2014. These amounts represent the cash paid for premium expense, offset by cash received from those hedges. The decrease in losses on settled hedges is primarily due to our increasing use of "out of the money" call options as well as purchasing shorter-dated options, both of which reduce the premium cost we pay.

We currently expect our economic fuel price per gallon to be lower in the fourth quarter of 2015 compared to the fourth quarter of 2014 and for the full year due to our current expectation of lower crude prices and a decrease in hedge premium expense.

Aircraft Maintenance

Aircraft maintenance costs increased by \$16 million, or 10%, compared to the prior-year period. The increase is due to more scheduled engine maintenance events that were more expensive due to replacing life-limited parts, and heavier airframe checks, offset by vendor credits of \$10 million for work that was previously completed on the B737 fleet.

We expect full-year aircraft maintenance expense to be 5% to 10% higher than full-year 2014 due to an increase in engine maintenance expense for both fleet types.

Contracted Services

Contracted services expense increased \$21 million, or 11%, compared to the first nine months of 2014. The increase is primarily due to increased flying at stations where we use vendors to assist us with passenger and ramp handling. Additionally, payments to our CPA partners increased approximately \$10 million compared to the same period in the prior year because of increased flying.

We expect full-year contracted services to be 10% to 15% higher than full-year 2014 to support additional capacity throughout our network.

Food and beverage service

Food and beverage services expense increased \$15 million, or 22%, compared to the third quarter of 2014. The increase is due to changes in the menu offering higher quality food and beverage products and increased buy-on-board sales.

We expect full-year food and beverage services expense to be approximately 20% higher than 2014 due to an increase in passengers and higher quality food and beverage products.

Other Operating Expenses

Other operating expenses increased \$30 million, or 13%, compared to the first nine months of 2014. The increase is primarily due to hotel and per diem costs for our flight crews, professional services, and IT-related costs.

We expect full-year other operating expenses to be 15% to 20% higher than full-year 2014 for the same reasons mentioned above.

Nonoperating Income (Expense)

During the first nine months of 2015, we had nonoperating income of \$10 million, compared to an income of \$13 million in the same period in 2014. In the prior year, we recognized gains on the sale of certain equity securities. For the first nine months of 2015, we have capitalized more of our interest expense on an increasing balance of prepaid aircraft deposits.

Operating Expenses Compared to Capacity Growth

We are presenting our line-item expenses below both in absolute dollars and on an ASM basis to highlight areas in which costs have increased or decreased either more or less than capacity.

(in millions, except CASM)	Nine Months Ended September 30,					
	2015 Amount	2014 Amount	2015 CASM	2014 CASM	%Change CASM	
Wages and benefits	\$923	\$832	3.12	¢ 3.09	¢ 1.0	%

Other	259	229	0.88	0.85	3.5	%
Non-fuel Expenses	\$2,437	\$2,230	8.24	¢ 8.28	¢ (0.5))%

Additional Segment Information

Refer to the Notes of the Condensed Consolidated Financial Statements for a detailed description of each segment. Below is a summary of each segment's profitability.

Alaska Mainline

Pretax profit for Alaska Mainline was \$944 million in the first nine months of 2015, compared to \$651 million in the same period in 2014. The \$119 million increase in Mainline passenger revenue is described above. Mainline operating expense excluding fuel increased by \$168 million to \$2.0 billion in 2015 due to higher wages to support our growth, higher ramp and passenger handling associated with increased flying, higher depreciation related to our fleet growth, and increased food and beverage costs. Economic fuel cost decreased due to lower raw fuel costs, partially offset by a 6.9% increase in consumption.

Alaska Regional

Pretax profit for Alaska Regional was \$82 million in the first nine months of 2015, compared to \$54 million the third quarter of 2014. The \$33 million increase in Regional passenger revenue is described above. Regional operating expenses excluding fuel increased due to additional departures. The economic fuel price per gallon decreased 38.8%.

Horizon

Pretax profit for Horizon was \$24 million in the first nine months of 2015, compared to pretax profit of \$14 million in the same period in 2014. CPA Revenues (100% of which are from Alaska and eliminated in consolidation) increased due to additional capacity and higher rates. The \$17 million increase in Horizon's non-fuel operating expenses was largely driven by increased engine maintenance and other expenses to support the increase in capacity.

LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity are:

- Our existing cash and marketable securities balance of \$1.3 billion;

- Our expected cash from operations;

- Our 85 unencumbered aircraft in the operating fleet that could be financed, if necessary; and

- Our combined \$200 million bank line-of-credit facilities, with no outstanding borrowings.

In our cash and marketable securities portfolio, we invest only in securities that meet our overall investment policy of maintaining and securing investment principal. Our investment portfolio is managed by reputable firms that adhere to our investment policy that sets forth certain objectives, approved and prohibited investments, and duration and credit quality guidelines. Our policy and the portfolio managers are continually reviewed to ensure that the investments align with our strategy.

The table below presents the major indicators of financial condition and liquidity:

(in millions, except per share and debt-to-capital amounts)	September 30, 2015	December 31, 2014	Change	
Cash and marketable securities	\$1,258	\$1,217	3.4	%
Cash, marketable securities, and unused lines of credit as a percentage of trailing twelve months revenue	26	% 26	% 0 pts	
Long-term debt, net of current portion	\$593	\$686	(13.6)	%
Shareholders' equity	\$2,365	\$2,127	11.2	%
Long-term debt-to-capital including net present value of aircraft operating lease payments ^(a)	27%:73%	31%:69%	(4)	pts

^(a) Calculated using the present value of remaining aircraft lease payments.

Given our strong financial condition, we will continue to evaluate our cash flows from operations, reinvest in the business, and return capital to our shareholders, while maintaining a strong liquidity position.

The following discussion summarizes the primary drivers of the increase in our cash and marketable securities balance and our expectation of future cash requirements.

ANALYSIS OF OUR CASH FLOWS

Cash Provided by Operating Activities

For the first nine months of 2015, net cash provided by operating activities was \$1.2 billion, compared to \$892 million during the same period in 2014. The \$337 million increase was primarily attributable to lower jet fuel costs and improved operating results.

We typically generate positive cash flows from operations and expect to use that cash flow to buy aircraft and capital equipment, make normal debt payments, and to return capital to shareholders through share repurchases and dividends.

Cash Used in Investing Activities

Cash used in investing activities was \$727 million during the first nine months of 2015, compared to \$618 million during the same period of 2014. Our capital expenditures were \$668 million in the first nine months of 2015, primarily due to purchase deposits related to 33 aircraft deliveries over the next 24 months.

The table below reflects our full-year expectation for capital expenditures and the additional expenditures if options were exercised. These options will be exercised only if we believe return on invested capital targets can be met.

(in millions)	2015	2016	2017	2018
Aircraft and aircraft purchase deposits - firm	\$580	\$535	\$500	\$400
Other flight equipment	70	70	45	25
Other property and equipment	65	110	80	80
Total property and equipment additions	\$715	\$715	\$625	\$505
Option aircraft and aircraft deposits, if exercised ^(a)	\$—	\$60	\$140	\$295

^(a) Alaska has options to acquire 46 B737 aircraft with deliveries from 2018 through 2024. Horizon has options to acquire five Q400 aircraft with deliveries from 2018 through 2019.

Cash Used by Financing Activities

Net cash used by financing activities was \$521 million during the first nine months of 2015 compared to \$320 million during the same period in 2014. During the first nine months of 2015 we made debt payments of \$93 million, stock repurchases of \$381 million, and dividend payments totaling \$78 million.

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

Aircraft Purchase Commitments and Options

As of September 30, 2015, we have firm orders to purchase 73 aircraft. We also have options to acquire 46 B737 aircraft with deliveries from 2018 through 2024 and have options to acquire five Q400 aircraft with deliveries from 2018 through 2019. In addition to the three E175 aircraft currently operating in our regional fleet, we have commitments to lease 20 E175 aircraft with start dates in 2015 through 2017. We also have options to lease eight E175 aircraft with positions starting in late 2017 and early 2018.

The following table summarizes expected fleet activity by year:

Aircraft	Actual Fleet		Expected Fleet Activity ^(a)		
	Dec 31, 2014	2015 Changes	Dec 31, 2015	2016-2017 Changes	Dec 31, 2017
737 Freighters & Combis	6	—	6	(3) 3
737 Passenger Aircraft	131	10	141	9	150
Total Mainline Fleet	137	10	147	6	153
Q400	51	1	52	2	54
E175	—	5	5	18	23
CRJ700	8	—	8	(8) —
Total Regional Fleet	59	6	65	12	77
Total	196	16	212	18	230

(a) Expected fleet activity includes aircraft deliveries, net of planned retirements and lease returns.

For future aircraft deliveries, we may finance the aircraft through internally generated cash, long-term debt, or lease arrangements.

Fuel Hedge Positions

All of our current oil positions are call options, which are designed to effectively cap the cost of the crude oil component of our jet fuel purchases. With call options, we benefit from a decline in crude oil prices, as there is no cash outlay other than the premiums we pay to enter into the contracts. Our crude oil positions are as follows:

	Approximate % of Expected Fuel Requirements	Weighted-Average Crude Oil Price per Barrel	Average Premium Cost per Barrel
Fourth Quarter 2015	50	% \$83	\$3
Remainder 2015	50	% \$83	\$3
First Quarter 2016	46	% \$76	\$3
Second Quarter 2016	38	% \$70	\$3
Third Quarter 2016	29	% \$70	\$3
Fourth Quarter 2016	20	% \$69	\$3
Full Year 2016	33	% \$69	\$3
1st Quarter 2017	9	% \$64	\$4
Total 2017	2	% \$64	\$4

Contractual Obligations

The following table provides a summary of our principal payments under current and long-term debt obligations, operating lease commitments, aircraft purchase commitments and other obligations as of September 30, 2015:

(in millions)	Remainder of 2015	2016	2017	2018	2019	Beyond 2019	Total
Current and long-term debt obligations	\$24	\$115	\$121	\$151	\$114	\$185	\$710
Operating lease commitments ^(a)	38	210	196	141	131	757	1,473
Aircraft purchase commitments	51	601	544	428	372	650	2,646
Interest obligations ^(b)	6	32	26	20	13	12	109
Other obligations ^(c)	19	71	62	64	68	647	931
Total	\$138	\$1,029	\$949	\$804	\$698	\$2,251	\$5,869

(a) Operating lease commitments generally include aircraft operating leases, airport property and hangar leases, office space, and other equipment leases.

(b) For variable-rate debt, future obligations are shown above using interest rates in effect as of September 30, 2015. Includes minimum obligations under our long-term power-by-the-hour maintenance agreement and obligations

(c) associated with third-party CPAs with SkyWest and PenAir. Refer to the "Commitments" note in the condensed consolidated financial statements for further information.

On October 2, 2015 we entered into an agreement for a \$52 million credit facility secured by two aircraft. The aircraft replaced a restricted cash balance as collateral.

Credit Card Agreements

We have agreements with a number of credit card companies to process the sale of tickets and other services. Under these agreements, there are material adverse change clauses that, if triggered, could result in the credit card companies holding back a reserve from our credit card receivables. Under one such agreement, we could be required to maintain a reserve if our credit rating is downgraded to, or below, a rating specified by the agreement or our cash and marketable securities balance falls below \$500 million. Under another such agreement, we could be required to maintain a reserve if our cash and marketable securities balance falls below \$500 million. We are not currently required to maintain any reserve under these agreements, but if we were, our financial position and liquidity could be

materially harmed.

35

Deferred Income Taxes

For federal income tax purposes, the majority of our assets are fully depreciated over a seven-year life using an accelerated depreciation method or bonus depreciation, if available. For financial reporting purposes, the majority of our assets are depreciated over 15 to 20 years to an estimated salvage value using the straight-line basis. This difference, along with other deferred liabilities and offset by deferred assets, have created a significant deferred tax liability. At some point in the future the depreciation basis will reverse, potentially resulting in an increase in income taxes paid.

Taxable income and cash taxes payable in the short term are impacted by many items, including the amount of book income generated (which can be volatile depending on revenue and fuel prices), availability of "bonus depreciation", and other legislative changes that are out of our control. We believe that we have the liquidity to make our future tax payments.

CRITICAL ACCOUNTING ESTIMATES

There have been no material changes to our critical accounting estimates for the three months ended September 30, 2015. For information on our critical accounting estimates, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" of our Annual Report on Form 10-K for the year ended December 31, 2014.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

There have been no material changes in market risk from the information provided in Item 7A. "Quantitative and Qualitative Disclosure About Market Risk" in our Annual Report on Form 10-K for the year ended December 31, 2014.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of September 30, 2015, an evaluation was performed under the supervision and with the participation of our management, including our chief executive officer and chief financial officer (collectively, our "certifying officers"), of the effectiveness of the design and operation of our disclosure controls and procedures. These disclosure controls and procedures are designed to ensure that the information required to be disclosed by us in our periodic reports filed with or submitted to the Securities and Exchange Commission (the SEC) is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, and includes, without limitation, controls and procedures designed to ensure that such information is accumulated and communicated to our management, including our certifying officers, as appropriate to allow timely decisions regarding required disclosure. Our certifying officers concluded, based on their evaluation, that disclosure controls and procedures were effective as of September 30, 2015.

Changes in Internal Control over Financial Reporting

We made no changes in our internal control over financial reporting during the quarter ended September 30, 2015, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Our internal control over financial reporting is based on the 2013 framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO

Framework).

PART II

ITEM 1. LEGAL PROCEEDINGS

We are a party to routine litigation matters incidental to our business. Management believes the ultimate disposition of these matters is not likely to materially affect our financial position or results of operations. This forward-looking statement is based on management's current understanding of the relevant law and facts, and it is subject to various contingencies, including the potential costs and risks associated with litigation and the actions of judges and juries.

36

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors affecting our business, financial condition or future results from those set forth in Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2014. However, you should carefully consider the factors discussed in such section of our Annual Report on Form 10-K, which could materially affect our business, financial condition or future results. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

This table provides certain information with respect to our purchases of shares of our common stock during the third quarter of 2015.

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares (or units) Purchased as Part of Publicly Announced Plans or Programs	Maximum remaining dollar value of shares that can be purchased under the plan (in millions)
July 1, 2015 - July 30, 2015	718,827	\$71.08	718,827	
August 1, 2015 - August 31, 2015	311,724	76.56	311,724	
September 1, 2015 - September 30, 2015	557,700	79.36	557,700	
Total	1,588,251	\$74.93	1,588,251	\$3

The shares were purchased pursuant to a \$650 million repurchase plan authorized by the Board of Directors in May 2014.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

ITEM 4. MINE SAFETY DISCLOSURES

None

ITEM 5. OTHER INFORMATION

None

ITEM 6. EXHIBITS

The following documents are filed as part of this report:

1. Exhibits: See Exhibit Index.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
