CPS TECHNOLOGIES CORPORATION
Notes to Consolidated Financial Statement
(Unaudited)

(1) Nature of Business

CPS Technologies Corporation (the `Company` or `CPS`) (formerly Ceramics Process Systems Corporation) provides advanced material solutions to the electronics, robotics, automotive and other industries.

(2) Interim Consolidated Financial Statements

As permitted by the rules of the Securities and Exchange Commission applicable to quarterly reports on Form 10-Q, these notes are condensed and do not contain all disclosures required by generally accepted accounting principles.

The accompanying financial statements are unaudited. In the opinion of management, the unaudited consolidated financial statements of CPS reflect all normal recurring adjustments which are necessary to present fairly the financial position and results of operations for such periods.

The Company`s balance sheet at December 30, 2006 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by accounting principles

generally accepted in the United States of America for complete financial statements.

For further information, refer to the consolidated financial statements and footnotes thereto included in the Registrant's Annual Report on Form 10-K for the year ended December 30, 2006.

The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year.

(3) Net Income (Loss) Per Common and Common Equivalent Share

Basic net income or net loss per common share is calculated by dividing net income or loss by the weighted average number of common shares outstanding during the period. Diluted net income per common share is calculated by dividing net income by the sum of the weighted average number of common shares plus additional common shares that would have been outstanding if potential dilutive common shares had been issued for granted stock option and stock purchase rights. Common stock equivalents are excluded from the diluted calculations if a net loss is incurred as they would be anti-dilutive.

The following table presents the calculation of both basic and diluted EPS:

	Quarters Ended		Nine-Month Periods Ended	
	September 29, 2007 -----	September 30, 2006 -----	September 29, 2007 -----	September 30, 2006 -----

Total Shares	13,344,888	13,151,877	13,297,247	13,054,167

Edgar Filing: CPS TECHNOLOGIES CORP/DE/ - Form 10-Q

Diluted EPS \$ 0.02 \$ 0.02 \$ 0.05 \$ 0.05

(4) Share-Based Payments

The Company maintains a stock incentive plan (the "Plan"), which is described more fully in Note 5 to the consolidated financial statements in the 2006 Annual Report filed on Form 10-K. Effective January 1, 2006, the Company adopted the provisions of SFAS No. 123, "Share-Based Payments (revised 2004)," (SFAS No. 123R) which requires the Company to measure the cost of employee services received in exchange for an award of equity instruments based on the grant date fair value of the award. That cost is recognized over the period during which an employee is required to provide services in exchange for the award, the requisite service period (usually the vesting period). Under SFAS No. 123R, the Company provides an estimate of forfeitures at initial grant date. The Company elected the modified prospective transition method under SFAS No. 123R and accordingly has not restated periods prior to adoption. There were no shares granted under the Plan during the quarters ended September 29, 2007 and September 30, 2006. During the three and nine months ended September 29, 2007, the Company recognized \$ 3,946 and \$ 29,237 respectively as share-based compensation expense related to previously granted shares under the Plan. There was no share-based compensation expense recognized during the three or nine months ended September 30, 2006.

(5) Inventories

Inventories consist of the following:

	September 29, 2007	December 30, 2006
	-----	-----
Raw materials	\$ 228,239	\$ 149,143
Work in process	367,119	220,644
Finished goods	806,863	492,240
	-----	-----
Inventories	\$ 1,402,221	\$ 862,027
	=====	=====

(6) Accrued Expenses

Accrued expenses consist of the following:

	September 29, 2007	December 30, 2006
	-----	-----
Accrued legal and accounting	\$ 58,462	\$ 52,685
Accrued payroll	195,003	283,785
Accrued other	122,915	97,450
Accrued income tax payable	--	80,666
	-----	-----
	\$ 376,380	\$ 514,586
	=====	=====

(7) Line of Credit and Equipment Lease Facility Agreements

In April 2005, the Company entered into line of credit and equipment lease agreements with Sovereign Bank. The line of credit is a revolving credit facility allowing the Company to borrow up to 80% of eligible accounts receivable, up to a maximum of \$1 million, subject to the Company complying with certain covenants. The line of credit has a one year term and has been extended to May 2008. As of September 29, 2007 there were no borrowings under the line of credit.

The equipment lease facility allows the Company to lease up to \$1.5 million of eligible capital equipment from Sovereign Bank. As of September 29, 2007, the Company has leased capital equipment with a net carrying value of \$1,084 thousand from Sovereign Bank under the lease facility agreement.

(8) Income Taxes

At December 30, 2006, the Company had approximately \$8,000,000 of net operating loss carryforwards available to offset income for U.S. Federal income tax purpose. The Company has established a valuation allowance against this and its other deferred tax assets.

The Company recorded a tax provision of \$4,884 and \$14,817 for federal income taxes for the three and nine months ended September 29, 2007, respectively. This provision is based on the federal corporate alternative minimum tax rate rather than the statutory graduated tax rates. The Company believes it will be able to use net operating loss carryforwards to offset federal taxes, other than the corporate alternative minimum tax, in fiscal 2007.

The Company reduced the valuation allowance against deferred tax assets at the end of 2006 resulting in a deferred tax asset account of \$400,000 on the Company's Consolidated Balance Sheet as of year-end 2006. The Company will continue to consider the need and amount of the valuation allowance against the deferred tax assets based upon its ongoing assessment of historical and projected taxable income.

The Company recorded a tax provision of \$14,387 and \$29,262 for state income taxes during the three and nine months ended September 29, 2007.

ITEM 2 MANagements DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of financial condition and results of operations is based upon and should be read in conjunction with the consolidated financial statements of the Company and notes thereto included in this report and the Company's Annual Report on Form 10-K for the year ended December 30, 2006.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements that involve a number of risks and uncertainties. There are a number of factors that could cause the Company's actual results to differ materially from those forecasted or projected in such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date hereof. The Company undertakes no obligation to publicly release the results of any revisions to these forward-looking statements which may be made to reflect events or changed circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Critical Accounting Policies

The critical accounting policies utilized by the Company in preparation of the accompanying consolidated financial statements are set forth in Part II, Item 7 of the Company's Annual Report on Form 10-K for the year ended December 30, 2006, under the heading "Management's Discussion and Analysis of Financial Condition and Results of

Operations". There have been no material changes to these policies since December 30, 2006.

Overview

CPS Technologies Corporation (the "Company" or "CPS") (formerly Ceramics Process Systems Corporation) provides advanced material solutions to the electronics, robotics, automotive and other industries. Our primary advanced material solution is metal matrix composites, a new class of materials which are a combination of metal and ceramic. CPS has a leading, proprietary position in metal matrix composites. Metal matrix composites have several superior properties compared to conventional materials - improved thermal conductivity, thermal expansion matching, stiffness and light weight - which enable higher performance and higher reliability in our customers' products.

Like plastics 80 years ago, this new class of materials will penetrate many end markets over many years. CPS management believes our business model of providing advanced material solutions to a portfolio of high growth end markets, which are, at any point in time, in various stages of the technology adoption lifecycle, provides CPS with the opportunity for sustained growth and a diversified customer base. We believe we have validated this model as we are now supplying customers at all stages of the technology adoption lifecycle.

CPS is the leader in supplying metal matrix composites to certain high growth electronics end markets which are well along in the adoption lifecycle and therefore generating significant demand. These end markets include high-performance integrated circuits and circuit boards used in internet switches and routers, as well as motor controllers used in high-speed electric trains, subway cars and wind turbines. CPS supplies heat spreaders, lids and baseplates to customers in these end markets. CPS is a fully qualified manufacturer for many of the world's largest electronics OEMs.

Concurrently, CPS is participating in certain end markets that are at an earlier stage of the adoption lifecycle. Management believes these end markets will generate additional growth longer-term. An example of such an end market is motor controllers for hybrid automobiles and trucks; CPS has been supplying prototypes into this end market for several years. Management believes that several of the programs for which we are selling prototypes will enter volume production in the future.

We are also actively working with customers in end markets at the beginning stages of the adoption lifecycle. Two examples include robotics components where the greater stiffness-to-weight ratio of metal matrix composites allows a significant performance improvement, and armor where CPS' hybrid armor technology has the potential for greater multi-hit capability, lighter weight and lower costs.

Our products are manufactured by proprietary processes we have developed including the Quickset™ Injection Molding Process ("Quickset Process") and the QuickCast™ Pressure Infiltration Process ("QuickCast Process").

CPS was incorporated in Massachusetts in 1984 as Ceramics Process Systems Corporation and reincorporated in Delaware in April 1987 through a merger into a wholly-owned Delaware subsidiary organized for purposes of the reincorporation. In July 1987, CPS completed our initial public offering of 1.5 million shares of our Common Stock. In March 2007, CPS Superconductor Corporation (a wholly owned subsidiary) was renamed CPS Technologies Corporation, and the parent Company, Ceramics Process Systems Corporation was merged into it. This resulted in the Company assuming the name CPS Technologies Corporation, and Ceramics Process Systems Corporation ceasing to exist.

Results of Operations for the Third Fiscal Quarter of 2007 (Q3 2007) Compared to the Third Fiscal Quarter of 2006 (Q3 2006)

Total revenue was \$3,082 thousand in Q3 2007, a 5% increase from revenue of \$2,926 thousand in Q3 2006. Revenue from baseplates for cellular telephone basestations declined quite significantly but this decline was offset by revenue growth in lids and heat spreaders and revenue growth from baseplates used in motor controllers. A major customer of baseplates for cellular telephone basestations notified us in Q2 that they would be shifting production from a company factory to a contract manufacturer during Q3 and there would be interruptions in demand. Once this transition has been completed, demand will resume.

Total operating expenses in Q3 2007 were \$2,824 thousand, a 9% increase from total operating expenses in Q3 2006 of \$2,602 thousand. Cost of product sales in Q3 2007 were \$2,279 thousand, a 2% increase from cost of product sales in Q3 2006 of \$2,238 thousand. Cost of product sales increased due to changes in product mix and increased labor costs due to increased headcount. The gross profit on product sales in Q3 2007 was 26% compared to gross profit on product sales in Q3 2006 of 24%. The gross margin increased due to change in product mix.

Selling, general and administrative (SG&A) expenses were \$545 thousand in Q3 2007, a 49% increase from SG&A expenses of \$365 thousand in Q3 2006. The increase in SG&A expenses is primarily the result of higher commissions paid to sales representatives due to shifts in product mix. Income tax expense for state income taxes was slightly higher in Q3 2007 compared to Q3 2006 because income was higher.

Results of Operations for First Nine Months 2007 Compared to First Nine Months of 2006

Total revenue was \$9,290 thousand in the first nine months of 2007, a 15% increase from total revenue of \$8,061 thousand in the first nine months of 2006. Demand for most products, except baseplates for cellular telephone basestations increased in the first nine months of 2007 compared to the same period a year ago. Increased demand in lids and heat spreaders resulted primarily from new products which went into production in the second half of 2006 and demand continued to build in 2007.

Total operating expenses in the first nine months of 2007 were \$8,499 thousand, a 16% increase from total operating expenses of \$7,302 thousand in the first nine months of 2006. Cost of product sales in the first nine months of 2007 were \$6,955 thousand, a 14% increase from cost of product sales of \$6,105 thousand in the first nine months of 2006. Cost of product sales increased primarily as a result of increased unit shipments. Gross profit on product sales in the first nine months of 2007 was 25% compared with gross profit on product sales of 24% in the first nine months of 2006. This gross profit margin remained fairly constant. Selling, general and administrative (SG&A) expenses were \$1,543 thousand in the first nine months of 2007, a 29% increase from SG&A expenses of \$1,197 thousand in the first nine months of 2006. The increase in SG&A expenses is primarily the result of higher commissions paid to sales representatives, higher sales promotion expenses and higher salary costs associated with increased personnel additions in the sales function.

Liquidity and Capital Resources

The Company's cash and cash equivalents at September 30, 2007 were \$486 thousand compared to cash and cash equivalents at December 30, 2006 of \$518 thousand, a decrease of \$32 thousand or 6%. To support future anticipated growth, the Company made in Q3 and is continuing to make investments in capital equipment and process improvements as cash balances allow. The 6% decline in cash balances results from the timing of payments associated with capital equipment purchases and expenses related to process improvements. The Company expects that the quarter-end cash balance will continue to fluctuate in future quarters for the same reasons.

Accounts receivable declined to \$2,184 thousand at September 29, 2007 from \$2,918 thousand at December 30, 2006. This change reflects the timing of shipments and collections in the quarter; there has been no significant change in days sales outstanding. The accounts receivable balance at September 29, 2007 and December 30, 2006 is net of allowance for doubtful accounts of \$5 thousand.

Inventories increased to \$1,402 thousand at September 29, 2007 from \$862 thousand at December 30, 2006. Raw materials inventory increased primarily due to purchased components used in the Company's hermetic packaging product line; work-in-process inventory increased to support higher unit shipments; and finished goods inventory increased due to increased inventory being held at customers' locations on consignment. This inventory is shipped under existing purchase orders and per customers' requests. Consigned inventories increased to \$582 thousand at September 29, 2007 from \$427 thousand at December 30, 2006.

The Company financed its working capital during Q3 2007 and the nine months ended September 29, 2007 with existing cash balances and funds generated by operations. The Company expects it will continue to be able to fund its working capital requirements for the remainder of 2007 from these same sources.

The Company continues to sell to a limited number of customers and the loss of any one of these customers could cause the Company to require additional external financing. Failure to generate sufficient revenues, raise additional capital or reduce certain discretionary spending could have a material adverse effect on the Company's ability to achieve its business objectives.

Contractual Obligations

In April 2005, the Company entered line of credit and equipment lease agreements with Sovereign Bank. The line of credit is a revolving credit facility allowing the Company to borrow up to 80% of eligible accounts receivable, up to a maximum of \$1 million, subject to the Company complying with certain covenants. The line of credit has a one-year term. In the second quarter of 2007 the term was extended to May 2008. As of September 29, 2007 there were no borrowings under the line of credit.

The equipment lease facility allows the Company to lease up to \$1.5 million of eligible capital equipment. As of September 29, 2007, the Company has leased capital equipment with a carrying value of \$1,084 thousand under the lease facility agreement.

As of September 29, 2007 production equipment included \$245 thousand of construction in progress, and in addition, the Company had outstanding commitments to purchase \$27 thousand of production equipment. The Company intends to finance production equipment in construction in progress and outstanding commitments under the lease agreement with existing cash balances and funds generated by operations.

In July 2006 the Company entered into a lease for its current operating facilities of approximately 37,520 square feet of rentable space located on approximately seven acres at its current site in Norton, MA. The term of the lease is ten years. The lease is a triple net lease wherein the Company is responsible for payment of all real estate taxes, operating costs and utilities. The Company also has an option to buy the property and a first right of refusal during the term of the lease. Annual rental payments are \$100 thousand in year one increasing to \$150 thousand in year ten.

The Company's contractual obligations at September 29, 2007 consist of the following:

		<u>Payments Due by Period</u>			
	<u>Total</u>	Remaining in <u>FY 2007</u>	FY 2008 - <u>FY 2010</u>	FY 2011 - <u>FY 1013</u>	FY 2014 and <u>beyond</u>
Capital lease obligations including interest	\$ 769,215	\$111,396	\$ 657,819	\$ --	\$ --

Purchase commitments for production equipment	\$ 26,826	\$ 26,826	\$ --	\$ --	\$ --
Operating lease obligation for facilities at 111 South Worcester Street, Norton, MA.	\$1,123,000	\$ 28,000	\$ 353,000	\$ 407,000	\$ 335,000

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is not significantly exposed to the impact of interest rate changes or foreign currency fluctuations. The Company has not used derivative financial instruments.

ITEM 4 CONTROLS AND PROCEDURES

(a) The Company's Chief Executive Officer and Principal Financial Officer have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-14(c) and 15d - 14(c) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this Form 10-Q (the "Evaluation Date"). Based on such evaluation, such officer has concluded that, as of the Evaluation Date, 1) the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports the Company files under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and 2) the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is accumulated and communicated to our management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosure.

(b) Changes in Internal Controls. There has been no change in our internal control over financial reporting that occurred during our most recent fiscal quarter that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.
