The accompanying notes are an integral part of these financial statements.

1. The unaudited condensed consolidated financial statements presented herein have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and disclosures required by U.S. Generally Accepted Accounting Principles. Therefore, these financial statements should be read in conjunction with the consolidated financial statements and related footnotes included in the Company's Form 10-KSB for the year ended December 31, 2007. These financial statements reflect all adjustments that are, in the opinion of management, necessary to fairly state the results for the interim periods reported. All adjustments are of a normal recurring nature. Certain amounts from the prior period have been reclassified to be consistent with the current period presentation.

2. The Company's consolidated financial statements have been presented on the basis that it is a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company and its subsidiaries have reported recurring losses from operations, including an operating loss of \$735,330 during the six months ended June 30, 2008, a working capital deficit of \$17,119,859, and a stockholders' deficit balance of \$14,069,958 as of June 30, 2008. These factors indicate the Company and its subsidiaries' ability to continue in existence is dependent upon their ability to obtain additional long-term debt and/or equity financing and achieve profitable operations. The consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company and its subsidiaries be unable to continue in existence. The results of operations for the three and six months ended June 30, 2008 are not necessarily indicative of the results to be expected for the full year.

3. Beginning in July 2005, the Company has arranged a series of callable secured convertible debt financings (Notes) with an accredited investment group totaling \$6,620,000. The Notes bear interest at rates ranging from 6% to 8% and are due three years from issuance. In connection with these financings, the Company has issued warrants to acquire common stock in varying amounts and at varying exercise prices. During 2007 the Company signed Notes that added accrued interest totaling \$342,170 to the outstanding principal balance. These Notes bear interest at 2% and have a three year term. Following is a summary of the financings:

Accrued interest

added to principal 342,170

Balance 6/30/08 \$4,371,742

The Notes are convertible into common shares at the lesser of \$0.10 or 35% of the market price of the Company's common stock, as defined. The Company may prepay the Notes at 150% of the outstanding principal and accrued interest balance, if sufficient authorized shares are available to convert all of the outstanding principal and accrued interest. Additionally, the Notes are secured by substantially all of the Company's assets. The Notes are further secured by 14,550,558 Company common shares owned by an officer/stockholder.

The Notes are potentially convertible into an unlimited number of common shares. Accordingly, the Company has accounted for the Notes under SFAS 133, EITF 00-19 and DIG's B38 and B39 which require the beneficial conversion features and the prepayment penalties of each of the Notes to be treated as embedded derivatives, to be recorded as a collective liability equal to the estimated fair value of the embedded derivatives. As of June 30, 2008 and December 31, 2007 the Notes were convertible into 5,553,788,718 and 6,450,658,596 common shares, respectively, and the conversion features had estimated fair values of \$10,643,814 and \$13,003,762, respectively. As of December 31, 2007, the Company did not have enough authorized shares to allow conversion of all of the outstanding debt into stock. Consequently, the prepayment option was not available and no value for the prepayment feature was included in the computation of the estimated fair value of the derivatives for December 31, 2007. As of June 30, 2008 the Company did have enough authorized shares to convert the debt. Consequently, the prepayment option was available

and the estimated fair value of this feature was included in the computation of

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2008

(UNAUDITED)

the estimated fair value of the derivative as of June 30, 2008.

In addition, all warrants and options that are exercisable during the period that the Notes are outstanding are required to be recorded as liabilities at their estimated fair value. At June 30, 2008 and December 31, 2007 warrants and options to acquire a total of 160,891,001 and 156,729,001 common shares, respectively, were outstanding and had estimated fair values of \$246,126 and \$231,224, respectively.

The Company estimates the fair value of the embedded conversion and prepayment options of the callable secured convertible debt in a single pricing model with an embedded weighted average calculation. The assumptions used are to (1) determine the number of shares it would take to convert the debt under the terms of the agreements as of the balance sheet date; (2) estimate the future rate of debt conversions by the investors based on recent conversion history; (3) estimate the debt balance at specified dates, using 6 month intervals, based on the conversion rate determined in step 2; (4) value each of the components, including the conversions and the prepayment balances determined in step 3, using the Black-Scholes option pricing model; and (5) compute the estimated fair value of the combined derivatives by taking a weighted average of the values of the debt derivative and the prepayment options for the estimated prepayment dates based on estimated probability of occurrence of each event. Volatility rates ranged from 95% to 144% and 90% to 107% for the six months ended June 30, 2008 and 2007, respectively. Risk free interest rates ranged from 1.22% to 3.99% and 4.28% to 5.07% for the six months ended June 30, 2008 and 2007, respectively. Volatility is calculated each reporting period and the calculation involves matching data points of our common share market price to the length of the option period. Fluctuations in volatility between individual derivatives and between periods are primarily due to the length of the option period.

The Company estimates the fair value of warrants and options using the Black-Scholes option pricing model and assumes all warrants and options would be exercised on their respective expiration dates. Volatility and risk free interest rate ranges are included in the ranges listed above.

The following table is a summary of the transactions and adjustments that comprised the calculation of the estimated fair value of the derivatives from January 1, 2007 to June 30, 2008:

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Edgar Filing: ITRONICS INC - Form 10-Q

JUNE 30, 2008

(UNAUDITED)

	Convertible Debt <u>Derivative</u>	Warrant And Option <u>Liability</u>
Estimated fair value as of		
December 31, 2006	\$ 4,876,175	\$ 380,083
Additional borrowing in 2007	2,060,000	-
Accrued interest	134,554	-
Warrants issued for services and expensed or capitalized in 2007	-	7,337
Debt conversions into common shares	(1,021,367)	-

Estimated Fair Value at December 31, 2007	13,003,762	231,224
Additional borrowing in 2008	310,000	-
Accrued interest	163,325	-
Options issued for services and expensed or capitalized in 2008	-	518
Debt conversions	(302,677)	-
Year to date adjustment to Estimated Fair Value at June 30, 2008	(2,530,596)	14,384
Estimated Fair Value at June 30, 2008	\$10,643,814	\$ 246,126

The fair value of the beneficial conversion option, prepayment penalties, warrants and options are estimated each reporting period with the change in fair value recorded as gain or loss on derivative instruments. As the Company's common stock is highly volatile, material gains or losses for the change in estimated fair value are likely to occur in future periods.

Following is a summary of the gains and (losses) on derivative instruments by reporting period for the three and six months ended June 30, 2008 and 2007:

	Three Months Ended June 30,		Six Months Ended June 30,	
	<u>2008</u>	<u>2007</u>	<u>2008</u>	<u>2007</u>
Convertible debt derivative	\$5,654,651	\$(605,468)	\$2,530,596	\$ 620,988
Warrant and option liability	514,630	294,326	(14,384)	(789,741)
	\$6,169,281	\$(311,142)	\$2,516,212	\$(168,753)

In connection with the above described financings, the Company entered into Registration Rights Agreements with the Noteholders that either require the Company to use its best efforts to file a registration statement within 120 days of funding or to file a registration statement within 10 days of written demand from the Noteholders. The 2005 Agreements required the Company to increase the authorized shares by October 31, 2005 or use its best efforts to

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2008

(UNAUDITED)

do so. The Agreement specifies penalties of 2% per month for failing to register the shares timely and 3% per month for failing to increase the authorized shares. The Company registered 50 million shares in February 2006 and increased the authorized shares in March 2006. Because it used its best efforts, the Company did not incur any penalties. The Company completed registrations of 75 million shares each in October 2006 and June 2007. After converting their debt into the 75 million common shares from the June 2007 registration, the Noteholders began utilizing Rule 144 to convert their debt into common shares as several of the Notes qualified for Rule 144 treatment since they were more than two years old. In February 2008 Rule 144 was revised to allow sale of shares after being held for six months. The holding period for debt instruments begins on the date of the investment, and due to the shortened time period, the Company anticipates that the Noteholders will utilize Rule 144 for future debt conversions and that no future registrations will be necessary.

In December 2007 the Company had issued substantially all of its authorized shares. A shareholder meeting to increase the authorized shares to 20 billion from 1 billion shares was held on May 6, 2008, at which time the shareholders approved the increase. Consequently, the Company believes it has used its best efforts to be in compliance with the terms of the various Registration Rights Agreements as of June 30, 2008, and therefore believes the probability of incurring any penalties is remote.

From May 14, 2008 through June 30, 2008, the Noteholders converted a total of \$302,677 into 236,780,000 common shares. During 2007 the Noteholders converted a total of \$1,021,367 of the Notes into 546,758,396 common shares. Subsequent to June 30, 2008, through August 12, 2008, the Noteholders converted a total of \$212,357 into 422,933,700 common shares.

Subsequent to June 30, 2008, the Company completed an additional financing with the same investor group in the gross amount of \$210,000. The conversion discount rate on the new and all previous Notes was increased from 65% to 70%. In addition, the interest rate on the new and all previous notes was increased to 12% retroactively to January 1, 2008. The Noteholders also received seven year warrants to acquire 20 million common shares at an exercise price of \$0.001. Also subsequent to June 30, 2008, the Company signed Notes that added accrued interest totaling \$163,852 to the outstanding principal balance. These Notes have the same terms as the other Callable Secured Convertible Notes.

4.

As of June 30, 2008 we have accrued for liabilities, including interest, of \$557,078 which relate to various lawsuits and claims for the collection of the funds due. These include 8 leases totaling \$366,911 (reflected in Capital Lease Obligations) plus \$70,035 in additional interest (reflected in Accrued Interest) and one trade payable totaling \$85,801 (reflected in Accounts Payable) plus \$34,331 in additional interest (reflected in Accrued Interest). The leases are individually secured by specified equipment.

The accrued interest noted above was recorded based on our assessment of three cases that are seeking \$251,522, which we believe are probable. The

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2008

(UNAUDITED)

creditors have received judgments in these cases, but have taken no further collection action. The Company will continue to accrue interest until these cases are settled or paid in full.

The Company has two cases, that originally sought \$171,853, that we deem to have a remote possibility of incurring an additional unrecorded loss. The Company has negotiated payment agreements on these cases and, as of June 30, 2008, the recorded liability for these cases was \$163,681. We are delinquent in our payments under the respective settlement agreements, but are in contact with counsel for the creditor, and no collection action has been taken.

In addition to the above leases that are subject to litigation, there are three leases, with a recorded liability of \$151,071, that are in default. As required by U.S. Generally Accepted Accounting Principles, the principal balance of the leases that are in default have been classified as current liabilities.

Successful settlement of the above claims is dependent on future financing.

The Company may become involved in a lawsuit or legal proceeding at any time in the ordinary course of business. Litigation is subject to inherent uncertainties, and an unexpected adverse result may arise that may adversely affect its business. Certain lawsuits have been filed against the Company for collection of funds due that are delinquent, as described above. The Company is not aware of any additional legal proceeding or claims that it believes will have, individually or in the aggregate, a material adverse affect on its business, financial condition or operating results.

5. In the first quarter of 2006 all of the Series 2000 Convertible Promissory Notes became due and are now in default. The total principal and interest due at June 30, 2008 is \$3,709,964. The Company is formulating a plan to seek extensions of these notes and has recorded these notes as current liabilities. No collection action has been taken to date.

When these notes came due in 2006, they were convertible into 22,229,551 common shares. If the Company is successful in negotiating extensions of these notes, the convertible options may be renewed and the eventual number of potential options could be significantly higher than the amount that expired.

The Company's mortgage loan on the manufacturing facility is in default due to delinquent property taxes totaling \$14,378. The lender is aware of the situation and has taken no collection action. As a result of the default, the entire principal balance, in the amount of \$406,130, is included in current liabilities.

As of June 30, 2008 the Company owed \$144,802 plus penalties and interest for federal payroll taxes. Subsequent to June 30, 2008 \$66,177 plus related penalties and interest of this amount was paid. The Company is in contact with the IRS and believes a payment arrangement can be made for the remaining

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2008

(UNAUDITED)

balance due. The IRS may file federal tax liens and seize Company assets if satisfactory arrangements cannot be made.

6. Following is a summary of finished goods, work in progress, and raw materials inventories as of June 30, 2008 and December 31, 2007. The raw material and work in progress balances below include \$741,309 and \$640,484 in silver bearing unprocessed photochemicals or partially processed materials as of June 30, 2008 and December 31, 2007,

respectively.

	June 30, <u>2008</u>	Dec. 31, <u>2007</u>
Finished goods	\$ 59,599	\$ 46,211
Work in progress	616,983	522,273
Raw materials	469,835	425,673
	1,146,417	994,157
Less: Silver recoverability and slow moving reserves	104,161	104,161
Net Inventory	\$1,042,256	\$889,996

7. The Company has outstanding three categories of warrants and options that may be exercised to acquire common stock; these include warrants, convertible debt options, and employee options. The following table summarizes warrant and option activity for the period January 1, 2007 through June 30, 2008:

	<u>Warrants</u>	Convertible <u>Debt Options</u>	Employee <u>Options</u>	<u>Total</u>
Under option, December 31, 2006	58,599,501	586,181,548	6,322,000	651,103,049
Granted	100,000,000	6,411,235,444	252,000	6,511,487,444
Exercised	-	(546,758,396)	-	(546,758,396)
Expired/Adjusted	(8,134,500)	-	(310,000)	(8,444,500)
Under option, December 31, 2007	150,465,001	6,450,658,596	6,264,000	6,607,387,597
Granted	10,000,000	-	117,000	10,117,000
Exercised	-	-	-	-
Expired/Adjusted	(5,725,000)	(896,869,878)	(230,000)	(902,824,878)

Under option, June 30, 2008	154,740,001	5,553,788,718	6,151,000	5,714,679,719
-----------------------------	-------------	---------------	-----------	---------------

The average price for all warrants and options granted and exercised was \$0.002 for the six months ended June 30, 2008 and \$0.0009 for the year ended December 31, 2007.

The following table summarizes the warrants and options outstanding as of June 30, 2008:

16

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2008

(UNAUDITED)

<u>Expiration Dates</u>	<u>No. of Shares</u>	<u>Exercise Price</u>	<u>Weighted Average Exercise Price</u>
<u>Warrants:</u>			
March 2015	10,000,000	\$0.0001	
December 2014	15,000,000	0.001	
August 2014	20,000,000	0.0014	
October 2014	15,000,000	0.004	
January to June 2014	50,000,000	0.010	
November 2013	20,000,000	0.040	
July 2013	20,000,000	0.050	
March 2010	1,000,000	0.100	
July 2010 to February 2011	3,740,001	0.150	
Total Warrants	154,740,001		\$0.0198

Convertible Debt Options:

August 2008 to March 2011	5,553,788,718	\$0.0008	\$0.0008
---------------------------	---------------	----------	----------

Employee Options:

August 2008 to February 2018	454,000	\$0.150	
One year after employment ends	1,450,000	0.150	
May 2017 to May 2018	80,000	0.160	
January 2015 to January 2018	150,000	0.200	
One year after employment ends	1,000,000	0.250	
One year after employment ends	3,000,000	0.300	
October 2012 to October 2013	17,000	0.500	
Total Employee Options	6,151,000		\$0.2417
Total Warrants and Options	5,714,679,719		\$0.0016

The 5,553,788,718 convertible debt options listed above relate to the callable secured convertible debt discussed in Note 3 above. As of June 30, 2008 \$4,535,594 of principal and accrued interest was convertible into common stock at the lower of \$0.10 per share or 35% of a calculated market price. Consequently, the number of shares and the conversion price can vary up or down materially, depending on the Company's stock price at any point in time.

8. Earnings (Loss) per Common Share:

Basic Earnings (loss) per common share is calculated based on the consolidated net income (loss) for the period divided by the weighted average number of common shares outstanding during the three and six months ended June 30, 2008 and 2007.

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2008

(UNAUDITED)

Edgar Filing: ITRONICS INC - Form 10-Q

Diluted Earnings (loss) per common share assumes that any dilutive convertible debt outstanding and stock options and warrants were converted on the first day of the period. Interest expense (net of tax) incurred the period that is related to convertible debt is added back to net income for purposes of the computation. Any stock options or warrants with exercise prices below the weighted average market price for the quarter are excluded from the computation. For purposes of computing diluted earnings per common share, common stock equivalents are excluded for periods with net losses as their effect would be antidilutive.

Following is a reconciliation of Net Income (Loss) and Weighted Average number of shares outstanding, in the computation of basic and diluted earnings (loss) per common share (EPS) for the three and six months ended June 30, 2008 and 2007.

	Three months Ended June 30,		Six months Ended June 30,	
	<u>2008</u>	<u>2007</u>	<u>2008</u>	<u>2007</u>
Net Income (Loss)	\$5,552,772	\$(1,235,605)	\$1,193,994	\$(1,703,970)
Less: Preferred stock dividends	-	-	-	-
Basic EPS income (loss) available to common stockholders	\$5,552,772	\$(1,235,605)	\$1,193,994	\$(1,703,970)
Interest on convertible securities, net of tax	87,074	-	163,326	-
Diluted EPS income (loss) available to common shareholders	\$5,639,846	\$(1,235,605)	\$1,357,320	\$(1,703,970)
Weighted average number of shares outstanding (1,000 s)	1,071,615	374,749	1,045,106	366,715
Common equivalent shares (1,000 s)	5,587,789	N/A	5,596,455	N/A
Diluted average number of shares outstanding (1,000 s)	6,659,404	374,749	6,641,561	366,715
Per share amount -basic	\$0.005	\$(0.003)	\$0.001	\$(0.005)
Per share amount- diluted	\$0.001	\$(0.003)	\$0.0002	\$(0.005)

Warrants, options, and shares to be issued, totaling 717,396,547 shares as of June 30, 2007 would dilute EPS, and accordingly are not included in the computation of EPS for the three and six months ended June 30, 2007.

9. The Company adopted the provisions of SFAS 123R, *Share-Based Payments*, on January 1, 2006. Accordingly, compensation costs for all share-based awards to employees are measured based on the grant date fair value of those awards and recognized over the period during which the employee is required to perform service in exchange for the award (generally over the vesting period of the

18

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2008

(UNAUDITED)

award). We have no awards with market or performance conditions. Effective January 1, 2006 and for all periods subsequent to that date, SFAS 123R supersedes our previous accounting under Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"). In March 2005, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 107 ("SAB 107") relating to SFAS 123R. The Company has applied the provisions of SAB 107 in its adoption of SFAS 123R.

Total estimated share-based compensation expense recognized under SFAS 123R for the three months ended June 30, 2008 and 2007 was \$3,667 and \$737, respectively, and is included in general and administrative expenses. Total estimated share-based compensation expense recognized under SFAS 123R for the six months ended June 30, 2008 and 2007 was \$(12,474) and \$1,725, respectively. The 2008 amounts include \$263 and \$518 for the three and six months ended June 30, 2008, respectively, for the estimated fair value of stock options granted and \$3,404 and \$(12,993), respectively in valuation adjustments of common stock issued to employees and consultants for their compensation.

In addition to a stock option program for employees, certain employees, directors and various consultants receive the majority of their compensation in common shares. Shares issued for consulting services include such services as transportation, contracting, and corporate marketing and investor relations programs. Shares issued to employees, directors, and consultants are valued at the closing market price of our common stock on the transaction date. Total expenses paid in common stock for employees, directors, and consultants was \$119,743 and \$352,259 for the six months ended June 30, 2008 and 2007, respectively. These expenses are allocated between the two segments and between expense categories in the Consolidated Statements of Operations based on the type of service provided.

10. Following is financial information for each of the Company's segments. No changes have occurred in the basis of segmentation since December 31, 2007.

Reconciliation of segment revenues, gross profit (loss), operating income (loss), other income (expense), and net income (loss) before taxes to the respective consolidated amounts follows:

11. The Company periodically holds marketable securities that are available for sale, which have consisted solely of equity securities. The carrying amount on the balance sheets of these securities is adjusted to market value at each balance sheet date. The adjustment to market value is an unrealized holding gain or loss that is reported in Other Comprehensive Income. At present, these unrealized gains or losses are the only component of Accumulated and Other Comprehensive Income. The Company had Accumulated Unrealized Holding Gains of \$-0- at June 30, 2008 and December 31, 2007. No gains or losses were reclassified out of accumulated other comprehensive income into

earnings during the three and six months ended June 30, 2008. No gains were reclassified out of accumulated other comprehensive income into earnings during the three and six months ended June 30, 2007. The table below illustrates the amount of

21

12.

Fair value of financial instruments

On January 1, 2008, the Company adopted SFAS 157, Fair Value Measurements. SFAS 157 defines fair value, establishes a three-level valuation hierarchy for disclosures of fair value measurement and enhances disclosures requirements for fair value measures. The carrying amounts reported in the balance sheets for receivables, payables and short term debt qualify as financial instruments are a reasonable estimate of fair value because of the short period of time between the origination of such instruments and their expected realization and their current market rate of interest. The three levels are defined as follow:

- Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are

22

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2008

(UNAUDITED)

observable for the assets or liability, either directly or indirectly, for substantially the full term of the financial instruments.

- Level 3 inputs to the valuation methodology are unobservable and significant to the fair value.

The Company analyzes all financial instruments with features of both liabilities and equity under SFAS 150, "Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity," SFAS No 133, "Accounting for Derivative Instruments and Hedging Activities" and EITF 00-19, "Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock."

The Company's convertible debt derivatives are carried at fair value totaling \$10,643,814 and \$13,003,762, as of June 30, 2008 and December 31, 2007; the Company carries its options and warrants at fair value totaling \$246,126 and \$231,224 as of June 30, 2008 and December 31, 2007. The Company used Level 2 inputs for its valuation methodology for the convertible debt derivatives, warrant and option liability, and their fair values are determined by using current conversion rate which is determined by the lowest three stock prices for the past 20 days at each reporting period.

	Fair Value As of June 30, 2008	Fair Value Measurements at June 30, 2008 Using Fair Value Hierarchy		
		Level 1	Level 2	Level 3
Liabilities				
Convertible debt derivative	\$ 10,643,814		\$10,643,814	
Warrant and option liability	\$ 246,126		\$246,126	

The Company recognized gains (losses) of the respective components of the derivative instruments of \$2,530,596 and \$(14,384), respectively, for the six months ended June 30, 2008.

The Company did not identify any other non-recurring assets and liabilities that are required to be presented on the balance sheet at fair value in accordance with SFAS No. 157. The Company also adopted SFAS 159, "The Fair Value Option for Financial Assets and Financial Liabilities" on January 1, 2008. SFAS 159 permits entities to choose to measure certain financial and non-financial items at fair value that are not otherwise required to be measured at fair value. The Company chose not to elect the option to measure eligible items at fair value.

Item 2. Management's Discussion and Analysis or Plan of Operations

Some of the information in this report contains forward-looking statements that involve substantial risks and uncertainties. You can identify these statements by forward-looking words such as "may," "will," "expect," "anticipate," "believe," "estimate" and "continue," or similar words. You should read statements that contain these words carefully because they:

- discuss our future expectations;
- contain projections of our future results of operations or of our financial condition; and

- state other "forward-looking" information.

We believe it is important to communicate our expectations. However, there may be events in the future that we are not able to accurately predict or over which we have no control. Our actual results and the timing of certain events could differ materially from those anticipated in these forward-looking statements.

Results of Operations

We reported consolidated revenues of \$1,263,863 for the quarter ended June 30, 2008, compared to \$841,585 for the prior year quarter, an increase of 50%. The increase was due to a combination of increases in GOLD n GRO Fertilizer segment revenue of \$392,600, or 47% and Mining Technical Services segment revenue of \$29,700, or 1,773%. Consolidated net income was \$5,552,772, or \$0.005 per share, for the quarter ended June 30, 2008, compared to a net loss of \$1,235,605 or \$0.003 per share for the comparable 2007 period, an improvement of \$6,788,400. The significant change from a loss to a profit is due to an increase in sales and related gross profit, reduction in operating costs, and to a non-cash gain on derivative instruments related to our financing.

Consolidated revenues for the first six months of 2008 were \$1,916,994 compared to \$1,374,440 for the prior year period, an increase of 39%. Consolidated net income was \$1,193,994, or \$0.001 per share, for the six months ended June 30, 2008, compared to a net loss of \$1,703,970 or \$0.005 per share for the comparable 2007 period, an improvement of \$2,898,000.

To provide a more complete understanding of the factors contributing to the changes in revenues, operating expenses, other income (expense) and the resulting operating income (loss) and net income (loss) before taxes, the discussion presented below is separated into our two operating segments.

--------------------------------	-------------	---------------	-------------	---------------

Total segment revenues for the second quarter of 2008 were approximately \$1,232,500, an increase of 47% from the second quarter of 2007. Total fertilizer sales for the quarter were \$1,114,900 (1,100 tons), compared to \$745,200 (845 tons) for the 2007 second quarter, an increase of 50% in dollars and a 30% increase in tonnage. Sales of bulk Chelated Liquid Micro-nutrients were \$918,600 (788 tons) and \$612,900 (645 tons) for the second quarter of 2008 and 2007, respectively, an increase of 50% in dollars and 22% in tonnage. Sales of bulk Chelated Liquid Multi-nutrients were \$165,400 (312 tons) and \$75,000 (181 tons) for the second quarter of 2008 and 2007, respectively, an increase of 120% in dollars and 72% in tonnage. A new Chelated Secondary Nutrient product was introduced in the second quarter of 2006. Sales of this product were \$-0- (-0- tons) and \$24,600(18 tons) for the second quarter of 2008 and 2007, respectively. The overall increase in sales was due both to price and volume increases. Total photochemical services revenue for the quarter decreased \$6,000 due primarily to a reduction in photoliquids from one supplier. This was a decrease of 14% in revenue on decreased volume of 17%. Silver sales were \$81,000 (4,287 ounces) for the quarter, compared to \$52,100 (3,405 ounces) for the prior year first quarter, an increase of 56% in dollars and 26% in ounces. The increase is due to a combination of increased sales of silver contained in film and a sharply increased silver price.

World-wide demand for fertilizers increased sharply beginning in the first quarter, creating shortages of certain basic fertilizer materials. Because of this, delays were experienced in obtaining raw materials and some GOLD n GRO liquid fertilizer deliveries were delayed to the third quarter. At the end of the first quarter, we had the largest backlog of truck load orders since we began fertilizer manufacturing. Our sales personnel are working closely with our sales distribution network to manage fertilizer distribution so that the ultimate customer receives ordered materials as closely as possible to when they are needed in the field.

Cost of sales increased \$199,700 due primarily to increases in raw materials costs of \$147,400 resulting from increased sales and payroll costs of \$32,500. The segment recorded a gross profit of \$309,900 for the quarter, compared to a gross profit of \$117,000 for the second quarter of 2007, an increased gross profit of \$192,900, or 165%.

We are continuing our efforts on sales of Photochemical Silver Concentrators in order to provide a long term base of used photochemical supply. In March 2007 we received a deposit on a Photochemical Silver Concentrator and it was delivered in July 2007. During the second quarter of 2008 we received another order from the same customer. Delivery is expected to occur in the

third quarter. We also are now aggressively seeking new large scale photochemical recycling customers, and between August 2006 and April 2007, we obtained three new significant wholesale customers. In April 2008 we obtained another significant wholesale customer. As a result of these new customers, we expect the rate of growth in sales volume will be significantly greater than the rate of growth in sales dollars. The addition of these customers is expected to increase photochemical raw material (on an unconcentrated basis) up to 400% greater than the volume in 2006.

We have also initiated discussions with other large scale potential customers. We anticipate that the new customers, along with our existing suppliers, will provide sufficient raw material for fertilizer production into the spring 2009 fertilizer season. If we are successful in gaining some of the other potential customers, we expect raw material needs to be met well into the future.

Segment operating expenses decreased \$87,500 from the second quarter of 2007. This was due to a decrease of \$93,400 in sales and marketing expenses related primarily to decreased corporate marketing.

Edgar Filing: ITRONICS INC - Form 10-Q

These factors resulted in a 2008 second quarter segment operating loss of \$156,800 compared to a loss of \$437,200 for the second quarter of 2007, a decreased operating loss of \$280,400, or 64%.

Other income (expense) was an income of \$5,844,700 for the quarter, compared to a net expense of \$(621,200) for the 2007 second quarter, an improvement in other income (expense) of \$6,465,900. The increase in other income is due primarily to an increase in gain on derivative instruments of \$6,480,400. The gain or loss on derivatives is calculated each quarter and is subject to material changes, either up or down, based on changes in our stock price, which is highly volatile.

The changes in operating loss and other income resulted in a segment net income before taxes of \$5,687,900 for the quarter ended June 30, 2008, compared to segment net loss before taxes of \$1,058,400 for the prior year quarter, an improvement of \$6,746,300.

For the first six months of 2008, segment revenues were \$1,829,800, compared to \$1,367,800 for the comparable 2007 period, an increase of 34%. The increase is due to increases in fertilizer and silver revenues. Gross profit for the first six months of 2008 was \$390,100, compared to \$133,100 for the comparable prior year period, an improvement of 193%. Operating loss for the first six months of 2008 was approximately \$475,000 compared to \$930,600 for the first six months of 2007, a reduced operating loss of \$455,600, or 49%.

Other income (expense) was an income of \$1,929,300 for the first six months of 2008, compared to a loss of \$554,600 for the comparable 2007 period, an improvement of \$2,483,900. The improvement is due to a change from a loss to a gain on derivative instruments totaling \$2,685,000, which was partially offset by a decrease in gains on sale of investments of \$205,900. The gain or loss on derivatives is calculated each quarter and is subject to material changes, either up or down, based on changes in our stock price, which is highly volatile.

The changes in operating loss and other expenses resulted in a segment net income before taxes of \$1,454,300 for the six months ended June 30, 2008, compared to segment net loss before taxes

26

of \$1,485,200 for the prior year period, an increased income of \$2,939,500.

MINING TECHNICAL SERVICES

	Three Months Ended June 30,		Six Months Ended June 30,	
	<u>2008</u>	<u>2007</u>	<u>2008</u>	<u>2007</u>
Revenues	\$ 31,373	\$ 1,675	\$ 87,215	\$ 6,628
Gross profit (loss)	\$ 9,705	\$ (5,992)	\$ 35,297	\$ (9,102)
Operating income (loss)	\$(135,113)	\$(185,368)	\$(260,320)	\$(365,336)
Other income (expense)	-	\$ 8,189	-	\$ 146,542
	\$(135,113)	\$(177,179)	\$(260,320)	\$(218,794)

Net income (loss) before
taxes

Mining technical services revenue was \$31,400 for the quarter ended June 30, 2008, compared to \$1,700 for the comparable quarter of 2007, an increase of 1,773%. The increase came from two technical services projects during the quarter. One was completed during the quarter and the other is expected to resume late in the third quarter. Cost of sales increased \$14,000, due to an increase in payroll and consulting expenses of \$10,200, which were related to the technical services projects discussed above. These factors resulted in a second quarter gross profit for the segment of \$9,700 compared to a gross loss of \$6,000 for the prior year second quarter, an improvement of \$15,700.

The Whitney & Whitney, Inc. reduced emphasis on technical consulting services and launch an internet information portal is brought about by the fact that Dr. Whitney, our President, has often been the lead person in generating new consulting contracts. Our President's increased responsibilities for managing the expanding GOLD n GRO fertilizer segment and overall corporate activities has reduced his time availability to actively participate in the consulting segment. Part of our objective in shifting the focus of the technical services segment is to retain our core professional staff that can provide assistance on technical service contracts as well as perform administrative duties for the GOLD n GRO fertilizer segment, while at the same time adding a potential source of revenue that is not dependent upon labor sales and which can be managed by a professional staff. The information portal also better utilizes the Whitney & Whitney, Inc. library and information resources that are already in existence. For the three months ended June 30, 2008 and 2007 we allocated costs of approximately \$46,700 and \$62,700, respectively, to the development of the web site. The site was launched in mid-August 2005 and we are now expanding the content of the site, as well as improving the profiled mining company information. We expect this level of spending to continue into at least the fourth quarter of 2008. As improvements to the site are completed and information maintenance becomes routine, we will reduce or redirect staff resources as needed. A program to solicit advertising customers was developed and is being offered to gold exploration companies beginning in the first quarter of 2007. We are presently evaluating the steps we need to take to improve the revenue growth from the website.

Total segment operating expenses for the second quarter of 2008 decreased \$34,600, due primarily to decreased sales and marketing costs related to corporate marketing and to the insidemetals.com website discussed above and to decreased research and development costs related to the insidemetals.com website.

The combination of these factors resulted in a 2008 second quarter segment operating loss of \$135,100, compared to an operating loss of \$185,400 for the second quarter of 2007, a decreased operating loss of \$50,300, or 27%.

27

Other income (expense) for the second quarter of 2008 was \$-0- compared to a gain of \$8,200 for the prior year second quarter. The prior year gain was from the sale of stock received in an exchange of our membership interest in our workers compensation insurance carrier.

The changes in operating loss and other income resulted in a segment net loss before taxes of \$135,100 for the quarter ended June 30, 2008, compared to a loss of \$177,200 for the prior year quarter, a decreased loss of \$42,100, or 24%.

For the first six months of 2008, segment revenue totaled \$87,200 compared to \$6,600 for the first six months of 2007, an increase of 1,216%. This is primarily attributable to the new technical services projects discussed above. Gross profit for the first six months of 2008 was \$35,300, compared to a gross loss of \$9,100 for the comparable prior year period, an improvement of \$44,400. Operating loss for the period was \$260,300 compared to an operating loss of \$365,300 for the comparable 2007 period, a decreased operating loss of \$105,000, or 29%.

Other income (loss) for the first six months of 2008 was \$-0- compared to a gain of \$146,500 for the prior year period. The prior year gain was due to the sale of a membership interest in the Company's worker's compensation mutual insurance company.

The changes in operating loss and other income resulted in a segment net loss before taxes of \$260,300 for the six months ended June 30, 2008, compared to a net loss of \$218,800 for the prior year period, an increased loss of \$41,500, or 19%.

SUMMARY

On a consolidated basis, the various changes in revenues and operating expenses resulted in a second quarter 2008 operating loss of \$292,000, compared to \$622,600 for the second quarter of 2007, a decreased operating loss of \$330,600, or 53%. Net income before taxes for the second quarter 2008 was \$5,552,800 compared to a net loss before taxes of \$1,235,600 for the prior year second quarter, an improvement of \$6,788,400. The improvement is due to a combination of increased sales, reduced operating expenses, and an increased non-cash gain on derivatives. For the six month period ended June 30, 2008 consolidated operating loss was \$735,300 compared to \$1,296,000 for the prior year comparable period, a decreased operating loss of \$560,600, or 43%. Net income before taxes for the six months ended June 30, 2008 was \$1,194,000 compared to a net loss before taxes of \$1,704,000 for the prior year six month period, an improvement of \$2,898,000.

Changes in Financial Condition; Capitalization

Cash amounted to \$18,600 as of June 30, 2008, compared to \$260,300 as of June 30, 2007. Net cash used for operating activities was approximately \$360,000 for the first six months of 2008. The cash used for operating activities during the period was financed by net proceeds of

28

\$300,000 from the issuance of callable secured convertible notes, less \$27,800 in debt issuance costs, loans totaling \$45,000 from an officer/stockholder, and increases in current liabilities of \$173,800 in accounts payable, \$149,300 in management salaries, \$216,600 in accrued expenses, and \$128,300 in accrued interest.

Total assets increased \$106,800 during the six months ended June 30, 2008 to \$4,462,700. Current assets increased \$236,900 due to increases in accounts receivable of \$147,900 and inventory of \$152,300. These increases were partially offset by a decrease in cash of \$74,400. Accounts receivable increased due to spring season sales. Inventory increased primarily due to the accumulation of silver contained in photographic wastes received from our customers. Net property and equipment decreased \$73,200 due to current period depreciation and amortization. Other assets decreased \$56,900 due to amortization of deferred loan fees related to the callable secured convertible note financing.

Current liabilities decreased during the six months ended June 30, 2008 by \$1,485,400 and total liabilities decreased by \$1,487,200. The decrease is primarily due to a decrease of \$2,360,000 in the estimated fair value of derivative instruments. The major components of this decrease include \$310,000 in new convertible debt borrowing, \$163,300 in accrued interest, conversions to common stock of \$302,700 and a net decrease in estimated fair value of derivative instruments of \$2,530,600. The decrease in estimated fair value of the derivative instruments is primarily due to an increased stock conversion price at June 30, 2008 compared to December 31, 2007. The current stock price used in the Black-Scholes model used to compute estimated fair value was \$0.0026 at June 30, 2008 and December 31, 2007. The conversion price used in the same computation was \$0.0008 and \$0.0007 for June 30, 2008 and December 31, 2007, respectively. The increased stock conversion price resulted in a reduction in the number of shares needed to convert the callable secured convertible debt from 6,450,658,596 common shares at December 31, 2007 to 5,553,788,718

common shares at June 30, 2008, in spite of the increased borrowing. This reduced the number of months needed to convert all the debt and consequently, reduced the value of the debt derivative.

Other changes in current liabilities include increases of \$212,100 in current maturities of convertible notes and accrued interest, \$169,600 in accounts payable, \$149,300 in accrued management salaries, \$103,000 in accrued expenses, \$105,300 in interest payable to officer/stockholders, and \$90,500 in other liabilities. These increases were partially offset by decreases of \$12,200 in current maturities of long-term debt and \$40,100 in current maturities of capital lease obligations.

Liquidity and Capital Resources

During the six months ended June 30, 2008, working capital improved by \$1,722,300 to a deficit balance of \$17,119,900. The improvement is due primarily to the decrease in estimated fair value of derivative instrument liabilities discussed above.

In order to solve our liquidity problems, management has implemented a plan of financing its operations through the private placements of common shares, convertible debt, conversion of debt to common shares, and payment of consulting and other labor services with common shares. We obtained financing of \$2.06 million and \$2.0 million in 2007 and 2006, respectively, through

29

the issuance of callable secured convertible debt. During the first six months of 2008, we obtained financing of \$310,000 from the issuance of callable secured convertible debt. Subsequent to June 30, 2008 we obtained additional convertible debt financing of \$210,000. We anticipate these funds will provide for our working capital needs until the latter half of August 2008.

We are actively working to establish a longer term financing plan that will identify capital sources for our financing needs over a three to five year period. Once this plan is established, needs for financing will be adjusted and the plan will be updated annually.

In addition to continuing the above described efforts, development of the technology necessary to manufacture fertilizer from photochemicals has been completed. In March 1998 our subsidiary, Itronics Metallurgical, Inc., signed a definitive manufacturing and distribution agreement with Western Farm Services, Inc. (WFS). The agreement gives WFS the exclusive license and right to manufacture and market the GOLD n GRO line of fertilizer products in the states of Arizona, California, Hawaii, Idaho, Oregon and Washington. The agreement is for five years, with five year renewal options. In March 2008, the companies entered the third five year term of the agreement.

In addition, to meet short term cash needs, we have negotiated a 10 day payment period on invoices to our primary distributor, at a cost of 1% of the invoice amount. We also periodically factor certain inventory items and receivables to help with short term cash needs. These arrangements are with unrelated individuals, carry interest at 2% to 3% per month, and the lenders are secured by a blanket UCC on specified inventory items and on specified invoices. As of June 30, 2008, no factored inventory and receivables were outstanding.

We are expanding GOLD n GRO fertilizer sales and the related photochemical and silver sales necessary to achieve profitability, but this growth is subject to a number of uncertainties, including the annual seasonal nature of fertilizer sales related to crop cycles, short term weather patterns in specific markets, the rate of GOLD n GRO fertilizer adoption in existing and new markets, and the availability of funding to support sales growth.

Growth Plans and Implementation

With the successful completion of the initial pioneering development work by the GOLD 'n GRO Fertilizer segment, and with the launch of the insidemetals.com information portal by the Mining Technical Services Division, we are implementing growth plans for both divisions that are expected to drive expansion well into the future. The status of these plans and their implementation is described for each division.

GOLD 'n GRO Fertilizer Segment (Itronics Metallurgical, Inc.)

Our manufacturing plant is presently configured to produce 1.2 million gallons (on a single shift basis) of GOLD 'n GRO fertilizer annually (about 5,700 tons) and can be expanded to produce 7.2 million gallons of GOLD'n GRO per year, or about 36,000 tons. GOLD'n GRO fertilizer production in 2007 utilized about 5 percent of planned capacity. Planned expansions to achieve the 36,000 ton volume include increasing both dry raw material and liquid storage, increasing tank truck loading capacity, and automation of certain manufacturing functions. Expansion is

30

being done incrementally as fertilizer sales continue to grow.

We have developed the following eight-part approach to growth:

1. Increase sales in the established market segments.
2. Develop GOLD'n GRO fertilizer applications for more crops.
3. Expand sales to new territories.
4. Expand the GOLD'n GRO specialty fertilizer product line.
5. Complete development of and commercialize the new glass/tile products.
6. Develop and commercialize environmentally friendly metal leaching reagents for recovery of silver, gold, and other metals.
7. Continue facilities expansion and technology development.
8. Acquire established companies and/or their technologies.

Plans and status of implementing each of the growth categories is explained in more detail in the following sections.

1. Increase sales in established market segments.

We are selling into or developing applications for the three major segments. These are:

- a. Specialty Agriculture which includes Avocados, Citrus, Grapes, Fruit and Nut Trees, and Vegetables.

b. Bulk Field Crops which include alfalfa, cereal grains, corn, cotton, and soybeans.

c. The Urban Market, which includes Home Lawn and Garden, Landscape Construction and Maintenance, and Nursery and Greenhouse markets, and Golf Courses.

Our primary focus is to increase bulk GOLD n GRO liquid fertilizer sales as rapidly as possible. This is being achieved by expanding sales in the Specialty Agriculture segment and in the Bulk Field Crops segment. There are on-going small package sales in the Urban Market, but these are small relative to the other two segments.

In the second quarter 2008 the parent company of our distributor acquired a major competitor. Early in the third quarter the parent company disclosed plans to integrate the acquired company and its retail outlets into its existing retail distribution system. Prior to the acquisition our distributor and its sister subsidiaries had more than 500 retail outlets nationwide, after the merger there are more than 800 retail outlets nationwide.

Our distributor, which sells the GOLD n GRO fertilizers in Arizona, California, Hawaii, Idaho, Oregon, and Washington, is acquiring new retail outlets in those states. The increase in the number of retail outlets is expected to contribute to further increases in GOLD n GRO sales in the third and fourth quarters this year and in 2009. Consideration is being given to putting the GOLD n GRO products into a national sales program operated by a subsidiary of the acquired company. While a commitment has not been made, we have received inquiries from some of the newly acquired retail outlets in the southern and eastern U.S. about the availability of the GOLD n GRO fertilizers, and GOLD n GRO Guardian Deer Repellent. The Company believes that moving the GOLD n GRO product line into a national sales program could have a major positive impact on the growth of GOLD n GRO fertilizer sales.

2. Develop GOLD'n GRO fertilizer applications for more crops.

Based on our experience to date, it takes approximately two to five years to develop a new fertilizer product, which includes regulatory approval. It typically takes another two to four years to achieve market acceptance of successful products, which includes field trials to demonstrate product effectiveness.

We are continuing to assist with field trials being performed by our distributor's agronomy personnel in Utah and California. We are planning to support field trials for GOLD n GRO Guardian with potential distributors in several states beginning in the third quarter 2008.

In the fall of 2007 we began a field evaluation of using GOLD n GRO 10-0-1+3% Manganese as a manganese fertilizer that could be applied as a spray tank mix with glyphosate(Round Up) on "Round Up" ready corn. This is important because most manganese fertilizers are not compatible with glyphosate in spray tank mixes. The GOLD n GRO fertilizer was found to be compatible and no phyto-toxicity to the corn plants was experienced. The grower was pleased with the trial results. Subsequent to that, in the first half 2008, the Company has been working with a fertilizer raw material supplier who has put out trials on "Round Up Ready" soybeans in several states. Results have not yet been reported, but the supplier has an extensive nationwide distribution system and is fully capable of introducing the GOLD n GRO fertilizer in relevant markets in the mid-west and southern United States where soybeans are a major crop.

If the GOLD n GRO 10-0-1+3% Manganese proves to work with glyphosate for spray application on "Round Up Ready" soybeans, then three large acreage markets will become available for sales development. These are: (1)

"Round Up Ready" silage corn, (2) "Round Up Ready" corn for grain, and (3) "Round Up Ready" soybeans. The bulk of acreage for these crops is in the mid-west and southern areas of the United States. There is typically one crop per year, and the demand would be highly seasonal on a relatively large scale, and pre-season manufacturing of product inventory would be required.

During the past two years our agronomy staff has been conducting literature research specific to phosphorous availability and the related availability of nutrient metals that are placed in the soil by fertilization. The objective of this research is to establish a theoretical foundation that explains why components of the demetallized photoliquids used to make the GOLD n GRO liquid fertilizers are beneficial when applied. The research has identified many studies that have been conducted relevant to this chemistry. The outcome is that the unique chemistry found in the GOLD n GRO fertilizers is beneficial when applied to the soil by improving the availability of phosphorous and the nutrient metals, including iron, zinc, manganese, calcium, and magnesium. A related benefit is that residuals, to the extent they occur, are used as a nutrient source by soil microbes producing essentially complete use of the fertilizers. The main benefit of this nutrient technology is expected to be an ability to reduce the amount of fertilizer applied, while maintaining adequate nutrient levels in the crops being fertilized.

The other benefit of GOLD n GRO liquid fertilizer chemistry that is being identified is that it is making it possible to use phosphate-bearing fertilizer liquids in fertigation applications in locations that have hard water where this is not normally possible.

32

At a time in history when fertilizer prices, especially for phosphate, are rising sharply, the ability to improve the availability of phosphorous and nutrient metals in the soil has significant positive economic and environmental benefits.

These developments with their associated economic and environmental benefits are expected to lead to expanded use of the GOLD n GRO liquid fertilizers for fertigation applications on a number of crops, and to increase the use of the fertilizers with phosphate applications on many different crops.

In 2006 we began contributing to an ongoing Zinc Nutrition Research Program at Utah State University in Logan, Utah. To date, the research has demonstrated the effectiveness of GOLD n GRO 9-0-1+7% Zinc as a chelated liquid zinc micronutrient fertilizer for zinc deficient corn. Results include preventing visual symptoms of zinc deficiency, significantly increased tissue concentration of zinc compared to untreated plants, and doubled dry mass.

3. Expand sales to new territories.

The GOLD'n GRO products are being sold in Arizona, California, Colorado, Idaho, Nevada, Oregon, Rhode Island, Washington, and Utah, with the majority of our sales in central California. Two GOLD'n GRO products are registered in seven northeastern states and all of the products are registered in New York and in New Jersey. Based on our experience, commercial sales can be generated approximately one to three years after introductory sales activities are initiated. We are in the process of identifying distributors for New York and the other seven northeastern states. Each new geographic area developed requires the same procedural approach.

The expansion into the Northwest states of Idaho, Oregon, Washington, and Utah is being managed by one field agronomist. The cost of maintaining that position ranges from \$120,000 to \$150,000 per year. The expansion into the Northeast states is being managed by one part time person at an annual cost of approximately \$30,000. That person is also the lead person in seeking customers for our Photochemical Silver Concentrators.

In general, expansion to new regions of the country will require at least one field agronomist for each new region at a cost similar to that for the Northwest region. In addition, each state has varying registration requirements for product

labels and costs of registration. Development of product labels is done internally using existing staff. Registration fees for each state vary widely, ranging from \$25 to \$600 per year, largely depending on how many products are registered in the particular state. For the near term, we anticipate utilizing present staff and management for corporate support of the sales efforts for both existing regions and for the new regions. For the longer term, as we expand we will need to add corporate support personnel.

Our plan to expand sales in Urban Markets requires the consumer to utilize fertilizer injection equipment. This equipment provides economical, easy use of liquid fertilizers for consumer lawns and gardens. We are marketing one type of fertilizer injector to our "e" store, which is the first step into this market. Additionally, fertilizer injectors are available to consumers through irrigation supply stores.

33

4. Expand the GOLD'n GRO specialty fertilizer product line.

We are introducing two new specialty products, a calcium plus magnesium fertilizer named GOLD n GRO 11-0-0+5% Ca (Calcium) and a high magnesium content fertilizer named GOLD n GRO 8-0-0+3% Mg (Magnesium), both targeting foliar and soil application. We have registered GOLD n GRO 11-0-0+5% Ca in Nevada and California. Registration of GOLD n GRO 8-0-0+3% Mg is planned for the third quarter of 2008 at which time sales development will be started.

We are working with our distributors in California to introduce a new chelated micronutrient fertilizer which is GOLD n GRO 9-0-0 Iron Man Z. This fertilizer is being targeted to the turf and ornamental market and for use on vegetables, trees, and vines. Addition of this fertilizer to the GOLD n GRO line of chelated micronutrients fills a nutrient gap and was generated by customer requests for such a product. The Company is now offering five chelated micronutrient fertilizers for sale. The GOLD n GRO product line now includes a total of 13 liquid multi-nutrient fertilizers.

We are developing a new category of repellent fertilizers that are expected to be sold at higher profit margins than our other products. The GOLD n GRO Guardian deer repellent fertilizer is an example of this type of specialty fertilizer. The U.S. market for deer repellents is believed to exceed \$200 million in annual sales. Products currently in the market have limited effectiveness so we believe that there is a real opportunity for a line of systemic products that are effective for several weeks after each application. GOLD'n GRO Guardian small plot tests have shown effectiveness for 8 to 12 weeks as well as excellent wintertime effectiveness.

We acquired ownership interest in the GOLD n GRO Guardian trademark, product rights, and the repelling product in 2005. We now own 100% of all rights related to GOLD n GRO Guardian. Currently, this product line is strictly for non-food plant applications. We have engaged consultants experienced in the EPA registration process. We are presently working with them to plan the process and lab work needed to complete a series of registrations.

We have a three phased registration process underway to get the repelling ingredient (denatonium benzoate) and GOLD n GRO Guardian into the market.

Phase 1

is to register a "ready-to-use" spray deer repellent that is essentially similar in the amount of repelling ingredient to a topical product that is already in the market, but that is being phased out due to high cost and limited effectiveness. Using this "me too" approach provides a U.S. EPA approved path to rapid registration to get product sales started by mid-year 2008. This phase was completed in March 2008.

Phase 2

is to register denatonium benzoate. U.S. EPA has made a written determination that Itronics would have a 10 year exclusive use right under this registration that provides use protection to the owner which is similar to use protection provided by a product patent. This registration is being pursued because denatonium benzoate has not been registered as an active ingredient for use in animal repellents in the United States, and the U.S. EPA is now requiring that it be registered for that purpose. This registration requires that scientific, environmental, and toxicology data be gathered to become part of the application. We have an agreement in place with a large foreign manufacturer of denatonium benzoate who has already supplied certain confidential technical manufacturing and scientific information to U.S. EPA as part of our product registration application. Our environmental consultants have informed us

34

that the data required will take from two to four years of elapsed time to gather and could cost in the range of \$1 million to \$1.5 million. This registration is on hold until the data requirements can be fulfilled.

Phase 3

is to register the GOLD n GRO Guardian deer-repellent fertilizer concentrate. This registration will be pursued once denatonium benzoate has been registered as an active ingredient for use in animal repellents in the United States. This registration requires that scientific, environmental, and toxicology data be gathered to become part of the application. Our environmental consultants have informed us that the data required will take from two to four years of elapsed time to gather and could cost in the range of \$1 million to \$1.5 million. A major part of the toxicology studies for this product have been completed with a finding that the product is relatively safe, requiring only a caution label for use. Some of the scientific data has been supplied, but the environmental data has not yet been gathered.

We also need to register GOLD n GRO Guardian in each state in which it will be sold. We have already registered the fertilizer component, GOLD n GRO 8-8-8+4%S, in Nevada, Utah, and 9 northeastern states where sales will be started so that the fertilizer registration requirements will not delay sales once they are permissible. State

registration of the "ready-to-use" spray as registered with the U.S. EPA was begun in early May 2008. The plan is to file registration applications in 13 states. Sales of GOLD n GRO Guardian can begin in each state when the state registration is received. To date, our registration applications have been approved in Nevada, Utah, Rhode Island, Colorado, Massachusetts, New Jersey, and Maryland.

The Company is actively working on GOLD n GRO Guardian packaging for early customer use. It is also qualifying potential distributors in the states where registration has been received. The amount of GOLD n GRO Guardian Deer Repellent that can be sold under the first label registration is limited. Based on interest being expressed in the product, the Company believes that it could quickly move into a "sold out" position on the product until the second registration is completed. Because of this, we are selecting as initial distributors, the companies that appear to have the best long term potential to grow when more supply becomes available. Also because of this, the Company plans to only focus on licensed landscape maintenance companies that have licensed spray divisions as initial customers, along with tree and decorative plant nurseries in those states in which we are registering the product.

5. Complete development of and commercialize glass/tile products.

In 2003, we developed and produced glass /tile products proving that the product concept is technically viable. When the development of the glass/ceramic tile product is completed, we will achieve the ability to recycle 100 percent of

the photoliquid materials received from customers, including waste that is generated internally during fertilizer production. We have completed preliminary market research for the tile markets, but expect to do much more work to develop a plan to enter this market.

6. Develop and commercialize metal leaching reagents for recovery of silver, gold, and other metals.

35

We are developing applications of our technology to extract silver from photoliquids to the mining sector. This work is being expanded and a small pilot circuit is being established to chemically process certain categories of silver-bearing solid wastes. The gold mining sector currently uses cyanide and other toxic chemicals in their leaching process. We believe it may be possible to create and adapt new non-toxic leaching reagents and leaching procedures for processing other secondary materials and certain types of mine generated products. The specific markets for leaching reagents in gold and silver mining is large and world wide, but has not yet been studied in detail for market development. Our Technical Services Division maintains an extensive library and database of mines and mining activities worldwide, which provides us ready access to market information as we need it. Much pilot plant work, including one or more field pilot operations, must be completed before quantitative market studies can be completed.

7. Continue facilities expansion and technology development.

As fertilizer sales volume increases, we need to increase tank truck loading capacity. With the introduction of additional bulk products and increased demand for our products, load out capacity for shipment of three more bulk products is needed. The first phase, construction of a containment area, was substantially completed in late 2006. While we believe that we can handle expected growth in 2008 with the existing load-out module, we hope to complete installation of the new load out tanks during the second half of 2008, subject to the availability of financing. The estimated capital required for this project is \$400,000.

During the quarter, we completed pilot leach tests which show that the leach process we are developing will increase per melt refining capacity by up to 10 times and reduce per ounce refining cost up to 90 percent.

A silver-iron-zinc-sulfur concentrate is presently produced by our photoliquid demetallization process. The concentrate is dried and sent to the refinery for silver recovery, refining, and sale. The concentrate has a relatively low silver content in relation to the iron and sulfur. Presently some of the iron and zinc goes into a glass slag and some of the iron and zinc combines with the sulfur to form an "iron matte," which has some silver in it and which must be reprocessed to recover the remaining silver.

The purpose of the new technology is to remove the iron, zinc, and the sulfur from the concentrate to reduce the amount of concentrate sent to the refinery, and to reduce the amount of glass slag and iron matte produced by the refinery. The expected financial benefits of the process are to: (1) increase per melt silver refining capacity by up to 10 times with no increase in per melt cost by reducing the amount of silver concentrate sent to the refinery by up to 90 percent; (2) reduce waste by producing an iron-zinc bearing liquid (Itromet FeLix Process), and a sulfur bearing liquid (Itromet SuLix Process) that can be used as raw materials in GOLD n GRO fertilizers.

Small pilot scale leaching tests conducted in the first half of 2008 are producing a recovery of iron and zinc of more than 85 percent and up to 90 percent of the contained sulfur. The bulk volume of the residual silver bearing solids is reduced by up to 90 percent. The residual solids contain all of the silver along with other non-nutrient impurities. With a 90 percent reduction in bulk volume, the melting furnace will now be able to produce up to 10 times more silver with each melt, at no increase in cost. The other positive outcome is that the iron, zinc, and sulfur content in the produced liquids is high enough to work well for GOLD n GRO

fertilizer manufacturing. This will help stabilize some of our fertilizer raw material costs once it is implemented.

We are now working on the leach plant design, preparing a capital budget, and a construction schedule. We project the leach plant can be built within six months after obtaining capital funding, which is estimated at \$380,000.

We have identified several other potential applications where the FeLix and SuLix processes could reduce processing costs and reduce waste by profitably converting material presently being wasted into commercial products:

- Processing steel wool (ion exchange) cartridges which are widely used in the United States to perform on site silver removal from photographic liquids at user sites where hauling is not required. Both iron and silver would be recovered. This is a large source of iron and photo silver.
- Processing the cores of non-mercury bearing silver batteries to recover zinc and silver.
- Processing the cores of non-mercury bearing alkaline batteries to recover zinc and manganese.
- Processing flue dusts produced by steel mills to recover zinc and iron. This is a potentially large future use.
- Processing of concentrates produced by certain silver-zinc mines. While this would require more application development work to match the processes to specific concentrates, its potential is huge.

8. Acquire established companies and/or their technologies.

To enhance our operations and market presence, we intend to acquire small established companies or their technologies. In 2005, we completed our acquisition of the GOLD n GRO Guardian technology. Further acquisitions will depend on the potential benefits and suitable financing.

Mining Technical Services Segment (Whitney & Whitney, Inc.)

Historically, this division provided consulting services to the mining industry. In August 2005, we launched an Information Portal on the Internet. This division has a two-part approach to growth:

- Continue to provide consulting services.
- "e-commerce" Internet Information Portal-"insidemetals.com".

Plans and status of implementing each of the growth categories is explained in more detail in the following sections.

a. Continue to provide consulting services

We intend to continue a low level effort to solicit and perform technical services for mining companies and other businesses or government agencies that have mineral interests or minerals related responsibilities. These efforts resulted in two consulting projects during the first half of 2008. One project has been completed and has a small potential for future services, and

37

the other project is expected to resume late in the third quarter and continue for two to three months.

b. "e-commerce" Internet Information Portal-"insidemetals.com".

In August 2005, we launched the website "insidemetals.com," an Information Portal targeting the companies and individuals interested in the mining and precious metals industry. The website is beginning to generate revenue by charging a subscription fee for monthly access to the site and by selling advertising to gold exploration companies. Currently, the site contains an array of information about gold and companies in the gold industry. We intend to add information on other mineral sectors gradually.

We anticipate that mining company professionals, all government agencies with minerals related responsibilities, financial industry investment professionals, and individual investors who have an interest in investing in mining companies but who have limited mineral industry knowledge will benefit from this Information Portal. The market scope for this service is global and is accessible with a "click of a mouse" in all countries of the world through the Internet. Whitney & Whitney, Inc. has contacts throughout the world and expects that the good will generated over a period of more than 25 years will provide market support for this service.

A program to solicit advertising customers was developed and is being offered to gold exploration companies.

In September 2007, our Board of Directors approved the formation of a subsidiary to acquire multi-mineral properties and strategic small specialty companies that are in early stage or commercial operation. These can be combined to form a larger operating company that will utilize our advanced environmentally compatible technologies to mine, extract, and sell mineral and metal products from multi-mineral properties. Our plan anticipates that shares in the subsidiary will be placed with private investors. The plan will include provisions for taking the subsidiary public to provide an exit strategy for the initial private investors.

Item 4T. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures. As of the end of the period covered by this report, we conducted an evaluation, under the supervision and with the participation of our principal executive and financial officer and principal accounting officer of our disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) of the Exchange Act). Based upon this evaluation, our principal executive and financial officer and principal accounting officer concluded that because of the material weakness in internal control over financial reporting described below, our disclosure controls and procedures were not effective as of June 30, 2008.

Disclosure controls and procedures refer to controls and other procedures designed to ensure that information required to be disclosed in the reports we file or submit under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms promulgated by the SEC and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance

of achieving the desired control objectives, and management is required to apply its judgment in evaluating and implementing possible controls and procedures.

Accounting and Reporting Oversight

Because of our small size, we have ineffective segregation of duties relative to key financial reporting functions. Additionally, only one person in our company, our Principle Accounting Officer/Controller has extensive US GAAP accounting and SEC reporting experience. However, we do not have anyone else on staff with sufficient knowledge to review his work for completeness and accuracy. We do not have anyone with financial expertise on our Board so we have been unable to form an audit committee to perform oversight of this function.

In order to correct the foregoing weaknesses, we will continue to search for independent directors; however, given our current financial condition, we expect we will not be successful until we can become profitable and/or adequately funded.

(b) Changes in internal controls. There was no change in our internal controls or in other factors that could affect these controls during our fiscal quarter ended June 30, 2008 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II- OTHER INFORMATION

Item 1. Legal Proceedings

As of June 30, 2008 we have accrued for liabilities, including interest, of \$557,078 which relate to various lawsuits and claims for the collection of the funds due. These include 8 leases totaling \$366,911 (reflected in Capital Lease Obligations) plus \$70,035 in additional interest (reflected in Accrued Interest) and one trade payable totaling \$85,801 (reflected in Accounts Payable) plus \$34,331 in additional interest (reflected in Accrued Interest). The leases are individually secured by specified equipment.

The accrued interest noted above was recorded based on our assessment of three cases that are seeking \$251,522, which we believe are probable. The creditors have received judgments in these cases, but have taken no further collection action. We will continue to accrue interest until these cases are settled or paid in full.

We have two cases, that originally sought \$171,853, that we deem to have a remote possibility of incurring an additional unrecorded loss. We have negotiated payment agreements on these cases and, as of June 30, 2008, the recorded liability for these cases was \$163,681. We are delinquent in our payments under the respective settlement agreements, but are in contact with counsel for the creditor, and no collection action has been taken.

Successful settlement of the above claims is dependent on future financing.

We may become involved in a lawsuit or legal proceeding at any time in the ordinary course of business. Litigation is subject to inherent uncertainties, and an unexpected result may arise that may adversely affect our business. Certain lawsuits have been filed against us for

collection of funds due that are delinquent, as described above. We are not aware of any additional legal proceeding or

claims that we believe will have, individually or in the aggregate, a material adverse affect on our business, financial condition or operating results.

-

Item 2. Unregistered sales of Equity Securities and Use of Proceeds

(a) Recent Sales of Unregistered Securities:

In June 2008, we issued an aggregate of 500,000 and 214,286 shares of common stock valued at \$1,500 for each issuance to John W. Whitney, our President, as compensation for services performed on our behalf in his capacity as a director of our Company for the fourth quarter of 2007 and the first quarter of 2008, respectively.

In June 2008, we issued an aggregate of 75,000 shares of common stock valued at \$6,000 to Duane H. Rasmussen, our Vice President, as compensation for services performed on our behalf in his capacity as Vice President of our Company for periods in 2003 and prior.

In June 2008, we issued an aggregate of 40,000 shares of common stock valued at \$160 to two employees as compensation for services performed on our behalf in their capacities as employees of our Company for the fourth quarter of 2007 and the first quarter of 2008.

In June 2008 we issued an aggregate of 908,172 shares of common stock valued at \$2,906 to Wayne Baker as compensation for consulting services performed on our behalf in 2008.

During the second quarter of 2008 we issued an aggregate of 236,780,000 common shares to four accredited investors upon the conversion of \$302,677 in callable secured convertible notes.

We issued options to purchase an aggregate of 9,000 shares of common stock to Michael C. Horsley, our Controller, on May 1, 2008. The options are exercisable at \$0.15 per share and expire three years after grant.

We issued options to purchase an aggregate of 37,000 shares of common stock to four of our employees in May 2008. The options are exercisable at \$0.15 to \$0.16 per share and expire in three to ten years from grant.

All of the above offerings and sales were deemed to be exempt under rule 506 of Regulation D and Section 4(2) of the Securities Act of 1933, as amended. No advertising or general solicitation was employed in offering the securities. The offerings and sales were made to a limited number of persons, all of whom were accredited investors, our business associates or our executive officers, and we restricted transfers in accordance with the requirements of the Securities Act of 1933, as amended. In addition to representations by the above-referenced persons, we have made independent determinations that all of the above-referenced persons were accredited or sophisticated investors, and that they were capable of analyzing the merits and risks of their investment, and that they understood the speculative nature of their investment. Furthermore, all of the above-referenced persons were provided with access to our Securities and Exchange Commission filings.

Except as expressly set forth above, the individuals and entities to whom we issued securities as indicated in this Item 2 are unaffiliated with us.

Item 3. Defaults Upon Senior Securities

In the first quarter of 2006 all of the Series 2000 Convertible Promissory Notes became due and are now in default. The total principal and interest due at June 30, 2008 is \$3,709,964. We are formulating a plan to seek extensions of these notes and have recorded these notes as current liabilities. No collection action has been taken to date.

When these notes came due in 2006, they were convertible into 22,229,551 common shares. If the Company is successful in negotiating extensions of these notes, the convertible options may be renewed and the eventual number of potential options could be significantly higher than the amount that expired.

The Company's mortgage loan on the manufacturing facility is in default due to delinquent property taxes totaling \$14,378. The lender is aware of the situation and has taken no collection action. As a result of the default, the entire principal balance, in the amount of \$406,130, is included in current liabilities.

As of June 30, 2008 the Company owed \$144,802 plus penalties and interest for federal payroll taxes. Subsequent to June 30, 2008 \$66,177 plus related penalties and interest of this amount was paid. The Company is in contact with the IRS and believes a payment arrangement can be made for the remaining balance due. The IRS may file federal tax liens and seize Company assets if satisfactory arrangements cannot be made.

In addition to the above leases that are subject to litigation, there are three leases, with a recorded liability of \$151,071, that are in default. As required by U.S. Generally Accepted Accounting Principles, the principal balance of the leases that are in default have been classified as current liabilities.
