ROYAL CARIBBEAN CRUISES LTD. REPORTS

RECORD FIRST QUARTER EARNINGS

MIAMI April 21, 2005 Royal Caribbean Cruises Ltd. (NYSE, OSE: RCL) reported today that net income for the first quarter of 2005 was \$135.3 million, or \$0.63 per share. This compares to \$95.8 million, or \$0.47 per share, for the first quarter of 2004. Revenues for the first quarter of 2005 increased 10.0% to \$1.2 billion from revenues of \$1.1 billion in the first quarter of 2004. The increase in revenues was attributable to an improvement in cruise ticket prices, a 3.3% increase in capacity and increases in occupancy and onboard revenues. Gross Yields and Net Yields for the first quarter of 2005 increased 6.5% and 8.2% from the first quarter of 2004, respectively. Occupancy reached a record level for the first quarter, at 105.7%, up from 104.2% in the first quarter of 2004.

The pace of bookings and consumer demand remains positive and on track with the company's previous expectations. First quarter Net Yield performance allows the company to narrow its full year Net Yield guidance to an increase in the range of 6% to 7%. The company currently expects Net Yields for the second quarter of 2005 will increase approximately 6%.

We are very pleased with our first quarter results, said Richard D. Fain, chairman and chief executive officer of Royal Caribbean Cruises Ltd. All key elements of the business performed very well, but the high cost of fuel is a major focus.

During the quarter, the company passed an important milestone. Net debt to capital dropped to below 50%, demonstrating solid progress in the company's program to strengthen its balance sheet.

For the first quarter of 2005, Gross Cruise Costs and Net Cruise Costs per APCD increased 4.6% and 6.0%, respectively, compared to the same quarter in 2004. Inflationary pressures, especially related to fuel costs, are the primary driver of these cost increases. During the first quarter of 2005, at-the-pump prices of fuel were approximately 30% higher than those experienced in the first quarter of 2004 and represented approximately 6.1% of total revenues.

Also during the quarter, the company announced that one of its ships experienced a breakdown in its propulsion unit which is estimated to reduce 2005 earnings per share by approximately \$0.03-\$0.04, divided roughly evenly between the first two quarters.

Because of excellent bookings during the beginning of the year, the company decided to defer certain expenses, including its marketing spend, to later in the year. Partially offsetting these changes, the company incurred higher than expected payroll and benefit expenses. Despite these expenses and costs incurred in connection with the cancellation of a 10-night Hawaiian cruise, the increase in Net Cruise Costs per APCD was in-line with the company's previous guidance.

Fuel costs continue to be the most important variable impacting Net Cruise Costs and make forecasting very difficult. In the company's last update, it estimated that at-the-pump fuel prices for the first quarter would increase about 11% over the average level for 2004. The company also estimated that if that 11% figure continued for the full year it would cost an additional \$23 million (net of hedges). Fuel prices for the first quarter were 11% higher than the 2004 yearly average. However, since then, at-the-pump fuel prices have continued to rise despite the fact that crude oil prices have actually fallen slightly. Currently, at-the-pump fuel prices are 20% higher than the 2004 yearly average. If prices for the remainder of 2005 remain at today's level, that price increase would cost the company \$26 million in addition to the \$23 million previously disclosed. Based on this assumption, Net Cruise Costs per APCD for 2005 would increase approximately 5% to 6% compared to 2004. The price increase in fuel accounts for approximately 3 percentage points of this increase.

Based upon the above, management expects full year 2005 earnings per share to be in the range of \$2.65 to \$2.85. On the same basis, second quarter 2005 earnings per share are expected to be in the range of \$0.55 to \$0.60.

In early April, the company announced its order with Finnish shipbuilder Aker Finnyards for a third ship in its Freedom class. Destined for the Royal Caribbean International fleet, the three 158,000-GRT ships will each carry approximately 3,600 passengers double occupancy when completed. This is approximately 15 percent larger than its Voyager class predecessors. The third Freedom class ship is expected to enter service in early 2008.

The company has scheduled a conference call at 10 a.m. Eastern Daylight Time today to discuss its earnings. This call can be listened to, either live or on a delayed basis, on the company's investor relations web site at www.rclinvestor.com. A slide presentation will accompany the conference call, and is also available for viewing at www.rclinvestor.com.

Terminology

Available Passenger Cruise Days (APCD)

Available Passenger Cruise Days are the company's measurement of capacity and represent double occupancy per cabin multiplied by the number of cruise days for the period.

Gross Yields

Gross Yields represent total revenues per APCD.

Net Yields

Net Yields represent Gross Yields less commissions, transportation and other expenses and onboard and other expenses per APCD. The company utilizes Net Yields to manage its business on a day-to-day basis and believes that it is the most relevant measure of its pricing performance. The company has not provided a quantitative reconciliation of projected Gross Yields to projected Net Yields due to the significant uncertainty in projecting the costs deducted to arrive

at this measure. Accordingly, the company does not believe that reconciling information for such projected figures would be meaningful.

Gross Cruise Costs

Gross Cruise Costs represent the sum of total cruise operating expenses plus marketing, selling and administrative expenses.

Net Cruise Costs

Net Cruise Costs represent Gross Cruise Costs excluding commissions, transportation and other expenses and onboard and other expenses. In measuring the company's ability to control costs in a manner that positively impacts net income, the company believes changes in Net Cruise Costs to be the most relevant indicator of its performance. The company has not provided a quantitative reconciliation of projected Gross Cruise Costs to projected Net Cruise Costs due to the significant uncertainty in projecting the costs deducted to arrive at this measure. Accordingly, the company does not believe that reconciling information for such projected figures would be meaningful.

Passenger Cruise Days

Passenger Cruise Days represent the number of passengers carried for the period multiplied by the number of days of their respective cruises.

Occupancy

Occupancy, in accordance with cruise vacation industry practice, is calculated by dividing Passenger Cruise Days by APCD. A percentage in excess of 100% indicates that three or more passengers occupied some cabins.

Royal Caribbean Cruises Ltd. is a global cruise vacation company that operates Royal Caribbean International and Celebrity Cruises, with a combined total of 29 ships in service and three under construction. The company also offers unique land-tour vacations in Alaska, Canada and Europe through its cruise-tour division. Additional information can be found on www.royalcaribbean.com, www.celebrity.com or www.rclinvestor.com.

Certain statements in this news release constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995. Words such as expect, anticipate, goal, project, plan, believe, seek and similar expressions are intended to identify these forward-looking statements. Forward-looking statements do not guarantee future performance and may involve risks, uncertainties and other factors which could cause our actual results, performance or achievements to differ materially from the future results, performance or achievements expressed or implied in those forward-looking statements. Examples of these risks, uncertainties and other factors include, but are not limited to: general economic and business conditions, vacation industry competition (including cruise industry competition), changes in vacation industry capacity (including over capacity in the cruise vacation industry), the impact of tax laws and regulations affecting our business or our principal shareholders, the impact of changes in other laws and regulations affecting our business, the impact of pending or threatened litigation, the delivery of scheduled new ships, emergency ship repairs, negative incidents involving cruise ships (including those involving the health and safety of passengers), reduced consumer demand for cruises as a result of any number of reasons (including geo-political and economic uncertainties, the unavailability of air service, armed conflict, terrorist attacks and the resulting concerns over safety and security aspects of traveling), our ability to obtain financing on terms that are favorable or consistent with our expectations, changes in our stock price or principal stockholders, the impact of changes in operating and financing costs (including changes in foreign currency and interest rates and fuel, food, payroll, insurance and security costs), weather and other factors described in further detail in Royal Caribbean Cruises Ltd.'s filings with the Securities and Exchange Commission. The above examples are not exhaustive and new risks emerge from time to time. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. In addition, certain financial measures in this news release constitute non-GAAP financial measures as defined by Regulation G. A reconciliation of these items can be found on our investor relations website at www.rclinvestor.com.
