SR Telecom's stride2400 Selected for Voice and Internet Project in U.S. Southwest Texas Telephone project will connect previously underserved areas

MONTREAL, December 11, 2003 SR TelecoffTM Inc. (TSX: SRX; Nasdaq: SRXA) today announced that its strideTM2400 fixed wireless access solution has been selected by Southwest Texas Telephone Company to deliver voice and broadband data services to previously difficult to serve areas in the state. Deliveries are expected to begin late in the fourth quarter of 2003.

Southwest Texas Telephone will deploy the first of its **stride2400** networks in the area surrounding its Vinegarroon exchange. The system will offer voice with CLASS features including call-waiting, call-forwarding and caller ID, as well as V.90 dial-up and ADSL Internet services to the company's subscriber base. Southwest Texas Telephone also expects to use the **stride2400** system to serve other regions in its vast service area.

We selected SR Telecom because they truly understand the difficulties we face in delivering state-of-the-art services to our subscribers in remote areas," said Gary Gilmer, Southwest Texas Telephone's President. The **stride2400** system provides us with the full range of features our customers require and offers us the flexibility and reliability we need to deliver those services at a reasonable cost.

We are delighted to assist Southwest Texas Telephone Company in the expansion of their network," said Peter Carson, SR Telecom's Vice President, Sales for the Americas. This new customer relationship enables us to expand our footprint in the United States and gives us another proof point in which to demonstrate the strengths of the **stride2400** system. The Southwest Texas Telephone network, with its subscriber base sparsely spread across a large area, is a perfect example of the potential market we see for this product.

About stride2400

stride2400 is last-mile access solution that enables operators like Southwest Texas Telephone Company to generate new revenue streams by offering a full range of voice services, including CLASS features, dial-up Internet and ADSL services to underserved areas of the rural United States. It provides excellent performance over long spans (11 miles) and operates in the

Edgar Filing: SR TELECOM INC - Form 6-K

2.4 GHz unlicensed frequency band, resulting in reduced infrastructure deployment costs. **stride2400** was developed after extensive discussions with many of the more than 1,200 potential independent operating company customers.

About Southwest Texas Telephone Company

Southwest Texas Telephone Company was founded in 1898 and now serves a large part of the rural Texas Hill Country. The company serves 4,636 access lines in 3,675 square miles and provides a state-of-the-art telephone network featuring digital switching, ADSL, fiberoptic transmission facilities, equal access to long distance providers, and the latest in enhanced calling features. For more information on Southwest Texas Telephone Company, please visit their web site (www.swtexas.com).

About SR Telecom

SR TELECOM (TSX: SRX, Nasdaq: SRXA) is a world leader and innovator in Fixed Wireless Access technology, which links end-users to networks using wireless transmissions. SR Telecom's solutions include equipment, network planning, project management, installation and maintenance services. The Company offers one of the industry's broadest portfolios of fixed wireless products, designed to enable carriers and service providers to rapidly deploy high-quality voice, high-speed data and broadband applications. These products, which are used in over 120 countries, are among the most advanced and reliable available today.
