MuniHoldings Fund, Inc. and MuniHoldings Insured Fund, Inc. seek to provide shareholders with current income exempt from federal income taxes by investing primarily in portfolios of long-term, investment grade municipal obligations the interest on which, in the opinion of bond counsel to the issuer, is exempt from federal income taxes. Under normal circumstances, MuniHoldings Insured Fund, Inc. invests at least $80 \%$ of its total assets in municipal bonds that are covered by insurance.

These reports, including the financial information herein, are transmitted to shareholders of MuniHoldings Fund, Inc. and MuniHoldings Insured Fund, Inc. for their information. This is not a prospectus. Past performance results

# Edgar Filing: MUNIHOLDINGS INSURED FUND INC/NJ - Form N-CSRS 

shown in these reports should not be considered a representation of future performance. The Funds have leveraged their Common Stock and intend to remain leveraged by issuing Preferred Stock to provide the Common Stock shareholders with potentially higher rates of return. Leverage creates risks for Common Stock shareholders, including the likelihood of greater volatility of net asset value and market price of shares of the Common Stock, and the risk that fluctuations in the short-term dividend rates of the Preferred Stock may affect the yield to Common Stock shareholders. Statements and other information herein are as dated and are subject to change.

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (1) without charge, upon request, by calling toll-free 1-800-MER-FUND (1-800-637-3863); (2) on www.mutualfunds.ml.com; and (3) on the Securities and Exchange Commission's Web site at http://www.sec.gov.

The Benefits and Risks of Leveraging

The Funds utilize leveraging to seek to enhance the yield and net asset value of their Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, each Fund issues Preferred Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of each Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Stock capitalization of $\$ 100$ million and the issue of Preferred Stock for an additional $\$ 50$ million, creating a total value of $\$ 150$ million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3\% and long-term interest rates are approximately 6\%, the yield curve has a strongly positive slope. The fund pays dividends on the $\$ 50$ million of Preferred Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of $\$ 150$ million earns the income based on long-term interest rates.

In this case, the dividends paid to Preferred Stock shareholders are

# Edgar Filing: MUNIHOLDINGS INSURED FUND INC/NJ - Form N-CSRS 

#### Abstract

significantly lower than the income earned on the fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Stock will be reduced or eliminated completely. At the same time, the market value on the fund's Common Stock (that is, its price as listed on the New York Stock Exchange), may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Stock may also decline.

As a part of their investment strategy, the Funds may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Funds to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed-rate, tax-exempt securities. To the extent the Funds invest in inverse floaters, the market value of each Fund's portfolio and the net asset value of each Fund's shares may also be more volatile than if the Funds did not invest in these securities. As of October 31, 2005, the percentages of MuniHoldings Fund, Inc.'s and MuniHoldings Insured Fund, Inc.'s total net assets invested in inverse floaters were $2.87 \%$ and $5.57 \%$, respectively, before the deduction of Preferred Stock.

Swap Agreements

The Funds may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom each Fund has entered into a swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligations to pay the other party to the agreement.

A Letter From the President

## Dear Shareholder

As the financial markets continued to muddle their way through 2005, the Federal Reserve Board (the Fed) advanced its monetary tightening campaign full steam ahead. The 12th consecutive interest rate hike since June 2004 came on November 1, bringing the target federal funds rate to 4\%. The central bank is clearly more focused on inflationary figures than on economic growth, which has shown some signs of moderating. Despite rising short-term interest rates
and record-high energy prices, the major market indexes managed to post positive results for the current reporting period:

| Total Returns as of October 31, 2005 | $6-m o n t h$ |
| :--- | :--- |
| U.S. equities (Standard \& Poor's 500 Index) | $+8.27 \%$ |
| Small-cap U.S. equities (Russell 2000 Index) | +12.25 |
| International equities (MSCI Europe Australasia Far East Index) | $+8.72 \%$ |
| Fixed income (Lehman Brothers Aggregate Bond Index) | +12.08 |
| Tax-exempt fixed income (Lehman Brothers Municipal Bond Index) | +18.09 |
| High yield bonds (Credit Suisse First Boston High Yield Index) | +0.59 |
| +13 |  |

The headlines in recent months focused on Hurricanes Katrina and Rita and, more recently, the nomination of Ben Bernanke to succeed Alan Greenspan as Chairman of the Fed. While the hurricanes prompted a spike in energy prices and short-term disruptions to production and spending, the longer-term economic impact is likely to be tempered. In fact, the fiscal stimulus associated with reconstruction efforts in the Gulf Coast region could add to gross domestic product growth in 2006. Notably, the uncontroversial nomination of Dr. Bernanke was well received by the markets.

The U.S. equity markets remained largely range bound in 2005. Up to this point, strong corporate earnings reports and relatively low long-term bond yields have worked in favor of equities. Looking ahead, high energy prices, continued interest rate hikes, a potential consumer slowdown and/or disappointing earnings pose the greatest risks to U.S. stocks. Internationally, many markets have benefited from strong economic statistics, trade surpluses and solid finances.

The bond market continued to be characterized by a flattening yield curve, although long-term yields finally began to inch higher toward period end. The 10 -year Treasury yield hit $4.57 \%$ on October 31, 2005, its highest level in more than six months. Still, the difference between the two-year and 10-year Treasury yield was just 17 basis points (.17\%) at period end, compared to 149 basis points a year earlier.

Financial markets are likely to face continued crosscurrents in the months ahead. Nevertheless, opportunities do exist and we encourage you to work with your financial advisor to diversify your portfolio among a variety of asset types. This can help to diffuse risk while also tapping into the potential benefits of a broader range of investment alternatives. As always, we thank you for trusting Merrill Lynch Investment Managers with your investment assets.

Sincerely,
(Robert C. Doll, Jr.)
Robert C. Doll, Jr.
President and Director

A Discussion With Your Funds' Portfolio Manager

Relative to the broader municipal market, we ended the period with a neutral level of interest rate risk but positioned for the continued flattening of the municipal yield curve.

Describe the recent market environment relative to municipal bonds.

Over the past six months, long-term bond yields generally rose as their prices, which move in the opposite direction, fell. In the second half of the period, investors worried about the higher energy costs generated by the Gulf Coast hurricanes, which threatened to pressure inflation upward. Stronger-thanexpected third quarter gross domestic product growth further added to inflationary concerns. The combination of faster economic growth and potential price increases pushed bond yields higher.

The Federal Reserve Board (the Fed) continued to raise short-term interest rates at each of its meetings during the period, lifting the federal funds target rate to $3.75 \%$ by period-end (and to $4 \%$ just one day later on November 1). As short-term interest rates increased more dramatically than longer rates, the yield curve continued to flatten. During the past six months, 10-year Treasury note yields rose 36 basis points (.36\%) to $4.57 \%$ and 30 -year Treasury bond yields rose 25 basis points to $4.76 \%$.

Tax-exempt bond yields exhibited a similar pattern during the period. According to Municipal Market Data, the yield on AAA-rated issues maturing in 30 years increased 22 basis points to $4.59 \%$, while the yield on AAA-rated issues maturing in 10 years rose 35 basis points to $3.92 \%$.

Historically low nominal tax-exempt bond yields continued to encourage municipalities to issue new debt and refund outstanding, higher-couponed issues. During the past six months, almost $\$ 208$ billion in new long-term taxexempt bonds was issued, a year-over-year increase of $9.1 \%$. More recently, the pace of new bond issuance moderated, with approximately $\$ 91$ billion in taxexempt bond issuance during the past three months, an increase of $5.8 \%$ on a year-over-year basis. During the first nine months of 2005 , the volume of refunding issues rose to $\$ 106$ billion, an increase of more than 55\% compared to that underwritten during the same period in 2004 . Refunding issues were heavily weighted in the $10-y e a r$ - 20 -year maturity range, putting pressure on intermediate tax-exempt bond yields while supporting longer-term bond prices.

Investor demand for municipal product remained positive for most of the period. The most current statistics from the Investment Company Institute indicate that, year-to-date through September 2005, net new cash flows into long-term municipal bond funds exceeded $\$ 6.7$ billion - a significant improvement from the $\$ 12.9$ billion net outflow seen during the same period in 2004. Notably, throughout much of the past year, high-yield tax-exempt bond funds have been the principal target for these new cash inflows. During recent months, these lower-rated and non-rated bond funds received an average of $\$ 115$ million per week. The need to invest these cash flows led to very strong demand for lower-rated issues and a consequent narrowing of credit spreads.

Solid investor demand for tax-exempt issues generally helped municipal bond performance approach that of taxable bonds in recent months and reverse some of their prior underperformance. In addition, the ratio of tax-exempt bond yields to taxable bond yields remains attractive and should continue to draw both traditional and non-traditional investors to the municipal marketplace, especially if municipal bond issuance remains manageable.

# Edgar Filing: MUNIHOLDINGS INSURED FUND INC/NJ - Form N-CSRS 

The communities shattered by Hurricanes Katrina and Rita will require extensive reconstruction. It is too early to estimate the amount of tax-exempt debt that may be required to finance these efforts or to assess the overall impact on the municipal market. However, much of the rebuilding is likely to be funded through federal loans and grants, and the reconstruction will likely be spread over a number of years. Consequently, any new municipal bond issuance prompted by the hurricanes is not likely to disrupt the tax-exempt market in the near future.

MuniHoldings Fund, Inc.

How did the Fund perform during the period?

For the six-month period ended October 31, 2005, the Common Stock of MuniHoldings Fund, Inc. had net annualized yields of $6.93 \%$ and $6.95 \%$ based on a period-end per share net asset value of $\$ 16.06$ and a per share market price of $\$ 16.01$, respectively, and $\$ .561$ per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was $+1.92 \%$, based on a change in per share net asset value from $\$ 16.31$ to $\$ 16.06$, and assuming reinvestment of all distributions.

SEMI-ANNUAL REPORTS
OCTOBER 31, 2005

The Fund's total return, based on net asset value, exceeded the $+1.16 \%$ average return of the Lipper General Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues rated in the top four credit-rating categories. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.)

The Fund's outperformance can be attributed to a modestly overweighted exposure to spread product - lower-quality, higher-yielding municipal bonds, which benefited as credit spreads narrowed during the period. The high yield municipal market continued to perform well on the back of strong demand, as investors, looking for better yields in a low interest rate environment, poured cash into high yield mutual funds. The Fund benefited particularly from issues in the special tax (land secured), senior living and toll road sectors, all of which saw gains in an otherwise down market. The Fund also benefited from price appreciation of its holdings issued by Mississippi Systems Energy, a subsidiary of Entergy Corp., which was downgraded after Hurricane Katrina struck the Gulf Coast region. Ironically, the credit downgrade caused our bonds to appreciate because it made it less probable that the securities' call feature would be exercised. Of final note, the Fund's underweight stance in airline bonds was a positive. We had no exposure to either Delta Air Lines or Northwest Airlines, both of which declared bankruptcy during the period, in part because of the impact of higher fuel costs.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?
New purchases concentrated on bonds we believed offered our shareholders attractive relative value. In anticipation of continued flattening of the yield curve, we reduced our exposure to bonds with maturities of 10 years - 18 years while adding to our holdings in bonds longer than 25 years. We also maintained our strategy of purchasing bonds of issuers we believed were more likely to defease their existing debt to help close their budget gaps. When bonds are defeased, it typically means that the securities are retired at their first call date, enabling the bonds to appreciate significantly. The states of California, Massachusetts and New Jersey were three such issuers who have been aggressive in implementing this strategy.

Also, when appropriate, we purchased higher-coupon bonds with shorter call dates, which we believed offered attractive relative yields and the potential for future outperformance. For example, we purchased bonds issued for Xavier University in New Orleans. These bonds, which carry MBIA insurance, offered 20 basis points of yield more than they would have prior to Hurricanes Katrina and Rita. We continue to look for opportunities in the areas affected by the two storms.

For the six-month period ended October 31, 2005, the Fund's Auction Market Preferred Stock (AMPS) had an average yield of 2.50\% for Series A and 2.42\% for Series B. For the period October 19, 2005 to October 31, 2005, Series C had an average yield of $2.50 \%$. The Fed's interest rate hikes are clearly having a material impact on the Fund's borrowing costs. The Fed raised the short-term interest rate target 100 basis points during the six-month period (and 25 basis points more on November 1). Still, the tax-exempt yield curve remained relatively steep and continued to generate an income benefit to the holders of Common Stock from the leveraging of Preferred Stock. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 36.01\% of total net assets, before the deduction of Preferred Stock. (For a more complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?
Relative to the broader municipal market, we maintained a neutral level of interest rate risk but are positioned for the continued flattening of the yield curve. Having reduced some of our more volatile corporate-backed bonds, the Fund has a more neutral exposure to high yield spread product. With higher interest rates and our outlook for slower economic activity, however, we will be on the lookout for opportunities to slightly increase the Fund's duration.

For the six-month period ended October 31, 2005, the Common Stock of MuniHoldings Insured Fund, Inc. had net annualized yields of $6.28 \%$ and $6.46 \%$, based on a period-end per share net asset value of $\$ 13.94$ and a per share market price of $\$ 13.55$, respectively, and $\$ .441$ per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was $-.37 \%$, based on a change in per share net asset value from $\$ 14.44$ to $\$ 13.94$, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, slightly trailed the +.29\% average return of the Lipper Insured Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues insured as to timely payment. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.) On the positive side, Fund performance was primarily influenced by our yield curve strategy. For most of the period, we were overweighted in bonds with maturities greater than 20 years. This benefited performance as the yield curve flattened and longer-term bonds outperformed shorter-term issues. However, we avoided bonds with maturities of 30 years and longer because of their heightened interest rate risk. This detracted somewhat from relative results as bonds maturing beyond 30 years were the municipal market's best performers.

In an effort to preserve the Fund's competitive yield, we maintained our holdings in five-year - 10-year prerefunded bonds, which offered higher accrual rates than currently available in the low-yield environment. This benefited the Fund's yield, but hampered its total return somewhat as rates on bonds with maturities of 15 years and shorter rose.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock may vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?
We continued to focus on securities that we felt represented the best relative value in the insured municipal marketplace. With the yield curve flattening, we continued to shift our emphasis further out on the curve, favoring bonds with maturity dates of 20 years and longer while reducing our exposure to 15 -year - 20-year bonds. New purchases were concentrated on issuers that we believed were more likely to defease their existing debt to help close budget gaps. When bonds are defeased, it typically means that the securities are retired at their first call date, enabling the bonds to appreciate significantly. Massachusetts, California and New Jersey are three state issuers that have been aggressive in this strategy.

For the six months ended October 31, 2005, the Fund's Auction Market Preferred Stock (AMPS) had average yields of 2.42 \% for Series A and $2.41 \%$ for Series B. The Fed's interest rate hikes are clearly having a material impact on the Fund's borrowing costs. The Fed raised the short-term interest rate target 100 basis points during the six-month period (and 25 basis points more on November 1). Still, the tax-exempt yield curve remained relatively steep and continued to generate an income benefit to the holders of Common Stock from the leveraging of Preferred Stock. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of

# Edgar Filing: MUNIHOLDINGS INSURED FUND INC/NJ - Form N-CSRS 

the period, the Fund's leverage amount, due to AMPS, was $42.23 \%$ of total net assets, before the deduction of Preferred Stock. (For a more complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

At period-end, the portfolio was fully invested and neutrally positioned with regard to interest rate risk. We continue to emphasize a competitive yield and preservation of the portfolio's net asset value. Although we have begun to restructure the portfolio by purchasing bonds with slightly longer maturity dates, the securities added in recent months have tended to be premium-coupon bonds with defensive characteristics, allowing us to extend our average duration while still maintaining a fairly conservative approach.

Robert A. DiMella, CFA
Vice President and Portfolio Manager

Dividend Policy

The Funds' dividend policy is to distribute all or a portion of their net investment income to their shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the Funds may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any particular month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Funds for any particular month may be more or less than the amount of net investment income earned by the Funds during such month. The Funds' current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Net Assets, which comprises part of the financial information included in these reports.

Availability of Quarterly Schedule of Investments

The Funds file their complete schedules of portfolio holdings with the Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year on Form $N-Q$. The Funds' Forms $N-Q$ are available on the SEC's Web site at http://www.sec.gov. The Funds' Forms N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

Electronic Delivery

The Funds offer electronic delivery of communications to their shareholders. In order to receive this service, you must register your account and provide us with e-mail information. To sign up for this service, simply access this Web site at http://www.icsdelivery.com/live and follow the instructions. When you visit this site, you will obtain a personal identification number (PIN). You will need this PIN should you wish to update your e-mail address, choose to discontinue this service and/or make any other changes to the service. This service is not available for certain retirement accounts at this time.

# Edgar Filing: MUNIHOLDINGS INSURED FUND INC/NJ - Form N-CSRS 

Notes to Financial Statements

1. Significant Accounting Policies:

MuniHoldings Fund, Inc. and MuniHoldings Insured Fund, Inc. (the "Funds" or individually as the "Fund") are registered under the Investment Company Act of 1940, as amended, as non-diversified, closed-end management investment companies. The Funds' financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The Funds determine and make available for publication the net asset value of their Common Stock on a daily basis. The Funds' Common Stock shares are listed on the New York Stock Exchange under the symbols MHD and MUS, respectively. The following is a summary of significant accounting policies followed by the Funds.
(a) Valuation of investments--Municipal bonds are traded primarily in the over-the-counter markets ("OTC") and are valued at the last available bid price in the OTC or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of the Funds under the general direction of the Board of Directors. Such valuations and procedures are reviewed periodically by the Board of Directors of the Funds. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the OTC, valuation is the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Fund's pricing service. Short-term investments with a remaining maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a straight line basis to maturity. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Funds.
(b) Derivative financial instruments--Each Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

[^2]* Options--Each Fund may write covered call options and purchase call and put

# Edgar Filing: MUNIHOLDINGS INSURED FUND INC/NJ - Form N-CSRS 

options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

* Forward interest rate swaps--Each Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed, the Fund records a realized gain or loss in an amount equal to the value of the agreement.

SEMI-ANNUAL REPORTS
OCTOBER 31, 2005

Notes to Financial Statements (continued)
(c) Income taxes--It is each Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.
(d) Security transactions and investment income--Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. The Funds amortize all premiums and discounts on debt securities.
(e) Dividends and distributions--Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.
(f) Offering costs for MuniHoldings Fund, Inc.--Direct expenses relating to the public offering of the Fund's Preferred Stock were charged to capital at the time of issuance of the shares.
2. Investment Advisory Agreement and Transactions with Affiliates: Each Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch \& Co., Inc. ("ML \& Co."), which is the limited partner.

FAM is responsible for the management of each Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, each Fund pays a monthly fee at an annual rate of . 55\% of the Fund's average weekly net assets, including proceeds from the issuance of Preferred Stock. The Investment

## Edgar Filing: MUNIHOLDINGS INSURED FUND INC/NJ - Form N-CSRS

Adviser has agreed to reimburse its management fee by the amount of management fees each Fund pays to FAM indirectly through their investment in the Merrill Lynch Institutional Tax-Exempt Fund. For the six months ended October 31, 2005, FAM reimbursed the Funds in the amount of $\$ 9$ and $\$ 1,259$ relating to MuniHoldings Fund, Inc. and MuniHoldings Insured Fund, Inc., respectively. In addition, FAM earned fees of $\$ 879,042$, of which $\$ 95,146$ was waived, relating to MuniHoldings Insured Fund, Inc.

For the six months ended October 31, 2005, Merrill Lynch, Pierce, Fenner \& Smith Incorporated ("MLPF\&S") an affiliate of FAM, received underwriting fees of $\$ 150,000$ in connection with the issuance of MuniHoldings Fund, Inc.'s Preferred Stock.

For the six months ended October 31, 2005, MuniHoldings Fund, Inc. and MuniHoldings Insured Fund, Inc. reimbursed FAM \$3,366 and \$3,437, respectively, for certain accounting services.

Certain officers and/or directors of the Funds are officers and/or directors of FAM, PSI, and/or ML \& Co.

## 3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended October 31, 2005 were as follows:

|  | MuniHoldings |  | MuniHoldings |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Insured |
|  | Fund, Inc. |  | Fund, Inc. |  |
| Total Purchases | \$ | 93,528,897 | \$ | 108,981,494 |
| Total Sales | \$ | 84,676,521 | \$ | 110,835,460 |
|  |  | $========$ |  | $=========$ |

4. Stock Transactions:

Each Fund is authorized to issue $200,000,000$ shares of stock, including Preferred Stock, par value $\$ .10$ per share, all of which were initially classified as Common Stock. The Board of Directors are authorized, however, to reclassify any unissued shares of stock without approval of holders of Common Stock.

Common Stock

MuniHoldings Fund, Inc.

Shares issued and outstanding during the six months ended October 31,2005 and during the year ended April 30, 2005 increased by 23,996 and 9, 843, respectively, as a result of dividend reinvestment.

MuniHoldings Insured Fund, Inc.

Shares issued and outstanding during the six months ended October 31, 2005 increased by 18,659 as a result of dividend reinvestment. Shares issued and outstanding during the year ended April 30, 2005 remained constant.

# Edgar Filing: MUNIHOLDINGS INSURED FUND INC/NJ - Form N-CSRS 

Notes to Financial Statements (concluded)

Preferred Stock

Auction Market Preferred Stock are shares of Preferred Stock of the Funds, with a par value of $\$ .10$ per share and a liquidation preference of $\$ 25,000$ per share, plus accrued and unpaid dividends, that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods. The yields in effect at October 31, 2005 were as follows:

|  |  | MuniHoldings |
| :--- | ---: | ---: |
|  | MuniHoldings | Insured |
|  | Fund, Inc. | Fund, Inc. |
| Series A | $2.40 \%$ | $2.65 \%$ |
| Series B | $2.40 \%$ | $2.41 \%$ |
| Series C | $2.50 \%$ | -- |

MuniHoldings Fund, Inc.

Shares issued and outstanding during the six months ended October 31,2005 increased by 600 from the issuance of an additional series of Preferred Stock. Shares issued and outstanding during the year ended April 30, 2005 remained constant.

MuniHoldings Insured Fund, Inc.

Shares issued and outstanding during the six months ended October 31, 2005 and the year ended April 30, 2005 remained constant.

Each Fund pays commissions to certain broker-dealers at the end of each auction at an annual rate ranging from. $25 \%$ to. $375 \%$, calculated on the proceeds of each auction. For the six months ended October 31, 2005, MLPF\&S earned commissions as follows:

| MuniHoldings Fund, Inc. | 82,368 |
| :--- | :--- | ---: |
| MuniHoldings Insured Fund, Inc. | $\$ \quad 105,357$ |

5. Distributions to Shareholders:

Each Fund paid a tax-exempt income dividend to holders of Common Stock in the amounts of $\$ .091000$ per share and $\$ .071000$ per share relating to MuniHoldings Fund, Inc. and MuniHoldings Insured Fund, Inc. respectively, on November 29, 2005 to shareholders of record on November 15, 2005.

```
6. Capital Loss Carryforward:
MuniHoldings Fund, Inc.
On April 30, 2005, the Fund had a net capital loss carryforward of $3,435,164,
all of which expires in 2009. This amount will be available to offset like

By: /s/ Donald C. Burke
Donald C. Burke,
Chief Financial Officer of
MuniHoldings Insured Fund, Inc.

Date: December 16, 2005

[^0]:    * Includes portfolio holdings in short-term investments and variable rate demand notes.

[^1]:    MuniHoldings Fund, Inc.

[^2]:    * Financial futures contracts--Each Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.
