PRESS RELEASE

FOR IMMEDIATE RELEASE

**Centers for Medicare & Medicaid Services awards
over \$100 million in new contracts to CGI-AMS**

Fairfax, Virginia November 4, 2004 CGI-AMS, part of CGI Group Inc. (TSX: GIB.A; NYSE: GIB), today announced the signing of several contracts with the Centers for Medicare & Medicaid Services (CMS) totaling over US\$100 million. CMS is the federal agency within the U.S. Department of Health and Human Services (HHS) responsible for the Medicare, Medicaid and the State Children's Health Insurance Program (SCHIP) programs. In addition, CMS is the primary agency responsible for the Health Insurance Portability and Accountability Act (HIPAA) implementation.

The recently awarded contracts include technical solutions and support for several CMS component areas. These contracts include support for the medicare.gov Web site the official U.S. government Web site for Medicare consumer information, the Health Plan Management System, the Fraud Investigation Database, and provider enrollment and identification systems. All projects contribute to the streamlining and modernization of information sources that enhance customer service for the Medicare beneficiaries as well as healthcare professionals.

CGI-AMS is excited to expand its partnership with CMS and to continue providing technology solutions to help improve the efficiency and integrity of Medicare programs to meet the needs of over 40 million senior and disabled beneficiaries each year. We look forward to our continuing work with CMS to develop program enhancements that will help the organization address the challenges and opportunities presented by both HIPAA and the Medicare Modernization Act, said Donna Morea, president of CGI-AMS.

CGI-AMS has been supporting the agencies' Web sites www.medicare.gov and www.cms.hhs.gov since 1999. Since that time, the content and scope of the sites has grown dramatically and the number of Web page views has multiplied to reach over 15 million visits per month for each Web site. The site now provides over a dozen interactive tools designed to provide visitors with important information to assist them in making informed health care decisions including the comparison of drug prices under MMA. CGI-AMS will now also provide support and enhancements to The Health Plan Management System a Web-enabled centralized information system used to analyze Plan level quality of care, benefit packages, financial management data, and compliance monitoring. CGI-AMS will work with CMS to maintain and support a specific subset of new HPMS software modules to support Medicare Modernization Act (MMA) provisions.

In addition to supporting enhancements to CMS' consumer information tools, CGI-AMS will continue providing support for several systems under CMS' Office of Financial Management. This work will include enhancements to The Fraud Investigation Database, a centralized system that allows CMS to monitor fraudulent activity and payment suspensions related to Medicare and Medicaid providers. In addition, CGI-AMS will continue to develop the Provider Enrollment Chain and Ownership System, which is the national enrollment system for all Medicare providers in the U.S that provides a single, centralized database to track individuals, organizations and their relationships across the entire Medicare program. CGI-AMS will also continue its support of The National Plan Provider Enumeration System,

which is an application and database that uniquely identifies healthcare providers and issues a unique identifier the National Provider Identifier (NPI) as required by HIPAA regulations.
