FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2001

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File No. 02-99110

LIQUITEK ENTERPRISES, INC.
(Exact name of Small Business Issuer in its Charter)

NEVADA 91-1499978

(State or Other Jurisdiction of (I.R.S. Employer I.D. No.)
incorporation or organization)

1350 East Draper Parkway
Draper, Utah 84020
(Address of Principal Executive Offices)

Issuer's Telephone Number: (801) 553-8785

Not applicable.
(Former name, changed since last report)

Check whether the Issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the Company was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

(1) Yes X No (2) Yes X No
--- ---

(APPLICABLE ONLY TO CORPORATE ISSUERS)

State the number of shares outstanding of each of the Issuer's classes of common equity, as of the latest practicable date:

As of April 15, 2001, the Company had 38,376,737 shares of Common Stock outstanding.

Another 15,340,104 restricted shares of Common Stock of the registrant have

Edgar Filing: LIQUITEK ENTERPRISES INC - Form 10-Q

the unaudited condensed consolidated financial statements together with related notes that are filed with this Form 10-Q Quarterly Report. In the opinion of management, these financial statements fairly present the consolidated financial condition of the Company, but should be read in conjunction with the consolidated financial statements for the year ended December 31, 2000 previously filed with the Securities and Exchange Commission.

As the Company has passed the threshold level for market value of the Common Stock held by non-affiliates for the past two years, with this report we are switching from the SB report format to the SX report format.

THE ACCOMPANYING NOTES ARE AN INTEGRAL PART OF THESE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Edgar Filing: LIQUITEK ENTERPRISES INC - Form 10-Q

LIQUITEK ENTERPRISES INC.

Notes to the Unaudited Condensed Consolidated Financial Statements
For the Three-month Periods Ended March 31, 2001 and 2000.

1. NATURE OF BUSINESS AND BASIS OF PRESENTATION

NATURE OF BUSINESS

On February 12, 2001, we completed the acquisition of Distech Limited ("Distech"), a New Zealand corporation engaged in designing and manufacturing equipment for treating water and other fluids. Distech has developed unique, fail-safe, state-of-the-art, sub-atmospheric water distillation equipment. The technology employs vacuum distillation for low temperature evaporation and vapor compression for efficient recycling of heat energy. The result is a cost-efficient system for producing high-purity water in commercial quantities. Several of Distech's technical innovations are protected by international patents. Management believes that features such as automatic clean-in-place (to protect against the adversities of scaling), remote system management over telecommunication links, minimal pre-treatment requirements, compact size, small footprint and competitive pricing suggest a strong commercial opportunity for this equipment.

In conjunction with that acquisition, we issued 15,340,104 shares of restricted common stock of the Company plus 790,896 warrants and 69,000 options for the purchase of additional shares of restricted common stock in exchange for 100% of the comparable equity securities of Distech. The former holders of the Distech equity securities have a right of rescission on the transaction until the Company achieves an equity infusion of \$5,000,000 or September 30, 2001, whichever occurs first. Because of this contingency, neither the Distech-related issuances, the Distech financial position at March 31, 2001 nor the Distech operating results for the three-months ended March 31, 2001 is reflected in the March 31, 2001 financial statements contained in this Form 10-Q report.

The Distech operations complement those of another wholly-owned subsidiary, Liquitek Corporation. Together these businesses give us a suite of technologies offering competitive solutions to problems in water bottling, recycling, industrial wastewater, remediation, desalination and ultra-pure water applications. These businesses are further complemented by the operations of Thermoflow Corporation ("Thermoflow"), Interfluid Environmental Services, Inc. ("Interfluid"), and VitriSeal, Inc. ("VitriSeal"), also wholly-owned subsidiaries of the Company. Liquitek Corporation, Thermoflow and Interfluid were all acquired through tax-free, stock-for-stock reorganizations in 2000.

Thermoflow owns and operates a proprietary antifreeze recycling facility in Las Vegas, Nevada. The Thermoflow technology allows recycling of antifreeze to produce fully reformulated antifreeze indistinguishable from antifreeze made from virgin materials. The Thermoflow technology and subsets thereof are capable of economically treating/recycling many other contaminated liquids, including wastewater. Liquitek Corporation shares the rights to use any or all of the Thermoflow technology in meeting the needs of its clientele.

7

Interfluid Environmental Services, Inc. operates a closed-loop waste antifreeze collection and recycled antifreeze distribution system in the San Diego, California area. The waste collected in San Diego is deposited at an unrelated transfer facility in the Los Angeles, California area. Such waste,

Edgar Filing: LIQUITEK ENTERPRISES INC - Form 10-Q

along with that brought to the transfer facility by other closed-loop operators and waste antifreeze collectors, is then transported in Interfluid's long-haul bulk transportation equipment to Las Vegas for processing in the Thermoflow plant. Interfluid also provides long-haul bulk transport services for others of Thermoflow's customers. Interfluid is an integral part of the Thermoflow operation, but is a separate legal entity to isolate higher risk operations.

Liquitek Corporation has licensed a proprietary oily wastewater treatment system to Hawaii's largest recycling company. This client has recently been awarded a reduced inspection schedule from environmental regulators because of the effectiveness of their water treatment system. The system, or derivatives thereof, may be readily replicated in other locations. Liquitek has also developed a proprietary system for recycling carwash, laundry and aqueous solvent wastewater. The Company has tested the system in Japan and is presently negotiating sales with a Japanese distributor. Liquitek plans to introduce a similar system in the United States. Finally, Liquitek is engaged in engineering customized solutions based on its proprietary technologies for potential customers with a variety of water treatment problems, e.g., a paper recycling operation in Mexico.

VitriSeal owns the rights for a series of patented processes and proprietary know-how called VitriSeal(TM). The process is based on inorganic silicate chemistry. It produces superior, hard, bright, clear, corrosion-protective coatings on metal surfaces at a fraction of the cost of other clear coatings. The VitriSeal(TM) waterborne coating has little to no organic vapor emissions and creates minimal waste during the normal process operation. Accordingly there are no abnormal regulatory impacts or special governmental approval requirements on the VitriSeal(TM) application process, either in our own facility or in potential licensees' facilities. The VitriSeal(TM) coating combines many of the attributes of other types of coatings, such as anodizing, chrome plating and painting. It has corrosion and weathering resistance comparable to organic paint coatings, and it does not delaminate, or "creep back," from damage locations as chrome plating and painting do. This unique combination of properties is expected to afford opportunities in a wide variety of markets: vehicle wheels, fabricated aluminum products, extruded aluminum products and sheet/coil aluminum products. Ongoing research indicates potential for applying the coating to non-aluminum substrates as well.

BASIS OF PRESENTATION

We prepared our condensed consolidated financial statements for the three-month periods ended March 31, 2001 and 2000 without audit by our independent auditors. In the opinion of management, all adjustments necessary to present fairly the Company's consolidated financial position as of March 31, 2001, and the results of operations and cash flows for the three-month periods ended March 31, 2001

8

and 2000 have been made. Such adjustments consist only of normal recurring adjustments.

Certain note disclosures normally included in our annual financial statements prepared in accordance with accounting principles generally accepted in the United States ("GAAP") have been condensed or omitted pursuant to instructions for Form 10-Q. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our Form 10-KSB annual report for 2000 previously filed with the Securities and Exchange Commission.

Edgar Filing: LIQUITEK ENTERPRISES INC - Form 10-Q

The results of operations for the three-month period ended March 31, 2001 are not necessarily indicative of the results to be expected for the full year.

2. SIGNIFICANT ACCOUNTING POLICIES AND OTHER MATTERS

GOVERNMENT REGULATION

Thermoflow Corporation's facility is subject to certain government regulations regarding hazardous waste management, primarily related to the recycling of ethylene glycol (spent antifreeze) and storage of other hazardous materials used in the recycling process. Compliance with these provisions has not had, nor does the Company expect such compliance to have, any material effect upon the capital expenditures, operations, financial condition or competitive position of the Company. Management believes that its current practices and procedures comply with applicable requirements.

Thermoflow is subject to annual inspections by the Nevada Department of Conservation and Natural Resources, a Division of Environmental Protection (the "Department"), which evaluates compliance with applicable hazardous waste management regulations. No violations were reported by the Department during the 1999 and 2000 inspections, and a 2001 inspection has not yet been performed. In addition, Thermoflow Corporation has an active Nevada hazardous material storage permit, though the replacement certificate for the one that expired on February 28, 2001 has not yet been received from the State. Finally, Thermoflow was recently awarded an additional permit which allows it to accept and process at its facility quantities of oily wastewater to render them harmless for disposal to the sewer system, thus opening a new revenue generation stream for this business.

Except as set forth below, the Company's significant accounting policies are as described in the notes to the Company's December 31, 2000 consolidated financial statements included in the related Form 10-KSB filed with the Securities and Exchange Commission.

PRINCIPLES OF CONSOLIDATION

The accompanying March 31, 2001 financial statements include the accounts of the Company and its wholly-owned subsidiaries, except for Distech Limited which has not been consolidated because of the contingencies that remained in place at March 31, 2001, as noted above. All significant inter-company transactions and balances have been eliminated in consolidation. Because the Thermoflow and Liquitek Corporation subsidiaries were acquired on May 26,

9

2000 and the Interfluid subsidiary was acquired on July 1, 2000, none of their operations are included in the accompanying unaudited condensed consolidated statement of operations for the three-month period ended March 31, 2000.

INTANGIBLE ASSETS OTHER THAN PATENTS

Goodwill and acquired completed technology are amortized on a straight-line basis over 20 years. Assembled workforce, acquired customer base and other intangible assets are amortized over 10, 5 and 2 to 3 years, respectively, on a straight-line basis.

INCOME TAXES

Using the liability method required by Statement of Financial Accounting

Edgar Filing: LIQUITEK ENTERPRISES INC - Form 10-Q

Standards ("SFAS") No. 109, "Accounting for Income Taxes," the estimated tax effects of temporary differences between financial and income tax reporting are recorded in the period in which the events occur. Such differences between the financial and tax bases of assets and liabilities result in future tax deductions or taxable income.

Based on management's best estimate of taxable income in the foreseeable future, it is more likely than not that some portion of deferred income tax assets, due mostly to net operating loss carryforwards, may not be realized. As such, management has provided 100% allowances against the deferred tax asset and deferred tax benefit as of and for the periods ended March 31, 2001 and 2000.

RECENT ACCOUNTING PRONOUNCEMENTS

For the three-month period ended March 31, 2001, the Company adopted Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133"), as amended. Since the Company does not presently engage in activities covered by SFAS 133, there was no significant effect on the Company's March 31, 2001 financial statements.

RECLASSIFICATIONS

Certain amounts in the March 31, 2000 financial statements have been reclassified to conform to their March 31, 2001 presentation.

3. RELATED PARTY TRANSACTIONS

In connection with the acquisition of Distech Limited (Note 1), the Company advanced approximately \$979,000 to Distech through March 31, 2001. These advances are due on demand and are non-interest bearing. It is expected that once the contingencies in the transaction are fulfilled and the acquisition is recorded in the books of the Company, the inter-company receivable and payable shown in the books of the Company and Distech will be eliminated in consolidation.

4. STOCK TRANSACTIONS

On February 15, 2001, the Company reached agreements with Daniel L. Corbin ("Corbin") and Dennis A. Repp ("Repp") whereby each mutually agreed with the Company to rescind their respective royalty agreements in exchange for 100,000 shares each of the Company's common stock. As a result of these rescission agreements, the Company, Corbin and Repp were released from all duties and obligations under the original royalty agreements. As the Company's common stock had a closing price of \$1.50 per share on that date, the Company recognized stock compensation expense in the amount of \$300,000 pertaining to these issuances.

10

On March 22, 2001, the Company completed the sale of 50,000 shares of its restricted common stock at \$3.00 per share under the terms of a private placement undertaken during the first quarter of 2000 pursuant to Rule 506 of Regulation D, based upon the offering being made only to "accredited investors" as defined by Federal securities law.

5. GOING CONCERN/LIQUIDITY CONSIDERATIONS

As discussed in Note 1, the Company is engaged in three businesses: development of a metal coating process known as "VitriSeal(TM)," recycling

Edgar Filing: LIQUITEK ENTERPRISES INC - Form 10-Q

antifreeze, and providing equipment for processing other contaminated fluids to recycle them or render them harmless to the environment. The Company has not generated significant revenues in the past. Management expects that the Company will require significant additional capital to advance the development of these operations to the point at which they may become commercially viable. The acquisition of Distech (see Note 1) has required expansion of our capital resources by a \$5,000,000 equity infusion by September 30, 2001. The Company is presently seeking equity investment through a private placement offering.

At April 1, 2001, the private placement of a \$5 million equity investment in Liquitek Enterprises, Inc. was fully subscribed by Accelerated Technologies Fund LLC ("ATF"), an entity organized by Culley W. Davis, the Chairman of the Board of the Company. ATF's charter is to provide funding for emerging companies. As of May 1, 2001, ATF had provided approximately \$1.8 million to the Company toward its \$5 million commitment.

6. LOSS PER COMMON SHARE

Loss per common and common equivalent share is based on the weighted average number of shares of common stock and potential common stock outstanding during the period in accordance with Statement of Financial Accounting Standards No. 128, "Earnings per Share."

The weighted average numbers of common shares outstanding for the three-month periods ended March 31, 2001 and 2000 were 38,229,515 and 22,195,435 respectively.

A total of 15,340,104 restricted shares of Common Stock of the Company have been issued, subject to rescission, in connection with the exchange of shares with common stockholders of Distech Limited in a tax-free, stock-for-stock reorganization. Such issuance has not been reflected in the Company's March 31, 2001 financial statements because of contingencies in the acquisition transaction.

7. SEGMENT INFORMATION

Prior to the acquisitions discussed in Note 1, the Company operated in only one segment, metal coating, which was then and remains in the development stage. As of approximately June 1, 2000, the Company had three reportable segments (see the table below). Except as set forth herein, the segments'

11

significant accounting policies are the same as those described in the notes to the Company's December 31, 2000 consolidated financial statements included in the related Form 10-KSB filed with the Securities and Exchange Commission. Interest expense is not allocated to individual operating segments when determining segment profit or loss. The Company evaluates performance based on profit or loss from operations before interest, income taxes and non-recurring gains and losses.

The Company's reportable segments are strategic business units that offer different products and services. Each segment is managed separately because they use different technologies and/or market to distinct classes of customers.

(Table in Thousands)

Edgar Filing: LIQUITEK ENTERPRISES INC - Form 10-Q

	Metal Coating Process -----	Waste Water Treatment -----	Antifreeze Recycling -----	Unallocated -----	Totals -----
Sales to external customers	\$ -	\$ 61	\$ 405	\$ -	\$ 466
Segment loss	336	268	162	764	1,530
Segment assets	619	12,738	11,585	26,502	51,444

Unallocated segment assets in the foregoing table consist primarily of investments in subsidiaries (\$18,730), subsidiary payables to the Company (\$6,456) and other assets (\$1,316). The former two amounts were eliminated in consolidation, along with \$73 of inter-company receivables and inventory holdings within a subsidiary. The net of the unallocated segment assets (\$26,502 as shown in the table) and the eliminations (\$18,730, \$6,456 and \$73 as described in this paragraph) is \$1,243. When this amount is added to the segment assets in the other segments in the table (\$619, \$12,738 and \$11,585), the total of \$26,185 corresponds to the consolidated total assets as presented in the balance sheet for March 31, 2001. (All amounts in this paragraph are in thousands to correspond to the preceding table.)

8. MAJOR CUSTOMERS

For the three-month period ended March 31, 2001, one customer of the antifreeze recycling segment individually accounted for at least 10% of consolidated revenues. Further, one customer accounted for all of the revenues of the waste water treatment segment.

9. SUBSEQUENT EVENTS

In accordance with the month-to-month nature of the consulting contract with Hamlin Jennings, an independent contractor who provided technical consulting services to VitriSeal over past four years, his services were terminated as of April 30, 2001. The termination process and post-termination provisions of his agreements with the Company are being followed. The Company has replaced his consulting services with those of a scientist who will carry on the Company's research and development program as an employee.

12

In conjunction with the termination of the Jennings contract, we have relocated our laboratory operations to the Detroit area in a facility adjacent to the pilot production plant established in 2000. The physical consolidation of research and development and production operations is expected to benefit the Company. The laboratory space in Evanston, Illinois that we vacated in this relocation has been placed on the market. With such space in that area being limited, we anticipate that we will be able to eliminate most, if not all, of the cost of that facility prior to the termination of our contract on the space.

13

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Edgar Filing: LIQUITEK ENTERPRISES INC - Form 10-Q

RESULTS OF OPERATIONS

Consolidated net revenues for the three-month period ended March 31, 2001, were \$465,835 compared to zero revenues for the comparable period in 2000. Consolidated cost of sales was \$319,195 for the three-month period ended March 31, 2001 compared to zero for the comparable period in 2000. These data yield a gross margin of 31.5% for the three-month period ended March 31, 2001 while this measure for the three month period ended March 31, 2000 is undefined. The 2001 period includes operations from Thermoflow, Liquitek and Interfluid while the 2000 period contains exclusively VitriSeal operations.

Consolidated operating expenses were \$1,661,689 for the three months ended March 31, 2001 versus \$1,403,996 for the comparable period in 2000. The increase is attributable to an amalgam of increases and decreases, the major elements of which are (1) more aggressive development of the VitriSeal product, (2) the consolidation of Thermoflow, Liquitek and Interfluid operating expenses, (3) the write-off and amortization of intangibles recorded in connection with the acquisitions of Thermoflow, Liquitek and Interfluid, (4) the stock compensation associated with the royalty rescission agreements negotiated with Daniel L. Corbin and Dennis A. Repp and (5) a reduction in financial consulting service fees associated with the 2000 equity fund raising.

The Company experienced a consolidated net loss and corresponding loss per share of \$1,530,123 and \$0.04, respectively, for the three months ended March 31, 2001, compared to a consolidated net loss and loss per share of \$1,377,384 and \$0.06, respectively, for the comparable 2000 period.

CAPITAL RESOURCES AND LIQUIDITY

With the Distech acquisition described herein, and with the changes in management personnel which occurred in late 2000, the primary thrust of our operating plans for 2001 is to accomplish the transition from development stage businesses to commercial operations with production, sales and revenue. Each operating company has recently completed the development of long range strategic plans and operating plans. Control mechanisms are being put in place to monitor adherence to these plans. Additional acquisitions may occur, but only under compelling circumstances that would enhance the performance of the businesses already owned.

The 2001 Operating Plan for VitriSeal, Inc. contemplates revenue from contract coating in our Detroit plant for a variety of forged, fabricated, extruded and sheet aluminum products. Over the ensuing three years, we expect to enlarge the volumes of these contract-coating services and license the use of our technology in the plants of customers. The ongoing research and development program will address definition of the characteristics of the coating, applying the coating to different forms of aluminum and experimenting with coatings for other metals.

The 2001 Operating Plan for Thermoflow Corporation calls for significant growth in the utilization of the capacity of the Las Vegas plant. We also

plan to combine waste water treatment with waste antifreeze treatment in the Las Vegas facility. We expect to be at 100% of practical capacity sometime in 2002. We also expect to start building a second plant in 2002 and additional plants as we achieve capacity operations in each successive plant.

The Liquitek Corporation 2001 Operating Plan envisages revenues from the sale and/or engineering of small-, intermediate- and large-scale fluid treatment

Edgar Filing: LIQUITEK ENTERPRISES INC - Form 10-Q

systems using the Company's technologies. Growth through the next three years is expected to come from these same product lines with greater volumes following a reputation for successful implementations through earlier years' sales.

The Distech Limited 2001 Operating Plan provides for sales of the D-50 model and derivatives thereof, models producing approximately 50 U.S. gallons of treated water per hour, in remediation, water bottling, desalination, closed-loop recycling and institutional markets. The research and development program will support these sales objectives and will expand the product line through development of larger scale equipment. Future years' sales will grow as the product reputation spreads and will be augmented by products in the D-1000 and D-3000 series, models that will produce 1,000 and 3,000 U.S. gallons of treated water per hour, respectively.

The operating plans for 2001 project that all of our businesses will generate revenue, some for the first time. There are clearly risks associated with these assessments. We cannot know for certain at this point that the market will accept our product offerings, particularly when several of the products previously have not even been offered for sale. Nevertheless, management believes that the efficacy and consumer economics of these products will allow us to reach our goals.

All Distech sales, financing and other significant transactions will be transacted in U.S. dollars. As such, the Company does not foresee any significant risks arising out of fluctuations of foreign currency exchange rates.

The Company expects to raise additional capital within the next twelve months to fund further development of present and anticipated operations. The acquisition of Distech has required expansion of our capital resources by a \$5,000,000 equity infusion by September 30, 2001. The Company is presently seeking equity investment through a private placement offering.

At April 1, 2001, the private placement of a \$5 million equity investment in Liquitek Enterprises, Inc. was fully subscribed by Accelerated Technologies Fund LLC ("ATF"), an entity organized by Culley W. Davis, the Chairman of the Board of the Company. ATF's charter is to provide funding for emerging companies. As of May 1, 2001, ATF had provided approximately \$1.8 million to the Company toward its \$5 million commitment.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

The Company does not presently hold any investment instruments. The Company has entered into certain credit relationships as disclosed herein. All of our transactions are denominated in U.S. dollars.
