UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K/A

AMENDMENT NO. 2 TO
ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2001

Commission file number 1-8836

HAWAIIAN AIRLINES, INC.

(Exact name of registrant as specified in its charter)

HAWAII
(State or other jurisdiction of
incorporation or organization)

99-0042880
(I.R.S. employer
identification no.)

3375 Koapaka Street, Suite G-350
Honolulu, Hawaii
(Address of principal executive offices)

96819
(Zip code)

Registrant's telephone number, including area code: **(808) 835-3700**

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock (\$.01 par value)	American Stock Exchange and Pacific Exchange
Preferred Stock Purchase Rights	American Stock Exchange and Pacific Exchange

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by the court. Yes No

As of March 18, 2002, 34,464,324 shares of Common Stock of the Registrant were outstanding. The aggregate market value of voting stock held by non-affiliates of the Registrant (14,409,036 shares) on March 18, 2002 is \$43,083,018.

INDEPENDENT AUDITORS' REPORT ON SCHEDULE.**S-1****FINANCIAL STATEMENT SCHEDULE.****S-2**

As used in this Amendment No. 2 to the Annual Report on Form 10-K/A, the terms "Hawaiian", "Company", "we", "us", "our" and similar terms refer to Hawaiian Airlines, Inc., unless the context indicates otherwise.

We filed our original Annual Report on Form 10-K for the year ended December 31, 2001 with the Securities and Exchange Commission ("SEC") on April 1, 2002 and filed Amendment No. 1 to the Annual Report on Form 10-K/A containing the information required under Part III with the SEC on April 30, 2002. We are filing this Amendment No. 2 to the Annual Report on Form 10-K/A to restate our unaudited 2001 quarterly financial data presented in note 17 to the audited financial statements, as further discussed in note 17. For the purpose of this Amendment No. 2 to the Annual Report on Form 10-K/A, we have amended and restated in its entirety our original Annual Report on Form 10-K filed on April 1, 2002, as amended by Amendment No. 1 to the Annual Report on Form 10-K/A filed on April 30, 2002. In order to preserve the nature and character of the disclosures as of April 1, 2002 and, with respect to Part III only, as of April 30, 2002, no attempt has been made in this Amendment No. 2 to the Annual Report on Form 10-K/A to modify or update such disclosures for events which occurred subsequent to the original filings on April 1, 2002 and April 30, 2002, respectively.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K/A contains statements that are not related to historical results, including, without limitation, statements regarding Hawaiian's business strategy and objectives, future financial position, estimated cost savings, estimated size and growth of relevant markets and the effects on Hawaiian of the September 11, 2001 terrorist attacks, the Air Transportation Safety and System Stabilization Act ("Stabilization Act") and the Aviation and Transportation Security Act ("Security Act"), are forward-looking statements within the meaning of the "Safe Harbor for Forward-Looking Statements" provision of the Private Securities Litigation Act of 1995. It is not reasonably possible to itemize all of the many factors and specific events that could affect the outlook of an airline operating in the global economy. Some factors that could significantly impact expected capacity, traffic, load factors, yields, revenues, unit revenues, expenses, costs, unit costs, capital spending, cash flows, pre-tax margins, earnings, earnings per share, price to earnings ratios, debt load and other forward-looking information include, without limitation, the adverse impact of the September 11 terrorist attacks and the war on terrorism on the economy in general; the demand for air travel; the ability to reduce operating costs and conserve financial resources, taking into account increased costs incurred or to be incurred as a consequence of the attacks; the higher costs associated with new airline security directives and any other increased regulation of air carriers; the significantly higher costs of aircraft insurance coverage for future claims caused by acts of war, terrorism, sabotage, hijacking and other similar perils, and the extent to which such insurance will continue to be available; the ability to reduce costs to a level that takes into account the size of Hawaiian's operation; the ability to raise financing in light of the September 11 events; the cost of crude oil and jet fuel; airline pricing environment; industry capacity decisions; competitors' route decisions; the success of Hawaiian's cost-reduction efforts; strategic decisions of management; adoption of new accounting rules; results of union contract negotiations and their impact on labor costs and operations; the willingness of customers to travel; continued benefits of strategic airline alliances; actions of the U.S., foreign and local governments; foreign currency exchange-rate fluctuations; the stability of the U.S. economy; inflation; the economic environment of the airline industry and the economic environment in general. Forward-looking statements involve risks and uncertainties that may impact Hawaiian's actual results of operations. In some cases, identification of forward-looking statements can be made through use of terminology such as "may," "will," "should," "could," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential," or "continue" or the negative of such terms and other comparable terminology. Although we believe that the assumptions on which any forward-looking statements are based are reasonable, there can be no assurance that such assumptions will prove to be accurate and actual results could differ materially from those discussed in the forward-looking statements.

Developments in any of these areas, as well as other risks and uncertainties detailed from time to time in Hawaiian's Securities and Exchange Commission filings, could cause our results to differ from results that have been or may be projected by or on behalf of Hawaiian. We caution that the foregoing list of important factors is not exclusive. We do not undertake and expressly disclaim any obligation to update any forward-looking statements that may be made from time to time by or on behalf of Hawaiian.

ITEM 1. BUSINESS.

Overview

Hawaiian is the largest airline headquartered in Hawaii, based on operating revenues of \$611.6 million for 2001. We are engaged primarily in the scheduled transportation of passengers, cargo and mail. Hawaiian was incorporated in January 1929 under the laws of the Territory of Hawaii. We currently fly approximately 150 daily flights between Hawaii and six major U.S. cities ("transpacific") and among the six major islands in the State of Hawaii ("interisland"), and weekly flights between Hawaii and each of Pago Pago, American Samoa and Papeete, Tahiti in the South Pacific ("south pacific"). Our common stock is listed on the American Stock Exchange and the Pacific Exchange under the symbol "HA." Our principal offices are located at 3375 Koapaka Street, Suite G-350, Honolulu, Hawaii 96819. Our telephone and facsimile numbers are (808) 835-3700 and (808) 835-3690, respectively.

Segment Information

Principally all of our flight operations either originate or end in the State of Hawaii. The management of our operations is based on a system-wide approach due to the interdependence of our route structure in the various markets that we serve. We operate as a matrix form of organization as we have overlapping sets of components for which managers are held responsible. Managers report to our chief operating decision-maker on both our geographic components and our product and service components, resulting in components based on products and services constituting one operating segment. As we offer only one service (i.e., air transportation), management has concluded that we have only one segment of business.

Recent Developments

On September 11, 2001, the United States was attacked by terrorists using four hijacked commercial jets of two other U.S. airlines. The Federal Aviation Administration ("FAA") ordered all U.S. aircraft grounded immediately and closed U.S. airspace to all air traffic. Certain airports were reopened on September 13, 2001, and we were able to resume service on a limited basis that day. However, it took several days to reposition aircraft, reopen airports and return to full service capability.

We responded to the reduced travel demand after the events of September 11, 2001 by reducing operating capacity and furloughing part of our workforce. Effective October 1, 2001 we reduced our capacity, measured by available seat miles, by approximately 22%. On September 28, 2001, we sent out furlough notices to approximately 12% of our total workforce. In addition, on September 25, 2001, Renaissance Cruises, Inc. ceased operations resulting in the termination of our Los Angeles to Papeete charter service, consisting at that time of approximately four round trips weekly.

On September 22, 2001, President George W. Bush signed into law the Stabilization Act, affecting all U.S. airlines and air cargo carriers. The provisions of the Stabilization Act allow for the airlines and cargo carriers to receive certain reimbursements, suspensions or extensions of payment of fees and taxes, and other costs related to the impact on airline industry of the events of the September 11, 2001 terrorist attacks. Additionally, on November 19, 2001, President Bush signed into law the Security Act, federalizing substantially all aspects of civil aviation security.

We received \$24.9 million in assistance from the federal government under the Stabilization Act as of December 31, 2001 and anticipate receiving an additional \$5.9 million in early 2002. In addition, subject to federal guidelines, the Stabilization Act includes federal loan guarantees for airlines of which we expect to be eligible to apply. We cannot guarantee that we will seek or be able to obtain federal loan guarantees under the Stabilization Act.

The environment in which we operate and on which we are dependent has been greatly affected by the events of September 11, 2001 and their aftermath. Tourism is the largest source of revenue for the economy of the State of Hawaii, and the tourism industry in the State of Hawaii has been and continues to be adversely affected. Due to the lack of predictability of future traffic, business mix and yields, we are not able to fully estimate the long-term impact of the events of September 11, 2001 on our business.

On December 19, 2001, we entered into an Agreement and Plan of Merger (the "Merger Agreement") among Hawaiian, Aloha Airgroup, Inc. ("Aloha"), TurnWorks Acquisition III, Inc. ("Holdco") and TurnWorks, Inc. ("TurnWorks"), pursuant to which each of Hawaiian and Aloha agreed to become a wholly owned subsidiary of Holdco and the existing shareholders of Hawaiian and Aloha would become, along with TurnWorks, shareholders of Holdco (the "proposed merger"). On February 14, 2002, Holdco and its subsidiaries filed a Registration Statement on Form S-4 with the Securities and Exchange Commission with respect to the proposed merger.

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

When it became clear to the parties that the April 18, 2002 outside date agreed to by the parties in the Merger Agreement would not be satisfied due to the expected timing of regulatory approvals and reviews and other matters, TurnWorks requested that Hawaiian extend the outside date. After considering the request, Hawaiian announced on March 16, 2002 that it had determined not to extend the outside date. The parties conducted discussions with respect to potential revisions to the Merger Agreement and a potential formal termination of the Merger Agreement, but no resolution was reached. As the parties have now publicly announced their intentions to pursue other courses of action, we have treated the Merger Agreement as having been effectively terminated. We believe the other parties are taking the same position.

Flight Operations

In the first half of 2001, we added daily transpacific flights between Honolulu, Hawaii and San Diego, California. In response to the events of September 11, 2001, we suspended on October 1, 2001 our transpacific flight between Maui, Hawaii and Los Angeles, California, as well as our second flight between Honolulu, Hawaii and Seattle, Washington. We continue to evaluate our transpacific expansion plans and are increasing service into these markets as travel patterns warrant. In 2002, we announced that we will begin in June 2002 additional transpacific flights between Maui, Hawaii and San Francisco, California, and between Maui, Hawaii and Los Angeles, California, as well as a seasonal flight between Honolulu, Hawaii and Los Angeles, California. On March 15, 2002, we introduced a daily flight between Maui, Hawaii and Seattle, Washington. We also announced that we will begin in June 2002 service to two new mainland cities with daily nonstop service between Honolulu, Hawaii and Sacramento, California, and between Honolulu, Hawaii and Ontario, California.

On average and depending on seasonality, we operate approximately 150 scheduled flights per day with

daily service on our transpacific routes between Hawaii and Las Vegas, Nevada and the five key U.S. West Coast gateway cities of Los Angeles, San Diego and San Francisco, California, Seattle, Washington and Portland, Oregon;

daily service on our interisland routes among the six major islands of the State of Hawaii; and

weekly service on our south pacific routes as the sole direct provider of air transportation from Hawaii to each of Pago Pago, American Samoa, and Papeete, Tahiti in the South Pacific.

We also provide charter service daily from Honolulu, Hawaii to Las Vegas, Nevada and two to three times weekly from Honolulu, Hawaii to Anchorage, Alaska.

6

Aircraft

In 1999, we announced our plans to modernize our narrow-body interisland aircraft fleet with new Boeing 717s. In 2001, we completed the replacement of our entire fleet of 15 DC-9-50 aircraft used on interisland routes with 13 new Boeing 717-200 aircraft. Also, in 2001 we announced plans to replace all of our wide-body DC-10 aircraft utilized on the transpacific and south pacific routes with Boeing 767-300ERs. We took delivery of three new Boeing 767-300ER aircraft in the fourth quarter of 2001; two additional Boeing 767-300ER aircraft were delivered in March 2002 and we have plans for 11 additional Boeing 767-300ER aircraft to be delivered in 2002 and 2003. Upon completion of our fleet modernization plan in 2003, we expect to have one of the youngest fleets of any U.S. national or major carrier. Refer to *Part I, Item 2, Properties* of this Form 10-K for further discussion on our aircraft.

Maintenance

We developed extensive maintenance programs, which consist of a series of phased or continuous checks for each aircraft type. These checks are performed at specified intervals measured either by time flown or by the number of takeoffs and landings, or "cycles," performed. In addition, from time to time, we perform inspections, repairs and modifications of our aircraft in response to FAA directives. Checks range from daily "walk around" inspections, to more involved overnight maintenance checks, to exhaustive and time consuming overhauls. Aircraft engines are subject to phased maintenance programs designed to detect and remedy potential problems before they occur. The service lives of certain parts and components of both airframes and engines are time or cycle controlled. Parts and other components are replaced or overhauled prior to the expiration of their time or cycle limits.

Code Sharing and Other Alliances

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

We have marketing alliances with other airlines that provide reciprocal frequent flyer mileage accrual and redemption privileges and code sharing on certain flights. We have code sharing agreements with Alaska Airlines, Inc. ("Alaska"), American Airlines, Inc. ("American"), American Eagle Airlines, Inc. ("American Eagle"), Continental Airlines, Inc. ("Continental"), and Northwest Airlines, Inc. ("Northwest"). We also participate in the frequent flyer programs of Alaska, American, Continental, Northwest, Air Tahiti Nui, Inc. ("Air Tahiti Nui") and Virgin Atlantic Airlines, Inc. ("Virgin Atlantic"). These programs enhance our revenue opportunities by

providing our customers more value by offering more travel destinations and better mileage accrual/redemption opportunities,

gaining access to more connecting traffic from other airlines, and

providing members of our alliance partners' frequent flyer program an opportunity to travel on our system while earning mileage credit in the alliance partners' program.

Although these programs and services increase our ability to be more competitive, they also increase our reliance on third parties. Refer to "Risk Factors, Reliance on Third Parties".

Marketing

As with other airlines, most of our ticket sales are generated by travel agents. Travel agents generally receive commissions measured by a certain percentage of the price of tickets sold. In an effort to reduce our reliance on travel agencies and lower our distribution costs, we continue to expand and pursue e-commerce initiatives.

Electronic tickets or e-tickets, result in lower distribution costs to us while providing increased customer convenience. In 2001, we recorded over \$153.1 million in e-ticket revenue representing approximately 31% of total passenger revenue. Our website, www.hawaiianair.com, offers customers information on our flight schedules, our frequent flyer program, HawaiianMiles, booking reservations

7

on our flights or connecting flights with any of our code share partners, the status of our flights as well as the ability to purchase tickets or travel packages. We also publish fares with web-based travel services such as ORBITZ, Travelocity, Expedia, Cheap Tickets, Trip, Hotwire, and Priceline. These comprehensive travel planning websites provide customers with convenient online access to airline, hotel, car rental, and other travel services. In 2001, we recorded \$27.5 million in ticket sales from web-based travel services compared with \$18.1 million in 2000.

We expect to continue our promotion of e-ticket usage and growth in e-commerce in order to improve service to our customers and to reduce our distribution costs.

Frequent Flyer Program

Our HawaiianMiles frequent flyer program was initiated in 1983 to encourage and develop a customer loyalty base. The HawaiianMiles program allows passengers to earn mileage credits by flying on Hawaiian and other carriers, particularly Alaska, Northwest and Virgin Atlantic. We also credit members with mileage credits for patronage of other businesses, including hotels, car rental firms, credit cards and long distance telephone companies, pursuant to our exchange partnership agreements. We also sell mileage credits to other companies participating in the program.

HawaiianMiles members are entitled to a choice of various awards based on accumulated mileage, with a majority of the awards being free air travel. Travel awards available in the HawaiianMiles program range from a 5,000 mile award, which are redeemable for a one-way interisland flight, to 60,000 and 75,000 mile awards, which are redeemable for a roundtrip first class transpacific flight and a roundtrip first class south pacific flight, respectively.

We have increased our frequent flyer membership to 1.08 million members as of December 31, 2001 from 0.91 million members as of December 31, 2000. Active membership increased to 0.75 million as of December 31, 2001 from 0.63 million as of December 31, 2000.

Competition

Transpacific

We face multiple competitors on our transpacific routes, including major carriers such as American, Continental, Northwest, Delta Airlines, Inc. ("Delta"), United Airlines, Inc. ("United") and charter carriers. We believe that transpacific competition is primarily based on fare levels, flight frequency, on-time performance and reliability, name recognition, affiliations, frequent flyer programs, customer service, aircraft type and in-flight service.

South Pacific

We are the only provider of direct service between Honolulu and each of Pago Pago, American Samoa and Papeete, Tahiti.

Interisland

While there are several small commuter and "air taxi" companies that provide air transportation to Hawaii airports that cannot be served by large aircraft, the interisland routes are serviced primarily by Hawaiian and Aloha. We operate approximately 129 daily interisland flights subject to seasonality, representing about 40% of total flights operated by the two carriers. We believe that interisland competition is primarily based on fare levels, flight frequency, on-time performance and reliability, name recognition, affiliations, frequent flyer programs, customer service and aircraft type.

8

Employees

As of December 31, 2001, we had 3,069 active employees, of which 2,572 were employed on a full-time basis. The majority of our employees are covered by labor agreements with the following unions: the International Association of Machinists and Aerospace Workers (AFL-CIO) ("IAM"), the Air Line Pilots Association, International ("ALPA"), the Association of Flight Attendants ("AFA"), the Transport Workers Union ("TWU") and the Employees of the Communications Section ("Communications Section"). All contracts, other than the contract with the seven-member Communications Section, were renegotiated in 2000 and 2001 and are subject to renegotiation again in 2004 and 2005. We are currently in direct negotiations with the Communications Section. We expect to continue to develop and execute our business strategy of ongoing good relations with our employees.

Regulation

Our business is subject to extensive and evolving federal, state, local and transportation laws and regulations. These laws and regulations are administered by federal, state and local agencies in the United States. Many of these agencies regularly examine our operations to monitor compliance with these laws and regulations. Governmental authorities have the power to enforce compliance with these laws and regulations and to obtain injunctions or impose civil or criminal penalties in case of violations.

We cannot guarantee that we will be able to obtain or maintain necessary governmental approvals. Once obtained, operating permits are subject to modification and revocation by the issuing agency. Compliance with these and any future regulatory requirements could require us to make significant capital and operating expenditures. However, most of these expenditures are made in the normal course of business and do not place us at any competitive disadvantage. The primary U.S. federal statutes affecting our business are summarized below:

Industry Regulations

As a certificated air carrier, we are subject to the regulatory jurisdiction of the Department of Transportation ("DOT") and the Federal Aviation Administration ("FAA"). The DOT has jurisdiction over certain aviation matters such as the carriers' certificate of public convenience and necessity, international routes and fares, consumer protection policies including baggage liability and denied-boarding compensation and unfair competitive practices as set forth in the Transportation Act. Hawaiian and all other domestic airlines are subject to regulation by the FAA under the Transportation Act. The FAA has regulatory jurisdiction over flight operations generally, including equipment, ground facilities, security systems, maintenance and other safety matters. To assure compliance with its operational standards, the FAA requires air carriers to obtain operations, airworthiness and other certificates, which may be suspended or revoked for cause. The FAA also conducts safety audits and has the power to impose fines and other sanctions for violations of aviation safety and security regulations. Like other carriers, we are subject to inspections by the FAA in the normal course of business on a routine ongoing basis. We operate under a Certificate of Public Convenience and Necessity issued by the DOT (authorizing us to provide commercial aircraft service) as well as a Part 121 Scheduled Carrier Operating Certificate issued by the FAA.

Maintenance Directives and Other Regulations

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

The FAA approves all airline maintenance programs, including changes to the programs. In addition, the FAA licenses the mechanics who perform the inspections and repairs, as well as the inspectors who monitor the work.

The FAA frequently issues air worthiness directives, often in response to specific incidents or reports by operators or manufacturers, requiring operators of specified equipment to perform prescribed inspections, repairs or modifications within stated time periods or numbers of take off and landing cycles. In the last several years, the FAA has issued a number of maintenance directives and

9

other regulations relating to, among other things, cargo compartment fire detection/suppression systems, collision avoidance systems, airborne windshear avoidance systems, noise abatement and increased inspection requirements. We cannot predict what new air worthiness directives will be issued and what new regulations will be adopted or how our businesses will be affected by any such directives or regulations. We expect that we may from time to time incur expenses to comply with new airworthiness directives and regulations.

Additional laws and regulations are proposed from time to time, which could significantly increase the cost of airline operations by imposing additional requirements or restrictions. Laws and regulations also have been considered from time to time that would prohibit or restrict the ownership and/or transfer of airline routes or takeoff and landing slots. Also, the award of international routes to U.S. carriers (and their retention) is regulated by treaties and related agreements between the U.S. and foreign governments, which are amended from time to time. We cannot predict what laws and regulations will be adopted or what changes to international air transportation treaties will be effected, if any, or how we will be affected.

We believe that we are in compliance with all requirements necessary to maintain in good standing our respective operating authorities granted by the DOT and our respective air carrier operating certificates issued by the FAA. A modification, suspension or revocation of any of our DOT or FAA authorizations or certificates would have a material adverse effect on our operations.

Several aspects of airline operations are subject to regulation or oversight by federal agencies other than the FAA and the DOT. The U.S. Department of Defense regulates Civil Reserve Air Fleet and government charters. The federal antitrust laws are enforced by the U.S. Department of Justice. The U.S. Postal Service has jurisdiction over certain aspects of the transportation of mail and related services provided by our cargo services. Labor relations in the air transportation industry are generally regulated under the Railway Labor Act. Hawaiian and other airlines certificated prior to October 24, 1978 are also subject to preferential hiring rights granted by the Transportation Act to certain airline employees who have been furloughed or terminated (other than for cause).

Security

On November 19, 2001, President Bush signed into law the Security Act. This Security Act federalizes substantially all aspects of civil aviation security, creating a new Transportation Security Administration (the "TSA") under the Under Secretary of Transportation for Security of the DOT. Under the Security Act, all screeners at airports will be federal employees, and substantially all elements of airline and airport security will be overseen and performed by federal employees, including federal security managers, federal law enforcement officers, federal air marshals and federal security screeners. The law, among other matters, mandates numerous changes for the airline industry and its passengers. These mandates include improved flight deck security, deployment of federal air marshals on board flights, improved airport perimeter access security, airline crew security training, enhanced security screening of passenger baggage, cargo, mail, employees, vendors and enhanced training and qualifications of security screening personnel. In addition, airlines will be responsible for providing additional passenger data to U.S. Customs and enhanced background checks. Funding for the costs of these new airline and airport security measures under the law is provided by a new \$2.50 per enplanement ticket fee (up to a maximum fee of \$5.00 per one-way trip). Beginning on February 1, 2002, air carriers were required to begin collecting the new ticket fee from passengers. The law requires that, beginning February 18, 2002, the TSA will assume all civil aviation security functions and responsibilities. Also, the TSA may assume existing contracts for the provision of passenger screening services at U.S. airports for up to 270 days, after which all security screeners must be federal employees. In accordance with the Security Act, effective January 18, 2002, all checked baggage are required to be screened at all airports in the U.S. Also, all U.S. airports are required to have sufficient explosive detecting systems in place to screen all checked baggage by December 31, 2002.

10

Risk Factors

Terrorist Attacks

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

The terrorist attacks of September 11, 2001 adversely affected our financial condition and results of operations as well as the airline industry in general. Those effects continue, although they have been mitigated somewhat by increased traffic, the Stabilization Act and our cost-cutting measures. Moreover, additional terrorist attacks, even if not made directly on the airline industry, or the fear of such attacks, could further negatively impact us and the airline industry. Among the effects we experienced from the September 11, 2001 terrorist attacks were significant flight disruption costs caused by the FAA-imposed grounding of the U.S. airline industry's fleet, significantly increased security, insurance and other costs, and lower yields. Due in part to the lack of predictability of future traffic, business mix and yields, we are currently unable to estimate the long-term impact on us of the events of September 11, 2001 and the sufficiency of our financial resources to absorb that impact. However, given the magnitude of these unprecedented events and their potential subsequent effects, the adverse impact on our financial condition, results of operations and prospects may continue to be material.

September 11, 2001 Related Regulation

Implementation of the requirements of the Security Act will result in increased costs for our passengers. In addition, we may not be able to meet the requirements of the law regarding this screening while maintaining current service levels, thus these requirements may result in service disruptions and delays.

The law also requires air carriers to honor tickets for suspended service on other air carriers that are insolvent or have declared bankruptcy within 18 months of the passage of the Security Act. To be eligible, a passenger must make arrangements with the air carrier within 60 days after the date on which the passenger's air transportation was suspended. Because this provision of the Security Act was recently enacted, it is difficult to determine its impact. If a major U.S. air carrier were to declare bankruptcy and cease operations, this feature of the Security Act could have a significant impact on our operations. To the extent we are not reimbursed for honoring such tickets, the impact could be adverse.

Fuel Costs

Aircraft fuel is a significant expense for any air carrier and even marginal changes in fuel prices can greatly impact a carrier's profitability. The following table sets forth statistics about our aircraft fuel consumption and cost for each of the last three years (including the impact of our fuel hedging program):

Year	Gallons consumed (in thousands)	Total cost, including taxes (in thousands)	Average cost per gallon	% of operating expenses
2001*	129,208	\$ 111,717	86.5¢	18.8%
2000	141,429	\$ 126,962	89.8¢	20.4%
1999	120,894	\$ 76,148	63.0¢	14.4%

*

The amounts for 2001 reflect the January 1, 2001 adoption of Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities" (SFAS 133); the 2000 and 1999 amounts do not. See the further discussion of the impact of SFAS 133 in Note 3 to our consolidated financial statements.

The single most important factor affecting petroleum product prices, which includes the price of aircraft fuel, continues to be the actions of the major oil producing countries in setting targets for the production and pricing of crude oil. In addition, the markets for heating oil, diesel fuel, automotive

gasoline and natural gas can affect aircraft fuel prices. All petroleum product prices continue to be subject to unpredictable economic, political and market factors. Also, the balance among supply, demand and price has become more reactive to world market conditions. Accordingly, the price and availability of aviation fuel, as well as other petroleum products, continues to be unpredictable. A fuel supply shortage resulting from a disruption of oil imports or otherwise, could result in higher fuel prices or curtailment of scheduled service which could have a material adverse effect on our operations.

A one-cent change in the cost per gallon of fuel has an impact on our operating expenses of approximately \$108,000 per month (based on 2001 consumption). We have realized savings in fuel expense in 2001 as a result of our introduction of 13 new Boeing 717-200 aircraft to our aircraft fleet replacing less fuel-efficient aircraft. We expect further savings in fuel expense in 2002 and thereafter with the introduction to our

aircraft fleet of Boeing 767-300ER aircraft replacing older DC-10 aircraft. Significant changes in fuel prices or availability would materially affect our operating results.

We utilize heating oil forward contracts to manage market risks and hedge our financial exposure to fluctuations in our aircraft fuel costs. We employ a strategy whereby heating oil contracts may be used to hedge up to 50% of our anticipated aircraft fuel needs. Our fuel hedging strategy may limit our ability to benefit from declines in fuel prices and expose us to losses in the event of crude oil price fluctuations. Refer to *Management's Discussion and Analysis of Financial Condition and Results of Operations* contained in Part II, Item 7 of this Form 10-K for further discussion on aircraft fuel expense and the financial instruments that we use to manage market risks and hedge our financial exposure resulting from fluctuations in our aircraft fuel costs.

Seasonality and Cyclical

Our profitability and liquidity are sensitive to seasonal volatility primarily due to leisure and holiday travel patterns. Hawaii is a popular vacation destination for travelers. Traffic levels are typically weaker in the first quarter of the year and stronger travel periods occur during June, July, August and December. During weaker travel periods, we may adjust our flight availability or utilize aggressive fare pricing strategies, in order to increase our traffic volume, which may involve higher ticket discounts during these periods.

Even without the events of September 11, 2001, the airline industry is subject to substantial cyclical volatility. Airlines frequently experience higher fluctuating short-term cash requirements caused by seasonal fluctuations in traffic, that often deplete cash during off-peak periods, and by other factors that are not necessarily seasonal. These factors include the extent and nature of fare changes and competition from other airlines, changing levels of operations, national and international events, fuel prices and general economic conditions, including inflation. Because a substantial portion of both personal and business airline travel is discretionary, the industry tends to experience adverse financial results in general economic downturns. Accordingly, airlines require substantial liquidity to sustain continued operations under most conditions.

The nature of the airline industry requires substantial financial and operating leverage. The airline industry operates on low gross profit margins and revenues that vary substantially in relation to fixed operating costs. Due to high fixed costs, the expenses of each flight do not vary proportionately with the number of passengers carried, but the revenues generated from a particular flight are directly related to the number of passengers carried. Accordingly, while a decrease in the number of passengers carried would cause a corresponding decrease in revenue (if not offset by higher fares), it may result in a disproportionately greater decrease in profits. An increase in the number of passengers carried would have the opposite effect.

12

Dependence on Tourism

Our principal base of operations is in Hawaii with our revenue linked primarily to the number of travelers to, from and among the Hawaiian Islands. Tourists constitute a majority of the travelers to and from Hawaii, as well as between the islands. Tourism levels are affected by, among other things, the strength of the local Hawaii economy, the popularity of Hawaii as a tourist destination in general and other global factors, including the political and economic climate in the areas from which tourists to Hawaii typically originate. From time to time, various events and industry-specific problems such as strikes have had a negative impact on tourism in Hawaii. In addition, the terrorist attacks that occurred on September 11, 2001 have had a material adverse effect on Hawaii tourism.

According to statistics published by the State of Hawaii's Department of Business, Economic Development and Tourism, for the year ended December 31, 2001, visitors arriving on domestic flights to Hawaii totaled approximately 4.2 million, a decrease of 5.1% from 2000. During the same period, visitors arriving on international flights totaled approximately 2.1 million, a decrease of 16.2% from 2000. Overall visitor arrivals for the last three months of 2001 totaled approximately 1.3 million, a decrease of 24.4% from the same period in 2000.

No assurance can be given that the level of passenger traffic to Hawaii will not further decline in the future. A decline in the level of Hawaii passenger traffic could have a material adverse effect on our operations and profitability.

Competition

The airline industry is highly competitive, primarily due to the effects of the Airline Deregulation Act of 1978, recodified into the Transportation Act. The Transportation Act substantially eliminated government authority to regulate domestic routes and fares and has increased the ability of airlines to compete with respect to destination, flight frequencies and fares. Airline profit levels are highly sensitive to, and can be severely impacted by, among other things, adverse changes in fuel costs, average yield (seat pricing) and passenger demand. After September 11, 2001, we reduced fares in certain markets to attract customers, as did most airlines.

The U.S. airline industry has consolidated in recent years as a result of mergers and liquidations, and further consolidation may occur in the future. The consolidations have, among other things, enabled certain carriers to expand their international operations and increase their presence in the United States. In recent years, the airline industry has experienced alliances among U.S. carriers and between large U.S. and foreign carriers, allowing the carriers that are parties to these alliances to strengthen their overall operations. Conversely, the industry has also seen in recent years the emergence and growth of low-cost, low-fare domestic carriers, which has further intensified competitive pressures. Aircraft, skilled labor and gates at most airports continue to be available to start-up carriers. In some cases, the new entrants have initiated or triggered price discounting.

Many of our competitors are larger and have substantially greater financial resources than we do. The commencement of or increase in service on our routes by existing or new carriers could negatively impact our operating results. Competing airlines have, from time to time, reduced fares and increased capacity beyond market demand on routes served by us in order to maintain or generate additional revenues. Further fare reductions and capacity increases by competing airlines could cause us to reduce fares or adjust our capacity to levels that may adversely affect our operations and profitability. Many of our competitors have larger customer bases, greater brand recognition in other airline markets and significantly greater financial and marketing resources than we do. Either aggressive marketing tactics or a prolonged fare war initiated by these competitors could impact our limited financial resources and affect our ability to compete in these markets.

13

Vigorous price competition exists in the airline industry, with competitors frequently offering reduced discount fares and other promotions to stimulate traffic during weaker travel periods, generate cash flow or increase relative market share in selected markets. The introduction of broadly available, deeply discounted fares by a U.S. airline could result in lower yields for the entire industry and could have a material adverse effect on our operating results.

Reliance on Third Parties

We have agreements with contractors, including The Boeing Company and its affiliates ("Boeing"), Alaska, American, Continental, Delta, Northwest and certain other contractors, to provide certain facilities and services required for our operations. These facilities and services include aircraft leasing and maintenance, code sharing, reservations, computer services, frequent flyer programs, passenger processing, ground facilities, baggage and cargo handling and personnel training. Our reliance on these third parties to continue to provide these important aspects of our business may impact our ability to conduct our business effectively.

Maintenance on the DC-10 aircraft leased from Continental is provided by Continental. Line maintenance including daily routine and nonroutine work up to and including B-checks on the DC-10 aircraft leased from American is performed by us in Honolulu and by various contracted vendors at our U.S. mainland stations. American is responsible for all other maintenance on the DC-10 aircraft leased from American. The maintenance agreement with American provides for access to spare parts, engines and rotables for the maintenance of these aircraft. As a result, we do not maintain large inventories of spare engines or parts to support the operation of the DC-10 aircraft. We pay American a minimum contractual per hour charge for maintenance services, monthly in arrears. During 2001, we incurred approximately \$80.8 million of lease and maintenance expenses under the American leases and aircraft maintenance agreements. If American, Continental or other maintenance vendors terminates the respective maintenance arrangements, we would have to seek an alternate source of maintenance service or undertake to maintain these DC-10s ourselves. No assurance can be given that we would be able to do so on a basis that is as cost-effective as the current maintenance arrangements.

We have an agreement with the Pratt & Whitney division of United Technologies Corporation to provide comprehensive power by the hour overhaul and maintenance services as needed for the Pratt & Whitney engines utilized on our fleet of Boeing 767-300ER aircraft. We also have a contract with Delta for maintenance on our Boeing 767-300ER aircraft at stations on the U.S. mainland. For our Boeing 717 interisland fleet, we have agreements with Rolls Royce entities to provide power by the hour maintenance and spare engine and parts pooling. If Pratt & Whitney, Delta or Rolls Royce terminates or fails to perform under these arrangements, we would have to seek an alternative source for these services or undertake to maintain these engines and aircraft ourselves. No assurance can be given that we would be able to do so on a basis that is as cost-effective as these agreements.

We have code sharing agreements with Alaska, American, American Eagle, Continental and Northwest. We also participate in the frequent flyer programs of Air Tahiti Nui, American, Continental, Northwest, and Virgin Atlantic. Although these agreements increase our ability to be more competitive, they also increase our reliance on third parties.

In 2001 and 2000, passenger ticket sales from one Hawaii-based wholesaler constituted approximately 21% and 17% of our total operating revenues, respectively. Travel agents generally have a choice between one or more airlines when booking a customer's flight. Accordingly, any effort by travel agencies to favor another airline or to disfavor the Company could adversely affect our revenues. Although management intends

to continue to offer competitive incentives, and to maintain favorable relations with travel agencies, there can be no assurance that travel agencies will continue to do business with us. The loss of any one or several travel agencies may have a material adverse effect on our operations.

Insurance

We are exposed to potential losses that may be incurred in the event of an aircraft accident. Any such accident could involve not only the repair or replacement of a damaged aircraft and its consequential temporary or permanent loss of service, but also significant potential claims of injured passengers and others. We are required by the DOT to carry liability insurance on each of our aircraft. We currently maintain commercial airline insurance with a major group of independent insurers that regularly participate in world aviation insurance markets including public liability insurance and coverage for losses resulting from the physical destruction or damage to our aircraft which management believes is adequate and consistent with current industry practice. However, there can be no assurance that the amount of such coverage will not be changed or that we will not bear substantial losses from accidents. We could incur substantial claims resulting from an accident in excess of related insurance coverage that could have a material adverse effect on our operations and revenue.

After the events of September 11, 2001, independent insurers canceled all war risk insurance coverage for the airline industry. Our war risk insurance coverage was subsequently reinstated to a limit of \$100 million from the independent insurers at increased premiums. We also purchased from the U.S. government, through the DOT, third-party war risk insurance coverage above \$100 million, up to a cap of twice the previous limit. This coverage has been extended to May 18, 2002, after which it is anticipated that the federal policy will be extended unless insurance for war risk coverage in necessary amounts is available from independent insurers or a group insurance program is instituted by the U.S. carriers and the DOT. There can be no assurance that the amount of such coverage will not be changed or that we will not bear additional increased premiums or substantial losses from accidents or other events. Substantial claims in excess of related insurance coverage could have a material adverse effect on our operations and profitability.

The Stabilization Act provides for reimbursement to air carriers and their vendors or subcontractors for increases in the cost of war risk insurance for the first 30 days of reinstated coverage over the premium in effect prior to September 10, 2001. We were reimbursed for the excess cost of war risk insurance above that previously incurred for the first 30-day period of this interim war risk insurance period, but have not received reimbursement for premiums beyond that period. As of December 31, 2001, we received reimbursement of approximately \$500,000. Due in part to the events of September 11, 2001, we expect the annual cost of our aviation insurance programs to increase from approximately \$3.6 million to approximately \$12.4 million.

Employees

As of December 31, 2001, Hawaiian had 3,069 active employees, of which 2,572 were employed on a full-time basis. Approximately 86% of our employees are covered by labor agreements with the IAM, ALPA, AFA, TWU and Communications Section.

All contracts, other than the contract with the seven-member Communications Section, were renegotiated in 2000 and 2001 and are subject to renegotiation again in 2004 and 2005. Future negotiations of these agreements could result in increases in compensation and benefit costs. We are currently in direct negotiations with the Communications Section. If an agreement is not reached in direct negotiations, federally-mandated mediation will occur and could last for an unspecified period of time. Although the overwhelming majority of labor negotiations in the airline industry are resolved in mediation, there can be no assurance that the discussions will result in an agreement and ratification. The time required to negotiate a contract under the Railway Labor Act varies. Therefore, management cannot currently estimate the time frame or results of these negotiations. Should Hawaiian and the Communications Section be unable to reach an agreement, we could be adversely affected. If we are unable to reach an agreement with any unionized work group, we may be subject to future work interruptions and/or stoppages, which may hamper or halt operations.

ITEM 2. PROPERTIES.

Aircraft

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

As of December 31, 2001, our operating fleet consisted of three Boeing 767-300ER aircraft, 13 Boeing 717-200 aircraft and 15 DC-10 aircraft. The following table summarizes our aircraft fleet currently in service as of December 31, 2001 as well as our commitments and options for additional aircraft:

Aircraft Type	Leased	Commitments	Options	Seating Capacity (Per Aircraft)	Average Age (In Years)
B767-300ER	3	13		252	Less Than One
B717-200	13		7	123	Less Than One
DC-10-10	10			304	28.1
DC-10-30	2			314	24.9
DC-10-30	3			282	22.8
Total	31	13	7		

Boeing 767-300ER Aircraft

We executed lease agreements for 16 Boeing 767-300ER aircraft, including three new Boeing 767-300ER aircraft under 15-year operating leases with Ansett Worldwide Aviation that were delivered in the fourth quarter of 2001. The first two of four Boeing 767-300ER aircraft under seven-year operating leases with International Lease Finance Corporation were received in March 2002, and the remaining two are scheduled to be delivered during the first half of 2002. Nine new Boeing 767-300ER aircraft under 18-year lease financing arranged through Boeing Capital Corporation and Ansett Worldwide Aviation are scheduled to be delivered during the second half of 2002 and the first half of 2003. On November 6, 2001, the FAA granted Hawaiian's application for extended-range twin-engine operations certification for Boeing 767-300ER aircraft. The Boeing 767-300ER aircraft have been introduced on our transpacific routes.

Boeing 717-200 Aircraft

During 2001, we took delivery of and introduced into service on our interisland routes 13 new Boeing 717-200 aircraft, all under 18-year leveraged lease financing provided by Boeing affiliates. These aircraft replaced the DC-9-50 fleet previously utilized on our interisland routes.

DC-10 Aircraft

The DC-10 aircraft are currently utilized on our transpacific and south pacific routes. Of the 15 DC-10 aircraft, 10 are leased from American on long-term operating leases expiring at various times in 2002 and the first half of 2003. One of the 10 DC-10 aircraft was returned to American in January 2002 and one in March 2002. Three DC-10-30 aircraft were leased from Continental, two of which were returned in January 2002 and the remaining aircraft is on a lease which expires in May 2002. We operate two DC-10-30 aircraft under operating leases with BCI Aircraft Leasing, which expire in January 2004.

DC-9-50 Aircraft

Our fleet of 15 McDonnell Douglas DC-9-50 aircraft, previously utilized on our interisland routes, has been retired from service. Fourteen of the DC-9-50 aircraft have been placed for storage with Avtel Services in Mojave, California, pending return to lessors or sale. Two of these aircraft have been

returned to the respective lessors, by way of lease terminations, but are still parked at Avtel Services under our agreement with Avtel Services. One DC-9-50 aircraft remains in Honolulu.

Ground Facilities

Our principal terminal facilities, cargo facilities, hangar and maintenance facilities are located at the Honolulu International Airport. The facilities at Honolulu International Airport (except for the terminal facilities) are leased on a month-to-month basis. We also occupy terminal facilities in the terminal buildings at the airports owned by the State of Hawaii in Hilo and Kona on the island of Hawaii, in Kahului on the island of Maui, in Lanai City on the island of Lanai, in Hoolehua on the island of Molokai, and in Lihue on the island of Kauai. All of our

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

terminal facilities, including gates and holding rooms, are considered by the State of Hawaii Department of Transportation/Airports to be common areas and thus are not exclusively controlled by Hawaiian.

Our corporate headquarters are located in leased premises of 129,667 square feet in a complex adjacent to the Honolulu International Airport. The lease for this office expires in 2013. We lease four ticket offices in Hawaii: three on the island of Oahu and one on the island of Hawaii. We also lease sales offices in San Francisco, Seattle (cargo), Los Angeles, Papeete and Tokyo. The leases for these offices expire on various dates from May 30, 2002 to December 31, 2003. We have a signatory agreement with the Port of Portland for terminal space, and operating agreements with the Port of San Diego and McCarran International Airport in Las Vegas, Nevada. We have a right of entry agreement with the Anchorage International Airport and also have sublease agreements for terminal space with LAX Two in Los Angeles, Northwest Airlines in Seattle and San Diego, US Airways (which will change to Delta effective April 1, 2002) in San Francisco, and the Government of American Samoa in Pago Pago. We also have agreements in place for alternate landing sites with the Port of Moses Lake, King County (Boeing Field) in Seattle, Ontario Airport in California and Fairbanks International Airport in Alaska. The aggregate rent for all facilities in the year ended December 31, 2001 was approximately \$12.6 million consisting of \$11.4 million for space rentals and \$1.2 million for parking stalls.

ITEM 3. LEGAL PROCEEDINGS.

Hawaiian and/or its directors are parties to four lawsuits filed by our shareholders and one demand for arbitration filed by an optionholder, challenging the proposed merger with Aloha that was announced on December 19, 2001. We believe that these actions which are described below are without merit and intend to defend them vigorously. We expect that these legal proceedings will become moot because the proposed merger is not expected to be consummated.

On January 11, 2002, Crandon Capital Partners filed an action in the First Circuit Court of the State of Hawaii titled CRANDON CAPITAL PARTNERS v. JOHN W. ADAMS, ET AL. against Hawaiian, the directors of Hawaiian, and Airline Investors Partnership, L.P. ("AIP"), the majority shareholder of Hawaiian. The purported class-action suit alleges that the merger and the related transactions provide unfair preferential treatment to AIP and Mr. Adams, who is Chairman of Hawaiian's Board and an affiliate of AIP, and that the director defendants breached their fiduciary duty to Hawaiian's shareholders by approving the proposed merger and the related transactions. Plaintiff seeks to enjoin the proposed merger and the related transactions and obtain unspecified damages. On January 24, 2002, the First Circuit Court denied plaintiff's motion for a temporary restraining order enjoining the proposed merger because, according to the Court, plaintiff did not show that the balance of irreparable damage favored the issuance of a temporary restraining order. By stipulation, plaintiff has agreed to defer moving for a preliminary injunction against the proposed merger until after we have provided 28-days notice that a shareholder vote on the proposed merger has been scheduled. This case has been tendered for defense under our directors' and officers' insurance policy.

17

On January 17, 2002, three separate but virtually identical actions titled MOCARSKI v. CASEY, ET AL., MOORE V. CASEY, ET AL., and WHITE V. CASEY, ET AL., were filed in First Circuit Court of the State of Hawaii. Defendants in each of the purported class-action lawsuits are Hawaiian directors Paul J. Casey, Joseph P. Hoar, Sharon L. Soper, Thomas J. Trzanowski, Reno F. Morella, John W. Adams, Robert G. Coe, Edward Z. Safady, Todd G. Cole and Samson Poomaihealani. Plaintiffs Joseph J. Mocarski, Ted Moore and Richard A. White allege that defendants had a self-interest in approving the proposed merger as a result of the change-of-control provisions in their Hawaiian stock options and employment agreements, and that they breached their fiduciary duties to Hawaiian's shareholders by approving the proposed merger. The actions seek, among other relief, to enjoin the proposed merger. Subsequently, Mr. Mocarski filed an amended complaint in his action. The amended complaint asserts purported derivative claims on behalf of Hawaiian, which is named as a nominal plaintiff, and adds as defendants AIP and director William Weisfield. The amended complaint asserts five claims, including breach of fiduciary duty, waste, abuse of control, and unjust enrichment. In addition, counsel for plaintiffs Mocarski, Moore and White sought our assurance that we would not pay any termination fees or other similar pay-outs to any party involved in the proposed merger, and threatened unspecified legal action if our intentions were otherwise. We replied that we did not believe the payment of a termination fee was a proper subject of plaintiffs' lawsuits, but that, in any event, we have no present intention to pay a termination fee to any party to the merger agreements. This case has been tendered for defense under our directors' and officers' insurance policy.

On February 7, 2002, John L. Garibaldi, a former Chief Financial Officer of Hawaiian, filed a demand for arbitration with the Arbitration Tribunals of Dispute Prevention and Resolution, Inc. in Honolulu, Hawaii titled GARIBALDI v. HAWAIIAN AIRLINES, INC. The respondent in the action is Hawaiian. Mr. Garibaldi alleges that Hawaiian has repudiated its obligations in regard to the vesting and exercise date of stock options granted to him under his release and separation agreement with Hawaiian. The demand seeks, among other relief, to enjoin the proposed merger as well as unspecified damages.

Hawaiian is not a party to any other litigation that is expected to have a significant effect on the operations or business of Hawaiian.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

None.

18

PART II**ITEM 5. MARKET PRICE AND DIVIDEND INFORMATION.**

In the table below, we present the range of the reported high and low sales prices on the American Stock Exchange of our common stock for the calendar quarters indicated. The shares of our common stock are listed on the American Stock Exchange and the Pacific Exchange under the symbol "HA."

	Price Range	
	High	Low
2001		
First Quarter	3.2500	1.8125
Second Quarter	3.3000	2.3000
Third Quarter	3.5000	1.7000
Fourth Quarter	4.0500	2.0600
2000		
First Quarter	2.5000	1.7500
Second Quarter	2.8750	2.0625
Third Quarter	2.7500	2.2500
Fourth Quarter	2.5000	1.9500

On March 26, 2002, the closing price per share of our common stock was \$3.08. Past price performance is not necessarily indicative of future price performance.

There were approximately 1,026 holders of record of our common stock as of March 18, 2002, including record owners holding shares for an indeterminate number of beneficial owners.

We paid no dividends in 2001 or 2000. Under the terms of the financing arrangement with CIT Group/Business Credit, Inc. ("CIT"), we are restricted from paying any cash or stock dividends.

As part of the collective bargaining agreement negotiated with ALPA in December 2000, we agreed to distribute 1,685,380 shares of our common stock on a quarterly basis to the individual 401(k) accounts of ALPA pilots in our employment during 2001 and 2002. The first distribution of 259,541 shares, representing the number of shares required to be distributed in respect of the first and second quarter of 2001, was made on September 11, 2001 to Vanguard Group, Inc. as trustee for the Hawaiian Airlines, Inc. Pilots' 401(k) Plan. The distribution for the quarter ended September 30, 2001, consisting of 259,369 shares, was made on November 9, 2001, and the distribution for the quarter ended December 31, 2001, consisting of 313,515 shares, was made on February 13, 2002 to Vanguard Group, Inc. as trustee.

In March 2000, our Board of Directors approved a stock repurchase program authorizing the repurchase of up to 5 million shares of our common stock from time to time. In August 2000, the Board of Directors increased the authorization to 10 million shares. Including the effect of the repurchase of certain warrants and stock repurchased in 2000, the total number of shares of common stock repurchased under the stock repurchase program amounted to 9,333,508 as of December 31, 2001. In March 2002, our Board of Directors approved a stock repurchase program authorizing the repurchase of up to 5 million shares of our common stock from time to time in the open market or privately negotiated transactions, to be implemented in the event that the proposed merger is formally terminated.

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

The Transportation Act prohibits non-U.S. citizens from owning more than 25% of the voting interest of a U.S. air carrier or controlling a U.S. air carrier. Our restated articles of incorporation prohibit the ownership or control of more than 25% (to be increased or decreased from time to time, as permitted under the laws of the United States) of issued and outstanding voting capital stock of Hawaiian by persons who are not "citizens of the United States." As of January 31, 2002, we believe that less than 13% of the voting stock of Hawaiian is held by non-United States citizens.

19

ITEM 6. *SELECTED FINANCIAL DATA.*

The Selected Financial and Statistical Data should be read in conjunction with the accompanying Financial Statements of Hawaiian and the notes related thereto and Part II, Item 7 *Management's Discussion and Analysis of Financial Condition and Results of Operations.*

(a) For 2001, overall revenues and expenses were significantly unfavorably impacted by the events of September 11, 2001.

(b) For 2001, operating expenses included a \$30.8 million special credit for estimated proceeds from the federal government under the Stabilization Act and a \$3.6 million favorable adjustment to the restructuring charge recorded in 2000. For 2000, operating expenses included a \$14.9 million restructuring charge related to DC-9-50 aircraft and expendable inventory, and a \$7.6 million loss on assets held for sale related to sale-leaseback transactions on two DC-10 aircraft. For 1999, operating expenses included a \$47.0 million impairment loss related to DC-9-50 aircraft.

(c) For 2001, 2000 and 1998, shareholders' equity included other comprehensive losses related to minimum pension liability adjustments of \$51.6 million, \$10.1 million and \$4.5 million, respectively.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

This discussion analyzes our operations for the fiscal years ended December 31, 2001, 2000 and 1999. The following information should be read together with our audited financial statements and the accompanying notes included elsewhere in this report.

For the periods indicated, the following table presents a breakdown of the components of operating revenue and expenses as well as the percentage relationship that these items bear to the total operating revenue and the percentage increase (decrease) in the dollar amounts of such items.

	<u>Percentage of Total Operating Revenue</u>			<u>Percentage Change</u>	
	<u>Year Ended December 31,</u>			<u>2001 vs. 2000</u>	<u>2000 vs. 1999</u>
	<u>2001</u>	<u>2000</u>	<u>1999</u>

Effects of September 11, 2001 Events

As a result of reduced travel demand due to the events of the September 11, 2001 terrorist attacks, during the quarter ended December 31, 2001, we reduced our total capacity by approximately 17.0% as measured by available seat miles. The total number of passengers we carried during the quarter ended December 31, 2001 declined by approximately 12.0%, as compared to the quarter ended December 31, 2000. As a result of the reduced level of operations, we furloughed approximately 12.0% of our total workforce during the quarter ended December 31, 2001. In addition to the reductions in our operations, we incurred significant additional expenses since September 11, 2001. During the quarter ended December 31, 2001, we experienced increased security screening costs that we expect to continue incurring for an indefinite period of time, and the annual costs of our aviation insurance program, commencing with the fourth quarter of 2001, have increased by approximately \$9.0 million.

The trends evidenced during the quarter ended December 31, 2001 may continue to affect us to an extent that cannot yet be fully measured. We are unable to estimate the full impact of the terrorist

attacks of September 11, 2001. We are also unable to predict the full effect of subsequent events that may adversely affect the entire airline industry, including related vendors and suppliers, and which may result in increased costs caused by several factors, including additional security requirements and increased government oversight. Total airline industry traffic and operational efficiencies have been severely impacted by the events of September 11, 2001, and it is not possible to project the length of time and the future economic impact on the industry of recovering from these events and the extent to which we will follow the industry pattern.

Results of Operations

2001 Compared to 2000

For the year ended December 31, 2001, we reported operating income of \$16.7 million and net income of \$5.1 million. For the year ended December 31, 2000, we reported an operating loss of \$13.8 million and a net loss of \$18.6 million.

For the year ended December 31, 2001, overall revenues and expenses were unfavorably impacted by the events of September 11, 2001. That impact was mitigated by relief received under the Stabilization Act, which resulted in a credit to operating expenses of \$30.8 million. Except for this item, it is not practicable to determine the impact of those events on individual elements of our operations, and the discussion that follows makes no attempt to set forth what would have been our 2001 operating results had the events of September 11, 2001 not occurred.

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

Operating Revenue. Operating revenues totaled \$611.6 million for the year ended December 31, 2001, compared to \$607.2 million for the year ended December 31, 2000, an increase of \$4.4 million, or 0.7%. Significant year-to-year variances were as follows:

Scheduled passenger revenues totaled \$488.3 million during the year ended December 31, 2001, an increase of \$12.8 million, or 2.7%, over the year ended December 31, 2000. During 2001, we experienced higher average revenue per passenger ticket issued compared to 2000. Year-to-year changes in revenue, passengers and resulting yields on our transpacific, interisland and south pacific flights were as follows:

	Net Change in Revenue (in millions)	Net Change in Revenue Passengers	Net Change in Yields
Transpacific	\$ 8.6	-4.7%	+7.0%
Interisland	\$ 5.5	-7.7%	+11.8%
South Pacific	\$ -1.3	-8.2%	+1.2%

Overseas charter revenues totaled \$75.6 million for the year ended December 31, 2001, a decrease of \$6.7 million, or 8.2%, compared to the year ended December 31, 2000. On September 25, 2001, a major source of our overseas charter revenues, Renaissance Cruises, Inc. filed for bankruptcy under Chapter 11 and ceased operations, resulting in the termination of our Los Angeles to Papeete, Tahiti charter service. The loss of revenues from this charter service was partially offset by small increases in our Honolulu to Las Vegas and Honolulu to Anchorage charter service.

Cargo revenue totaled \$22.2 million for the year ended December 31, 2001, a decrease of \$5.6 million, or 20.1%, compared to the year ended December 31, 2000, due to a decrease in cargo pounds carried.

Other operating revenues totaled \$25.4 million for the year ended December 31, 2001, an increase of \$3.8 million, or 17.8%, over the year ended December 31, 2000, primarily due to an

22

increase in the recognition of frequent flyer miles revenue, ground handling revenue and ticket cancellation penalty revenue.

Operating Expenses. Operating expenses, including restructuring charges and the special credit resulting from federal financial assistance received under the Stabilization Act, totaled \$594.9 million for the year ended December 31, 2001 compared to \$621.0 million for the year ended December 31, 2000, a decrease of \$26.1 million, or 4.2%. Significant year to year variances were as follows:

Wages and benefits totaled \$188.8 million for the year ended December 31, 2001, an increase of \$28.4 million, or 17.7%, over the year ended December 31, 2000, primarily due to certain one-time payments, non-cash charges and salary and wage increases related to the new collective bargaining agreements with our pilots, flight attendants and IAM employees that went into effect during 2001, and an overall increase in employee benefits.

Aircraft fuel costs, including taxes and oil, totaled \$111.9 million for the year ended December 31, 2001, a decrease of \$15.3 million, or 12.1%, compared to the year ended December 31, 2000. Due to the 6.1% decrease in available seat miles year over year and the introduction of the more fuel- efficient Boeing 717-200 aircraft on interisland routes and three Boeing 767-300ER aircraft on transpacific routes, aircraft fuel consumption decreased 8.6%, resulting in a decrease in fuel cost of \$12.0 million. The average cost of aircraft fuel per gallon decreased 13.2%, resulting in a \$16.7 million decrease in fuel cost. Our fuel-hedging program expense was \$1.7 million in 2001, compared to a benefit of \$11.7 million in 2000.

Maintenance materials and repairs totaled \$99.0 million for the year ended December 31, 2001, a decrease of \$12.2 million, or 11.0%, compared to the year ended December 31, 2000, primarily due to a decrease of \$21.4 million in DC-9-50

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

maintenance resulting from the reduction of the DC-9-50 fleet, offset by increases of \$5.7 million in Boeing 717-200 maintenance expense resulting from the introduction of Boeing 717-200 aircraft in 2001, and \$3.0 million in DC-10 maintenance expense due to additional DC-10 aircraft hours flown and increased maintenance rates.

Rentals and landing fees totaled \$61.8 million for the year ended December 31, 2001, an increase of \$22.3 million, or 56.5%, over the year ended December 31, 2000, mainly due to an increase in aircraft rent resulting from the addition of one DC-10 aircraft in April 2000, one DC-10 aircraft in December 2000, a sale-leaseback arrangement on two other DC-10 aircraft in January 2001 and the addition of 13 Boeing 717-200 aircraft, offset by rental reductions associated with the retirement of certain DC-9-50 aircraft.

Sales commissions totaled \$20.8 million for the year ended December 31, 2001, an increase of \$6.0 million, or 40.6%, over the year ended December 31, 2000, primarily due to an increase in wholesaler incentive commissions.

Other expenses totaled \$133.0 million for the year ended December 31, 2001, an increase of \$4.0 million, or 3.1%, over the year ended December 31, 2000. In 2001, we incurred approximately \$3.2 million in legal and consulting fees and other services related to the proposed merger. Additionally, increases in insurance and security were offset by decreases in interrupted trips and passenger food expense.

In the year ended December 31, 2000, we recorded approximately \$14.9 million of restructuring charges related to excess or obsolete DC-9-50 inventory parts and the return of five DC-9-50 aircraft under operating leases. The year ended December 31, 2001 includes a \$3.6 million favorable adjustment to the restructuring charge recorded in 2000 due to a change in the estimated cost to comply with the airframe return provisions under the DC-9-50 aircraft operating leases. The change in estimate is based on renegotiation of the return provisions with the respective lessors which were concluded in 2001.

23

In January 2001, we completed the sale-leaseback of two DC-10 aircraft. We recorded a \$7.6 million loss on assets held for sale in the year ended December 31, 2000, to reduce the book value of two DC-10 aircraft to net realizable value.

In the year ended December 31, 2001, we recognized \$30.8 million as a special credit to operating expenses for the estimated allocation of proceeds from the federal government under the Stabilization Act.

2000 Compared to 1999

For the year ended December 31, 2000, we incurred operating losses and net losses of \$13.8 million and \$18.6 million, respectively. As discussed below, in 2000 we recorded \$14.9 million in pretax restructuring charges in conjunction with our intent to replace our narrow-body DC-9 interisland fleet and a \$7.6 million pretax loss on assets held for sale on the two DC-10 aircraft sold in January 2001. Excluding the effects of the restructuring charges and the loss on assets held for sale, we generated operating income and net income of \$8.7 million and \$5.5 million, respectively. Our total operating revenues increased by \$118.3 million, or 24.2%, primarily the result of increased passenger and charter revenues. Our operating expenses, net of impairment loss, restructuring charges and the loss on assets held for sale, also increased by \$116.1 million, or 24.1%, of which \$50.8 million related to year over year increases in fuel expense. In response to our increased flight operations, available seat mile growth of 14.7% and investments in infrastructure to support our growth strategies, operational cost increases were incurred in wages and benefits, maintenance, aircraft fuel and certain general and administrative expense categories.

Operating Revenues. Operating revenues totaled \$607.2 million in 2000 compared to \$488.9 million in 1999, an increase of \$118.3 million, or 24.2%. Significant year-to-year variances were as follows:

Scheduled passenger revenues totaled \$475.5 million for the year ended December 31, 2000, an increase of \$75.2 million, or 18.8%, over the year ended December 31, 1999. The increase resulted from the introduction of additional DC-10 capacity, efforts to improve fare and passenger mix and initiation and maintenance of general price increases. Year-to-year changes in revenue, passengers and resulting yields on our transpacific, interisland and south pacific flights were as follows:

	Net Change in Revenue (in millions)	Net Change in Revenue Passengers	Net Change in Yields
Transpacific	\$ 50.5	+9.6%	+9.7%
Interisland	\$ 22.9	+8.1%	+7.3%
South Pacific	\$ 1.8	+9.0%	+0.5%

Overseas charter revenues totaled \$82.4 million for the year ended December 31, 2000, an increase of \$35.8 million, or 76.8%, over the year ended December 31, 1999. The increase is primarily associated with the commencement of charters between Los Angeles and Tahiti on August 31, 1999 and operation of additional ad hoc charters year over year.

Cargo and other operating revenues totaled \$49.4 million for the year ended December 31, 2000, an increase of \$7.3 million, or 17.4%, over the year ended December 31, 1999. The increase is primarily due to additional capacity and increased cargo rates resulting in increased cargo revenues, general increases in our contract services and revenue from expanded promotion of our frequent flyer program.

Operating Expenses. Operating expenses totaled \$621.0 million for the year ended December 31, 2000, an increase of \$91.6 million, or 17.3%, from total operating expenses of \$529.4 million for the

year ended December 31, 1999. All fluctuations in operating expenses per available seat mile were affected by an overall increase in available seat miles of approximately 14.7% in 2000 from 1999. Significant year to year variances were as follows:

Wages and benefits totaled \$160.5 million for the year ended December 31, 2000 versus \$138.4 million for the year ended December 31, 1999, an increase of \$22.1 million, or 15.9%. The increase is substantially attributable to a 3% wage increase effective January 1, 2000 and additional wages and benefits due to implementation of our growth strategies which resulted in increased flying operations. We had 3,313 active employees at the end of 2000 versus 3,091 active employees at the end of 1999.

Maintenance materials and repairs totaled \$111.2 million for the year ended December 31, 2000, an increase of \$9.4 million, or 9.3%, over the year ended December 31, 1999. We incurred \$15.9 million more DC-10 maintenance expense in 2000 than 1999 as a result of increases in the maintenance rates charged by American, the addition of three DC-10 aircraft serviced by Continental, and the number of DC-10 aircraft hours flown. The increase was offset by the reduction of DC-9-50 airframe and engine maintenance of \$6.5 million in 2000.

Aircraft fuel totaled \$127.2 million for the year ended December 31, 2000 versus \$76.4 million for the year ended December 31, 1999. Year over year, aircraft fuel expense increased by \$50.8 million, or 66.6%, primarily due to a 17.0% increase in gallons consumed and a 58.7% increase in the average cost of aircraft fuel per gallon (exclusive of taxes and the impact of Hawaiian's fuel hedging program). The average price per gallon rose continuously throughout the year, with the October, November and December prices each more than \$1.00 per gallon. This brought the average purchase price for 2000 to \$.90 per gallon. Our fuel hedging program offset more than \$11.7 million of the cost increase and reduced the net fuel cost per gallon by more than \$.08 to less than \$.82.

Rentals and landing fees totaled \$39.5 million for the year ended December 31, 2000, an increase of \$7.8 million, or 24.7%, over the year ended December 31, 1999. The increase is a net of \$4.8 million of additional landing fees incurred in 2000, as the two-year moratorium placed on landing fees at all airports in the State of Hawaii ended September 1, 1999, less \$1.1 million in landing fees refunded in 2000, \$3.7 million in lease rent paid for the three additional DC-10s placed into service between December 1999 and December 2000 and \$0.5 million in additional space rentals.

Depreciation and amortization totaled \$16.3 million for the year ended December 31, 2000 compared to \$17.1 million for the year ended December 31, 1999, a decrease of \$1.8 million, or 10.5%. The decrease is due to the reduction in DC-9-50 property as a result of the impairment loss recorded in December 1999, offset by the additional depreciation incurred from property placed into service in 2000.

Sales commissions totaled \$14.8 million for the year ended December 31, 2000, an increase of \$2.3 million, or 18.7%, compared to the year ended December 31, 1999. The increase is due to an increase in commissionable sales offset by a decrease in the commission rate.

Other operating expenses totaled \$129.0 million for the year ended December 31, 2000, an increase of \$24.4 million, or 23.3%, compared to the year ended December 31, 1999. The increase is due to a combination of additional expenses incurred in 2000, including \$1.4 million in advertising and promotion costs, \$4.2 million in food and beverage expenses, \$3.4 million in general and administrative costs (including credit card processing fees, booking fees, and third party services), \$4.5 million in aircraft and passenger service related expenses, \$1.1 million in personnel expenses primarily relating to crew accommodations, \$4.7 million in interrupted trips

25

and denied boarding expenses, \$1.3 million in aircraft damages and \$3.3 million in adjustments to assets held for sale inventory.

On December 31, 1999, we signed a definitive agreement to acquire thirteen new Boeing 717-200 aircraft, subject to the approval of our board of directors. Based on an evaluation that we performed in 1999, we decided in the fourth quarter of 1999 to replace the DC-9-50 fleet utilized for our interisland flights within the State of Hawaii with Boeing 717-200s. The decision was based on the lower maintenance and fuel costs of the Boeing 717-200s. As the Boeing 717-200 aircraft were placed in service throughout 2001, the DC-9-50 aircraft were retired and will be sold or returned to the lessors. At December 31, 1999, the carrying value of the DC-9-50 aircraft and related rotables and engines was \$58.6 million. We considered the decision to retire the DC-9-50 fleet to be an indicator of impairment of our long-lived assets in accordance with the Financial Accounting Standards Board (the "FASB") Statement of Financial Accounting Standards ("SFAS") No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of." As a result thereof, we performed an evaluation to determine, in accordance with SFAS No. 121, whether future cash flows (undiscounted and without interest charges) expected to result from the use and eventual disposition of these aircraft would be less than the aggregate carrying amounts of these aircraft and the related assets. As a result of the evaluation, we determined that the estimated future cash flows expected to be generated by these aircraft would be less than their carrying amount, and therefore these aircraft were impaired as defined by SFAS No. 121. Consequently, the original cost basis of the DC-9-50 aircraft and related items which we owned or leased under capital leases was reduced to reflect their fair market value of \$11.6 million as of December 31, 1999. In determining the fair market value of these assets, we considered recent transactions involving sales of similar aircraft and market trends in aircraft dispositions. The evaluation performed under the guidelines of SFAS No. 121 resulted in a \$47.0 million pre-tax, non-cash impairment loss being recorded in fourth quarter 1999. The loss is recorded as an impairment loss under operating expenses on the Statement of Operations. On March 2, 2000, we announced that our board of directors had approved this purchase.

Cumulative Effect of Change in Accounting Principle. Under our HawaiianMiles frequent flyer program, we sell mileage credits to participating partners such as hotels, car rental agencies and credit card companies. During 1999, we changed our method of accounting for the sale of these mileage credits in accordance with the SEC's Staff Accounting Bulletin No. 101, "Revenue Recognition in Financial Statements". This change, applied retroactively to January 1, 1999, totaled approximately \$772,000, net of income tax benefit of approximately \$515,000 and is reflected as a cumulative effect of change in accounting principle in the accompanying statements of operations. Under the new accounting method, revenue from the sale of mileage credits is deferred and recognized when transportation is provided. Previously, the resulting revenue was recorded in the period in which the credits were sold. We believe the new method is preferable as it results in a better matching of revenues with the period in which services are provided.

Liquidity and Capital Resources

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

Our cash and cash equivalents totaled \$102.9 million at December 31, 2001. In addition to the cash and cash equivalents, we had restricted cash of \$26.9 million at December 31, 2001. Restricted cash includes \$26.3 million in escrow deposits held by a credit card processor and a \$0.6 million deposit securing outstanding letters of credit. We also had \$0.2 million available under our revolving credit facility with CIT (the "Credit Facility").

For the year ended December 31, 2001, cash flows from operating activities provided \$56.8 million, of which approximately \$35.7 million was generated through increases in advance ticket sales. Our operating cash flow reflects our net earnings for the year including approximately \$24.9 million received

26

from the federal government under the Stabilization Act, offset by an increase in restricted cash withheld by a credit card processor of \$26.3 million. Also, under the Stabilization Act, we deferred approximately \$10.0 million in federal transportation taxes, which was subsequently paid in January 2002.

For the year ended December 31, 2001, our investing activities used \$8.5 million of cash. Our principal cash outflow from investing activities was \$21.4 million for the acquisition and improvements of our new Boeing 717-200 aircraft delivered in 2001. Our cash inflow from investing activities was approximately \$12.9 million received from the sale-leaseback of two DC-10 aircraft.

For the year ended December 31, 2001, financing activities used \$13.3 million in cash. Our primary cash outflow from financing activities included \$7.1 million used in the early payoff of long-term notes that were secured by the two DC-10 aircraft involved in the sale-leaseback transaction and \$4.6 million in principal repayments on our Credit Facility.

After adjusting for federal financial assistance and deferred federal transportation taxes, we did not generate positive cash flow during the quarter ended December 31, 2001. Excluding approximately \$22.3 million of federal financial assistance recorded during the fourth quarter of 2001, we experienced operating losses of \$22.4 million during the quarter ended December 31, 2001, as compared to operating losses of \$17.9 million during the quarter ended December 31, 2000. During the quarter ended December 31, 2000, we recorded restructuring charges of \$2.1 million and a loss on assets held for sale of \$7.6 million. Excluding these one-time charges, the operating loss for the fourth quarter ended 2000 would have been \$8.2 million.

We have also incurred significant additional expenses since September 11, 2001. During the quarter ended December 31, 2001, we experienced increased security costs that we expect to continue to incur for an indefinite period of time. Also, the cost of our aviation insurance program has increased at the annual rate of approximately \$9 million commencing in the fourth quarter of 2001. However, our costs for fuel decreased as a result of reduced fuel consumption resulting from the significant reduction in capacity and the introduction of more fuel efficient new aircraft in the quarter ended December 31, 2001.

Although our current average daily cash flow from operations has improved to some extent since September 11, 2001, our negative daily cash flow from operations, excluding the impact of federal financial assistance and deferred federal transportation taxes, was between \$75,000 and \$100,000 during the quarter ended December 31, 2001. Based on the current trends we cannot determine at this time the continuing effects of the September 11, 2001 terrorist attacks and the resulting impact on our future profitability.

27

Debt Covenants. We had aggregate loans and letters of credit outstanding under the Credit Facility of \$2.5 million and \$1.0 million, respectively, at December 31, 2001. We made principal repayments of approximately \$4.6 million in the fourth quarter of 2001. The maximum credit under the Credit Facility was reduced from \$4.1 million to \$2.7 million and the final maturity of this facility has been extended to April 30, 2002. Interest accrues on the amounts outstanding at prime (4.75% at December 31, 2001) plus 2.0%.

The Credit Facility is secured by a first lien on substantially all of our property, excluding our owned and leased aircraft, our aircraft engines while installed on aircraft and specified security deposits. In addition, we are restricted from paying any cash or stock dividends on our common stock under the terms of the Credit Facility, and are required to maintain a minimum net worth and comply with other specified covenants.

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

On January 10, 2002, we received a "notice of acceleration" from one of our lenders with respect to a loan in the amount of approximately \$2.3 million. The lender claims that a default exists under the loan because of a late payment made by Hawaiian two days after the applicable cure period. The loan is secured by a DC-9-50 aircraft that has been retired from service. We are exploring our options with respect to the alleged default. In addition to making the late payment of \$70,000, we continued, and intend to continue, to make our monthly payments of \$70,000 under the loan. We reclassified the loan as a current obligation for financial statement purposes as of December 31, 2001.

The acceleration of the loan resulted in a cross default under our Credit Facility, which has been waived. In addition, the Credit Facility requires us to maintain a minimum net worth. We notified CIT of a default under this financial covenant, which also has been waived. In connection with the waivers, CIT extended the final maturity of the Credit Facility to April 30, 2002 and reduced the amount available under the Credit Facility from \$4.1 million to \$2.7 million.

Available Sources of Funds. We have been able to generate sufficient funds from operations to meet our working capital requirements. Other than the Credit Facility, we do not currently have any lines of credit or specific sources of long-term financing. Under the Stabilization Act, we are eligible for loan guarantees, subject to federal guidelines. We cannot guarantee, however, that we will seek or be able to obtain any commercial financing or federal loan guarantees under the Stabilization Act. We also anticipate other sources for credit which may be obtained through the pledging of our unencumbered assets. We estimate that if needed, these alternative methods of financing may be available. We believe that our (i) available cash and cash equivalents, (ii) cash flow from operations and (iii) leasing arrangements will be sufficient to meet our contractual cash obligations for at least the next 12 months.

Aircraft and Other Commitments. In 2001, we entered commitments to take delivery of 16 Boeing 767-300 aircraft. We took delivery of three in the fourth quarter of 2001. As of December 31, 2001, we had commitments for the additional 13 Boeing 767-300 aircraft to be delivered in 2002 and 2003. These aircraft are expected to replace our entire DC-10 fleet on our transpacific and south pacific routes. In addition to the delivery of the Boeing 767-300 aircraft, we will take delivery of two Pratt & Whitney spare aircraft engines in September 2002 and one in March 2003. Our current aircraft, engines, and ground service equipment are financed under operating leases and we have entered into operating leases for the 2002 and 2003 Boeing 767-300 aircraft deliveries. We lease our corporate headquarters and ticket and sales offices in the locations we serve. The following table summarizes the

28

effect these significant obligations are expected to have on our cash flow in future periods (in thousands):

Contractual Obligations	Payments Due by Period (in thousands)				
	Total	Less Than 1 Year	1-3 Years	4-5 Years	After 5 Years
Long-Term Debt	7,905	4,252	2,883	770	
Capital Lease Obligations	6,086	1,889	2,393	726	1,078
Operating Leases Aircraft and Related	851,228	77,567(a)	124,996	109,748	538,917
Operating Leases Non-Aircraft	37,149	3,212	6,389	6,122	21,426
Aircraft Commitments	1,312,239	25,545	163,812	168,192	954,690
Total Contractual Cash Obligations	2,214,607	112,465	300,473	285,558	1,516,111

(a) Includes \$20 million for advance rents paid prior to December 31, 2001 related to B717 operating leases.

We estimate that our capital expenditures for the year 2002 are anticipated to be approximately \$15.5 million. Approximately \$8.7 million is related to aircraft improvements and modifications, mainly for 767 aircraft, and \$2.8 million is for improvements in software and related hardware. The remaining \$4.0 million represents facility improvements, purchase of ground equipment and other assets.

Working Capital. As is common in the airline industry, we operate with negative working capital, which was \$70.0 million at December 31, 2001. This position is primarily attributable to \$110.6 million in air traffic liability for advance ticket sales. We expect to meet our obligations as they become due through available cash and cash equivalents and cash flow from operations. The existence of such a deficit has

not impaired and is not expected to impair our ability to meet our obligations as they become due.

Stock and Warrant Repurchases. In March 2000, our Board of Directors approved a stock repurchase program authorizing the repurchase of up to 5 million shares of our common stock from time to time. In August 2000, the Board of Directors increased the authorization to 10 million shares. Including the effect of the repurchase of certain warrants and stock repurchased in 2000, the total number of shares of common stock repurchased under the stock repurchase program amounted to 9,333,508 as of December 31, 2001. In March 2002, our Board of Directors approved a stock repurchase program authorizing the repurchase of up to 5 million shares of our common stock from time to time in the open market or privately negotiated transactions, to be implemented in the event that the proposed merger is formally terminated.

Deferred Tax Assets

As of December 31, 2001, we had net deferred tax assets aggregating \$5.9 million based on gross deferred tax assets of \$62.9 million less a valuation allowance of \$54.1 million and deferred tax liabilities of \$2.9 million. As of December 31, 2000, we had net deferred tax assets aggregating \$15.7 million based on gross deferred tax assets of \$56.4 million less a valuation allowance of \$28.6 million and deferred tax liabilities of \$12.1 million. Utilization of these deferred tax assets is predicated on Hawaiian being profitable in future years. We will continually assess the adequacy of its financial performance in determination of its valuation allowance which, should there be an adjustment required, may result in an adverse effect on its income tax provision.

Derivative Financial Instruments

We utilize heating oil forward contracts to manage market risks and hedge our financial exposure to fluctuations in our aircraft fuel costs. We employ a strategy whereby heating oil contracts may be

29

used to hedge up to 50% of our anticipated aircraft fuel needs. The contracts are exchange traded with counterparties of high credit quality. Therefore, the risk of nonperformance by the counterparties is considered to be small.

As of January 1, 2001, we adopted Financial Accounting Standards Board Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Instruments and Hedging Activities," which establishes accounting and reporting standards for derivative instruments and hedging activities. SFAS No. 133 requires an entity to recognize all derivatives as either assets or liabilities in the statement of financial position and measure those instruments at fair value. We measure fair value of our derivatives based on quoted market prices. Derivatives that are not hedges must be adjusted to fair value through income. If the derivative is a hedge, depending on the nature of the hedge, changes in the fair value of the derivatives will be either offset against the change in the fair value of the hedged assets, liabilities, or firm commitments through earnings or recognized in other comprehensive income until the hedged item is recognized in earnings. The ineffective portion of a derivative's change in fair value will be immediately recognized in earnings.

We are required to account for our fuel-hedging program under SFAS No. 133. For the year ended December 31, 2001, realized net losses on liquidated contracts of \$1.7 million are included as a component of aircraft fuel cost. Based upon our derivative positions, realized losses of \$1.2 million, net of taxes of \$0.5 million, and unrealized losses of \$3.5 million have been recognized as other comprehensive losses on the balance sheet as of December 31, 2001 related to hedging instruments included in the assessment of hedge effectiveness. We expect to reclassify losses on derivative instruments from accumulated other comprehensive losses to operations during the next twelve months when the hedged fuel expenses are recognized. A realized net gain on liquidated contracts amounting to \$11.7 million is included as a component of aircraft fuel cost for the year ended December 31, 2000.

Landing Fees and Ticket Taxes

On September 1, 1999, landing fees at all airports in the State of Hawaii were reinstated after a two-year moratorium. After September 11, 2001, the State of Hawaii suspended collection of landing fees at all airports in Hawaii. We paid approximately \$4.8 million and \$7.1 million in landing fees for all airports in the State of Hawaii for the years ended December 31, 2001 and 2000, respectively. The State of Hawaii has announced that landing fees will be reinstated, effective April 1, 2002.

In 1997, legislation was enacted to, among other things, gradually reduce the federal passenger excise tax from 10% to 7.5% and phase-in a \$3.00 "head tax" per domestic flight segment by the year 2002. On October 1, 1999, the passenger excise tax decreased from 8% to 7.5%, with a corresponding increase in the "head tax" from \$2.00 to \$2.25 per domestic flight segment. The "head tax" has increased incrementally over the past three years, with corresponding decreases in the excise tax. As of January 1, 2002 the excise tax was 7.5% and the head tax was \$3.00 per domestic flight segment. The federal passenger excise tax is exempt for the pro-rata portion of the ticket price flown over international waters.

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

Under the Security Act, a new \$2.50 per enplanement ticket fee (up to a maximum of \$5.00 per one-way trip) took effect on February 1, 2002. The Security Act also imposes additional fees on air carriers.

Frequent Flyer Program

Refer to *Business, Frequent Flyer Program* contained in Part I, Item 1 of this Form 10-K for discussion on our frequent flyer program.

As of December 31, 2001 and 2000, HawaiianMiles members had accumulated approximately 6.9 and 5.1 billion miles, representing liabilities totaling approximately \$6.9 million and \$2.7 million, respectively. Our accruals assume full redemption of mileage points. During the years ended

30

December 31, 2001, 2000 and 1999, approximately 2.2, 2.1 and 1.7 billion award miles were redeemed, respectively.

We believe that the usage of free travel awards will not result in the displacement of revenue customers and, therefore, such usage will not materially affect our liquidity or operating results. The use of free travel awards is subject to review by Hawaiian, to limit the possibility of displacing revenue passengers. HawaiianMiles travel redemption accounted for approximately 3.4%, 4.0% and 4.8% of interisland traffic, 3.8% of transpacific traffic in 2001 and a negligible percentage of transpacific traffic in 2000 and 1999, and a negligible percentage of south pacific traffic in 2001, 2000 and 1999, respectively.

Critical Accounting Policies

The preparation of our financial statements in conformity with generally accepted accounting principles requires us to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. We believe our estimates and assumptions are reasonable; however, actual results and the timing of the recognition of such amounts could differ from those estimates. We believe that our critical accounting policies are limited to those described below. For a detailed discussion on the application of these and other accounting policies, see Note 3 in the notes to the financial statements.

Air Traffic Liability. Passenger ticket sales are initially recorded as a component of air traffic liability. Revenue derived from ticket sales is recognized at the time service is provided. However, due to various factors, including the complex pricing structure and interline agreements throughout the industry, certain amounts are recognized in revenue using estimates regarding both the timing of the revenue recognition and the amount of revenue to be recognized. These estimates are generally based upon the evaluation of historical trends and other methods to model the outcome of future events based on our historical experience. Due to the uncertainties surrounding the impact of the September 11, 2001 events on our business, historical trends may not be representative of future results.

Accounting for Long-Lived Assets. In accordance with SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of", we record impairment charges on long-lived assets used in operations when events and circumstances indicate that the assets may be impaired and the undiscounted cash flows estimated to be generated by those assets are less than the carrying amount of those assets. The net carrying value of assets not recoverable is reduced to fair value. Our estimates of fair value represent our best estimate based on industry trends and reference to market rates and transactions. See Note 8 to the financial statements for additional information regarding impairment and restructuring charges.

Frequent Flyer Accounting. We utilize a number of estimates in accounting for our frequent flyer program. Changes to the percentage of the amount of revenue deferred, deferred recognition period, cost per mile estimates or the minimum award level accrued could have a significant impact on our revenues or incremental cost accrual in the year of the change as well as in future years. In addition, the Emerging Issues Task Force of the Financial Accounting Standards Board is currently reviewing the accounting for both multiple-deliverable revenue arrangements and volume-based sales incentive offers, but has not yet reached a consensus that would apply to programs such as ours. The issuance of new accounting standards could have a significant impact on our liability in the year of change as well as in future years.

Pension and Other Postretirement Benefits. Our pension and other postretirement benefit costs and liabilities are calculated using various actuarial assumptions and methodologies prescribed under SFAS No. 87, "Employers' Accounting for Pensions" and SFAS No. 106, "Employers' Accounting for

31

Postretirement Benefits Other Than Pensions." We utilize certain assumptions including, but not limited to, the selection of the discount rate, expected return on plan assets and expected health care cost trend rate. The discount rate assumption is based upon the review of high quality corporate bond rates and the change in these rates during the year. The expected return on plan assets and health care cost trend rates are based upon an evaluation of our historical trends and experience taking into account current and expected market conditions. In recent years, our accumulated benefit obligations have exceeded the fair value of plan assets (unfunded accumulated benefit obligations). The unfunded accumulated benefit obligation is the minimum pension liability that must be recognized on the balance sheet in accordance with SFAS No. 87. In addition to net pension liabilities already recorded, we recognized an additional amount (minimum pension liability) necessary to record the full amount of the minimum pension liability. Pursuant to SFAS No. 87, minimum pension liability adjustments were recognized through the accumulated other comprehensive loss account which decreased shareholders' equity. In connection with our pension liabilities, any decrease in the interest rate used to discount the accumulated benefit obligations to their present settlement amount will result directly in increased net pension liabilities and decreased shareholders' equity. A change in the discount rate could also have a material impact on future pension expense. See Note 10 to the financial statements for additional information regarding our pension and other postretirement benefits.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are subject to market risks related to aircraft fuel. Refer to *Business, Fuel* contained in Part I, Item 1 of this Form 10-K and *Derivative Financial Instruments*, as described above for further discussion on aircraft fuel and related financial instruments. An immediate ten percent increase or decrease in underlying fuel-related commodity prices from the December 31, 2001 prices would correspondingly change the fair value of the commodity derivative instruments in place by approximately \$2 million. Changes in the related commodity derivative instrument cash flows may change by more or less than this amount based upon further fluctuations in future prices as well as related income tax effects. The sensitivity analysis does not consider the effects that such adverse changes may have on overall economic activity nor does it consider additional actions management may take to mitigate our exposure to such changes. Actual results may differ.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

Our financial statements, accompanying notes, Report of Independent Auditors, Independent Auditors' Report and Selected Financial and Statistical Data are contained in this Annual Report on Form 10-K beginning on page F-1 and are incorporated herein by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS.

All of our directors are appointed in accordance with our by-laws, pursuant to which AIP has the right to nominate six directors, and each of the International Association of Machinists and Aerospace Workers, the Association of Flight Attendants and the Air Line Pilots Association, International has the right to nominate one director. In addition, the Hawaiian board is required to nominate one outside director and one director who is a senior management official of Hawaiian. AIP has agreed to vote its shares in favor of the nominees identified by the unions. In addition, our board is required to nominate one outside director (an individual not employed by us or affiliated with AIP or any of our unions), and one director who is a senior management official.

All officers are appointed annually by our board of directors at their first meeting after the annual meeting of shareholders at which the Hawaiian board is elected and at subsequent meetings of the Hawaiian board or as directed by our by-laws or as delegated by the Hawaiian board.

Information regarding the current directors and executive officers of Hawaiian is provided below:

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

John W. Adams, 58. Mr. Adams has been the Chairman of the Board of Directors of Hawaiian and of its Executive Committee since 1996. Since 1984, he has been the President of Smith Management LLC, a private investment firm. In February 2002, he became a member of the Board of Directors of Sun Healthcare Group, Inc., a health care company, and he also serves as Chairman of its Executive Committee. He was a member of the Board of Directors of Harvard Industries, Inc. from October 1994 until November 1998, and was Chairman of the Board and Chief Executive Officer of Harvard Industries from February 1997 until November 1998. Harvard Industries filed for protection under Chapter 11 under the Bankruptcy Code in May 1997 and emerged from Chapter 11 protection in November 1998. He served on the Board of Directors of Servico, Inc., a lodging ownership and management company, from April 1994 until August 1997, being Chairman of the Board from December 1995 until he resigned from the Board. Mr. Adams was Chairman of the Board of Directors of Regency Health Services, Inc., a healthcare services company, from July 1994 until October 1997.

Paul J. Casey, 56. Mr. Casey became Vice Chairman of the Board, Chief Executive Officer and President effective April 1, 2002. He was President and Chief Executive Officer of Hawaiian from April 14, 1997 until January 31, 2001 when he became Vice Chairman of the Board and Chief Executive Officer. He has also been Vice Chairman of the Executive Committee of Hawaiian since June 29, 1998. He was the President and Chief Executive Officer of the Hawaii Visitors and Convention Bureau from 1995 until March 1997. He is a director of Outrigger Hotels, Inc., a Hawaii-based company with hotel and resort properties throughout the Pacific area, and of Straub Foundation, a Hawaii-based health care system.

Todd G. Cole, 81. Mr. Cole has been a member of the Board of Directors since 1994. He spent 29 years in the airline industry, holding executive positions with Delta Air Lines, Inc. and with Eastern Airlines, Inc. before joining CIT Financial Corporation in 1969. At his retirement from CIT in 1986, he held the position of Chairman and Chief Executive Officer. He served as Managing Director of SH&E, Inc., a consulting firm specializing in aviation matters, from 1992 until 1995. He is President of Cole & Wilds Associates, Inc. and a director of Kaiser Ventures, Inc. and of several private companies. Mr. Cole is Chairman of Hawaiian's Audit Committee.

Robert G. Coo, 60. Mr. Coo has been a member of the Board of Directors of Hawaiian since 1996. He has been an independent consultant since 1995. From 1998 to 1999, he was Chief Financial Officer and Secretary of Camstar Systems, a developer of manufacturing execution system (MES) software. He was Vice President and Chief Financial Officer of Pengo Industries, Inc., from 1990 until 1995, a director of Regency Health Services, Inc., from 1991 to 1997 and of First National Bank, San Diego from 1995 to 1997. Mr. Coo is married to the sister of Mr. Adams.

33

Joseph P. Hoar, 67. Mr. Hoar has been a member of the Board of Directors of Hawaiian since 1999. He served in the Marine Corps for 37 years, retiring as a four-star general in 1994. His last active-duty assignment was Commander-in-Chief, U.S. Central Command. In 1994, he established a consulting firm, J.P. Hoar & Associates, that engages in international strategic planning and business development in the Middle East and Africa. He is a director of several nonprofit and privately owned corporations.

Reno F. Morella, 53. Mr. Morella has been a member of the Board of Directors of Hawaiian since 1996. He has been a pilot for Hawaiian since 1978. He is currently a Captain flying DC-10 aircraft. He was Chairman of the Hawaiian Master Executive Council of Air Line Pilots Association, International from 1994 until 1998. He was the First Officer Category Representative for Council 102 of Air Line Pilots Association, International from 1993 until 1994.

Samson Poomaihealani, 60. Mr. Poomaihealani has been a member of the Board of Directors of Hawaiian since 1990. He has been the Assistant General Chairman of the Airline Machinists District 141 of the IAM since 1987. He is a ramp serviceman for United Airlines, Inc.

Edward Z. Safady, 44. Mr. Safady has been a member of the Board of Directors of Hawaiian since 1996. He was President and Chief Executive Officer of Liberty National Bank in Austin, Texas from March 1988 to October 1995. He then joined Smith Management LLC as Vice President, where he served until the acquisition of Life Savings Bank (now known as Liberty Bank, SSB) in Austin, Texas in May 1997. He is currently Chairman of the Board, President and Chief Executive Officer of Liberty Bank, SSB.

Sharon L. Soper, 56. Ms. Soper has been a member of the Board of Directors of Hawaiian since 1998. She has been a flight attendant for Hawaiian since 1965. She has worked in both the interisland and international operations. She has been President of the AFA Master Executive Council since 1987.

Thomas J. Trzanowski, 63. Mr. Trzanowski has been a member of the Board of Directors of Hawaiian since 1998. He has served as President and Director of Spire Realty Group, Inc., Houston, Texas, a private property management company, since July 1989. He has also served as President and Director of Pengo Realty Group, Inc., New York, New York, a private real estate holding company engaged in real estate investments, since June 1994. Mr. Trzanowski also served as Treasurer of Smith Management LLC from November 1983 through

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

December 1994 and, from September of 1996 until September of 1999 as a Director of Inland Resources, Inc., in Denver, Colorado, a publicly traded oil and gas company. He currently serves as a Director of Liberty Bank, SSB.

William M. Weisfield, 60. Mr. Weisfield has been a member of the Board of Directors of Hawaiian since 2001. He has been a director of UTILX Corporation since January 1995, Chairman of the Board since January 1996 and President and Chief Executive Officer since November 1998. He was Senior Vice President of Benaroya Capital Company, a privately held investment company specializing in development of Pacific Northwest real estate and other investments, from January 1994 to December 1998. Mr. Weisfield is a director of Lindal Cedar Homes, Inc., Lifespan Biosciences, Inc. and the Downtown Seattle Association.

Information Regarding Current Officers:

Information on Mr. Adams and Mr. Casey is provided in the previous section.

Christine R. Deister, 52. Ms. Deister became Executive Vice President and Chief Financial Officer of Hawaiian in July 2001. Previously, she was Executive Vice President, Chief Financial Officer and Treasurer, from March 1, 2001 to July 10, 2001. Prior to joining Hawaiian, she had been employed with TWA for more than 30 years, most recently as Senior Vice President Finance and Treasurer.

H. Norman Davies, Jr., 65. Mr. Davies became Executive Vice President Operations effective April 1, 2002. He was Vice President Safety and Security since January 6, 1997 until March 31, 2002. He was Chief Pilot in New York for Delta from November 1991 until June 1996.

34

John B. Happ, 46. Mr. Happ has been Senior Vice President Marketing and Sales since December 1997. He served dual roles of Vice President Market Planning for LTU Airlines and Vice President Marketing for its subsidiary, Go America, from 1996 to 1997. From 1989 to 1996, he held various senior marketing and business development positions at Continental Airlines, Inc., including most recently Managing Director of the Newark Business Unit.

Ruthann S. Yamanaka, 48. Ms. Yamanaka has been Senior Vice President People Services Group since March 1998. She was Senior Vice President Assistant Director, Human Resources for Bank of Hawaii from July 1994 through February 1998 and Manager, Quality Assurance Administration from 1988 to 1994.

Lyn F. Anzai, 59. Ms. Anzai has been Vice President, General Counsel and Corporate Secretary since July 1997. She was Senior Counsel in the Corporate/Investment legal division of Kamehameha Schools Bishop Estate from November 1990 until July 1997.

Karen A. Berry, 45. Ms. Berry was appointed Vice President Finance and Treasurer effective June 1, 2001. She held the position of Director Financial and Business Analysis from 1990 until 1997, after which she held several senior positions within the finance and marketing divisions, most recently as Managing Director Finance.

Brian D. Hermansader, 60. Mr. Hermansader was appointed Vice President Maintenance and Engineering effective August 1, 2001. He held the position of Division Manager Modifications Operations with SRTechnics from 2000 to July 2001. From 1997 to 2000, he was the Director Quality Assurance with U. S. Technical and from 1996 to 1997 he was Vice President Maintenance and Engineering with Carnival Airlines.

Rolland F. Lawrence, 61. Mr. Lawrence was appointed Vice President Flight Operations on June 26, 2000. He has been a pilot with Hawaiian since 1966 and most recently served as a DC-10 Captain.

Blaine J. Miyasato, 38. Mr. Miyasato has been Vice President Customer Services since January 2000, after serving as Vice President In-Flight, Catering and Product Development from February 1999 to January 2000. From 1993 to 1998 he held various senior positions at Hawaiian including Senior Director In-Flight, Product Development and Catering.

Glenn G. Taniguchi, 59. Mr. Taniguchi has been Vice President Schedule Planning since 1998. He was Vice President Schedule Planning and Reservations from 1995 to 1998. He was Staff Vice President Schedule Planning and Reservations of Hawaiian from 1991 until 1995.

Section 16(a) Beneficial Ownership Reporting Compliance

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

Section 16 of the Securities Exchange Act of 1934 (the "Exchange Act") requires Hawaiian's directors and executive officers, and persons who own more than 10% of a registered class of Hawaiian's equity securities, to file with the Securities and Exchange Commission (the "SEC"), and with Hawaiian, initial reports of ownership and reports of changes in ownership of common stock and other equity securities of Hawaiian. Based upon the information supplied to it by such persons, Hawaiian is required to report in this document any known failure to file these reports within the specified period. To the knowledge of Hawaiian, based upon a review of the Section 16(a) reports furnished to Hawaiian and the written representations of Hawaiian's officers and directors, all these filing requirements were satisfied by Hawaiian's directors and executive officers for fiscal year 2001 with the exception of Reno F. Morella. Shares administratively distributed during 2001 to Mr. Morella's account held by Vanguard Fiduciary Trust Company, as Trustee, under the Hawaiian Airlines, Inc. Pilots' 401(k) Plan were inadvertently omitted from reporting. The required report was filed on February 13, 2002.

35

ITEM 11. EXECUTIVE COMPENSATION.

The following Summary Compensation Table sets forth certain information regarding compensation paid for the last three fiscal years to Hawaiian's "named executive officers," who are the chief executive officer and the four other most highly compensated executive officers of Hawaiian whose salary and bonus exceeded \$100,000 in the 2001 fiscal year, and up to two additional persons who would have been named executive officers but for the fact that they were not executive officers of Hawaiian at the end of the fiscal year ending on December 31, 2001.

Summary Compensation Table

Name and Principal Position	Year	Annual Compensation			Long Term Compensation
		Salary (\$)	Bonus (\$)	Other Annual Compensation (\$)(1)	Shares of Common Stock Underlying Options (#)
John W. Adams Chairman of the Board	2001	366,667			200,000
	2000	200,000			25,000
	1999	200,000			
Paul J. Casey Vice Chairman of the Board and Chief Executive Officer	2001	325,000		53,326(1)	
	2000	325,000		11,520(1)	300,000
	1999	316,666	80,000	12,364(1)	
Robert W. Zoller, Jr. President and Chief Operating Officer	2001	288,333			100,000
	2000	230,000			100,000
	1999	9,583(2)		36,035(3)	100,000
Christine R. Deister Executive Vice President and Chief Financial Officer	2001	197,917(2)	75,000	92,593(3)	200,000
	2000				
	1999				
John B. Happ Senior Vice President Marketing and Sales	2001	225,000			
	2000	225,000		35,620	100,000
	1999	220,000	35,000(3)		
John L. Garibaldi	2001			273,693(4)	
	2000	143,000		173,000(4)	
	1999	239,999	40,000		

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

- (1) On March 31, 1998, Hawaiian made a loan of \$28,500 to Mr. Casey. On each of March 31, 1999 and March 31, 2000, \$10,000 of that loan plus interest thereon was forgiven. On March 31, 2001, the remaining balance of \$8,500 and accrued interest thereon was forgiven. In addition, this amount for 2001 includes life insurance payments of \$13,396, fringe benefits of \$21,046, and a car allowance of \$9,600.
- (2) These salaries represent the amounts earned by the named executive officer when the named executive officer was employed by Hawaiian for less than an entire calendar year. Mr. Zoller's reported compensation for 1999 is for the period beginning December 1, 1999 through December 31, 1999. Ms. Deister's reported compensation for 2001 is for the period beginning March 1, 2001 through December 31, 2001.
- (3) Hawaiian provides various perquisites to its executives. Except as noted the value of such perquisites was in each case less than 10% of the named executive officer's total salary and bonus.

36

In 1999, Mr. Zoller received relocation expenses of \$14,435, a car allowance of \$9,600 and a housing allowance of \$12,000. In 2000, Mr. Happ received relocation expenses of \$19,126, a car allowance of \$9,600 and fringe benefits of \$6,894. In 2001, Ms. Deister received relocation expenses of \$60,560, a car allowance of \$7,200, housing allowance of \$3,000, and a dependent education allowance of \$21,833.

- (4) Mr. Garibaldi's employment with Hawaiian ended on July 14, 2000. Pursuant to the terms of a separation agreement with Mr. Garibaldi, payments of base salary and certain benefits were continued.

Option Grants in Last Fiscal Year

The following table sets forth information about the options granted to the named executive officers in fiscal year 2001 pursuant to the 1996 Stock Incentive Plan, as amended. During 2001, no options were granted pursuant to the 1994 Stock Option Plan.

Option Grants Last Fiscal Year

Name	Shares of Common Stock Underlying Options Granted (#)	% of Total Options Granted to Employees in Fiscal Year	Exercise Price (\$/Sh)	Expiration Date	Potential Realizable Value at Assumed Annual Rate of Stock Price Appreciation for Option Term(4)	
					5% (\$)	10% (\$)
John W. Adams	200,000	33.3%	\$ 2.40	02/23/11(1)	301,869	764,996
Robert W. Zoller, Jr.	100,000	16.7%	\$ 2.40	04/15/04(2)	150,935	382,498
Christine R. Deister	200,000	33.3%	\$ 2.46	03/01/11(3)	309,416	784,121

- (1) Options granted February 23, 2001; 100% vested on August 24, 2001.
- (2) Options granted February 23, 2001; pursuant to a Separation Agreement with Mr. Zoller, all of these options vested on April 15, 2002 and will expire on April 15, 2004.
- (3) Options granted March 1, 2001; 25% vest on each of the first four anniversaries of the grant date.
- (4)

There can be no assurance that the actual stock price will appreciate at the assumed 5% and 10% levels or at any other level.

Aggregated Option Exercises in Last Fiscal Year and Fiscal Year End Option Values

The following table sets forth for each of the named executive officers the (i) aggregated options exercised in the last fiscal year, (ii) the number of shares underlying unexercised options at 2001 fiscal year end and (iii) the 2001 fiscal year-end option values of unexercised in-the-money options.

Aggregated Option in Last Fiscal Year and Fiscal Year-End Option Value

Name	Shares Acquired on Exercise (#)	Value Realized (\$)	Number of Securities Underlying Unexercised Options at Fiscal Year-End (#)		Value of Unexercised In-the-Money Options at Fiscal Year-End \$(1)	
			Exercisable	Unexercisable	Exercisable	Unexercisable
John W. Adams			250,000		366,875	
Paul J. Casey			525,000	225,000	253,125	309,375
Robert W. Zoller, Jr.			100,000	200,000	171,250	320,000
Christine R. Deister			50,000	150,000	77,000	231,000
John B. Happ			175,000	75,000	109,375	103,125

(1)

The market price per share on December 31, 2001 was \$4.00 per share.

Compensation of Directors

During fiscal year 2001, nonemployee directors were each paid a \$12,000 annual retainer fee, prorated on a monthly basis. In addition to the \$12,000 annual retainer fee, nonemployee directors received a fee of \$1,250 for each meeting of the Board of Directors attended (decreased to \$625 for telephonic attendance) and a fee of \$500 for each committee meeting attended. The Company provided travel to and from Board meetings, as well as hotel accommodations, meals and ground transportation, as needed, for all directors. Mr. Adams, Mr. Casey, Mr. Morella and Ms. Soper, as employee directors, received only reimbursement for expenses incurred in attending meetings.

In addition to the Standing Board Committees, on October 29, 2001, the Board appointed the members of the Audit Committee to serve as a Special Committee to conduct an independent review of and to negotiate on behalf of the minority shareholders the terms of the merger agreement with Aloha Airgroup, Inc., TurnWorks Acquisition III, Inc. and TurnWorks, Inc. (the "Aloha/TW Merger"), under which the operations of Hawaiian and Aloha Airlines were to have been combined under a single holding entity. The Executive Committee authorized payment to the Special Committee of fees and reasonable business expenses as follows:

	Retainer	Monthly Retainer	In Person Meeting	Telephonic Meeting
Chairman	\$ 30,000	\$ 3,750	\$ 3,750	\$ 1,500
Members	20,000	2,500	2,500	1,000

The Special Committee met nine times during 2001 and earned the following fees for 2001 which were paid in January 2002: Mr. Cole \$59,250; Mr. Hoar \$38,500; and Mr. Weisfield \$39,500. The Committee continued through March 2002 and held one meeting in 2002. Fees for 2002 were paid as follows: Mr. Cole \$20,250; Mr. Hoar \$8,500; and Mr. Weisfield \$8,500.

Nonemployee directors of Hawaiian are eligible to receive stock options under the terms of the 1996 Nonemployee Director Stock Option Plan. At its discretion, the Compensation Committee of the Board of Directors, acting pursuant to said Plan, can grant stock options to nonemployee directors under the terms of the plan. During 2001, no options were granted to nonemployee directors pursuant to the 1996 Nonemployee Directors Stock Option Plan.

Employment Contracts: Termination of Employment and Change-in-Control Arrangements

Hawaiian has entered into employment contracts with each of the named executive officers other than Mr. Adams. Except as described below, the agreements for the named executive officers, as amended to date, have substantially the same terms.

Each of the agreements specifies the officer's title and general duties and provides for a specified term of employment, which term varies as set forth in the table below and rolls forward on a monthly basis; i.e., on the first day of each month, the term of the agreement is extended for an additional month unless either party has given written notice to the other party that it does not wish the term to be extended. Each agreement sets forth (a) the officer's base salary (which is subject to annual review and may be increased in the sole discretion of the Board of Directors or as the Board has designated), (b) the amount of any "signing bonus" or other special benefits, (c) the eligibility of the officer to receive annual performance bonuses in the sole discretion of the compensation committee and/or the Hawaiian board of directors, (d) the right of the officer to participate in fringe benefit programs and benefit plans (such as stock option, pension, disability and life insurance and medical coverages) in accordance with the terms of those programs and benefits, (e) the right of the officer, and the officer's spouse and dependents, to travel benefits on Hawaiian flights, (f) the right of the officer to be included in Hawaiian's executive long-term disability insurance plan, (g) the right of the officer to be reimbursed for business expenses in accordance with Hawaiian policies, (h) the right of the officer to receive an automobile allowance, a housing allowance, and reimbursement for club dues (which rights vary among the named executive officers with employment contracts) and (i) the obligations of the officer to maintain the confidentiality of Hawaiian's information.

Certain of the contractual provisions that vary in the employment contracts of the four named executive officers are shown in the following table:

Name	Effective Date of Contract	Term (Mos.)	Base Salary (\$)	Initial Bonus (\$)	Special Other Features (\$)	Signing Options
Paul J. Casey	04/14/97	36	325,000(1)	70,000		150,000
Robert W. Zoller, Jr.(2)	12/01/99	24(3)	300,000(4)			100,000
Christine R. Deister	03/01/01	12(5)	250,000	75,000	80,000(6)(7)	200,000
John B. Happ	12/15/97	18	225,000		50,000(7)	

- (1) Mr. Casey's base salary was increased to \$375,000 as of February 1, 2002.
- (2) Mr. Zoller was no longer employed with Hawaiian as of April 15, 2002.
- (3) The term of Mr. Zoller's employment agreement increased from 12 months to 24 months on December 1, 2001, the second anniversary of the effective date of his employment agreement.
- (4) Mr. Zoller's base salary was increased from \$230,000 to \$300,000 effective as of January 31, 2001.
- (5) The term of Ms. Deister's employment agreement will increase to 24 months on the second anniversary of the effective date of her employment agreement and will increase to 18 months upon a change of control before the second anniversary of the effective date.
- (6) Lump sum payment of \$30,000 towards temporary living expenses.
- (7) Relocation allowance up to \$50,000.

There are also certain differences in the termination provisions in the employment agreements of the named executive officers. All of the agreements provide for termination (a) immediately upon the officer's death, (b) at Hawaiian's election, if the officer is unable to perform his or her duties as a result of a medical or physical incapacity for 120 days in any consecutive 7-month period, (c) at any

time by Hawaiian for "cause" (as defined in the agreements) and (d) at any time by Hawaiian without cause. In addition, the employment agreements with Mr. Casey, Mr. Zoller and Ms. Deister provide that they may be terminated by the officer for "good reason" (which includes certain transactions that involve changes in control, a material change in the officer's duties, a material breach by Hawaiian of the agreement, the failure by Hawaiian to provide incentive compensation and benefit plans comparable to those in effect at the time the agreement was entered into and the relocation of Hawaiian's principal executive offices outside the Honolulu area). If the officer's employment is terminated by death or by reason of disability, the officer (or his or her beneficiaries) is entitled to benefits in accordance with Hawaiian's retirement, insurance and other programs and plans then in effect. If the officer's employment is terminated (a) by act of Hawaiian other than for cause, or (b) in the case of Mr. Casey, Mr. Zoller and Ms. Deister, by such officer for good reason, then such officer is entitled to receive: (1) any base salary accrued but unpaid prior to the termination date and (2) the continued payment of the officer's base salary and fringe benefits for a period after the termination date that is equal to the term of the officer's employment agreement as discussed above.

Finally, the agreements provide that an officer terminated for cause is not entitled to continuation of such officer's base salary or other benefits after the termination date.

On June 30, 2000, the compensation committee of Hawaiian's Board authorized amendments of employment agreements with and certain agreements granting options to, certain of the officers to provide that, for those of the specified officers who continued to be employed by the Company, in the event a change of control in ownership of Hawaiian occurs before June 30, 2003, (a) all stock options granted to such officers prior to and on June 30, 2000 would accelerate and become fully vested and (b) the exercise price of any unexercised options previously granted to such officers and having a higher exercise price than the market price of the stock on June 30, 2000 would then be "reset" to the market price on June 30, 2000.

As of January 31, 2001, the employment agreement for Mr. Casey was amended to change his title and responsibilities.

We entered into a release and separation agreement with John L. Garibaldi, which became effective on July 14, 2000. Under this agreement, we are obligated to pay Mr. Garibaldi his former base salary of \$245,000 per year plus the average of his three previous annual performance bonuses, or \$13,333.34, in semi-monthly installments until July 14, 2002, and to provide specified fringe benefits to Mr. Garibaldi through July 14, 2002. In addition, we agreed to extend the deadline for his ability to exercise his options to acquire 300,000 shares of our common stock until July 14, 2006 and to accelerate the vesting of options to acquire 200,000 of these shares. We also agreed to pay Mr. Garibaldi a lump sum cash payment of \$65,440 and to forgive the interest on a promissory note in the principal amount of \$192,258.44 executed by Mr. Garibaldi upon the occurrence of certain specified conditions. In consideration, Mr. Garibaldi agreed to release us from any claims that he might have had arising out of his employment with or separation from us.

We entered into a severance, general release and indemnity agreement with Robert W. Zoller, Jr., which became effective on April 15, 2002. Under this agreement, we are obligated to pay Mr. Zoller his former base salary of \$300,000 per year in semi-monthly installments until April 20, 2004, and to provide specified fringe benefits to Mr. Zoller through April 15, 2006. We also agreed to pay Mr. Zoller a lump sum cash payment of \$145,500 and up to an additional \$60,000 upon the occurrence of certain specified events. In addition, the agreement provides that his options to acquire 300,000 shares of our common stock would be fully vested on April 15, 2002 and that these options would terminate on April 15, 2004. In consideration, Mr. Zoller agreed to release us from any claims that he might have had arising out of his employment with us, but did not release any claims that may arise from or that are related to this agreement, and agreed that until April 14, 2003, he would not generally be involved in any entity that competes with us in providing interisland passenger or freight services.

Compensation Committee Report

Strategy and Objectives for Executive Compensation

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

The Compensation Committee of the board of directors of Hawaiian is charged with making compensation recommendations to the full board of directors for Hawaiian's executive officers at the vice president level and above, along with recommendations for bonuses, deferred compensation and stock option plans. The Compensation Committee also has authority to grant awards under and to administer the 1994 Stock Option Plan and the 1996 Stock Incentive Plan, as amended.

In determining executive compensation, the Committee reviews such general factors as profitability, operational integrity and customer satisfaction, and takes into consideration the executives' accomplishment of specific projects, which for the executive officers in 2001 included induction of two new aircraft types (Boeing 717-200s replacing DC-9-51s for the interisland fleet and Boeing 767-300ERs replacing DC-10 aircraft for the transpacific and south pacific routes), renegotiation of the collective bargaining agreements with Hawaiian's major unions, and response to the events of September 11, 2001 and the resulting operational and security requirements affecting the entire industry.

Principal Components of Executive Compensation

Components of executive compensation include annual base salary, specific contract provisions that vary per officer (including term, benefits and fringes), incentive bonuses, and grants of options under Hawaiian's option plans. The annual base salary for an executive officer is generally negotiated at the beginning of employment and reviewed on a regular basis in comparison to industry compensation levels, the need to attract talented executives to Hawaii and the performance objectives listed in the previous section. The award of bonuses is generally related to achievement of performance objectives. The grant of options is generally incentive based related to individual performance and to the profitability of Hawaiian. Stock option awards for 2001 were in recognition of newly assumed executive positions and responsibilities for Mr. Adams, Mr. Zoller and Ms. Deister, as reported elsewhere herein.

As described under the caption " Employment Contracts; Termination of Employment and Change-in-Control Arrangements," the named executive officers except for Mr. Adams have employment contracts with Hawaiian which set forth their base salaries and other compensation arrangements and provide that their compensation levels are subject to annual review and possible increases in the sole discretion of the board of directors of Hawaiian.

Compensation of Chief Executive Officer

Mr. Casey's compensation determination for 2001 included the review of several factors, including Mr. Casey's leadership as Hawaiian negotiated its collective bargaining agreements, inducted new aircraft and expanded to new routes. However, Hawaiian's expansion efforts and profitability were greatly affected by the events of September 11, 2001 and their subsequent effect on the air transportation industry. In response to these events, Mr. Casey and executive management took immediate measures to curtail losses, reduce routes and review expansion and other plans, including negotiation of a merger transaction which was projected to provide long-term benefits to Hawaiian. Mr. Casey and executive management were not awarded bonuses or granted stock options for 2001 but Mr. Casey's performance was recognized by an increase in his base salary to \$375,000 effective February 1, 2002.

2001/2002 Actions of the Compensation Committee

On December 21, 2000, the Compensation Committee reviewed the background and credentials of Christine R. Deister for the position of executive vice president, chief financial officer and treasurer and approved, effective March 1, 2001, compensation for Ms. Deister, including a base salary of

\$250,000, a rolling 12-month contract which will increase to 24 months after two years and other benefits. In addition, the Compensation Committee authorized the grant to Ms. Deister of options to purchase 200,000 shares of Hawaiian common stock on the first day of employment at an exercise price equal to the market value on said date.

On January 31, 2001, by action of the board of directors of Hawaiian, Mr. Casey was named vice chairman and chief executive officer and Mr. Zoller was named president and chief operating officer. On February 23, 2001, the Compensation Committee authorized an increase in base salary for Mr. Zoller from \$230,000 to \$300,000 effective January 31, 2001 and granted to Mr. Zoller options to purchase 100,000 shares of Hawaiian common stock at the market price on said date. Further, the Compensation Committee authorized an increase in Mr. Adams' annual base salary from \$200,000 to \$400,000 effective January 31, 2001 and recommended to the board that the board grant to Mr. Adams options to purchase 200,000 shares of Hawaiian common stock at the market price on said date of grant, which was February 23, 2001.

On February 25, 2002, the Compensation Committee acknowledged that Hawaiian's review of officer compensation had been interrupted by the proposed Merger involving Aloha Airgroup, Inc. and TurnWorks, Inc. and granted amendments to certain officers' employment

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

agreement and stock option grants with respect to compensation and benefits and the treatment of options previously granted to officers in the event the proposed merger was consummated, including an increase of \$50,000 to Mr. Casey's base annual salary, which was increased to \$375,000 annually, effective February 1, 2002.

On March 28, 2002, the Compensation Committee approved a salary of \$200,000 per year for H. Norman Davies, Jr., who was appointed executive vice president operations upon Mr. Zoller's separation from Hawaiian.

On April 26, 2002, in recognition of the active role of Mr. Adams in executive management, the Compensation Committee approved an increase in Mr. Adams' base salary to \$600,000 per year, effective May 1, 2002.

Submitted by the Compensation Committee
Edward Z. Safady, Chairperson
Reno F. Morella
Thomas J. Trzanowski

The above report of the Compensation Committee will not be deemed to be incorporated by reference into any filing by Hawaiian under the Securities Act or the Securities Exchange Act, except to the extent that Hawaiian specifically incorporates the same by reference, nor shall it be deemed to be "soliciting material" or to be "filed" with the SEC or subject to Regulations 14A or 14C or to the liabilities of Section 18 of the Exchange Act.

Compensation Committee Interlocks and Insider Participation

Arthur J. Pamas, Reno F. Morella and Thomas J. Trzanowski served on the Compensation Committee from January 2001 until May 25, 2001, after which date Edward Z. Safady replaced Mr. Pamas on the Compensation Committee. No other member of Hawaiian's Board of Directors or other person served on the Compensation Committee during the 2001 fiscal year. Except for Mr. Morella, who is an employee of Hawaiian, no member of the Compensation Committee is (or was during the 2001 fiscal year) a current or former officer or employee of Hawaiian and no executive officer of Hawaiian is (or was during the 2001 fiscal year) a member of the Board or Compensation (or equivalent) Committee of any corporation of which a member of the Hawaiian's Compensation Committee is (or was during the 2001 fiscal year) an executive officer.

42

Stock Performance Graph

The following graph compares cumulative total shareholder return of Hawaiian, the S&P 500 Index and our selected peer issuer index from December 31, 1996 to December 31, 2001. The peer issuers we have selected are AirTran Holdings Inc. (formerly ValuJet Inc.), Alaska Airgroup Inc., America West Holding Corporation, Amtran, Inc., Atlantic Coast Airlines, Inc., Great Lakes Aviation Ltd., Mesa Air Group, Inc. and Southwest Airlines. The comparison assumes \$100 was invested on December 31, 1996 in our common stock and each of the foregoing indices and assumes reinvestment of dividends before consideration of income taxes. We have paid no dividends on our common stock.

The stock performance depicted in the graph above is not to be relied upon as indicative of future performance. The Stock Performance Graph shall not be deemed to be incorporated by reference into any filing by Hawaiian under the Securities Act or the Exchange Act, except to the extent that Hawaiian specifically incorporates the same by reference, nor shall it be deemed to be "soliciting material" or to be "filed" with the SEC or subject to Regulations 14A or 14C or to the liabilities of Section 18 of the Exchange Act.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT.

The following table sets forth the beneficial ownership, both direct and indirect, reported to Hawaiian as of April 19, 2002, of Hawaiian common stock and Hawaiian special preferred stock, including shares as to which a right to acquire ownership within 60 days of such date exists (for example, through the exercise of stock options). The following table presents for Hawaiian for 2001 (a) beneficial owners of more than 5% of Hawaiian common stock and Hawaiian special preferred stock, (b) securities ownership by each director, the chief executive officer, the four other most highly compensated executive officers and (c) securities ownership for the group comprised of all directors and executive officers of Hawaiian. Hawaiian knows of no persons other than those identified below

43

who owned beneficially more than 5% of the outstanding shares of Hawaiian common stock as of April 19, 2002.

The address of each of the directors and executive officers listed above is c/o Hawaiian Airlines, Inc., 3375 Koapaka Street, Suite G350, Honolulu, Hawaii 96819.

(2)

Each executive officer and director has sole voting and investment power with respect to the shares listed after his or her name except for shares issued to the Hawaiian Airlines, Inc. 401(k) Savings Plan (the "Savings Plan"), the Hawaiian Airlines, Inc. 401(k) Plan for Flight Attendants (the "Flight Attendants 401(k) Plan") and the Hawaiian Airlines, Inc. Pilots' 401(k) Plan (the "Pilots' Plan") or as otherwise indicated in the footnotes that follow. (The Savings Plan, the Flight Attendants 401(k) Plan and the Pilots' Plan are

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

collectively referred to as the "Plans".) Shares of the Common Stock allocated to participants' accounts in each of the

44

Plans are voted on matters presented at shareholders meetings by the Vanguard Group, Inc. as Trustee for each of the respective Plans ("Trustee"), pursuant to written directions of the participants. Shares held by each Plan with respect to which no participant directions are received are voted according to the direction of the majority of the shares held by each of the Plans for which the Trustee receives written directions. Unallocated shares are voted by fiduciaries designated by the respective Plans.

- (3) According to an amendment to their Schedule 13D filing with the Securities and Exchange Commission on April 25, 2002, Airline Investors Partnership, L.P., AIP General Partner, Inc. and John W. Adams exercise sole voting and dispositive power with respect to 18,181,818 shares of Common Stock and all four shares of Series B Special Preferred Stock. Mr. Adams exercises sole dispositive power over an additional 280,825 shares of Common Stock, which includes options to purchase 250,000 shares of Common Stock. Mr. Adams is the sole shareholder of AIP General Partner, Inc. and AIP General Partner, Inc. is the general partner of Airline Investors Partnership, L.P.
- (4) On May 14, 1998, Amber Arbitrage LDC ("Amber") filed a Schedule 13G with the Securities and Exchange Commission in respect of ownership of an aggregate of 4,667,672 shares of Common Stock. Amber reported sole voting power and sole dispositive power with respect to all such shares. No subsequent filing has been made by Amber.
- (5) Dimensional Fund Advisors, Inc. ("Dimensional"), an investment advisor registered under Section 203 of the Investment Advisors Act of 1940, furnishes investment advice to four investment companies registered under the Investment Company Act of 1940 and serves as investment manager to certain other investment vehicles, including commingled group trusts. (These investment companies and investment vehicles are the "Portfolios"). In its role as investment advisor and investment manager, Dimensional possessed both investment and voting power over 3,221,100 shares of Hawaiian Airlines stock as of December 31, 2001. The Portfolios own all securities reported in this statement, and Dimensional disclaims beneficial ownership of such securities.
- (6) On February 14, 2002, Vanguard Fiduciary Trust Company, as trustee of Hawaiian Airlines, Inc. 401(k) Savings Plan, Hawaiian Airlines, Inc. Pilots' 401(k) Plan, and Hawaiian Airlines, Inc. 401(k) Plan for Flight Attendants (the "Plans") filed a Schedule 13G with the Securities and Exchange Commission with respect to 1,771,604 shares, or 5.14%, of Hawaiian Airlines Common Stock held as of December 31, 2001. Shares of Common Stock are held in trust for the benefit employees participating in the Plans. Vanguard Fiduciary Trust Company disclaims beneficial ownership of all shares that have been allocated to the individual accounts of Plan participants for which voting directions have been received.
- (7) Includes options to purchase 525,000 shares of Common Stock that have vested or will vest within 60 days of April 19, 2002, but not options to purchase 225,000 shares that will not vest within 60 days after April 19, 2002.
- (8) Includes options to purchase 24,000 shares of Common Stock.
- (9) Includes 6,411 shares issued to Mr. Morella's account in the Pilots' Plan.
- (10) Includes an investment in the Flight Attendants 401(k) Plan, the Pilots' Plan or Savings Plan using a unit value accounting method, similar to a mutual fund. To determine the equivalent number of whole shares represented by the fund units, the market value of the shareholder's balance in the Pilots' Plan, the Flight Attendants 401(k) Plan, or the Savings Plan was divided by the share price of Hawaiian's Common Stock.
- (11) Includes 1,000 shares beneficially owned by Mr. Trzanowski's wife. Mr. Trzanowski disclaims beneficial ownership of the shares owned by his wife.
- (12)

Edgar Filing: HAWAIIAN AIRLINES INC/HI - Form 10-K/A

Consists of options to purchase 50,000 shares of Common Stock that have vested or will vest within 60 days of April 19, 2002, but not options to purchase 150,000 shares that will not vest within 60 days after April 19, 2002.

- (13) Consists options to purchase 175,000 shares of Common Stock that have vested or will vest within 60 days of April 19, 2002, but not options to purchase 75,000 shares that will not vest within 60 days after April 19, 2002.
- (14) Includes options to purchase 300,000 shares of Common Stock that have vested or will vest within 60 days of April 19, 2002.

45

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS.

Since May 19, 2000, Hawaiian has invested \$3.0 million in certificates of deposit with Liberty Bank, SSB, of Austin, Texas. Liberty Bank is majority owned by John W. Adams and another individual. John W. Adams is an employee of Hawaiian, Chairman of Hawaiian's board of directors and the sole shareholder of AIP General Partner, Inc., the general partner of Airline Investors Partnership, L.P., which is the majority shareholder of Hawaiian. Current directors of Hawaiian include Edward Z. Safady and Thomas J. Trzanowski, both of whom are also employees and/or directors of Liberty Bank, SSB.

From July 17, 2000 through February 28, 2001, William F. Loftus served as executive vice president, chief financial officer and treasurer of Hawaiian. During this period, Hawaiian paid Mr. Loftus a base salary of \$152,000. During this same period, Hawaiian paid The Loftus Group, a financial and management consulting firm of which more than ten percent (10%) is owned by Mr. Loftus, \$638,535 in fees for financial consulting services, plus expenses.

On December 19, 2001, Hawaiian executed an Advisory Services Agreement with Smith Management LLC and John W. Adams, pursuant to which Hawaiian or its successor would pay, upon the completion of the proposed merger, \$4 million in cash to John W. Adams and \$1 million in cash, one million shares of Holdco common stock and Holdco notes with an aggregate principal amount of \$2 million to Smith Management. The Advisory Services Agreement provides that it will be terminated automatically upon the formal termination of the Merger Agreement. Mr. Adams, the Chairman of Hawaiian, is also the President of Smith Management.
